**PHYSICAL THERAPY (D.P.T.)**

**ACADEMIC AND CAREER INFORMATION**

**NATURE OF THE WORK, EARNINGS, AND OCCUPATIONAL OUTLOOK**

Physical therapists are evidence-based healthcare professionals who diagnose and treat individuals of all ages who have medical problems or other health-related conditions that limit their abilities to move and perform functional activities in their daily lives. They offer cost-effective treatment that improves mobility and relieves pain, reduces the need for surgery and prescription drugs, and allows patients to participate in a recovery plan designed for their specific needs. In addition, physical therapists work with individuals to prevent the loss of mobility before it occurs by developing fitness and wellness-oriented programs for healthier and more active lifestyles. Physical therapists provide care for people in a variety of settings, including hospitals, private practices, outpatient clinics, home health agencies, schools, sports and fitness facilities, work settings, and nursing homes. State licensure is required in each state in which a physical therapist practices.

**Earnings and Job Outlook:** In 2018, the median pay for a physical therapist was $87,930. Employment of physical therapists is projected to grow 22 percent from 2018 to 2028 (Occupational Outlook Handbook, 2018).

**TRAINING**

Physical therapist education programs in the United States offer the Doctor of Physical Therapy (DPT). The length of professional DPT programs is typically 3 years. Primary content areas in the curriculum may include, but are not limited to, biology/anatomy, cellular histology, physiology, exercise physiology, biomechanics, kinesiology, neuroscience, pharmacology, pathology, behavioral sciences, communication, ethics/values, management sciences, finance, sociology, clinical reasoning, evidence-based practice, cardiovascular and pulmonary, endocrine and metabolic, and musculoskeletal. Eighty percent (80%) of the DPT curriculum comprises classroom (didactic) and lab study and the remaining 20 percent (20%) is dedicated to clinical education. PT students spend on average 27.5 weeks in their final clinical experience. Licensed physical therapists may choose to pursue a residency or fellowship program to enhance their knowledge and practice. Physical therapists have the opportunity to become board-certified clinical specialists but it is not required.

**ACADEMIC PREPARATION**

There is no preferred major to be eligible for admission to a DPT program. The most common undergraduate majors among accepted applicants include exercise science, biology, kinesiology, and psychology. In selecting a college major, students should consider how they will satisfactorily complete the prerequisite courses for the designated physical therapist programs in addition to the college/university’s degree and major requirements.
COURSE REQUIREMENTS

DPT programs require prerequisite science courses to be completed at a university/college within the 5-10 years prior to enrollment. Students should be prepared to identify the classes completed or planned that will fulfill the program's course requirements. Some programs only accept anatomy or physiology courses completed in a biology, neuroscience, anatomy, or integrated physiology department. Programs may not accept a combined anatomy and physiology (A&P) course or those completed in other departments, such as kinesiology.

CSULB courses which fulfill admission requirements for most U.S. Physical Therapy programs:
*Students maintain responsibility for verifying course selection with individual programs.*

IMPORTANT FACTORS CONSIDERED FOR SUCCESSFUL APPLICANTS

**STANDARDIZED TEST:** Most programs require the Graduate Record Examination (GRE) for admission.

**CLINICAL EXPOSURE:** Many programs require applicants to have volunteer or paid experiences working with patients under the supervision of a licensed physical therapist. The program may specify the settings and types of experiences required. Applicants may also be required to have a licensed physical therapist verify the hours. This experience may be an important factor in the admissions process. Students should respectfully contact physical therapy clinics, hospitals, long-term care facilities (e.g., nursing homes), and other healthcare settings in the area to find observation opportunities. See also the Physical Therapist Observation Hours.

**LETTERS OF RECOMMENDATION:** Many programs require 1-4 letters of recommendation as part of the admissions process. Programs may require references from a particular individual, such as a physical therapist, science professor, or academic advisor. If references are required, select individuals who meet the program's requirements, know the student well, and can speak to maturity, dependability, dedication, compassion, communication skills, leadership, and any hands-on experience in the field. See also Reference Requirements by Program.

**ADMISSIONS:** The Physical Therapist Centralized Application Service (PTCAS) is used for applications for physical therapy programs.

**ADMISSIONS STATISTICS:** The national average GPA for the fall 2019 entering class was **3.57 (Total)** and **3.38 (Science).**
