

This following text is virtually identical to the preamble to the American College and University Presidents Climate Commitment, with only minor changes to phrase it as a resolution. The bracketed phrase has been added. This draft includes two possible wordings to the resolution. Information about the ACUPCC is at <http://www.presidentsclimatecommitment.org/index.php>

**Resolution recommending that the California State University, Long Beach  
become a signatory to the  
American College and University Presidents Climate Commitment**

Whereas, the Academic Senate is deeply concerned about the unprecedented scale and speed of global warming and its potential for large-scale, adverse health, social, economic and ecological effects. We recognize the scientific consensus that global warming is real and is largely being caused by humans. We further recognize the need to reduce the global emission of greenhouse gases by 80% by mid-century at the latest, in order to avert the worst impacts of global warming and to reestablish the more stable climatic conditions that have made human progress over the last 10,000 years possible, and

Whereas, we understand that there might be short-term challenges associated with this effort, we believe that there will be great short-, medium-, and long-term economic, health, social and environmental benefits, including achieving energy independence for the U.S. as quickly as possible, and

Whereas, we believe colleges and universities must exercise leadership in their communities and throughout society by modeling ways to minimize global warming emissions, and by providing the knowledge and the educated graduates to achieve climate neutrality. Campuses that address the climate challenge by reducing global warming emissions and by integrating sustainability into their curriculum will better serve their students and meet their social mandate to help create a thriving, ethical and civil society. These colleges and universities will be providing students with the knowledge and skills needed to address the critical, systemic challenges faced by the world in this new century and enable them to benefit from the economic opportunities that will arise as a result of solutions they develop, and

Whereas, we further believe that colleges and universities that exert leadership in addressing climate change will stabilize and reduce their long-term energy costs, attract excellent students and faculty, attract new sources of funding, and increase the support of alumni and local communities, and

[Whereas, the American Colleges and University Presidents Climate Commitment, a program of the Association for the Advancement of Sustainability in Higher Education, provides an effective and appropriate vehicle to achieve that goal,]

Therefore be it resolved,

- a. That the Academic Senate formally recommends that the President F. King Alexander sign the American Colleges and University Presidents Climate Commitment.
- b. That the Academic Senate formally recommends that the California State University, Long Beach become a signatory to the American Colleges and University Presidents Climate Commitment.
