

# SAVE THE DATES

## A HEAD START ON SCIENCE

Children have an amazing curiosity about the natural world. Our lessons and activities are designed to tap into and enhance children's curiosity about the natural world and involve children making careful observations, asking meaningful questions, and conducting real investigations. During workshops with LACOE teachers, we will share our "Sense of Wonder" philosophy as you engage in developmentally - appropriate explorations of science in the everyday world. Teachers love the exciting, hands-on nature of our workshops and leave with the knowledge, inspiration, resources, and materials needed to engage their children in meaningful science experiences.

Come and see  
what we're all  
about!

Overview:  
May 19, 2018  
Sat. 8:30-12:30

Institute:  
June 25-29, 2018  
Mon-Fri 8:30-3:30  
CSU Long Beach

A Head Start on  
Science has been  
providing training  
and support to  
LACOE teachers for  
more than 15 years!
