### Tech Tips from CSU Long Beach

Welcome to **Tech Tips**, the weekly technology hint designed to make your interactions with the machines in your daily life a bit less frustrating.

I'm Walter Gajewski, coordinator of the faculty media lab maintained by Instructional Technology Support Services at the California State University, Long Beach. The media lab is located in the lower level of the Library and Academic Technology Services building, room 14.

You may contact me directly at [gajewski@csulb.edu](mailto:gajewski@csulb.edu) or (562) 985-2266.

Each week a new episode **Tech Tips** will deal with common computer software applications, digital media, technology information sources or updates to our workshop calendar. Each episode will be provided as an MP3 audio file and as a text file in PDF format.

You can subscribe to automatically receive the weekly **Tech Tips** in the news reader of your choice. These news readers are also known as podcatchers, or content aggregators. The most common podcatcher is iTunes, a free download is available at <http://www.apple.com/itunes/>.

However, there are other programs available for users who don't care for the iTunes software. In the near future I'm going to be devoting a **Tech Tips** episode to various aspects of news feed and podcasting, including setting up your own feeds and podcasts.

I'm not providing an actual **Tech Tip** today. That will come in Episode two, next week, when I talk about printing a document when no printer is available. Today's episode is just to say hello, introduce myself and to let you know what to expect from in the coming weeks.

Thank you. Take care and stay tuned.
