Several scholarships will be available to undergraduate mathematics & statistics majors who are at least sophomores and who can demonstrate reasonable financial need.

For deadline contact the Math & Stat Department Office, FO3-120

There is no application form: instead, applications should be by letter and include a resume. The letter should contain at least a paragraph explaining your interest in mathematics, your involvement in any campus or community organizations, an informal statement of financial need, and the ways in which a scholarship award would benefit your endeavor in math.

With the submission of one application, you will be automatically considered for all of the scholarships which you are eligible for.
