This program is open to nurses who have a letter of acceptance from an accredited psychiatric nurse practitioner program. Qualified candidates should also have a BSN, at least one year of nursing experience and the ability to complete the program within two academic years.

You'll receive full tuition for two years for MSN program or 3 years for DNP Program, plus money for books and more than $2,000 per month for living expenses.

As a Psychiatric Nurse Practitioner and Officer on the U.S. Army Health Care Team, you’ll provide specialized care to patients requiring mental health care. The psychiatric nurse practitioner works in the following clinical areas: inpatient psychiatric units, alcohol/drug rehabilitation programs, day treatment programs, mental health clinics and combat stress units.
