1. Introduction
This document is the Department of Electrical Engineering policy for reappointment, tenure and promotion (RTP). This policy was developed in accordance with University RTP Policy (PS 09-10), and the College of Engineering RTP Policy, which govern and supersede the department policy. Therefore, the department policy is limited to providing a more detailed description of the requirements and, if necessary, additional assessment criteria deemed essential by the department. The department policy at no time will, explicitly or implicitly, abate the requirements approved by the College or the University.

The aim of the RTP process is to evaluate the professional development of each faculty in the three core areas of instruction and instructionally-related activities; research, scholarly and creative activities; and service. The review procedure should also be used as an instrument to encourage continuous improvement and professional growth at each step of the RTP process. Finally, the central thrust of the faculty review should be on the quality of performance, with measurable effects on academic and professional growth.

2. RTP Areas of Evaluation and Review
Faculty shall be evaluated in the following areas:
- Instruction and instructionally-related activities
- Research, scholarly, and creative activities (RSCA)
- Service

2.1 Instruction and Instructionally-Related Activities
The Department of Electrical Engineering values instruction and instructionally-related activities. An EE faculty member is expected to teach courses, develop new course and laboratory materials, and supervise student research projects. Furthermore, the department expects each faculty to incorporate his/her research results to update the curriculum to reflect emerging electrical engineering knowledge. Section 2.1 of the College RTP policy will be used as basis for faculty evaluation. In addition, the department’s evaluative areas should include:
- Peer evaluations of instructional activities including classroom visits by member(s) of the EE Department RTP Committee.
- Development of educational or instructionally related materials (e.g., textbooks, monographs, lab manuals, software, notes).
- Supervision and guidance of student research projects and theses.
- Incorporation of research results and industrial experience, when possible, in curriculum development.

2.2 Research, Scholarly, and Creative Activities (RSCA)
The Electrical Engineering field of study and related technologies are developing at a fast pace. Consequently, research and scholarly activities are critical to the development of the faculty in the EE Department as well as expanding the student learning experience by engaging them in the research and publication process. Every member of the EE faculty is expected to develop an ongoing research program, make significant contributions to the development and dissemination of new knowledge, and have evidence of success in the research community through a peer review process. Section 2.2 of the College RTP policy will be used as basis for faculty evaluation but the department will specifically give more weight for refereed journal publications over refereed conference publications. In addition, the department’s evaluative areas should include:
- Research awards, recognitions and honors by professional societies, or inclusion in citation index.
- Conference and seminar presentations, invited talks, or panel discussions.
• Supervision and guidance of student research projects and theses.
• Technical/industrial reports, patents awarded, and recognitions and honors by government agencies and industry.
• Involvement in joint research collaboration on and off campus.

2.3 Service
As stated in Section 2.3 of the College RTP Policy.

3. Responsibilities
As stated in Section 3 of the College RTP Policy.

4. Timelines for the RTP Process
As stated in Section 4 of the College RTP Policy.

5. Review Criteria

5.1 Reappointment
As stated in Section 5.1 of the College RTP Policy.

5.2 Tenure
As stated in Section 5.2 of the College RTP Policy.

5.3 Promotion to Associate Professor
As stated in section 5.3 of the College RTP Policy.

5.4 Promotion to Professor
Promotion to the rank of professor is the highest academic honor that the University awards to its own faculty and consequently the standards for evaluation are much higher than to associate professor. The candidate must substantially have exceeded the minimum contributions required for the rank of associate professor and must provide evidence of being a mature and productive research scholar within at least one sub-field of the faculty member's academic discipline. Since promotion to Associate Professor, the individual should demonstrate continuing adherence to all of the standards as stated in section 2.1-2.3 above and in the College’s RTP policy, in particular section 5.4.

5.5 Early Tenure or Early Promotion
As stated in Section 5.5 of the College RTP Policy.

6. Steps in the RTP Process
As stated in Section 6 of the University RTP Policy.

7. Additional Processes
As stated in Section 7 of the University RTP Policy.

8. Changes to RTP Policy
Changes to the EE RTP Policy may occur as a result of
• Changes in the CSU-CFA Collective Bargaining Agreement (CBA), as well as changes in the University RTP Policy and/or Procedures.
• Amendments approved by the majority vote of the EE tenured and probationary faculty, and approval of the College Faculty Council, College Dean, and the Provost.
