PROFESSIONAL VIRTUAL EVENTS

Web conferencing tools are great for small meetings and simple webinars. But what if you want to record a professional-looking virtual event with multiple camera angles and HD recording devices? Only Panopto’s video platform can handle your most complex recording scenarios using software that runs on any laptop, iPhone, or iPad.

SOCIAL LEARNING

Web conferencing tools aren’t built for quick and easy sharing of ideas, insights, and best practices. A lot of the most important learning today happens outside of formal webinars and meetings, and there’s no easier way to record and share knowledge than by using Panopto.

WEBCAST TO BIG AUDIENCES

Why limit your audience to 1,000 people? With Panopto, anyone can live stream from their laptop to tens or even hundreds of thousands at the click of a button. And only Panopto allows you to webcast multiple streams of video simultaneously without costly professional services.

RECORD DEMOS & PRESENTATIONS

Tired of poor audio quality, small video size, confusing on-screen windows, and limited replay options? With Panopto, your demos and presentations are recorded with broadcast-quality audio and full-screen video, setup is a breeze, and your recordings can be viewed on any device.

VIDEO CONTENT MANAGEMENT

What happens to your recordings when the web conference wraps up? With Panopto, your recordings are automatically uploaded to a video content management system where they’re transcribed and indexed so that people can easily find and view recording content on-demand from anywhere.

5 THINGS YOUR WEB CONFERENCING SOLUTION CAN’T DO

IF YOU USE WEBEX, GOTO MEETING, OR ADOBE CONNECT AND YOU HAVEN’T TRIED PANOPTO, YOUR VIDEO STRATEGY IS INCOMPLETE.
