The most important resources of California State University, Long Beach are the people who live, work and study within its facilities. To protect this resource, the university continually strives to provide a safe and healthy environment for its students, faculty, staff and visitors.

The Environmental Health and Occupational Safety Program at California State University, Long Beach serves to assist in the protection of faculty, staff, students and visitors by providing advice and guidance to university managers and supervisors to assist them in their responsibilities to actively engage in the protection of the health and safety of their employees.

The office of Safety and Risk Management has developed the following written CSU Long Beach Programs and Plans to assist university managers and supervisors in understanding their responsibilities under Federal, State, and local regulations.

**[Click here for any of the following Programs or Plans:](#)**

- Injury and Illness Prevention Program
- Hazard Communication Program
- CSULB Medical Monitoring Program
- CSULB Asbestos Management Plan
- CSULB Respiratory Protection Plan
- CSULB Respiratory Protection Plan for Police Officers
