Mini Group Project Week 3

Due: Week 4, in Activity Session

You have an exam in Week 5, covering Sections 1.1/1.2/1.3, 1.4, 2.1, 2.2, and 3.4/3.5/3.6.

**Week 3 Goals:** Work with a new group to begin preparing for Exam I.

**Individual Component (each student does this)**

**Step 1.** Read over your Off-line Homework Sections 1.1/1.2/1.3, 1.4, 2.1 and 2.2. (Your large lecture professor may not have finished introducing 2.2 material yet, but do what you can from that section. Problems from 3.4/3.5/3.6 will also be on your exam, but your large lecture professor will introduce these sections next week, so they are not part of this group assignment.) Of all of the off-line homework up to 2.2, select the three problems that are the most important for you to practice before the exam.

**Step 2.** Title your report "Math 115 – Week 3 – Individual Report – <your name here>.”

**Step 3.** Answer the following questions in your individual report. These answers can just be lists, as in the sample response found at the end of these instructions.

1. Which Off-line Homework problems have you finished? (list them)
2. Which Off-line Homework problems do you still need to finish? (list them)
3. Which three problems did you find most important to practice? For each one, briefly explain why.

**Group Component (do this together)**

**Step 4.** Share your individual report with the other members of your group. Read the individual reports that were shared with you.

**Step 5.** As a group, discuss the problems that you chose as the top three practice problems. Did you all choose the same problems? If not the same problems, was there any one problem on which you all agreed? Are you able to help each other solve these problems? Are there examples in the notes that are similar to the problems selected?

**Step 6.** Write a paragraph summarizing your discussion about preparing yourselves for the first exam.

**Step 7.** What to turn in.
Each group will turn in 4 pages. There will be one page for each individual report and one page for the group report.
To get the point of the assignment, you must work together

- If only one member of the group does the individual portion and the other two members don’t do anything, that one individual will receive full credit.
- If two members of the group do their individual portions and compile the information into a group report, and the other group member does nothing, the two group members who submitted work both receive full credit.
- If all three members do their individual portions and a group portion all three will receive full credit.
- If a person turns their individual portion in separate from the group, they will only receive partial credit.
Mini Group Project Week 3 Sample Individual Report

Math 115 – Week 3 Individual Report – Ladera Barbee

Off-line Homework that I've completed:
1.1/1.2/1.3 #1, #2 and 4, #6, #8, #9, #14, #19
1.4 #4-8
2.1 #1, #2, #6, #9

Off-line Homework that I have to do before the Notebook Check:
1.4 #1 & 2 (parts d,e,f,g only),
2.1 #3, #8, #11
2.2 #10 and 11, #17, #18, #20, #20(it shows up twice)

Top 3 Practice Problems:
1. 1.1/1.2/1.3 #14 because ...
2. 2.1 #11 because...
3. 2.2 #18 because ...
