THE CALIFORNIA STATE UNIVERSITY

The individual California State Colleges were brought together as a system by the Donahoe Higher Education Act of 1960. In 1972 the system became the California State University and Colleges, and in 1982 the system became The California State University. Today the campuses of the CSU include comprehensive and polytechnic universities and, since July 1995, the California Maritime Academy, a specialized campus.

The oldest campus, San José State University, was founded in 1857 and became the first institution of public higher education in California. The newest – CSU Channel Islands – opened in fall 2002, with freshmen arriving in fall 2003.

Responsibility for the California State University is vested in the Board of Trustees whose members are appointed by the Governor. The Trustees appoint the Chancellor, who is the chief executive officer of the system, and the Presidents, who are the chief executive officers of the respective campuses.

The Trustees, the Chancellor, and the Presidents develop systemwide policy, with implementation at the campus level taking place through broadly based consultative procedures. The Academic Senate of The California State University, made up of elected representatives of the faculty from each campus, recommends academic policy to the Board of Trustees through the Chancellor.

Academic excellence has been achieved by the California State University through a distinguished faculty, whose primary responsibility is superior teaching. While each campus in the system has its own unique geographic and curricular character, all campuses, as multipurpose institutions, offer undergraduate and graduate instruction for professional and occupational goals as well as broad liberal education. All of the campuses require for graduation a basic program of "General Education Requirements," regardless of the type of bachelor's degree or major field selected by the student.

The CSU offers more than 1,800 bachelor's and master's degree programs in some 240 subject areas. Many of these programs are offered so that students can complete all upper-division and graduate requirements by part-time late afternoon and evening study, or by distance learning from home or work via computer or television. In addition, a variety of teaching and school service credential programs are available. A number of doctoral degrees are offered jointly with the University of California and with private institutions in California.

Enrollments in fall 2003 totaled 409,000 students, who were taught by some 22,000 faculty. The system awards more than half of the bachelor's degrees and 30 percent of the master's degrees granted in California. Nearly 2 million persons have been graduated from CSU campuses since 1960.

CAMPUSES

California State University, Bakersfield, 9001 Stockdale Highway, Bakersfield, CA 93311-1099 (661) 664-2011 Dr. Horace Mitchell, President

California State University, Channel Islands, One University Drive, Camarillo, CA 93012 (805) 437-8400 Dr. Richard Rush, President

California State University, Chico, 400 West First Street, Chico, CA 95929-0150 (530) 898-4636 Dr. Paul J. Zingg, President

California State University, Dominguez Hills 1000 East Victoria Street, Carson, CA 90747-0005 (310) 243-3300 Dr. James E. Lyons, Sr., President

California State University, Fresno, 5241 North Maple Avenue, Fresno, CA 93740 (209) 278-4240 Dr. John D. Welty, President

California State University, Fullerton, 800 N. State College Boulevard, Fullerton, CA 92634-9480 (714) 278-2011 Dr. Milton A. Gordon, President

California State University, Hayward, 25800 Carlos Bee Boulevard, Hayward, CA 94542 (510) 881-3000 Dr. Norma S. Rees, President

Humboldt State University, One Harpst Dstreet, Arcata, CA 95521-8299 (707) 826-3011 Dr. Rollin C. Richmond, President

California State University, Long Beach, 1250 Bellflower Boulevard Long Beach, CA 90840-0115, (562) 985-4111 Dr. Robert C. Maxson, President

California State University, Los Angeles 5151 State University Drive Los Angeles, CA 90032 (323) 343-3000 Dr. James M. Rosser, President

California Maritime Academy, 200 Maritime Academy Drive, Vallejo, CA 94590 (707) 654-1000 Dr. William B. Eisenhardt, President

California State University, Monterey Bay, 100 Campus Center Seaside, CA 93955-8001 (831) 582-3330 Dr. Peter P. Smith, President

California State University, Northridge, 18111 Nordhoff Street Northridge, CA 91330 (818) 885-1200 Dr. Jolene Koester, President

California State Polytechnic University, Pomona, 3801 West Temple Avenue, Pomona, CA 91768 (909) 869-7659 Dr. J. Michael Ortiz, President

California State University, Sacramento, 6000 J Street, Sacramento, CA 95819 (916) 278-6011 Dr. Alexander Gonzalez, President

California State University, San Bernardino 5500 University Parkway, San Bernardino, CA 92407-2397 (909) 880-5000 Dr. Albert Karnig, President

San Diego State University, 5300 Campanile Drive, San Diego, CA 92182 (619) 594-5000 Dr. Stephen L. Weber, President

San Francisco State University, 1600 Holloway Avenue, San Francisco, CA 94132 (415) 338-1111 Dr. Robert A. Corrigan, President

San José State University, One Washington Square, San Jose, CA 95192-0001 (408) 924-1000 Dr. Paul Yu, President

California Polytechnic State University, San Luis Obispo, One Grand Avenue, San Luis Obispo, CA 93407 (805) 756-1111 Dr. Warren J. Baker, President

California State University, San Marcos, 333 South Twin Oaks Valley Road, San Marcos, CA 92069-0001 (760) 750-4000 Dr. Karen S. Haynes, President

Sonoma State University, 1801 East Cotati Avenue, Rohnert Park, CA 94928-3609 (707) 664-2880 Dr. Ruben Armiñana, President

California State University, Stanislaus, 801 West Monte Vista Avenue, Turlock, CA 95380 (209) 667-3122 Dr. Marvalene Hughes, President

 Long Beach, CA 90802-4210

ADMISSION TO THE UNIVERSITY

Admissions Procedures and Policies

Requirements for admission to California State University, Long Beach are in accordance with Title 5, Chapter 1, Subchapter 3, of the California Code of Regulations. If you are not sure of these requirements you should consult a high school or community college counselor or CSU campus Admissions office.

Electronic versions of the CSU undergraduate and graduate applications are accessible on the World Wide Web at <http://www.csumentor.edu>. The CSUMentor system allows students to browse through general information about CSU's twenty-three campuses, view multimedia campus presentations, send and receive electronic responses to specific questions, and apply for admission and financial aid. Information on CSULB requirements and deadlines can be found at www.csulb.edu.

Applications may be obtained online or at any California high school or community college or from the Admissions Office at any of the campuses of the California State University.

Importance of Filing Complete, Accurate, and Authentic Application Documents

CSU, Long Beach advises prospective students that they must supply complete and accurate information on the application for admission, residence questionnaire, and financial aid forms. Further, applicants must submit authentic and official transcripts of all previous academic work attempted. Failure to file complete, accurate, and authentic application documents may result in denial of admission, cancellation of academic credit, suspension, or expulsion (Section 41301 of Title 5, California Code of Regulations).

Undergraduate Application Procedures

Prospective students applying for part-time or full-time undergraduate programs of study in day or evening classes must file a complete undergraduate application. The \$55 nonrefundable application fee should be in the form of a check or money order payable to "The California State University" and may not be transferred or used to apply to another term. An alternate campus and major may be indicated on the application, but applicants should list as an alternate campus only a CSU campus that also offers the major. Generally, an alternate major will be considered at the first-choice campus before an application is redirected to an alternate choice campus.

Readmission

Students who break attendance by not enrolling in classes each semester, and who have not filed for educational leave, must reapply for admission. Transcripts of work completed elsewhere during the absence must also be submitted. If the absence exceeds three years, all transcripts must be replaced with official copies. Students who left under academic disqualification must submit an Academic Appeals Petition with their completed application prior to August 1 for Fall semester or December 1 for Spring semester.

Impacted Programs

The CSU designates programs as impacted when more applications are received in the filing period (October and November for fall terms, August for spring terms) than can be accommodated. Some programs are impacted at every campus where they are offered; others are impacted only at some campuses. You must meet supplementary admission criteria if applying to an impacted program.

The CSU will announce during the fall filing period those programs that are impacted and the supplementary criteria campuses will use. That announcement will be published in the *CSU Review*, and distributed to high school and college counselors, and available online at <http://www.calstate.edu/AR/csureview/>. Information about the supplementary criteria also is sent to program applicants. Detailed impaction information is also available at <http://www.calstate.edu/AR/impactioninfo.shtml>.

You must file your application for admission to an impacted program during the initial filing period. If you wish to be considered for an impacted program at more than one campus, you must file an application to each.

Supplementary Admission Criteria

Each campus with impacted programs uses supplementary admission criteria in screening applicants. Supplementary criteria may include ranking on the freshman eligibility index, the overall transfer grade-point average, completion of specified prerequisite courses, and a combination of campus-developed criteria. If you are required to submit scores for either the SAT I or the ACT and are applying for fall admission, you should take the test as early as possible and no later than October of the preceding year if applying for fall admission.

The supplementary admission criteria used by the individual campuses to screen applicants appear periodically in the *CSU Review* and are sent by the campuses to all applicants seeking admission to an impacted program.

Unlike unaccommodated applicants to locally impacted programs who may be redirected to another campus in the same major, unaccommodated applicants to systemwide impacted programs may not be redirected in the same major but may choose an alternate major either at the first choice campus or another campus.

Application Filing Periods

Terms in 2004 - 2005	Applications First Accepted	Initial Filing Period
Fall 2004	October 1, 2003	Oct 1 - Nov 30, 2003
Spring 2005	August 1, 2004	August 1-31, 2004

Filing Period Duration

Each campus accepts applications until capacities are reached. Many campuses limit undergraduate admission in an enrollment category because of overall enrollment limits. If applying after the initial filing period, consult the campus admissions office for current information.

Application Acknowledgment

You may expect to receive an acknowledgment from your first-choice campus within two to four weeks of filing the application. The notice may also include a request that you submit additional records necessary for the campus to evaluate your qualifications. You may be assured of admission if the evaluation of your qualifications indicates that you meet CSU admission requirements and campus requirements for admission to an impacted program. An offer of admission is not transferable to another term or to another campus.

Undergraduate Requirement Deadlines

It is expected that all admission requirements — including subject requirements, unit minimums, and grade-point averages — will be completed in a timely manner prior to matriculation. All requirements for a Fall semester admission must be completed by the previous Spring term. Courses taken in the Summer term prior to transfer are not used in a Fall admission decision. All requirements for a Spring semester admission must be completed by the previous Summer term. Courses taken during the Fall term prior to transfer are not used in a Spring admission decision. While not used in determining admission eligibility, applicable courses taken during the term prior to transfer may be credited towards the bachelor's degree.

Preparation and Eligibility

Undergraduate Admission Requirements — Freshmen

California State University, Long Beach continues to be the University of Choice for a talented and diverse group of California's best and brightest students. Beginning with Fall 2002, CSULB has been receiving more first-time freshman applicants than can be accommodated. To maintain the academic quality of CSULB academic programs and services, supplemental admissions criteria, are applied to first-time freshman applicants. First-time freshmen must:

- Apply on time, preferably on-line. Apply between October 1 and November 30.
- Take the SAT 1 or ACT during October but no later than December and request scores be sent to CSULB.
- Complete the CSU required 15 unit course pattern prior to graduation.
- Perform well – earn the best grades you can (including your senior year).
- Pursue a back up plan should you not be offered admission to CSULB.

You will qualify for regular admission when the university verifies that you have a CSULB qualifiable eligibility index and will have completed the comprehensive pattern of college preparatory "a-g" subjects and, if applying to an impacted program, meet supplementary criteria.

Eligibility Index

The eligibility index is the combination of your high school grade-point average and your score on either the ACT or the SAT. Beginning with admission for Fall 2004, your grade-point average is based on grades earned in courses taken during your final three years of high school that satisfy all college preparatory "a-g" subject requirements, and bonus points for approved honors courses.

Up to eight semesters of honors courses taken in the last two years of high school, including up to two approved courses taken in the tenth grade, can be accepted. Each unit of "A" in an honors course will receive a total of 5 points; "B," 4 points; and "C," 3 points.

You can calculate the index by multiplying your grade-point average by 800 and adding your total score on the SAT I. If you took the ACT, multiply your grade-point average by 200 and add ten times the ACT composite score (add 2 points to the ACT score you received if taken prior to October, 1989). If you are a California high school graduate (or a resident of California for tuition purposes), you need a minimum index of 2900 using the SAT I or 694 using the ACT to be considered for admission.

If you neither graduated from a California high school nor are a resident of California for tuition purposes, you need a minimum index of 3502 (SAT I) or 842 (ACT; add 2 points to your ACT score if taken prior to October, 1989). Graduates of secondary schools in foreign countries must be judged to have academic preparation and abilities equivalent to applicants eligible under this section.

California State University, Long Beach requires all applicants for freshman admission to submit test scores from the SAT I or ACT, regardless of your high school grade-point average. No freshman applicants will be admitted who have not submitted the required test scores.

Graduates of secondary schools in foreign countries must be judged to have academic preparation and abilities equivalent to applicants eligible under this section.

Subject Requirements

The California State University requires that first-time freshman applicants complete, with grades of "C" or higher, a comprehensive pattern of college preparatory study totaling 15 units. A "unit" is one year of study in high school.

Social Science - 2 years to include 1 year of U.S. History and/or Government

English - 4 years

Mathematics - 3 years to include algebra, geometry, and intermediate algebra

U.S. History or U.S. History and Government - 1 year

Science - 2 years with laboratory to include 1 year of biological science and 1 year physical science

Foreign Language - 2 years in the same foreign language (subject to waiver for applicants demonstrating equivalent competence).

Visual and Performing Arts - 1 year from a single UPA area to include art, dance, drama/theater, or music

Electives - 1 year selected from the areas above.

Foreign Language Waiver

The foreign language subject requirement may be satisfied by applicants who demonstrate competence in a language other than English equivalent to or higher than expected of students who complete two years of foreign language study. Consult with your school counselor or any CSU campus admission or relations with schools office for further information.

Subject Requirement Substitution for Students with Disabilities

Applicants with disabilities are encouraged to complete college preparatory course requirements if at all possible. If an applicant is judged unable to fulfill a specific course requirement because of his or her disability, alternate college preparatory courses may be substituted for specific subject requirements. Substitutions may be authorized on an individual basis after review and recommendation by the applicant's academic advisor or guidance counselor in consultation with the director of a CSU disabled student services program. Although the distribution may be slightly different from the course pattern required of other students, students qualifying for substitutions will still be held for 15 units of college preparatory study. Students should be aware that course substitutions may limit later enrollment in certain majors, particularly those involving mathematics. For further information and substitution forms, please call the Director of Disabled Student Services at (562) 985-5401.

Honors Courses

Grades, in up to eight semester courses designated as honors courses in approved subjects and taken in the last two years of high school, receive additional points in grade-point average calculations. Each unit of A in approved courses will receive a total of 5 points; B, 4 points; C, 3 points; D, 1 point; and none for F grades.

High School Students — Young Scholars Program

Students still enrolled in high school will be considered for enrollment in certain special programs if recommended by the principal and the appropriate campus department chair and if preparation is equivalent to that required of eligible California high school graduates. Such admission is only for a given program and does not constitute the right to continued enrollment. Please contact the Office of University Outreach and School Relations for more information.

Provisional Admission

California State University, Long Beach may provisionally admit first-time freshman applicants based on their academic preparation through the junior year of high school and planned for the senior year. The campus will monitor the senior year of study to ensure that those so admitted complete their senior year of studies satisfactorily, including the required college preparatory subjects, and graduate from high school. All accepted applicants are required to submit an official transcript of all college level work completed. Campuses will rescind admission for all students who are found not to be eligible after the final transcript has been evaluated.

California State University, Long Beach may provisionally admit transfer applicants based on their academic preparation and courses planned for completion. The campus will monitor the final terms to ensure that those admitted complete all required courses satisfactorily.

Transfer Applicants

If you have completed college units after graduation from high school, you are considered a transfer student. Students who have completed fewer than 60 transferable semester college units (fewer than 90 quarter units) by the established deadlines are considered lower-division transfer students.

CSULB does not currently accept applicants at the lower-division level. Students who have completed 60 or more transferable semester college units (90 or more quarter units) by the established deadlines are considered upper division transfer students. (See Undergraduate Requirement Deadlines above.)

CSULB is impacted for upper division transfer students and expects to utilize supplemental criteria for upper-division transfer admission. Upper-division transfer students who transfer from the Long Beach City College District who apply during the initial filing period and who meet CSU systemwide admission eligibility criteria by the end of the spring semester, will be admitted. Transfer Grade Point Average will be the principle component of the supplementary criteria. Upper-division transfer students who transfer from schools outside of the CSULB "local area" (Long Beach City College District) who meet CSU systemwide admission eligibility criteria by the end of the spring semester, will be ranked according to grade point average, and admitted until enrollment capacity has been reached. All upper-division transfer applicants must apply to a specific major. All students seeking admission to an impacted program or major must meet the supplemental admission criteria for the major. Students who are not admitted to the impacted program will be offered redirection to another CSU campus that is accepting applications for that major. For more details, please check the campus website at www.csulb.edu. To be considered for admission to a non-impacted major as an upper-division transfer student you must meet the following minimum standards by established deadlines:

1. Have completed 60 or more transferable units (90 quarter units).
2. Have a college grade-point average of at least a 2.0 or better (2.4 for non-California residents) in all transferable college units attempted.
3. Are in good standing at the last college or university attended.
4. Have completed at least 30 semester units (45 quarter units) of courses equivalent to general education requirements with a grade of "C" or better. The 30 units must include all of the general education requirements in communication in the English language (English composition, oral communication, and critical thinking) and at least one course of at least 3 semester units (4 quarter units) of general education, college level mathematics.

Lower-Division Transfer

California State University, Long Beach does not admit lower-division transfer students.

Test Requirements

Freshman applicants must submit scores directly to CSULB from either the ACT or the SAT I of the College Board. You should take the test no later than October or November. Registration forms and the dates for the SAT I or ACT are available from high school or college counselors or from a CSU campus testing office. Or students may write to or call:

The College Board (SATI)	ACT Registration Unit
Registration Unit, Box 6200	P.O. Box 414
Princeton, NJ 08541-6200	Iowa City, Iowa 52243
(609) 771-7588	(319) 337-1270
www.collegeboard.com	www.act.org

TOEFL Requirement

All undergraduate applicants, whose native language is not English and who have not attended schools at the secondary level or above for at least three years full time where English is the principal language of instruction, must present a score of a minimum of 500 on the Test of English as a Foreign Language (TOEFL) (applicants taking the Computer-Based Test of English as a Foreign Language must present a score of 173 or above), unless the applicant:

1. has proof of at least three years attendance at a secondary level educational institution in a country where English was the principal language of instruction.* CSULB interprets "where English was the principal language of instruction" to mean that a school is located in a country where English is the native language (the daily medium of communication of the majority of residents is English), and that the students receive academic instruction in all subjects (except foreign language courses) at all levels of education in English, or
2. completed at least 56 transferable units from accredited U.S. community colleges and/or universities and earned a grade of A, B, or C in English 100 or its equivalent*, or
3. successfully completed CSULB's American Language Institute's Intensive English Language Program.*

Undergraduate applicants who are U.S. Citizens or Permanent Residents of the U.S. and who are subject to the above TOEFL requirement may submit results from the English Language Proficiency Test (ELPT) in lieu of TOEFL. A score of 954 on the ELPT is required of such applicants.

EXCEPTION: Applicants applying for Film and Electronic Arts, which requires a 550 TOEFL score, and Journalism, which requires a 600 TOEFL score, will not be waived from the TOEFL requirement.

*For this exemption to remain valid, once having met the exemption, the student must not have left the U.S.A. for more than two years to reside or study in a country where English is not the predominant language of business, education and day-to-day societal functions.

Special Consideration

A very limited number of applicants who do not meet regular admission requirements may be considered by the University through an alternate screening process. As part of this review, admission may be offered based on institutional interests, special talents, or special circumstances. The authority to grant special admission is delegated to the Assistant Vice President of Enrollment Services based on the recommendations of the appropriate campus committees.

Systemwide Placement Test Requirements

The California State University requires each entering undergraduate, except those who qualify for an exemption, to take the CSU Entry Level Mathematics (ELM) examination and the CSU English Placement Test (EPT) prior to enrollment. These placement tests are not a condition for admission to the CSU, but they are a condition of enrollment. They are designed to identify entering students who may need additional support in acquiring basic English and mathematics skills necessary to succeed in CSU baccalaureate-level courses. Undergraduate students who do not demonstrate college-level skills both in English and in mathematics will be placed in appropriate remedial programs and activities during the first term of their enrollment. Students placed in remedial programs in either English or mathematics must

complete all remediation in their first year of enrollment. Failure to complete remediation by the end of the first year may result in denial of enrollment for future terms.

Students register for the EPT and/or ELM at their local CSU campus. Questions about test dates and registration materials may be addressed to Testing and Evaluation Services, Brozman Hall (BH) - 216.

English Placement Test (EPT)

The EPT is designed to assess the level of reading and writing skills of entering undergraduate students so that they can be placed in appropriate baccalaureate-level courses. The CSU EPT must be completed by all entering undergraduates, with the exception of those who present proof of one of the following:

- A score of "Exempt" on the augmented English CST taken in grade 11.
- A score of 550 or above on the verbal section of the College Board SAT I Reasoning Test taken April 1995 or later.
- A score of 24 or above on the enhanced ACT English Test taken October 1989 or later.
- A score of 680 or above on the re-centered and adjusted College Board SAT II: Writing Test taken May 1998 or later.
- A score of 3, 4, or 5 on either the Language and Composition or the Composition and Literature examination of the College Board Scholastic Advanced Placement program.
- Completion and transfer of a course that satisfies the General Education-Breadth or Intersegmental General Education Transfer Curriculum (IGETC) written communication requirement, provided such course was completed with a grade of "C" or better.

To file for one of the above exemptions, students may obtain an Exemption Form from Testing and Evaluation Services (562) 985-4007. Information bulletins and registration materials for the EPT will be mailed to all students subject to the requirements. The materials may be obtained from Testing and Evaluation Services.

*NOTE: The College Board SAT and Achievement Tests were replaced by SAT I and SAT II, respectively, beginning March 1994. Beginning April 1, 1995, the SAT I and SAT II exams have been scored on a new scale.

Entry-Level Mathematics (ELM) Examination Placement

The ELM examination is designed to assess the skill levels of entering CSU students in the areas of mathematics typically covered in three years of rigorous college preparatory mathematics courses in high school (Algebra I, Algebra II, and Geometry). The CSU ELM must be completed by all entering undergraduates, with the exception of those who present proof of one of the following:

- A score of "Exempt" on the augmented mathematics CST taken in grade 11.
- A score of 550 or above on the mathematics section of the College Board SAT I Reasoning Test or on the College Board SAT II Mathematics Tests Level I, IC (Calculator), II, or IIC (Calculator).
- A score of 23 or above on the American College Testing Mathematics Test.
- A score of 3 or above on the College Board Advanced Placement mathematics examination (AB or BC) or Statistics examination.

- Completion and transfer of a course that satisfies the General Education-Breadth or Intersegmental General Education Transfer Curriculum (IGETC) quantitative reasoning requirement, provided such course was completed with a grade of "C" or better.

Information bulletins and registration materials for the EPT and ELM will be mailed to all students subject to the requirements. Required exams will be indicated in the Letter of Admission. The materials may also be obtained from Testing and Evaluation Services.

Admission as a Candidate for a Second Baccalaureate Degree

The University does not admit students who already hold a bachelor's degree for the purpose of seeking a second baccalaureate degree. Exceptions are made only in the case of students seeking their second undergraduate degree in fields for which there is an identified critical need: nursing, engineering, science, mathematics, and translation and interpretation studies. Candidates for a second baccalaureate degree should apply using the undergraduate application.

Graduate and Postbaccalaureate Application Procedures

All graduate and postbaccalaureate applicants (e.g., joint PhD and EdD applicants, master's degree applicants, those seeking credentials, and those seeking certificates) must file a complete graduate application as described in the graduate and postbaccalaureate admission booklet. Applicants seeking a second bachelor's degree should submit the undergraduate application for admission. Postbaccalaureate students who wish to continue their education for personal enrichment but without seeking a degree, credential, or certificate may only enroll through University College and Extension Services. CSULB does not admit postbaccalaureate unclassified students. Applicants who completed undergraduate degree requirements and graduated the preceding term or graduate students seeking to change their degree program are also required to complete and submit an application and the \$55 nonrefundable application fee. Since applicants for postbaccalaureate programs may be limited to the choice of a single campus on each application, redirection to alternate campuses or later changes of campus choice will be minimal. To be assured of initial consideration by more than one campus, it will be necessary to submit separate applications (including fees) to each. Applications may be obtained from the Admissions Office of any California State University campus in addition to the sources noted for undergraduate applications. An electronic version of the CSU graduate application is available on the World Wide Web at: <http://www.csumentor.edu>.

Graduate and Postbaccalaureate Admission Requirements

Graduate and postbaccalaureate applicants may apply for a degree objective, a credential or certificate objective. Depending on the objective, the CSU will consider an application for admission as follows:

General Requirements – The minimum requirements for admission to graduate and postbaccalaureate studies at CSULB are in accordance with university regulations as well as Title 5, chapter 1, subchapter 3 of the California Code of Regulations. Specifically, a student is to: (1) have completed a four-year college course of study and hold an acceptable baccalaureate degree from an institution accredited by a regional

accrediting association, or is to have completed equivalent academic preparation as determined by appropriate campus authorities; (2) be in good academic standing at the last college or university attended; (3) have attained a grade-point average of at least 2.5 (A = 4.0) in the last 60 semester (90 quarter) units attempted (excluding lower-division and extension coursework taken after the degree); and (4) satisfactorily meet the professional, personal, scholastic, and other standards for graduate study, including qualifying examinations, as appropriate campus authorities may prescribe. In unusual circumstances, a campus may make exceptions to these criteria.

If you meet the minimum requirements for graduate and postbaccalaureate studies, you will be considered for admission in one of the three following categories:

Postbaccalaureate Classified – If you wish to enroll in a credential or certificate program, you will be required to satisfy professional, personal, scholastic, and other standards, including qualifying examinations, prescribed by the campus; or

Graduate Conditionally Classified – You may be admitted to a graduate degree program in this category if, in the opinion of appropriate campus authority, you can remedy deficiencies by additional preparation; or

Graduate Classified – To pursue a graduate degree, you will be required to fulfill all of the professional, personal, scholastic, and other standards, including qualifying examinations, prescribed by the campus.

Graduate and Postbaccalaureate TOEFL Requirement

All graduate and postbaccalaureate applicants, regardless of citizenship, whose native language is not English and whose preparatory education was principally in a language other than English must demonstrate competence in English. These students must receive a minimum score of 550 on the Test of English as a Foreign Language (TOEFL) (applicants taking the Computer-Based Test of English as a Foreign Language must present a score of 213 or above), unless the applicant:

1. Submits proof of having obtained a bachelor's degree from an accredited post-secondary institution where English was the principal language of instruction. CSULB interprets "where English is the principal language of instruction" to mean that a school is located in a country where English is the native language (the daily medium of communication of the majority of residents is English), and the applicant received academic instruction in all subjects (except foreign language courses) at all levels of education in English, or
2. Notification from CSULB's American Language Institute that the applicant has successfully completed levels 5 and 6 of the American Language Institute Program.

EXCEPTION: Applicants applying for Public Policy and Administration, which requires a 600 TOEFL, will not be waived from the TOEFL requirement. Also, for this exemption to remain valid for other students, once having met the exemption, the student must not have left the U.S.A. for more than two years to reside or study in a country where English is not the predominant language of business, education and day-to-day societal functions.

Auditors

Persons who have not been accepted by the University for the semester they wish to attend may request permission to audit courses through University College and Extension Services.

Students who have been accepted by the University may audit courses. See the regulation under "Grades and Administrative Symbols." The deadline to declare an "audit" grade option is the end of the third week of instruction. Follow the instructions in the *Schedule of Classes* for requesting a course as an "audit" grading option. At the end of the semester the instructor will assign an "audit" grade to the official grade sheet which will be forwarded to the Office of Enrollment Services for recording. Courses taken for audit may be repeated in subsequent terms for credit.

Courses successfully audited are listed on the student's academic record but carry no credit or grade points.

Adult Students

As an alternative to regular admission criteria, an applicant who is twenty-five years of age or older may be considered for admission as an adult student if he or she meets all the following conditions:

1. Possesses a high school diploma (or has established equivalence through either the Tests of General Educational Development or the California High School Proficiency Examination).
2. Has not been enrolled in college as a full-time student for more than one term during the past five years.
3. If there has been any college attendance in the last five years, has earned a "C" average or better in all college work attempted.

Consideration will be based upon a judgment as to whether the applicant is as likely to succeed as a regularly admitted freshman or transfer student and will include an assessment of basic skills in the English language and mathematical computation.

Senior Citizen Education Program

California State University Long Beach, is pleased to continue the Senior Citizen Education Program on campus. This program enables eligible California residents who are 60 years of age or older to enroll as regular students at a cost of \$3.00 per semester. The program, which was founded at CSULB, has been in operation since 1975. Individuals are attending courses in a variety of subject areas and class levels from freshman through graduate standing.

Note: Regular admission standards apply. Requests to waive the application filing fee must accompany the application. Once admitted to the University, registration information will be sent to the student advising them of the procedures for fee payment and the dates that they may register. Courses are available to program participants approximately three weeks before the beginning of each semester on a "space available" basis. Due to high enrollment and impacted programs some courses may not be available for participation by Senior Citizens.

Participants in the Senior Citizen Education Program are required to maintain good academic standing and are subject to all university policies, procedures, late fee payments and deadlines.

Returning Students

Returning students must reapply to the university under the same conditions and deadlines as all other applicants.

Students who have not maintained continuous attendance status are subject to the General Education requirements in

effect at the time of their re-entry to the University with the following exceptions:

Previous CSULB students who completed their entire lower-division general education package before returning to CSULB, will not be held for additional general education requirements except for the 9 upper-division capstone general education units.

Previous CSULB students who were under the pre-1981 general education requirements AND who before leaving the University completed 90 or more units, including 24 general education units in categories 1-5 (with at least one course in each area) will not be held to post-1981 general education requirements other than the requirement of 9 upper-division units. Such students may satisfy the general education mandate by completing the pre-1981 40-unit requirements appropriately and completing the 9 unit upper-division requirement (overlap is permitted).

California Community College transfer students who provide official full certification of general education requirements will not be held for additional general education requirements except for the 9 upper-division capstone general education units including the Human Diversity requirement.

Insurance Requirement

Effective August 1, 1995, as a condition of receiving an I-20 or DS-2019 form, all F-1 and J-1 visa applicants must agree to obtain and maintain health insurance as a condition of registration and continued enrollment in the California State University. Such insurance must be in amounts as specified by the United States Department of State and NAFSA: Association of International Educators. The campus President or designee will determine which insurance policies meet these criteria. Further information may be obtained from the Center for International Education, Brotman Hall 201, (562) 985-4106.

Hardship Petitions

The campus has established procedures for consideration of qualified applicants who would be faced with extreme hardship if not admitted. Petitioners should write the Admissions Office regarding specific policies governing hardship admission. (See Admissions Procedures and Policies at the beginning of this Section.)

Concurrent Enrollment

All CSULB students wishing to enroll concurrently at CSULB and one of the other 23 California State University campuses must request permission to do so from Enrollment Services. Concurrent enrollment within The California State University system is limited to students who have completed a minimum of 12 units at CSULB, have a minimum 2.0 grade-point average, are in good academic standing and have paid fees at CSULB for 12 units or more regardless of the total number of units earned at both campuses. No additional fees may be collected after the last day to add classes. Concurrent Enrollment is subject to space availability and registration priority policies at the host campus.

Upper-division students wishing to have concurrent enrollment at CSULB and another institution outside of The California State University system must request permission from Enrollment Services.

No graduate student may register concurrently at this and any other collegiate institution without advance permission. Permission may be given for concurrent enrollment at CSULB and other institutions if recommended by the department graduate advisor and approved by the Dean of the appropriate college. Forms for concurrent enrollment may be obtained from the college office. When such permission is granted, the academic load at CSULB must be reduced accordingly.

Visitor Enrollment Within the CSU

Students enrolled in any CSU campus may apply to transfer temporarily to another CSU campus in Visitor status, if they have (1) completed 12 units at the home campus, (2) have earned at least a 2.0 cumulative GPA at the home campus, (3) are in good academic standing at the home campus, and (4) are eligible to register under continuing status at the home campus. Approval for visitor enrollment is valid for one term only and is subject to the host campus policies including application deadlines, space availability, and registration priority. Details and Visitor Enrollment Applications are available at the Office of Enrollment Services. Students from other CSU campuses seeking visitor status at CSULB must also contact their home registration office for additional information.

Other Applicants

Applicants not admissible at this time under any of the preceding provisions are advised to enroll in another institution, such as a community college, to prepare for admissibility at a future date.

Open University (Adjunct Enrollment) — Through Open University, students who are NOT matriculated in the University may take regular University classes for academic credit on a "seat available" basis with permission of the department chairperson and the course instructor. Open University enrollment does NOT constitute admission to CSULB. Students may apply up to 24 units of Open University Credit toward a baccalaureate degree. At the option of the appropriate college and department, up to 6 units of Open University Credit may be applied to a graduate degree. This limit may be increased to 9 units in some instances. For specifics, check with the department chair. For more information call University College and Extension Services at (562) 985-5561.

University College and Extension Services — University College and Extension Services (UCES) programs are designed to meet the personal and professional development learning needs of the community. Through its credit and professional development (non-credit) classes, certificate programs, seminars and special programs, teleconferences, and customized work-site training, UCES brings the resources of CSULB to individuals and groups in formats convenient to their life/work situations. UCES' Integrated Distance Education for Adult Students (IDEAS) continuously develops courses for delivery on the World Wide Web. Unless they are offered in fulfillment of a degree program, Special Sessions courses do not require admission to CSULB. UCES also administers the winter session program, in addition to a variety of credit courses throughout the academic year. For a free bulletin of current offerings, call (562) 985-5561 or stop by the UCES office, located at Foundation Education Center (FND 104), 6300 State University Drive.

Visitors

The University restricts attendance in class sessions to those who have been formally registered in the course and who maintain good standing as students. Please see "Audit" and "Visitors to Classes" under General Regulations.

Summer Session and Winter Session Students

Summer and Winter Sessions enrollment is open to all CSULB students, prospective students, students from other colleges and universities, and interested individuals from the community. No application or admissions process is required for summer and winter registration.

Registration in Summer as an Open University student does not insure the privilege of enrolling in the fall or spring semester. To register for Winter Sessions courses, students should contact University College and Extension Services at (562) 985-5561. To register for Summer Sessions, contact Enrollment Services at (562) 985-5471 (ext. 123).

Student Orientation, Advising and Registration (SOAR)

Newly admitted freshman and transfer students are strongly encouraged to participate in the Student Orientation, Advising, and Registration (SOAR) program. Participation affords students an opportunity to receive initial academic advising concerning general education and major requirements, assistance with course selection and the ability to register earlier for classes. An orientation to student services and campus resources is also provided. Registration brochures are mailed to newly admitted students. Information can also be obtained on the department's website (www.csulb.edu/soar). There is a fee associated with the program that includes the cost of the University *Catalog*, the *Schedule of Classes*, other materials, a parking permit and lunch.

Registration Procedures

When admission or re-admission requirements have been satisfied, the student is eligible to register for classes at the University. Undergraduate students new to the University will receive information about the Student Orientation, Advising and Registration Program (SOAR) which is designed to help the new student with registration procedures. It should be noted that no new undergraduate student will be allowed to register for classes prior to SOAR. Registration for students not participating in SOAR will be conducted after all of the SOAR workshops are concluded.

Students returning to CSULB after an approved educational leave will receive registration information in the mail. Returning students should purchase the *Schedule of Classes* in the University Bookstore before registration. Registration dates, times and detailed instructions are included in the *Schedule of Classes* and at www.csulb.edu/enrollment.

Students are not permitted to attend any class for which they have not officially registered. The deadline to register is the end of the third week of classes.

NOTE: Admission and readmission deadlines are much earlier.

Adding Classes

Students may add classes via "MyCSULB" or IVR for the first two weeks of the semester. During the third week of the semester written permission, on a Late Registration Request form, is required from the instructor and a stamp of approval is required from the department.

Students receiving permission to add classes by MyC-SULB or IVR or who have been added to an instructor's wait list or roster must complete the add procedures by the dates listed each semester in the *Schedule of Classes*. No request to add classes will be considered after the third week of the semester unless there is an approved technical error.

Note: Instructors, advisors and departments cannot add students into classes. The add procedures must be completed by the student.

Advanced Placement

California State University, Long Beach grants credit toward its undergraduate degrees for successful completion of examinations of the Advanced Placement (AP) Program of the College Board. Students who present scores of three or better will be granted up to six semester units (nine quarter units) of college credit for each AP course.

Applicants to CSULB who wish to obtain lower division course credit for completed International Baccalaureate Higher Level examinations must submit an official IB transcript. Course equivalency for Higher Level examinations completed with a grade of 5 or higher is determined by the faculty of the appropriate department subsequent to careful review of course syllabi.

For questions or information, please call Enrollment Services at (562) 985-5471 or consult your department.

Credit by Examination

Students may challenge courses by taking examinations developed at the campus. Credit will be awarded to those who pass them successfully. The Petition to Establish Credit by Examination for Unit Credit is available in the department offering the course and in Enrollment Services. Approval by the department offering the examination is required prior to registering for the course. The examination must be conducted within the first three weeks of classes. If a student does not take the examination at the time offered or does not pass the examination, he or she may either continue in the course as a regular student or withdraw officially from the course, following the procedures for withdrawal pertaining to all courses. (See the current *Schedule of Classes*.) For a student passing the examination, a grade of CR will be recorded at the end of the semester. Please refer also to Unit Credit by Examination in the General Regulations section of this *Catalog*.

Credit for Noncollegiate Instruction

The California State University grants undergraduate degree credit for successful completion of noncollegiate instruction, either military or civilian, appropriate to the baccalaureate degree, that has been recommended by the Commission on Educational Credit and Credentials of the American Council on Education. The number of units allowed are those recommended in the Guide to the Evaluation of Educational Experience in the Armed Services and the National Guide to Educational Credit for Training Programs.

Immigration Requirements for Licensure

The Personal Responsibility and Work Opportunity Reconciliation Act of 1996. (P.L. 104-193), also known as the Welfare Reform Act, includes provisions to eliminate eligibility for federal and state public benefits for certain categories of lawful immigrants as well as benefits for all illegal immigrants.

Students who will require a professional or commercial license provided by a local, state, or federal government agency in order to engage in an occupation for which the CSU may be training them must meet the immigration requirements of the new Personal Responsibility and Work Opportunity Reconciliation Act to achieve licensure. Information concerning the regulation is available from Academic Affairs, (562) 985-4128.

Intrasystem and Intersystem Enrollment Programs

Students enrolled at any CSU campus will have access to courses at other CSU campuses on a space available basis unless those campuses or programs are impacted. This access is offered without students being required to be admitted formally to the host campus and sometimes without paying additional fees. Although courses taken on any CSU campus will transfer to the student's home CSU campus as at least elective credit, students should consult their home campus academic advisors to determine how such courses may apply to their degree programs before enrolling at the host campus.

There are two programs for enrollment within the CSU and one for enrollment between CSU and the University of California or California community colleges. Additional information about these programs is available from Enrollment Services.

CSU Concurrent Enrollment – matriculated students in good standing may enroll at both their home CSU campus and a host CSU campus during the same term. Credit earned at the host campus is automatically reported to the home campus to be included on the student's transcript at the home campus. Full-time fees are payable at the home campus regardless of the total number of units earned at both campus.

CSU Visitor Enrollment – matriculated students in good standing enrolled at one CSU campus may enroll at another CSU campus for one term. Credit earned at the host campus is reported automatically to the home campus to be included on the student's transcript at the home campus.

Intersystem Cross Enrollment – matriculated CSU, UC, or community college students may enroll for one course per term at another CSU, UC, or community college and submit a written request with payment for a transcript of record be sent to the home campus.

Health Screening

Entering CSULB students are required to present proof of the following immunizations to the CSU campus they will be attending before the beginning of their first term of enrollment. Measles and Rubella: All new and readmitted students born after January 1, 1957 must provide proof of full immunization against measles and rubella prior to enrollment. Hepatitis B: All new students who will be 18 years of age or younger at the start of their first term at CSULB must provide proof of full immunization against Hepatitis B before enrolling. Full immunization against Hepatitis B consists of three timed doses of vaccine over a minimum 4 to 6 months period. If you need further details or have special circumstances, please consult the Student Health Services. Each incoming freshman who will be residing in on-campus housing will be required to return a form indicating that they have received

information about meningococcal disease and the availability of the vaccine to prevent one from contracting the disease and whether or not he or she has chosen to receive the vaccination. These are not admission requirements, but shall be required of students as conditions of enrollment in CSU.

The California State University has vaccination requirements for new students. Immunity must be shown for:

1. Measles and Rubella – Required of all new students *born 1957 or later* as ordered by the California State University. Required of all students, regardless of age, who reside in residence halls, students whose primary and secondary schooling were obtained outside the United States, students who are enrolled in dietetics, medical technology, nursing, physical therapy, and any practicum, student teaching, or field work involving preschool-age children or taking place in a hospital or health care setting.
2. Hepatitis B - Required of all new students *who are 18 or younger* on their first day of class, as mandated by California State Law and the California State University.

References: CSU Executive Order No. 730 Immunization Requirements / California Assembly Bill 1107.

Clearance is obtained by presenting to Student Health Services 1) a medical immunization record showing dates of shots given, or 2) a record of blood tests showing immunity, or 3) receiving immunization(s), or 4) making a request for medical or personal religious exemption. You may receive the immunizations from your health provider, HMO, or Public Health Department at low or no cost. You may receive the immunizations at Student Health Services: Hepatitis B is at Student Health Services cost for each injection (series of 3); Measles and Rubella is at no charge. Acceptable proof may be by records from high school, private health care providers, and local health departments. Failure to comply will result in a "hold" on future registration.

Measles and Rubella are childhood diseases with potentially serious effects on adult health. Hepatitis B is a viral infection that affects the liver with potentially serious life long health consequences. Vaccination has been shown to be safe and effective in providing protective immunity through a series of three shots given over a four to six month period. Vaccination is available on request at Student Health Services. More complete information is available by phone at (562) 985-4771, or on the Health Services website at www.csulb.edu/centers/shc; for recorded information, call the Immunization Hotline at (562) 985-5411. Other useful vaccine information is available through the United States Centers for Disease Control National Immunization Program (website www.cdc.gov/nip/.) Specific vaccine information statements may be found at www.cdc.gov/nip/publications/VIS/default.htm.

Reservation

The University reserves the right to select its students and deny admission to the University or any of its programs as the University, in its sole discretion, determines appropriate based on an applicant's suitability and the best interests of the University.

Articulation/California Articulation Number (CAN) System

Lower division course-to-course articulation is a formal, written faculty-approved agreement that identifies courses (or sequences of courses) that are comparable to, or acceptable

in lieu of, specific course requirements between the "sending" campus and the "receiving" campus. Course articulation is the "roadmap" that allows a smooth academic transition between the segments of higher education in California.

California State University, Long Beach participates in the CAN System. The CAN system is a cross-reference course identification system designed to identify lower-division, transferable courses commonly presented by transferring students. The CAN system not only simplifies the transfer process, but makes it easier for students, faculty, and counselors.

The development of a written faculty-approved bilateral articulation agreement for each course with four public four-year institutions provides the foundation of the CAN system. Articulation agreements for each course are periodically reviewed with each campus by the faculty and Department Chairs.

The CAN system is based on bilateral course articulation – courses considered to be comparable, not necessarily identical, and acceptable "in lieu of" each other. The system assures students that CAN courses on one participating campus will be accepted "in lieu of" the comparable CAN course on another participating campus. Example: CAN FCS 2 on one campus will be accepted for CAN FCS 2 on another participating campus. Each participating campus not only retains and uses its own course number, prefix, and title, but also adds the appropriate CAN designation parenthetically in its publications when it has qualified the course.

CSULB now articulates some pre-baccalaureate courses. For further information contact the University Articulation Office, (562) 985-8221 or 985-7171.

Courses (ACCT)

Lower Division

201. Elementary Financial Accounting (3)

Introduction to financial accounting theory, practice. For business majors. Laboratory and/or class computer applications are a requirement of the course.

Upper Division

300A-B. Intermediate Accounting (4,4)

Prerequisites: 300A: ACCT 201 or equivalent with a grade of "C" or better; 300B: ACCT 300A with a grade of "C" or better. Accounting theory including recording, valuation, and statement presentation of assets, liabilities, capital, earnings; funds statements; financial analysis; compound interest theory and applications. Laboratory and/or class computer applications are a requirement of the course.

310. Cost Accounting for Managers (3)

Prerequisites: ACCT 201 or equivalent. Use and interpretation of financial statements; evaluation of accounting information systems; accounting for and analysis of costs; managerial use of accounting data for planning and decision making. Not open to accounting majors for course or unit credit. Lab and/or class computer applications are a requirement of the course.

320. Cost Accounting (4)

Prerequisites: ACCT 201 or equivalent with a grade of "C" or better. Theory and practice of cost accounting. Managerial use of cost accounting data for planning, controlling and decision making. Emphasis on cost accumulation and management information systems. Laboratory and/or class computer applications are a requirement of the course.

400. Advanced Accounting (4)

Prerequisites: ACCT 300B with grade of "C" or better. Specialized problems in partnership and corporate accounting, consolidations, foreign currency transactions and translations, fund accounting and selected topics. Laboratory and/or class computer applications are a requirement of the course.

451. Federal Tax Law II (4)

Prerequisites: any upper division accountancy course with a grade of "C" or better. Federal income taxation of partnerships, corporations, s corporations, personal and family tax planning, and ethics. Laboratory and/or class computer applications are a requirement of the course.

465. International Accounting (4)

Prerequisites: Any 300-level accounting course with grade of "C" or better. Contemporary accounting theory and practice from an international perspective. Comparative accounting systems in various countries based on prevailing practice in the United States. Analysis of international accounting and auditing standards. Laboratory and/or class computer applications are a requirement of the course.

470. Auditing (4)

Prerequisites: ACCT 300A, 300B, 320 with grades of "C" or better. Problems of verification, valuation and presentation of financial information in reports covered by the opinion of an independent public accountant. Major concepts of operational auditing and its relationship to the independent audit. Responsibilities of the public accountant, internal auditor and rules of professional conduct. Laboratory and/or classroom computer applications are a requirement of the course.

480. Accounting Systems and Data Processing (4)

Prerequisites: IS 300, ACCT 300B and 320 with grades of "C" or better. Course is designed to familiarize students with the accounting information systems development process. Major topics include analysis, design, development and implementation of accounting information systems. Consideration will be given to the automation of accounting information systems through the use and application of computers. Laboratory and/or classroom computer applications are a requirement of the course.

493. Accounting Internships (3)

Prerequisite: ACCT 300B, Accounting GPA 3.0, overall GPA 3.0. Students work in public accounting or accounting divisions of private industry or governmental agencies to gain accounting experience in real world situations. Class seminar analysis, evaluation of academic theory in terms of the real world environment

495. Selected Topics (I-4)

Consent of instructor. Topics of current interest in accounting selected for intensive study. May be repeated for a maximum of 8 units. Topics will be announced in the *Schedule of Classes*.

497. Directed Studies (I-4)

Prerequisites: Consent of instructor and department Chair, on Dean's List and 3.0 GPA or higher in accounting. Individual projects, study and research of advanced nature in accounting.

660. International Accounting (3)

International accounting theory and practice. Comparison of United States GAAP and auditing standards with IAS and practice in other countries. Letter grade only (A-F).

670. Contemporary Problems in Financial Reporting (3)

Examination of Generally Accepted Accounting Principles and literature dealing with financial accounting and reporting. Emphasis will be on current issues facing corporations and the accounting profession. Letter grade only (A-F).

680. Financial Statement Analysis (3)

Understanding and use of financial reporting for making investing and lending decisions. Letter grade only (A-F).

695. Special Topics (1-3)

Prerequisites: Consent of instructor. Topics to be announced in the *Schedule of Classes*. May be repeated to a maximum of 6 units with different topics. Letter grade only (A-F).

697. Directed Studies (1-3)

Prerequisite: MBA standing and consent of instructor. Individual study under the direction of the faculty. Letter grade only (A-F).

Graduate Prerequisite Course**500. Managerial and Financial Accounting (3)**

Prerequisite: MBA standing required. Evaluation of accounting systems, preparation of financial statements, computer information processes and analysis and interpretation of accounting information as an aid to business decisions. Laboratory and/or class computer applications are a requirement of the course. Letter grade only (A-F).

Graduate Level**610. Advanced Cost Accounting, Budgeting and Control (3)**

Prerequisite: ACCT 500 or equivalent with a grade of "C" or better. Problems in planning, budgeting and cost control for decision making from a quantitative analysis approach with emphasis on evaluation of the accounting information system. Laboratory and/or class computer applications are a requirement of the course. Not open to students with credit in ACCT 510. Letter grade only (A-F).

620. Contemporary Problems in Management Accounting (3)

Examination of the literature on profit planning, control, and decision making. Current problems in management accounting; behavioral implications of management information systems; quantitative approaches to managerial accounting. Letter grade only (A-F).

630. Accounting Information Systems (3)

Information requirements and transaction processing procedures relevant to integrated accounting systems, including computer systems analysis, design, and controls. Letter grade only (A-F).

640. Tax Research and Planning (3)

The study of the primary sources of income tax law; their uses and interrelationships in researching problems arising under the federal tax laws. Research techniques will be applied to compliance and tax planning problems of individuals, business organizations, and estates and trusts. Analysis of the organization of the Internal Revenue Service and the procedures relating to audits, tax collections, criminal prosecutions, and federal tax litigation. Letter grade only (A-F).

650. Accounting for Governmental and Not-for-Profit Organizations (3)

Financial and managerial accounting concepts as they apply to organizations whose objectives are primarily to provide service rather than generate a profit. Letter grade only (A-F).

ACADEMIC ADVISING

University undergraduate academic advising services and academic departments are responsible for providing academic direction for new and continuing students. In addition, academic departments provide academic advising for graduate students.

Undergraduate advisors, both in advising service offices and in academic departments, assist students to develop educational plans that are compatible with students' interests, academic preparation and educational and career goals.

While advising offices mainly provide information and advise about general education, academic departments advise students about their major requirements and other important academic issues. Lists of faculty advisors, their locations and phone numbers appear each semester in the *Schedule of Classes*. Faculty advisors also provide academic advisement and information about minors, certificates, internships and masters programs. Students are advised to check with advisors often for current and relevant information.

The following listings are of advising services that are available to students. Some are involved in special programs. Some are major-specific such as Liberal Studies. The list also includes specific advising services such as the Academic Advising Center. All are anxious to assist students.

Advisement Centers on Campus

Academic Advising Center

The Academic Advising Center provides services to the general University student population as well as prospective CSULB students.

Center Services

- Provide advisement workshops for prospective, transfer, and adult reentry students
- Provide academic information for prospective freshmen and their parents
- Provide small group workshops for entering students
- Provide a home-base to undeclared students
- Provide total academic program planning for entering and continuing students
- Provide unofficial Degree Audits for entering and continuing students
- Provide General Education advising for continuing students
- Provide information, advisement and special evaluation services to adult reentry students
- Provide mandatory freshman workshops for second-semester class registration
- Provide assistance and information with and for the academic appeals process
- Provide academic probation/disqualification intervention services to high-risk students (in the "Strategies for Academic Success" program and in one-on-one sessions)

- Provide special advisement services to undeclared and pre-majors
- Provide the parent orientation program (POP) to the parents of entering students each summer

The Academic Advising Center is located in Academic Services, room 124. The telephone number is (562) 985-4837. The Center is open for advising Monday - Thursday from 9:00 a.m. - noon and 1:00 p.m. - 5:00 p.m. and Friday from 9:00 a.m. - noon. Call for evening appointment availability. Hours may vary during the holidays and summer.

Center for Student-Athlete Services

The Center for Student-Athlete Services (CSAS) provides support services for the NCAA Division I student-athletes. The CSAS staff provide total advisement on academic program planning to meet CSULB graduation requirements and NCAA eligibility requirements, appropriate course suggestions to meet general education and major requirements, and assist in the identification and clarification of educational and vocational goals.

The CSAS also provides the opportunity for freshmen and new transfer student-athletes to participate in transitional support programs designed to capitalize on the student-athletes' athletic skills, while learning to transfer those skills to classroom success. CSAS actively monitors student-athlete academic progress and provides referrals to various campus support services to enhance their academic performances.

The CSAS is open Monday 8:00 AM to noon and 2:00 PM to 5:00 PM; Tuesday, Wednesday, and Thursday 8:00 AM to 5:00 PM; and Friday from 8:00 AM to 2:00 PM. CSAS is located in the Physical Education Building, PE -1, room 63. Students may call (562) 985-4777 for more information.

Educational Equity Services

Educational Equity Services has two advising components. They are as follows:

Educational Opportunity Program (EOP) is a state funded program that has developed special services to help students overcome the obstacles that may prevent them from furthering their education and reaching their potential. Students that are interested in being considered for EOP must declare their intentions on the University application at the time they apply to the University.

Student Support Services Program (SSSP) is a federally funded program designed to assist students in achieving their maximum potential in higher education. Students are referred to SSSP by faculty, staff and students of CSULB. Interested students apply directly to the program for participation. In addition to an academic need, one of the following must apply for a student to be eligible for SSSP services:

- Low income and first generation college student
- Physically disabled and/or learning disabled
- Low income only
- First generation only

Students should check with SSSP regarding their eligibility for program participation.

Educational Equity Services:

- Financial Aid Assistance
- Orientation to college-helping students adjust to the college environment
- Academic advising-guidance with graduation requirements, major and course selection
- Writing and college transition course (EOP 100)
- Individual counseling
- Peer advising
- Tutorial and supplemental instruction assistance covering a wide range of courses
- Career counseling
- Probation intervention
- Writing Proficiency Examination workshops
- Graduate placement information

Educational Equity Services is located in Liberal Arts (LA) 1-119. The telephone number is (562) 985-5637. Students are seen by appointment.

Pre-Baccalaureate Advising and Support Services

The Pre-Baccalaureate Advising and Support Services (PASS) provides advising as well as support to students in course placement and in developing the English and mathematics skills needed to prepare them for the required Freshmen-level English composition and/or mathematics courses. PASS does this by providing a combination of services.

Placement To receive information about placement into appropriate level courses and to maintain compliance with Executive Order 665, PASS monitors course placement by advising students into the following remedial and developmental courses: ASAM 1, B/ST 1, CHLS 1, ALP 145, ALP 150, MATH 1, and/or MATH 10. If placed in these courses, students must complete the remedial requirement within one year.

Tracking PASS monitors students' progress through the sequence of remedial and/or developmental English and math courses required for entrance into Freshmen-level English composition and/or mathematics courses. Our goal is to be sure that students are making progress and completing the ILE classes as stated in Executive Order 665.

Intervention If students have difficulty in any course while enrolled in the remedial/developmental English and/or math courses, PASS counselors can help students by recommending referrals as necessary such as tutoring, diagnostic testing, and learning skills strategies.

The Pre-Baccalaureate Advising and Support Services is located in Academic Services, room 14. The office is open from 9:00 a.m.- noon and 1:00 p.m.- 5:00 p.m. Monday through Thursday and 9:00 a.m.- noon on Friday. The telephone number is (562) 985-7895.

Interdisciplinary Studies

Interdisciplinary Studies students can create an individualized program of study using courses from a variety of academic majors. Coastal protection, marine sports nutrition, biogeography, biomedical ethics and classical studies are among the many diverse areas of concentration recently pursued by students in the Interdisciplinary Studies Program.

The undergraduate degree is a combination of two or more disciplines representing at least 40 units developed in consul-

ation with Faculty Advisors from the respective departments. The program also offers a Master of Arts and Master of Science degree in Interdisciplinary Studies.

The Interdisciplinary Studies Program is located in Academic Services, room 127. Call (562) 985-2396 for more information.

CSULB Learning Alliance

The Learning Alliance is a two-year academic program for students who seek an active, personalized college experience. It is designed to help first-time freshmen make a positive academic and social transition to CSULB. This academic learning community offers students a chance to take classes together, learn from challenging instructors and establish closer ties to CSULB through campus involvement. Students qualify for the program based upon test scores (SAT, ACT, AP, and/or EPT) and their desire to become part of a community that enables them to make well-informed choices about majors and career/life goals. Each fall, the Learning Alliance accepts approximately 200 first-time freshmen to the program, which is open to all majors both declared and undeclared. New students enroll in two connected general education classes in the fall where faculty members work together to integrate course subject matter. In the spring, Alliance students enroll in additional connected general education classes. During each semester of the sophomore year, students maintain their involvement with the program by continuing to take general education classes. As a result of their in-class connections, students have opportunities to make new friends and form study groups.

Specific benefits for Learning Alliance students include personalized academic advisement, guaranteed general education courses, support from professional staff members, student-centered professors, opportunities for campus involvement, and access to the Alliance student lounge and computer lab.

First-time freshmen are invited to apply for space in the Learning Alliance. You are eligible if you have less than 18 transferable units (no credit for classes we offer) with a cumulative GPA of 2.0/greater and one of the following English test scores: SAT Verbal score of 550/ greater, EPT score of 148/greater, English Advanced Placement (AP) Exam score of 3/greater, or ACT English score of 24/greater. Spaces are also available for students scoring at the English Review Level. Qualifying scores for this level include a 540/less on the SAT Verbal OR a 23/less on the ACT English, in addition to scoring a 139-147 on the EPT. Applications are accepted on a first-come, first-served basis. For more information contact the Learning Alliance at (562) 985-7804, visit www.csulb.edu/depts/alliance/, or stop by LA4-202.

Department of Liberal Studies

The Department of Liberal Studies serves two distinct populations: 1) Those who are interested in becoming elementary teachers and 2) Those with more varied academic or career goals who would prefer a sound generalist program to one requiring early specialization. The General Education requirements for students majoring in Liberal Studies are unique. Liberal Studies is not only an approved major, but also an approved alternate general education program. In completing the Liberal Studies major, students concurrently satisfy general education.

The Department of Liberal Studies seeks to provide timely and accurate academic advising to all Liberal Studies Majors. To meet that goal, students wishing to declare Liberal Studies as their major must attend an open-file workshop in order to declare the major. Prior to attending this workshop, students must submit a complete set of transcripts of all college work completed (unofficial copies are fine), so that the Department can provide an official Summary of Credits for the major. After students attend the open-file workshop and are declared into the major, they may make appointments with well-trained student peer advisors, or if special circumstances are present, with the Department Director of Programs or Assistant Director. Walk in advising hours are also available each week during the academic year.

The Liberal Studies Office is located in Academic Services, room 127. During the academic year, the office is open from 9:00 a.m. to 5:00 p.m. Monday, Tuesday, and Thursday. Extended hours are available every Wednesday from 9:00 a.m. to 6:00 p.m., and from 9:00 a.m. to 1:00 p.m. on Friday. Hours may vary during holiday and vacation periods. Students may call (562) 985-4228 for more information.

The MESA Center

The MESA (Mathematics, Engineering, Science, Achievement) Center provides academic advisement and counseling services to the "historically" underrepresented students in all of the Engineering disciplines: Aerospace, Chemical, Civil, Computer Engineering and Computer Science, Electrical, Engineering Technology, and Mechanical Engineering. This includes the General Education and the upper-division requirements (also referred to as Interdisciplinary courses (IC)). The MESA Engineering staff members work directly with the engineering department undergraduate advisors to provide up-to-date information on all engineering course requirements and changes.

Academic advisement is available in the MESA Engineering Center by appointment and on a walk-in basis, as time permits. The Center is open Monday through Friday from 9:00 a.m. - 5:00 p.m. For additional information, call the MESA Center at (562) 985-8014 or stop by the office which is located in the Engineering 2, Room 300.

Parents' Orientation Program (POP)

POP is designed to inform parents about baccalaureate requirements, the University library, safety, financial aid, housing and other important University issues so they may better assist their children to success at CSULB. POP is presented by the Academic Advising Center. The telephone number for POP information is (562) 985-5458.

Strategies for Academic Success Program (Academic Probation Intervention)

This is a university-wide program designed for undergraduate students who are on academic probation (either the CSULB or all college cumulative grade-point average is below 2.0). The program includes information about university policies and procedures, the reasons students encounter academic problems, and, lastly, how and where to receive assistance from campus services and offices to be a successful student.

Any undergraduate whose CSULB or overall cumulative grade-point average (GPA) is below 2.0 may participate in the program. Declared graduate students and credential candidates who are on probation should contact their department for information and assistance.

Attendance in this program is not mandatory but it is highly recommended.

If you would like more information or if you would like to sign up for a workshop please call us at (562) 985-7847 or stop by the Academic Advising Center, located in Academic Services (formerly Library East), room 124. Workshops are scheduled at a variety of times during each semester.

Student Access to Science and Mathematics Center (SAS)

Student Access to Science and Mathematics Center (SAS) encourages and supports undergraduate and graduate students as they prepare for careers in the sciences and/or mathematics. There are many programs that combine to make up SAS. Two programs in particular which relate to academic advising are Science Safari to Success and EONS (Enrollment Orientation to the Natural Sciences). Science Safari and EONS are orientation programs for all incoming freshmen and transfer students. These programs welcome students to the College of Natural Sciences and Mathematics by providing academic advising, overview of career opportunities and degree programs, peer mentoring, and access to appropriate courses for students majoring in the sciences and/or mathematics

For more information or assistance call (562) 985-4682, or come by the SAS Center located in Faculty Office Building 5, Room 109 (FO5-109).

University Honors Program

Students with SAT scores of 1,100 or above and a high school GPA of 3.3 or above or with a college GPA of 3.2 or above who still need 21 units of General Education are urged to apply to the University Honors Program. Interested students are urged to apply for an interview with the Director of the program. Applicants who are accepted to the Program are given personal advisement and schedule planning for the following semester. The Program requires no extra classes and includes small discussion classes with students who share similar interests and abilities; personalized academic advisement and guidance; opportunities for a distinguished undergraduate record as one of fewer than 350 students on campus; professors' profiles of each student's individual performance placed in a file for job and graduate school applications; and the opportunity to do an undergraduate thesis project in the area of the student's major.

It is entirely possible to graduate in four years and to be recognized at graduation as having fulfilled all the requirements of the Honors Program. Students who are interested should telephone Director Dr. Albie Burke or Duan Jackson at (562) 985-4706 to request an informative brochure and an application which, when submitted, will be responded to with an invitation for a personal interview and individual program advisement. The program is located in the University Library, Room 213.

Frequently Asked Questions

Students ask many of the following questions. Successful students know the answers to these frequently asked questions. Please read them carefully. Knowing these answers can help you avoid pitfalls during your first semesters on campus. For further information, contact the Academic Advising Center at (562) 985-4837.

- 1. What are the deadlines for admission to CSULB?* The University begins to accept applications for Fall semester admission in November of the preceding year; Spring semester admission begins in August of the preceding year. However, only applications received in the months of November and August are given priority. Some departments have supplemental admissions requirements; contact your department for further information. All "impacted" programs and some departments accept applications only in the months of November and August respectively.
- 2. Can freshmen/sophomore students take upper division (300-499) classes?* University policy prohibits lower division students (under 30 units) from taking upper division courses without permission of the instructor.
- 3. Why is it important that I personally drop classes that I have registered for but am no longer attending?* Instructors do not have the responsibility to drop students. Students must drop classes they no longer want through the IVR system during the first two (2) weeks of the semester.

Beginning the third week, students must use the official withdrawal form to change their schedule.

Official withdrawal is indicated on the transcript with the symbol "W." This designation does not affect grade point average (GPA). However, students who fail to withdraw officially within the established deadline receive a "WU" symbol.

In the calculation of the GPA, a "WU" is counted as an "F" grade.
- 4. Can my General Education (GE) Courses be used for GE and for my major ("double counted")?* Usually courses in a student's major department may not be used to satisfy GE requirements. However, there are seven (7) exceptions to this rule. The exceptions are listed with the GE requirements in the Schedule of Classes along with the list of approved GE courses. In addition, majors sometimes require GE courses from other departments; these courses can be "double counted" for both GE and major requirements. Remember, you can only earn unit credit once for a course.
- 5. How many units will transfer from a California Community College to CSULB?* All bachelor's level courses transfer, but only 70 units of transferable course work will apply to your bachelor's degree. Additional transferable course work will receive subject credit only.
- 6. What does General Education (GE) Certification mean?* Certification means that you completed the required 39 unit lower division GE pattern at a California Community College. GE certification must be clearly indicated on your official community college transcript. For further information, contact your community college counselor.
- 7. Does having an A.A. degree from a California Community College mean I am GE Certified?* Usually not. The minimum requirements for most A.A. degrees do not include the 39 unit lower division GE pattern required by CSULB. CSULB requires an additional nine (9) units of upper division GE courses.
- 8. What is partial General Education (GE) Certification?* Partial Certification means that transfer students have completed subject and unit requirements in some GE categories, but not others.
- 9. What can I do if I get a "D" or "F" or "WU" in a course?* The University has a "repeat/delete" policy which allows you to repeat a course (with a D, F, or WU) to receive a higher grade. This can be done only once per course. Both the first and the second grade will appear on your transcript; however, only a second grade of "C" or higher will be used to calculate your GPA. The first grade will be "deleted" from the GPA calculation.

AEROSPACE STUDIES

College of Health and Human Services

U. S. Air Force Reserve Officers Training Corps (AFROTC)

View the CSU, Long Beach *Catalog* on-line at www.csulb.edu by clicking on "Academics" and then "CSULB Catalog."

Through arrangements with Loyola Marymount University (LMU) in west Los Angeles, students may participate in the Air Force Reserve Officer Training Corps (AFROTC) program. AFROTC offers a variety of two, three, and four year scholarships, many of which pay the full costs of tuition, books, and fees. Successful completion of as little as four semesters of AFROTC academic classes and leadership laboratories can lead to a commission as a second lieutenant in the United States Air Force.

Classes consist of one hour of academics and two hours of laboratory for freshmen and sophomores and three hours of academics and two hours of laboratory for juniors and seniors. The academic hours earned can normally be counted as elective credit toward graduation. All AFROTC classes and laboratories are held on Fridays to better accommodate students commuting from other colleges and universities. Currently, LMU does not charge for the courses and offers cross-town students free parking while attending AFROTC activities. Additionally, AFROTC cadets under scholarship and all juniors and seniors receive a monthly tax-free stipend.

For more information, contact the Loyola Marymount University Department of Aerospace Studies (AFROTC) at (310) 338-2770.

Students desiring information should contact the department office for referral to one of the faculty advisors. American Indian Studies is an interdisciplinary study of the American Indian. The American Indian Studies program options are designed to provide students with the various fields of knowledge of American Indian Studies with opportunities for emphasis on particular topical, cultural and geographical interests.

The courses in the program offer two distinct directions: (1) classes that contain course content solely directed toward American Indian culture in the North Western Hemisphere; and (2) courses that contain sections or units on American Indians that have content relevant to understanding the American Indian experience.

American Indian Studies is governed by a committee of faculty representing a variety of schools and departments throughout the University.

In addition to offering a broad liberal education focusing on American Indian culture, traditions, and social issues, the various program options offer a useful background for careers in such diverse fields as Law, Administration, American Indian Affairs, Counseling, Teaching, Social Work, Government, Museums and Public Service.

Students may pursue a program in American Indian Studies through a minor, a certificate, a concentration in American Indian Studies within the Liberal Studies Degree Program, or an individually-designed undergraduate special major program under the Special Programs Office.

Interdisciplinary Studies for American Indian Studies

Bachelor of Arts (code IDSCBA01)

Master of Arts (code IDSCMA01)

The Interdisciplinary Studies Program at CSULB allows students to design unique courses of study leading to a Bachelor's or Master's degree. Students wishing to pursue a self-designed Bachelor of Arts Degree or a Master of Arts degree with a focus on American Indian Studies should contact the Interdisciplinary Studies Program Office, Academic Services, Room 14, 562-985-7194 for advisement.

Applications for the Interdisciplinary Studies Major are reviewed by the Director of the Interdisciplinary Studies Program and approvals are granted on a case-by-case basis.

For assistance, contact the American Indian Studies Interdisciplinary Degree Advisor, Dr. Troy Johnson in FO3-328. For an appointment, call 562-985-8703.

Certificate in American Indian Studies (code AIS_CT01)

Students pursuing any approved degree or credential program of the University may at the same time earn a Certificate in American Indian Studies. Courses taken to meet the requirements may also simultaneously be used, where applicable, to meet General Education requirements or the degree or credential requirements of cooperating departments. Certification of successful completion of requirements will be issued upon the recommendation of the American Indian Studies Program Director.

Requirements

1. A Bachelor's degree with a major in a traditional discipline. (Certificate requirements may be completed prior to the completion of B.A. requirement).
2. Submission of all college/university transcripts to the academic advising coordinator, who will work with the student to develop a well-integrated program of studies. Interested students are strongly encouraged to meet with the academic advising coordinator after having completed the lower division core courses.
3. A minimum of 24 units, distributed as follows:

Required Core Courses

Lower Division (12 units) from: AIS 105, 106, 200, 208, 215.
Upper Division (12 units) from: AIS 300, 319, 320, 335, 340, 361, 420, 421, 485, 490, 497, 499.

Minor in American Indian Studies (code AIS_UM01)

Requirements: A minimum of 21 units.

Required Core Courses

Lower Division (9 units) from: AIS 105, 106, 200, 208, 215.
Upper Division (12 units) from: AIS 300, 319, 320, 335, 340, 361, 420, 421, 485, 490, 497, 499.

Courses (AIS)

Lower Division

105. American Indian History – Pre 1871 (3)

Prerequisite/Corequisite: One course from GE category A1. A survey of the histories and cultures of American Indian Peoples in North America from pre-contact to 1871 and an analysis of the political, cultural, legal and military relationships that developed between the American Indians and foreign nations. Not open to students with credit in AIS 100.

106. American Indian History – Post 1871 (3)

Prerequisite/Corequisite: One course from GE category A1. A survey of the histories and cultures of American Indian Peoples in North America from 1871 to the present. Not open to students with credit in AIS 101.

200. Contemporary Issues in American Indian Studies (3)

Analysis of the diverse contemporary issues that have impacted upon the American Indian in contemporary society. Overview of the major issues in American Indian affairs: politics, art, philosophy, music, education, reservation life, economics, government relations, Indian organizations, Indian-white relations, legal issues, land rights, media issues, Indian activist movements, community concerns and additional topics of interest of a contemporary nature.

208. California Indian History (3)

This course in California Indian History is designed to provide students an opportunity to study the relationship between the Indian people of the state of California and the various European powers who influenced the settlement of this state. Areas to be explored include the indigenous people of the present day state of California prior to European contact; the Spanish invasion of 1769, the Mexican secularization in 1834, and the seizure of California in 1846 by the United States. These experiences and the resultant impact will be further studied as steps toward understanding contemporary issues involving California Indian people. Letter grade only (A-F).

215. U.S. Diversity and the Ethnic Experience (3)

Prerequisites: The course is open only to Integrated Teacher Education Program students. This course is a survey of four major ethnic groups (American Indians, African American, Latino American, and Asian American) in American society from the colonial era to the present. Special attention is given to the formation and transformation of each ethnic group and their individual and collective roles in the development of the United States. Same course as ASAM 215, B/ST 215, CHLS 215. The departments take turns offering the course in the Fall semester. Letter grade only (A-F).

Upper Division

General Education Category A must be completed prior to taking any upper division course except upper division language courses where students meet formal prerequisites and/or competency equivalent for advanced study.

300. American Indians in Cinema (3)

This class will examine through the medium of film the creation of stereotypical and positive images of Americans in cinema. Beginning with cinema in the silent period through contemporary times these images will be observed, discussed, and identified, and examined to come to a comprehensive understanding of how the values of these images are created and maintained in American popular society. The class will also discuss those contemporary images created from the American Indian perspective that offer different images of American Indians in society. Class content will vary dependent on films available for instruction. Letter grade only (A-F).

319. The Ethnic Experience in the U.S. (3)

An examination of the dynamics of the development of our multicultural society, emphasizing study of the four distinct ethnic strands of American society (Asian American, Black American, Mexican American, and American Indian) and their role in the maintenance of cultural diversity in the United States. Same course as ASAM 319, B/ST 319, CHLS 319, W/ST 319. Lecture/Discussion.

320. American Indian Art and Material Culture (3)

A survey of the arts of the North American Indian with special emphasis on the major art forms of the continental United States, Alaska,

and Canada. Traditional and contemporary art and artists will be explored with attention to aesthetic, theoretical, historical, religious, and philosophical aspects as they relate to American Indian Culture.

335. American Indian Philosophies (3)

A detailed examination of American Indian tribal cultures and their world views. Comparison of tribal philosophy and beliefs with that of western society. Special emphases will be placed on traditional philosophical traditions as practiced in the cultural regions of the Woodlands, Plains, Northwest, Southwest, West, Arctic, and Sub Arctic regions of North America. Letter grade only (A-F).

340. American Indian Literature (3)

An analysis of the written and oral literary traditions developed by American Indians. The range of works studied are: oral history, tales, myth, song, prayer, poetry, short story, and novel.

361. American Indian Education (3)

A study of the historical developments of American Indian Education and proposed solutions to selected problems of education in the various types of schools. Overview of the role of women in traditional Indian societies and in the modern world. Changes in Indian societies occasioned by contact with Europeans and how these changes have altered sexual role definitions will be examined. (Lecture-discussion 3 hours.)

400. Advanced Historiography of American Indian People (3)

This course is designed to introduce students to the vast literature which constitutes the historical writings relating to American Indian People. Historiography is the history of these writings. The attitudes, assumptions, ideas, and evidence that has been used by scholars to portray American Indian people and the settling of America will be examined. This class will provide students with a foundation for the understanding of how history has been shaped and will serve to advance their own research skills and agenda. Letter grade only (A-F).

420. American Indian Traditional Material Culture, Arts and Crafts (3)

Prerequisites: AIS 320, or consent of instructor. Techniques, materials, concepts and processes in the creation of American Indian traditional arts and crafts. Selected artistic projects in the creation of tribal arts. (Lecture-activity 6 hours.)

421. American Indian Fine Arts: Post 1900 (3)

The class will examine the arts of the North American Indian with special emphasis on the major art forms of the continental United States, Alaska, and Canada in the twentieth century. Relationships between tradition and contemporary art and artists will be explored with specific attention to aesthetic, theoretical, historical, religious, and philosophical aspects as they relate to American Indian culture. A comprehensive understanding of how the value of modern and contemporary images are created and maintained in American popular society through the medium of art will be discussed. Letter grade only (A-F).

485. Federal Indian Law (3)

This course is designed to provide an in-depth study of the legal relationship between the United States and Indian people and Indian tribes as the field of Indian law was developed and has changed over the years. The legal development will begin with first contact between Indian people and English colonist and continue to the present time. Letter grade only (A-F).

490. Special Topics in American Indian Studies (1-3)

Prerequisite: Consent of instructor. Topics of current interest in American Indian studies selected for intensive development. May be repeated to a maximum of 6 units. Topics will be announced in the *Schedule of Classes*.

C. American Indians in Cinema and Literature

497. Fieldwork in American Indian Studies (1-3)

Prerequisites: Upper division standing, consent of instructor. Supervised experiences relevant to specific aspects of the American Indian community in off-campus settings. The fieldwork project must be directly related to the student's major or certificate program. Regular meetings with faculty supervisor and written reports required. May be repeated to a maximum of 6 units.

499. Directed Studies (1-3)

Prerequisite: Consent of instructor. Directed Studies to permit individual students to pursue topics of special interest. May be repeated to a maximum of 6 units.

Bachelor of Arts in American Studies (code AMSTBA01) (120 units)

Students desiring information should contact the department office for referral to a faculty advisor.

American Studies is an interdisciplinary study of American culture. The American Studies Program offers a major leading to the bachelor's degree, a minor, and a Liberal Studies concentration. The program also offers a variety of general education and interdisciplinary courses. Most students majoring or minoring in American Studies are interested in both (1) studying American culture as a whole from several disciplinary perspectives and (2) studying in depth a problem or theme according to individual choice. Reflecting these two interests, the major consists of a 5-course core sequence and a 5-course elective pattern that centers on one theme or problem.

The American Studies Program is governed by a committee of faculty from various departments and schools who also serve as advisors. Students majoring in American Studies confer with advisors to plan their programs, which are recorded on official advising forms.

In addition to providing a broad liberal education focusing on American culture, traditions and institutions, the major in American Studies offers a useful background for careers in law, journalism, public service, government, business and teaching. The program also provides the foundation for graduate work in American Studies and related fields.

In preparation for the upper division major in American Studies, students are expected to have completed lower division courses appropriate as background to the study of American culture. Students planning to major in American Studies should consult the program director or one of the above-named faculty advisors early in their academic careers for general education and preparatory course recommendations and for teaching credential information.

Requirements

A minimum of 33 units distributed as follows:

Five core courses: AMST 300; HIST 477A,B; ENGL 270A, B.

Elective pattern: The student chooses one of the following topics or themes and plans with an advisor (who will have an up-to-date master list of appropriate courses) an elective pattern of a five-course sequence with no more than two courses coming from any one academic department: (A) American Institutions; (B) American People; (C) Women in America; (D) American Environment; (E) Arts and Communication in America; (F) American Mind; (G) Student-Designed Pattern. In place of one of the above topics or themes, the American Studies major, with the approval of the advisor and the program director, may design a sequence of courses focusing on a topic, theme, or problem in which he or she is particularly interested.

FOUR YEAR PLAN TO COMPLETE THE B.A. DEGREE in AMERICAN STUDIES (AMSTBA01)

120 units required

Please see an advisor to determine the appropriate choice of courses to meet major requirements for this degree

FAQ Concerning Road Maps for Completion of Undergraduate Degrees

For each undergraduate major, the on-line Catalog shows plans for scheduling all required courses to complete the degree in four, five, or six years.

While CSULB will make every effort to schedule classes at the times shown in the plans, we cannot guarantee that courses will be available in specific semesters. It is possible that shortage or budget or of personnel will make it impossible to offer as many classes as we would wish.

The plans are not substitutes for working with an advisor. You are strongly encouraged to see an advisor when planning your program each term.

I am a freshman. Do I have to choose now whether to follow the four, five, or six-year plan?

No. Most freshmen take 12-15 units. You need at least 12 units to receive full financial aid. With experience, you will be able to judge how heavy a load you find comfortable. This will depend on your outside obligations, such as a job, and on your personal circumstances. In theory, each unit requires three hours a week, including preparing for class, attending class, and completing assignments. Use these guidelines to budget your time and plan an appropriate schedule.

Must I take the courses in the semesters shown on the plan?

The plan shows one possible way of completing all requirements for the degree. Consult your advisor about whether it is essential to take a given course in the semester shown. There are some rules to keep in mind:

1) You can take the General Education Foundation courses (Composition, Oral Communication, Critical Thinking, Mathematics) in any semester in the first 36 units of baccalaureate-level course work completed at CSULB.

2) You cannot take upper division courses until you have completed at least 30 units. (Exceptions can be made for students who already have completed advanced study in the subject.) You cannot take General Education Capstone courses until you have completed at least 60 units.

3) For some majors it is essential to complete courses in the correct sequence. You cannot take a more advanced course until you have completed the prerequisite course(s).

4) You must complete all requirements for admission to impacted majors within the first 60 units.

I have been told that I must take one or more pre-baccalaureate courses. How can I plan my program?

Your advisor at SOAR can help you identify which courses must be postponed. You must still complete the minimum number of baccalaureate units required for the degree.

You may be able to catch up by taking additional courses in later semesters or by taking classes in summer or winter session, or you may choose to spend an additional semester completing the program. You cannot begin the sequence of required courses for some majors until you are ready for baccalaureate-level Mathematics. See your major advisor to develop a plan for scheduling the required courses.

I didn't complete the exact list of courses shown. Can I still graduate on time?

The answer depends on your major and on what courses you have completed. The plans are not rigid requirements; they are only intended to provide guidance in planning a program. There are many reasons for students to follow a different pattern, such as changing the major, choosing to take fewer classes in a given semester, choosing to complete a minor or a second major. See your advisor for help in planning a program that will work for you.

If I follow the plan, will I have all requirements for graduation completed?

The plans include the specific courses required for the major. For some majors, there are restrictions on the choice of major electives. It is important that you select General Education courses to meet the required distribution pattern. You may need to take an additional General Education course to complete the minimum number of units required for each category. This is likely to happen if you took three-unit courses in Category B, Physical Universe.

Minor in American Studies (code AMSTUM01)

A minimum of 18 units, including AMST 300 and HIST 477A,B and 9 or more units chosen in consultation with a faculty advisor.

Courses (AMST)

Foundation Courses must be completed prior to taking any upper division course except upper division language courses where students meet formal prerequisites and/or competency equivalent for advanced study.

300. Introduction to American Studies (3)

Interdisciplinary approaches to the study of American civilization from the colonial period through the twentieth century. Significant issues and problems in American life will be examined from the perspectives of several disciplines.

350. California Culture (3)

Prerequisites: ENGL100 and upper-division status. An interdisciplinary examination of the culture of California. Emphasis on how California's history, politics, environment, social movements, art, and literature produce a contested and always changing culture.

Anthropology is the systematic study of our own species in our biological, social, and cultural aspects. Anthropologists study the full range of human experience in both the past and present. The breadth of anthropological studies gives students a unique perspective to understand other societies and their own. The programs offered by the Department of Anthropology are designed to enrich the personal and professional lives of our students.

The undergraduate major in Anthropology is designed to provide students with knowledge of the various fields of Anthropology and with opportunities for emphasis in particular topical and geographical interests. Students will find that Anthropology provides a useful perspective that has many applications in daily social interaction. The Anthropology major provides a strong liberal arts background that can contribute to success in many fields, such as teaching, public service, or business. Anthropology majors intending to pursue careers in these fields are urged to consider minoring in fields which provide appropriate entry-level skills, such as the Minor in Business Economics or in Public Policy. The major also prepares students for advanced studies in Anthropology. The undergraduate minor in Anthropology is recommended for students preparing for careers which will require practical knowledge of different cultural backgrounds. These include teaching, international business and engineering, foreign service, and public and social services within our own multicultural society.

The Department of Anthropology also offers a graduate program leading to the Master of Arts degree. The graduate program is designed to meet the needs of students who are: 1) seeking to expand their knowledge and increase their competence in Anthropology, 2) preparing for further advanced degrees, 3) preparing for a career in Applied anthropology. Graduate students are responsible for observing the general requirements for the M.A. degree as stated in this *Catalog*. It is also recommended that prospective students consult with the Graduate Advisor at their earliest opportunity.

Bachelor of Arts (code ANTHBA01) (120 units)

Lower Division: ANTH 110, 120, 140, 170 and 202.

Upper Division: A total of 33 units. Required Core Courses (15 units): ANTH 313, 314, 401, 435 and 413 or 475.

In consultation with the Undergraduate Advisor, an additional 18 units will be selected from the courses listed below.

Archaeology: ANTH 321, 322, 323, 345, 347, 349, 450, 451

Biological Anthropology: ANTH 315, 317, 318, 319, 363, 434, 436, 480A, 480B

Cultural Anthropology: ANTH 305I, 307I, 311I, 321, 322, 323, 324, 329, 332, 333, 335, 336, 345, 351, 353, 412I, 414, 415, 416, 417, 419, 420, 421, 436, 454.

Linguistic Anthropology: ANTH 413, 421, 475

Students may apply a maximum of 2 Anthropology Capstone courses to the major. Students may apply Anthropology Human Diversity classes to the major.

Students may take a total of 6 units of ANTH 490 and, with approval of the undergraduate advisor and sponsoring faculty members, up to 6 units of ANTH 499.

Minor in Anthropology (code ANTHUM01)

A minimum of 21 units in a program approved by the major advisor, as follows:

Lower Division Required: ANTH 120, 140, 170 and 110.

Upper Division Electives: 9 units of anthropology courses selected in consultation with the major advisor to meet the specific needs of the student.

Interdisciplinary Minor in Crosscultural Language and Academic Development Studies (code COEDUM01)

The minor comprises courses that integrate studies of culture, language, learning and the academic environment, and human development. It is an interdisciplinary program designed to support career objectives related to public education in Crosscultural Language and Academic Development. The minor consists of a minimum of 18 units selected with an advisor. Courses in the department of the student's major may not be used.

1. One course from each of the following areas (12 units):

Culture: ANTH 421/LING 425 or EDP 432/EDEL 430

Language: EDP 454 or LING/CD 329

Schooling: EDP/LING 485

Development: EDP 301, 302; HDEV 307I; or PSY 361

2. Six units, selected with an advisor, from the following:

Culture: AIS 319, ASAM 319, B/ST 319, CHLS 319, W/ST 319, ANTH 329, ANTH 412I, ANTH/LING 413, ANTH 419, ANTH 421/LING 425, ANTH/WST 475, CHLS/ASAM 335I, EDP 432/EDEL 430

Language: ANTH 170, CHLS 402, EDP 454, LING/CD 329, LING/ENGL 327; LING 363I, 435, 472, 486.

Schooling: AIS 361, ASAM 310, B/ST 420, CHLS 340, EDP 305, EDP 350, EDP 476.

Development: EDP 301, EDP 302, HDEV 307I, PSY 361.

FAQ Concerning Road Maps for Completion of Undergraduate Degrees

For each undergraduate major, the on-line Catalog shows plans for scheduling all required courses to complete the degree in four, five, or six years.

While CSULB will make every effort to schedule classes at the times shown in the plans, we cannot guarantee that courses will be available in specific semesters. It is possible that shortage or budget or of personnel will make it impossible to offer as many classes as we would wish.

The plans are not substitutes for working with an advisor. You are strongly encouraged to see an advisor when planning your program each term.

I am a freshman. Do I have to choose now whether to follow the four, five, or six-year plan?

No. Most freshmen take 12-15 units. You need at least 12 units to receive full financial aid. With experience, you will be able to judge how heavy a load you find comfortable. This will depend on your outside obligations, such as a job, and on your personal circumstances. In theory, each unit requires three hours a week, including preparing for class, attending class, and completing assignments. Use these guidelines to budget your time and plan an appropriate schedule.

Must I take the courses in the semesters shown on the plan?

The plan shows one possible way of completing all requirements for the degree. Consult your advisor about whether it is essential to take a given course in the semester shown. There are some rules to keep in mind:

1) You can take the General Education Foundation courses (Composition, Oral Communication, Critical Thinking, Mathematics) in any semester in the first 36 units of baccalaureate-level course work completed at CSULB.

2) You cannot take upper division courses until you have completed at least 30 units. (Exceptions can be made for students who already have completed advanced study in the subject.) You cannot take General Education Capstone courses until you have completed at least 60 units.

3) For some majors it is essential to complete courses in the correct sequence. You cannot take a more advanced course until you have completed the prerequisite course(s).

4) You must complete all requirements for admission to impacted majors within the first 60 units.

I have been told that I must take one or more pre-baccalaureate courses. How can I plan my program?

Your advisor at SOAR can help you identify which courses must be postponed. You must still complete the minimum number of baccalaureate units required for the degree.

You may be able to catch up by taking additional courses in later semesters or by taking classes in summer or winter session, or you may choose to spend an additional semester completing the program. You cannot begin the sequence of required courses for some majors until you are ready for baccalaureate-level Mathematics. See your major advisor to develop a plan for scheduling the required courses.

I didn't complete the exact list of courses shown. Can I still graduate on time?

The answer depends on your major and on what courses you have completed. The plans are not rigid requirements; they are only intended to provide guidance in planning a program. There are many reasons for students to follow a different pattern, such as changing the major, choosing to take fewer classes in a given semester, choosing to complete a minor or a second major. See your advisor for help in planning a program that will work for you.

If I follow the plan, will I have all requirements for graduation completed?

The plans include the specific courses required for the major. For some majors, there are restrictions on the choice of major electives. It is important that you select General Education courses to meet the required distribution pattern. You may need to take an additional General Education course to complete the minimum number of units required for each category. This is likely to happen if you took three-unit courses in Category B, Physical Universe.

Master of Arts in Anthropology (code ANTHMA01)

The Department of Anthropology offers graduate work in archaeology and linguistic anthropology leading to a master's degree in anthropology. Students interested in sociocultural anthropology should refer to the option in applied anthropology below.

Prerequisites

1. A bachelor's degree in anthropology; or
2. A bachelor's degree with 24 units of upper division courses in anthropology, comparable to those required of anthropology majors at this University;

3. A B.A. degree in any field and other background appropriate to graduate study in anthropology. Students whose background in anthropology seems inadequate may be required to fulfill specific undergraduate deficiencies before admission to candidacy. Deficiencies will be determined by the departmental graduate advisor after consultation with the student and a review of the student's transcript records.

Advancement to Candidacy

1. Acceptance into the M.A. program by the department;
2. Satisfaction of the general University requirements for advancement to candidacy (including passing the WPE);
3. Approval of the candidate's graduate program by the departmental graduate advisor;
4. The candidate must have taken ANTH 501, 510, and either 560 or 561 for a total of nine core units.

Requirements

1. A minimum of 33 units of 400-level upper division and graduate courses, of which 21 units must be at the 500-600 level in a program approved by the Graduate Advisor. These 33 units must include the following courses: ANTH 501, 510 and 560 or 561;
2. Up to six units of course work outside the Department of Anthropology may be included in the 33 unit total;
3. Competence in appropriate research skills. These may include: familiarity with computer languages and use of computers, or statistical training and facility, or a reading knowledge of a foreign language;
4. Either A) a Comprehensive Examination, or B) a M.A. Thesis.

Option in Applied Anthropology (code ANTHMA02)

The Department of Anthropology offers graduate work in applied anthropology leading to a Master of Arts degree in Anthropology. The program produces practitioners who use anthropological knowledge and methods to design, conduct, and evaluate research and action programs. Students with a B.A. in Anthropology, as well as those who can apply their previous training and experience to the practice of anthropology, are welcome to apply. In order to meet the growing demand in California and elsewhere for professionals capable of addressing the complex, global problems of multicultural urban and regional environments, the Applied Anthropology Program emphasizes knowledge of anthropological theory and specialized training for its application across a wide range of global contexts. All graduate students participate in research projects and internships. Within the global context of urban and regional cultural change, the program offers three concentrations: multicultural education, medical/health care, and community/organizations. Regional emphasis begins with the languages, cultures, and organizations of southern California and the Southwest and extends globally.

Prerequisites

1. A bachelor's degree in anthropology; or
2. A bachelor's degree with 24 units of upper division courses in anthropology, comparable to those required of anthropology majors at this University; or
3. A bachelor's degree in another field, either a social science, humanity, education, or medical science one, with fewer than 24 units of upper division course work in anthropology, showing evidence of strong potential skills in applied anthropology.

Students under category (3) should submit a petition together with whatever supporting materials as recommended by the Graduate Advisor. If the Graduate Student Committee considers an applicant to lack a basic understanding of anthropological theories and methods, such an applicant will be accepted provisionally into the program (as an unclassified post-baccalaureate student), in which case he/she will be advised to enroll in courses during the first semester recommended by the Committee. Providing that the student performs satisfactorily in these courses, he/she will be admitted into the program the following semester, gaining classified status, and credit will be given for those courses completed the previous semester that are required for the Master of Arts degree.

Advancement to Candidacy

1. Classified status;
2. Satisfaction of the general University requirements for advancement to candidacy (including passing the WPE);
3. Approval of the candidate's graduate program by the departmental graduate advisor.

Requirements

Plan 1

The student must complete a minimum of 39 units of 400-level upper division and graduate courses in a program approved by the Graduate Advisor. Note: Students may substitute other courses for those normally required, but only with the approval of the Graduate Advisor.

1. ANTH 501, 503, 505, 510, 517, 560, 561, 675, and six units of 698.
2. Three upper division/graduate elective courses related to the student's main research interest;
3. Satisfy the language requirement. Each student will be considered individually in relation to this requirement, which may be satisfied by ANTH 570. This requirement must be satisfied before he or she begins work on the thesis;
4. Undertake and satisfactorily complete, under the supervision of the committee, a Thesis.

Plan 2

The student must complete a minimum of 42 units of 400-level upper division and graduate courses in a program approved by the Graduate Advisor. Note: Students may substitute other courses for those normally required, but only with the approval of the Graduate Advisor.

1. ANTH 501, 503, 505, 510, 517, 560, 561, 675.
2. Fifteen upper division/graduate units of courses related to the student's main research interest;

3. Satisfy the language requirement. Each student will be considered individually in relation to this requirement, which may be satisfied by ANTH 570. This requirement must be satisfied before he or she begins work on the thesis;
4. Undertake and satisfactorily complete, under the supervision of an advisor, a Project, a written report on the project, and completion of three units of ANTH 697.

Courses (ANTH)

Lower Division

110. Introduction to Physical Anthropology (3)

Prerequisites/corequisites: Completion of any B.2 Foundation GE course. Physical nature of human beings; relation of humans to other animals; heredity and principles of biological evolution; human fossils; significance of physical variation in modern populations; the origin and adaptive value of cultural behavior. (CAN ANTH 2)

120. Introduction to Cultural Anthropology (3)

Prerequisite/corequisite: Any G.E. Foundations course. Nature of culture; a comparative and historical approach to the religion, social organization, subsistence patterns and other aspects of the great variety of cultures around the world; the meanings of human nature, cultural universals and cultural differences. (CAN ANTH 4)

140. Introduction to Archaeology (3)

Prerequisite/corequisite: Any G.E. Foundations course. Survey of methods used by archaeologists to understand the growth and development of human cultures; discoveries in world-wide prehistory from the Old Stone Age to the Iron Age. (CAN ANTH 6)

150. Biocultural Anthropology (3)

Prerequisite/corequisite: Any G.E. Foundations course. An integration of social, physiological and psychological factors which influence or determine our daily lives; taught from an anthropological perspective.

170. Introduction to Linguistics (3)

Prerequisite/corequisite: Any G.E. Foundations course. Nature of language; its relation to culture; language structure and processes of change; language universals, contrasts and relationships. Same course as LING 170.

202. Quantitative Methods in Anthropology (4)

This course is designed to help students strengthen their quantitative skills. A broad range of topics will be covered with emphasis being placed on the analysis of large datasets, computer graphics, research design, and application of several statistical methods and software programs. Datasets used in this class have a multicultural base and are derived from a variety of fields including anthropology and history. The course experience will assist students in their efforts to develop research designs for independent research in upper division classes under their major.

205. Principles of Archaeology (4)

Exploration of the techniques, methods, and goals of archaeological research. Study of ceramics, lithics and other parts of the archaeological record. Examination of issues in sampling, survey, excavation and dating of archaeological materials. General problems encountered in explaining archaeological phenomena. Letter grade only (A-F).

Upper Division

General Education Category A must be completed prior to taking any upper division course except upper division language courses where students meet formal prerequisites and/or competency equivalent for advanced study.

305I. Radical Social Analysis (3)

Prerequisites: Completion of GE Foundation requirements, one or more Explorations courses, and upper-division standing. Radical analysis of society and culture, focusing on classic Marxian texts as well as current critical theory and analysis.

307I. Modernization in Global Perspective (3)

Prerequisites: Completion of GE Foundation requirements, one or more Explorations courses, and upper-division standing. An exploration of the ways in which the current psychological and material problems in modern society (both western and Third World) can be traced to a process of accelerating change which began with the advance of technology, the rise of capitalism, the abandonment of "old values," the increasing complexity of bureaucracy, and a lowering of social barriers. Exploration of all facets of modernization utilizing films, discussions and readings (fiction and non-fiction). Same course as GEOG 307I.

311I. Human Adventure (3)

Prerequisites: Completion of GE Foundation requirements, one or more Explorations courses, and upper-division standing. A synthesis of Anthropology and Marxism; examination of the processes of evolution and revolution in the development of humanity, from earliest times to the present.

313. Peoples of the World: Prehistory (3)

The origin of human beings and their cultures, the development of agriculture, the growth of city life, and the rise of civilization; a survey of world-wide prehistory from the Old Stone Age to the Iron Age.

314. Global Ethnography (3)

Prerequisites: Completion of GE Foundation requirements. Recent and contemporary cultures around the world; a comparative survey of their ecological adaptations, social institutions, technology, subsistence strategies, degrees of complexity, and patterns of change.

315. Human Variation (3)

Biological variation and differences in the two sexes of modern humans. The biological concepts of biospecies and subspecies are examined. Biological adaptations of human males and females to the various environments of the world are considered. Racism and genocide are discussed in relation to ethnic groups. The rise of the race concept in North America and the social meaning of this concept. An in-depth look at the biology of several American ethnic groups. Letter grade only (A-F).

317. Methodology in the Anthropological Life Sciences (4)

Prerequisites: ANTH 110, 202 (or comparable statistics course) with a grade of "C" or better. Methodology used in the life science branch of anthropology including physical and biological anthropology, human biology, and primatology. This course presents the methodology used by anthropologists engaged in biological research and the course focuses on the fundamentals of scientific method as used in the life sciences including hypotheses, theory, measurement, experimentation, models, predictions, use of statistics in the anthropological sciences, and laboratory vs. field studies. Applications in the various subdisciplines, including human genetics, osteology and forensics, primatology, human (physiological) adaptation, and human paleontology, are explored in the laboratory portion of the course. Lecture 3 hours, laboratory 3 hours. Letter grade only (A-F).

318. Human Genetics (3)

Prerequisites: ANTH 110 or equivalent BIOL course, a quantitative course. Genetic background for normal and abnormal development; population differences; human reproduction, pregnancy, prenatal diagnosis and birth defects; introduction to population and evolutionary genetics; application to social, moral, legal and ethical problems and to genetic counseling.

319. Human Growth and Development (3)

Prerequisites: BIOL 205 or 207. Analysis of the sequence of events in the development of people from conception to death; organ development; rapid and retarded growth patterns; the processes of aging and death from a broad ethnic and ecological perspective.

321. North American Indians (3)

Comparative study of traditional Native American societies, social organization, belief systems and religions, crafts and adaptation to varied environments; cultural changes in response to European contacts.

322. California Indians (3)

Survey of native Californian groups; discussion of the diversity of aboriginal culture prior to western contact as background for analysis of the impact of Europeans; problems of intercultural relations; and the current status of native Californians.

323. Peoples of Mexico and Central America (3)

Survey of present-day peoples of Mexico and Central America; indigenous and mestizo cultures and their heritage; examination of recent change.

324. Peoples of South America (3)

Survey of the present day peoples of South America; tribal Indians, peasant communities, village life, the emerging middle class, and other social groups; examination of the Indian, European, and African heritage and present day cultural and social changes.

329. Cultural Diversity in California (3)

An examination of the various dimensions of the current cultural diversity in California, including ethnicity, nationality, class, gender, religion, and region. Various relationships between these dimensions will be analyzed, a historical background for each dimension and relationship will be presented, and the impact of this diversity on public institutions will be covered. Letter grade only (A-F).

332. Chinese Culture and Society (3)

Anthropological perspectives on revolution, socialism, and institutional change in China, ethnic diversity, family and kinship patterns, politics, economy, international relations, and religion in premodern and modern times.

333. Cultures and Societies of Southeast Asia (3)

Comparison of ecological, social, and symbolic systems of mainland and island Southeast Asia. Emphasis of traditional cultures of agricultural and small-scale societies. Effects of colonialism and modernization are also covered.

335. Japanese Culture and Society (3)

Cultural and social institutions; kinship, family structure, religion, law, politics and economy from traditional to modern times.

336. African Societies and Cultures (3)

Prerequisites: General Education Category A. An anthropological survey of Africa examining the social, cultural, and economic diversity of the continent over time. A foundation for appreciation of current issues in Africa including cultural debates, nationalism, and cultural change and preservation.

345. Ancient Civilizations of Mexico and Central America (3)

Origin and growth of the Aztec, Maya and other civilizations of Mexico and Central America.

347. Prehistoric Cultures of North America (3)

Archaeological evidence of origin and growth of the native American cultures north of Mexico; regional cultures and broad continental patterns of development.

349. The Prehistory of California and the Southwestern United States (3)

Development of the native cultures of California and American Southwest from the earliest human occupation to the historic period.

351. Sex Roles and Culture (3)

Interaction of biological, cultural and historical factors on male/female roles and status in traditional and contemporary cultures and societies.

353. Health and Healing (3)

Cultural perspective of health and health care delivery; coverage of diverse cultures in the United States and abroad; emphasis on increasing personal awareness through exposure to diverse perceptions of illness and treatment.

363. Natural History of Primates (3)

Prerequisites: ANTH 110. Relationship of primates to other mammals; adaptation of arboreal mammals; functional and evolutionary aspects of primate anatomy and physiology; effects of size; primate ecology; survey of the Order Primates: Prosimii, Tarsoidea, New World and Old World Monkeys, Hominoids.

401. Foundations of Anthropology (3) F

Prerequisites: ANTH 313 and ANTH 314 with grade of "C" or better, or consent of instructor. Provides introduction to history of anthropological theory from inception to current approaches. Frames theories in the social context in which they emerged. Letter grade only (A-F).

412I. Culture and Communication (3)

Prerequisites: Completion of GE Foundation requirements, one or more Explorations courses, and upper-division standing. Introduction to culture and its influence on the communication process. Emphasis on practical application to intercultural and multicultural situations. Attention to cultural patterns in America and abroad and their effect on verbal and nonverbal communicative behavior; cultural dimensions of ethnocentrism, stereotypes, and prejudices and their effect on communication; multicultural approaches to human interaction.

*413. Language and Culture (3)

Relation of language patterns to social life; problems of meaning in cross-cultural communication and language translation; practical application to business, government and religious contacts. Not open to students with credit in ANTH 440. Same course as LING 413.

414./514. Anthropology of Religion (3)

Prerequisites: ANTH 120 and upper-division/graduate standing or consent of instructor. An anthropological examination of religious behavior and beliefs, which will focus on these phenomena in their sociocultural and adaptive contexts. Using the cross-cultural and cultural evolutionary approach, hunter-gatherer religions through civilized ones will be covered. Letter grade only (A-F).

415./515. Economic Anthropology (3) S

This course compares and contrasts the economies characteristic of hunter-gatherers, horticulturalists, and peasants; investigates the changing relations of tribal and peasant peoples to the developing global economy; and looks at a range of production and marketing strategies within local, regional, and urban settings. It is a balanced presentation of appropriate ethnographic materials, economic theory, and alternative modes of analysis.

416./516. Urban Anthropology (3)

Comparative analysis of development and role of urban centers in ancient and modern cultures; interrelationships of urban and rural populations; patterns of similarity and difference in urbanism of contrasting cultures; implications for a multi-national world.

417./517. Applied Anthropology (3)

Prerequisites: ANTH 120 and upper division standing or graduate standing or consent of instructor. Brief orientation to applied anthropology, its history and ethics; policy and applied anthropology domains (needs assessment, program evaluation, social impact assessment, environmental, advocacy); applied research methods; student proposals for internship research.

419./519. Encounters and Identities (3)

Prerequisite: Graduate and advanced undergraduate students only. An examination of how cultural anthropologists have dealt, theoretically, with the concept of identity. Through brief lectures, class discussions, readings and film, students will engage the various intersections of identity constructs, such as race, nation, gender, sexuality and socio-economic class. As a course that concentrates more on theories than geographic regions, emphasis will be placed on recent theoretical developments in the discipline such as post-modern and post-colonial approaches to the study of contemporary subjectivities. Letter grade only (A-F).

420./520. Culture, Power and Politics (3)

Prerequisite: ANTH 120 and upper-division/graduate standing or consent of instructor. This course examines how culture shapes the social construction of power and the practice of politics. Studying politics and power from an anthropological perspective requires an understanding of the material and symbolic aspects of power and their interplay. We will locate contemporary ethnographic studies of politics and power in relation to the earlier concerns of more functionally-oriented political anthropologists.

*421. Education Across Cultures (3)

Cross cultural perspectives on education in modern society; problems in education of non-western peoples by those from western cultural backgrounds. Same course as LING 425.

422. The Anthropology of Gender (3)

Prerequisite: Graduate standing or consent of instructor (ANTH 351 recommended). This course examines anthropological perspectives on gender and how these perspectives have challenged and transformed anthropology and feminism. We will be concerned with locating gender relations in the production of anthropological knowledge, in colonial and postcolonial social fields, and in the movement of global capitalism. Letter grade only (A-F).

423/523. Modernity/Post-Modernity (3)

This course is an exploration of how cultural anthropologists have dealt in the practice of fieldwork, and the writing of ethnographies, with the concepts of modernity and post-modernity. Beginning with the foundations of political-economy, students will be encouraged to explore specific anthropological topics such as globalization, Diaspora and transnationalism, multiple subjectivities, media and representation, and other processes that are normally seen as being the result of post-modern, flexible regimes of capitalist accumulation. Lectures and readings will cover as many geographical locations as possible, and will focus on foundational readings in this field from the disciplines of anthropology, geography, philosophy, history and political science. Letter grade only (A-F).

424. Anthropology and the Colonial Experience (3)

Prerequisite: ANTH 120, 314 or consent of instructor. This seminar provides a comprehensive anthropological perspective on the immediate and long-term consequences of European colonization-the sustained political, social and economic domination of native populations by a foreign power-on nations in Asia, Africa, Latin America, and North America. The course aims to provide students with the theoretical background and analytical skills to discern the commonalities and differences in case studies that reflect different time periods, stages of the colonial process, and geographical regions.

426. Post Colonial Africa (3)

Prerequisites: Completion of all Foundation coursework. Change and continuity in contemporary Africa, ethnography of postcolonial social and cultural issues including globalization and transnationalism, health, food security, peace and war, economic and political transformations, and the politics of culture.

427./527. Global East Asia (3)

Prerequisites: Graduate and advanced undergraduate students. Students will examine how socio-cultural formations in an East Asian context articulate with global flows of capital, people, and ideas. Rather than privileging the various national borders as conceptual starting points, the materials in this course will focus on the transnational aspects of what are normally taken to be "natural", inevitable and "traditional" aspects of several East Asian nation-states. Lectures and readings will draw on materials and data from history, ethnography, geography and film to situate key cultural processes within the discourses of area studies and anthropological theory. Letter grade only (A-F).

428. Historical Ethnography (3)

Prerequisite: Consent of instructor. Development of the specialization of historical ethnography in anthropology, combined ethnographic and historical approaches to ethnographic questions, methodological and theoretical issues in historical ethnography. Letter grade only (A-F).

429. Peasants (3)

Prerequisite: Graduate standing or consent of instructor. This course provides a comprehensive anthropological perspective on the contested image of peasantry, generally defined as agricultural producers who form part of a larger society. The notion of peasantry remains a central analytic problem and theoretical issue in the discipline, in part because changing economic systems and globalization have encompassed agricultural producers who are no longer "autonomous." This course examines the anthropological debates about ways that peasants are integrated into a global economic system, and discusses related issues such as educational and employment opportunities, urbanization, international migration, and sustainable development. Students will acquire theoretical knowledge and analytical skills that allow them to assess the constants and changing nature of peasantry in distinct geographical locations. Texts and order vary between instructors and semesters.

434. Primate Evolution (3)

Prerequisite: ANTH 110. Recommended: ANTH 363, upper division physical anthropology, biology, or anatomy/physiology course. This course will focus on primate evolutionary biology, minus the family hominidae. Particular emphasis will be placed on the fossil record and the analysis of fossils (through the use of fossil casts). Detailed cranial anatomy (particularly teeth) will be examined in the laboratory section. Literature on primate evolution will be surveyed.

*435. Human Evolution (3)

Prerequisites: ANTH 110. Fossil evidence for human evolution with a consideration of the importance of cultural factors. Not open to students with credit in ANTH 430.

*436. Medical Anthropology (3)

Prerequisites: ANTH 353 recommended. Interaction of cultural, biological and environmental elements in human response to disease; emphasis on an ecosystem approach with evolutionary and comparative perspectives.

440. Ethnographic Field School (3-6)

Prerequisite: Consent of Instructor. This experiential course gives students an opportunity to apply standard ethnographic methods to study, observe, and learn about a non-U.S. culture. Students will learn standard ethnographic field methods (including participant observation, semi structured and formal interviewing, and mapping) and conduct systematic research to collect data about local patterns of kinship, religious beliefs, economic patterns, and political systems. Analysis of methodology and data collection will occur throughout the course. Location, topics and activities will vary. Letter grade only (A-F).

*450. Archaeological Field Research (1-10)

Prerequisite: Consent of Instructor. Introduction to field acquisition of archaeological data through remote sensing, geophysics, survey, and excavation. Research will be part of on-going field projects and instructional emphasis is on recovery, recording techniques, and the management of field projects. Locations will vary and may be offered on Saturdays. May be repeated to a maximum of 10 units in different semesters.

451. Archaeological Artifacts Analyses (4)

Prerequisite: Consent of instructor and ANTH 140 or equivalent. The study of the products of human activity. The natural of measurement and observation within the archaeological record. Explanations of artifact variability. The study of lithics, ceramics, and other types of archaeological materials. Practical experience in the study of materials, sampling, errors. Letter grade only (A-F).

453. Archaeological Field Research Design (4)

Prerequisites: Consent of instructor and ANTH 205 or equivalent. The nature of the archaeological record, research design, techniques of archaeological data collection and field research employing a data sources and modern techniques. Practical experience in the use of mapping instruments, map interpretation, geophysics, surface survey, sampling designs, remote sensing photogrammetry, and research design development. Letter grade only (A-F).

454. Culture and Aging (3)

Cultural perspectives on aging and the aged in America and elsewhere. Attention to insider views from specific societies and to comparison of aging concerns in diverse settings.

455. Archaeological Method and Theory I (4)

Prerequisites: Consent of instructor and ANTH 205. Examination of theoretical constructs in the analysis of archaeological data. Development and construction of a metalanguage for the discussion and analysis of historical phenomenon. Key debates in archaeological literature about the nature of theory, knowledge, theory and units. Discussion of theory, methods, concepts, units, classification, terminology, and typologies. Letter grade only (A-F).

456. Archaeological Method and Theory II (4)

Prerequisites: Consent of instructor and ANTH 455. The analysis of conceptual frameworks employed by archaeologists in obtaining explanation in the three major areas of culture history, cultural reconstruction, and explanatory prehistory, considering the nature of explanation as conceived in these areas, the basic assumptions employed in achieving these aims, and an introduction to the methods employed. Introduction to evolutionary theory as used in archaeology. Debates about the nature of evolutionary explanations. Letter grade only (A-F).

458. Ethnographic Methods (4)

Prerequisites: ANTH 110, 120, 140, and 170 or consent of the Instructor. Introduces students to the purposes of cultural anthropology fieldwork, the methodology used to collect ethnographic data, and ways of analyzing and reporting the data collected. Lectures and discussion will focus on ways of identifying and defining research problems and populations, and ethical issues that arise when conducting research. Students will learn the standard methodology ethnographers use to collect data (including participant-observation, surveys, interviewing and collection of life histories), and conduct research projects to get first hand experience with these methods.

464. Quantitative Methods in Anthropological Research (4)

Prerequisites: ANTH 202 and consent of instructor: A consideration of advanced statistical and analytical methods involved in anthropological research. Advanced statistical principles and techniques include principal components, ANOVA, MANOVA, factor analysis, bootstrapping, and sampling designs in the anthropological research. Discussion includes coverage of temporal studies using seriation and spatial analyses involving geostatistics, cluster and K-Means algorithms. Examples used in class include archaeological and anthropological materials. Letter grade only (A-F).

471./571. Prehistory of Eastern North America (3)

Prerequisites: ANTH 140 or equivalent. Ecological and evolutionary account of prehistoric cultural developments in North America east of the Rocky Mountains. Cultural and environmental change from appearance of people in New World to collapse of indigenous cultural systems. Letter grade only (A-F).

*475. Language and Gender in Cross-Cultural Perspective (3)

Analysis of men's and women's communication in its social and cultural context; role of gender in interpreting conversational interactions in the U.S. and elsewhere; acquisition of gender differences; cultural dimensions of perceptions and stereotypes and their effect on communication. Same course as LING 470, W/ST 475.

478. Anthropology and Film (3)

Prerequisite: One lower division anthropology course or consent of instructor. This seminar critically analyzes issues of an anthropological nature as presented in ethnographic and commercial films. Representations of anthropologists, anthropological theories and methods, and populations and concerns of anthropological interest are contrasted with scholarship published on the same issues. Film topics vary between instructors and semesters. Letter grade only (A-F) for Majors/Minors.

479. Anthropology of Literature (3)

Prerequisites: Completion of the G.E. Foundation, one or more Explorations courses, and upper-division standing. This course explores how written literature—novels, short stories, and poetry—reflects the cultural attributes of its settings. An exploration of this area will enhance our understanding and appreciation of cultures different from our own, as well as expanding our critical thinking about the relationship between literature and anthropology. Letter grade only (A-F).

*480A. Osteology I (3)

Introduction to skeletal anatomy, measurement and analysis of osteological collections, applied anthropometrics and morphometrics.

*480B. Osteology II (3)

Prerequisites: ANTH 480A or consent of instructor. Osteological analysis of skeletal materials; detection of pathological conditions on archeological populations; methods of dietary analysis; faunal analysis from archeological sites.

481. Faunal Analysis (4)

Prerequisites: ANTH 140 or equivalent, consent of instructor. An introduction to the analysis of animal bones from archaeological sites. Exploration of the theoretical and methodological issues that are fundamental to the study of faunal remains and modern zooarchaeology. Course includes lab component which focuses on the identification of archaeological bone specimens. Training includes critical evaluation of published zooarchaeological research and skills required to conduct independent faunal research in the archaeological record. Letter grade only (A-F).

485. Physical Science Techniques in Archaeology (4)

Prerequisites: ANTH 140 and one other archaeology course or consent of the instructor. This course covers the application of techniques of physics and chemistry in archaeology. Provides practical experience in the use of laboratory equipment, including analytical balances, drying ovens, furnaces, and other sample preparation techniques. Also provides experience in the use of chemical characterization techniques, including scanning-electron microscopy and inductively-coupled mass spectrometry. Letter grade only (A-F).

488. Advanced Methods in Near Surface Remote Sensing (4)

Prerequisites: ANTH 453 and consent of instructor. Advanced exploration of the use of near surface geophysical techniques in the study of archaeological deposits. Theory and methodology in the use of remote sensing in archaeology. Development of research designs. Practical considerations when using geophysical equipment in archaeological research. Critical evaluation of applications and technological developments. Letter grade only (A-F).

*490. Special Topics in Anthropology (3)

Topics of current interest in anthropology selected for intensive development. May be repeated to a maximum of 6 units. Topics will be announced in the *Schedule of Classes*.

496. Internship (3)

Prerequisites: Student must have upper division standing, and have approval of a faculty mentor. A supervised internship in an area of anthropology within or outside the University. Field experience of 90 hours in which the student gains practical experience in an area of anthropology. Students may be placed at public or private institutions (i.e. museums, primate centers, zoos, schools, agencies) under the supervision of a faculty sponsor. Internship supervisors monitor and evaluate student work based on criteria determined by the faculty mentor and his or her student and formalized on a signed contract. The criteria in the contract consist of objectives developed by the student in consultation with the faculty sponsor. The objectives and the placement site must be approved by the student's faculty mentor. Students will submit a written report of their experience to the faculty supervisor at the end of the internships. Letter grade only (A-F).

498. Senior Thesis (1-6)

Prerequisites: Student must be an Anthropology major, senior standing, and have approval of a faculty mentor. Research for and writing of a senior thesis under the direction and guidance of an Anthropology Department faculty mentor. Letter grade only (A-F).

499. Guided Studies in Anthropology (1-3)

Prerequisite: Consent of department. Selected topics in anthropology and preparation of a research report. May be repeated to a maximum of 6 units.

Graduate Level

501. Current Trends in Anthropological Theory (3)

Prerequisites: ANTH 401 or its equivalent, and graduate standing. Examination of current themes used by leading anthropologists in the areas of our graduate program, i.e.: Applied Anthropology (medical/health care, education, community/organizations), Linguistic Anthropology, and Archaeology. Investigation of how theories shape problems and analytic techniques, and what makes theory 'cutting edge'. Letter grade only (A-F).

503. The Anthropological Perspective (3)

Prerequisite: Graduate standing or consent of instructor. Through reading and discussion of ethnographies and reports of applied anthropological work, this course reviews the scientific understanding of the process of inquiry and action in the human sciences, leading to the identification of a common core perspective within anthropology. The course emphasizes how anthropology differs from other disciplines with its emphasis on ethnographic fieldwork, a holistic and cross-cultural approach, and culture as a key concept. The epistemology underlying anthropological approaches to contemporary, global, urban problems in health/medical care, education, communities and organizations are emphasized. Letter grade only (A-F).

505. Practicing Anthropology (3)

Prerequisite: Graduate standing or consent of instructor. Review of practical contributions by anthropologists in non-academic settings. Attention to specific skills used by practicing anthropologists; business writing including resumes, contracts; oral presentations using audiovisual aides; internal and external contracting; time management; project management; working across disciplines; ethics. Letter grade only (A-F).

510. Proseminar (3) F

Prerequisites: Six units of upper-division anthropology courses or consent of instructor. Development of proposal planning, budgeting, and writing skills, particularly in applied anthropology, linguistics, and archaeology. Both academic and contract/consulting types of proposals will be covered. Letter grade only (A-F).

514./414. Anthropology of Religion (3)

Prerequisite: ANTH 120 and upper-division/graduate standing or consent of instructor. An anthropological examination of religious behavior and beliefs, which will focus on these phenomena in their sociocultural and adaptive contexts. Using the cross-cultural and cultural evolutionary approach, hunter-gatherer religions through civilized ones will be covered. Letter grade only (A-F).

515./415. Economic Anthropology (3)

This course compares and contrasts the economies characteristic of hunter-gatherers, horticulturalists, and peasants; investigates the changing relations of tribal and peasant peoples to the developing global economy; and looks at a range of production and marketing strategies within local, regional, and urban settings. It is a balanced presentation of appropriate ethnographic materials, economic theory, and alternative modes of analysis.

516./416. Urban Anthropology (3)

Comparative analysis of development and role of urban centers in ancient and modern cultures; interrelationships of urban and rural populations; patterns of similarity and difference in urbanism of contrasting cultures; implications for a multi-national world. Letter grade only (A-F).

517./417. Applied Anthropology (3)

Prerequisites: ANTH 120 and upper division standing or graduate standing or consent of instructor. Brief orientation to applied anthropology, its history and ethics; policy and applied anthropology domains (needs assessment, program evaluation, social impact assessment, environmental, advocacy); applied research methods; student proposals for internship research. Letter grade only (A-F).

519./419. Encounters and Identities (3)

Prerequisite: Graduate and advanced undergraduate students only. This course is an examination of how cultural anthropologists have dealt, theoretically, with the concept of identity. Through brief lectures, class discussions, readings and film, students will engage the various intersections of identity constructs, such as race, nation, gender, sexuality and socio-economic class. As a course that concentrates more on theories than geographic regions, emphasis will be placed on recent theoretical developments in the discipline such as post-modern and post-colonial approaches to the study of contemporary subjectivities. Letter grade only (A-F).

520./420. Culture, Power and Politics (3)

Prerequisite: ANTH 120 and upper-division/graduate standing or consent of the instructor. This course examines how culture shapes the social construction of power and the practice of politics. Studying politics and power from an anthropological perspective requires an understanding of the material and symbolic aspects of power and their interplay. We will locate contemporary ethnographic studies of politics and power in relation to the earlier concerns of more functionally-oriented political anthropologists.

523./423. Modernity/Post-Modernity (3)

This course is an exploration of how cultural anthropologists have dealt in the practice of fieldwork, and the writing of ethnographies, with the concepts of modernity and post-modernity. Beginning with the foundations of political-economy, students will be encouraged to explore specific anthropological topics such as globalization, Diaspora and transnationalism, multiple subjectivities, media and representation, and other processes that are normally seen as being the result of post-modern, flexible regimes of capitalist accumulation. Lectures and readings will cover as many geographical locations as possible, and will focus on foundational readings in this field from the disciplines of anthropology, geography, philosophy, history and political science. Letter grade only (A-F).

527./427. Global East Asia (3)

Prerequisites: Graduate and advanced undergraduate students. In this course, students will examine how socio-cultural formations in an East Asian context articulate with global flows of capital, people, and ideas. Rather than privileging the various national borders as conceptual starting points, the materials in this course will focus on the transnational aspects of what are normally taken to be "natural", inevitable and "traditional" aspects of several East Asian nation-states. Lectures and readings will draw on materials and data from history, ethnography, geography and film to situate key cultural processes within the discourses of area studies and anthropological theory. Letter grade only (A-F).

528. Historical Ethnography (3)

Prerequisite: Graduate status or consent of instructor. Development of the specialization of historical ethnography in anthropology, combined ethnographic and historical approaches to ethnographic questions, methodological and theoretical issues in historical ethnography. Letter grade only (A-F).

529. Peasants (3)

Prerequisite: ANTH 120, 314 or consent of instructor. This course provides a comprehensive anthropological perspective on the contested image of peasantry, generally defined as agricultural producers who form part of a larger society. The notion of peasantry remains a central analytic problem and theoretical issue in the discipline, in part because changing economic systems and globalization have encompassed agricultural producers who are no longer "autonomous." This course examines the anthropological debates about ways that peasants are integrated into a global economic system, and discusses related issues such as educational and employment opportunities, urbanization, international migration, and sustainable development. Students will acquire theoretical knowledge and analytical skills that allow them to assess the constants and changing nature of peasantry in distinct geographical locations. Texts and order vary between instructions and semesters.

530. Ethnography of Communication (3)

Prerequisite: Graduate standing. Study of talk and other forms of communication from an ethnographic perspective. Emphasizes relevant methods and theories. Among the major topics presented from this perspective are language socialization, genres of speaking, intercultural communication, speech styles, strategic uses of language, and literacy. Letter grade only (A-F). Same course as LING 533.

540. Ethnographic Field School (3-6)

Prerequisite: Consent of Instructor. This experiential course gives students an opportunity to apply standard ethnographic methods to study, observe, and learn about a non-U.S. culture. Students will learn standard ethnographic field methods (including participant observation, semi structured and formal interviewing, and mapping) and conduct systematic research to collect data about local patterns of kinship, religious beliefs, economic patterns, and political systems. Analysis of methodology and data collection will occur throughout the course. Location, topics and activities will vary. Letter grade only (A-F).

551. Archaeological Artifacts Analyses (4)

Prerequisite: Graduate standing and consent of instructor. The study of the products of human activity. The natural of measurement and observation within the archaeological record. Explanations of artifact variability. The study of lithics, ceramics, and other types of archaeological materials. Practical experience in the study of materials, sampling, errors. Letter grade only (A-F).

553. Archaeological Field Research Design (4)

Prerequisites: Graduate standing and consent of instructor. The nature of the archaeological record, research design, techniques of archaeological data collection and field research employing data sources and modern techniques. Practical experience in the use of mapping instruments, map interpretation, geophysics, surface survey, sampling designs, remote sensing, photogrammetry, and research design development. Letter grade only (A-F).

555. Archaeological Method and Theory I (4)

Prerequisite: Graduate standing and consent of instructor. Examination of theoretical constructs in the analysis of archaeological data. Development and construction of a metalanguage for the discussion and analysis of historic phenomenon. Key debates in archaeological literature about the nature of theory, knowledge, theory and units. Discussion of theory, methods, concepts, units, classifications, terminology, and typologies. Letter grade only (A-F).

556. Archaeological Method and Theory II (4)

Prerequisite: Graduate standing and consent of instructor. The analysis of conceptual frameworks employed by archaeologists in obtaining explanation in the three major areas of culture history, cultural reconstruction, and explanatory prehistory, considering the nature of explanation as conceived in these areas, the basic assumptions employed in achieving these aims, and an introduction to the methods employed. Introduction to evolutionary theory as used in archaeology. Debates about the nature of evolutionary explanations. Letter grade only (A-F).

560. Ethnographic Research Methods (3)

Prerequisite: Graduate standing or consent of instructor. A practice-oriented seminar in ethnographic research methodology, emphasizing techniques, methods, and concepts of ethnographic research. The course examines several qualitative, in-depth methods used by anthropologists as well as research design and research ethics.

561. Basic Computer Research Applications in Anthropology (3)

Prerequisite: ANTH 560 or consent of instructor. The basics of both qualitative and quantitative computer methods, employing currently appropriate software and statistical techniques. The methods covered will be specifically related to research in archaeology and applied anthropology; and the presentation of results, as well as various research problems, will be addressed. Letter grade only (A-F).

- 564. Quantitative Methods in Anthropological Research (4)**
Prerequisites: ANTH 560, graduate standing, and consent of instructor. A consideration of advanced statistical and analytical methods involved in anthropological research. Advanced statistical principles and techniques include principal components, ANOVA, MANOVA, factor analysis, bootstrapping, and sampling designs in the anthropological research. Discussion includes coverage of temporal studies using seriation and spatial analyses involving geostatistics, cluster and K-Means algorithms. Examples used in class include archaeological and anthropological materials. Letter grade only (A-F).
- 570. Linguistic Field Methods (4)**
This course introduces the student to the practical study of unfamiliar languages. Through the help of a native speaker of a non-European language, the student will learn how to write down the sounds of the language and how to determine the structure of the language. Prerequisite: an introductory linguistics course. Same course as LING 580. (Lecture-activity 5 hours.) Letter grade only (A-F).
- 571./471. Prehistory of Eastern North America (3)**
Prerequisites: Graduate standing and consent of instructor. Ecological and evolutionary account of prehistoric cultural developments in North America east of the Rocky Mountains. Cultural and environmental change from appearance of people in New World to collapse of indigenous cultural systems. Letter grade only (A-F).
- 581. Faunal Analysis (4)**
Prerequisites: Graduate standing and consent of instructor: An introduction to the analysis of animal bones from archaeological sites. Exploration of the theoretical and methodological issues that are fundamental to the study of faunal remains and modern zooarchaeology. Course includes lab component which focuses on the identification of archaeological bone specimens. Training includes critical evaluation of published zooarchaeological research and skills required to conduct independent faunal research in the archaeological record. Letter grade only (A-F).
- 585. Physical Science Techniques in Archaeology (4)**
Prerequisites: Graduate standing and consent of Instructor: This course covers the application of techniques of physics and chemistry in archaeology. Provides practical experience in the use of laboratory equipment, including analytical balances, drying ovens, furnaces, and other sample preparation techniques. Also provides experience in the use of chemical characterization techniques, including scanning-electron microscopy and inductively-coupled mass spectrometry. Letter grade only (A-F).
- 588. Advanced Methods in Near Surface Remote Sensing (4)**
Prerequisites: Graduate Standing, ANTH 553, and consent of Instructor: Advanced exploration of the use of near surface geophysical techniques in the study of archaeological deposits. Theory and methodology in the use of remote equipment in archaeology research. Critical evaluation of applications and technological developments. Letter grade only (A-F).
- 591. Preceptorial Reading in Archaeological Science (3)**
Prerequisite: Graduate standing. Training for graduate students in the problems, principles, and methods involved in the explanation of prehistory within a scientific framework. General background in archaeological method and theory, archaeological techniques, debates in the archaeological literature, techniques for data generation, field methods, quantitative methods, and major issues in world prehistory. Meeting times to be arranged. May be repeated to a maximum of 6 units in different semesters. Letter grade only (A-F). May be repeated to a maximum of 6 units in different semesters.
- 592. Research Preparation in Archaeological Science (3)**
Prerequisite: Graduate standing. Training for graduate students in the steps required for conducted research in archaeological science. The course consists of development of research questions, research design and proposal. Meeting times to be arranged. May be repeated to a maximum of 6 units in different semesters. Credit/No Credit only.
- 597. Directed Readings in Anthropology (1-3)**
Prerequisites: Senior or graduate standing and consent of instructor. Selected topics in anthropology will be studied in depth. A written report will be prepared. Letter grade only (A-F).
- 600. Seminar in Ethnology and Social Anthropology (3)**
Topics of substantive and theoretical importance and their application to research problems. May be repeated to a maximum of 6 units. Letter grade only (A-F)
- 620. Seminar in Archaeology (3)**
Prerequisites: Six upper division units in archaeological courses or consent of instructor. Important recent discoveries; contemporary ideas, trends and problems. May be repeated to a maximum of 6 units. Letter grade only (A-F).
- 630. Seminar in Anthropological Linguistics (3)**
Prerequisite: Consent of instructor. Areas and methods of linguistic study and research; evaluation and intensive scrutiny. May be repeated to a maximum of 6 units. Letter grade only (A-F).
- 675. Applied Anthropology Internship Analysis (3-6)**
Prerequisites: ANTH 510, 517, 560. Guided review and discussion of internship in applied anthropology. A hands-on introduction to team analysis and other analytic methods drawing on research conducted during the internship. Credit/No Credit grading only.
- 697. Directed Research (1-3)**
Prerequisite: Consent of department. Research in anthropology on an individual basis. Letter grade only (A-F).
- 698. Thesis (1-6)**
Prerequisite: Consent of department. Planning, preparation and completion of a thesis in anthropology. Letter grade only (A-F).

View the CSU, Long Beach *Catalog* on-line at www.csulb.edu by clicking on "Academics" and then "CSULB Catalog."

Students should contact the Department Student Services Office for referral to one of the faculty advisors: Art/Credential Advisor, B.A./B.F.A. Advisor, Graduate M.A./M.F.A. Advisor.

In recognition of the quality of its programs and the standards it maintains, the Art Department is an accredited institutional member of the National Association of Schools of Art and Design (National Association of Schools of Art and Design, 11250 Roger Bacon Drive, Suite 21, Reston, VA 20190, phone: 703-437-0700).

The Art Department at California State University, Long Beach, is one of several campuses in the California State University system authorized to offer the master of fine arts degree in art with a large number of specializations. The diversity of its programs, the quality of instruction, and the professional caliber of its faculty all combine to provide an exceptional opportunity and challenge to students seeking meaningful educational experiences and careers in the visual arts.

The Art Department has curricular programs leading to the following undergraduate degrees: (1) bachelor of arts (art); (2) bachelor of arts (art history); (3) bachelor of arts (art education); (4) bachelor of fine arts in eight specializations (photography, ceramics, drawing/painting, visual communication (graphic design), illustration, printmaking, sculpture, 3-D media-fiber/metal/wood).

At the graduate level the Art Department offers both the master of arts degree and the master of fine arts degree. As the terminal degree for studio artists, the master of fine arts degree requires a minimum of two years and provides seven professional specializations as follows: ceramics, drawing/painting, illustration, photography, printmaking, sculpture, 3-D media-fiber/metal/wood.

The master of arts degree, designed as a one-year program, is offered by the Art Department in ten specializations; in addition to the seven studio areas listed above, the M.A. degree is granted in art history and art education (Graphic Design does not offer a graduate degree). The department also offers a graduate-level Certificate Program in Museum Studies and an interdisciplinary program leading to a Certificate in Biomedical Art.

As is customary in most schools, the Art Department may request projects completed by students for class credit for a short specified period for purposes of promotion and exhibition.

Admission to Baccalaureate Degree Programs in Studio Art

The number of applicants to several of the programs in Art exceeds the number that can be accommodated. For this reason, the department has been authorized by the California State University to apply supplemental admission criteria. Admission is on a competitive basis, and continuing CSULB students and transfer applicants will be considered equally.

Freshmen applying to the university as Art Education or Art History majors will be admitted to the major if they meet all requirements for admission to the university. Students applying to the

B.A. in Studio Art or to one of the BFA degree programs will be admitted as pre-Studio Art majors. Admission as a pre-Studio Art major does not guarantee admission to the major.

Continuing students must apply for admission to the major during the month of November for following fall or during the month of August for admission for the following spring. Applications must be received in time that students can be admitted to a major by the time they reach 60 units.

Transfer applicants must apply during the initial filing period and must designate the major on the application. Students who are not admitted to the major will be admitted to an alternate major if they have listed one on the application. If no alternate major is listed, the student will not be admitted to the university.

Students who qualify for admission to the university will be admitted to the Art Education or Art History major. Students applying for the B.A. in Studio Art, other than for Art Education or Art History, must meet the criteria for admission to the major. Students applying to a B.F.A. program must supply a portfolio of their creative work to the Art Department.

Students who are not admitted to the designated major will be admitted to an alternate major if they have listed one on the application. If no alternate major is listed, the student will not be admitted to the university

Admission to the Bachelor of Arts in Studio Art

To be eligible for admission to the Option in Studio Art under the B.A. in Art program, students must be able to demonstrate that they will complete at least 30 units lower-division General Education requirements and as many lower-division art prerequisites as possible to the semester for which the application is submitted.

Students will be admitted on the basis of cumulative grade-point average, on a space available basis.

Admission to the Bachelor of Fine Arts Degree

Students seeking admission to the B.F.A. program must:

1. Meet entrance requirements of the University;
2. Provide the Art department with a transcript of all college level credits. This is in addition to any transcript submitted to the University Admissions Office;
3. Submit a portfolio of creative work to the Art Department.

To be eligible for admission to any B.F.A. program, students must be able to demonstrate that they will complete at least 30 lower-division General Education requirements and as many lower-division art prerequisites as possible prior to the semester for which the application is submitted.

Students who have not yet achieved sufficient specialization to prepare a portfolio or otherwise demonstrate their qualifications for the B.F.A. program are advised to seek admission to the Option in Studio Art depending upon their overall grade-point average. Once in residence, the B.A. student may take more specialized work and apply at a later date to change to the B.F.A. program.

Admission Procedures for Change of Major

Currently enrolled students who are undeclared or majors in other departments and who wish to apply for admission to degree programs in art must:

1. Submit a Change of Degree Objective form to the Art Department Student Services Office during the months of November or August;
2. Students applying for the B.F.A. degree programs in Art must also supply transcripts of college-level academic work attempted, and a portfolio of their creative work.

Bachelor of Arts in Art

Option in Studio Art (code ART_BA01) (120 units)

This program is for students who seek a broad understanding and application in art. Total Art units required: 27 lower division, 36 upper division.

Requirements

Lower Division: AH 113A or 113B or 115A, 115B, 115C; ART 10, 130, 131, 151A, 151B, 181, 184, 187, plus one course selected from: ART 161, 263.

Upper Division:

1. ART 320;
2. Six units of Art History only three of which may be AH 438 or 439;
3. One Course from two of the following programs to total 6 units: Drawing and Painting, Printmaking, Illustration, Photography, Graphic Design (Visual Communication);
4. One course from two of the following programs to total six units: Ceramics, Fiber, Metal, Sculpture, or Wood;
5. Plus an additional 12 units upper division from one of the following programs: Art History, Art Education, Ceramics, Drawing and Painting, Fiber, Graphic Design (Visual Communication), Illustration, Metal, Photography, Printmaking, Sculpture, Wood.

Option in Art History (code ART_BA02) (120 units)

This program is for students who wish to specialize in the study of the history of art.

Lower Division: AH 113A, 113B, 115A, 115B, 115C; ART 10, 130, 181; HIST 131, 132, plus one course selected from ART 131, 184, 187, or 263. Upper Division Art History: AH 307, 497, plus one course selected from AH 308, 309, concentration in "major" field (3 courses from one of the following groups plus required AH 497), plus one course from each of the remaining five groups: I: AH 408, 409, 410; II: AH 423, 424, 425, 426, 427; III: AH 401, 436, 437, 438, 439; IV: AH 466, 467, 468, 469, 470A/B, 471A/B; V: AH 455, 456, 457; VI: AH 416, 417, 465.

Other: A score of 450 in either French or German on the Graduate School Foreign Language Test or complete two years of French or German with an average grade of "B" or better.

**Option in Art Education (code ART_BA03)
(120 units)**

The bachelor of arts for teacher preparation degree is a four-year art major degree program required of those students seeking a single subject teaching credential in art (K-12) under the Teacher Preparation and Licensing Act of 1970 (Ryan Act).

Requirements

Lower Division: AH 113A or 113B or 115A, 115B, 115C; ART 10, 130 or 182, 131, 151A, 151B, 181, 184, 187.

Upper Division: ART 300, 301, 205, 407, 412, 415; Art History: one course selected from AH 455, 456, 457, 466, 467, 468, 469, 470A, 470B; and AH 438 or 439; one course selected from ART 381, 383, 384, 385, 387; one course selected from ART 340, 349, 370, 371A; one course selected from ART 316, 328A, 355, 356, 357A, 357B, 358A, 359A, 362A, 363; and one course selected from ART 317, 341A, 341B, or 450A.

FAQ Concerning Road Maps for Completion of Undergraduate Degrees

For each undergraduate major, the on-line Catalog shows plans for scheduling all required courses to complete the degree in four, five, or six years.

While CSULB will make every effort to schedule classes at the times shown in the plans, we cannot guarantee that courses will be available in specific semesters. It is possible that shortage or budget or of personnel will make it impossible to offer as many classes as we would wish.

The plans are not substitutes for working with an advisor. You are strongly encouraged to see an advisor when planning your program each term.

I am a freshman. Do I have to choose now whether to follow the four, five, or six-year plan?

No. Most freshmen take 12-15 units. You need at least 12 units to receive full financial aid. With experience, you will be able to judge how heavy a load you find comfortable. This will depend on your outside obligations, such as a job, and on your personal circumstances. In theory, each unit requires three hours a week, including preparing for class, attending class, and completing assignments. Use these guidelines to budget your time and plan an appropriate schedule.

Must I take the courses in the semesters shown on the plan?

The plan shows one possible way of completing all requirements for the degree. Consult your advisor about whether it is essential to take a given course in the semester shown. There are some rules to keep in mind:

1) You can take the General Education Foundation courses (Composition, Oral Communication, Critical Thinking, Mathematics) in any semester in the first 36 units of baccalaureate-level course work completed at CSULB.

2) You cannot take upper division courses until you have completed at least 30 units. (Exceptions can be made for students who already have completed advanced study in the subject.) You cannot take General Education Capstone courses until you have completed at least 60 units.

3) For some majors it is essential to complete courses in the correct sequence. You cannot take a more advanced course until you have completed the prerequisite course(s).

4) You must complete all requirements for admission to impacted majors within the first 60 units.

I have been told that I must take one or more pre-baccalaureate courses. How can I plan my program?

Your advisor at SOAR can help you identify which courses must be postponed. You must still complete the minimum number of baccalaureate units required for the degree.

You may be able to catch up by taking additional courses in later semesters or by taking classes in summer or winter session, or you may choose to spend an additional semester completing the program. You cannot begin the sequence of required courses for some majors until you are ready for baccalaureate-level Mathematics. See your major advisor to develop a plan for scheduling the required courses.

I didn't complete the exact list of courses shown. Can I still graduate on time?

The answer depends on your major and on what courses you have completed. The plans are not rigid requirements; they are only intended to provide guidance in planning a program. There are many reasons for students to follow a different pattern, such as changing the major, choosing to take fewer classes in a given semester, choosing to complete a minor or a second major. See your advisor for help in planning a program that will work for you.

If I follow the plan, will I have all requirements for graduation completed?

The plans include the specific courses required for the major. For some majors, there are restrictions on the choice of major electives. It is important that you select General Education courses to meet the required distribution pattern. You may need to take an additional General Education course to complete the minimum number of units required for each category. This is likely to happen if you took three-unit courses in Category B, Physical Universe.

Art Education Credential (code 110)

Students are required to complete 30 units of core courses and an additional 36 units to provide breadth and perspective. Refer to the list of courses that follow. Consult the Art Education Credential Advisor for program information.

Single Subject Credential

The Single Subject Credential in Art requires 30 units of upper division or graduate course work beyond the B.A. However, some or all of the professional education courses and student teaching may be taken in the B.A. program or within the fifth year. These courses are EDSS 300A (recommended for the junior year); H SC 411; EDSE435 and 436; EDSS 450A; EDSE 457; ED P 350; EDSS 472 A,B,C (Student Teaching in Art). Before student teaching in art, students must pass a portfolio review. A passing score on the CBEST is also required. For information concerning requirements for the B.A. program, teacher preparation, as well as the fifth year for the credential, consult the art education advisor.

As of July 1, 2002, all candidates for the Single Subject Preliminary Credential are required to demonstrate Level 1 computer proficiency. Proficiency in Art Education can be demonstrated by successful completion of ART 305 or ETEC 444 or by passing a California Commission on Teacher Credentialing-approved examination. This requirement must be met prior to advancement to student teaching.

Bachelor of Fine Arts Degree

The bachelor of fine arts degree is offered for the student eventually seeking a master of fine arts degree, the position of a professional artist or designer, and for the student seeking a career of teaching studio art within a selected specialization. The B.F.A. degree program is demanding, requiring high quality performance in order to develop the professional competence of talented students toward successful entrance into the professional art field. There are seven professionally-oriented specialized programs leading to the B.F.A. degree. Total art and support units required: 70 (30 lower division, 40 upper division). Total units for graduation: 132.

Option in Art Photography (code ART_BF01) (132 units)

Lower Division: AH 113A or 113B or 115A, 115B, 115C; ART 10, 130, 131, 141, 181, 184, 187; select one from ART 161 or 184.

Upper Division: ART 320, 340, 342A, 406A, 444, 447, 491C, 499V; 473 for a total of 6 units; select two courses from ART 406B, 414, 449; AH 411 and one from AH 438 or 439; and 6 units outside the specialization.

FAQ Concerning Road Maps for Completion of Undergraduate Degrees

For each undergraduate major, the on-line Catalog shows plans for scheduling all required courses to complete the degree in four, five, or six years.

While CSULB will make every effort to schedule classes at the times shown in the plans, we cannot guarantee that courses will be available in specific semesters. It is possible that shortage or budget or of personnel will make it impossible to offer as many classes as we would wish.

The plans are not substitutes for working with an advisor. You are strongly encouraged to see an advisor when planning your program each term.

I am a freshman. Do I have to choose now whether to follow the four, five, or six-year plan?

No. Most freshmen take 12-15 units. You need at least 12 units to receive full financial aid. With experience, you will be able to judge how heavy a load you find comfortable. This will depend on your outside obligations, such as a job, and on your personal circumstances. In theory, each unit requires three hours a week, including preparing for class, attending class, and completing assignments. Use these guidelines to budget your time and plan an appropriate schedule.

Must I take the courses in the semesters shown on the plan?

The plan shows one possible way of completing all requirements for the degree. Consult your advisor about whether it is essential to take a given course in the semester shown. There are some rules to keep in mind:

1) You can take the General Education Foundation courses (Composition, Oral Communication, Critical Thinking, Mathematics) in any semester in the first 36 units of baccalaureate-level course work completed at CSULB.

2) You cannot take upper division courses until you have completed at least 30 units. (Exceptions can be made for students who already have completed advanced study in the subject.) You cannot take General Education Capstone courses until you have completed at least 60 units.

3) For some majors it is essential to complete courses in the correct sequence. You cannot take a more advanced course until you have completed the prerequisite course(s).

4) You must complete all requirements for admission to impacted majors within the first 60 units.

I have been told that I must take one or more pre-baccalaureate courses. How can I plan my program?

Your advisor at SOAR can help you identify which courses must be postponed. You must still complete the minimum number of baccalaureate units required for the degree.

You may be able to catch up by taking additional courses in later semesters or by taking classes in summer or winter session, or you may

choose to spend an additional semester completing the program. You cannot begin the sequence of required courses for some majors until you are ready for baccalaureate-level Mathematics. See your major advisor to develop a plan for scheduling the required courses.

I didn't complete the exact list of courses shown. Can I still graduate on time?

The answer depends on your major and on what courses you have completed. The plans are not rigid requirements; they are only intended to provide guidance in planning a program. There are many reasons for students to follow a different pattern, such as changing the major, choosing to take fewer classes in a given semester, choosing to complete a minor or a second major. See your advisor for help in planning a program that will work for you.

If I follow the plan, will I have all requirements for graduation completed?

The plans include the specific courses required for the major. For some majors, there are restrictions on the choice of major electives. It is important that you select General Education courses to meet the required distribution pattern. You may need to take an additional General Education course to complete the minimum number of units required for each category. This is likely to happen if you took three-unit courses in Category B, Physical Universe.

Option in Sculpture (code ART_BF07) (132 units)

FAQ Concerning Road Maps for Completion of Undergraduate Degrees

For each undergraduate major, the on-line Catalog shows plans for scheduling all required courses to complete the degree in four, five, or six years.

While CSULB will make every effort to schedule classes at the times shown in the plans, we cannot guarantee that courses will be available in specific semesters. It is possible that shortage or budget or of personnel will make it impossible to offer as many classes as we would wish.

The plans are not substitutes for working with an advisor. You are strongly encouraged to see an advisor when planning your program each term.

I am a freshman. Do I have to choose now whether to follow the four, five, or six-year plan?

No. Most freshmen take 12-15 units. You need at least 12 units to receive full financial aid. With experience, you will be able to judge how heavy a load you find comfortable. This will depend on your outside obligations, such as a job, and on your personal circumstances. In theory, each unit requires three hours a week, including preparing for class, attending class, and completing assignments. Use these guidelines to budget your time and plan an appropriate schedule.

Must I take the courses in the semesters shown on the plan?

The plan shows one possible way of completing all requirements for the degree. Consult your advisor about whether it is essential to take a given course in the semester shown. There are some rules to keep in mind:

1) You can take the General Education Foundation courses (Composition, Oral Communication, Critical Thinking, Mathematics) in any semester in the first 36 units of baccalaureate-level course work completed at CSULB.

2) You cannot take upper division courses until you have completed at least 30 units. (Exceptions can be made for students who already have completed advanced study in the subject.) You cannot take General Education Capstone courses until you have completed at least 60 units.

3) For some majors it is essential to complete courses in the correct sequence. You cannot take a more advanced course until you have completed the prerequisite course(s).

4) You must complete all requirements for admission to impacted majors within the first 60 units.

I have been told that I must take one or more pre-baccalaureate courses. How can I plan my program?

Your advisor at SOAR can help you identify which courses must be postponed. You must still complete the minimum number of baccalaureate units required for the degree.

You may be able to catch up by taking additional courses in later semesters or by taking classes in summer or winter session, or you may choose to spend an additional semester completing the program. You cannot begin the sequence of required courses for some majors until you are ready for baccalaureate-level Mathematics. See your major advisor to develop a plan for scheduling the required courses.

I didn't complete the exact list of courses shown. Can I still graduate on time?

The answer depends on your major and on what courses you have completed. The plans are not rigid requirements; they are only intended to provide guidance in planning a program. There are many reasons for students to follow a different pattern, such as changing the major, choosing to take fewer classes in a given semester, choosing to complete a minor or a second major. See your advisor for help in planning a program that will work for you.

If I follow the plan, will I have all requirements for graduation completed?

The plans include the specific courses required for the major. For some majors, there are restrictions on the choice of major electives. It is important that you select General Education courses to meet the required distribution pattern. You may need to take an additional General Education course to complete the minimum number of units required for each category. This is likely to happen if you took three-unit courses in Category B, Physical Universe.

Certificate Program in Biomedical Art (code ART_CT01)

The Certificate Program in Biomedical Art is an interdisciplinary program sponsored by the Art and Biological Sciences Departments.

Biomedical art is commissioned principally by (1) hospitals or individual researchers for publication, (2) by publishers and film and television producers serving the biomedical professions, (3) by producers of educational aids for biomedicine. Therefore, proficiency in commercial art and printing procedures including photography and typography is required.

Special permission is not required for a student to pursue the Certificate in Biomedical Art. The student may apply for certification upon completion of the following CSULB course work and conditions:

Requirements

1. A major in art or biology;
2. A 2.75 overall GPA and 3.25 in the major;
3. 33 units as listed: ART 141 (2), 149 (3), 181 (3), 184 (3), 271 (3), 372 (2), 374A (3), 374B (3), 499F (3); and BIOL 200 (4), 208 (4); the BIOL 200 is waived for Biology majors.

Co-directors of the CSULB Biomedical Art program are in Art: Peter Mendez; and in Biological Sciences: Dr. Kenneth Gregory. Questions may be addressed to them during office hours which are listed in the respective departmental offices.

GRADUATE PROGRAMS

Master of Arts in Art (code ART_MA01)

Master of Fine Arts in Art (code ART_MF01)

The Department of Art offers the Master of Arts degree (30 units) in Art Education and Art History and (33 units) Studio Art, and the Master of Fine Arts degree (60 units) in Studio Art. Studio programs include: Ceramics, Drawing & Painting, Fiber, Illustration, Metals, Photography/Digital, Printmaking, Sculpture/Intermedia, and Wood.

Departmental Review Process

Admission to a degree program at CSULB is a two-part process that requires acceptance by both the department and the University into a specific degree program. Most applicants complete the Art Department review process before making a formal application to the University. (See the detailed information on CSULB graduate application and admission requirements earlier in this catalog.) Call the Art Student Services Office at (562) 985-7819 to obtain the Art application packet.

The departmental reviews are held the month of March (deadline for paperwork and slides is March 1) for Fall admission and the month of October (deadline October 1) for Spring admission. Application materials (see "Departmental Application Requirements") are due in the Student Services Office in FA4-106 and then are forwarded to the appropriate program major, where they are reviewed by the program faculty. Some programs accept interviews and faculty may contact the applicant. While most programs review with an end of the month deadline, Drawing and Painting has a formal review the first available Saturday of the deadline month.

Program review decisions will be sent out by the end of the month. This allows students to file the required University applications by the appropriate deadlines of May 15 (there are no departmental reviews during the summer) and December 1.

Acceptance to a degree program in Art: After submitting the Art Department application materials, those who pass the program review are recommended by the faculty to be admitted as either Classified or Conditionally Classified. A Classified Graduate has satisfied all prerequisites. A Conditionally Classified Graduate has outstanding prerequisites to complete. Acceptance is not complete until the applicant files a CSU Graduate Application at the Enrollment Services Office and has received a formal letter of acceptance from this office.

NOTE: The Art Department requires a GPA of 3.0 in upper division (junior and senior level) art prerequisite units for acceptance to our graduate program. All applicants must be accepted by the Art Department in order to be officially accepted by the University. There is no fee for the departmental application process.

Foreign Students must be accepted by the Art Department and pass the TOEFL examination (minimum score of 550) before they can be admitted to the University. Foreign students must apply to CSULB through the Center for International Education at (562) 985-5476.

Degree Outside Art: Those who have a degree in another field need only complete the required Studio Art and/or Art

History prerequisites to qualify for applying for the Department of Art MA or MFA degrees. To earn needed prerequisites at CSULB, Art Department courses may be taken through the Open University enrollment program in the University College and Extension Services office, phone (562) 985-5561.

University Admissions Process: Applicants must file a complete application as described in the California State University Graduate Admissions booklet. CSU general requirements include: a bachelor's degree from a regionally accredited institution; a grade point average of at least 2.5 in the last 60 semester units taken; and good standing at the last college attended.

The open filing periods (at the Enrollment Services Office, Brotman Hall) begin early: October 1 for the following Fall semester and August 1 for the following Spring semester. Call (562) 985-4145 or 1655 to obtain a CSU application booklet or apply online at www.csumentor.edu There is a \$55.00 fee for the University application process. (Do not send the Art Department this fee; we will send it back to you.)

MA/MFA Prerequisites

1. A bachelor's degree from an accredited institution.
2. A minimum of 36 units in Art, including at least 30 at the upper division (300-400) level, and a GPA of 3.0 in upper division Art and Art History units.

Specific prerequisites for each major:

Art Education applicants must complete 36 units in a combination of Studio Art, Education and Art History classes comparable to those required for an Art Education major at this university:

15 upper division units (junior & senior level)
approved by the Art Education faculty

9 upper division units of Art or Education electives

12 units Art History (6 may be lower division, 6 must be upper division)

36 total units required

Art History applicants must complete 36 units comparable to those required for an Art History major at this university:

15 upper division units in Art History, which must include AH 307- Historiography in Art and either AH 308 -Art Theory or AH 309 -Art Criticism.

9 upper division units of Art or Art History electives

12 units (or the equivalent) of foreign language

36 total units required

NOTE: Art History majors must complete two years (or a minimum of 12 units) of college-level French or German with an average grade of "B" or better, or pass the Art History In-house Foreign Language Exam within the first year of study. (With approval from the Art History faculty, another language may be substituted.)

Studio Art applicants must complete 36 units in Studio Art and Art History comparable to those required for a Studio Art major at this university:

15 (for MA) or 18 (for MFA) upper division units
in the specific program area

9 (for MA) or 6 (for MFA) upper division units of Art electives

12 units Art History (6 may be lower division, 6 must be upper division)

36 total units required

Departmental Application Requirements

Art Education: Submit the Department of Art application, a portfolio of studio work, transcripts, and two letters of recommendation

Art History: Submit the Department of Art application, transcripts, and two letters of recommendation

Studio Art: Submit the Department of Art application, a portfolio of studio work, transcripts, and two letters of recommendation

A faculty list is provided in the Art Department application packet; contact the appropriate professor if you need particular information on a specific program.

Transcripts

If you apply to the department first, we will accept photocopies. If you are also formally applying to the University, two official (sealed) sets are required; send one to Enrollment Services and one to the Art Department.

Transfer Units

With faculty approval, up to six post-baccalaureate units from another university may be accepted into the MA degree program and up to 24 units (for example, from a previous MA degree) into the MFA degree program. In the case of an existing MA degree from CSULB, the total of 30 units will be accepted into the MFA degree.

Degree Requirements for the MA and MFA

1. Successful completion of all MA or MFA course requirements (selection of classes determined by the student and the three faculty members on their Graduate Committee). These include:

MA in Art Education

30 units of approved graduate and asterisked (*) upper division units to include a minimum of 18 in the major. At least 60% of the 30 units must be 500/600 level courses taken at CSULB, and must include Art 509A, 509B, 601A and 601B. 6 units of graduate level Art History beyond the 12 units taken as prerequisites, to complete a cumulative total of 18 units. Final requirements are the completion of a written Thesis or a Project with a Project Report, documentation, orals and comprehensive exam (ART 698A).

MA in Art History

36 units of approved graduate and asterisked (*) upper division units to include a minimum of 18 units in the major, and 6 units in AH 597 Seminar. At least 60% of the 30 units must be 500/600 level courses taken at CSULB. Satisfying foreign language proficiency (see Advancement requirements below). The final requirement is the completion of a written Thesis (AH 698).

Museum Studies Emphasis

36 units of approved graduate and asterisked (*) upper division units to include 18 units of specially tracked 500 level courses in museum studies and practices, which include an internship and exhibition. Three Art History courses are also required (AH 310*, 539, and 597). A minimum of 3 additional units in upper division Art History or another approved elective is also required. Satisfying foreign language proficiency as outlined by the MA in Art History. The final requirement is the completion of a written Thesis (AH 698).

MA in Studio Art

33 units of approved graduate and asterisked (*) upper division units to include a minimum of 21 in the major. 6 units of graduate level Art History beyond the 12 units taken as prerequisites, to complete a cumulative total of 18 units. Final requirements are the completion of a Project (Art 698B) and presentation of a Project Exhibition (Art 692) with a written Artist's Statement.

MFA (Studio Art)

60 units of approved graduate and asterisked (*) upper division units to include a minimum of 36 in the major. At least 60% of the 60 units must be 500/600 numbers taken at CSULB. Six units of graduate level Art History beyond the 12 units taken as prerequisites are required, for a cumulative total of 18 units. Six units in Art Department Graduate Seminar courses 690A & B are also required for the MFA program. Final requirements are the completion of a Project and Project Report (Art 699), and the Project Exhibition (Art 692).

2. A minimum overall GPA of 3.0, with no grade below a "C".
3. Successful completion of the Writing Proficiency Exam (WPE), usually taken the first semester in residence at CSULB and required to be passed prior to Advancement to Candidacy.
4. Successful completion of an Advancement to Candidacy review. Reviews occur after taking 15 MA units or 30 MFA units and require the submission of a complete list of coursework for the master's degree. In addition:

Art Education majors satisfy assigned written topics and prepare an oral defense of their research.

Art History majors present a qualifying paper and satisfy the language requirement in either French or German (or an approved substitution).

Studio Art majors participate in a group exhibition in the Art Department galleries and present an oral defense of their work.

If all scheduled units for the MA or MFA degree have been completed but the final written component has not been approved and submitted, registration in GS-700 (1 unit, no credit) through University Extension is required in order to maintain enrollment until the semester of graduation. Care should be taken not to exceed the University limit of seven years for all masters' degrees.

Additional information may be found in the "Department of Art Graduate Guidelines," given to each student accepted into a master's program.

Graduate Certificate Program in Museum Studies (code ART_CT02)

The Certificate Program in Museum Studies is open to graduate students in museum related fields including the visual arts, science, history, but does not exclude other fields. The initial program is to be devoted primarily to art museum studies.

Admission to the program is by permission of the museum studies faculty within the Art Department. Interested students should apply to the Director, the Museum Studies Program.

Requirements

A total of 30 units to include: AH 435A, ART 545A-B taken consecutively beginning in the spring semester, AH 542 in museum internship; ART 307 and 15 additional units selected from AH 499Q, Art History, Anthropology, Business Administration, English, Instructional Media, Journalism or Public Policy and Administration, subject to approval of the director of the program at the time of admission to ART 545A.

Foundation Art

The classes listed below are the foundation art classes that are required of all studio art majors. When foundation classes are chosen, be aware of the prerequisites; do not take the classes out of order.

AH 115A,B,C. Foundation Art History I, II, III
130. Foundation Two-Dimensional
131. Foundation Three-Dimensional
181. Foundation Drawing
184. Foundation Life Drawing
187. Foundation Painting

Art Courses (ART)

Lower Division

10. Art Matrix (1)

Participation in art and design exhibitions, openings, lectures and special events. Required of art majors. Must be taken for 1 unit in 5 different semesters for a total of 5 units. These units do not count toward graduation. Credit/No Credit grading.

100. Perceptual Skills Through Drawing (3)

Prerequisite or corequisite: A General Education Foundation class. Basic theory and concepts of art learned through drawing, with emphasis on developing perceptual skills. (2 hrs. lec., 3 hrs. lab.)

110. Introduction to the Visual Arts (3)

Prerequisite or corequisite: A General Education Foundation class. Exploration of the meanings, purposes, and styles of art; introduction to the materials and forms of painting, printmaking, sculpture, and architecture. Orientation to the arts of Africa, Asia, the Americas, Europe, and the Islamic world. Development of an awareness and understanding of diverse cultures through examination and comparison of their arts and artifacts, past and present. Illustrated lectures, supplemented by individual field activities utilizing the abundant visual arts resources of greater Los Angeles.

130. Foundation Two-Dimensional (3)

Introduction to, and exploration of, the basic principles, components and terminology of two dimensional design. Students apply these in a series of problem solving exercises to develop a working vocabulary of those fundamental visual elements and relationships applicable to all forms of visually creative endeavor. (6 hrs. lab.) Letter grade only (A-F).

131. Foundation Three Dimensional (3)

Investigation and problems in the organization of three-dimensional phenomena. (6 hrs. lab.) Letter grade only (A-F).

141. Basic Photography (3)

Prerequisites: ART 130 or 182, 181. A beginning course to familiarize students with the fundamentals of black and white photography. Units pertaining to cameras, darkroom techniques, photographic vision and critical issues. (6 hrs. lab.) Letter grade only (A-F).

149. Introduction to Computer Art (3)

Prerequisites: ART 130. An introduction to the basic operating characteristics of the computer and a project-based creative exploration of major art-related software programs such as Illustrator, Photoshop QuarkXpress, Painter, Dimensions, etc., with

exposure to research and connectivity capabilities. Not open to students who have credit in ART 349A. (6 hrs. lab.) Letter grade only (A-F). Course fee may be required.

151A. Beginning Ceramics: Handbuilding (3)

Prerequisites/Corequisites: ART 131. Introduction to ceramics as an art making material using handbuilding techniques such as slab, coil, and molding, including glazing and processes. (6 hrs. lab.) (CAN ART 6) Letter grade only (A-F).

151B. Beginning Ceramics: Wheel Throwing (3)

Prerequisites/Corequisites: ART 131. Introduction to ceramics as an art making material emphasizing the use of the potter's wheel to develop forms. Includes glazing and firing. (6 hrs. lab.) Letter grade only (A-F).

161. Foundation Life Sculpture (3)

Prerequisites/Corequisites: ART 131, 181, or consent of instructor. Modeling from the human figure with emphasis on composition. Course fee may be required. (6 hrs. lab.) Letter grade only (A-F).

181. Foundation Drawing (3)

Introduction to drawing with emphasis on perspective, light, shadow, and volume in composition using a variety of media. (6 hrs. lab.) (CAN ART 8) Letter grade only (A-F).

182. Color Theory and Composition (3)

An intensive study of the behaviors and traditions of color composition with an emphasis on fine arts application. Using theories of the major colorists as a structure, studio projects provide hands-on exploration of specific topics. (6 hrs. lab.) Letter grade only (A-F).

184. Foundation Life Drawing (3)

Prerequisites: ART 181. Introduction to drawing from the human figure. Course fee may be required. (6 hrs. lab.) Letter grade only (A-F).

187. Foundation Painting (3)

Prerequisites: ART 130 or 182, 181. Introduction to painting problems using opaque media. (6 hrs. lab.) (CAN ART 10) Letter grade only (A-F).

221. Shop Orientation (1)

Intended to give students a general familiarity with the student workshop facilities as well as specific instruction on safety procedures and methods in the use of workshop tools and equipment. Students shall attend safety lectures and technical demonstrations followed by hands-on experience in the use of shop facilities. Projects will familiarize students with commonly used machines in the shop and shall facilitate the acquisition of basic woodworking skills. Credit/No Credit grading only. (2 activity hours)

223. Lettering-Typography (3)

Prerequisite: ART 181, 130 or 182. Introduction to historic and contemporary letterforms, with emphasis on recognition, construction and representation. Students apply design fundamentals to the modification, combination and composition of existing typographic forms. Computers may be utilized. (6 hrs. lab.) Letter grade only (A-F). Course fee may be required.

263. Beginning Sculpture (3)

Prerequisites/Corequisites: ART 131, 181, or consent of instructor. Principles of sculpture expressed through basic experiences in modeling, carving, construction and mold making. (6 hrs lab) (CAN ART 12) Letter grade only (A-F).

271. Rendering (3)

Prerequisite: ART 181, 130 or 182. Graphic visualization for convincing representation. (6 hrs. lab.) Letter grade only (A-F).

Upper Division

The Art Department upper division courses fall into several curricular sub-groups, as follows:

Art Education

(ART 407 and 499P are acceptable for the M.A. with a specialization in Art Education.)

- 300. Art, Adolescence, and the Child
- *301. Cross-Cultural Perspectives in Art Education
- 305. Art Disciplines and New Technology
- *407. Art Practicum
- 412./512. Aesthetic Theories and Art Education
- 415. On-Site Studies in Art Education
- *499P. Special Studies in Art Education

Art History

- AH *307. Historiography in Art
- AH *308. Western Art Theory and Criticism to the Mid-Nineteenth Century
- AH *309. Western Art Theory and Criticism Mid-Nineteenth to Mid-Twentieth Century
- AH 310. Western Art Theory and Criticism Mid-Twentieth Century to Present
- AH *364. History of Ceramics 1900 to Present
- AH *365. History of Prints and Drawings
- AH 401./501. American Art to 1900
- AH 402. The Rise of Landscape Painting
- AH 408./508. Early Christian and Byzantine Art
- AH 409./509. Romanesque Art
- AH 410./510. Gothic Art
- AH 411./511. History and Criticism of Photography
- AH 416./516. Greek Art
- AH 417./517. Roman Art
- AH 423./523. Early Renaissance Art in Italy
- AH 424./524. High Renaissance Art in Italy
- AH 425./525. Northern Renaissance Painting
- AH 426./526. Baroque Art in Spain, the Netherlands, and England
- AH 427./527. Baroque Art in Italy, France, and Germany
- AH 435A./535A. History of Museums and Exhibitions
- AH 435B./535B. Museum Practices
- AH 436./536. Neo-Classicism to Romanticism, 1789-1850
- AH 437./537. Impressionism to Post-Impressionism, 1850-1900
- AH 438./538. Twentieth Century Art to 1945
- AH 439./539. Twentieth Century Art from 1945
- AH 440. Art and Society
- AH 455./555. Traditional Art of Africa: A Thematic Approach
- AH 456./556. American Indian Art: Western Perspectives
- AH 457./557. Pre-Columbian Art
- AH 458./558. Modern Latin American Art
- AH 459./559. Contemporary Latin American Art
- AH 465./565. Ancient Art of the Near East
- AH 466./566. Buddhist Art of India and S.E. Asia
- AH 467./567. Hindu and Islamic Art of India
- AH 468./568. Early Chinese Art
- AH 469./569. Later Chinese Art
- AH 4B70A./570A. Japanese Buddhist Art to 1500
- AH 470B./570B. Japanese Art 1500-1868
- AH 471A. Modern Japanese Graphic Art
- AH 471B. Modern Japanese Plastic Art
- AH 495. Independent Study In Art History
- AH 496. Special Studies in Art History
- AH 497./597. Seminar in Art History
- AH 498. Special Topics in Art History
- AH 499Q. Special Studies in Museum Studies

Ceramics

- *341A. Intermediate Ceramics: Handbuilding
- *341B. Intermediate Ceramics: Wheel Throwing
- *343A. Ceramics Sculpture
- *343B. Advanced Wheel Throwing
- *352A. Ceramics: Glaze Technology
- *352B. Ceramics Plaster Shop
- *451A-B. Advanced Ceramics

200 • Art • 2004/2005 CSUEB Catalog

- 453. Seminar in Ceramic Arts
- 491A. Ceramics: Senior Project
- *499A. Special Studies in Ceramics

Drawing and Painting

- 381. Intermediate Drawing
- 383. Life Painting
- 384. Intermediate Life Drawing
- *385. Watercolor Painting
- *387. Painting
- *389. Materials and Craft of Drawing and Painting
- *481. Advanced Drawing
- *483. Advanced Life Painting
- *484. Advanced Life Drawing
- *487. Advanced Painting
- *492F. Concentrated Studies in Life Drawing
- *492G. Concentrated Studies in Abstract Painting
- *492Z. Concentrated Studies in Life Painting
- *499D. Special Studies in Drawing
- *499K. Special Studies in Painting

Fiber

- *316. Surface Design
- *317. Surface Design
- *328A. Fiber: Sculpture
- *328B. Fiber: Sculpture
- *428A-B. Weaving
- *430. Fiber: Papermaking and Artist Books
- 432 Fiber: Advanced
- 491B. 3-D Media -:Senior Project
- *499N. Special Studies in Fiber

Graphic Design (Visual Communications)

- 318. Typographic Design
- *322A-B. Visual Communication Design
- *323. Visual Communication Design/Production
- *325. Packaging Design
- 326. Computer Graphics
- 329. Advertising Design
- *331. Visual Communications Design/Concept Development
- 386A-B. New Media Design
- *420. Visual Communication Design Workshop
- *422A-B. Advanced Visual Communications Design
- *442. Internship in Visual Communications
- *499S. Special Studies in Visual Communications Design

Illustration and Biomedical Art

- *371A-B. Illustration
- *372. Anatomy for Artists
- *373. Costumed Figure Drawing
- *374A-B. Biomedical Rendering
- 382. Production for Fine Arts
- *471A./B. Advanced Illustration
- 472./572. Storyboarding for Film and Television
- 482. Sequential Imagery
- *499F. Special Studies in Illustration

Metal

- 355. Enameling
- *356. Jewelry Casting
- *357A-B. Beginning Metals and Jewelry
- *358A-B. Metalsmithing
- 359A. Architectural Metalwork and Blacksmithing
- 359B. Sculptural Metalwork

458A,B. Advanced Metalsmithing/Jewelry and Enameling
491B. Senior Project
*499J. Special Studies in Metalsmithing and Jewelry

Museum Studies

AH 435A. History of Museums and Exhibitions
AH *499Q. Special Studies in Museum Studies

Photography

*340. Intermediate Photography
*342A. Color Photography
406A. Digital Imagery for the Arts
406B. Advanced Digital Imagery for the Arts
414./514. Documentary Photography
*444. Fine Print Photography
*447. Photography Studio Specialties
*449. Experimental Practices in Photography
473. Seminar in Photo-Based Art
491C. Photography – Senior Project
*499V. Special Studies in Art Photography

Printmaking

370. Printmaking
*376. Printmaking: Relief Printing
*377. Printmaking: Silkscreen
*378. Printmaking: Etching
*379. Printmaking: Lithography
*475. Printmaking: Photo Processes
*480. Printmaking: Monotype/Monoprint
491P. Printmaking: Senior Project
*499R. Special Studies in Printmaking

Sculpture

360A. Intermediate Sculpture
360B. Intermediate Sculpture
*361. Life Sculpture
*362A. Sculpture Foundry: Investment Casting
*362B. Sculpture: Molding and Reproduction
*363. Sculpture: Carving and Fabrication
436./536. Video Art
436A. Video Art
436B. Video Art
450A,B. Intermedia
460A.,B.e Advanced Sculpture
*461. Advanced Life Sculpture
*491F. Sculpture Senior Project
499M. Special Studies in Life Sculpture
499O./599O. Special Studies in Studio Sculpture

Wood

*354A-B Wood
*454A-B. Handcrafted Furniture
491B. 3-D Media Fiber/Metal/Wood and Integrated Media: Senior Project
*499B. Special Studies in Wood

Art Courses (ART)

Upper Division

300. Art, Adolescence, and the Child (3)

This course provides experience in the visual arts appropriate to developing self-expression according to guidelines found in the California Visual and Performing Arts Framework while introducing children's artistic and aesthetic development. Following the current content standards established by the State of California, students will develop aesthetic perception; learn skills of analysis, interpretation and judgment for application to visual art; and gain an understanding of the historical and cultural contexts of visual art. (6 hrs. lab.) Letter grade only (A-F).

*301. Cross Cultural Perspectives in Art Education (3)

Prerequisites: Completion of 12 units of Art Foundation. A study of the diversity of theory and practice in art and art education as understood in and across cultures. Application of the California Visual and Performing Arts Framework for art education to the integration of content from art history, art production, theory and criticism, and aesthetic viewpoints reflecting a variety of racial, ethnic, linguistic, gender, sexual, cultural and cross-cultural perspectives. This course will also address issues of culturally appropriate practice for understanding art across cultures. (6 hrs. lab.) A minimum of 15 hours of community service learning required. Letter grade only (A-F).

305. Art Disciplines and New Technology (3)

Prerequisites: Completion of 12 units of Art Foundation. Development of skills in making and talking about art through interrelating art production with art criticism, cultural-historical connections, and philosophical aesthetics. Emphasis will be placed on the newer art forms and technology including video and computer which help provide additional approaches for the artist and art educator. Course fee may be required. (6 hrs. lab.) Letter grade only (A-F).

309. Studio Art For Educators (3)

This course examines the studio art discipline with relationship to educational practice. Concepts, methods, and evaluative techniques in studio art will be explored, with production of a body of work a major course component. Issues in studio art and in education which impact one another will be investigated, as will application of studio art in educational programs and venues following current content standards established by the State of California. (6 hrs. lab.) Letter grade only (A-F).

*316. Fiber: Pattern Design and Printing (3)

Prerequisites: ART 130 or 182, 131, 181, 187; six units from AH 115A, 115B, 115C. Variety of design concepts for both hand and commercial application of pattern to textiles and other surfaces. To include pattern system design, stamping, and silkscreen printing. (6 hrs. lab) Letter grade only (A-F).

*317. Fiber: Textile Dyeing (3)

Prerequisites: ART 130 or 182, 131, 181, 187; six units from AH 115A, 115B, 115C. Variety of design concepts and processes to include chemical and natural dye technology with discharge, shibori, batik, and direct painting techniques. Not open to students with credit for ART 327B. (6 hrs. lab.) Letter grade only (A-F).

318. Typographic Design (3)

Prerequisites: ART 130 or 182, 181, 184, 223; six units from AH 115A, 115B, 115C; or consent of instructor. More complex design experiences with type families, exploration of combinations of display and text; development of logotypes and design of new typographic forms. Computers may be utilized. (6 hrs. lab.) Letter grade only (A-F). Course fee may be required.

320. Practical and Theoretical Issues in the Visual Arts (3)
A lecture/lab course involving lectures, discussions, screenings, slide presentations, and guest speakers referencing art of the 1960s and 1970s, and focusing on art of the 1980s and 1990s, and into the twenty-first century. Course is to focus on art of this period, how it relates to a prior history and what it might indicate for the future. Course is to expose students to a broad range of practice crossing all disciplines of the visual arts. Course is to involve multiple guest speakers and visits to on-campus lectures in order to give students first-hand experience of artists working in the field, and the creative, conceptual, and practical concerns these artists deal with. Not open to students who have had credit for ART 320A. (6 hrs. lab.) Letter grade only (A-F).

***322A,B. Visual Communication Design (3,3)**
Prerequisites: For ART 322A: ART 130 or 182, 131, 181, 184, 187, 223 and 6 units from AH 115A, 115B, 115C. For ART 322B: ART 322A, 323. Introductory and intermediate experiences in conceptualization, design and finalization of projects appropriate to the visual communication profession. Computers may be utilized. (6 hrs. lab.) Letter grade only (A-F). Course fee may be required.

***323. Visual Communication Design/Production (3)**
Prerequisites: Visual communications major or consent of instructor. Computer-based introduction to design and production techniques for major printing processes from concept to digital finished art. Field trips, lectures, critiques. (6 hrs. lab.) Letter grade only (A-F).

324. Visual Communication Design/Portfolio Preparation (3)
Prerequisites: ART 318, ART 322A, ART 331, ART 326. This course is designed for pre-graphic design majors and art majors who will graduate with an emphasis in graphic design. Students will present new or revised class work for critiques to improve their portfolios. Only two pieces will be critiqued from each student during the class session. Critiques will include short lectures on portfolio preparation, individual and group critiques. All completed work will be reviewed at the end of the semester. (6 hrs. lab.) Letter grade only (A-F).

***325. Packaging Design (3)**
Prerequisite: Visual Communications major or consent of instructor. Materials, processes and the design of packaging. (6 hrs. lab.) Letter grade only (A-F). Course fee may be required.

326. Computer Graphics (3)
Prerequisites: ART 322A. Entry level introduction to the graphics-oriented computer, emphasizing its potential as a visual communication design tool. Includes "hands on" exploration of the major software applications as related to layout, typography and illustration. (6 hrs. lab.) Letter grade only (A-F). Course fee may be required.

***328A. Fiber: Sculpture (3)**
Prerequisites: ART 130 or 182, 131, 181, 187; six units from AH 115A, 115B, 115C. In this introductory course the student will explore concepts and materials using non-loom textile techniques. Development from the 2-D relief surface to full 3-D form will take place. The basic fiber structures of stitching, wrapping, feltmaking, papermaking, and coiling will be introduced. (6 hrs. lab.) Letter grade only (A-F).

***328B. Fiber: Sculpture (3)**
Prerequisites: ART 328A. Designed to strengthen a working understanding on non-loom fiber structures. There will be an emphasis on the development of personal expression within the media. (6 hrs. lab.) Letter grade only (A-F).

329. Advertising Design (3)
Prerequisites: ART 322A, 331, majors only. This course will explore small space advertising, television, and outdoor billboards from the conceptual stage through comprehensive layouts. (6 hrs. lab.) Letter grade only (A-F).

331. Visual Communications Design/Concept Development (3)
Prerequisites: ART 130, or 182, 181, 184, 187, 318, 322A; 6 units from AH 115A, 115B, 115C. Development of conceptual thinking and visual representational skills from thumbnail sketches to full size layouts will be covered. Emphasis on various approaches to problem solving in advertising and design. Corporate identity and page layout will also be addressed. (6 hrs. lab.) Letter grade only (A-F).

***340. Intermediate Photography (3)**
Prerequisites: ART 130 or 182, 141, 181, 184, 187; 6 units from AH 115A, 115B, 115C. More advanced black and white darkroom and camera work. An introduction to the view camera as well as the development of a body of work. (6 hrs. lab.) Letter grade only (A-F).

***341A. Intermediate Ceramics: Handbuilding (3)**
Prerequisites: ART 130 or 182, 131, 151 A, 181; six units from AH 115A, 115B, 115C. Design problems with handbuilt ceramic forms with emphasis on surface. (6 hrs. lab.) Letter grade only (A-F).

***341B. Intermediate Ceramics: Wheel Throwing (3)**
Prerequisites: ART 130 or 182, 131, 151 B, 181; six units from AH 115A, 115B, 115C. Design problems with wheel-thrown ceramic forms with emphasis on surface. (6 hrs. lab.) Letter grade only (A-F).

***342A. Color Photography (3)**
Prerequisite: ART 340. Survey of current color materials and processes with emphasis on exposing, developing and printing. Contemporary approach to color photography will be stressed. (6 hrs. lab.) Letter grade only (A-F).

***343A. Ceramics Sculpture (3)**
Prerequisites: ART 341A. Advanced studies in ceramic sculpture. (6 hrs. lab.) Letter grade only (A-F).

***343B. Advanced Wheel Throwing (3)**
Prerequisites: ART 341B. Advanced studies in ceramic form employing the potters wheel. (6 hrs. lab.) Letter grade only (A-F).

349. Computer Art (3)
Prerequisites: ART 149, AH 115A, 115C. Basic theory and hands-on use of microcomputers employing graphics in "Paint Programs" with color hardcopy output and animation production on video tape. Emphasis on computer graphic applications in students' individual studio art disciplines. Not open to students who have credit for ART 349B. (6 hrs. lab.) Letter grade only (A-F). Course fee may be required.

***352A. Ceramics: Glaze Technology (3)**
Prerequisite: ART 130 or 182, 131, 151A or 151B, 181; six units from AH 115A, 115B, 115C. Nature of raw materials as they relate to the development of clay bodies and ceramic glazes. (6 hrs. lab.) Letter grade only (A-F).

***352B. Ceramics Plaster Shop (3)**
Prerequisites: ART 130 or 182, 151A or 151B, 181; six units from AH 115A, 115B, 115C. The use of plaster molds for making ceramic art including press molds, slip casting, and jiggering. (6 hrs. lab.) Letter grade only (A-F).

***354A,B. Wood (3,3)**
Prerequisites: For ART 354A: ART 130 or 182, 131, 181; six units from AH 115A, 115B, 115C. For ART 354B: ART 354A. Woodworking processes techniques and concepts in the design and making of utilitarian art objects. (6 hrs. lab.) Letter grade only (A-F).

***355. Enameling (3)**
Techniques, Materials, and concepts of enameling on metals. Introduction to tools and metalworking techniques associated with making enameled metal objects. Emphasis on the exploration of characteristics of enamels and metals, stressing individual advancement of interest and expression. Course fee required. May be repeated once for credit. (6 hrs. lab.) Not open to students who have credit for ART 355A. Letter grade only (A-F).

***356. Jewelry Casting (3)**

Prerequisite: ART 130 or 182, 131, 181; six units from AH 115A, 115B, 115C; or consent of instructor. The design and creation of jewelry through lost-wax casting techniques and processes. Course fee may be required. May be repeated to a maximum of 6 units. (6 hrs. lab.)

***357A-B. Beginning Metals and Jewelry (3-3)**

Prerequisites: For ART 357A: ART 130 or 182, 131, 181, 187; six units from: AH 115A, 115B, 115C. For ART 357B: ART 357A. The design and creation of jewelry. Course fee may be required. (6 hrs. lab.) Letter grade only (A-F).

***358A. Metalsmithing (3)**

Prerequisites: ART 357A. The design and creation of flatware and hollowware. Course fee may be required. (6 hrs. lab.) Letter grade only (A-F).

***358B. Metalsmithing (3)**

Prerequisites: ART 357A. The design and creation of flatware and hollowware. Course fee may be required. (6 hrs. lab.) Letter grade only (A-F).

***359A. Architectural Metalwork and Blacksmithing (3)**

Prerequisite: ART 130 or 182, 131, 181; six units from AH 115A, 115B, 115C. Techniques, materials and concepts of the metal craft for developing art forms in larger scale and in an architectural context. Hot forging and fabricating with ferrous metals. Basic techniques of cutting, forming, joining welding and surface design of metals. Making of tools. May be repeated to a maximum of 6 units. Course fee may be required. (6 hrs. lab.) Letter grade only (A-F).

***359B. Sculptural Metalwork (3)**

Prerequisite: ART 130 or 182, 131, 181; six units from AH 115A, 115B, 115C. Introduction to metalforming and construction techniques in the design and creation of sculptural form and composition in metal on an architectural scale. May be repeated to a maximum of 6 units. Course fee may be required. (6 hrs. lab.) Letter grade only (A-F).

360A. Intermediate Sculpture (3)

Prerequisites: ART 130 or 182, 131, 161, 181, 263; 6 units from AH 115A, 115B, 115C or consent of instructor. Exploration and refinement in wide range of sculptural techniques and strategies. Introduction to installations and public work. Some work will be with time-based kinetic art. Course will include introduction to 3-D art theory. (6 hrs. lab.) Letter grade only (A-F).

360B. Intermediate Sculpture (3)

Prerequisites: Art 360A or consent of instructor. Exploration and refinement in a wide range of sculptural techniques and strategies. Introduction to installations and public work. Some work will be with time based kinetic art. Course will include introduction to 3-D art theory. (6 hrs. lab.) Letter grade only (A-F).

***361. Life Sculpture (3)**

Prerequisite: ART 130 or 182, 131, 161, 181; six units from AH 115A, 115B, 115C. Intensive study of the figure through individual student concepts. Mold and casting techniques and direct plaster paring. Course fee may be required. (6 hrs. lab.) Letter grade only (A-F).

***362A. Sculpture Foundry: Investment Casting (3)**

Prerequisites: ART 130 or 182, 131, 161, 181; six units from AH 115A, 115B, 115C. The traditional lost wax techniques of casting non-ferrous metal. Wax formation and manipulation, gating theory and practice. Investment procedures, foundry management, metal casting, patination and tool making. (6 hrs. lab.) Letter grade only (A-F).

***362B. Sculpture: Molding and Reproduction (3)**

Prerequisites: ART 130 or 182, 131, 161, 181; six units from AH 115A, 115B, 115C. Construction and use of flexible and plaster molds. (6 hrs. lab.) Letter grade only (A-F).

***363. Sculpture: Fabrication and Carving (3)**

Prerequisites: ART 130 or 182, 131, 161, 181, 263; six units from AH 115A, 115B, 115C, or consent of instructor. Exploration of fabrication using a number of materials, such as metal, wood, fabric, and objects, along with carving techniques in both traditional and non-traditional materials. Emphasis will be on techniques, personal content, and form. (6 hrs. lab.) Letter grade only (A-F).

***370. Printmaking (3)**

Prerequisites: ART 130 or 182, 131, 181, 187; six units from AH 115A, 115B, 115C. A studio course exploring a range of printmaking techniques and imagery, selected from the areas of etching, lithography, silkscreen, relief and monoprinting. (6 hrs. lab.) Letter grade only (A-F).

371A,B. Illustration (3,3)

Prerequisites/Corequisites: For ART 371A: ART 130 or 182, 131, 181, 184, 187; six units from AH 115A, 115B, 115C. For ART 371B: ART 223 and 271 as prerequisite or corequisites; 371A. Editorial and advertising drawing, professional media, skills and techniques survey. (6 hrs. lab.) Letter grade only (A-F). Course fee may be required.

***372. Anatomy for Artists (3)**

Prerequisites: ART 130 or 182, 131, 181, 184; six units from AH 115A, 115B, 115C. Skeletal and muscle structure emphasizing the development of skill in depicting the human figure. Course fee may be required. (6 hrs. lab.) Letter grade only (A-F).

***373. Costumed Figure Drawing (3)**

Prerequisites: ART 371A, 372; six units from AH 115A, 115B, 115C. Drawing and painting from costumed models with props and controlled lighting. Emphasis is on the development of a sense of "staging." The manipulation of composition, light, shadow, value, color, proportion, and scale are explored to achieve mood, gesture, drama, and attitudes related to human reactions, situations and character. (6 hrs. lab.) Course fee may be required. Letter grade only (A-F).

***374A,B. Biomedical Rendering (3,3)**

Prerequisite: ART 130 or 182, 184, 187; six units from AH 115A, 115B, 115C; or consent of instructor. Introduction to and practice in techniques of descriptive drawing and press reproduction of drawing. Emphasis on skill. (6 hrs. lab.) Letter grade only (A-F).

***376. Printmaking: Relief Printing (3)**

Prerequisites: ART 130 or 182, 181, 184, 187; six units from AH 115A, 115B, 115C. Instruction in relief printing techniques and image development, including woodcut, wood engraving, linocut, collagraphs and alternative print surfaces. In black and white and color. (6 hrs. lab.) Letter grade only (A-F).

***377. Printmaking: Silkscreen (3)**

Prerequisites: ART 130 or 182, 181, 184; six units from AH 115A, 115B, 115C. Instruction in fine art screen printing techniques and image development, including resist, paper, film, emulsion and alternative stencil methods. (6 hrs. lab.) Letter grade only (A-F).

***378. Printmaking: Etching (3)**

Prerequisites: ART 130 or 182, 181, 184, 187; six units from AH 115A, 115B, 115C. Instruction in intaglio printing techniques and image development, including etching, engraving, dry-point, aquatint and alternative platemaking methods. In black and white and color. (6 hrs. lab.) Letter grade only (A-F).

***379. Printmaking: Lithography (3)**

Prerequisites: ART 130 or 182, 181, 184, 187; six units from AH 115A, 115B, 115C. Instruction in stone lithography techniques and image development, including crayon drawing, flats, washes, transfers and alternative drawing methods. In black and white and color. (6 hrs. lab.) Letter grade only (A-F).

381. Intermediate Drawing (3)

Prerequisites: ART 130 or 182, 181, 184; six units from AH 115A, 115B, 115C. Problems and concepts in drawing using a variety of media. (6 hrs. lab.) Letter grade only (A-F).

382. Production for Fine Art (3)

Prerequisites: ART 223 or consent of instructor. Exploration of printing and reproduction process related to the needs of the artist, illustrator, and museum professional, and an introduction to the skills and vocabulary necessary for the preparations of art for print and electronic media. Emphasis is on the direct interaction with the various commercial production professionals. (6 hrs. lab.) Letter grade only (A-F). Course fee may be required.

*383. Life Painting (3)

Prerequisites: ART 130 or 182, 181, 184, 187; six units from AH 115A, 115B, 115C. Painting from the human figure with emphasis on representing form in space, structure, color, value, and composition. Course fee may be required. (6 hrs. lab.) Letter grade only (A-F).

*384. Intermediate Life Drawing (3)

Prerequisites: ART 130 or 182, 181, 184; six units from AH 115A, 115B, 115C. Continued study in drawing from the human figure from direct observation. Course fee may be required. (6 hrs. lab.) Letter grade only (A-F).

*385. Watercolor Painting (3)

Prerequisites: ART 130 or 182, 181, 184, 187; six units from AH 115A, 115B, 115C. Nature and use of the watercolor media. (6 hrs. lab.) Letter grade only (A-F).

386A. New Media, Motion Graphic Design (3)

Prerequisites: ART 326 or consent of instructor. Basic theory and use of motion graphic software with emphasis on concept, theory, historical precedence, and aesthetics as it relates to motion graphic design. Hands on approach to major motion graphic, and interactive software applications with focus on layout, typography, color, movement and animation. (6 hrs. lab.) Letter grade only (A-F). Course fee may be required.

386B. New Media, Web Design (3)

Prerequisites: ART 326 or consent of instructor. Basic theory and use of web design software with emphasis on concept, theory, design, business practices, and aesthetics as it relates to web design. Hands on approach to major web and interactive software applications with focus on interactivity, typography, color, movement and animation. (6 hrs. lab.) Letter grade only (A-F).

*387. Painting (3)

Prerequisites: ART 130 or 182, 181, 184, 187; six units from AH 115A, 115B, 115C. Problems and concepts in space, form, structure, color and content in studio painting. (6 hrs. lab.) Letter grade only (A-F).

*389. Materials and Techniques of Drawing and Painting (3)

Prerequisites: ART 130 or 182, 181, 184, 187; six units from AH 115A, 115B, 115C. Theory and practice in the craft of drawing and painting. Limited to 3 units in one semester and a total of 6 units. Course fee may be required. (6 hrs. lab.) Letter grade only (A-F).

406A./506A. Digital Imagery for the Arts (3)

Prerequisites: ART 149, 340, or consent of instructor. This course is a thorough examination of digital imaging through Adobe Photoshop software. Emphasis is placed on the relationship of digital imaging to photography. A variety of exercises will sharpen skills and reveal new thinking strategies necessary for fluency in digital media. Concentration on theory of media and representation as well as individual projects. (6 hrs lab.) Letter grade only (A-F). Course fee may be required.

406B./506B. Advanced Digital Imagery for the Arts (3)

Prerequisites: ART 406A or 506A, 444. Exploration of theory and practice of digital imaging and advanced techniques. Emphasis on multimedia and individual projects. (6 hrs. lab.) Letter grade only (A-F). Course fee may be required.

*407. Art Practicum (3)

Prerequisite: Completion of 12 units of Art Foundation. Development of attitudes and skills required for the production, evaluation, and appreciation of the visual arts. Consideration of the value of the art process and product to the individual in an ethnically diverse society. Methods of inquiry used by artists, art critics,

art historians and aestheticians will be examined in relationship to learning about art. The Art Education Bound Portfolio is begun in the course and a preliminary portfolio review is held for assessment of student competency in art. Course fee may be required. (6 hrs lab) Letter grade only (A-F).

412. Aesthetic Theories and Art Education (3)

Prerequisites: Completion of 12 units of Art Foundation. Past and current philosophical writings of aestheticians, critics, artists, and art educators will be investigated with theoretical, practical, and cross-cultural implications for the arts educator. Letter grade only (A-F).

414./514. Documentary Photography (3)

Prerequisites: ART 340, 444, or consent of instructor. History, theory, practice, and production of still documentary photographic works with emphasis on the photograph as an instrument for social influence and change. (6 hrs. lab.) Letter grade only (A-F).

415. On-Site Studies in Art Education (3)

Prerequisites: Completion of 12 units of Art Foundation. Theory is both generated and put into practice during study and participation at approved sites including The Art Workshop for Youth and Art to the Schools Program. Considerations are given to the various art and educational components found in state and national documents involving multifaceted, cross-cultural, and interdisciplinary experiences with art. (6 hrs lab) Letter grade only (A-F).

*420. Visual Communication Design Workshop (3)

Prerequisite: Consent of instructor and portfolio review; majors only. On-campus design studio experience oriented toward development of printed portfolio-quality design work. Professional designer/art director environment with involvement in actual projects with clients, budgets and deadlines. Students are responsible for all project phases from design to production, print supervision and completion. May be repeated to a maximum of 9 units. (6 hrs. lab.) Letter grade only (A-F). Course fee may be required.

*422A,B. Advanced Visual Communications Design (3,3)

Prerequisites: For ART 422A: ART 322B, 323, 325. For ART 422B: ART 422A. ART 422A involves advanced projects in computer-based design, typography, photographic modification and grid layout systems development. ART 422B emphasizes advanced advertising design, art direction and campaign development for the advertising agency environment. (6 hrs. lab.) Letter grade only (A-F). Course fee may be required for 422A.

*428A,B. Fiber: Woven Structures (3,3)

Prerequisites: For ART 428A: ART 130 or 182, 131, 181, 187; six units from AH 115A, 115B, 115C. For ART 428B: ART 428A. Techniques and materials of woven structural textile design with emphasis on personal expression with the contemporary idiom. To include loom and off-loom processes. (6 hrs lab.) Letter grade only (A-F).

*430. Fiber: Papermaking and Artist Books (3)

Prerequisite: ART 328A. Basic materials and techniques of papermaking and handmade artist books with an emphasis on concept and form development. May be repeated to a maximum of 6 units. (6 hrs. lab) Letter grade only (A-F).

*432. Fiber: Advanced (3)

Prerequisites: ART 130, 131, 181, 187 and 6 units chosen from ART 327, 328, 317, and 428A or 430). This course is designed for the advanced Fiber students. Students will work on conceptual assignments using materials and media from a wide range of fiber processes of their choice. There will be some reading and group discussion assignments as well. May be repeated to a maximum of 6 units. (6 hrs. lab) Letter grade only (A-F).

436./536. Video Art (3)

Prerequisites: AH115A, AH115B, AH115C, ART 149, or by consent of instructor. Further investigation into the history and theory of new media in contemporary art. Continuation of technical learning into digital video and other forms of artistic expressions using digital media. Practice work on media-installations and video-projects. Experiments and research to develop new ways of media art display. Independent work in media/video field. (6 hrs. lab.) Letter grade only (A-F).

436A. Video Art (3)

Prerequisites: ART 149, 6 units from AH 115A, B, C or consent of instructor. Introduction to the history and theory of new media in contemporary art; technical introduction into digital video and other forms of artistic expressions using digital media; practical work on media-installations and video-projects; experiments and research to develop new ways of media art display. (6 hrs. lab.) Letter grade only (A-F).

436B. Video Art (3)

Prerequisites: ART 436B The course is a continuation of ART 436B; a continuation in the history and theory of new media in contemporary art; advancement in technical instruction in digital video and other forms of artistic expressions using digital media; practical work on media-installations and video-projects; experiments and research to develop new ways of media art display. (6 hrs. lab.) Letter grade only (A-F).

440./540. Art in Public Places: Theory and Practice (3)

Prerequisites: ART 130, ART 131, and 6 units of Art History selected from AH 115A, 115B, 115C, or by consent of instructor. Exploration of various approaches to the production of art in public places. The history and development of art in public places will be explored in preparation for the creation of artist-initiated and commissioned temporary and permanent art works for the public sphere. Students will be exposed to the various viewpoints that influence the evaluation, production, selection, and commissioning of temporary and permanent art projects in public spaces. Strategies explored for the conceptual development of projects will incorporate both individual and team approaches. (6 hrs. lab.) Letter grade only (A-F).

*442. Internship in Visual Communications (3)

Prerequisite: Visual Communications major or consent of instructor. Student internship experience in selected studios, advertising agencies and in-house creative departments. Opportunity to work under supervision of professionals in the field for six hrs. per week. May be repeated to a maximum of 6 units in different semesters. (6 hrs. lab.)

*444. Fine Print Photography (3)

Prerequisite: ART 340. Presentation of advanced printing techniques and darkroom skills. Includes printing chemistry, photographic papers and refined negative making as well as further exploration of the view camera. (6 hrs. lab.) Letter grade only (A-F).

*447. Photography Studio Specialties (3)

Prerequisites: ART 340, 444. A course designed to explore camera, laboratory techniques and professional practices as applied to studio work in photography. (6 hrs. lab.) Letter grade only (A-F).

*449. Experimental Practices In Photography (3)

Prerequisite: ART 340. Course work to generate experimental solutions to conceptual problems. Emphasis placed on non-traditional photographic processes and the exploration of new ideas and procedures for the development of art work. (6 hrs. lab.) Letter grade only (A-F).

*450A. Intermedia (3)

Prerequisites/Corequisites: ART 360A or consent of instructor. Course will allow exploration of a number of media and strategies new to the sculpture vocabulary, such as performance, installation, video, electronic media, other time-based media and mass media, in conjunction with other sculptural techniques. Reading material will provide insight into art theory and strategies pertaining to contemporary art practices. (6 hrs. lab.) Letter grade only (A-F).

*450B. Intermedia (3)

Prerequisites/Corequisites: ART 360A, 450A or consent of instructor. Course, which is a continuation of ART 450A, will allow the ongoing exploration of a number of media and strategies new to the sculpture vocabulary, such as performance, installation, video, electronic media, other time-based media and mass media, in conjunction with other sculptural techniques. Reading material will strengthen insight into art theory and strategies pertaining to contemporary art practices. (6 hrs. lab.) Letter grade only (A-F).

*451A-B. Advanced Ceramics (3-3)

Prerequisite: A: ART 343A or 343B. Individual problems in ceramics. (6 hrs. lab.) B: Prerequisites: ART 451A. Individual problems in ceramics. (6 hrs. lab.) Letter grade only (A-F).

*453. Seminar in Ceramic Arts (3)

Prerequisite: Senior Ceramics major or consent of instructor. Critical analysis of work of historical and contemporary ceramic artists; the changing role of ceramic art as it becomes part of the contemporary art mainstream. May be repeated to a maximum of 6 units with different artists in different semesters. Letter grade only (A-F).

*454A,B. Handcrafted Furniture (3,3)

Prerequisites: ART 354A and B. Concepts and skills necessary for the production of handcrafted furniture. Emphasis on the use of hand techniques as a means of understanding the philosophy and aesthetics of handcrafted furniture. (6 hrs. lab.) Letter grade only (A-F).

*458A,B. Advanced Metalsmithing/ Jewelry and Enameling (3,3)

Prerequisites: ART 357B, 358B or consent of instructor. Individual problems in metalsmithing, jewelry, enameling and architectural metalwork and blacksmithing. Course fee may be required. (6 hrs. lab.) Letter grade only (A-F).

*460A. Advanced Sculpture (3)

Prerequisites: ART 130 or 182, 131, 149 or 349, 161; six units from AH 115A, 115B, 115C, or consent of instructor. Within a set of problem-solving assignments, students work with media and content of their choice, exploring some material new to themselves. Course will further utilize strategies such as installations, site work, and time-based art. Course will include some theory and discussions on art-related issues. (6 hrs. lab) Letter grade only (A-F).

*460B. Advanced Sculpture (3)

Prerequisites: ART 460A or consent of instructor. Within a set of problem-solving assignments, students work with media and content of their choice, exploring some material new to themselves. Course will further utilize strategies such as installations, site work, and time-based art. Course will include some theory and discussions on art-related issues. (6 hrs. lab) Letter grade only (A-F).

*461. Advanced Life Sculpture (3)

Prerequisites: ART 361, 362A and B. Large-scale sculpture from the model emphasizing expressive content. Work in clay and plaster, armature and stand construction, oil-clay formulation and advanced moldmaking techniques. Course fee may be required. (6 hrs. lab.) Letter grade only (A-F).

*471A,B. Advanced Illustration (3,3)

Prerequisites: For ART 471A: ART 371B; For ART 471 B: ART 471 A. Illustration in part from live models. ART 471B is open only to students in the Illustration option. Course fee may be required. (6 hrs. lab.) Letter grade only (A-F).

472./572. Storyboarding for Film and Television (3)

Prerequisites: ART 130 or 182, 181, 184, 271 or consent of instructor. Introduction to storyboarding for television commercials and feature films. Focuses on the sequential structure of film including pacing and continuity as related to storytelling in the medium of motion pictures. Includes discussion of camera movement, uses of storyboards, with emphasis on the drawing and skills needed to visually communicate ideas for the entertainment industry. (6 hrs. lab.) Letter grade only (A-F).

473./573. Seminar in Photo-Based Art (3)

Prerequisite: Advanced standing in Photography or consent of instructor. Critical analysis of work by contemporary photo-based artists; the changing role of photo-based art as it becomes a central component of contemporary art. May be repeated to a maximum of 6 units with different artists in different semesters (6 hrs. lab.) Letter grade only (A-F).

***475. Printmaking: Photo Processes (3)**

Prerequisites: ART 130, 141, 181, 184; six units from AH 115A, 115B, 115C. Instruction in the photo printmaking processes for lithography, etching and silkscreen using copy camera and experimental techniques to explore photographic and non-photographic imagery. (6 hrs. lab.) Letter grade only (A-F).

480./580. Printmaking: Monotype/Monoprint (3)

Prerequisites: ART 130, 181, 184, 187; six units from AH 115A, 115B, 115C. Instruction in all the aspects of the monotype and monoprint form of printmaking as an expansive medium capable of diverse applications and linkages with other procedures and disciplines. Emphasis will be on the extension and refinement of individual expression. In black and white and color. (6 hrs. lab.) Letter grade only (A-F).

***481. Advanced Drawing (3)**

Prerequisite: ART 381. Advanced problems and concepts in drawing designed to explore modes of representation and issues pertaining to contemporary drawing. (6 hrs. lab.) Letter grade only (A-F).

482. Sequential Imagery (3)

Prerequisites: ART 223. The concept of a book or magazine (electronic or print) as an art form. The image/word relationship within the context of sequential aesthetics. The course will address the editorial and visual issues of pacing, continuity, and closure. Various bookbinding techniques will be demonstrated, including Japanese binding, accordion folding, and signature binding. Assignments will focus on the format of the small press from xerography to desktop publishing to printmaking. (6 hrs. lab.) Not open to students with credit for ART 382B. Letter grade only (A-F).

***483. Advanced Life Painting (3)**

Prerequisite: ART 383. Continued study in painting from the human figure with emphasis on pictorial structure, color and individual expression. Course fee may be required. (6 hrs. lab.) Letter grade only (A-F).

***484. Advanced Life Drawing (3)**

Prerequisite: ART 384. Continued study in drawing the human figure from observation with emphasis on structure, form and composition, as well as individual expression. Course fee may be required. (6 hrs. lab.) Letter grade only (A-F).

***487. Advanced Painting (3)**

Prerequisite: ART 387. Continued study in studio painting, exploring advanced modes of pictorial structure with emphasis on individual expression. (6 hrs. lab.) Letter grade only (A-F).

***489. Special Topics in Visual Art (1-3)**

Prerequisite: Consent of instructor. Topics of current interest in the visual arts will be selected for intensive study. May be repeated to a maximum of 12 units with different topics. Topics will be announced in the *Schedule of Classes*.

491A. Ceramics: Senior Project (1)

Prerequisite: ART 451A or 451B or consent of instructor. Planning, preparation, completion, and photographic slide documentation of a creative exhibition and written thesis as approved by faculty. Should be taken in last semester before graduation. Required of all BFA ceramics majors. Letter grade only (A-F). May be repeated to a maximum of 2 units.

491B. 3-D Media-Senior Project (1)

Prerequisite: 3-D Media major or consent of instructor. Organizing, completing, and photographing (35mm slides) a creative exhibition of their work. The exhibition will culminate with a written thesis with faculty approval. Should be taken in the last semester before graduation. Required of all 3-D Fiber, Wood, Metal and Integrated Media majors. Credit/No Credit grading only. May be repeated to a maximum of 2 units.

491C. Photography – Senior Project (1) F,S

Planning, preparation, completion, and photographic slide documentation of a creative exhibition and written thesis as approved by faculty. Should be taken in the last semester before graduation. Required of all Photography majors. Credit/No Credit grading only. May be repeated to a maximum of 2 units.

491F. Sculpture Senior Project (1)

Prerequisites: Senior Sculpture major; consent of instructor. Required by all Sculpture majors. Should be taken in the final semester of a student's BFA program. Students will complete their work, organize an exhibition and write an Artist's Statement. Credit/No Credit grading only.

491G. Drawing and Painting: Senior Project (1)

The exhibition of a cohesive body of work evidencing advanced study in Drawing and Painting. Planning, preparation, completion and photographic slide documentation of creative exhibition. Written project report and artist statement as approved by faculty. Should be taken in the last semester before graduation. Required of all Drawing and Painting majors. Credit/No Credit grading only. May be repeated to a maximum of 2 units.

491P. Printmaking: Senior Project (1)

Planning, preparation, completion, and photographic slide documentation of a creative exhibition and a written expanded artist's statement as approved by faculty. Should be taken in the last semester before graduation. Required of all Printmaking majors. Credit/No Credit grading only. May be repeated to a maximum of 2 units.

***492F. Concentrated Studies in Life Drawing (3)**

Prerequisites/Corequisites: ART 384 or consent of instructor. Opportunity for extensive work with faculty supervision on individual problems in life drawing. May be repeated to a maximum of 9 units limited to 6 units in one semester. (6 hrs. lab.) Letter grade only (A-F).

***492G. Concentrated Studies in Abstract Painting (3)**

Prerequisites/Corequisites: ART 387 or consent of instructor. Opportunity for extensive work with faculty supervision on individual problems in abstract and nonobjective painting and drawing. Limited to 3 units in one semester. May be repeated for a maximum of 9 units. (6 hrs. lab.) Letter grade only (A-F).

492Z./592Z. Concentrated Studies in Life Painting (3)

Prerequisites/Corequisites: ART 383 or consent of instructor. Opportunity for extensive work with faculty supervision on individual problems in painting the human figure. A more open relationship in attitudes and processes of working from the figure in class and total self-direction on work done outside the class. Limited to 3 units in one semester. May be repeated to a maximum of 9 units. (6 hrs. lab.) Letter grade only (A-F).

***495. Field Studies in Art (1-6)**

Independent work with an instructor of student's choice, usually outside area of specialization. Department Chair or Undergraduate Advisor/Graduate Advisor approval, restricted to undergraduate and graduate art majors. (2-12 hrs. lab.) Letter grade only (A-F).

***499A. Special Studies in Ceramics (3)**

Prerequisite: Ceramics major or consent of instructor. Opportunity for extensive work with faculty supervision on individual problems in ceramics. Limited to 6 units in one semester and a total of 9 units. (6 hrs. lab.) Letter grade only (A-F).

***499B. Special Studies in Wood (3)**

Prerequisite: ART 354B or consent of instructor. Opportunity for extensive work with faculty supervision on individual problems using wood as the media. Limited to 6 units in one semester and a total of 9 units. (6 hrs. lab.)

***499D. Special Studies in Drawing (3)**

Prerequisite: ART 381; Drawing and Painting Major or consent of instructor. Opportunity for extensive work with faculty supervision on individual problems in drawing. Limited to 6 units in one semester and a total of 9 units. (6 hrs. lab.)

***499F. Special Studies in Illustration (3)**

Prerequisite: Illustration major or consent of instructor. Opportunity for extensive work with faculty supervision on individual problems in illustration or biomedical art. Limited to 6 units in one semester and a total of 9 units. (6 hrs. lab.) Letter grade only (A-F).

***499J. Special Studies in Metalsmithing and Jewelry (3)**
Prerequisite: ART 458A or consent of instructor. Opportunity for extensive work with faculty supervision on individual problems in metalsmithing and jewelry. Course fee may be required. Limited to 6 units in one semester and a total of 9 units. (6 hrs. lab.) Letter grade only (A-F).

***499K. Special Studies in Painting (3)**
Prerequisite: ART 387; Drawing and Painting Major or consent of instructor. Opportunity for extensive work with faculty supervision on individual problems in painting. Limited to 6 units in one semester and a total of 9 units. (6 hrs. lab.)

499M. Special Studies in Life Sculpture (3)
Prerequisite: Sculpture major or consent of instructor. Opportunity for extensive work with faculty supervision on individual problems in sculpture. Can be taken for a maximum of 3 units in same semester and a total of 9 units in different semesters. (6 hrs. lab.) Course fee may be required. Letter grade only (A-F).

***499N. Special Studies in Fiber (3)**
Prerequisite: 3-D Media major or consent of instructor. Opportunity for extensive work with faculty supervision on individual problems in textile design. Limited to 6 units in one semester and a total of 9 units. (6 hrs. lab.) Letter grade only (A-F).

499O./599O. Special Studies in Studio Sculpture (3)
Prerequisites: Sculpture major or consent of instructor. Opportunity for extensive work with faculty supervision on individual problems in sculpture. Can be taken for a maximum of 6 units in same semester and a total of 9 units in different semesters. (6 hours lab.) Letter grade only (A-F).

***499P. Special Studies in Art Education (3)**
Prerequisite: Art Education major or consent of instructor. Opportunity for extensive work with faculty supervision on individual problems in art education. Limited to 6 units in one semester and a total of 9 units. (6 hrs. lab.) Letter grade only (A-F).

***499R. Special Studies in Printmaking (3)**
Prerequisite: Printmaking major or consent of instructor. Opportunity for extensive work with faculty supervision on individual problems in printmaking. Limited to 6 units in one semester and a total of 9 units. (6 hrs. lab.) Letter grade only (A-F).

***499S. Special Studies in Visual Communications Design (3)**
Prerequisite: Visual Communications major or consent of instructor. Opportunity for extensive contract work with faculty supervision on problems in visual communications design. Limited to 6 units in one semester and a total of 9 units. (6 hrs. lab.) Letter grade only (A-F).

***499V. Special Studies in Art Photography (3)**
Prerequisite: Photography major or consent of instructor. Opportunity for extensive work, with faculty supervision, on individual problems in photography as an art form. Limited to 6 units in one semester and a total of 9 units. (6 hrs. lab.) Letter grade only (A-F).

Graduate Level

506A./406A. Digital Imagery for the Arts (3)
Prerequisites: ART 149, 340, or consent of instructor. This course is a thorough examination of digital imaging through Adobe Photoshop software. Emphasis is placed on the relationship of digital imaging to photography. A variety of exercises will sharpen skills and reveal new thinking strategies necessary for fluency in digital media. Concentration on theory of media and representation as well as individual projects. (6 hrs. lab.) Letter grade only (A-F).

506B./406B. Advanced Digital Imagery for the Arts (3)
Prerequisites: ART 406A, 444, or consent of instructor. Exploration of theory and practice of digital imaging and advanced techniques. Emphasis on multimedia and individual projects. (6 hrs. lab.) Letter grade only (A-F).

509A-B. Research in Art Education (2-2)
Prerequisite: Art Education major or consent of instructor. Advanced individual graduate problems in art education with projects related to specific learning situations. Letter grade only (A-F).

512./412. Aesthetic Theories and Art Education (3)
Past and current philosophical writings of aestheticians, critics, artists, and art educators will be investigated with theoretical, practical, and cross-cultural implications for the arts educator. Letter grade only (A-F).

513. Photo Marketing Portfolio (3)
Prerequisite: ART 340. Professional practices and procedures for the development of an engaging photographic portfolio. Emphasis placed on photo-illustration, art direction, creative problem solving, and the development of a unique visual / conceptual style. (6 hrs. lab.) Letter grade only (A-F).

514./414. Documentary Photography (3)
Prerequisites: ART 340, 444, or consent of instructor. History, theory, practice, and production of still documentary photographic works with emphasis on the photograph as an instrument for social influence and change. (6 hrs. lab.) Letter grade only (A-F).

536./436. Video Art (3)
Prerequisites: AH115A, AH115B, AH115C, ART 149, or by consent of instructor. Further investigation into the history and theory of new media in contemporary art. Continuation of technical learning into digital video and other forms of artistic expressions using digital media. Practice work on media-installations and video-projects. Experiments and research to develop new ways of media art display. Independent work in media/video field. (6 hrs. lab.) Letter grade only (A-F).

540./440. Art in Public Places: Theory and Practice (3)
Prerequisites: ART 130, ART 131, and 6 units of Art History selected from AH 115A, 115B, 115C, or consent of instructor. Exploration of various approaches to the production of art in public places. The history and development of art in public places will be explored in preparation for the creation of artist-initiated and commissioned temporary and permanent art works for the public sphere. Students will be exposed to the various viewpoints that influence the evaluation, production, selection, and commissioning of temporary and permanent art projects in public spaces. Strategies explored for the conceptual development of projects will incorporate both individual and team approaches. (6 Hrs. Lab.) Letter grade only (A-F).

544./444. Fine Print Photography (3)
Prerequisite: ART 340. Presentation of advanced printing techniques and mastery of darkroom skills. Includes exposure, development, processing chemistry, film and paper types, toners and archival processing (lab fee required). (6 hrs. lab.) Letter grade only (A-F).

545A,B. Museum-Gallery Practices (3,3)
Prerequisites: AH 435A or consent of instructor. Pre-professional training in museum-gallery techniques: administration, exhibition, budget planning, curatorial problems, public relations, insurance, packing and shipping. The University Gallery will be the lab for practical experience; students will assist in conceiving and realizing exhibitions. Letter grade only (A-F).

547./447. Photo Studio Specialties (3)
Prerequisite: ART 340. A course designed to give exploration of camera and laboratory techniques as applied to studio work in photography. Related photo assignments of studio and location problems will be given (laboratory included). (6 hrs. lab.) Letter grade only (A-F).

549./449. Experimental/Alternative Practices in Photography (3)
Prerequisite: ART 340. Course work to generate experimental solutions to conceptual problems. Emphasis placed on Alternative Processes, non-traditional photographic processes, exploration of new ideas and procedures for the development of art work and meaning significant to each individual student. (6 hrs. lab.) Letter grade only (A-F).

550. Intermedia (3)

Graduate course that will allow further exploration of a number of media and strategies new to the sculpture vocabulary, such as performance, installation, video, electronic media, other time-based media and mass media, in conjunction with other sculptural techniques. Reading material will strengthen insight into art theory and strategies pertaining to contemporary art practices. (6 hrs. lab.) Letter grade only (A-F).

551A. Advanced Ceramics – Graduate (3)

Prerequisite: ART 451B. Opportunity for beginning graduate students to do research employing various ceramics materials, processes and visual solutions in preparation for a more narrow and concentrated study. (6 hrs. lab.) Letter grade only (A-F).

551B. Advanced Ceramics – Graduate (3)

Prerequisite: ART 551A. Selection of a specific area of concentration in ceramics, limiting the materials and processes to develop a project which will reflect a predetermined statement. (6 hrs. lab.) Letter grade only (A-F).

554A-B. Handcrafted Furniture (3-3)

Prerequisite: ART 454B or consent of instructor. Advanced concepts and skills necessary for the production of handcrafted furniture. Emphasis on the use of hand techniques as a means of understanding the philosophy and aesthetics of handcrafted furniture. (6 hrs. lab.) Letter grade only (A-F).

558A. Metalsmithing, Jewelry and Enameling (3)

Prerequisite: 3-D Media major or consent of instructor. Individual graduate level studio projects involving investigation of materials, processes and visual solutions in preparation for more concentrated study in metalsmithing, jewelry, enameling, or architectural metalwork and blacksmithing. Course fee may be required. May be repeated to a maximum of 6 units. (6 hrs. lab.) Letter grade only (A-F).

558B. Metalsmithing, Jewelry and Enameling (3)

Prerequisite: 3-D Media major or consent of instructor. Selection of a specific area of concentration in metalsmithing and jewelry, enameling, or architectural metalwork and blacksmithing; focus on creative objectives based on a projected theme. Course fee may be required. May be repeated to a maximum of 6 units. (6 hrs. lab.) Letter grade only (A-F).

564A-B. Advanced Wood Studio (3-3)

Prerequisite: ART 354B and consent of instructor. Advanced craft processes, techniques, and concepts used to make utilitarian objects. In conjunction with object making, research will be required in various aspects of the crafts field. (6 hrs. lab.) Letter grade only (A-F).

572./472. Storyboarding for Film and Television (3)

Prerequisites: ART 130 or 182, 181, 184, 271 or consent of instructor. Introduction to storyboarding for television commercials and feature films. Focuses on the sequential structure of film including pacing and continuity as related to storytelling in the medium of motion pictures. Includes discussion of camera movement, uses of storyboards, with emphasis on the drawing and skills needed to visually communicate ideas for the entertainment industry. (6 hrs. lab.) \ Letter grade only (A-F).

573./473. Seminar in Photo-Based Art (3)

Prerequisite: Advanced standing in Photography or consent of instructor. Critical analysis or work by contemporary photo-based artists; the changing role of photo-based art as it becomes a central component of contemporary art. May be repeated to a maximum of 6 units with different artists in different semesters. Letter grade only (A-F).

575. Printmaking: Advanced Photo Processes (3)

Prerequisite: Graduate Print student or consent of instructor. Graduate level work in one or more of the photo printmaking processes, with emphasis on photographic or non-photographic imagery. May be repeated to a maximum of 6 units with different topics. (6 hrs. lab.) Letter grade only (A-F).

580./480. Printmaking: Monotype/Monoprint (3)

Prerequisites: ART 130, 181, 184, 187; six units from AH 115A, 115B, 115C. Instruction in all the aspects of the monotype and monoprint form of printmaking as an expansive medium capable of diverse applications and linkages with other procedures and

disciplines. Emphasis will be on the extension and refinement of individual expression. In black and white and color. (6 hrs. lab.) Letter grade only (A-F).

583. Advanced Life Graduate Painting (3)

An intensive studio course in painting from the model for graduate students. (6 hrs. lab.) Letter grade only (A-F).

590. Special Problems in Studio Art (1-3)

Prerequisites: Consent of instructor. Special topics of current interest in studio art will be selected for intensive study. May be repeated to a maximum of 12 units with different topics. Topics will be announced in the *Schedule of Classes* (2-9 hrs. lab.) Course fee may be required. Letter grade only (A-F).

A. Visiting Artists

591. Graduate Interdisciplinary Critique (3)

This is a weekly critique and discussion forum of art graduate students in all areas of studio practice/media. Emphasis is on discussion of student work and issues and readings relevant to this work, and on the development of critical and writing skills for articulating opinions regarding art in general and specifically regarding one's own work. Can be taken for a maximum of 3 units in the same semester for a total of 9 units in different semesters. (6 hrs. lab.) Letter grade only (A-F).

592Z./492Z. Graduate Concentrated Studies in Life Painting (3)

Opportunity for extensive work with faculty supervision on individual problems in painting the human figure. A more open relationship in attitudes and processes of working from the figure in class and total self-direction on work done outside class. Limited to 3 units in one semester. May be repeated to a maximum of 9 units. (6 hrs. lab.) Letter grade only (A-F).

599. Studio Problems In Art (3)

Prerequisite: Consent of instructor. Advanced individual graduate projects, with faculty supervision, in an area of art specialization. May be repeated to a maximum of 3 units in different topics for a maximum of 12 units with different topics. (6 hrs. lab.) Letter grade only (A-F). Areas will be designated by letter at time of registration:

- A. Ceramics
- B. Wood
- D. Drawing
- F. Illustration
- J. Metal (course fee required)
- K. Painting
- L. Life Drawing (course fee required)
- M. Life Sculpture (course fee required)
- N. Fiber
- R. Printmaking
- T. Intermedia
- V. Photography

5990./4990. Studio Problems in Art (Sculpture) (3)

Prerequisites: Sculpture major or consent of the instructor. Opportunity for extensive work with faculty supervision on individual problems in sculpture. May be repeated to a maximum of 6 units in one semester and a total of 12 units in different semesters. (6 hours lab.) Letter grade only (A-F).

599S. Studio Problems in Art (Visual communication Design) (3)

Prerequisites: By consent of instructor. Opportunity to do extensive contract work with faculty supervision. Emphasis on individual approaches to problem solving in advertising, design, or new media. May be repeated to a maximum of 6 units in one semester and a total of 12 units in different topics. Each student completes a written contract designating his/her project intention. (6 hrs. lab.) Letter grade only (A-F).

601A-B. Seminar in Art Education (3-3)

Prerequisite: Graduate student in Art Education or consent of instructor. Special studies, research and evaluation of the role of the art teacher. 601A is required for the M.A. in Art Education; 601B may be required by the student's M.A. committee. Letter grade only (A-F).

649. Seminar in Drawing and Painting (3)

Graduate seminar involving advanced critical dialog related to contemporary drawing and painting with faculty peers and visiting artists. Additional activities include research, readings and presentations pertaining to contemporary professional practice within the changing art world. May be repeated to a maximum of 9 units. Letter grade only (A-F).

651. Seminar in Ceramic Art (3)

Prerequisite: Graduate student in Ceramics or consent of instructor. Critical analysis of work of historical and contemporary ceramic artists; the changing role of ceramic art as it becomes part of the contemporary art mainstream. May be repeated to a maximum of 12 units with different artists in different semester. Letter grade only (A-F).

690A. Graduate Seminar in Studio Art (Critical Studies) (3)

Prerequisite: Graduate M.F.A. student or consent of instructor. Selected reading and writing concerning topics relevant to student's specific disciplines in the visual arts with an opportunity for interdisciplinary discussion. Letter grade only (A-F).

690B. Graduate Seminar in Studio Art (Professional Practices) (3)

Prerequisite: Graduate M.F.A. student or consent of instructor. Professional preparation for studio artists stressing practical concerns as well as current trends in art practices, theory and criticism. Letter grade only (A-F).

690M. 3-D Graduate Seminar (3)

Graduate seminar for 3-D students, will focus on critiques of students' work, discussion of art related issues and examination of media and strategies new to the 3-D vocabulary, (such as performance, installation, electronic media, other time-based media and mass media). Reading material will provide insight into art theory and strategies pertaining to contemporary art practices. The course will also include presentations by other faculty and guest artists, presentations by students on various topics, discussions of assigned articles and literature, presentations by instructor on a number of artists, art related topics and issues, and written assignments. (6 hrs. lab.) Letter grade only (A-F).

692. Public Exhibition (2-3)

Prerequisite: Advancement to Candidacy and an registration in Art 698 or 699. Open only to M.A. and M.F. A. candidates with Project Statement approval, consent of their graduate committee and an assigned exhibition date. Planning, preparation and installation of a public exhibition of creative work done for ART 698 or 699. Letter grade only (A-F).

693. Teaching Internship (3)

Opportunity to work with full-time Art faculty mentor on course preparation and instruction. Required for eligibility for Graduate Teaching Associate positions. Restricted to graduate art majors. May be repeated to a maximum 6 units. (6 hrs. lab.) Letter grade only (A-F).

694. Directed Studies Studio (1-3)

Independent studies in creative studio. Department Chair or Graduate Advisor approval, restricted to graduate art majors. (2-6 hrs. lab.) Letter grade only (A-F).

695. Field Problems in Art (1-6)

Opportunity to study artistic monuments, objects, theories, techniques or literature at appropriate off campus locations. Department Chair or Graduate Advisor approval, restricted to graduate art majors. (2-12 hrs. lab.) Letter grade only (A-F).

697. Directed Studies (1-3)

Independent studies in technical and/or historical aspects of art. Department Chair or Graduate Advisor approval, restricted to graduate art majors. (2-6 hrs. lab.) Letter grade only (A-F).

698A. Thesis or Project (1-6)

Prerequisite: Advancement to Candidacy and an approved Thesis or Project Statement. Execution and completion of an approved thesis, or project, project report, documentation, orals and comprehensive exam. Open only to Art Education students. Required of all candidates for the MA in Art, specialization in Art Education. Can be taken for a maximum of 3 units in different semesters for a total of 6 units in different semesters. Letter grade only (A-F).

698B. Project (1-6)

Prerequisite: Advancement to Candidacy and an approved Project Statement. Execution and completion of an approved Studio Project and Project Report for the MA degree. Open only to Studio Art students. Required, in conjunction with Art 692-Public Exhibition, of all candidates for the MA in Art, specialization in Studio Art. Letter grade only (A-F).

699. Project (1-6)

Prerequisite: Advancement to Candidacy and an approved Project Statement. Execution and completion of a Studio Project and Project Report for the M.F.A. degree. Open only to Studio Art students. Required, in conjunction with ART 692 - Public Exhibition, of all candidates for the MFA in Art. Letter grade only (A-F).

Art History Courses (AH)

Lower Division**113A. Survey Asian Art: Early Sacred Cultures (3)**

Prerequisites or corequisite: A General Education Foundation class. Survey of art as an integral part of Asian culture: India and SE Asia, China, and Japan from earliest times to c. 1000. Not open to students who have credit in ART 113A.

113B. Survey Asian Art: Later Traditions (3)

Prerequisites or corequisite: A General Education Foundation class. Survey of art as an integral part of Asian culture: India and SE Asia, China, and Japan from earliest times from c. 1000 to 1900. Not open to students who have credit in ART 113B.

115A. Foundation Art History I (3)

Basic theoretical considerations about art and its relation to society in both Western and non-Western cultures. Not open to students who have credit in ART115A. Letter grade only (A-F).

115B. Foundation Art History II (3)

Prerequisites: A General Education Foundation class. Chronological survey of art as an integral part of Western culture from Prehistory through the Middle Ages. Not open to students who have credit in ART 115B. (CAN ART 2)

115C. Foundation Art History III (3)

Prerequisites: A General Education Foundation class. Chronological survey of art as an integral part of Western culture from Proto-Renaissance to contemporary. Not open to students who have credit in ART 115C. (CAN ART 4)

Upper Division***307. Historiography in Art (3)**

Prerequisites: AH 115B, 115C, or consent of instructor. Consideration of standard research techniques and resources as well as composition and documentation of written reports specifically related to the study of art. Not open to students who have credit in ART 307. Letter grade only (A-F).

308. Western Art Theory and Criticism to the Mid-Nineteenth Century (3)

Prerequisites: For art and art history majors; and 115B, 115C, or consent of instructor. A text-based examination of western art theory and criticism up to the mid-nineteenth century. Letter grade only (A-F).

309. Western Art Theory and Criticism Mid-Nineteenth to Mid-Twentieth Century (3)

Prerequisites: For art and art history majors; and 115B, 115C, or consent of instructor. A text-based examination of western art theory and criticism from the mid-nineteenth to mid-twentieth centuries. Letter grade only (A-F).

310. Western Art Theory and Criticism Mid-Twentieth Century to Present (3)

Prerequisite(s): AH 115B, 115C: A text-based examination of western art theory and criticism from the mid-twentieth century to the present. Letter grade only (A-F).

330I. Cross Cultural Visual Literacy (3)

Prerequisites: Completion of GE Foundation requirements, one or more Explorations courses, and upper-division standing. Cross-cultural Visual Literacy is an exploration of how and what traditional art communicates about the culture from which it issues. Based on the premise that Art is an aesthetic counterpart of a culture's ethos, a method of inquiry has been designed to integrate: a) exposure to the basic technical aspects of art-making, together with b) a discussion of core concepts in two different culture-clusters, the Euro-American, and Pan-Asian. The significance of the concept of cultural relativity applied to the study of art cross-culturally will be emphasized. Not open to students with credit in ART 330I. Letter grade only (A-F).

364. History of Ceramics 1900 to Present (3)

Prerequisites: This course is being developed in order to survey the development of modern and contemporary ceramic art in the United States from 1900 to the most current. Through slide lectures offered by faculty, students and guest scholars modern & contemporary American ceramic art will be studied within the context of contemporary art history. This will require the alignment and analysis of seminal or significant ceramic works of the 20th century with modern and postmodern movements in art in order to examine the common ground and the differences. Letter grade only (A-F).

*365. History of Prints and Drawings (3)

Prerequisites: AH 115B, 115C, or consent of instructor. Historical survey of prints and drawings, with emphasis on technical and stylistic developments and on the role played by these media in relation to other arts through the 20th century. Not open to students who have credit in ART 365. Letter grade only (A-F).

401./501. American Art to 1900 (3)

Prerequisites: AH 115B, 115C or consent of instructor. Survey of American painting, sculpture, and photography from the time of European settlement to roughly 1900 with a special focus on cultural, political, and historical contexts. Discussion of topics such as the construction of an American identity, the ideology of Manifest Destiny, and the trauma of the Civil War. Combines slide lecture with discussion of primary and secondary readings. Letter grade only (A-F).

402. The Rise of Landscape Painting (3)

Prerequisite(s): AH115B, AH115C or consent of instructor: This course is an examination of the emergence and transformation of landscape painting in Europe and America between 1750 and 1850. We will examine national schools while exploring important contextual factors including the traditional hierarchy of genres, the development of the concepts of the picturesque and sublime in the 18th century aesthetics, the emergence of the greater emotional expression and ecological awareness in Romanticism, and the ideological role of spirituality and so-called manifest destiny of the 19th century views of the American West. Letter grade only (A-F).

408./508. Early Christian and Byzantine Art (3)

Prerequisites: AH 115B, 115C, or consent of instructor. Architecture, mosaics and sculpture of Rome, Ravenna and Constantinople from the decline of the Roman Empire to the end of the Byzantine era. Not open to students who have credit in ART 408 or 598B. Letter grade only (A-F).

409./509. Romanesque Art (3)

Prerequisites: AH 115A, 115B, or consent of instructor. Arts of Northern Europe from Merovingian through the Romanesque periods. Not open to students who have credit in ART 409 or 598C. Letter grade only (A-F).

410./510. Gothic Art (3)

Prerequisites: AH 115B, 115C, or consent of instructor. Stylistic analyses in the historical content of the architecture, sculpture and stained glass of the great cathedrals of Europe. Not open to students who have credit in ART 410 or 598D. Letter grade only (A-F).

411./511. History and Criticism of Photography (3)

Prerequisites: AH 115B, 115C, or consent of instructor. History of photography from its origins to contemporary developments in the twentieth century. Critical and philosophical approaches to the photographic medium. Not open to students who have credit in ART 411 or 511. Letter grade only (A-F).

416./516. Greek Art (3)

Prerequisites: AH 115B, 115C, or consent of instructor. This survey will trace Greek Art from its first beginnings in the Aegean period and survey its development on through the late Hellenistic period. The key monuments of architecture, sculpture, painting, vase-painting, and the so-called minor arts will be discussed against the background of contemporary theories, criticism, and history. Of particular concern are the techniques and materials of the various arts. Not open to students who have credit in ART 416 or 598E. Letter grade only (A-F).

417./517. Roman Art (3)

Prerequisites: AH 115B, 115C, or consent of instructor. This survey will begin with an overview of the arts of Italy before the Romans including both the indigenous art of the Italic peoples as well as the better known art of the Etruscans. The survey of Roman Art itself will begin with the early Republic and end with the Age of Constantine. The major art forms of architecture, painting, sculpture and the so-called minor arts will be discussed. Contemporary criticism, theory, and history will be part of the sub-text of the course. Not open to students who have credit in ART 417 or 598L. Letter grade only (A-F).

423./523. Early Renaissance Art in Italy (3)

Prerequisites: AH 115B, 115C, or consent of instructor. Painting, sculpture, and architecture in Italy from the 13th through the 15th centuries, especially in Florence and Siena. The course examines stylistic and technical aspects of the works, along with the interaction of cultural, social, and religious developments with the visual arts. Special attention paid to issues such as the importance of patrons, the rise of mendicant orders, and the revival of classicism. Not open to students who have credit in ART 412 or 598F. Letter grade only (A-F).

424./524. High Renaissance Art in Italy (3)

Prerequisites: AH 115B, 115C, or consent of instructor. Painting, sculpture, and architecture in Italy from the 16th century especially in Florence, Venice, and Rome. Provides an historical, cultural, religious, and theoretical framework within which the meaning and function of the works can be better understood. Works by a handful of major artists (Leonardo da Vinci, Michelangelo, Raphael, Titian, and the Mannerists) will receive special attention. Not open to students who have credit in ART 424 or 598G. Letter grade only (A-F).

425./525. Northern Renaissance Painting (3)

Prerequisites: AH 115B, 115C, or consent of instructor. Covers artistic developments in Northern Europe, particularly Flanders, France, and Germany, from the 14th century through 16th century. The course provides a historical, cultural, and religious framework within which the style, meaning, and function of the works can be better understood. Special attention to issues such as iconography, and the changing role of the artist in society. Not open to students who have credit in ART 425 or 598H. Letter grade only (A-F).

426./526. Baroque Art in Spain, the Netherlands, and England (3)

Prerequisites: AH 115B, 115C, or consent of instructor. Examines the closely intertwined political and artistic situations in the Netherlands (Flanders and Holland), England and Spain during the 17th and early 18th centuries. Emphasis on the relationship between Rubens and Velasquez, and the contrast between Rubens and Rembrandt; also Flemish influence in England, due especially to Anthony van Dyck. Not open to students who have credit in ART 426 or 598J. Letter grade only (A-F).

427./527. Baroque Art in Italy, France, and Germany (3)

Prerequisites: AH 115B, 115C, or consent of instructor. Explores the birth of the Baroque in Rome, and the role of the Counter-Reformation in shaping artistic genres in Italy and France in the early 17th century. Also covers the influence of the Versailles court of the "Sun King," Louis XIV, in the late 17th and early 18th centuries, especially in the independent Teutonic states. Not open to students who have credit in ART 427 or 598K. Letter grade only (A-F).

435A./535A. History of Museums and Exhibitions (3)

Prerequisites: AH 115B, 115C or permission of student advisor and the instructor. Open to students interested in the history of art museums and the role museums play in manifesting cultural values, and in the impact exhibitions of art have had on the development of the arts and the controversies they have stirred. Overviews the full history of museums, with emphasis on the great museums of Europe and America, the development of museums devoted to avant-garde art, and recently developed museums. Also overviews the history of art exhibitions, with emphasis on the exhibitions presented since mid-twentieth century. This class is required of students seeking the Museum Studies Certificate and those pursuing the MA with an emphasis in Museum Studies. Not open to students with credit for ART 435. Letter grade only (A-F).

435B./535B. Museum Practices (3)

Prerequisites: AH 435A or by consent of student advisor and instructor. Comprehensive introduction to the administrative, strategic and financial aspects of exhibiting art and maintaining art collections in museums. The class is designed for students seeking the Museum Studies Certificate and those pursuing the MA with an emphasis in Museum Studies. Letter grade only (A-F).

436./536. Neo-Classicism to Romanticism, 1789-1850 (3)

Prerequisites: AH 115B, 115C, or consent of instructor. Examination of Neo-Classicism, Realism, Romanticism, photography and the academic tradition in art and culture of Europe from 1789-1850. Not open to students who have credit in ART 436 or 598M. Letter grade only (A-F).

437./537. Impressionism to Post-Impressionism, 1850-1900 (3)

Prerequisites: AH 115B, 115C, or consent of instructor. Analysis of the development of Impressionism and Post-Impressionism in France from 1850 to 1900. Not open to students who have credit in ART 437 or 598N. Letter grade only (A-F).

438./538. Twentieth-Century Art to 1945 (3)

Prerequisites: AH 115B, 115C, or consent of instructor. Examination of Abstraction, Non-Objective art, Expressionism, Dada, and Surrealism. Not open to students who have credit in ART 438 or 598P. Letter grade only (A-F).

439./539. Twentieth-Century Art from 1945 (3)

Prerequisites: AH 115B, 115C, or consent of instructor. Examination of Pop Art, Happenings, Minimal Art, Art and Technology, Environmental, Concept, Performance and Video Art. Not open to students who have credit in ART 439 or 598Q. Letter grade only (A-F).

440. Art and Society (3)

This course will consider the nature of art in Western culture from several disciplinary perspectives including art theory, social and political theory, history, philosophy and economics. It seeks to demonstrate that art is a construct based on human intellect and belief. Not open to students who have credit in ART 440. Letter grade only (A-F).

455./555. Traditional Art of Africa: A Thematic Approach (3)

Prerequisites: AH 115B, 115C, or consent of instructor. Exploration from a Western perspective of the conceptual, expressive, and aesthetic aspects of traditional African art as related to its cultural context and to Western concepts of art. Focus on West Africa. Not open to students who have credit in ART 455 or 598R. Letter grade only (A-F).

456./556. American Indian Art: Western Perspectives (3)

Prerequisites: AH 115B, 115C, or consent of instructor. Exploration from a Western perspective of the historically various and changing frames of reference surrounding perception, interpretation, and consideration of Native American art through focus on selected traditions. Not open to students who have credit in ART 456 or 598S. Letter grade only (A-F).

457./557. Pre-Columbian Art (3)

Prerequisites: AH 115B, AH 115C, or consent of instructor. A survey of art and architecture in Mesoamerica and the Andean region of South America from about 1000BC to the Spanish conquest. Special attention will be focused on the social, political and economic contexts of objects and architecture from this period, as well as on the research methods and theoretical assumptions of scholars investigating this field. Letter grade only (A-F).

458./558. Modern Latin American Art (3)

Prerequisites: AH 115C or consent of instructor. An investigation of developments in visual culture in Latin America from the late-18th century to the mid-20th century, with special emphasis on artists in Argentina, Brazil, Colombia, Mexico, Uruguay, and Venezuela. Letter grade only (A-F).

459./559. Contemporary Latin American Art (3)

Prerequisites: AH 115C or consent of instructor. An investigation of developments in visual culture in Latin America from the mid-20th century to the present, with special emphasis on artists in Argentina, Brazil, Chile, Colombia, Cuba, Mexico, and Venezuela, as well as Latino/Latina artists. Letter grade only (A-F).

465./565. Ancient Art of the Near East (3)

Prerequisites: AH 115B, 115C, or consent of instructor. Near Eastern, Egyptian and Aegean art. Not open to students who have credit in ART 465 or 598U. Letter grade only (A-F).

466./566. Buddhist Art of India and S.E. Asia (3)

Prerequisites: AH 115B, 115C, or consent of instructor. The formation and development of Buddhist art in India and its subsequent metamorphoses in Cambodia, Thailand and Indonesia will be examined. Not open to students who have credit in ART 466 or 598V. Letter grade only (A-F).

467./567. Hindu and Islamic Art of India (3)

Prerequisites: AH 115B, 115C, or consent of instructor. The formation and development of Hindu art in India and the genesis, as well as transformation, of Islamic art of India compared to pan-Islamic characteristics will be examined. Not open to students with credit in ART 467 or 598W. Letter grade only (A-F).

468./568. Early Chinese Art (3)

Prerequisites: AH 115B, 115C, or consent of instructor. The formation and development of Chinese art from the third millennium to the 10th century A.D. Not open to students who have credit in ART 468 or 598X. Letter grade only (A-F).

469./569. Later Chinese Art (3)

Prerequisites: AH 115B, 115C, or consent of instructor. Development of Chinese art from the 11th century A.D. through the culmination of the tradition and its transformation in the 20th century will be explored. Not open to students who have credit in ART 469 or 598Y. Letter grade only (A-F).

470A./570A. Japanese Buddhist Art to 1500 (3)

Prerequisite: One of the following: AH 113A, 113B, 115A, 115B, 115C, A/ST 393, 451, consent of instructor. Survey of sacred architecture, sculpture, painting, gardens and decorative art from neolithic culture through Zen Buddhism, reading images in regard to religious, political and social values. Not open to students who have taken AH 470. Letter grade only (A-F).

470B./570B. Japanese Art 1500-1868 (3)

Prerequisite: AH 113A, 113B, 115A, 115B, 115C, A/ST 393, 451, or consent of the instructor. Analysis of secular painting, architecture, ceramics and garden design in the Momoyama and Edo periods, linking the wide variety of subjects and styles to the competing values of samurai, priest, aristocrat or merchant class patrons. Not open to students who have taken AH 470. Letter grade only (A-F).

471A./571A. Modern Japanese Graphic Art (3)

Prerequisite: One of the following: AH 113A, AH 113B, 115A, 115B, 115C, A/ST 393, 451, or consent of the instructor. Examination of painting, prints, photography and graphic design in regard to the issues of individual and national identity in an era when being modern was often linked to being Western. We also consider manga in regard to earlier modern adaptations of traditional design. Not open to students who have taken AH 471. Letter grade only (A-F).

471B./571B. Modern Japanese Plastic Art (3)

Prerequisite: One of the following: AH 113A, AH 113B, 115A, 115B, 115C, A/ST 393, 451, or consent of the instructor. Investigation of architecture, gardens, sculpture and ceramics in light of debates over internationalism or nationalism, modernity or tradition. The political and economic implications of design choices will be highlighted. Not open to students who have taken AH 471. Letter grade only (A-F).

495. Independent Study In Art History (1-6)

This course is used for independent, in-depth research projects to be conducted by students under the supervision of a faculty member. As per university policy on independent studies courses, each student enrolled in this course must have an agreement, or "contract" on file in the department office. The agreement is to be made between the student and the instructor at the beginning of the course, and must include: a description of the work to be accomplished, specific information on the tasks required; the nature of the final report, and the basis for determining the final grade. The agreement must be signed by both the instructor and the student. Letter grade only (A-F).

496. Special Studies in Art History (3)

Prerequisite: AH 307 or consent of instructor. Opportunity for extensive work with faculty supervision on individual problems in art history. May be repeated to a maximum of 9 units. Not open to students who have credit in ART 496. Letter grade only (A-F).

497./597. Seminar in Art History (3)

Prerequisite: AH 307 or consent of instructor. Directed individual research and group discussion concerning a topic in art history. May be repeated to a maximum of 9 units limited to six units in one semester. Not open to students who have credit in ART 497 or 611 beyond combined maximum units. Letter grade only (A-F).

498. Special Topics in Art History (3)

Prerequisite: AH 307 or consent of instructor. Description: This course is used for Variable Topic courses – courses that would be given on a on-time basis, either by lecturers who might be offering a course that is not part of the usual curriculum, or by permanent faculty who might wish to try out a new course before it appears in the catalog. Such a course must be approved by the head of the Art History program in conjunction with the Art Department chair. Variable courses from selected areas of Art History. Course content may vary each semester. Topics will be announced in the *Schedule of Classes*. Letter grade only (A-F).

499Q. Special Studies in Museum Studies (3)

Prerequisites: AH 435A or consent of instructor. Opportunity for extensive individual work with faculty supervision on problems in museum studies, including utilizing the resources of The Center for Southern California Studies in the Visual Arts. Can be taken for a maximum of 3 units in same semester for a total of 9 units in different semesters. (6 hrs. lab.) Not open to students who have credit for ART 499Q. Letter grade only (A-F).

Graduate Courses

501./401. American Art to 1900 (3)

Prerequisites: AH 115B, 115C or consent of instructor. Survey of American painting, sculpture, and photography from the time of European settlement to roughly 1900 with a special focus on cultural, political, and historical contexts. Discussion of topics such as the construction of an American identity, the ideology of Manifest Destiny, and the trauma of the Civil War. Combines slide lecture with discussion of primary and secondary readings. Letter grade only (A-F).

502. The Rise of Landscape Painting (3)

Prerequisite(s): AH115B, 115C or consent of instructor: This course is an examination of the emergence and transformation of landscape painting in Europe and America between 1750 and 1850. We will examine national schools while exploring important contextual factors including the traditional hierarchy of genres, the development of the concepts of the picturesque and sublime in the 18th century aesthetics, the emergence of the greater emotional expression and ecological awareness in Romanticism, and the ideological role of spirituality and so-called manifest destiny of the 19th century views of the American West. Letter grade only (A-F).

508./408. Early Christian and Byzantine Art (3)

Prerequisites: AH 115B, 115C, or consent of instructor. Architecture, mosaics and sculpture of Rome, Ravenna and Constantinople from the decline of the Roman Empire to the end of the Byzantine era. Not open to students who have credit in ART 408 or 598B. Letter grade only (A-F).

509./409. Romanesque Art (3)

Prerequisites: AH 115A,115B, or consent of instructor. Arts of Northern Europe from Merovingian through the Romanesque periods. Not open to students who have credit in ART 409 or 598C. Letter grade only (A-F).

510./410. Gothic Art (3)

Prerequisites: AH 115B, 115C, or consent of instructor. Stylistic analyses in the historical content of the architecture, sculpture and stained glass of the great cathedrals of Europe. Not open to students who have credit in ART 410 or 598D. Letter grade only (A-F).

511./411. History and Criticism of Photography (3)

Prerequisites: AH 115B, 115C, or consent of instructor. History of photography from its origins to contemporary developments in the twentieth century. Critical and philosophical approaches to the photographic medium. Not open to students who have credit in ART 411 or 511. Letter grade only (A-F).

516./416. Greek Art (3)

Prerequisites: AH 115B, 115C, or consent of instructor. This survey will trace Greek Art from its first beginnings in the Aegean period and survey its development on through the late Hellenistic period. The key monuments of architecture, sculpture, painting, vase-painting, and the so-called minor arts will be discussed against the background of contemporary theories, criticism, and history. Of particular concern are the techniques and materials of the various arts. Not open to students who have credit in ART 416 or 598E. Letter grade only (A-F).

517./417. Roman Art (3)

Prerequisites: AH 115B, 115C, or consent of instructor. This survey will begin with an overview of the arts of Italy before the Romans including both the indigenous art of the Italic peoples as well as the better known art of the Etruscans. The survey of Roman Art itself will begin with the early Republic and end with the Age of Constantine. The major art forms of architecture, painting, sculpture and the so-called minor arts will be discussed. Contemporary criticism, theory, and history will be part of the sub-text of the course. Not open to students who have credit in ART 417 or 598L. Letter grade only (A-F).

523./423. Early Renaissance Art in Italy (3)

Prerequisites: AH 115B, 115C, or consent of instructor. Painting, sculpture, and architecture in Italy from the 13th through the 15th centuries, especially in Florence and Siena. The course examines stylistic and technical aspects of the works, along with the interaction of cultural, social, and religious developments with the visual arts. Special attention paid to issues such as the importance of patrons, the rise of mendicant orders, and the revival of classicism. Not open to students who have credit in ART 412 or 598F. Letter grade only (A-F).

524./424. High Renaissance Art in Italy (3)

Prerequisites: AH 115B, 115C, or consent of instructor. Painting, sculpture, and architecture in Italy from the 16th century especially in Florence, Venice, and Rome. Provides an historical, cultural, religious, and theoretical framework within which the meaning and function of the works can be better understood. Works by a handful of major artists (Leonardo da Vinci, Michelangelo, Raphael, Titian, and the Mannerists) will receive special attention. Not open to students who have credit in ART 424 or 598G. Letter grade only (A-F).

525./425. Northern Renaissance Painting (3)

Prerequisites: AH 115B, 115C, or consent of instructor. Covers artistic developments in Northern Europe, particularly Flanders, France, and Germany, from the 14th century through 16th century. The course provides an historical, cultural, and religious framework within which the style, meaning, and function of the works can be better understood. Special attention to issues such as iconography, and the changing role of the artist in society. Not open to students who have credit in ART 425 or 598H. Letter grade only (A-F).

526./426. Baroque Art in Spain, the Netherlands, and England (3)

Prerequisites: AH 115B, 115C, or consent of instructor. Examines the closely intertwined political and artistic situations in the Netherlands (Flanders and Holland), England and Spain during the 17th and early 18th centuries. Emphasis on the relationship between Rubens and Velasquez, and the contrast between Rubens and Rembrandt; also Flemish influence in England, due especially to Anthony van Dyck. Not open to students who have credit in ART 426 or 598J. Letter grade only (A-F).

527./427. Baroque Art in Italy, France, and Germany (3)

Prerequisites: AH 115B, 115C, or consent of instructor. Explores the birth of the Baroque in Rome, and the role of the Counter-Reformation in shaping artistic genres in Italy and France in the early 17th century. Also covers the influence of the Versailles court of the "Sun King," Louis XIV, in the late 17th and early 18th centuries, especially in the independent Teutonic states. Not open to students who have credit in ART 427 or 598K. Letter grade only (A-F).

535A./435A. History of Museums and Exhibitions (3)

Prerequisites: AH115B, AH115C or consent of student advisor and the instructor. Open to students interested in the history of art museums and the role museums play in manifesting cultural values, and the impact exhibitions of art have had on the development of the arts and the controversies they have stirred. Overviews the full history of museums with emphasis on the great museums of Europe and America, the development of museums devoted to avant-garde art, and recently developed museums. Also overviews the history of art exhibitions, with emphasis on the exhibitions presented since mid-twentieth century. This class is required of students seeking the Museum Studies Certificate and those pursuing the MA with an emphasis in Museum Studies. Letter grade only (A-F).

535B./435B. Museum Practices (3)

Prerequisites: AH 535A or by consent of student advisor and instructor. Comprehensive introduction to the administrative, strategic and financial aspects of exhibiting art and maintaining art collections in museums. The class is designed for students seeking the Museum Studies Certificate and those pursuing the MA with an emphasis in Museum Studies. Letter grade only (A-F).

536./436. Neo-Classicism to Romanticism, 1789-1850 (3)

Prerequisites: AH 115B, 115C, or consent of instructor. Examination of Neo-Classicism, Realism, Romanticism, photography and the academic tradition in art and culture of Europe from 1789-1850. Not open to students who have credit in ART 436 or 598M. Letter grade only (A-F).

537./437. Impressionism to Post-Impressionism, 1850-1900 (3)

Prerequisites: AH 115B, 115C, or consent of instructor. Analysis of the development of Impressionism and Post-Impressionism in France from 1850 to 1900. Not open to students who have credit in ART 437 or 598N. Letter grade only (A-F).

538./438. Twentieth Century Art to 1945 (3)

Prerequisites: AH 115B, 115C, or consent of instructor. Examination of Abstraction, Non-Objective art, Expressionism, Dada, and Surrealism. Not open to students who have credit in ART 438 or 598P. Letter grade only (A-F).

539./439. Twentieth Century Art from 1945 (3)

Prerequisites: AH 115B, 115C, or consent of instructor. Examination of Pop Art, Happenings, Minimal Art, Art and Technology, Environmental, Concept, Performance and Video Art. Not open to students who have credit in ART 439 or 598Q. Letter grade only (A-F).

542. Internship in Museum Studies (3)

Prerequisites: AH 435A or consent of instructor. Student internship experience in selected museums, college and community art centers appropriate to the student's particular academic interest. Opportunity to work under supervision of museum professionals in the field to expand student understanding of the complexities, discipline and challenges in the profession. Can be taken for a maximum of 3 units in same semester and for a total of 9 units in different semesters. (6 hrs. lab.) Not open to students who have credit for ART 542. Letter grade only (A-F).

555./455. Traditional Art of Africa: A Thematic Approach (3)

Prerequisites: AH 115B, 115C, or consent of instructor. Exploration from a Western perspective of the conceptual, expressive, and aesthetic aspects of traditional African art as related to its cultural context and to Western concepts of art. Focus on West Africa. Not open to students who have credit in ART 455 or 598R. Letter grade only (A-F).

556./456. American Indian Art: Western Perspectives (3)

Prerequisites: AH 115B, 115C, or consent of instructor. Exploration from a Western perspective of the historically various and changing frames of reference surrounding perception, interpretation, and consideration of Native American art through focus on cited traditions. Not open to students who have credit in ART 456 or 598S. Letter grade only (A-F).

557./457. Pre-Columbian Art (3)

Prerequisites: AH 115B, AH 115C or consent of instructor. A survey of art and architecture in Mesoamerica and the Andean region of South America from about 1000BC to the Spanish conquest. Special attention will be focused on the social, political and economic contexts of objects and architecture from this period, as well as on the research methods and theoretical assumptions of scholars investigating this field. Letter grade only (A-F).

558./458. Modern Latin American Art (3)

Prerequisites: AH115C or consent of instructor. An investigation of developments in visual culture in Latin America from the late-18th century to the mid-20th century, with special emphasis on artists in Argentina, Brazil, Colombia, Mexico, Uruguay, and Venezuela. Letter grade only (A-F).

559./459. Contemporary Latin American Art (3)

Prerequisites: AH115C or consent of instructor. An investigation of developments in visual culture in Latin America from the mid-20th century to the present, with special emphasis on artists in Argentina, Brazil, Chile, Colombia, Cuba, Mexico, and Venezuela, as well as Latino/Latina artists. Letter grade only (A-F).

565./465. Ancient Art of the Near East (3)

Prerequisites: AH 115B, 115C, or consent of instructor. Prehistoric, Near Eastern, Egyptian and Aegean art. Not open to students who have credit in ART 465 or 598U. Letter grade only (A-F).

566./466. Buddhist Art of India and S.E. Asia (3)

Prerequisites: AH 115B, 115C, or consent of instructor. The formation and development of Buddhist art in India and its subsequent metamorphoses in Cambodia, Thailand and Indonesia will be examined. Not open to students who have credit in ART 466 or 598V. Letter grade only (A-F).

567./467. Hindu and Islamic Art of India (3)

Prerequisites: AH 115B, 115C, or consent of instructor. The formation and development of Hindu art in India and the genesis, as well as transformation, of Islamic art of India compared to pan-Islamic characteristics will be examined. Not open to students with credit in ART 467 or 598W. Letter grade only (A-F).

568./468. Early Chinese Art (3)

Prerequisites: AH 115B, 115C, or consent of instructor. The formation and development of Chinese art from the third millennium to the 10th century A.D. Not open to students who have credit in ART 468 or 598X. Letter grade only (A-F).

569./469. Later Chinese Art (3)

Prerequisites: AH 115B, 115C, or consent of instructor. Development of Chinese art from the 11th century A.D. through the culmination of the tradition and its transformation in the 20th century will be explored. Not open to students who have credit in ART 469 or 598Y. Letter grade only (A-F).

570A./470A. Japanese Buddhist Art to 1500 (3)

Prerequisite: One of the following: AH 113A, AH 113B, 115A, 115B, 115C, A/ST 393, 451, or consent of instructor. Survey of sacred architecture, sculpture, painting, gardens and decorative art from neolithic culture through Zen Buddhism, reading images in regard to religious, political and social values. Not open to students who have taken AH 470. Letter grade only (A-F).

570B./470B. Japanese Art 1500-1868 (3)

Prerequisite: AH 113A, AH 113B, 115A, 115B, 115C, A/ST 393, 451, or consent of the instructor. Analysis of secular painting, architecture, ceramics and garden design in the Momoyama and Edo periods, linking the wide variety of subjects and styles to the competing values of samurai, priest, aristocrat or merchant class patrons. Not open to students who have taken AH 470. Letter grade only (A-F).

571A/471A. Modern Japanese Graphic Art (3)

Prerequisite: One of the following: AH 113A, AH 113B, 115A, 115B, 115C, A/ST 393, 451, or consent of the instructor. Examination of painting, prints, photography and graphic design in regard to the issues of individual and national identity in an era when being modern was often linked to being Western. We also consider manga in regard to earlier modern adaptations of traditional design. Not open to students who have taken AH 471. Letter grade only (A-F).

571B./471B. Modern Japanese Plastic Art (3)

Prerequisite: One of the following: AH 113A, AH 113B, 115A, 115B, 115C, A/ST 393, 451, or consent of the instructor. Investigation of architecture, gardens, sculpture and ceramics in light of debates over internationalism or nationalism, modernity or tradition. The political and economic implications of design choices will be highlighted. Not open to students who have taken AH 471. Letter grade only (A-F).

595. Independent Study In Art History (1-3)

This course is used for independent, in-depth research projects to be conducted by students under the supervision of a faculty member. As per university policy on independent studies courses, each student enrolled in this course must have an agreement, or "contract" on file in the department office. The agreement is to be made between the student and the instructor at the beginning of the course, and must include: a description of the work to be accomplished, specific information on the tasks required; the nature of the final report, and the basis for determining the final grade. The agreement must be signed by both the instructor and the student. Letter grade only (A-F).

596. Special Problems in Art History (3)

Graduate level variable directed study projects providing a way for students to independently pursue special research topics in art history under instructor supervision. May be repeated to a maximum of 9 units. Letter grade only (A-F).

597./497. Seminar in Art History (3)

Prerequisite: AH 307 or consent of instructor. Directed individual research and group discussion concerning a topic in art history. May be repeated to a maximum of 9 units limited to six units in one semester. Not open to students who have credit in ART 497 or 611 beyond combined maximum units. Letter grade only (A-F).

598. Special Topics in Art History (3)

Prerequisite: AH 307 or consent of instructor. Description: This course is used for Variable Topic courses – courses that would be given on a on-time basis, either by lecturers who might be offering a course that is not part of the usual curriculum, or by permanent faculty who might wish to try out a new course before it appears in the catalog. Such a course must be approved by the head of the Art History program in conjunction with the Art Department chair. Variable courses from selected areas of Art History. Course content may vary each semester. Topics will be announced in the *Schedule of Classes*. Letter grade only (A-F).

599Q. Studio Problems in Museum Studies (3)

Prerequisite: Consent of instructor. Advanced individual graduate projects, with faculty supervision, in museum studies. Can be taken for a maximum of 6 units in same semester and a total of 12 units in different semesters. (6 hrs. lab.) Letter grade only (A-F).

698. Thesis (1-6)

Prerequisite: Advancement to Candidacy and an approved Thesis Statement Execution and completion of an approved thesis. Open only to Art history students. Required of all candidates for the MA in Art, specialization in art History. Letter grade only (A-F).

The College of the Arts at California State University, Long Beach is one of the largest and most respected state supported arts schools in the country. With nearly 4,000 students studying in six departments, the College of the Arts (COTA) offers nationally recognized, fully accredited degree programs in Art, Dance, Design, Film and Electronic Arts, Music, and Theatre Arts. The College of the Arts is located in close proximity to the Los Angeles/Hollywood area and has many ties to the arts and entertainment industries. The curriculum focuses on professional development in the applied or performance fields of study. The goal of most students is professional employment as artists, designers, or performers in their chosen disciplines.

The learning opportunities within the College of the Arts reflect its commitment to the arts in all forms. For performers, artists, and scholars, the College of the Arts provides an environment designed for individual achievement. It offers programs to meet the needs of students who wish to:

- Pursue professional careers in art, dance, design, music, electronic media, film, or theatre arts
- Teach one or more of the arts
- Explore the creative uses of technology in the arts
- Follow a degree program that provides a broad education with a focus in the arts
- Learn about the history and nature of the arts in Western and non-Western cultures
- Develop appreciation of art forms and their lasting value to the quality of life

The College of the Arts offers a comprehensive variety of professional degree programs meeting the highest standards of excellence, including the Bachelor of Fine Arts Degree in Art, Dance, and Design; the Bachelor of Science Degree in Industrial Design; the Bachelor of Music Degree; the Master of Fine Arts Degree in Art, Dance, Design, and Theatre Arts; and the Master of Music Degree.

Students wishing to earn a degree or certification in arts education may choose from the Bachelor of Arts Degree in Art Education or the Bachelor of Music Degree in Instrumental or Choral/Vocal Music. Single Subject Certification for the state of California is offered jointly between the College of the Arts and the College of Education. Finally, the College offers Masters of Arts Degrees in Art Education, Dance Education, and Music Education.

For those students who wish to obtain a liberal education with the arts as a focus, the departments of Art, Dance, Music, Film and Electronic Arts, and Theatre Arts offer appropriate Bachelor of Arts degree options. The Departments of Art, Design, and Music also offer the Master of Arts Degree. Other special programs include certificates in Biomedical Illustration and Museum Studies.

Departments in the College are accredited by the major accrediting agency for their discipline: The National Association of Schools of Art and Design, The National Association of Schools of Dance, The National Association of Schools of Music, and the National Association of Schools of Theatre. The faculty of the College of the Arts is an accomplished group of artists, performers, and scholars who bring significant expertise and professional experience to their teaching assignments.

The College of the Arts is also home to the University Art Museum (a nationally accredited art museum which presents exhibitions of professional stature focusing primarily on contemporary artists) as well as the California Repertory Company and the California Institute for the Preservation of Jazz. California Repertory Company, the Theatre Arts Department's graduate and professional theatre program, is the only company of its kind in the CSU system.

Major performance and exhibition facilities include the University Art Museum, the Art Department Galleries, the University Theatre, The Studio Theatre, the Edison Theatre, the Gerald R. Daniel Recital Hall, the Martha Knoebel Dance Theatre, and the Richard and Karen Carpenter Performing Arts Center. The extensive performance calendar generated by the wide-ranging curricula includes over 300 student and faculty concerts, film showcases, theatre productions, dance performances, and art and design exhibitions. The College of the Arts is a highly visible part of the campus community, as well as an important cultural and economic resource in the Long Beach/Los Angeles and Orange County areas.

University Art Museum

The University Art Museum, which recently celebrated its 25th anniversary, is ranked among the top 10% of the nation's 7,000-plus museums. The only accredited museum in the CSU system, it has achieved worldwide acclaim for its exhibitions, publications, and collections of contemporary artworks. In 1999, the museum was the recipient of the Hampton Collection, a \$3.2 million gift featuring 85 stunning mid-century abstractions by 42 artists.

The Richard and Karen Carpenter Performing Arts Center

The Carpenter Performing Arts Center opened in 1994. Designed by local architect Donald Gibbs, the elegant performance hall has enriched the surrounding community with hundreds of music, dance, film, and theatre events. The Carpenter Center, which seats 1,065 patrons, can accommodate large or small performing ensembles, film screenings, concerts, conferences, and other special events.

The California Institute for the Preservation of Jazz

The Jazz Institute is a state agency housed in the College of the Arts. The Institute's mission is to provide jazz education, outreach, performance, and preservation services for the western region of the United States. The Jazz Institute, housed in the University Library, has acquired more than 50,000 records, 7,500 compact discs, 5,000 tapes, and thousands of books, periodicals, photos, and memorabilia, as well as a collection of broadcast transcriptions and hundreds of hours of filmed and videotaped performances.

Courses (COTA)

Upper Division

450. Arts of the 20th Century (3)

Course involves all six departments in the College of the Arts and is designed to familiarize COTA students with art forms outside their major. Students will examine the role and function of the arts in society in terms of both philosophy and ideology. Letter grade only (A-F).

Students desiring information should contact the department office for referral to one of the faculty advisors. The Department of Asian and Asian American Studies (AAAS), through its multiple offerings and those in related departments, fosters multi-ethnic and cross-cultural understanding within a global, multi-disciplinary perspective; facilitates a greater understanding of Asians in America to enhance multi-cultural education and appreciation of ethnic diversity in California and the United States; and pursues an active language education program to promote cross-cultural awareness and intercultural understanding.

In the broad context, the department's major responsibilities revolve around international/area studies, ethnic studies and language studies. Asian Studies enables students to explore Asian civilizations from an interdisciplinary perspective; Asian American Studies investigate the nature of Asian immigration and Asian American experiences in the United States; Chinese Studies provides students with cultural, literary, and linguistic preparations; and Japanese language studies provide linguistic and cultural training in Japanese language and language related areas. Asian language courses are also appropriate electives to support several of the majors offered by the University.

Students in all programs are encouraged to integrate the study of Asian cultures and societies across the Pacific with that of Asian American communities in the United States and to support the study of culture and society with appropriate language training.

The department curricula provide students with knowledge and training necessary for (1) various occupations and careers including teaching, school administration, social work, public service, urban planning, communications and the media, foreign business and trade, (2) professional work in the Asian American community, (3) exploring an educational dimension by emphasizing and focusing on ethnic minorities.

Through courses of its own and those of cooperating departments, the Department of Asian and Asian American Studies offers the B.A. and M.A. in Asian Studies; the B.A. in Chinese Studies; a Single Subject Teaching Credential in Japanese, the B.A. in Japanese, a Minor in Asian American Studies, a Certificate in Asian Studies, a Certificate in Asian American Studies, and a Certificate in Japanese. The department also offers a Concentration in Japanese and a Concentration in Asian American Studies under Track II of the Bachelor of Arts in Liberal Studies. (See University Programs in this *Catalog*.) Additional information and advice relative to the programs are available through the department office, FO3-340.

Bachelor of Arts in Asian Studies (code A/STBA01) (120 units)

Students choosing an Asian Studies major select one of two tracks for the degree. The student may choose an area of study, concentrating on one or more specific Asian societies, such as China, Japan, India, or Southeast Asia. Or, the student may choose to focus on Asian American Studies and combine the study of Asian Americans as ethnic minorities with supporting investigation of the countries of their historical origin.

Requirements

1. ASAM 200 or 220;
2. A/ST 300I, 301I and 492;
3. Three semesters (or the equivalent) of a single Asian language, chosen from courses in Chinese, Japanese, or an Asian language approved by the undergraduate advisor.

Upper Division: A minimum of 21 units; students should select one of the following two emphases:

I. Area Studies Track

21 units of upper division work, including A/ST 492 (Proseminar in Asian Studies), and additional courses selected from the list of approved electives with the following provisions: (1) no more than 9 units shall be counted in a single discipline such as art or history, (2) no more than 9 units shall be credited that concentrate upon any one area of Asia, chosen from among the following: China, India, Japan, or Southeast Asia. No more than 6 units of courses on the Americas can be applied toward this requirement (N.B. In the case of seminar, thematic, or variable topic courses, the assignment of a disciplinary and/or geographic category will be made by the undergraduate advisor in consultation with the appropriate faculty member).

II. Asian American Studies Track:

21 units of upper division work, selected from the list of approved electives with the following provisions: (1) A/ST 492 (Proseminar in Asian Studies [3 units]); (2) 12 units of upper division Asian American Studies including ASAM 310 and 345; (3) the remaining upper division units focusing on one geographical area of Asia, chosen from among the following: China, India, Japan, or Southeast Asia.

FAQ Concerning Road Maps for Completion of Undergraduate Degrees

For each undergraduate major, the on-line Catalog shows plans for scheduling all required courses to complete the degree in four, five, or six years.

While CSULB will make every effort to schedule classes at the times shown in the plans, we cannot guarantee that courses will be available in specific semesters. It is possible that shortage or budget or of personnel will make it impossible to offer as many classes as we would wish.

The plans are not substitutes for working with an advisor. You are strongly encouraged to see an advisor when planning your program each term.

I am a freshman. Do I have to choose now whether to follow the four, five, or six-year plan?

No. Most freshmen take 12-15 units. You need at least 12 units to receive full financial aid. With experience, you will be able to judge how heavy a load you find comfortable. This will depend on your outside obligations, such as a job, and on your personal circumstances. In theory, each unit requires three hours a week, including preparing for class, attending class, and completing assignments. Use these guidelines to budget your time and plan an appropriate schedule.

Must I take the courses in the semesters shown on the plan?

The plan shows one possible way of completing all requirements for the degree. Consult your advisor about whether it is essential to take a given course in the semester shown. There are some rules to keep in mind:

1) You can take the General Education Foundation courses (Composition, Oral Communication, Critical Thinking, Mathematics) in any semester in the first 36 units of baccalaureate-level course work completed at CSULB.

2) You cannot take upper division courses until you have completed at least 30 units. (Exceptions can be made for students who already have completed advanced study in the subject.) You cannot take General Education Capstone courses until you have completed at least 60 units.

3) For some majors it is essential to complete courses in the correct sequence. You cannot take a more advanced course until you have completed the prerequisite course(s).

4) You must complete all requirements for admission to impacted majors within the first 60 units.

I have been told that I must take one or more pre-baccalaureate courses. How can I plan my program?

Your advisor at SOAR can help you identify which courses must be postponed. You must still complete the minimum number of baccalaureate units required for the degree.

You may be able to catch up by taking additional courses in later semesters or by taking classes in summer or winter session, or you may choose to spend an additional semester completing the program. You cannot begin the sequence of required courses for some majors until you are ready for baccalaureate-level Mathematics. See your major advisor to develop a plan for scheduling the required courses.

I didn't complete the exact list of courses shown. Can I still graduate on time?

The answer depends on your major and on what courses you have completed. The plans are not rigid requirements; they are only intended to provide guidance in planning a program. There are many reasons for students to follow a different pattern, such as changing the major, choosing to take fewer classes in a given semester, choosing to complete a minor or a second major. See your advisor for help in planning a program that will work for you.

If I follow the plan, will I have all requirements for graduation completed?

The plans include the specific courses required for the major. For some majors, there are restrictions on the choice of major electives. It is important that you select General Education courses to meet the required distribution pattern. You may need to take an additional General Education course to complete the minimum number of units required for each category. This is likely to happen if you took three-unit courses in Category B, Physical Universe.

**Bachelor of Arts in Asian American Studies
(code A/STBA04) (120 units)**

The Bachelor of Arts degree in Asian American Studies provides an interdisciplinary approach to explore the diverse history, cultures, communities, and contemporary realities in Asian America. It is designed to offer students an opportunity to develop a greater understanding of the complexities of Asian American experiences and to prepare them to function in a multiethnic society and multicultural world. The communication and critical analysis skills which are stressed in the program will be instrumental to students pursuing postbaccalaureate degrees in "traditional" disciplines, including History, Geography, Sociology, Psychology, and Literature; in interdisciplinary programs like Ethnic Studies and Women's Studies; and in professional fields such as Law, Business Administration, and Social Work. The program's curriculum and broad liberal arts perspectives likewise will prepare students for employment in several professions, including education, public policy, community development, media, social services, and human resources. Admission to the program requires completion of the G.E. Foundation courses.

Requirements

A Bachelor of Arts degree in Asian American Studies will require a minimum of 40 units, with at least 18 units earned in residence at CSULB.

40 required units consist of:

- 6 units of lower-division core courses
- 3 units of lower-division elective
- 16 units of upper-division core courses
- 15 units of upper-division electives in the following areas:
 - Specific Ethnic Group Focus* (3 units)
 - Gender Studies* (3 units)

- Asian Americans in Comparative Perspectives* (3 units)
- Explorations in Asian America* (3 units)
- Asian American Studies-Related Courses* (3 units)
- Lower-Division Core Courses (6 units): ASAM 220, 221.
- Lower-Division Elective (3 units): To be selected from the following: ASAM 200, 260, 290, 299

Upper-Division Core Courses (16 units): A/ST 300I OR 301I; ASAM 305, 345, 346, 495

Upper-Division Electives (15 units): Take 12 units from two of the first four groups and 3 units from the fifth group.

Group 1. Specific Ethnic Group Focus: ASAM 330, 331, 332, 333, 334, 352

Group 2. Gender Studies: ASAM 340, 370, 381

Group 3. Asian Americans in Comparative Perspectives: ASAM 319, 335I, 403, W/ST318I

Group 4. Explorations in Asian America: ASAM 310, 347, 360, 380, 410, 490, 499

Group 5. Asian American Studies-Related Courses: ANTH 329, 419, ANTH/W/ST 475/LING 470, ART 330I, CHLS 421, COMM 330, C/LT 415I, ENGL 375, HIST 469, 473, LING 472, POSC 323, PSY 375, SW 350, 481I, SOC 346, W/ST 432

Minor in Asian American Studies (code A/STUM01)

Requirements

The Minor in Asian American Studies is available to all majors.

A minimum of 22 units which must include: (a) ASAM 200 or 319, 220, 260 or 310, and 345, and (b) nine units selected from among the following: ASAM 330, 331, 332, 333, 334, 335I, 340, 346, 347, 352, 360, 370, 381, 490, 495, 499.

Certificate in Asian Studies (code A/STCT01)

A student may earn a Certificate in Asian Studies with a concentration on China, Japan, India, or Southeast Asia. Where applicable, courses used to meet the certificate requirements also may be used to satisfy the General Education requirement and the major and teaching minor requirements of the cooperating departments.

Requirements

1. A bachelor's degree, with a major in a discipline other than Asian Studies. May be completed concurrently;
2. A minimum of two semesters or its equivalent of an approved Asian language which is to be selected in accordance with the area of concentration;
3. A/ST 300I, 301I and 12 units of upper division work divided among two or more disciplines. These are to be selected in accordance with the area of concentration and in consultation with the student's advisor. No more than 6 units in any one discipline shall apply towards the Certificate.

Certificate in Asian American Studies (code A/STCT02)

Students pursuing any approved degree or credential program of the University may at the same time earn a Certificate in Asian American Studies. Courses taken to meet the requirements may simultaneously be used, where applicable, to meet General Education requirements or the degree or credential requirements of cooperating departments. Certification of successful completion of requirements will be issued upon the recommendation of the department chair.

Requirements

1. A bachelor's degree with a major other than Asian Studies. May be completed concurrently;
2. A minimum of 30 units distributed as follows:
 - a. ASAM 200 or 319, 220, 260 or 310, 345, 370 (required), plus;
 - b. additional courses selected from: ASAM 330, 331, 332, 333, 334, 335I, 340, 346, 347, 352, 360, 380, 381, 490, 495, 499.
 (See approved list of courses below.)
 Interested students should apply to the department office.

Bachelor of Arts in Chinese Studies (code A/STBA02) (120 units)

The Bachelor of Arts program in Chinese Studies at CSULB is designed to provide students with linguistic and cultural preparation, supported by international perspectives and understanding of humanities for personal, socio-political, and literary-intellectual development, as well as for economic self-sufficiency in the ever-intertwining world of a global economy. The degree program is a major intended to educate and produce graduates who will have communicative proficiency, critical thinking skills, socio-cultural understanding, and literary sensibility for intercultural communication. The degree program will also provide students with an opportunity and preparation to pursue a career involving the Pacific Rim nations, and to go on to graduate and professional programs in fields such as Art, International Affairs, Business Administration, History, Literature, Law, Journalism, Public Administration, or Education.

Residence Requirement for the Majors

At least four upper division courses required for the major must be completed successfully at CSULB. Students are encouraged, however, to complete up to a year of their language study in approved programs of study abroad.

Requirements

A minimum of 38 units is required, including at least 15 units earned in residence at CSULB. CHIN 101 and 102 are prerequisite to the major and may be satisfied by appropriate high school preparation or by examination. Required courses include a 3-unit lower division course, 20 units of core courses, and 15 units of electives from the following two groups: 1. Chinese and Chinese language-, literature-, or culture-related courses (9 units); and 2. China-related courses (9 units).

Lower Division Required Courses (11 units):

- A. 3 units required course: CHIN 250 or CHIN 260
- B. 8 units core courses: CHIN 201, 202

Upper Division Required Courses (27 units)

- A. 12 units core courses: CHIN 301, 370, 451, 492.
- B. 15 units electives selected from the following two groups:

1. 9 units selected from CHIN 302, 321, 350, 360, 380, 382A, 382B, 390, 410, 430A, 430B, 430C, 488, 490, 499; A/ST 490A, 490B.
2. 6 units selected from ANTH 332, AH 468, 469, ASAM 331, A/ST 300I, 301I, 320, 406A, 495I, ECON 365, 370, HIST 382A, 382B, 406A, 488, JOUR 312I, PHIL 306, POSC 362, 455, R/ST 341I, 343, W/ST 406A.

Bachelor of Arts in Japanese (code A/STBA03) (120 units)

The Bachelor of Arts program in Japanese at CSULB is designed to provide students with linguistic and cultural preparation supported by international perspectives and understanding of humanities for personal, social, intellectual and cognitive development as well as development of skills for economic self-sufficiency in the ever-intertwining world of global economy. The degree is intended to produce graduates who will have the communicative proficiency, critical thinking skills, and a sociocultural understanding for effective intercultural communication. The program will provide students with an opportunity and preparation to pursue a career involving the Pacific Rim nations, to go on to post-baccalaureate programs in the fields such as international affairs, business, law, journalism, public administration, or education, and/or to obtain a single subject teaching credential in Japanese.

The program is different from a traditional literature-oriented language program. It emphasizes pragmatic language studies aiming for acquisition of communication skills through communication based instruction, and providing knowledge of language and culture to develop appropriate understanding and attitudes for intercultural communication. The program will be supported by a variety of discipline-specific courses as well as interdisciplinary courses in Anthropology, Art, Asian Studies, Asian American Studies, Business, Comparative Literature, Economics, Education, Geography, History, International Studies, Linguistics, Philosophy, Political Sciences, Religious Studies, Speech Communication, and other programs offering Japan-related topics.

Planning a Program of Study

The student and undergraduate advisor should plan a coherent program that both fulfills the requirements of the major and covers the student's areas of interest in allied fields outside the Japanese language.

Students with background in Japanese language competency gained through home use or through primary or secondary school work in the U.S. or Japan must take a placement test administered by the department.

Students are encouraged to study in Japan, either through the CSU Study Abroad Program or independently, after completing at least two years of study (or its equivalent) of Japanese at CSULB.

Residence Requirement for the Majors

At least five upper division courses required for the major must be completed successfully at CSULB. Students are encouraged, however, to complete up to a year of their language study in approved programs of study abroad.

Requirements

A minimum of 44 units is required, including at least 15 units earned in residence at CSULB. JAPN 101 and 102 are prerequisite to the major and may be satisfied by appropriate high school preparation or by examination. Required courses include 23 units core courses and 21 units electives from the following three areas; 1. language and language-related courses (12 units), 2. Japanese civilization courses (6 units), and 3. Japan-related or intercultural communication courses (3 units).

Lower Division Required Core Courses (8 units): JAPN 201, 202

Upper Division Required Courses (36 units):

1. Core Courses (15 units): JAPN 301, 302, 311, 312, 451 (in Japanese);

2. Electives (21 units):

A. Language and Language Related Courses - 12 units selected from: JAPN 350, 370, 421, 422, 461, 462, 471, 481, 490, 492, 497;

B. Japanese Civilization (taught in English): 6 units selected from: ANTH 335, A/ST 393I, AH 470A/B, HIST 383A, 383B, 384, 405, 406B, 407I, 409, POSC 363, R/ST 344;

C. Japan-Related or Intercultural Communication Courses - 3 units selected from: ANTH 307I, 412I, 413, 490*, ASAM 330, 345, A/ST 300I, 301I, 310, 320, 406A, 490*, 492, 495I, C/LT 403, COMM 309, 330, ECON 370, 372, EDSS 450F, GEOG 307I, H SC 420I, HIST 382B, 406A, 478, 495*, I/ST 317I, 318I, 319I, 478, JOUR 312, PHIL 306, POSC 362, 363, 371, 378, 469*, 485*, 489, 497*, PSY 439, R/ST 341I, SOC 350, W/ST 401I, 406A.

*Special topics courses in departments which regularly offer topical courses pertinent to the program.

FAQ Concerning Road Maps for Completion of Undergraduate Degrees

For each undergraduate major, the on-line Catalog shows plans for scheduling all required courses to complete the degree in four, five, or six years.

While CSULB will make every effort to schedule classes at the times shown in the plans, we cannot guarantee that courses will be available in specific semesters. It is possible that shortage or budget or of personnel will make it impossible to offer as many classes as we would wish.

The plans are not substitutes for working with an advisor. You are strongly encouraged to see an advisor when planning your program each term.

I am a freshman. Do I have to choose now whether to follow the four, five, or six-year plan?

No. Most freshmen take 12-15 units. You need at least 12 units to receive full financial aid. With experience, you will be able to judge how heavy a load you find comfortable. This will depend on your outside obligations, such as a job, and on your personal circumstances. In theory, each unit requires three hours a week, including preparing for class, attending class, and completing assignments. Use these guidelines to budget your time and plan an appropriate schedule.

Must I take the courses in the semesters shown on the plan?

The plan shows one possible way of completing all requirements for the degree. Consult your advisor about whether it is essential to take a given course in the semester shown. There are some rules to keep in mind:

1) You can take the General Education Foundation courses (Composition, Oral Communication, Critical Thinking, Mathematics) in any semester in the first 36 units of baccalaureate-level course work completed at CSULB.

2) You cannot take upper division courses until you have completed at least 30 units. (Exceptions can be made for students who already have completed advanced study in the subject.) You cannot take General Education Capstone courses until you have completed at least 60 units.

3) For some majors it is essential to complete courses in the correct sequence. You cannot take a more advanced course until you have completed the prerequisite course(s).

4) You must complete all requirements for admission to impacted majors within the first 60 units.

I have been told that I must take one or more pre-baccalaureate courses. How can I plan my program?

Your advisor at SOAR can help you identify which courses must be postponed. You must still complete the minimum number of baccalaureate units required for the degree.

You may be able to catch up by taking additional courses in later semesters or by taking classes in summer or winter session, or you may choose to spend an additional semester completing the program. You cannot begin the sequence of required courses for some majors until you are ready for baccalaureate-level Mathematics. See your major advisor to develop a plan for scheduling the required courses.

I didn't complete the exact list of courses shown. Can I still graduate on time?

The answer depends on your major and on what courses you have completed. The plans are not rigid requirements; they are only intended to provide guidance in planning a program. There are many reasons for students to follow a different pattern, such as changing the major, choosing to take fewer classes in a given semester, choosing to complete a minor or a second major. See your advisor for help in planning a program that will work for you.

If I follow the plan, will I have all requirements for graduation completed?

The plans include the specific courses required for the major. For some majors, there are restrictions on the choice of major electives. It is important that you select General Education courses to meet the required distribution pattern. You may need to take an additional General Education course to complete the minimum number of units required for each category. This is likely to happen if you took three-unit courses in Category B, Physical Universe.

Certificate in Japanese (code A/STCT03)

The Certificate Program in Japanese offers students an opportunity to develop spoken and written competency in modern Japanese, and to acquire a broad introduction to various aspects of traditional and modern Japan.

The program is designed for students who intend to pursue a career in the private or public sectors, for which knowledge of Japan and the command of the language is useful or necessary, and also for students who intend to pursue a graduate program in which such knowledge and competency are required.

Requirements

1. A bachelor's degree (may be earned concurrently with the certificate);
2. 15 units of upper division level Japanese language courses;
3. 12 units of Japan-related upper division work from at least two disciplines. These units must be selected with the approval by a member of the advisory committee.

Approved Courses

Single Subject Credential in Japanese

The Japanese subject matter credential program at CSU Long Beach is designed to provide students with linguistic and cultural preparation and understanding of humanities for personal, social, intellectual and cognitive development as well as development of skills for economic self-sufficiency in the ever-intertwining world of global economy. It is intended to produce educators prepared in teaching Japanese with the communication proficiency, critical thinking skills, and socio-cultural understanding essential for effective intercultural communication as well as pedagogical knowledge and training in teaching Japanese to diverse populations in our society.

The program requires a minimum of 30 semester units of upper division courses in Japanese as listed below under the four subject categories: Language, Linguistics, Culture, and Literature. Students should take 21 units of core courses and 9 units of electives. All upper division courses are conducted in the target language and require completion or equivalent of the four semesters of lower division Japanese language courses.

All upper division language courses are designed to develop competency in four skills and content. However, JAPN 311 and 312 emphasize spoken Japanese at advanced level, while JAPN 301 and 302 emphasize reading and writing at advanced level. The content courses represent three areas of study - Japanese culture, linguistics, and literature. The culture courses provide an overview of Japanese history from the pre-historic times to contemporary Japan, and an insight into Japanese culture and society. The linguistics courses introduce the sound, meaning, syntactic and discourse structure of language, and offer a comparison of Japanese and English as well as other languages. The literature course introduces selected major literary works, which will provide sources to cultivate literary appreciation and to develop cultural understanding of Japan.

A grade of "C" or better is required in all courses accepted for the Japanese program. The exit requirement is "Advanced" level Japanese language proficiency.

Core Requirements

24 upper division units selected from the following four areas:

1. Language: JAPN 301, 302, 311, 312;
2. Linguistics: JAPN 461;
3. Literature: JAPN 471 plus 421 or JAPN 370;
4. Culture: JAPN 451.

Electives: a total of 6 units selected from at least two different areas in consultation with a program advisor based on the student's background, interest, and teaching plans.

Language: JAPN 421, 422;

Linguistics: JAPN 462, 481;

Literature: JAPN 370;

Culture: JAPN 350; 492;

Variable Subjects: JAPN 490; 497.

Master of Arts in Asian Studies (code A/STMA01)

The master of arts degree in Asian Studies is an interdisciplinary degree offered by the Asian Studies faculty of its cooperating departments. It is especially aimed at those intending to go into teaching, foreign service, or foreign trade. Students applying for the M.A. Program in Asian Studies must apply for admission to the University and simultaneously provide official transcripts and two letters of recommendation to the graduate advisor of the department.

Prerequisites

1. A Bachelor's degree with a major in Asian Studies; or
2. A Certificate in Asian Studies, awarded at CSULB, or its equivalent as evaluated by the graduate advisor of the department of Asian and Asian American Studies. Equivalency will, normally, be granted for work in Asia-related studies at CSULB and/or at other academic institutions, including a minimum of 18 units in no more than four disciplines with a minimum of six units in each of two disciplines of concentration plus two semesters of an approved Asian language. Only courses with a substantive Asia-related content are acceptable; or
3. A bachelor's degree in one of the fields in social science, humanities, or fine arts with 24 units of upper division Asia-related courses. These courses must be comparable to those required of a major in Asian Studies at this University. Deficiencies will be determined by the graduate advisor after consultation with the student and after study of transcript records. Students whose undergraduate prerequisites are inadequate will be required to fulfill these deficiencies before advancement to candidacy and will receive unclassified graduate status until all deficiencies are removed.

Advancement to Candidacy

1. Satisfaction of the general University requirements for advancement to candidacy;
2. Completion of 6 or more of the required units (not including language) with a minimum 3.0 overall GPA;
3. Approval of proposed program of study;
4. Satisfactory completion of the Writing Proficiency Examination.

Requirements

1. A minimum of 30 units of approved upper division and graduate courses including A/ST 592 and A/ST 610. At least 18 units must be in the 500-600 series composed of units earned at this University in graduate courses, graduate seminars, Directed Studies/Research or Thesis. All seminars and independent study courses may be repeated to a total of six (6) units, provided the topic is different. Directed Studies, Readings and Research, in any combination, may not exceed a total of six (6) units: A/ST 698 (thesis) must be taken for a minimum of four and a maximum of six units for those taking the thesis option.

2. A minimum of three upper division units in each of two disciplines of concentration must be taken preparatory to seminar work. Students should take at least six units of 500/600 level work in each of the two disciplines or concentrations; (N.B. Determination of the disciplinary status of any Asian Studies or any other courses taken at CSULB or other academic institutions shall be at the discretion of the Graduate Advisor in consultation with faculty, review of syllabi and reading lists, assessment of transcripts, etc.)
3. Comprehensive written examination in each of the two disciplines of concentration or a thesis. Students must have received permission of the Graduate Advisor, faculty advisor and prospective committee members before being allowed to file for the thesis option. Once selected, a student may not change his/her option.
4. Six units (beyond the B.A. level) in Chinese or Japanese or an Asian language approved by the Graduate Advisor. Waiver of this requirement, either by transfer of credits from another institution or by assessment of proficiency by resident faculty, is at the discretion of the graduate advisor of the department of Asian and Asian American Studies.

Upper Division Courses Acceptable:

A/ST 320, 406AB, 490, 492, 499; ANTH 332, 333, 335, *416, *417, *419, *490; AH 466, 467, 468, 469, 470A/B, 471A/B, *497, *498; C/LT 403, *448, *499; CHIN 380, 390, 410, 430ABC, 451, 490, 492, 499; ECON *472; GEOG 326, *494, *497; HIST 384, 385, 386, 405, 406A, 406B, 409, 488, *495, *498; JAPN 350, 451, 471, 490, 497; *PHIL 499; POSC 362, 363, 364, 366, 455, 469*, 485*, *489, *497, *499; R/ST *490, *499; *W/ST 406, 406A, 490, *499

* course must be an approved Asia-related topic.

Asian Studies (A/ST)

Lower Division

190. The Tao Primer of Basic Reasoning (3)

Prerequisites/Corequisite: ENGL 100 or its equivalent. A course about clear, critical and creative thinking, exploring both Western and Eastern paradigms about the nature, methods and principles of reasoning, as well as their common failings, limitations and applications in both formal and informal settings. Special emphasis will be placed on the ways in which Taoist principles complement and enhance traditional Western concepts.

290. Special Topics in Asian Studies (3)

Prerequisite: Consent of instructor. Topics of special interest in Asian Studies selected for intensive study. Topics will be announced in the *Schedule of Classes*. May be repeated for a maximum of 6 units with different topics.

299. Directed Studies (1-3)

Prerequisite: Consent of instructor. Directed studies to permit individual students to pursue topics of special research interest. May be repeated for a maximum of 6 units. Letter grade only (A-F).

Upper Division

General Education Category A must be completed prior to taking any upper division course except upper division language courses where students meet formal prerequisites and/or competency equivalent for advanced study.

300I. Traditional Asia (3)

Prerequisites: Completion of the GE Foundation, one or more Exploration courses, and upper-division standing. An interdisciplinary examination of the traditional civilizations of Asia. This team-taught course focuses on two Asian civilizations, normally China and India, and may periodically focus on Japan. The course will examine topics related to Asian cultures to illustrate the richness and diversity of Asia.

301I. Modern Asia (3)

Prerequisites: Completion of GE Foundation requirements, one or more Explorations courses, and upper-division standing. Emphasis on the development of Asia since the 18th century and its role in the modern world, with some attention to the experience of Asians in the U.S. Continuity and change, reform and revolution in culture, politics and the economy will be included.

310. United States and Asia (3)

Designed to answer the basic question: How is Asia important to the United States and vice versa? Focusing on the post-1945 period and addressing the question of dependence vs. interdependence, four main areas will be examined: (1) key religious, social and political patterns in Asia; (2) cross-cultural images of Asia and America; (3) Asian-U.S. global economic relations; (4) Asian-U.S. strategic and political relationships in both the regional and global context.

320. Asia in Fiction and Film (3)

This course focuses on Asian-Western interactions and particularly on Asian-Western perspectives of this interaction as manifested in film and works of fiction. The focus will be on China, Japan and/or India; consideration will also be given to the Asian experience in America.

393I. Japan's Heritage (3)

Prerequisites: Completion of GE Foundation requirements, one or more Explorations courses, and upper-division standing. Cultural heritage of Japanese civilization emphasizing history, philosophy, religion, literature and fine arts from prehistory to the present. Letter grade only (A-F).

406A. Asian Women: East and Northeast Asia (3)

Prerequisite: Upper division status. In this course, we will explore the diverse experiences of women in China, Japan, and Korea. By studying different kinds of sources, including memoirs, biographies, literature, film, as well as scholarly works by or about North and Northeast Asian women, we will examine how gender was historically constructed and discuss about women's various forms of resistance in this area. This course will proceed both chronologically and thematically. Major issues to be addressed include the discrepancy between gender norms and reality, women's agency in social change, women and the state, and the complex relationship between feminism and nationalism. Asian American women's experiences will also be discussed at relevant places throughout the course. At the end of the course, students are encouraged to critically reflect on some theoretical issues that have been discussed in the scholarship on women's history in general and North and Northeast Asian women's history in particular. Same courses as HIST 406A and W/ST 406A.

406B. Asian Women: South and Southeast Asia (3)

An introductory course on the experiences of women in two of the most ethnically, culturally, and politically diverse regions of the world: South and Southeast Asia. This course explores the diversity of women's experience in these two regions during the colonial and post-colonial periods. Using different kinds of sources, including memoirs, biography, literature, and film, as well as monographs by or about South and Southeast Asian women, we will examine how gender is historically constructed in the two regions, and how women have exercised agency throughout history. This course will proceed both chronologically and thematically. Major issues to be discussed include women's agency in social change; gender as a contentious site of political discourse; the impact of colonization on women, and women's various forms of resistance. Same courses as HIST 406B and W/ST 406B. Letter grade only (A-F).

441. Khmer Literacy for Khmer Speakers: Introduction (3)

Prerequisite: Fluent oral skills in Khmer. First of a 4 course sequence. Introduction to Khmer writing system. Practice in reading, decipherment, vowels, consonants and syllable combinations. Oral practice, honorifics, culturally appropriate interaction. Letter grade only (A-F). Same course as LING 441.

442. Khmer Literacy for Khmer Speakers: Intermediate A (3)

Prerequisite: A/ST 441 or consent of instructor. Second of a 4 course sequence. Continued practice in Khmer writing system. Vocabulary development, reading and writing long sentences and simple text. Appropriate social and educational discourse. Letter grade only (A-F). Same course as LING 442.

443. Khmer Literacy for Khmer Speakers: Intermediate B (3)

Prerequisite: A/ST 442 or consent of instructor. Third of a 4 course sequence. Contextual reading for comprehension, culture and grammatical knowledge. Development of oral skills, through discussion of content, role play and verbal critique. Letter grade only (A-F). Same course as LING 443.

444. Khmer Literacy for Khmer Speakers: Advanced (3)

Prerequisite: A/ST 443 or consent of instructor. Fourth of a 4 course sequence. Composition and written translation. Preparation for BCLAD tests 5 & 6: Culture and Language of Emphasis. Reading authentic texts. Letter grade only (A-F). Same course as LING 444.

*490. Special Topics in Asian Studies (3)

Topics of special interest in Asian Studies selected for intensive study. Topics will be announced in the *Schedule of Classes*. May be repeated to a maximum of 6 units with different topics.

A. Modern Chinese Literature

B. China in Transition

C. Modern Vietnam

D. Filipino Language, Literature and Culture

492./592. Proseminar in Asian Studies (3)

Prerequisites: Consent of instructor. Introduction to research methods; intensive study of selected conceptual and theoretical issues in Asian or Asian American Studies. Area and discipline of emphasis will vary from year to year. May be repeated to a maximum of 6 units.

495I. China Heritage (3)

Prerequisites: Completion of the G.E. Foundation, one or more Exploration courses; upper-division standing. Cultural heritage of China and its influence on other regions of Asia and the world will be explored through history, philosophy, religion and science, side by side with the fine arts; seen as the totality of a people's humanistic experience. (Lecture, discussion, film.)

499. Directed Studies (1-3)

Prerequisite: Consent of Instructor. Directed studies to permit individual students to pursue topics of special research interest. May be repeated to a maximum of 6 units. Letter grade only (A-F).

Asian Studies (A/ST)

Graduate Level

Graduate course descriptions are found in the departmental listings in which they are offered. Graduate courses applicable for the degree (only when the focus is on Asia) are: AH 566, 567, 568, 569, 570, 571, *596, *597; A/ST 543, 544, 551, 592, 610, 695, 697, 698; ANTH 516, 517, 519, 597, 697; ART 611; ASAM 595; CHIN 530A,B,C, 551, 590, 592; C/LT 503, 522, 548, 550; ECON 572, 690; GEOG 650, 697; HIST 505, 509, 510(G), 682, 695, 697; JAPN 551, 562, 581, 592, 695, 697; PHIL 697; POSC 590, 599, 600, 610, 670, 697; R/ST 646, *690, *697.

543. Religions of China (3)

Ancient Chinese religious thought; penetration of Indian Buddhism and Ch'an (Zen); popular religion and the religion of the scholar-official. Emphasis will be on original texts in translations. Not open to students with credit in R/ST 343. Letter grade only (A-F).

544. Religions of Japan (3)

The transmission of continental civilization to Japan; Shinto, Buddhism and Tokugawa Neo-Confucianism; Genroku culture; and the New Religions. Emphasis on original texts in translations. Not open to students with credit in R/ST 344. Letter grade only (A-F).

551. Hinduism (3)

Survey of ancient, classical and medieval Hinduism. Emphasis on analysis of Upanishads, Bhagavad Gita and the various paths of Yoga. Not open to students with credit in R/ST 351. Letter grade only (A-F).

592./492. Proseminar in Asian Studies (3)

Prerequisites: Consent of the instructor. Introduction to research methods; intensive study of selected conceptual and theoretical problems in Asian or Asian American Studies. Area and discipline of emphasis will vary from year to year. May be repeated to a maximum of 6 units. Letter grade only (A-F).

610. Seminar in Asian Studies (3)

Selected topics in Asian studies. Area and discipline of emphasis will vary from year to year. Open to graduate students of Asian studies. Graduate students in other disciplines may enroll with consent of instructor. May be repeated to a maximum of 6 units. Letter grade only (A-F).

695. Directed Readings (1-3)

Prerequisites: Consent of Graduate Advisor. Readings in Asian Studies on an individual basis. Letter grade only (A-F).

697. Directed Research (1-3)

Prerequisites: Consent of Graduate Advisor. Research in Asian Studies on an individual basis. Letter grade only (A-F).

698. Thesis (2-6)

Prerequisite: Consent of the Graduate Advisor. Planning, preparation, and completion of a thesis in Asian studies.

Asian American Studies (ASAM)

Lower Division

1. Language Skills (3)

Focuses on intensive development of grammatical skills and expository writing. Primarily for Asian American students. Credit/no credit only. Counts as part of student course load but does not carry graduation credit.

100. Language Skills (3)

Prerequisite: A recorded total score of 151 or above on the English Placement Test, or credit in ASAM 1 (or its equivalent) and consent of the instructor. Focuses on organizational methods and techniques for writing compositional and expository prose, advanced grammar, and some critical reading techniques for term papers. Primarily for Asian American students.

200. Asian American Inter-Ethnic Relations (3)

Prerequisites: Completion of GE Foundation requirements. Intercultural and inter-ethnic behavior and orientation of Asian Americans; emphasis on the nature of their relations and their patterns of interaction with other diverse groups as well as the majority culture. Not open to students with credit in AIS 319, ASAM 319, B/ST 319, CHLS 319, C/LA 319, and W/ST 319. Letter grade only (A-F).

215. U.S. Diversity and the Ethnic Experience (3)

Prerequisite: The course is open only to Integrated Teacher Education Program students. This course is a survey of four major ethnic groups (American Indians, African Americans, Latinos, and Asian Americans) in American society from the colonial era to the present. Special attention is given to the formation and transformation of each ethnic group and their individual and collective roles in the development of the United States. Same course as AIS 215, B/ST 215, CHLS 215. The departments take turns offering the course in the Fall semester. Letter grade only (A-F).

220. Asian American History (3)

Prerequisite: Completion of the 13-unit GE Foundation requirements. This course focuses on the social, economic, political, and cultural dimensions of Asian experiences within the context of U.S. history. It examines race, ethnicity, class, gender, sexual orientation, and the politics of representation within various Asian American communities and in the dominant U.S. society. The class will include explorations into the larger narratives of the Asian diasporas and the formation of local and global networks among Asian Americans.

221. Contemporary Issues in Asian America (3)

Prerequisites: Completion of the GE Foundation requirements. This course examines crucial topics, including documented and undocumented immigration, labor, popular culture practices, the media, and political activism, facing contemporary Asian Americans. The bulk of the class will focus on Asian experiences in the United States, but the course is designed to also explore some of the issues associated with the global economy and the Asian diaspora. Letter grade only (A-F).

260. Introduction to Asian American Literature (3)

Prerequisites: Completion of GE Foundation requirements. A general survey course that includes critical readings of representative works in English by Chinese, Hawaiian, Japanese, Korean, and Filipino American authors, and any other writers of Asian descent who have made the United States their home. Emphasis will be placed on how they interpret their Asian American experiences in the various literary genres represented. Letter grade only (A-F).

290. Special Topics in Asian American Studies (3)

Prerequisite: Consent of instructor. Topics of current interest in Asian American Studies selected for intensive development. Topics will be announced in the *Schedule of Classes*. May be repeated to a maximum of 6 units with different topics.

299. Directed Studies (1-3)

Prerequisite: Consent of instructor. Directed studies to permit individual students to pursue topics of special research interest. May be repeated to a maximum of 6 units. Letter grade only (A-F).

Upper Division

General Education Category A must be completed prior to taking any upper division course except upper division language courses where students meet formal prerequisites and/or competency equivalent for advanced study.

305. Theories and Methods in Asian American Studies (3)

Prerequisites: Upper-division standing or consent of instructor, ASAM 220 and completion of General Education category "A" requirement. This interdisciplinary course explores the various approaches and theoretical underpinnings which have been employed to examine Asian American experiences. It is intended to survey some of the best of both traditional and cutting edge contributions to the field, examining the ways in which scholars connect texts to social and historical contexts, calling into question the arguments made, the sources of evidence, methodological practices, and the application of theories. Students will have the opportunity to conduct research on Asian American topics of their interest. Letter grade only (A-F).

310. Asian Americans and Education

Examining problems and potentials of a multi-racial classroom for the understanding of, and relating to students of, diverse cultural backgrounds, with an emphasis on the Asian American. Small group interaction and counseling of individual students.

319. The Ethnic Experience in the U.S. (3)

An examination of the dynamics of the development of our multi-cultural society, emphasizing study of the four distinct ethnic strands of American society (Asian American, Black American, Mexican American, and American Indian) and their role in the maintenance of cultural diversity in the United States. Same course as AIS 319, B/ST 319, CHLS 319, W/ST 319. (Lecture/Discussion.)

330. Japanese American Experience (3)

A study of the culture, history, and literature of Japanese in America; emphasizing immigrant experience, agricultural contributions, World War II, generational issues, women in transition and family.

331. Chinese American Experience (3)

A study of the culture, history, and literature of Chinese in America, emphasizing immigrant experience, generational issues, women in transition and family.

332. Korean American Experience (3)

A study of the culture, history, and literature of Koreans in America, emphasizing immigrant experience, generational issues, women in transition and family.

333. Vietnamese American Experience (3)

A study of the culture, history, and literature of Vietnamese in America, emphasizing immigrant experience, generational issues, women in transition and family.

334. Cambodian American Experience (3)

A study of the culture, history, and literature of C in America, emphasizing immigrant experience, generational issues, women in transition and family.

335I. Asian and Latino Immigration Since World War II (3)

Prerequisites: Completion of GE Foundation requirements, one or more Explorations courses, and upper-division standing. Analyzes the causes of a dramatic post-World War II shift in immigration from Europe to Asia and Latin America, immigrants' settlement and adaptation patterns, and the Asian and Latino communities' social, racial, political and economic impact on American society. Same course as CHLS 335I. (Lecture and discussion, 3 hours)

340. Asian American Family (3)

Study of the Asian American family as a social institution; emphasis on the influence and consequences of the traditional Asian values and the impact of Western culture in the formation of a distinct family life style.

345. Asian American Community Analysis (4)

Socioeconomic, political and cultural profile of Asian American communities; role and function of community organizations. Training in community surveys and service. (Lecture, activity)

346. Asian Americans and the Law (3)

Examines how laws have been used to restrict Asian Americans' social, political, educational, and economic activities, as well as how this ethnic group has utilized the legal system to fight discrimination and seek justice.

347. Asian Americans and Public Policy Issues (3)

The Asian Americans are the fastest growing ethnic population in the United States. This seminar will examine a range of public policy issues impacting Asian Americans. These will include issues affecting all Americans, such as adequate health care, attention to the elderly, and the education of our youth. Other issues to be addressed will focus on the particular situation of Asian Americans and other minority groups, including access to employment opportunities, political, cultural and media representation, and the increase in racial bias and violations of civil rights. An examination of these issues, and the development of policy perspectives, will serve as the basis for this seminar. (Lecture 3 hours.)

352. Filipino/a American Experience (3)

Focusing on the social, economic, political, and cultural dimensions of Filipino/a experiences in the United States, this course examines major issues, including legacies of imperialism, transnational patterns of capital and labor, colonial and post-colonial identities, resistance to oppression, and literary expressions in Filipino/a American communities.

360. Studies in Asian American Literature (3)

Key literary texts will be discussed in light of their contributions to an understanding of the lived experience of Asian Americans, especially as such creative work interethnic, class, gender, and generational conflict. Contemporary research in cultural studies, literary theory, and Asian American studies will provide the theoretical foundation for the analysis of Asian American literature.

370. Gender and Sexuality in Asian America (3)

Employing interdisciplinary approaches toward the study of issues associated with gender and sexuality in Asian America, this course explores the diverse historical and contemporary experiences of Asian Americans with respect to gender roles and relationships, family, expressions of desire, as well as the relationships among gender, sexuality, and racial/ethnic identity.

380. Asian Philosophies and Religions in America (3)

Influence of and changes in Asian philosophies and religions in the American environment. Emphasis on Confucianism, Taoism, Hinduism, Buddhism and Shintoism in relation to individual and social values in America.

381. Asian American Women (3)

Will explore the largely unwritten history of Asian American women. Using an interdisciplinary perspective, will look at not only secondary sources but also autobiographical, literary, and journalistic writings; oral histories, diaries, anthropological studies, psychological/clinical reports, and film to reconstruct the lives of Asian American women. Will examine how having been burdened by the triple oppression of gender, race, and class, Asian American women have been actively pursuing equality and dignity. Same course as HIST 381 and W/ST 381. Lecture.

403. Asian American and Chicano/Latino Cinema (3)

Prerequisites: Completion of the Foundation courses, at least one Explorations course, and upper division status. This course is a team-taught class that explores the connections between Asian American and Chicano/Latino film. It is designed to examine the politics of representation in mainstream releases and independent films and videos by artists of color. Special attention will be paid to themes of collectivity, sexuality, racialized gender, race, and class formations, and social transformations. Emphases will be given to grounding issues presented in films within historical, literary, and cultural studies frameworks. Same course as CHLS 403.

410. Poverty In Asian America (3)

Prerequisites: Completion of Foundation courses, at least one Explorations course, and upper division status. This course examines concentrations of poverty among Asian Pacific Americans (APA) and the reasons why some APA groups are among the poorest ethnic groups in the United States. To provide context, it introduces the basic features of poverty in the United States, major theories about the causes of poverty, and anti-poverty policies associated with those theories. The course looks at selected activities in APA communities, including nonprofit community-based social services, labor and community organizing, and political advocacy, that are intended to reduce poverty or ameliorate its effects.

490. Special Topics in Asian American Studies (3)

Prerequisite: Consent of instructor. Topics of current interest in Asian American Studies selected for intensive development. May be repeated to a maximum of 6 units. Topics will be announced in the *Schedule of Classes*.

495./595. Seminar in Asian American Studies (3)

Selected topics in Asian American Studies. Area and topics of emphasis will vary from year to year. Letter grade only (A-F). May be repeated to a maximum of 6 units.

Asian American Studies (ASAM)

499. Directed Studies (1-3)

Prerequisite: Consent of Instructor. Directed studies to permit individual students to pursue topics of special research interest. May be repeated to a maximum of 6 units.

Graduate Level

595/495. Seminar in Asian American Studies (3)

Selected topics in Asian American Studies. Area and topics of emphasis will vary from year to year. Letter grade only (A-F). May be repeated to a maximum of 6 units.

Chinese Studies (CHIN)

Lower Division

101. Fundamentals of Chinese (4)

Prerequisites: One GE Foundation course which may be taken concurrently, or formal prerequisites and/or competency equivalent for CHIN 101. Introduction to pronunciation, reading, writing, conversation, and grammar. Students with previous training or native speakers of Chinese may not enroll.

102. Fundamentals of Chinese (4)

Prerequisites: One GE Foundation course which may be taken concurrently, or formal prerequisites and/or competency equivalent for advanced study in Chinese. Introduction to pronunciation, reading, writing, conversation, and grammar. Students with previous training or native speakers of Chinese may not enroll.

201. Intermediate Chinese (4)

Prerequisites: Completion of GE Foundation requirements, or formal prerequisites and/or competency equivalent for advanced study in Chinese. Continuation of first year Chinese. Further development of syntax, grammar and sentence patterns, reading, writing and conversation. Students with previous training or native speakers of Chinese may not enroll.

202. Intermediate Chinese (4)

Prerequisites: Completion of GE Foundation requirements, or formal prerequisites and/or competency equivalent for advanced study in Chinese. Continuation of first year Chinese. Further development of syntax, grammar and sentence patterns, reading, writing and conversation. Students with previous training or native speakers of Chinese may not enroll.

250. Introduction to the *I-ching* (3)

Prerequisites: Completion of GE Foundation requirements. This course will focus on the central position of the *I-ching* in Chinese philosophical and spiritual life and provide a system of knowledge whereby a person can critically analyze and logically reason the pattern of changes governed by the immutable Law of Change. (Lecture in English, no knowledge of Chinese required.) Letter grade only (A-F).

260. Introduction to Chinese Civilization (3)

A thematic survey of various aspects of Chinese civilization from its ancient beginning to the present. The emphasis of the course is not only on understanding China's history in general chronological terms, but also on understanding the cultural qualities that have made China a great and distinctive country.

Upper Division

General Education Category A must be completed prior to taking any upper division course except upper division language courses where students meet formal prerequisites and/or competency equivalent for advanced study.

301. Advanced Chinese (3)

Prerequisites: CHIN 202 or its equivalent, or consent of the instructor. Study of modern spoken and written Chinese involving advanced patterns and expressions. Emphasis on reading, comprehension, vocabulary building and idiomatic usage.

302. Advanced Chinese (3)

Prerequisites: CHIN 301 or its equivalent, or consent of the instructor. Study of modern spoken and written Chinese involving advanced patterns and expressions. Emphasis on reading, comprehension, vocabulary building and idiomatic usage.

321. Chinese Calligraphy (3)

Prerequisites: Consent of instructor. Completion of first-year Chinese or Japanese language or equivalent preferred. Focuses on the history, development, artistry, and appreciation of Chinese calligraphy. Equal emphasis placed on hands-on practice in and outside of the classroom. With the assistance of the instructor, students will be required to produce a minimum of two properly mounted and framed calligraphic pieces by the end of the semester for a campus-wide exhibition and competition.

350. Business Chinese for Bilinguals (3)

Prerequisites: Native/near native proficiency in the Chinese language or consent of instructor. Prepares students to use Chinese for business purposes. Introduces a variety of written business forms in Chinese, examines business culture, practice, and etiquette. Students must be able to read and write Chinese for general purposes, e.g., read and write letters to family members, read advertisements, news and/or some articles in Chinese newspapers.

360. Classical Chinese (3)

Prerequisites: CHIN 202 or equivalent Chinese reading proficiency or bilingual students. Prepares students to read and understand classical Chinese, to gain basic knowledge of its vocabulary, grammatical structure and style that is different from modern Chinese. Introduction to various genres of classical literature: prose, poetry and other literary forms.

370. Chinese Literature in English Translation (3)

Readings in translation of representative works of the major literary genres in China covering both the classical and the modern period. Previous knowledge of the language is highly desirable, but not necessary.

380. Topics in Chinese Linguistics (3)

Prerequisites: CHIN 102 or equivalent. The Chinese language viewed in its linguistic context, synchronically and diachronically. Introduction to descriptive grammar of modern standard Chinese, classical Chinese, the rise of written vernacular, dialect variations and sociolinguistic issues. Lecture/discussion.

382A. Imperial China (3)

Completion of the GE Foundation. Introduction to the classical civilization stressing the evolution of imperial institutions, the Chinese world order and China's traditional cultural heritage. Same course as HIST 382A.

382B. Modern China (3)

Prerequisite: Completion of the GE Foundation. Chinese society from the 17th century to 1949. Impact of imperialism, reform and revolutionary movements, the background of Chinese communism. Not open to students with credit in HIST 482B. Same Course as HIST 382B.

390. Topics in Chinese Cultural Studies (3)

Prerequisites: Upper-division standing or consent of instructor. Study of characteristic features of Chinese culture through selected topics and themes in Chinese ethics, history, literature, philosophy, political science, and sociology. Topics vary from year to year based on specialty of the instructor. May be repeated to a maximum of 6 units with different topics.

410./510. Chinese Information Processing (3)

Prerequisite: CHIN 202 or equivalent. May be waived with instructor's consent. Introduction to the tools used in Chinese web design, including Chinese word-processing, HTML, web site layout, and user interaction. Knowledge of the language is desirable. The course addresses the fundamental pedagogical issues in web design with emphasis on the value of interactivity. May be repeated to a maximum of 6 units with different topics. Undergraduates register in CHIN 410; Graduates register in CHIN 510.

430A./530A. Classical Chinese Fiction (3)

Prerequisite: Upper-division standing or consent of instructor. An in-depth study and examination of traditional Chinese fiction, ranging from major works of fiction from the Six Dynasties (317-588) through the Qing Dynasty (1644-1911). Special attention will be given to the stylistic and vernacular characteristics of the representative works such as *Sanguo yanyi*, *Jin Ping Mei*, *Shuihu zhuan*, *Xiyou ji*, *Hongloumeng*, and *Rulin waishi*. Undergraduates register in CHIN 430A; Graduates register in CHIN 530A.

430B./530B. Classical Chinese Drama (3)

Prerequisite: Upper-division standing or consent of instructor. An in-depth study and examination of Yuan (1279-1368) and Ming (1368-1644) drama, ranging from the major works of Northern Drama (*Zaju*), Southern Drama (*Nanxi*), to Peking Opera (*Jingxi*). Undergraduates register in CHIN 430B; Graduates register in CHIN 530B.

430C./530C. Classical Chinese Poetry (3)

Prerequisite: Upper-division standing or consent of instructor. An in-depth study and examination of traditional Chinese poetry, ranging from major works of poetry from antiquity to the Qing Dynasty (1644-1911). Special attention will be given to the textual analysis and literary interpretation of this large poetic body. Undergraduates register in CHIN 430C; Graduates register in CHIN 530C.

451./551. Chinese Culture and Tradition (3)

Prerequisite: One China-related course in Asian Studies or History and CHIN 302 (Advanced Chinese) or equivalent proficiency. Designed primarily as an advanced language class, but its subject emphasis is the study and discussion of various aspects of Chinese culture and tradition. It encompasses historical, philosophical, linguistic, literary, artistic, and scientific perspectives. The instruction of this class is conducted in Mandarin. Undergraduates register in CHIN 451; Graduates register in CHIN 551.

488. The Chinese Revolution (3)

Prerequisite: CHIN 382B or consent of instructor. Theory and practice of revolutionary socialism in the People's Republic of China, historical and ideological background of the Chinese revolution, Mao and Maoism, politics, culture and society in China. Same course as HIST 488.

490./590. Special Topics in Chinese (3)

Prerequisite: Consent of instructor. Independent study under supervision of a faculty member. May be repeated to a maximum of 6 units with different topics. Undergraduates register in CHIN 490; Graduates register in CHIN 590.

492./592. Senior Seminar (3)

Prerequisite: One China-related course in Asian Studies or History and CHIN 302 (Advanced Chinese) or equivalent proficiency. This is an introduction to research methods and the current status of the field. It is a comprehensive survey of recent scholarly publications in the area of Chinese Studies, covering a wide range of topics of academic import including society, philosophy, literature, religion, art, economy, politics, science, and medicine. It involves an intensive study of some of the paramount conceptual and theoretical problems that confront students of Chinese history and culture. The thematic focus will vary from year to year, depending on the instructor's disciplinary emphasis. May be repeated to a maximum of 6 units with different topics. Undergraduates register in CHIN 492; Graduates register in CHIN 592.

499. Directed Studies in Chinese (1-3)

Prerequisite: Consent of instructor. Independent study under supervision of a faculty member. May be repeated to a maximum of 6 units with different topics.

Graduate Level

510./410. Chinese Information Processing (3)

Prerequisite: CHIN 202 or equivalent. May be waived with instructor's consent. Introduction to the tools used in Chinese web design, including Chinese word-processing, HTML, web site layout, and user interaction. Knowledge of the language is desirable. The course addresses the fundamental pedagogical issues in web design with emphasis on the value of interactivity. May be repeated to a maximum of 6 units with different topics. Undergraduates register in CHIN 410; Graduates register in CHIN 510.

530A./430A. Classical Chinese Fiction (3)

Prerequisite: Upper-division standing or consent of instructor. Undergraduates register in CHIN 430A; Graduates register in CHIN 530A. An in-depth study and examination of traditional Chinese fiction, ranging from major works of fiction from the Six Dynasties (317-588) through the Qing Dynasty (1644-1911). Special attention will be given to the stylistic and vernacular characteristics of the representative works such as *Sanguo yanyi*, *Jin Ping Mei*, *Shuihu zhuan*, *Xiyou ji*, *Hongloumeng*, and *Rulin waishi*.

530B./430B. Classical Chinese Drama (3)

Prerequisites Upper-division standing or consent of instructor. An in-depth study and examination of Yuan (1279-1368) and Ming (1368-1644) drama, ranging from the major works of Northern Drama (*Zaju*), Southern Drama (*Nanxi*), to Peking Opera (*Jingxi*). Undergraduates register in CHIN 430A; Graduates register in CHIN 530A.

530C./430C. Classical Poetry (3)

Prerequisites: Upper-division standing or consent of instructor. An in-depth study and examination of traditional Chinese poetry, ranging from major works of poetry from antiquity to the Qing Dynasty (1644-1911). Special attention will be given to the textual analysis and literary interpretation of this large poetic body. Undergraduates register in CHIN 430C; Graduates register in CHIN 530C.

551./451. Chinese Culture and Tradition (3)

Prerequisite: One China-related course in Asian Studies or History and CHIN 302 (Advanced Chinese) or equivalent proficiency. Designed primarily as an advanced language class, but its subject emphasis is the study and discussion of various aspects of Chinese culture and tradition. It encompasses historical, philosophical, linguistic, literary, artistic, and scientific perspectives. The instruction of this class is conducted in Mandarin. Undergraduates register in CHIN 451; Graduates register in CHIN 551.

590./490. Special Topics in Chinese (3)

Prerequisite: Consent of instructor. Independent study under supervision of a faculty member. May be repeated to a maximum of 6 units with different topics. Undergraduates register in CHIN 490; Graduates register in CHIN 590.

592./492. Senior Seminar (3)

Prerequisite: One China-related course in Asian Studies or History and CHIN 302 (Advanced Chinese) or equivalent proficiency. This is an introduction to research methods and the current status of the field. It is a comprehensive survey of recent scholarly publications in the area of Chinese Studies, covering a wide range of topics of academic import including society, philosophy, literature, religion, art, economy, politics, science, and medicine. It involves an intensive study of some of the paramount conceptual and theoretical problems that confront students of Chinese history and culture. The thematic focus will vary from year to year, depending on the instructor's disciplinary emphasis. May be repeated to a maximum of 6 units. Undergraduates register in CHIN 492; Graduates register in CHIN 592.

Japanese (JAPN)

Lower Division**101. Fundamentals of Japanese (4)**

Prerequisites: One GE Foundation course which may be taken concurrently, or formal prerequisites and/or competency equivalent for JAPN 101. Introduction to pronunciation, reading, writing, conversation, and structure of the language. Native speakers of Japanese may not enroll.

102. Fundamentals of Japanese (4)

Prerequisites: One GE Foundation course which may be taken concurrently, or formal prerequisites and/or competency equivalent for advanced study in Japanese. Introduction to pronunciation, reading, writing, conversation, and structure of the language. Native speakers of Japanese may not enroll.

Japanese (JAPN)

201. Intermediate Japanese (4)

Prerequisites: Completion of GE Foundation requirements, or formal prerequisites and/or competency equivalent for advanced study in Japanese. Continuation of first year Japanese. Further development of listening, speaking, reading, writing, communication, and structure of the language. Continuation of first year Japanese. Progressive drill on syntax and grammar and sentence patterns: reading, translation and composition. Native speakers of Japanese may not enroll.

202. Intermediate Japanese (4)

Prerequisites: Completion of GE Foundation requirements, or formal prerequisites and/or competency equivalent for advanced study in Japanese. Continuation of first year Japanese. Further development of listening, speaking, reading, writing, communication, and structure of the language. Continuation of first year Japanese. Progressive drill on syntax and grammar and sentence patterns: reading, translation and composition. Native speakers of Japanese may not enroll.

Upper Division

General Education Category A must be completed prior to taking any upper division course except upper division language courses where students meet formal prerequisites and/or competency equivalent for advanced study.

301. Advanced Japanese (3)

Prerequisites: JAPN 202 or its equivalent as determined by the instructor. Study of modern spoken and written Japanese involving advanced patterns and expressions. Emphasis on reading comprehension, vocabulary building and idiomatic usage.

302. Advanced Japanese (3)

Prerequisites: JAPN 301 or its equivalent as determined by the instructor. Study of modern spoken and written Japanese involving advanced patterns and expressions. Emphasis on reading comprehension, vocabulary building and idiomatic usage.

311. Advanced Spoken Japanese (3)

Prerequisites: JAPN 202 or its equivalent as determined by the instructor. Advanced study in modern spoken Japanese and Japanese communication.

312. Advanced Spoken Japanese (3)

Prerequisites: JAPN 311 or its equivalent as determined by the instructor. Advanced study in modern spoken Japanese and Japanese communication.

350. Japanese Language, Culture, and Communication (3)

Study of Japanese language and culture through sociolinguistic perspectives. Exploration of the interrelationship between the language and culture by focusing on verbal and nonverbal communicative behaviors. Letter grade only (A-F).

370. Japanese Literature in English Translation (3)

Readings in translation of representative works of the major literary genres in Japan covering both the classical and modern period. Previous knowledge of the language is highly desirable, but not necessary. (Lecture-discussion 3 hours.)

421./521. Selected Readings/ Writing in Japanese (3)

Prerequisites: JAPN 302 or consent of instructor. Undergraduates register in JAPN 421; graduates register in JAPN 521. Lecture. Readings from a selection of contemporary written materials including literary works, poetry, magazines, newspapers, reports, instructional and technical explanatory materials. May be repeated to a total of 9 units with different topics.

422./522. Technical Japanese (3)

Prerequisites: JAPN 421 or equivalent. Undergraduates register in JAPN 422; graduates register in JAPN 522. Lecture. Development of receptive and productive skills using a variety of authentic materials drawn from business, humanities, sciences, and others. The course materials will be selected according to particular areas of students' interest. Letter grade only (A-F).

451./551. Japanese Civilization (3)

Prerequisites: JAPN 302 or equivalent. Undergraduates register in JAPN 451; graduates register in JAPN 551. Lecture. Introduction and exploration of characteristic features of Japanese civilization and culture through studying selected topics and themes in fields such as arts, humanities, sciences, and social sciences.

461./561. The Structure of the Japanese Language (3)

Prerequisites: JAPN 302 or equivalent. Undergraduates register in JAPN 461; graduates register in JAPN 561. Lecture. Introduction to phonology, morphology, syntax, semantics and discourse of modern Japanese. Letter grade only (A-F).

462./562. Contrastive Analysis of English and Japanese (3)

Prerequisites: JAPN 302 or equivalent. Undergraduates register in JAPN 462; graduates register in JAPN 562. Lecture. Contrastive analysis of phonological, morphological, syntactic and discourse aspects of English and Japanese. Letter grade only (A-F).

471. Readings in Modern and Contemporary Japanese Literature (3)

Prerequisites: JAPN 302 or equivalent. Readings of representative works of modern and contemporary Japanese literature including short stories, novellas, diaries, memoirs, poetry, and excerpts from novels and plays. (Lecture) Letter grade only (A-F).

481./581. Principles and Practice of Teaching Japanese (3)

Prerequisites: JAPN 302, 312, 350, and at least one 400 level course, or equivalents. The course will introduce Japanese language teaching and learning in the U.S., focusing on application of principles of second language acquisition and exploration of linguistic, pedagogical, sociocultural issues relevant to teaching Japanese. Letter grade only (A-F). Undergraduates register in JAPN 481; graduates register in JAPN 581.

490. Special Topics in Japanese (3)

Prerequisite : Consent of instructor. Select topics related to advanced Japanese study. May be repeated to a maximum of 6 units with different topics

492./592. Japanese Internship (3-6)

Prerequisites: Consent of instructor; completion of a minimum of 15 upper division units required for the major in Japanese. Undergraduates register in JAPN 492; graduates register in JAPN 592. Internship with community agencies, business firms, non-profit organizations, and government agencies which utilize communication skills in Japanese. Work done under joint direction of activity sponsor and faculty. Project report and internship conferences required. Credit/No Credit grading only.

497. Directed Studies (1-6)

Prerequisite: Consent of instructor. Independent study under supervision of a faculty member.

Graduate Level

521./421. Selected Readings/ Writing in Japanese (3)

Prerequisites: JAPN 302 or consent of instructor. Undergraduates register in JAPN 421; graduates register in JAPN 521. Lecture. Readings from a selection of contemporary written materials including literary works, poetry, magazines, newspapers, reports, instructional and technical explanatory materials. May be repeated to a total of 9 units with different topics .

522./422. Technical Japanese (3)

Prerequisites: JAPN 421 or equivalent. Undergraduates register in JAPN 422; graduates register in JAPN 522. Lecture. Development of receptive and productive skills using a variety of authentic materials drawn from business, humanities, sciences, and others. The course materials will be selected according to particular areas of students' interest. Letter grade only (A-F).

551./451. Japanese Civilization (3)

Prerequisites: JAPN 302 or equivalent. Undergraduates register in JAPN 451; graduates register in JAPN 551. Lecture. Introduction and exploration of characteristic features of Japanese civilization and culture through studying selected topics and themes in fields such as arts, humanities, sciences, and social sciences.

561./461. The Structure of the Japanese Language (3)

Prerequisites: JAPN 302 or equivalent. Undergraduates register in JAPN 461; graduates register in JAPN 561. Lecture. Introduction to phonology, morphology, syntax, semantics and discourse of modern Japanese.

562./462. Contrastive Analysis of English and Japanese (3)

Prerequisites: JAPN 302 or equivalent. Undergraduates register in JAPN 462; graduates register in JAPN 562. Lecture. Contrastive analysis of phonological, morphological, syntactic and discourse aspects of English and Japanese. Letter grade only (A-F).

581./481. Principles and Practice of Teaching Japanese (3)

Prerequisites: JAPN 302, 312, 350, and at least one 400 level course, or equivalents. The course will introduce Japanese language teaching and learning in the U.S., focusing on application of principles of second language acquisition and exploration of linguistic, pedagogical, sociocultural issues relevant to teaching Japanese. Letter grade only (A-F). Undergraduates register in JAPN 481; graduates register in JAPN 581.

592./492. Japanese Internship (3-6)

Prerequisites: Consent of instructor; completion of a minimum of 15 upper division units required for the major in Japanese. Undergraduates register in JAPN 492; graduates register in JAPN 592. Credit/No Credit grading only.

695. Directed Readings (1-3)

Prerequisites: Consent of Graduate Advisor. Readings in Japanese on an individual basis. Letter grade only (A-F).

697. Directed Research (1-3)

Prerequisites: Consent of Graduate Advisor. Research in Japanese on an individual basis. Letter grade only (A-F).

Korean (KOR)

Lower Division

101. Fundamentals of Korean (4)

Prerequisite/Corequisite: One GE Foundation course. Introduction to the writing system, pronunciation, vocabulary and grammar of the Korean language and Korean culture. Students with previous training or native speakers of Korean are not eligible for this course.

102. Fundamentals of Korean (4)

Prerequisite/Corequisite: One GE Foundation course. Completion of KOR 101 or competency equivalent to KOR 101. Introduction to the Korean grammar, reading, writing, and conversation and Korean culture. Students with previous training or native speakers of Korean are not eligible for this course.

BACCALAUREATE DEGREES AND OTHER UNDERGRADUATE PROGRAMS

Degrees

Baccalaureate degree programs are constructed of three inter-related areas: the breadth component, called the General Education Program, which provides the basis for the baccalaureate degree because it offers training in general skills, methodologies, and habits of thought; the depth component, or major, which establishes an understanding of the breadth of a body of knowledge, competence in the fundamental skills and methodologies of the discipline, and understanding and skill at an appropriate depth in one or more facets of the discipline; and the elective component that provides the possibility for personal enhancement and development that can complement the rest of the degree program.

California State University, Long Beach offers the following Baccalaureate Degree Programs:

Bachelor of Arts Degree in:

- American Studies
- Anthropology
- Art
- Asian Studies
- Asian American Studies
- Black Studies
- Business Economics
- Chemistry
- Chicano and Latino Studies
- Chinese Studies
- Classics
- Communicative Disorders
- Comparative World Literature
- Dance
- Economics
- English
- Environmental Science and Policy
- Family and Consumer Sciences
- Film and Electronic Arts
- French
- French Studies
- Geography
- German
- History
- Human Development
- Interdisciplinary Studies
- International Studies
- Italian Studies
- Japanese
- Journalism
- Kinesiology
- Liberal Studies
- Music

- Philosophy
- Physics
- Political Science
- Psychology
- Recreation
- Religious Studies
- Social Work
- Sociology
- Spanish
- Speech Communication
- Theatre Arts
- Translation and Interpretation Studies
- Women's Studies

Bachelor of Fine Arts Degree in:

- Art
- Dance

Bachelor of Music Degree

Bachelor of Science Degree in:

- Audiology
- Aerospace Engineering
- Biochemistry
- Biology
- Business Administration
- Chemical Engineering
- Chemistry
- Civil Engineering
- Computer Engineering
- Computer Science
- Construction Engineering Management
- Criminal Justice
- Dietetics and Food Administration
- Earth Science
- Electrical Engineering
- Electronics and Computer Engineering Technology
- Engineering
- Engineering Technology
- Environmental Science and Policy
- Geology
- Health Care Administration
- Health Science
- Industrial Design
- Interdisciplinary Studies
- Kinesiology
- Marine Biology
- Mathematics
- Mechanical Engineering

Microbiology
Nursing
Occupational Studies
Physics

Refer to specific departments in the section on Courses of Study for detailed descriptions of each program.

Double Major

You may complete two baccalaureate programs concurrently. Only one degree will be conferred and only one diploma issued. Therefore, you must designate which baccalaureate program is your primary major. Your degree will then take on the designation, i.e., Bachelor of Arts or Bachelor of Science, associated with that primary major. The fact that the requirements of two majors have been completed will be noted on both the diploma and the transcript. A course, or courses, may be used to satisfy the individual requirements of both majors, without limit, as long as the required pattern of coursework is completed for each major.

Additional Baccalaureate Degree

A graduated student who wishes to pursue an additional baccalaureate degree and maintain undergraduate status may do so by completing a minimum of 30 units in residence after graduation, of which 24 units must be upper-division courses and 12 units must be in the major. (See the catalog section on admissions for restrictions on the admission of candidates for a second baccalaureate degree.)

A senior, with advance approval of the Academic Appeals Committee, may earn a maximum of twelve units toward the additional degree while in residence for the first degree. Any courses to be applied to the additional degree must be specified and taken in addition to those needed to satisfy the requirements of the first degree.

Students applying for and accepted to a second baccalaureate degree program who have received their first baccalaureate degree or equivalent from an institution outside of the U.S. will be required to complete any deficiencies in the General Education pattern and will be evaluated for General Education on the same basis as undergraduates.

Certificate Programs

California State University, Long Beach offers 40 baccalaureate-level programs leading to the award of a Certificate. Certificate programs differ from baccalaureate majors and minors in their emphasis on practical and applied uses of knowledge in a specific area of human enterprise. Certificates may only be earned concurrently with or following the award of the baccalaureate degree. Certificate programs must require at least 18 units of course work, of which at least 15 units must be at the upper-division level. Many certificates require 24 to 27 units. Courses taken to fulfill the requirements for the baccalaureate may also be applied to certificate requirements. A maximum of two 500-level courses, taken by eligible students in their senior year, may be applied to a baccalaureate certificate program. Extension and/or transfer credit may comprise no more than one-fourth of the course work used to meet baccalaureate certificate requirements. A grade-point average of at least 2.0 must be maintained in the certificate program's course work.

If you wish to pursue a baccalaureate certificate program, you should review the course requirements given in the department course listings of this catalog. The department responsible for each certificate is shown in parentheses. You should notify the relevant department of your intention to pursue a certificate program as early as possible so as to receive early advisement on the program. Students wishing to receive a certificate must file a Request to Graduate form with enrollment Services.

Certificates

Administration of Campus Recreation and Student Service Programs (Recreation and Leisure Studies)
Administration of Outdoor Recreation Resources (Recreation and Leisure Studies)
Administration of Travel and Tourism (Recreation and Leisure Studies)
Administration of Volunteer Services (Recreation and Leisure Studies)
Aerospace Manufacturing (Aerospace Engineering)
American Indian Studies (American Indian Studies)
Asian American Studies (Asian and Asian American Studies)
Asian Studies (Asian and Asian American Studies)
Biomedical Art (Art)
Biotechnology (Biological Sciences)
Black Studies (Black Studies)
Cartography and Geographic Information Systems (Geography)
Child Development (Family and Consumer Sciences)
Community Physical Fitness (Kinesiology and Physical Education)
Energy Conversion and Power Systems Engineering (Electrical Engineering, Mechanical Engineering)
Environmental Studies (Environmental Studies)
Facilities Operations (Engineering Technology)
Foodservice Systems Administration (Family and Consumer Sciences)
Gerontology (Gerontology)
Heating, Ventilating, and Air-Conditioning Engineering (Mechanical Engineering)
Industrial Plastics Processing and Design (Mechanical and Aerospace Engineering)
Japanese (Asian and Asian American Studies)
Kinesiotherapy (Kinesiology and Physical Education)
Latin American Studies (Latin American Studies)
Legal Studies in the Liberal Arts (Legal Studies)
Medieval and Renaissance Studies (Comparative Literature and Classics)
Peace Studies (Peace Studies)
Pre-Athletic Training (Kinesiology and Physical Education)
Religious Studies (Religious Studies)
Russian and East European Studies (Russian and East European Studies)
Safety Operations (Engineering Technology)
Technical and Professional Communication (English)
Therapeutic Recreation (Recreation and Leisure Studies)

Transportation (Marketing)
Urban and Regional Studies (Geography)
Waste Engineering and Management (Civil Engineering)
Web and Technology Literacy (Computer Engineering and
Computer Science)
Wilderness Studies (Kinesiology and Physical Education)

Minors

A minor is a structured selection of courses by which a student can enrich his or her academic preparation through concentrated study of a discipline that is different from, but may be related to, or the student's declared major. A minor is a means to augment or complement the major by broadening the student's academic experience or serving as preparation for a specific career. A minor is not required for the baccalaureate; however, students may elect to complete a minor and have that fact noted on their records. Students should consult with an adviser in their major department for recommendations on suitable minor fields of study.

A minor consists of a minimum of 18 units, as specified by the department or program, at least nine of which must be upper-division. The minor may be in a single subject or interdisciplinary. Students may not declare or receive a minor in the same subject as the major, and the major and minor may not have the same title. The description of each minor shall have a statement listing all majors, if any, that may not be combined with that particular minor. The minimum overall GPA in courses toward the minor is 2.0. A minimum of six units of coursework toward the minor must be taken at CSULB.

Students should refer to the requirements of the department and college of their major, to see whether a minor is required for that major. Even if a minor is not required, students may elect to complete one or more minors from those available and have that so noted on their transcripts. Unlike certificates, minors are awarded only as part of a baccalaureate degree. Students may not finish a minor after they have graduated, except in conjunction with a second baccalaureate degree.

Minors

Credential Programs for Public School Service

Candidates for public school service credentials at the University are advised to familiarize themselves with the requirements for these programs. Descriptions of credential programs appear in a separate section of this *Catalog*. Specific information and applications to individual programs are available in program offices of the College of Education and departmental offices through which they are offered. Applications for student teaching and for field work in credential programs must be filed by October 1 for spring semester and March 1 for summer session and fall semester.

Declaration of a Major

To help insure timely completion of graduation requirements, students who have a total of 60 units completed and in progress must have declared a major before they may register for the next term. Upper division transfer students are required to declare their intended major on their application for admission.

Requirements for the Baccalaureate Degree

1. Completion of a minimum of 120 units for the Bachelor of Arts. Completion of the minimum number of units which could range from 120 to 140 required by the major program for the Bachelor of Science, Bachelor of Fine Arts, or Bachelor of Music degrees. See the description of the requirements for your major for the specific number of units required.
2. Completion of at least 40 upper-division units (courses numbered 300-499). No course taken at any community college may count toward fulfillment of these 40 units.
3. Completion of at least 30 units in residence at CSULB, of which at least 24 must be upper-division and at least 12 must be in the major. Units earned in Extended Education cannot be counted toward fulfillment of the residence requirement.
4. Completion of the General Education program, as described in a separate section of this *Catalog*, including at least 9 units in upper-division courses completed at CSULB.
5. For students who entered with less than 56 units, completion of University 100.
6. Completion of the specific course and unit requirements for your academic major, as shown in the alphabetic listing for the major department. If the requirements are changed during your continuous attendance at CSULB, you have the right to meet either the requirements in effect when you entered the major or the requirements in effect at the time you graduate.
Effective 1996, all upper-division courses required for a major must be completed within the ten-year period preceding award of the baccalaureate degree. Courses completed prior to this ten-year period can be revalidated by such demonstrations of competence or knowledge of the subject as may be prescribed by the department offering the course.
7. Satisfactory performance on the Writing Proficiency Examination (see the Admissions section and later in this section of the *Catalog*).
8. Achievement of a minimum 2.0 ("C") grade-point average in each of the following:

- A. The entire college record.
- B. All units attempted at CSULB.
- C. All courses in the major.
- D. All upper-division courses in the major completed at CSULB.

9. Formal approval by the faculty of the university.

Procedural Information

- Request to graduate — You must file a Request to Graduate form with the Office of Enrollment Services prior to the announced deadline, which will be at least one semester prior to the expected graduation date.
- If you change your degree or major or expected graduation date, you must file a new request to graduate, and will be subject to a re-filing fee.
- If you have received an Incomplete grade, you must complete the course prior to the expected graduation date, or no later than the deadline for completion of the course which is normally within one calendar year immediately following the end of the term during which it was assigned, whether or not the student maintained continuous enrollment, whichever comes first. Any Incomplete remaining on your record as of the graduation date will be counted as if it were an "F," with units attempted but no grade points earned, unless the instructor has specified on the Incomplete form that some other grade be recorded. You cannot make up an Incomplete after you have graduated.

Systemwide Tests Required of Most New Students

The CSU requires new students to be tested in English and mathematics as soon as possible after they are admitted and before enrollment. These are not admission tests, but a way to determine whether students are prepared for college work and, if not, to advise students how to strengthen preparation. Students might be exempted from one or both of the tests if they have scored well on other specified tests or have successfully completed appropriate coursework.

English Placement Test (EPT)

The CSU English Placement Test must be completed by all non-exempt undergraduates prior to placement in appropriate university English coursework. Exemptions from the test are given only to those who present proof of one of the following:

- a score of 550 or above on the Verbal section of the College Board SAT I* Reasoning Test taken on or after April 1, 1995;
- a score of 470 or above on the Verbal section of the College Board SAT I* Reasoning Test taken between March 1994 and March 1995. A score of 470 or above on the Verbal section of the College Board Scholastic Aptitude Test (SAT) taken prior to March 1994;
- a score of 24 or above on the enhanced ACT English Test taken October 1989 or later;
- a score of 22 or above on the American College Testing (ACT) English Usage Test taken prior to October 1989;
- a score of 680 or above on the re-centered and adjusted College Board SAT II: Writing Test taken May, 1998 or after;

- a score of 660 or above on the College Board SAT II* in English Composition with essay taken prior to January 1994;
- a score of 3, 4, or 5 on either the Language and Composition or the Composition and Literature examination of the College Board Scholastic Advanced Placement Program;
- a score on the CSU English Equivalency Examination that qualifies the student for "Pass for Credit" or "Exemption;"
- Completion and transfer of a course that satisfies the General Education-Breadth or Intersegmental General Education Transfer Curriculum (IGETC) written communication requirement, provided such course was completed with a grade of "C" or better.

To file for one of the above exemptions, you may obtain an Exemption Form from the Office of Testing and Evaluation Services (562) 985-4007 or from the Testing Office website at www.csulb.edu/centers/testing.

*NOTE: The College Board SAT and Achievement Tests were replaced by SAT I and SAT II, respectively, beginning March 1994. Since April 1, 1995, the SAT I and SAT II exams have been scored on a new scale.

Entry-Level Mathematics (ELM) Exam

The ELM examination tests for entry-level mathematics skills acquired through three years of rigorous college preparatory mathematics coursework (normally Algebra I, Algebra II, and Geometry). All undergraduate students must take the test or be exempted from it prior to enrollment in classes. Specific policies regarding retesting and placement will be determined by the campus. Exemptions from the test are given only to those students who can present proof of one of the following:

- a score of 550 or above on the mathematics section of the College Board SAT I Reasoning Test or on the College Board SAT II Mathematics Tests Level I, IC (Calculator), II, or IIC (Calculator);
- a score of 23 or above on the American College Testing Mathematics Test;
- a score of 3 or above on the College Board Advanced Placement calculus examination (AB or BC);
- a score of 3 or above on the College Board Advanced Placement Statistics examination;
- Completion and transfer of a course that satisfies the General Education-Breadth or Intersegmental General Education Transfer Curriculum (IGETC) quantitative reasoning requirement, provided such course was completed with a grade of "C" or better.

These EPT and/or ELM should be taken at the next opportunity after admission or as soon as possible thereafter. Information bulletins and registration materials for the EPT and ELM will be mailed to all students subject to the requirements. Required exams will be indicated in the Letter of Admission. Registration materials may be obtained from the Office of Enrollment Services or Testing and Evaluation Services.

Writing Proficiency Examination

All candidates for degrees and certificates must demonstrate competency in writing skills as a requirement for graduation. Every student under the 1977-78 or subsequent catalog must pass the Writing Proficiency Examination (WPE) to be certified proficient in written composition in English. Students under catalog regulations earlier than 1977-78 are exempt

from this requirement if they have maintained continuous attendance.

The Writing Proficiency Examination is a junior-year requirement. The test must be taken by the end of the semester in which an undergraduate student earns 65 or more units. Transfer students with 65 or more units must take the WPE within the first semester of residency at CSULB.

Undergraduate students who do not attempt the test by the time they attain 65 units will have a registration hold placed on their accounts. Registration for the test does not by itself release this hold. The registration hold may not be released until two weeks after the test date. A request for deferment, for compelling reasons, can be filed at the Office of Testing and Evaluation Services, Brotman Hall (BH) - 216, (562) 985-4007. In certain circumstances, an appeal can be submitted to release a registration hold temporarily. Students must attempt the WPE prior to filing a Request to Graduate.

The responsibility for acquiring the skills necessary to pass the examination is the student's. Regular courses to improve writing skills are available in the University or through University College and Extension Services. Please see WPE Preparation and Review, in the section of the catalog called "Undergraduate Programs." Counseling and other assistance are available through the Learning Assistance Center, Academic Services, room 12.

The examination may be retaken as many times as necessary. However, students who have failed the WPE twice must meet with a WPE Advisor, in the Learning Assistance Center, and show evidence that they have followed advisor recommendations regarding coursework, tutoring, or other assistance in developing the requisite skills before they will be allowed to register for a third attempt. Two 3-hour workshops are offered prior to each test administration. Information regarding the administration of this examination may be obtained from the Office of Testing and Evaluation Services, BH-216, (562) 985-4007 or from the Testing Office website at www.csulb.edu/centers/testing. To cover the costs of administration and scoring, a fee is charged each time the examination is taken.

Preparation for Writing Proficiency Examination

The University offers instruction for students who have experienced difficulty passing the Writing Proficiency Examination or with certain courses which require intensive writing as a part of the course requirements.

WPE 10. Preparation for the WPE (1)

Non-baccalaureate-level course designed to prepare students for the Writing Proficiency Examination (WPE) for which a passing score is 11. Recommended for students who have not yet attempted the WPE or who have previously failed the test with a score of 8 or below. Credit/No Credit grading only. Course is repeatable until the WPE is successfully passed. (Activity)

WPE 20. Preparation for the WPE (1)

Non-baccalaureate-level course designed to prepare students for the Writing Proficiency Examination (WPE) for which a passing score is 11. Recommended for students who have previously failed the WPE with a score of 9 or 10. Credit/No Credit grading only. Course is repeatable until the WPE is successfully passed. (Activity)

ENGL 301E. English Proficiency (3)

Prerequisite: ENGL 100 or equivalent. An intermediate course in English usage with emphasis on building proficiency in oral and written language. Enrollment limited to students needing language development beyond skills acquired in ENGL 100, as assessed by scores on the Writing Proficiency Exam. Course may be repeated to a maximum of 6 units. Letter grade only (A-F).

Educational Opportunity Program (EOP)

The Educational Opportunity Program assists historically low income, first generation college students seeking a four-year college degree. Applicants are guided through the admissions and financial aid process during the application cycle and if admitted, are provided registration assistance, orientation to the college environment, academic and personal support, study skills instruction, tutoring and career advisement to insure the maximum opportunity for success at the University. Students must be admitted to EOP during their initial application to the University. All first-time freshmen EOP participants are required to enroll in EOP 100 during their first semester of enrollment.

EOP 100. EOP Orientation (2)

An introduction and orientation to college life for EOP students. A review of campus and community resources available to support students participating in the Educational Opportunity Program. Instruction in various academic survival skills that are necessary for college success. Areas of review include: time management, research methodology and term paper development, test-taking strategies, and decision-making. Letter grade only (A-F).

Special Course Requirement

University (UNIV) 100. The University and Your Future (1)

All undergraduate students who enter this university with fewer than 56 transferable semester units shall complete a one-unit (15 hour) course which includes instruction in the History and Mission of the University, Credit/No Credit grading only.

University 100 includes an introduction to university traditions; to current issues in higher education (e.g., the role of general education, global interconnectedness, ethics); to academic freedom, tenure, and students' rights and responsibilities; and to services available at the university throughout the student's academic career (e.g., Career Development Center, Learning Assistance Center). It also includes a component on the use of the University Library and campus information technologies.

University 100 is offered both in the week before classes begin and during the first five weeks of the semester. Please consult the Schedule of Classes under "University 100" for information on course offerings.

Students who do not complete the requirement within their first two semesters of enrollment on campus may be disenrolled from the university before their third regular semester.

University Courses (UNIV)

UNIV 300I. Odyssey (3) F

Prerequisites: General Education A requirements in composition, speech, and critical thinking. Upper-division status. Drawing upon departments from across the University, this course will investigate topics of great importance to our lives. The topics, or themes, will vary year by year. Students will learn how the methodologies of different disciplines approach a common problem. May be repeated to a maximum of 6 units.

UNIV 301I. Odyssey (3) S

Prerequisites: General Education A requirements in composition, speech, and critical thinking. Upper-division status. Drawing upon departments from across the University, this course will investigate topics of great importance to our lives. The topics, or themes, will vary year by year. Students will learn how the methodologies of different disciplines approach a common problem. May be repeated to a maximum of 6 units.

UNIV 400. The University in Your Future Student Leadership (1)

Prerequisites: Selected by University 100 Director. Students assist University 100 faculty in presentation of course. May be repeated to a maximum of 3 units. Credit/No Credit grading only.

View the CSU, Long Beach *Catalog* on-line at www.csulb.edu by clicking on "Academics" and then "CSULB Catalog."

The Biological Sciences include all of the areas of scientific endeavor centered around the general question of the nature of life. Such diverse areas as biochemistry, ecology, paleontology, and animal behavior are all part of the biological sciences. On this campus the biological sciences are distributed among three separate Departments in the College of Natural Sciences and Mathematics. The discipline of biochemistry is located in Chemistry and Biochemistry and the disciplines of invertebrate and plant paleontology are located in Geological Sciences. For information about the programs in these disciplines, consult the appropriate section of this *Catalog*. The remaining disciplines of the biological sciences represented in the College of Natural Sciences and Mathematics are located in the Department of Biological Sciences, which offers five degrees: a Bachelor of Science in Biology, a Bachelor of Science in Marine Biology, a Bachelor of Science in Microbiology, a Master of Science in Biology, and a Master of Science in Microbiology. The B.S. in Biology has, in addition to a general option, six specialized options in Biology Education, Botany, Cell and Molecular Biology, Ecology, Physiology, and Zoology. See below for the specific requirements for each of these degrees and options.

The Department occupies facilities in five science buildings. Courses and student research in organismal biology and ecology are enhanced by a marine biology laboratory with an extensive seawater system, greenhouses, and research and teaching collections of algae, vascular plants, invertebrates (including insects), and vertebrates. Because the campus is near the ocean, mountains, and deserts, the Department is able to offer a number of field and laboratory courses in botany, ecology, entomology, marine biology, and vertebrate zoology. Courses and student research opportunities are available in biotechnology, experimental biology, and clinical laboratory science (medical technology). State-of-the-art facilities are available for graduate and undergraduate research in the W. M. Keck Cellular and Molecular Biology Laboratory and electron microscope facility.

The Department of Biological Sciences also participates in the Desert Studies Consortium and the Ocean Studies Institute. Information on the latter program is listed in this *Catalog* under Ocean Studies Institute.

The Richard B. Loomis Research Award

This annual departmental award provides supply and travel support for thesis research projects. Graduate students submit research proposals to the Department's Graduate Studies Committee, which grants funding to the more meritorious proposals.

Linda Warren Graham Medical Technology Scholarship

The Linda Warren Graham Medical Technology Scholarship is available to senior microbiology majors who have been accepted into a Clinical Laboratory Scientist (or a Medical Technology) Internship program. Scholarship applications can be obtained from the Biological Sciences Department Office during the month of March prior to graduation.

Financial Support, Assistantships

The Department of Biological Sciences offers to graduate students a limited number of teaching associate and graduate assistant appointments. Forms requesting consideration for these appointments are available in the Department Graduate Office. Duties consist of approximately 20 hours per week devoted to preparation and/or instruction in general undergraduate laboratory classes. These appointments are limited to a maximum of six semesters per individual.

The Department also has a limited number of technical assistant positions as well as some hourly employment. Several members of the faculty have grants that provide for research assistantships. A number of scholarships are available through the University.

Graduate and Health Professional Preparation

In addition to preparing students for careers in teaching, industry, and government, the undergraduate programs in this Department provide preparation for advanced study at the graduate level and for entry into various health professional schools. Students should consider the degree requirements listed in the *Catalog* as minimal; some graduate schools, professional schools, or careers may require additional coursework in mathematics, physics, chemistry, or biological sciences.

Students desiring entrance into a graduate school to obtain a master's or doctoral degree in some area of the biological sciences should determine the entrance requirements for the school(s) of interest early in their undergraduate years. Specifically, students contemplating graduate work in mathematically oriented areas of the biological sciences should consider taking more calculus (MATH 122, 123, 224, and 364A or 370A will substitute for MATH 119A and 119B) and those contemplating graduate work in chemically oriented areas should consider taking additional chemistry (CHEM 251; 320A,B; 377A,B; 441A,B).

Students desiring entrance into one of the various health-related professional schools including chiropractic, dentistry, medicine, optometry, osteopathy, pharmacy, podiatry, and veterinary, or to a graduate program in physical therapy, should consult with the Health Professions Advising

Office in the College of Natural Sciences and Mathematics (FO5-109) for more information. Most of these schools do not require students to major in any particular discipline and many do not even require a bachelor's degree; rather, they want students who have done well in their major and who also took the prerequisite courses required by that particular school.

Facilitated Enrollment into Classes

All entering students who declare a major in a degree program offered by this Department should participate in the College of Natural Sciences and Mathematics' Science Safari to Success (for first time freshmen) or EONS (Enrollment and Orientation in the Natural Sciences and Mathematics for transfer students) Program. These programs are held in June-July for those starting in the Fall Semester and in January for those starting in the Spring Semester. Department advisors will be available to provide an overview of the students' chosen baccalaureate degree program, to assist with academic advisement, to provide information on the many career opportunities available, and to aid students in enrolling in classes. Contact the Student Access to Sciences and Mathematics Center (FO5-109) or Department Office for additional information.

Bachelor of Science in Biology

This degree includes a general option in biology and six additional options for those desiring a more specialized program.

Biology (code BIOLBS01) (120 units)

This degree major is designed for students pursuing careers that involve the study of life; it is especially appropriate for those contemplating graduate work in the biological sciences. This option gives the student a broad background involving coursework in most of the major areas of biology, without requiring specialization in any one particular field. Students in this option have more elective courses in their major than in the other, more specialized, options, which enables them to partially concentrate their studies in a particular area if they so choose. This option requires approximately 79-81 units in the major, of which 37-39 are in lower division and 42 are in upper division.

Lower Division: BIOL 211A,B, 260; CHEM 111A,B; MATH 119A or 122, 119B or 123; PHYS 100A, 100B.

Upper Division: CHEM 320A,B; at least 34 units in biological science including BIOL 340, 345, 345L, 350, 370; one of BIOL 313, 316, 324; one of BIOL 427, 439; and 12 additional units selected from upper division courses in the Department of Biological Sciences. At least two of the courses selected to fulfill these additional units must have numbers between 410-499. Either CHEM 441A,B or 448 will count but BIOL 303, 304, 306, 309I, 401; MICR 300I, 303; NSCI 492 will not count toward these additional 12 units. Up to 6 of these additional units may be substituted from courses in other departments in the College of Natural Sciences and Mathematics upon approval by the undergraduate advisor. Students contemplating graduate work should consider taking 1-3 units of BIOL 496.

CSULB requires a "C" average in all upper division courses in the major taken at CSULB. For students who do not meet this requirement, the Department of Biological Sciences will allow graduation if they earn at least a "C" the last time they complete each upper division course in their major at CSULB.

FOUR-YEAR PLAN TO COMPLETE THE B.S. IN BIOLOGY (BIOLBS01)

120 Units required Department of Biological Sciences

^a Upper Division Major Electives – 12 units. Select from upper division courses in biological science other than those listed below. CHEM 441A,B or 448 may be used toward this requirement. At least two courses must be from the BIOL 400-499 series. The following courses may not be used to meet this requirement: BIOL 303, BIOL 304, BIOL 306, BIOL 309I, BIOL 401, MICR 300I, NSCI 492

Option in Biology Education (code BIOLBS02) (120 units)

This option is designed solely for students pursuing the Single Subject Teaching Credential in Science, Biological Sciences Concentration. Although designed to provide the required coursework in science to enter this credential program, students should keep themselves informed about any changes in the credential by referring to the section in this Catalog under Single Subject Teacher Education Program and contacting the Science Education Department. This option requires approximately 77-87 units in the major, of which 48-50 are in lower division and 29-37 are in upper division.

Lower Division: ASTR 100; BIOL 211A, B, 260; CHEM 111A, B; GEOL 102, 104, 160; MATH 119A or 122; MICR 200 or 211; and PHYS 100A,B.

Upper Division: CHEM 327 or both 320A and B; and eight additional courses totaling 26-29 units in the biological sciences including BIOL 312, 340, 345, 350, 370; one of these three plant biology courses: BIOL 328, 439, 447; one of these three animal biology courses: BIOL 313, 324, 332. The remaining biological sciences course should be chosen in consultation with an advisor; BIOL 495/MICR 495 is highly recommended. Either CHEM 441A, B or 448 will count but BIOL 303, 305, 306, 308I, 401; MICR 300I, 303; NSCI 492 will not count toward these two additional required courses.

Although SCED 403, 404, EDSS 300C, and MICR 300I are not required in the major, the credential does require these courses. Students may want to take some or all of them prior to graduation.

CSULB requires a "C" average in all upper division courses in the major taken at CSULB. For students who do not meet this requirement, the Department of Biological Sciences will allow graduation if they earn at least a "C" the last time they complete each upper division course in their major at CSULB.

^a Students may complete either CHEM 327 or both CHEM 32A and 320B.

^b Upper Division Major Elective: Selected in consultation with a faculty advisor. CHEM 441A, B or 448 will count toward this requirement. BIOL 303, BIOL 304, BIOL 306, BIOL 309I, BIOL 401, MICR 300I, and NSCI 492 will not count toward this requirement.

Note: Students may wish to take SCED 403, EDSS 300C, and MICR 300I, prior to graduation. These courses are required for the credential but not for the major. Please see the Biology Undergraduate Advisor or Department of Science Education for current information on credential requirements.

Option in Botany (code BIOLBS03) (120 units)

This option is designed primarily for those interested in careers involving the biology of plants and is particularly appropriate for those contemplating graduate work in this field. This option requires approximately 78-80 units in the major, of which 37-39 are in lower division and 41 are in upper division.

Lower Division: BIOL 211A,B, 260; CHEM 111A,B; MATH 119A or 122, 119B or 123; PHYS 100A,B.

Upper Division: 41 units including CHEM 320A,B; BIOL 340, 350, 370, 427, 439, 447, 450. Remaining 9 units selected in consultation with appropriate faculty advisor. CHEM 441A,B or 448 will count but BIOL 303, 304, 306, 309I, 401; MICR 300I, 303; NSCI 492 will not count toward these nine units. Students contemplating graduate work should consider taking 1-3 units of BIOL 496.

CSULB requires a "C" average in all upper division courses in the major taken at CSULB. For students who do not meet this requirement, the Department of Biological Sciences will allow graduation if they earn at least a "C" the last time they complete each upper division course in their major at CSULB.

		Upper Div Major Elective ^a	3
Total units	9 or 10	Total units	8

^aUpper Division Major electives may be chosen from any upper division courses in the department other than BIOL 303, 304, 306, 309I, 401; MICR 300I; or NSCI 492.

Option in Cell and Molecular Biology (code BIOLBS04) (121 units)

This option is designed primarily for those interested in careers that involve biology at the cell and molecular levels and is particularly appropriate for those contemplating graduate work in these fields. This option requires 81-84 units in the major, of which 42-44 are in lower division and 39-40 are in upper division. Students in this option might also want to pursue the Certificate in Biotechnology described elsewhere in this catalog.

Lower Division: BIOL 211A,B, 260; CHEM 111A,B; MATH 119A or 122, 119B or 123; MICR 211; PHYS 100A,B.

Upper Division: CHEM 320A,B, 441A,B; BIOL 340, 340L, 350, 370, 433; three courses selected from BIOL 440, 443, 445, 447, 464, 465 or 467, 473, 477, CHEM 547, MICR 430, 452. Students who contemplate graduate work are strongly encouraged to take, in addition, at least 2 units of BIOL 496.

CSULB requires a "C" average in all upper division courses in the major taken at CSULB. For students who do not meet this requirement, the Department of Biological Sciences will allow graduation if they earn at least a "C" the last time they complete each upper division course in their major at CSULB.

FAQ Concerning Road Maps for Completion of Undergraduate Degrees

For each undergraduate major, the on-line Catalog shows plans for scheduling all required courses to complete the degree in four, five, or six years.

While CSULB will make every effort to schedule classes at the times shown in the plans, we cannot guarantee that courses will be available in specific semesters. It is possible that shortage or budget or of personnel will make it impossible to offer as many classes as we would wish.

The plans are not substitutes for working with an advisor. You are strongly encouraged to see an advisor when planning your program each term.

I am a freshman. Do I have to choose now whether to follow the four, five, or six-year plan?

No. Most freshmen take 12-15 units. You need at least 12 units to receive full financial aid. With experience, you will be able to judge how heavy a load you find comfortable. This will depend on your outside obligations, such as a job, and on your personal circumstances. In theory, each unit requires three hours a week, including preparing for class, attending class, and completing assignments. Use these guidelines to budget your time and plan an appropriate schedule.

Must I take the courses in the semesters shown on the plan?

The plan shows one possible way of completing all requirements for the degree. Consult your advisor about whether it is essential to take a given course in the semester shown. There are some rules to keep in mind:

1) You can take the General Education Foundation courses (Composition, Oral Communication, Critical Thinking, Mathematics) in any semester in the first 36 units of baccalaureate-level course work completed at CSULB.

2) You cannot take upper division courses until you have completed at least 30 units. (Exceptions can be made for students who already have completed advanced study in the subject.) You cannot take General Education Capstone courses until you have completed at least 60 units.

3) For some majors it is essential to complete courses in the correct sequence. You cannot take a more advanced course until you have completed the prerequisite course(s).

4) You must complete all requirements for admission to impacted majors within the first 60 units.

I have been told that I must take one or more pre-baccalaureate courses. How can I plan my program?

Your advisor at SOAR can help you identify which courses must be postponed. You must still complete the minimum number of baccalaureate units required for the degree.

You may be able to catch up by taking additional courses in later semesters or by taking classes in summer or winter session, or you may choose to spend an additional semester completing the program. You cannot begin the sequence of required courses for some majors until you are ready for baccalaureate-level Mathematics. See your major advisor to develop a plan for scheduling the required courses.

I didn't complete the exact list of courses shown. Can I still graduate on time?

The answer depends on your major and on what courses you have completed. The plans are not rigid requirements; they are only intended to provide guidance in planning a program. There are many reasons for students to follow a different pattern, such as changing the major, choosing to take fewer classes in a given semester, choosing to complete a minor or a second major. See your advisor for help in planning a program that will work for you.

If I follow the plan, will I have all requirements for graduation completed?

The plans include the specific courses required for the major. For some majors, there are restrictions on the choice of major electives. It is important that you select General Education courses to meet the required distribution pattern. You may need to take an additional General Education course to complete the minimum number of units required for each category. This is likely to happen if you took three-unit courses in Category B, Physical Universe.

Option in Ecology (code BIOLBS05) (123 units)

This option is designed for students interested in careers involving the study of organisms in relation to their environment, either in private industry or government service, as well as those students contemplating graduate work in this field. This option requires approximately 83-92 units in the major, of which 41-43 are in lower division and 42-49 are in upper division.

Lower Division: BIOL 211A,B, 260; CHEM 111A,B; GEOL 102, 104 or 105; MATH 119A or 122, 119B or 123; PHYS 100A,B.

Upper Division: CHEM 320A,B or both CHEM 327 and 448; BIOL 312, 340, 345, 345L, 350, 370, 427; one of BIOL 313, 316 or 324; four additional courses including one of these 9 in organic diversity: BIOL 313, 316, 324, 419, 421, 423, 424, 425, 439; one of these 10 in ecology and environmental science: BIOL 414, 450, 451, 453, 454A, 454B, 455, 457, 458, 464; one of these four in quantitative biology: BIOL 456, 463, 465, 467; and another course from any of the preceding three lists or BIOL 351, 353, 452, 459, GEOG 440, 473, 481, GEOL 339. With consent of the appropriate faculty advisor, three units of BIOL 496 is acceptable as this fourth additional course.

Few, if any, health-related professional schools (e.g. veterinary medicine) will accept CHEM 327 instead of both 320A and 320B. Some graduate programs with masters or doctorates in biology and/or ecology may also not accept CHEM 327 instead of both 320A and 320B. CHEM 327 is not acceptable as a prerequisite for CHEM 441A. CHEM 327 is acceptable toward the Minor in Chemistry.

CSULB requires a "C" average in all upper division courses in the major taken at CSULB. For students who do not meet this requirement, the Department of Biological Sciences will allow graduation if they earn at least a "C" the last time they complete each upper division course in their major at CSULB.

^a Upper Division Major Elective: Complete one of the following courses: BIOL 353 (3), BIOL 452 (3), BIOL 459 (3), GEOG 440 (3), GEOG 473 (4), GEOG 481 (4), GEOL 339 (3), or an additional course listed in the Organic Diversity, Ecology and Environmental Science, or Quantitative Biology groups.

Option in Physiology (code BIOLBS06) (120 units)

This option is designed primarily for those interested in careers involving the study of function in animals, especially humans, and is particularly appropriate for those contemplating graduate work in this field or entering one of the health professions, such as medicine and physical therapy. This option requires approximately 77-81 units in the major, of which 37-39 are in lower division and 40-42 are in upper division.

Lower Division: BIOL 211A, B, 260; CHEM 111A, B; MATH 119A or 122, 119B or 123; PHYS 100A,B.

Upper Division: CHEM 320A,B, 441A,B; BIOL 340, 350, 370, one course in morphology and development from BIOL 332 or 433; either BIOL 345 and 345L or 341 or 342 and 342L, nine additional units selected from BIOL 342, 342L, 345, 345L, 441, 442, 443, 445, 446, 448, 473, MICR 423, 430. Students contemplating graduate school should consider taking an additional 1-3 units of BIOL 496.

CSULB requires a "C" average in all upper division courses in the major taken at CSULB. For students who do not meet this requirement, the Department of Biological Sciences will allow graduation if they earn at least a "C" the last time they complete each upper division course in their major at CSULB.

FAQ Concerning Road Maps for Completion of Undergraduate Degrees

For each undergraduate major, the on-line Catalog shows plans for scheduling all required courses to complete the degree in four, five, or six years.

While CSULB will make every effort to schedule classes at the times shown in the plans, we cannot guarantee that courses will be available in specific semesters. It is possible that shortage or budget or of personnel will make it impossible to offer as many classes as we would wish.

The plans are not substitutes for working with an advisor. You are strongly encouraged to see an advisor when planning your program each term.

I am a freshman. Do I have to choose now whether to follow the four, five, or six-year plan?

No. Most freshmen take 12-15 units. You need at least 12 units to receive full financial aid. With experience, you will be able to judge how heavy a load you find comfortable. This will depend on your outside obligations, such as a job, and on your personal circumstances. In theory, each unit requires three hours a week, including preparing for class, attending class, and completing assignments. Use these guidelines to budget your time and plan an appropriate schedule.

Must I take the courses in the semesters shown on the plan?

The plan shows one possible way of completing all requirements for the degree. Consult your advisor about whether it is essential to take a given course in the semester shown. There are some rules to keep in mind:

- 1) You can take the General Education Foundation courses (Composition, Oral Communication, Critical Thinking, Mathematics) in any semester in the first 36 units of baccalaureate-level course work completed at CSULB.
- 2) You cannot take upper division courses until you have completed at least 30 units. (Exceptions can be made for students who already have completed advanced study in the subject.) You cannot take General Education Capstone courses until you have completed at least 60 units.
- 3) For some majors it is essential to complete courses in the correct sequence. You cannot take a more advanced course until you have completed the prerequisite course(s).
- 4) You must complete all requirements for admission to impacted majors within the first 60 units.

I have been told that I must take one or more pre-baccalaureate courses. How can I plan my program?

Your advisor at SOAR can help you identify which courses must be postponed. You must still complete the minimum number of baccalaureate units required for the degree.

You may be able to catch up by taking additional courses in later semesters or by taking classes in summer or winter session, or you may choose to spend an additional semester completing the program. You cannot begin the sequence of required courses for some majors until you are ready for baccalaureate-level Mathematics. See your major advisor to develop a plan for scheduling the required courses.

I didn't complete the exact list of courses shown. Can I still graduate on time?

The answer depends on your major and on what courses you have completed. The plans are not rigid requirements; they are only intended to provide guidance in planning a program. There are many reasons for students to follow a different pattern, such as changing the major, choosing to take fewer classes in a given semester, choosing to complete a minor or a second major. See your advisor for help in planning a program that will work for you.

If I follow the plan, will I have all requirements for graduation completed?

The plans include the specific courses required for the major. For some majors, there are restrictions on the choice of major electives. It is important that you select General Education courses to meet the required distribution pattern. You may need to take an additional General Education course to complete the minimum number of units required for each category. This is likely to happen if you took three-unit courses in Category B, Physical Universe.

Option in Zoology (code BIOLBS07) (123 units)

This option is designed primarily for those interested in careers that involve the biology of animals and is particularly appropriate for those contemplating graduate work in this field. This option requires approximately 83-86 units in the major, of which 41-44 are in lower division and 42 are in upper division.

Lower Division: BIOL 211A,B, 260; CHEM 111A,B; GEOL 102 and 104 or 105, or MICR 211; MATH 119A or 122, 119B or 123; PHYS 100A,B.

Upper Division: CHEM 320A,B; BIOL 312, 340, 345, 345L, 350, 370, 313 or 316, 324 or 332; at least one course selected from BIOL 419, 421, 423, 424; and at least two additional courses in biological science totaling at least six units chosen in consultation with a faculty advisor. Either CHEM 441A,B or 448 will count but BIOL 303, 304, 306, 309I, 401; MICR 300I, 303; NSCI 492 will not count toward these six units. Students contemplating graduate work should consider taking 1-3 units of BIOL 496.

CSULB requires a "C" average in all upper division courses in the major taken at CSULB. For students who do not meet this requirement, the Department of Biological Sciences will allow graduation if they earn at least a "C" the last time they complete each upper division course in their major at CSULB.

**FAQ Concerning Road Maps for
Completion of Undergraduate Degrees**

For each undergraduate major, the on-line Catalog shows plans for scheduling all required courses to complete the degree in four, five, or six years.

While CSULB will make every effort to schedule classes at the times shown in the plans, we cannot guarantee that courses will be available in specific semesters. It is possible that shortage or budget or of personnel will make it impossible to offer as many classes as we would wish.

The plans are not substitutes for working with an advisor. You are strongly encouraged to see an advisor when planning your program each term.

I am a freshman. Do I have to choose now whether to follow the four, five, or six-year plan?

No. Most freshmen take 12-15 units. You need at least 12 units to receive full financial aid. With experience, you will be able to judge how heavy a load you find comfortable. This will depend on your outside obligations, such as a job, and on your personal circumstances. In theory, each unit requires three hours a week, including preparing for class, attending class, and completing assignments. Use these guidelines to budget your time and plan an appropriate schedule.

Must I take the courses in the semesters shown on the plan?

The plan shows one possible way of completing all requirements for the degree. Consult your advisor about whether it is essential to take a given course in the semester shown. There are some rules to keep in mind:

1) You can take the General Education Foundation courses (Composition, Oral Communication, Critical Thinking, Mathematics) in any semester in the first 36 units of baccalaureate-level course work completed at CSULB.

2) You cannot take upper division courses until you have completed at least 30 units. (Exceptions can be made for students who already have completed advanced study in the subject.) You cannot take General Education Capstone courses until you have completed at least 60 units.

3) For some majors it is essential to complete courses in the correct sequence. You cannot take a more advanced course until you have completed the prerequisite course(s).

4) You must complete all requirements for admission to impacted majors within the first 60 units.

I have been told that I must take one or more pre-baccalaureate courses. How can I plan my program?

Your advisor at SOAR can help you identify which courses must be postponed. You must still complete the minimum number of baccalaureate units required for the degree.

You may be able to catch up by taking additional courses in later semesters or by taking classes in summer or winter session, or you may choose to spend an additional semester completing the program. You cannot begin the sequence of required courses for some majors until you are ready for baccalaureate-level Mathematics. See your major advisor to develop a plan for scheduling the required courses.

I didn't complete the exact list of courses shown. Can I still graduate on time?

The answer depends on your major and on what courses you have completed. The plans are not rigid requirements; they are only intended to provide guidance in planning a program. There are many reasons for students to follow a different pattern, such as changing the major, choosing to take fewer classes in a given semester, choosing to complete a minor or a second major. See your advisor for help in planning a program that will work for you.

If I follow the plan, will I have all requirements for graduation completed?

The plans include the specific courses required for the major. For some majors, there are restrictions on the choice of major electives. It is important that you select General Education courses to meet the required distribution pattern. You may need to take an additional General Education course to complete the minimum number of units required for each category. This is likely to happen if you took three-unit courses in Category B, Physical Universe.

Bachelor of Science in Marine Biology (code BIOLBS08) (122 units)

Rocky shores, sandy beaches, tidal wetlands, kelp forests, and the open ocean coupled with the anthropogenic activities of a major urban area provide the seascape for our Bachelor of Science in Marine Biology. This degree is designed for students seeking positions in private industry and governmental agencies and is also appropriate for those considering graduate work in marine biology and ecology. The program takes ready advantage of the region's diverse habitats with a strong field orientation, supported by the R.V. Yellowfin, an 80' teaching and research vessel. Coincidental with this, environmental problems in the Southern California Bight provide another area for student interests.

This degree program requires approximately 82-93 units in the major, of which 40-42 are in lower division and 42-51 are in upper division. The number of units and particular blend of science and mathematics makes this a very challenging learning experience. However, the depth and strength of this degree provides a strong and flexible base to pursue a variety of careers. Obtaining a minor in another discipline, such as chemistry, microbiology, engineering, business, or computer science, may enhance one's marketability.

Lower Division: BIOL 153, 211A,B, 260; CHEM 111A,B; MATH 119A or 122, 119B or 123; PHYS 100A,B.

Upper Division: CHEM 327 or both 320A and B; BIOL 313, 340, 345, 345L, 350, 353, 370, 419, 425, GEOL 465 and 466; two courses selected from the following ten in marine science: BIOL 413, 414, 420, 428, 451, 454A, 455, 458, 464, and, with permission of marine biology advisor, BIOL 490; select one course, or course series, from the following six in methodology and techniques: BIOL 457, 463, 465, 467, and, with consent of marine biology advisor, BIOL 496, or GEOL 364 and 364L.

Few, if any, health-related professional schools (e.g. veterinary medicine) will accept CHEM 327 instead of both 320A and 320B. Some graduate programs with masters or doctorates in biology and/or marine biology may also not accept CHEM 327 instead of both 320A and 320B. CHEM 327 is not acceptable as a prerequisite for CHEM 441A. CHEM 327 is acceptable toward the Minor in Chemistry.

CSULB requires a "C" average in all upper division courses in the major taken at CSULB. For students who do not meet this requirement, the Department of Biological Sciences will allow graduation if they earn at least a "C" the last time they complete each upper division course in their major at CSULB.

FAQ Concerning Road Maps for Completion of Undergraduate Degrees

For each undergraduate major, the on-line Catalog shows plans for scheduling all required courses to complete the degree in four, five, or six years.

While CSULB will make every effort to schedule classes at the times shown in the plans, we cannot guarantee that courses will be available in specific semesters. It is possible that shortage or budget or of personnel will make it impossible to offer as many classes as we would wish.

The plans are not substitutes for working with an advisor. You are strongly encouraged to see an advisor when planning your program each term.

I am a freshman. Do I have to choose now whether to follow the four, five, or six-year plan?

No. Most freshmen take 12-15 units. You need at least 12 units to receive full financial aid. With experience, you will be able to judge how heavy a load you find comfortable. This will depend on your outside obligations, such as a job, and on your personal circumstances. In theory, each unit requires three hours a week, including preparing for class, attending class, and completing assignments. Use these guidelines to budget your time and plan an appropriate schedule.

Must I take the courses in the semesters shown on the plan?

The plan shows one possible way of completing all requirements for the degree. Consult your advisor about whether it is essential to take a given course in the semester shown. There are some rules to keep in mind:

1) You can take the General Education Foundation courses (Composition, Oral Communication, Critical Thinking, Mathematics) in any semester in the first 36 units of baccalaureate-level course work completed at CSULB.

2) You cannot take upper division courses until you have completed at least 30 units. (Exceptions can be made for students who already have completed advanced study in the subject.) You cannot take General Education Capstone courses until you have completed at least 60 units.

3) For some majors it is essential to complete courses in the correct sequence. You cannot take a more advanced course until you have completed the prerequisite course(s).

4) You must complete all requirements for admission to impacted majors within the first 60 units.

I have been told that I must take one or more pre-baccalaureate courses. How can I plan my program?

Your advisor at SOAR can help you identify which courses must be postponed. You must still complete the minimum number of baccalaureate units required for the degree.

You may be able to catch up by taking additional courses in later semesters or by taking classes in summer or winter session, or you may choose to spend an additional semester completing the program. You cannot begin the sequence of required courses for some majors until you are ready for baccalaureate-level Mathematics. See your major advisor to develop a plan for scheduling the required courses.

I didn't complete the exact list of courses shown. Can I still graduate on time?

The answer depends on your major and on what courses you have completed. The plans are not rigid requirements; they are only intended to provide guidance in planning a program. There are many reasons for students to follow a different pattern, such as changing the major, choosing to take fewer classes in a given semester, choosing to complete a minor or a second major. See your advisor for help in planning a program that will work for you.

If I follow the plan, will I have all requirements for graduation completed?

The plans include the specific courses required for the major. For some majors, there are restrictions on the choice of major electives. It is important that you select General Education courses to meet the required distribution pattern. You may need to take an additional General Education course to complete the minimum number of units required for each category. This is likely to happen if you took three-unit courses in Category B, Physical Universe.

Bachelor of Science in Microbiology (code BIOLBS09) (131 units)

Microbiology is the study of microorganisms and their interactions with people and the environment. This degree, with the inclusion of appropriate classes, may be utilized by pre-professional students who are preparing for medical, dental, pharmacy, and veterinary school. A major in microbiology prepares students for a wide range of employment opportunities in clinical and public health fields, genetic engineering, environmentally related fields, and industries concerning food, pharmaceuticals, and medical equipment and supplies. There is a core of courses for each of these varied educational and employment opportunities and specific programs can be arranged by counseling with microbiology advisors in the Department. This undergraduate major is recognized by the American Society for Microbiology as meeting their core curriculum for the baccalaureate degree program in microbiology, if students use MICR 471 as an elective. This major requires 91-92 units, of which 43-44 are in the lower division and 48 are in upper division.

Lower Division: BIOL 211A, B, 260; CHEM 111A, B, 251; MATH 119A or 122; MICR 211; PHYS 100A, B.

Upper Division: CHEM 320A, B, 441A, B; BIOL 340; MICR 320, 322, 430, 430L, 452, either both 450 and 451 or BIOL 370, and 9 additional elective units chosen from: BIOL 473, 477; MICR 423, 429, 432, 471, 473, 480, 490, 495, 496. MICR 423, 429 and 432 are particularly useful for Clinical Laboratory Science (Medical Technology) and other health related careers. The following courses are not acceptable toward the 9 units: MICR 300I, 303.

CSULB requires a "C" average in all upper division courses in the major taken at CSULB. For students who do not meet this requirement, the Department of Biological Sciences will allow graduation if they earn at least a "C" the last time they complete each upper division course in their major at CSULB.

Bachelor of Science Degree with Honors in Biology, Marine Biology, or Microbiology

Students majoring in the B. S. in Biology (all options), B. S. in Marine Biology, or B. S. in Microbiology who would like an enriched academic program, including an intensive research experience, may be eligible to graduate with Honors in the Major through the University Honors Program. Students may also complete General Honors through the University Honors Program, in which case the General Honors thesis requirement is met through Honors in the Major (see University Honors in this *Catalog*).

Students interested in graduating with Honors in the Major should participate in a series of courses designed to introduce central concepts in biology (BIOL 110H), develop critical thinking and communication skills (special section of UHP 100), and introduce the newly emerging field of bioinformatics (BIOL 220H). In addition, they may join a learning community of students with similar interests and benefit from mentoring by faculty members.

FOUR YEAR PLAN TO COMPLETE THE B.S. in MICROBIOLOGY (BIOLBS09)

131 units required

Department of Biological Sciences

Semester 1		Semester 2

This Honors in the Major program was created with the support of a grant from the Howard Hughes Medical Institute. Students admitted to Honors in the Major may be eligible to receive monetary support from a variety of sources for completion of their honors research and thesis.

Students who have successfully completed the lower division Honors in the Major curriculum will receive priority for research fellowship support to the extent that it is available.

Additional details about this program, including availability of fellowship support, are available from the Honors in the Major Program Advisor.

Requirements for Admission

1. Junior or senior standing with at least one year remaining before graduation.
2. Declared major of B. S. in Biology (any option), B. S. in Marine Biology, or B. S. in Microbiology.
3. Completion of BIOL 211A,B, 260; CHEM 320A,B at time of entry with grades of at least "C" in each course. Students may apply during the semester in which they expect to complete these courses.
4. GPAs of at least 3.000 in all courses in the major and in all upper division courses in the major at the time of application.
5. Submission of an application describing the student's academic background, reasons for applying (including a description of any previous research experience), and willingness to commit to a year-long research experience.
6. Letter of recommendation from a CSULB faculty member familiar with the student's work and abilities.

Requirements for Graduation

1. GPA of at least 3.300 in all upper division courses in the major and in Honors courses.
2. Completion of all requirements for the chosen degree in the Biological Sciences.
3. Completion of either BIOL 220H or 477.
4. Completion of BIOL 466H, Research Design and Methods - Honors (3 units).
5. Completion of 3 units of BIOL 496, Undergraduate Directed Research.
6. Completion of 3 units of BIOL 498H, Thesis - Honors.
7. Presentation of research results in a public forum. This requirement may be met by presentation at a scientific conference or at a local venue; consult the Program Director for additional information

Substitutions to this program must be approved by the Honors in the Major Program Advisor.

Minor in Biology (code BIOLUM01)

This minor may be combined with any major at CSULB except the B.S. in Biology (all options), B.S. in Microbiology, and B.S. in Marine Biology.

A minimum of 19 units is required for the minor.

Lower Division: BIOL 211A, B. (211A requires CHEM 111A; 211B requires CHEM 111B.)

Upper Division: A minimum of nine units selected from upper division biology courses with at least one course selected from the 400 series. The following courses are not acceptable toward these nine units: BIOL 303, 304, 306, 309I, 401; MICR 300I, 303, 429.

Minor in Physiology (code BIOLUM03)

This minor may be combined with any major at CSULB except the B.S. in Biology, Option in Physiology.

A minimum of 18 upper division units. Twelve of these 18 units must be selected from the following courses: BIOL 341, 342, 342L, 345, 345L, 442, 443, 445, 446, 448, 490. The other six of these eighteen units must be selected from other courses in the above list or from BIOL 473; CHEM 441A,B, 443, or 448. At least one of the upper division courses taken for this minor must have a laboratory. Most of these upper division courses require CHEM 111A, B and BIOL 211A, B as prerequisites; some have other prerequisites in addition.

Minor in Microbiology (code BIOLUM04)

This minor may be combined with any major at CSULB except the B.S. in Microbiology.

A minimum of 21 units which must include:

Lower Division: MICR 211.

Upper Division: MICR 320, 430, and 452; plus a minimum of five units from the following: MICR 322, 450, 471, and 473.

Certificate Program in Biomedical Art (code ART_CT01)

The Certificate Program in Biomedical Art is an interdisciplinary program sponsored by the Art and Biological Sciences Departments. Requirements for the certificate are listed in the Art section of this *Catalog*. Co-directors of the CSULB biomedical art program are in Art, Mr. Peter Mendez and in Biological Sciences, Dr. Kenneth Gregory. Questions may be addressed to them during office hours, which are listed in the respective departmental offices.

Certificate in Biotechnology (code BIOLCT01)

Biotechnology is a rapidly growing field which encompasses many domains of science. Specifically, biotechnology refers to a process which ultimately yields a product. The products can be loosely subdivided into five categories; biological organisms with novel traits, DNAs, RNAs, proteins, and compounds. The Undergraduate Certificate in Biotechnology is the integrated use of specific offerings of the College of Natural Sciences and Mathematics, including the departments of Biological Sciences and Chemistry and Biochemistry. Laboratory facilities and selected courses will serve to provide a fundamental background in the theory and techniques of biotechnology. The certificate may be earned

in conjunction with or subsequent to a baccalaureate degree. Courses offered for the certificate may be used to satisfy, as appropriate, major or minor requirements.

Prerequisites for Admission

1. Completion of the following courses with a grade of "C" or better (or consent of the biotechnology certificate program director): CHEM 111A, B; CHEM 320A, B; CHEM 441A, B; BIOL 340; BIOL 370; MICR 211.

Requirements

1. A baccalaureate degree (can be concurrent);
2. Completion of the program's prerequisite course requirements;
3. Approval by the program director;
4. Completion of the Core Curriculum: BIOL 477/577 (3); NSCI 492 (3); BIOL 473/573 (3); MICR 480/580 (1); Additional 3 units to be selected in consultation with the program director;
5. Completion of 3 units consisting of an approved research project in biotechnology to be taken from one or more of the following: BIOL 496; CHEM 496; or MICR 496 (undergraduate students); BIOL 697; CHEM 697; or MICR 697 (graduate students);
6. Total Units Required for Certificate: 16-17 units

Concurrent and/or Summer Enrollment in Another College

Students who wish to take coursework in a community or another college to meet curricular requirements while enrolled as undergraduates in the College of Natural Sciences and Mathematics must petition the appropriate department for prior approval to enroll in specific courses. This policy applies to concurrent enrollment or summer enrollment. University policy must also be met. See 'Concurrent Enrollment' and 'Transfer of Undergraduate Credit' in this *Catalog*. Courses not receiving prior approval will not be accepted for credit by the department.

Master of Science in Biology (code BIOLMS01)

The available programs in this degree cover a wide spectrum of biology and include both laboratory and field study. This degree requires a thesis based on original scientific research; a list of research areas with the names of faculty specializing in these areas can be obtained from the Department's Graduate Office.

Admission to the Department

Prerequisites

In addition to the prerequisites for entrance into CSULB as a graduate student stated previously in this *Catalog* under Graduate Degrees and Post Baccalaureate Studies, the Department of Biological Sciences requires:

1. A bachelor's degree in the biological or related sciences with minimum coursework similar to the lower division requirements of a degree program in the Department of Biological Sciences, CSULB, including cell biology and statistics, ecology, and genetics (other undergraduate degrees will be considered by the Graduate Studies Committee);

2. An undergraduate grade point average in all completed science and mathematics courses of at least 2.70, or a grade point average of at least 3.00 in the last 40 semester (60 quarter) units of science and mathematics courses completed; and
3. The Graduate Record Examination Subject Test in Biology or the Subject Test in Biochemistry, Cell, and Molecular Biology, which must have been taken prior to applying to the Department. Most students who apply with a score less than the 50th percentile on this test will be denied admittance to the Department. The GRE Subject Test must have been taken within five years prior to the intended admission date.

A student who does not meet these minimum entrance prerequisites must obtain a faculty sponsor in order to be considered for admittance.

Application

Prospective graduate students in M.S. in Biology, including CSULB graduates, must formally apply for admission to CSULB as described previously in this Catalog and must also apply directly to the Department of Biological Sciences. All applicants must submit the following documents directly to the Department no later than 15 March for the fall semester or 15 October for the spring semester to receive consideration for admission:

1. Departmental Application Form, available from the Department's Graduate Office;
2. Official transcripts of all college level academic work including that done at CSULB (these are in addition to those transcripts required for general graduate admission to CSULB);
3. Three letters of recommendation from persons familiar with the applicant's academic performance and research potential (if applying for a teaching associate position, the letters must refer to the applicant's potential to teach laboratory sections in the biological sciences); and
4. Official report of scores on the Graduate Record Examination Subject Test in Biology or the Subject Test in Biochemistry, Cell, and Molecular Biology. The applicant should have taken this examination well prior to applying to the Department, because the official score must reach the Department by the deadlines above.

These materials must be submitted to the Department's Graduate Office.

Review by the Graduate Studies Committee

The Graduate Studies Committee will review all folders completed by the deadlines and either accept the applicant as a Classified or Conditionally Classified graduate student or deny admission. Acceptance is competitive and the GPA, the GRE Subject Test score, and the letters of recommendation will be weighed in the decision to accept or reject an applicant. All accepted students must contact the Departmental Graduate Advisor prior to their initial semester for counsel and orientation.

Admission to the Department of Biological Sciences as a Classified Graduate Student

The Department of Biological Sciences may admit as a Classified graduate student any applicant who:

1. has met all prerequisites,
2. has a complete folder of all required documents, and
3. has obtained acceptance by a faculty member as the Chair of the student's Thesis Committee. The student should then set up a program (see "The Program of Study", below).

Admission to the Department of Biological Sciences as a Conditionally Classified Graduate Student

An applicant who fails to meet the criteria above for Classified admission to the Department and who falls into one of the following four categories may be considered by the Graduate Studies Committee for admission as Conditionally Classified graduate student:

1. An applicant with course and/or unit deficiencies. The Graduate Studies Committee will determine what deficiencies each applicant has and indicate on the back of the Department Application Form which course(s) the applicant must take to make up those deficiencies. These courses are in addition to the minimum 30 units on the student's Program of Study (see below). The applicant must make up all such deficiencies before attaining Classified status;
2. An applicant with GPA deficiencies. An applicant with a undergraduate GPA in science and math courses between 2.50 and 2.75 and a GPA in the last 40 semester (60 quarter) units of science and math courses between 2.75 and 3.00 may secure admission as a Conditionally Classified graduate student. The applicant must first obtain sponsorship from a Department of Biological Sciences faculty member; this faculty member must indicate in writing to the Graduate Studies Committee willingness to serve as the Chair of the applicant's thesis committee and the reasons why the Graduate Studies Committee should admit the applicant. Thus, an applicant with low GPA must contact potential thesis advisors before the Graduate Studies Committee can consider the application. In addition, an applicant receiving the Conditionally Classified status must complete, with a grade of "A" or "B", three approved courses totaling at least nine units acceptable to the Graduate Studies Committee and the Department Chair before attaining Classified status. These approved courses may appear on the student's Graduate Program of Study. If the applicant receives less than a "B" in any of the three courses, the applicant will be dropped from the M.S. in Biology program. An applicant who fails to meet the GPA criteria for normal, Classified admission, and has an undergraduate GPA in science and mathematics courses of less than 2.50 and a GPA in the last 40 semester (60 quarter) units of science and mathematics courses of less than 2.75 is not eligible for admission to the M.S. in Biology degree program;

3. An applicant who has scored below the 50th percentile on the GRE Subject Test; and
4. An applicant who meets all prerequisites but who does not yet have a Chair for the Thesis Committee. It is the responsibility of the student to obtain a Chair and set up a graduate program by the end of the second semester in residence following admission to the Master of Science program or they will be dropped from the program.

The Program of Study

After admission to the Department as a Classified or Conditionally Classified graduate student, the student in consultation with the Thesis Chair, must establish a Program of Study that includes a program of classes and a thesis proposal. The student and Thesis Committee Chair will select at least two additional members to serve on the student's Thesis Committee. The Departmental Graduate Advisor serves as an ex-officio member of all thesis committees. Each student must prepare a written thesis proposal for approval by the student's Thesis Committee. The Thesis Committee will meet with the student to determine what courses the student must take and indicate them on the M.S. in Biology Graduate Program Form.

The Program of Study must include six units of Thesis (BIOL 698), one to three units of Directed Research (BIOL 697), one unit of Seminar (MICR 580 or BIOL 580), BIOL 696, and four units from BIOL 661, 663, 664, 665, 666, MICR 661, or CHEM 595A; BIOL 661-666 and MICR 661 topics must be different. Of the minimum 30 units, no more than six may come from BIOL 661-666, and CHEM 595A; no more than six may come from transfer credit; and no more than one 300-level course may be included.

The Program of Study must be established before the end of the second semester after admission to the Department; in addition, the University Writing Proficiency Examination must be passed and a score at, or above, the 50th percentile on the Graduate Record Examination Subject Test in Biology or in Biochemistry, Cell, and Molecular Biology must be achieved by this time. Failure to meet these requirements will result in dismissal from the Department's M.S. in Biology program.

Advancement to Candidacy

In addition to the general University requirements stated previously under Post-Baccalaureate and Graduate Degrees in this *Catalog*, the student must complete the following steps before receiving Candidate status in the Department of Biological Sciences:

1. Admission to the Department of Biological Sciences Master's Degree program as a Classified graduate student (see above);
2. Achievement of a score at, or above, the 50th percentile on the Graduate Record Examination Subject Test in Biology or the Subject Test in Biochemistry, Cell, and Molecular Biology. This requirement must be met by the end of the second semester in residence. Normally, students not meeting this requirement will be dropped from the program. Only in cases where English is not the student's native language or if a disability impedes the student's performance, may an alternative be petitioned. In these cases, the Chair of her/his Thesis Committee must petition, in writing, the Graduate Studies Committee to provide an alternate method for meeting this requirement. This petition must provide full documentation of the student's progress to date, professional promise, and a schedule for meeting all degree requirements. If granted, the alternate method will consist of an exam, oral and/or written, in which the student must demonstrate extensive knowledge of the major areas of biology.
The exam committee will consist of the Department Graduate Advisor and three faculty members selected by the Graduate Studies Committee. No member of the student's Thesis Committee may serve on this committee; and
3. Establishment of a Thesis Committee and Program of Study (see above). Upon evidence of satisfactory academic progress and passing of the University Writing Proficiency Examination, the Thesis Committee will recommend the student for advancement to candidacy by forwarding its recommendation to the Department Graduate Advisor. This should occur at least one year before graduation. Upon approval by the Associate Dean for Graduate Accountability, the student will attain the status of Classified graduate standing.

Requirements for Master of Science in Biology

In addition to the general University requirements stated previously in this catalog, the student must meet the following requirements before receiving the degree of Master of Science in Biology.

1. Advancement to candidacy (see above);
2. Maintenance of a 3.00 ("B" average), or better, overall graduate grade-point average (includes all upper-division and graduate level courses taken since admission to this University and after completion of the baccalaureate degree) and graduate program GPA. If either GPA falls below 3.00, it must be elevated to a 3.00 at the end of the following semester or the student will be dropped from the M.S. in Biology program;
3. Completion of a written thesis and an oral defense of this thesis, followed by a public presentation of the thesis research. The members of the candidate's Thesis Committee must have approved the thesis and the defense before a student may schedule the public presentation. The student may not defend the thesis or give a public presentation during the summer session; and
4. Serve as a teaching associate or graduate assistant. Under some circumstances, this requirement may be waived.

Requests to graduate must be received by Enrollment Services approximately 6 months in advance of the expected graduation date (Check the Schedule of Classes for the date).

These requirements must be completed within 6 years from when the first course on the Program of Study was completed, including academic leaves, or the student's degree program will be terminated.

Master of Science in Microbiology (code BIOLMS02)

This degree is available to qualified students preparing for professional careers in industry and government and for further studies at the doctoral level. In addition, a Master's degree in Microbiology, combined with appropriate courses in education, can be utilized for a community college teaching credential.

Admission to the Department

Prerequisites

In addition to the prerequisites for entrance into CSULB as a graduate student stated previously in this Catalog under Graduate Degrees and Post Baccalaureate Studies, the Department of Biological Sciences requires:

1. A bachelor's degree or its equivalent with course work in microbiology, cell biology, and biochemistry appropriate for a science major and obtained from an accredited institution;
2. An undergraduate grade point average in all completed science and mathematics courses of at least 2.70, or a grade point average of at least 3.00 in the last 40 semester (60 quarter) units of science and mathematics courses completed; and
3. A score at or above the 50th percentile on the Graduate Record Examination (GRE) Subject test (in either Biology or in Biochemistry, Cell and Molecular Biology) taken within 5 years prior to the intended admission date.

An applicant who does not meet the above requirements may be admitted as a conditionally classified graduate student as explained below.

Application

Prospective graduate students in M.S. in Microbiology, including CSULB graduates, must formally apply for admission to CSULB as described previously in this Catalog and must also apply directly to the Department of Biological Sciences. All applicants must submit the following documents directly to the Department no later than 15 March for the fall semester or 15 October for the spring semester to receive consideration for admission:

1. Departmental Application Form, available from the Department's Graduate Office;
2. Official transcripts of all college level academic work including that done at CSULB; these are in addition to those transcripts required for general graduate admission to CSULB;

3. Three letters of recommendation from persons familiar with the applicant's academic performance and research potential (if applying for a teaching associate position, the letters must refer to the applicant's potential to teach laboratory sections in the biological sciences); and
4. Official report of scores on the Graduate Record Examination Subject Test in Biology or the Subject Test in Biochemistry, Cell, and Molecular Biology. The applicant should have taken this examination well prior to applying to the Department, because the official score must reach the Department by the deadlines above.

These materials must be submitted to the Department's Graduate Office.

Review by the Graduate Studies Committee

The Graduate Studies Committee will review all folders completed by the deadlines and either accept the applicant as a Classified or Conditionally Classified graduate student or deny admission. Acceptance is competitive and the GPA, the GRE Subject Test score, and the letters of recommendation will be weighed in the decision to accept or reject an applicant. All accepted students must contact the Graduate Advisor prior to their initial semester for counsel and orientation.

Admission to the Department of Biological Sciences as a Classified Graduate Student

The Department of Biological Sciences will admit as a Classified graduate student any applicant who:

1. has met all prerequisites;
2. has a complete folder of all required documents; and
3. has obtained acceptance by a faculty member as the Chair of the student's Thesis Committee. The student should then set up a program (see "The Program of Study," below).

Admission to the Department of Biological Sciences as a Conditionally Classified Graduate Student

An applicant who fails to meet the criteria above for Classified admission to the Department and who falls into one of the following three categories may be considered by the Graduate Studies Committee for admission as Conditionally Classified graduate student:

1. An applicant with course and/or unit deficiencies. The Graduate Studies Committee will determine what deficiencies each applicant has and indicate on the back of the Department Application Form which course(s) the applicant must take to make up those deficiencies. These courses are in addition to the minimum 30 units on the student's Program of Study (see below). The applicant must make up all such deficiencies before attaining Classified status;
2. An applicant with GPA deficiencies. An applicant with an undergraduate GPA in science and mathematics courses between 2.50 and 2.75 and a GPA in the last 40 semester (60 quarter) units of science and mathematics courses between 2.75 and 3.00 may secure admission as a Conditionally Classified graduate student. The applicant must first obtain sponsorship from a Department of Biological Sciences faculty member; this faculty member

must indicate in writing to the Graduate Studies Committee willingness to serve as the Chair of the applicant's thesis committee and the reasons why the Graduate Studies Committee should admit the applicant. Thus, applicants with a low GPA must contact potential thesis advisors before the Graduate Studies Committee can consider the application. In addition, an applicant receiving the Conditionally Classified status must complete, with a grade of "A" or "B," three approved courses totaling at least nine units acceptable to the Graduate Studies Committee and the Department Chair before attaining Classified status.

These approved courses may appear on the student's Graduate Program of Study. If the applicant receives less than a "B" in any of the three courses, the applicant will be dropped from the M.S. in Microbiology program. An applicant who fails to meet the GPA criteria for normal, Classified admission and has either an undergraduate GPA in science and mathematics courses of less than 2.50 or a GPA in the last 40 semester (60 quarter) units of science and mathematics courses of less than 2.75 is not eligible for admission to the M.S. in Microbiology degree program.

3. An applicant who has scored below the 50th percentile on the GRE Subject Test; and
4. An applicant who meets all prerequisites but who does not yet have a Chair for the Thesis Committee. It is the responsibility of the student to obtain a Chair and set up a graduate program by the end of the second semester in residence following admission to the Master of Science program or they will be dropped from the program.

The Program of Study

After admission to the Department as a Classified or Conditionally Classified graduate student, the student, in consultation with the Thesis Chair, must establish a Program of Study that includes the program of classes and a thesis proposal. The student and Thesis Committee Chair will select at least two additional members to serve on the student's Thesis Committee. The Departmental Graduate Advisor serves as an ex-officio member of all thesis committees. Each student must prepare a written thesis proposal for approval by the student's Thesis Committee. The Thesis Committee will meet with the student to determine what courses the student must take and indicate them on the M.S. in Microbiology Graduate Program Form.

The Program of Study will include the completion of a minimum of 30 semester units. At least 20 of these units must be in the 500-600 level courses of which a minimum of 16 units must be in the Microbiology 500-600 series. Required courses, if not taken previously, include: MICR 450 or an upper division/graduate course in genetics; MICR 471 or an upper division/graduate course in cell physiology; MICR 661 (two enrollments with different topics for a total of 4 units is required); BIOL 696, MICR 697 (maximum of 3 units);

and MICR 698 (6 units). Other elective units included in the graduate program must be 400-600 level courses acceptable to the University and microbiology degree program. No 300-level courses may be included.

The Program of Study must be established before the end of the second semester after admission to the Department; in addition, the University Writing Proficiency Examination must be passed and a score at, or above, the 50th percentile on the Graduate Record Examination Subject Test in Biology or in Biochemistry, Cell, and Molecular Biology must be achieved by this time. Failure to meet these requirements will result in dismissal from the Department's M.S. in Microbiology program.

Advancement to Candidacy

In addition to the general University requirements stated previously under Post-Baccalaureate and Graduate Degrees in this Catalog, the student must complete the following steps before receiving Candidate status in the Department of Biological Sciences:

1. Admission to the Department of Biological Sciences Master's Degree program as a Classified graduate student (see above);
2. Achievement of a score at, or above, the 50th percentile on the Graduate Record Examination Subject Test in Biology or the Subject Test in Biochemistry, Cell, and Molecular Biology. This requirement must be met by the end of the second semester in residence. Normally, students not meeting this requirement will be dropped from the program. Only in cases where English is not the student's native language or if a disability impedes the student's performance may an alternative be petitioned. In these cases, the Chair of her/his Thesis Committee must petition, in writing, the Graduate Studies Committee to provide an alternate method for meeting this requirement. This petition must provide full documentation of the student's progress to date, professional promise, and a schedule for meeting all degree requirements. If granted, the alternate method will consist of an exam, oral and/or written, in which the student must demonstrate extensive knowledge of the subject areas covered in the appropriate GRE Subject Test. The exam committee will consist of the Department Graduate Advisor and three faculty members selected by the Graduate Studies Committee. No member of the student's Thesis Committee may serve on this committee; and
3. Establishment of a Thesis Committee and Program of Study (see above). Upon evidence of satisfactory progress and passing of the University Writing Proficiency Examination, the Thesis Committee may recommend the student for advancement to candidacy by forwarding its recommendation to the Department Graduate Advisor, Department Chair, and Associate Dean for Graduate Accountability in the College of Natural Sciences and Mathematics. This should occur at least one year before graduation. Upon approval by the Associate Dean, the student will attain the status of Classified graduate standing.

Requirements for the Master of Science in Microbiology

In addition to the general University requirements stated previously in this catalog, the student must meet the following requirements before receiving the degree of Master of Science in Microbiology.

1. Advancement to candidacy (see above);
2. Maintenance of a 3.00 ("B" average), or better, overall graduate grade point average (includes all upper-division and graduate level courses taken since admission to this University and after completion of the baccalaureate degree) and graduate program GPA. If either GPA falls below 3.00, it must be elevated to a 3.00 at the end of the following semester or the student will be dropped from the M.S. in Microbiology program;
3. Completion of a written thesis and an oral defense of this thesis, followed by a public presentation of the thesis research. The members of the candidate's Thesis Committee must have approved the thesis and the defense before a student may schedule the public presentation. The student may not defend the thesis or give a public presentation during the summer session; and
4. Serve as a teaching associate or graduate assistant. Under some circumstances, this requirement may be waived.

Requests to graduate must be received by Enrollment Services approximately 6 months in advance of the expected graduation date (Check the Schedule of Classes for the date).

These requirements must be completed within 6 years from when the first course on the Program of Study was completed, including academic leaves, or the student's degree program will be terminated.

Biology Courses (BIOL)

Students pursuing a major and/or a minor in this Department may receive unit credit for courses marked with the symbol '##' as a general elective but may not apply the units toward the specific or elective requirements for any degree or option in this Department. Majors in this department may, however, take, for general education purposes, interdisciplinary courses offered by this Department. All other courses in this Department are open to majors and minors but by letter grade only (A-F). Courses with an asterisk may be used in graduate programs.

Lower Division

100.## Biology of the Human Environment (3) F,S

Prerequisites: Completion of or concurrent enrollment in a course that fulfills one of the Foundation requirements in GE. Biological perspective on the interaction between humans and their environment. Specifically designed for non-science majors. (Lecture 3 hrs.)

110H. Ideas in the Biological Sciences – Honors (1)

Prerequisites: Consent of instructor. An examination of the historical roots of the biological and biochemical sciences. Through readings and discussions, participants will become acquainted with the people and discoveries that have advanced the state of biological sciences. Historical context, importance, and the scientific and social consequences of these discoveries will be examined. Introduction to research faculty in the Departments of

Biological Sciences and Chemistry/Biochemistry. (Discussion 1 hr.) Letter grade only (A-F).

153. Introduction to Marine Biology (3) F,S

Prerequisites: Completion of or concurrent enrollment in courses that fulfill the A.1 and B.2 GE requirements. Scientific approach to the study of marine organisms and their relationships to the environment. Emphasis on human interaction with marine ecosystems. (Lecture 2 hrs., laboratory and field 3 hrs.) Field trips may be required outside of scheduled class time. Not open to students with a "C" or better in BIOL 201. Course fee may be required.

200.## General Biology (4) F,S

Prerequisite: Completion of GE Foundation requirements. A brief survey of the major areas of biology including cell biology, genetics, evolution, phylogeny, plant and animal anatomy and physiology, ecology, and behavior. Specifically designed for non-science majors. (Lecture 3 hrs., laboratory 3 hrs.) Course fee may be required.

200L.## General Biology Laboratory (1) F,S

Prerequisites: Completion at another institution of coursework deemed equivalent to the lecture component only of BIOL 200 and consent of Department. BIOL 200L is identical to the laboratory component of BIOL 200. Students enrolled in BIOL 200L will take it in the same room and at the same time as students enrolled in BIOL 200. Not open for enrollment to students with credit for BIOL 200. (Laboratory 3 hrs.) Course fee may be required.

204.## Essentials of Pharmacology (2) F,S

Prerequisites: BIOL 207. A systematic study of drugs, their classification, methods and routes of administration, therapeutic and toxic effects with emphasis on nursing implications. Not designed for majors in the College of Natural Sciences and Mathematics. Not open to students with a "C" or better in A/P 206. (Lecture 2 hrs.)

205.## Human Biology (4) F,S

Prerequisites: Completion of GE Foundation requirements. A brief survey of human biology focusing on anatomy, physiology, and development of cells, tissues, organs, and organ systems; including molecular biology, genetics, ecology, evolution, and diversity. Specifically designed for non-science majors. Not open to students with a "C" or better in A/P 107 or 205. (Lecture 3 hrs., laboratory 3 hrs.) Course fee may be required.

Biology Courses (BIOL)

207.## Human Physiology (4) F,S

Prerequisites: Completion of GE Foundation requirements. General introduction to the functional integration of human body systems. Designed for majors in biomedical engineering, physical education, and the allied health fields. Not open to students with a "C" or better in A/P 207 or 209. (Lecture 3 hrs., laboratory 3 hrs.) Course fee may be required. (CAN BIOL 12)

208.## Human Anatomy (4) F,S

Prerequisites: Completion of the GE Foundation requirements. The gross anatomy, histology, and neuroanatomy of the human body. Designed for majors in physical education and the allied health fields. Not open to students with a "C" or better in A/P 208 or 202. (Lecture 3 hrs., laboratory 3 hrs.) Course fee may be required.

211A. Biological Sciences I (5) F,S

Prerequisite: CHEM 111A with a grade of "C" or better and completion of GE Foundation requirements. Prerequisite or corequisite: CHEM 111B. An introduction to cellular and molecular principles common to all life forms including biological macromolecules, cell structure, metabolism, genetics, and molecular biology. Also includes microbiology of prokaryotes and the origin of life. (Lecture 3 hrs., laboratory 6 hrs.) Course fee may be required. Letter grade only (A-F). (BIOL 211A+211B, CAN BIOL SEQ A.)

211B. Biological Sciences II (5) F,S

Prerequisites: BIOL 211A, CHEM 111B with a grade of "C" or better. The second of a two-semester introductory sequence designed for biological science majors. An introduction to organismal biology, including the diversity, structure, and function of protists, fungi, plants, and animals. Also includes the principles of evolution, ecology, and animal behavior. (Lecture 3 hrs, laboratory 6 hrs.) Course fee may be required. Letter grade only (A-F). (BIOL 211A+211B, CAN BIOL SEQ A)

211C. Biological Sciences Laboratory I (2) F,S

Prerequisites: Completion at another accredited institution of coursework equivalent to the lecture component only of BIOL 211A and consent of Department. BIOL 211C is identical to the laboratory component of BIOL 211A. Students enrolled in BIOL 211C will take it in the same room and at the same time as students enrolled in BIOL 211A. Not open for enrollment for students with credit for BIOL 211A. Course fee may be required. Letter grade only (A-F). (Laboratory 6 hrs.)

211D. Biological Sciences Laboratory II (2) F,S

Prerequisites: Completion at another accredited institution of coursework equivalent to the lecture component only of BIOL 211B and consent of Department. BIOL 211D is identical to the laboratory component of BIOL 211B. Students enrolled in BIOL 211D will take it in the same room and at the same time as students enrolled in BIOL 211B. Not open for enrollment for students with credit for BIOL 211B. Course fee may be required. Letter grade only (A-F). (Laboratory 6 hrs.)

220H. Fundamentals of Bioinformatics – Honors (2)

Prerequisites: BIOL 211A and consent of instructor. Introduction to the scope and use of biological information databases including protein and nucleotide sequences and molecular structure databases as well as literature databases. Basic methods of comparison of DNA and protein sequences including sequence alignment, analysis of 3-D structures, and phylogenetic analysis. Fundamentals of DNA sequencing and genetic survey techniques including genotyping of nuclear and mitochondrial DNA variation. Course fee may be required. Letter grade only (A-F). (Lecture 1 hr., laboratory 3 hrs.)

260. Biostatistics (3)

Prerequisites: BIOL 211A or BIOL 207 or MICR 200; MATH 112 or 117 or 119A or 122. Use of probability and statistics in the description and analysis of biological data. Letter grade only (A-F). (Lecture 2 hrs., laboratory 3 hrs.) Course fee may be required.

Upper Division

303.## Coastal Systems and Human Impacts (3)

Prerequisites: Completion of GE Foundation requirements, one or more Explorations courses, and upper-division standing; BIOL 153 or 200 or 211B; GEOL 102 or 160. Defines and describes natural processes impacting human activities in the coastal zone and how human practices influence natural processes. Topics include global warming, sea level rise, El Niño, port development, ocean outfalls and water quality, fisheries, and coastal erosion. Same course as GEOL 303. Letter grade only (A-F). (Lecture 3 hrs.)

304.## Pathophysiology (3) F,S

Prerequisites: BIOL 207, 208; CHEM 302; MICR 200. Pathogenesis and pathophysiology of common disorders of human nervous, musculoskeletal, endocrine, cardiovascular, respiratory, excretory, digestive, and reproductive systems with emphasis on the physiological basis of the disease process and clinical correlations. Not designed for majors in the College of Natural Sciences and Mathematics. Not open to students with a "C" or better in A/P 305. (Lecture 3 hrs.)

306.## Human Prosection (3) F, odd years

Prerequisites: BIOL 208 or 332 and consent of instructor. Detailed regional dissection of the human body with emphasis on dissection techniques. Not open to students with a "C" or better in A/P 306 or 336. Letter grade only (A-F). (Lecture 1 hr., laboratory 6 hrs.) Course fee may be required.

309I.## Human Body and Mind (3) S

Prerequisites: Completion of the GE Foundation, the B.1.a. requirement in GE (life science with laboratory), and upper-division standing. A course designed to facilitate understanding of the human being as an integrated physiological and psychological entity. It presents clear and simple explanations of various aspects of human body function and explores the interaction between body and mind in physiological and psychological terms. Also explores and evaluates the methodology and the results of scientific research that support the concept of mind-body connections. Not open to students with a "C" or better in A/P 308I. (Lecture 3 hrs.)

312. Evolutionary Biology (3) F,S

Prerequisites: BIOL 211A,B with a grade of "C" or better, 260. A general survey of the various areas of evolutionary biology including but not limited to population genetics, speciation, origin of life, and phylogenetic analysis. Main emphasis is on evolutionary mechanisms and methods of analysis with some emphasis on specific details of the evolutionary history of life. Letter grade only (A-F). (Lecture 3 hrs.)

313. Invertebrate Zoology (4) F,S

Prerequisite: BIOL 211A,B with grade of "C" or better. Basic taxonomy, morphology, ecology, and distribution of the invertebrates. Protozoa through Arthropoda, excluding Insecta, but including Protochordates; emphasis on local marine forms. Letter grade only (A-F). (Lecture 2 hrs., laboratory and field 6 hrs.) Course fee may be required.

316. General Entomology (4) F,S

Prerequisites: BIOL 211A,B with grade of "C" or better. Characteristics, structure, habits, and life cycles of insects; the importance of insects to humans and other organisms. Letter grade only (A-F). (Lecture 2 hrs., laboratory 6 hrs.) Course fee may be required.

324. Vertebrate Zoology (4) F,S

Prerequisites: BIOL 211A, B with grade of "C" or better. Phylogenetic survey of the vertebrates (craniates) of the world. Lecture concentrates on the origin and radiation of the living vertebrates and their functional morphology. Laboratory concentrates on skeletal and internal anatomy and taxonomy to the ordinal and for some the familial level of living vertebrates, with special emphasis on California fauna. Letter grade only (A-F). (Lecture 2 hrs., laboratory 6 hrs.) Course fee may be required.

328. Plants and Human Affairs (3)

Prerequisites: BIOL 211A,B with grade of "C" or better. Economic and social role of plants and plant products in our civilization from a botanical perspective. Emphasis on the origins, methods of processing and uses of plants. Letter grade only (A-F). (Lecture 3 hrs.)

332. Comparative Vertebrate Morphology (4)

Prerequisites: BIOL 211A, B with grade of "C" or better. Evolutionary history of vertebrate structure. Lecture emphasizes primarily gross adult structure and secondarily embryonic origin and microanatomy. Laboratory focuses on comparative anatomy of shark, salamander, and mammal. Letter grade only (A-F). (Lecture 2 hrs., laboratory 6 hrs.) Course fee may be required.

340. Molecular Cell Biology (3) F,S

Prerequisites: BIOL 211A,B with a grade of "C" or better; CHEM 320A or 327. Detailed study of the organization and functioning of cells and cellular organelles at the molecular level; emphasis on experimental approaches and structural/functional relationships. Individual research paper on a current aspect of cellular/molecular biology required. Letter grade only (A-F). (Lecture 3 hrs.)

*340L. Molecular Cell Biology Laboratory (3) F

Prerequisites: BIOL 340, 370, both with a grade of "C" or better. (Preference given to students in the Bachelor of Science in Biology, Option in Cell and Molecular Biology.) An intensive course of modern laboratory techniques used in both cell and molecular biology. Topics include genomics, subcellular structure and transport, and purification and functional characterization of recombinant proteins. This class will provide extensive laboratory experience for students. Letter grade only (A-F). (Lecture 1 hr., laboratory 6 hrs.) Course fee may be required.

341. Physiology for Therapists I (4) F,S

Prerequisites: BIOL 211A, B; CHEM 111A, B; PHYS 100A, 100B; 100 hours of documented exposure to the practice of physical therapy in a variety of settings; and consent of instructor. Mechanisms of action and interaction of the physiological body systems with emphasis on the nervous and endocrine systems and skeletal and smooth muscle. Pathological and clinical considerations will also be presented. Not open to students with a "C" or better in A/P 341 or 307. Letter grade only (A-F). (Lecture 3 hrs., laboratory 3 hrs.) Course fee may be required.

342. Mammalian Physiology (3) F,S

Prerequisites: BIOL 211A,B with a grade of "C" or better. Recommended: PHYS 100A-B. A course dealing with the function of the various mammalian body systems, especially of humans. Emphasis will be placed on the integration of homeostatic mechanisms of the nervous, muscular, endocrine, cardiovascular, respiratory, renal, digestive, and reproductive systems. Not open to students with a "C" or better in A/P 342. Letter grade only (A-F). (Lecture 3 hrs.)

342L. Laboratory in Physiology (1) F,S

Prerequisites: BIOL 342 (may be taken concurrently.) Experiments and exercises designed to provide laboratory experience in, and illustration of, physiological principles and mechanisms of interaction among the various body systems. Not open to students with a "C" or better in A/P 342L. Letter grade only (A-F). (Laboratory 3 hrs.) Course fee may be required.

*345. Comparative Animal Physiology (3) F,S

Prerequisites: BIOL 211A,B with a grade of "C" or better. Comparison of the fundamental physiological processes of the major animal phyla. Not open to students with a "C" or better in A/P 340. Letter grade only (A-F). (Lecture 3 hrs.)

*345L. Laboratory in Comparative Animal Physiology (1) F,S

Prerequisites: BIOL 345 (may be taken concurrently.) Laboratory course designed to acquaint students with direct observation and measurement of physiological processes in various animal groups, both invertebrate and vertebrate. Not open to students with a "C" or better in A/P 340L. Letter grade only (A-F). (Laboratory 3 hrs.) Course fee may be required.

350. General Ecology (3) F,S

Prerequisite: BIOL 211A,B with grade of "C" or better, 260; MATH 112 or 117 or 119A or 122. Chemistry and physics recommended. Relationships of plants and animals to their physical and biological environment; structure and function of populations, communities and ecosystems. Letter grade only (A-F). (Lecture 3 hrs., and two required Saturday field trips.)

*351. Animal Behavior (4)

Prerequisites: BIOL 211A,B, 260, all with grade of "C" or better. Introduction to vertebrate and invertebrate ethology; innate and learned behavior, sensory adaptation and communication, activity rhythms, navigation and migration, predator-prey interactions, and social behaviors including aggression, courtship, and mating. Emphasis on ecological and evolutionary aspects. Letter grade only (A-F). (Lecture 3 hrs., laboratory 3 hrs.) Course fee may be required.

353. Marine Biology (3) F

Prerequisites: BIOL 153, both 211A,B with grade of "C" or better, and 260. Study of pelagic and benthic marine ecosystems, including topics of food resources, mariculture, and pollution. Weekend field trips may be required. Letter grade only (A-F). (Lecture 2 hrs., laboratory and field 3 hrs.) Course fee may be required.

370. General Genetics (4) F,S

Prerequisites: BIOL 211A,B with grades of "C" or better and either BIOL 260 or CHEM 441B. Detailed study of classical transmission genetics and an introduction to modern molecular genetics. Included will be current observations and concepts of the nature, organization, function and regulation of the expression of genetic material. Letter grade only (A-F). Letter grade only (A-F). (Lecture 3 hrs., laboratory 3 hrs.) Course fee may be required.

401.## Biology of Human Aging (3)

Prerequisites: BIOL 200 or 205 or 207. Biological processes associated with aging in humans. Emphasis on both cellular and organ aging. Not designed for majors in the College of Natural Sciences and Mathematics. Not open to students with a "C" or better in A/P 401. (Lecture 3 hrs.)

413./513. Marine Zooplankton (4) S, even years

Prerequisites: BIOL 353. (Undergraduates register in BIOL 413; graduates register in BIOL 513.) Diversity, natural history, taxonomy, and identification of marine zooplankton, including ichthyoplankton. Emphasis on fauna of the California coast. Letter grade only (A-F). (Lecture 2 hrs., laboratory and field 6 hrs.)

414./514. Marine Ornithology (3) F, odd years

Prerequisites: BIOL 153, either BIOL 350 or 353. (Undergraduates enroll in BIOL 414; graduates enroll in BIOL 514.) Designed to familiarize marine biology students with the role of birds in the marine environment. Topics include ecology, distribution, behavior, and identification of marine birds. Library report, independent field project, and attendance on field trips required. Letter grade only (A-F). (Lecture 1 hr., laboratory and field 6 hrs.) Course fee may be required.

*419. Ichthyology (3) F

Prerequisites: BIOL 211A, B, 260, and at least six additional units of upper division biological science, all with a grade of "C" or better. Recommended: BIOL 350, 353, and 370. Systematics, morphology, genetics, and ecology of fishes. Emphasis on local marine forms. Letter grade only (A-F). (Lecture 2 hrs., laboratory 3 hrs., weekend field trips may be required.) Course fee may be required.

420./520. Advanced Ichthyology (3) S

Prerequisites: BIOL 260, 350, 370, and 419. (Undergraduates enroll in BIOL 420; graduates enroll in BIOL 520.) Advanced aspects of distribution, systematics, physiology, adaptation, and life history of fishes; emphasis on state-of-art field/laboratory techniques and contemporary concepts. Letter grade only (A-F). (Lecture 2 hrs., laboratory and field 3 hrs.; weekend field trips may be required.) Course fee may be required.

*421. Herpetology (3) S, odd years

Prerequisites: BIOL 211A, B, 260, with grades of "C" or better, and eight units of upper division biology. Taxonomy, natural history, ecology and distribution of amphibians and reptiles, emphasis on local forms. Weekend field trip required. Letter grade only (A-F). (Lecture 2 hrs., laboratory and field 3 hrs.)

*423. Mammalogy (3) F, even years

Prerequisites: BIOL 260, either 324 or 332, and one of 312, 350, or 351, all with grades of "C" or better. Phylogenetic survey of the living mammals of the world. Lecture emphasizes the radiation of the orders and families and their morphology, physiology, and behavior; laboratory emphasizes external and skeletal morphology of these same taxa and identification of California species. Letter grade only (A-F). (Lecture 2 hrs., laboratory 3 hrs.)

Biology Courses (BIOL)

*424. Ornithology (3) S, even years

Prerequisite or corequisite: BIOL 350. Ecology, morphology, physiology, behavior, and taxonomy of birds from an evolutionary perspective, but also considering the factors that have influenced a recent increase in their extinction risk. Species identification techniques (emphasis of the local avifauna) and general methods of surveying avian populations. Letter grade only (A-F). (Lecture 2 hrs., laboratory/field 3 hrs.) Course fee may be required.

*424L. Methods in Avian Ecology and Conservation (1) S

Prerequisite or corequisite: BIOL 424. Course designed to train students in research methods (estimation of population density, bioacoustics, phylogenetic methods, zonation of protected areas to reduce human disturbance, etc.) used in avian ecology and conservation, and promote the use of the Ornithology Museum as a research and educational resource. Letter grade only (A-F). (Laboratory/field 3 hrs.) Course fee may be required.

***425. Phycology (3) F**

Prerequisites: BIOL 153, 211A, B with a grade of "C" or better. Taxonomy, phylogeny, and physiology of algae, including the physiological ecology of marine macroalgae; emphasis on local marine forms. Letter grade only (A-F). (Lecture 2 hrs., laboratory and field 3 hrs.) Course fee may be required.

***427. Taxonomy of Vascular Plants (4) S**

Prerequisite: BIOL 211A,B with grade of "C" or better. Principles and methods of vascular plant systematics, including history, nomenclature and phylogeny; emphasis in the laboratory is on the identification and classification of native and introduced plants of Southern California. Letter grade only (A-F). (Lecture 2 hrs., laboratory and field 6 hrs.)

428./528. Biology of the Giant Kelp (3) S

Prerequisites: BIOL 353, 425, or 439 with a grade of "C" or better. (Undergraduates register in BIOL 428; graduates register in BIOL 528.) A study of the physiology, reproductive biology, anatomy, taxonomy, and ecology of the ecologically and economically important kelp genus *Macrocystis*. Letter grade only (A-F). (Lecture 3 hrs.)

433./533. Developmental Biology (3) S

Prerequisites: BIOL 370; CHEM 320A,B. (Undergraduates register in BIOL 433; graduates register in BIOL 533.) Presentation of current topics and experimental approaches in cell differentiation and development with emphasis on examination of these processes at the molecular level. Topics include gametogenesis, fertilization, differential gene expression, and role of oncogenes in development. Letter grade only (A-F). (Lecture/discussion 3 hrs.)

***439. Plant Morphology (4) F**

Prerequisite: BIOL 211A,B with grade of "C" or better. Comparative structure, life history and phylogenetic relationships of plants. Letter grade only (A-F). (Lecture 2 hrs., laboratory 6 hrs.) Course fee may be required.

440./540. Advanced Molecular Cell Biology (3) F

Prerequisites: BIOL 340 and either BIOL 370 or CHEM 441B, each with a grade of "C" or better. (Undergraduates register in BIOL 440; graduates register in BIOL 540.) In depth discussion of cellular processes and their regulation. Topics may include intracellular targeting and transport of macromolecules, cell cycle control, and oncogenesis. The course includes critical discussion of primary journal articles on pertinent topics. Letter grade only (A-F). (Lecture 3 hrs.)

***441. Physiology for Therapists II (3) F,S**

Prerequisites: BIOL 341. Mechanisms of action and interaction of the physiological body systems with emphasis on the cardiovascular, renal, and respiratory systems. Pathological and clinical considerations will also be presented. Not open to students with a "C" or better in A/P 441. Letter grade only (A-F). (Lecture 3 hrs.)

442./542. Neurophysiology (3)

Prerequisites: PHYS 100A,B; BIOL 342, 345. (Undergraduates register in BIOL 442; graduates register in BIOL 542.) Study of the mechanisms by which excitable cells function and of the sensory, motor, and integrative systems in which they participate. Representative examples will be selected from vertebrate and invertebrate phyla. Not open to students with a "C" or better in A/P 442/542. Letter grade only (A-F). (Lecture 3 hrs.)

443./543. Endocrinology (3) S

Prerequisites: BIOL 340 or CHEM 441B; CHEM 320A or 327; and one of BIOL 341, 342, 345, 445, 448; CHEM 441A, or 448. (Undergraduates enroll in BIOL 443; graduates enroll in BIOL 543.) Role of the endocrines in vertebrate and invertebrate adjustment to changes in the internal and external environment. Letter grade only (A-F). (Lecture 3 hrs.)

444./544. Reproductive Biology (3) S

Prerequisites: BIOL 342 or 345. (Undergraduates register in BIOL 444; graduates register in BIOL 544.) Discussion of current topics in comparative reproductive biology from the molecular, cellular, organismal, and population levels. Topics include: hormones and reproduction, gamete/gonad biology, reproductive lifespan, mating systems/strategies, environmental influence on reproductive capabilities, contraception/in vitro fertilization. This course includes discussion of scientific communication, including reading of scientific journal articles, along with exposure to scientific writing. Letter grade only (A-F). (Lecture 3 hrs.)

445./545. Metabolic Regulation (3) F

Prerequisites: CHEM 441B or BIOL 443 or 543. (Undergraduates register in BIOL 445; graduates register in BIOL 545.) Study of molecular mechanisms by which intermediary metabolism is regulated in various mammalian tissues with emphasis on mechanisms of hormone action and their role in the regulation of some key enzymes of carbohydrate, fat, and protein metabolism. Not open to students with a "C" or better in A/P 445/545. Letter grade only (A-F). (Lecture 3 hrs.)

446./546. Respiratory and Renal Physiology (3) F

Prerequisites: BIOL 342 or 345; PHYS 100A,B. (Undergraduates register in BIOL 446; graduates register in BIOL 546.) Functions of and interactions between the respiratory and renal systems of mammals. Not open to students with a "C" or better in A/P 446/546. Letter grade only (A-F). (Lecture 3 hrs.)

447./547. Molecular Plant Physiology (3) S

Prerequisites: BIOL 340, 370, both with grade of "C" or better. (Undergraduates enroll in BIOL 447; graduates enroll in BIOL 547.) Current molecular approaches to classical topics including plant hormones, photosynthesis, resistance to plant pathogens, adaptation of plants to environmental stress, and development of plants. Letter grade only (A-F). (Lecture 3 hrs.)

448./548. Cell and Molecular Neurobiology (3) S

Prerequisites: BIOL 340 or CHEM 441B and one of BIOL 341, 342, or 345. (Undergraduates enroll in BIOL 448; graduates enroll in BIOL 548.) Study of the molecular, cellular, and developmental principles that underlie the functioning of the nervous system in the control of physiological and behavioral processes. Focus on mechanisms of electrical signaling and principles of synaptic biochemistry, development, and plasticity. Letter grade only (A-F). (Lecture 3 hrs.)

450./550. Plant Ecology (3) S, odd years

Prerequisites: BIOL 260, 350. Recommended: BIOL 427, 447. (Undergraduates register in BIOL 450; graduates register in BIOL 550.) Relationship of plants to their environment and principles of plant distribution. Letter grade only (A-F) (Lecture 2 hrs., laboratory and field 3 hrs.) Course fee may be required..

451./551. Wetlands and Mangrove Ecology (3) S, even years

Prerequisites: BIOL 260, 350. (Undergraduates register in BIOL 451; graduates register in BIOL 551.) Concepts of wetlands and mangrove ecology in relation to the general ecological processes that shape different types of wetland ecosystems. Physical and biogeochemical conditions, biological characteristics, specific players, and their interactions. Descriptions of specific coastal and inland wetland ecosystems: geomorphology, geochemistry, ecosystem structure, and function, and models. Included will be wetland management goals and concepts, and current approaches and practices in the U.S. and the world. Lecture time may be used for field trips, two of which will extend beyond standard lecture time. Letter grade only (A-F). (Lecture 3 hrs.)

452./552. Behavioral Ecology (3) S

Prerequisites: BIOL 312 or 350 or 351. Undergraduates register in BIOL 452; graduates register in BIOL 552.) Detailed study of how behavior contributes to reproductive success and survival. Emphasis given to theoretical background, ecological setting, and evolutionary consequences of behavior, including both empirical and experimental studies. Letter grade only (A-F). (Lecture/discussion 3 hrs.)

453./553. Insect Ecology (3) F, even years

Prerequisites: BIOL 316, 350 with grades of "C" or better. (Undergraduates register in 453; graduates register in 553.) Field and experimental studies of abundance, dispersal, distribution, and behavior. Letter grade only (A-F). (Lecture 2 hrs., laboratory and field 3 hrs.) Course fee may be required.

454A./554A. Research in Tropical Marine Ecology (2) S, even years

Prerequisites: BIOL 260, either 350 or 353, and 313 or 413 or 419 or 425 and consent of instructor. (Undergraduates register in BIOL 454A; graduates register in BIOL 554A.) Field and laboratory studies, lectures, and individual research on tropical marine biological problems. Designed to engage students in experimental research, including: recognizing a problem, designing and carrying out a project, statistical data analysis, and oral and written report presentation. An eight-day field trip to Hawaii will be required during the spring recess at student expense. Enrollment is limited. Letter grade only (A-F). (Lecture 1 hr., 8 day field trip.)

454B./554B. Research in Tropical Terrestrial Ecology (3) S, odd years

Prerequisites: BIOL 350; one of BIOL 316, 324, 421, 424, 427, or 439; and consent of instructor. (Undergraduates register in BIOL 454B; graduates register in BIOL 554B.) Field based comparison of a tropical lowland deciduous forest and a tropical lowland rainforest incorporating basic methodology in ecology. Forest structure and diversity of arthropods, birds, mammals, reptiles, and amphibians will be emphasized. Students will be required to maintain a field notebook, submit a final paper, and give an oral presentation. A nine-day field trip to Costa Rica is required during spring recess at student expense. Enrollment is limited. Letter grade only (A-F). (Lecture 2 hr., 9 day field trip.)

455./555. Ecology of Marine Communities (3) F

Prerequisites: BIOL 260, 350, 353. (Undergraduates register in BIOL 455; graduates register in BIOL 555.) Discussion of field studies on ecological principles related to marine communities. Includes an individual field research project and two class projects. Letter grade only (A-F). (Lecture 2 hrs., field 3 hrs.)

456./556. Population Ecology (3) S, even years

Prerequisites: BIOL 350, MATH 119B or 123. (Undergraduates register in BIOL 456; graduates in BIOL 556.) Analysis of characteristics of animal and plant populations including population growth and regulation, competition, predation, parasitism, and other intraspecific and interspecific interactions; population fluctuations; spatial patterns. Letter grade only (A-F). (Lecture 3 hrs.)

457./557. Field Methods in Ecology (3) S, odd years

Prerequisites: BIOL 260, 350. (Undergraduates register in BIOL 457; graduates in BIOL 557.) Design of field research projects, collection and analysis of data, writing and presentation of reports. Emphasis on field sampling techniques. Five weekend field trips required. Letter grade only (A-F). (Lecture 2 hrs., laboratory and field 3 hrs.)

458./558. Ecology of Marine Plankton (4) S, odd years

Prerequisites: BIOL 260, 353; CHEM 327 or 320A,B; MATH 119A or 122. (Undergraduates register in BIOL 458; graduates in BIOL 558.) Physiological ecology of marine phytoplankton and zooplankton as a basis for study of structure, dynamics, and modeling of plankton communities. Letter grade only (A-F). (Lecture 3 hrs., laboratory and field 3 hrs.) Course fee may be required.

459./559. Conservation Biology (3) F

Prerequisites: BIOL 260, 350. Recommended: BIOL 370. (Undergraduates register in BIOL 459; graduates register in BIOL 559.) Central concepts in conservation biology including population dynamics, extinction processes, population viability analyses, metapopulations, community-level interactions, island biogeography, patterns of biological diversity, habitat fragmentation, reserve design, and landscape-level conservation. Lecture will include group discussions of relevant primary literature. Letter grade only (A-F). (Lecture 3 hrs., two weekend field trips may be required.)

463./563. Computer Modelling in Biology (4) F

Prerequisites: BIOL 260, 350. (Undergraduates register in BIOL 463; graduates register in BIOL 563.) History, modelling theory, different modelling approaches, theoretical, empirical, and quantitative modelling. Laboratory will use modelling software and focus on model construction and quantitative simulation, possibly of student's own research project. Applicable to ecology, microbiology, physiology, environmental sciences, etc. Letter grade only (A-F). (Lecture 3 hrs., laboratory 3 hrs.) Course fee may be required.

464./564. Aquatic Toxicology (3) S

Prerequisites: BIOL 211A,B, 340; CHEM 320A or 327, all with grade of "C" or better. BIOL 353 and CHEM 448 or 441A,B recommended. (Undergraduates register in 464; graduates register in 564.) An in depth study of the interactions between anthropogenic chemicals and aquatic ecosystems. Topics include the origin, fate, chemical and biological detection, and quantification of pollutants and their impact at the molecular, biochemical, cellular, physiological, organismal, and community levels of organization. Individual research project required. Letter grade only (A-F). (Lecture 3 hrs.)

465./565. Experimental Design and Regression Analysis (4) F, even years

Prerequisites: BIOL 260; MATH 119B or 123; six units of upper division biological science or consent of instructor. (Undergraduates register in BIOL 465; graduates register in BIOL 565.) Techniques in experimental design and data analysis applied to problems in biology. Topics include analysis of variance and covariance, bivariate and multiple regression, experimental design, bootstrapping and randomization tests, and nonparametric statistics. Laboratory experience in analyzing biological data with computerized statistical packages. Letter grade only (A-F). (Lecture 3 hrs., laboratory 3 hrs.)

466H. Research Design and Methods – Honors (3) S

Prerequisites: BIOL 211A, B, either BIOL 260 or CHEM 251, CHEM 320A, B, all with a grade of "C" or better, completion of the GE Foundation, and consent of instructor. A rigorous introduction to the following: i) hypothesis testing, experimental design, and regression modeling of biological data; ii) methodological and technical procedures for experimentation; and iii) techniques for written and oral presentation of research results to prepare students for undergraduate research. Research paper and oral presentation required. Same course as CHEM 466H. Letter grade only (A-F). (Lecture 3 hours.)

467./567. Multivariate Data Analysis (4) F, odd years

Prerequisites: BIOL 260; MATH 119B or 123; six units of upper division biological science or consent of instructor. (Undergraduates register in BIOL 467; graduates register in BIOL 567.) Multivariate data analysis techniques applied to biological data. Applied matrix algebra as needed for analyzing and understanding multivariate analysis methods. Topics covered include principal components analysis, factor analysis, discriminant analysis, cluster analysis as well as modern phylogenetic analysis techniques. Laboratory experience in analyzing multivariate biological data with computerized statistical packages. Letter grade only (A-F). (Lecture 3 hrs., laboratory 3 hrs.)

473./573. Molecular Genetics (3) S

Prerequisite: BIOL 370, CHEM 327 or 320A,B. (Undergraduates register in BIOL 473; graduates register in BIOL 573.) Nature, replication, regulation and mode of action of the genetic material. Letter grade only (A-F). (Lecture 3 hrs.)

Biology Courses (BIOL)

477./577. Biotechnology: Applications of Molecular Techniques and Bioinformatics (4)

Prerequisites: BIOL 340 or 370, and CHEM 441A,B; all with a grade of "C" or better. (Undergraduates register in BIOL 477; graduates register in BIOL 577.) Intensive study of the theory and techniques involved in the isolation, amplification, and analysis of genes, genomes, transcripts, and proteins. Includes identification and isolation of genes by hybridization or complementation, analysis of gene expression, and detailed study of how DNAs, RNAs, and proteins are characterized. Data-mining (generating hypotheses concerning the structure or function of a gene or protein by identifying similar sequences in better characterized model organisms), the use of homologs for experimental design and/or function analysis, the use of computers in experimental design, the current use of microarrays, and the future use of nanotechnology are also explored. Letter grade only (A-F). (Lecture 3 hrs., activity 2 hrs.)

480./580. Seminars (1) F,S

Prerequisites: BIOL 211A,B with grade of "C" or better. (Undergraduates register in BIOL 480; graduates register in BIOL 580.) Weekly meetings at which professional biologists present the results of their research. Requires participation in the organization and the critical evaluation of these presentations. May not be repeated for credit towards any single degree. Letter grade only (A-F) (Seminar 1 hr.)

490./590. Special Topics in Biology (1-3)

Prerequisites: BIOL 211A, B, with grade of "C" or better, and consent of instructor. (Undergraduates register in BIOL 490; graduates register in BIOL 590.) Topics from selected areas of biology. Course content will vary from section to section. May be repeated to a maximum of 6 units with different topics. Topics may be announced in the *Schedule of Classes*. Letter grade only (A-F). (Lecture 1-3 hrs.)

490L./590L. Special Topics Laboratory in Biology (1-2)

Prerequisites: BIOL 211A, B, with grade of "C" or better, and consent of instructor. (Undergraduates register in BIOL 490L; graduates register in BIOL 590L.) Topics from selected areas of biology. Course content will vary from section to section. May be repeated to a maximum of 4 units with different topics. Topics may be announced in the *Schedule of Classes*. Letter grade only (A-F). (Laboratory 3 or 6 hrs.) Course fee may be required.

495. Instruction in Laboratory Teaching (1-2) F,S

Prerequisites: Consent of lecture instructor, a "B" or better in the course in which the student elects to do BIOL 495 (another course with laboratory may be substituted with consent of instructor), and an overall GPA of at least 2.75. Individual instruction in the organization and techniques of teaching a biology laboratory. May be repeated for a letter grade and degree credit to a maximum of 2 units for any single degree or option. Any units beyond the two taken for a letter grade in BIOL 495 or MICR 495 or any combination of the two will be taken credit/no credit. (Conference 1 hr., laboratory 3 hrs. per unit.) Same course as MICR 495. May be repeated to a maximum of 2 units.

496. Undergraduate Directed Research (1-3) F,S

Prerequisites: BIOL 211A, B, with grade of "C" or better, and consent of instructor. Research in a specific topic in the biological sciences to be approved and directed by a faculty member in the Department of Biological Sciences. May be repeated for a letter grade and degree credit to a maximum of three units for any single degree or option. Any units beyond the three taken for a letter grade in BIOL 496 or MICR 496, or any combination of the two, will be taken credit/no credit. Not available to graduate students. (Conference 1 hr., laboratory 3 hrs. per unit.) Same course as MICR 496.

498H. Senior Thesis – Honors (3)

Prerequisites: At least one unit of BIOL 496 and consent of instructor. Planning, preparation, completion, and oral presentation of a written thesis based on a research project in the biological sciences begun in BIOL/MICR 496. Not available to graduate students. Letter grade only (A-F).

Graduate Level

513./413. Marine Zooplankton (4) S, even years

Prerequisites: BIOL 353. (Undergraduates register in BIOL 413; graduates register in BIOL 513.) Diversity, natural history, taxonomy, and identification of marine zooplankton, including ichthyoplankton. Emphasis on fauna of the California coast. Letter grade only (A-F). (Lecture 2 hrs., laboratory and field 6 hrs.)

514./414. Marine Ornithology (3) F

Prerequisites: BIOL 153, either BIOL 350 or 353. (Undergraduates enroll in BIOL 414; graduates enroll in BIOL 514.) Designed to familiarize marine biology students with the role of birds in the marine environment. Topics include ecology, distribution, behavior, and identification of marine birds. Library report, independent field project, and attendance on field trips required. Letter grade only (A-F). (Lecture 1 hr., laboratory and field 6 hrs.) Course fee may be required.

520./420. Advanced Ichthyology (3) S

Prerequisites: BIOL 260, 350, 370, and 419. (Undergraduates enroll in BIOL 420; graduates enroll in BIOL 520.) Advanced aspects of distribution, systematics, physiology, adaptation, and life history of fishes; emphasis on state-of-art field/laboratory techniques and contemporary concepts. Letter grade only (A-F). (Lecture 2 hrs., laboratory and field 3 hrs.; weekend field trips may be required.) Course fee may be required.

528./428. Biology of the Giant Kelp (3) S

Prerequisites: BIOL 353, 425, or 439 with a grade of "C" or better. (Undergraduates register in BIOL 428; graduates register in BIOL 528.) A study of the physiology, reproductive biology, anatomy, taxonomy, and ecology of the ecologically and economically important kelp genus *Macrocystis*. Letter grade only (A-F). (Lecture 3 hrs.)

533./433. Developmental Biology (3)

Prerequisites: BIOL 370; CHEM 320A,B. (Undergraduates register in BIOL 433; graduates register in BIOL 533.) Presentation of current topics and experimental approaches in cell differentiation and development with emphasis on examination of these processes at the molecular level. Topics include gametogenesis, fertilization, differential gene expression, and role of oncogenes in development. Letter grade only (A-F). (Lecture/discussion 3 hrs.)

540./440. Advanced Molecular Cell Biology (3) F

Prerequisites: BIOL 340 and either BIOL 370 or CHEM 441B, each with a grade of "C" or better. (Undergraduates register in BIOL 440; graduates register in BIOL 540.) In depth discussion of cellular processes and their regulation. Topics may include intracellular targeting and transport of macromolecules, cell cycle control, and oncogenesis. The course includes critical discussion of primary journal articles on pertinent topics. Letter grade only (A-F). (Lecture 3 hrs.)

542./442. Neurophysiology (3) F

Prerequisites: PHYS 100A,B; BIOL 342, 345. (Undergraduates register in BIOL 442; graduates register in BIOL 542.) Study of the mechanisms by which excitable cells function and of the sensory, motor, and integrative systems in which they participate. Representative examples will be selected from vertebrate and invertebrate phyla. Not open to students with a "C" or better in A/P 442/542. Letter grade only (A-F). (Lecture 3 hrs.)

543./443. Endocrinology (3) S

Prerequisites: BIOL 340 or CHEM 441B; CHEM 320A or 327; and one of BIOL 341, 342, 345, 445, 448, 545, 548, CHEM 441A, or 448. (Undergraduates enroll in BIOL 443; graduates enroll in BIOL 543.) Role of the endocrines in vertebrate and invertebrate adjustment to changes in the internal and external environment. Letter grade only (A-F). (Lecture 3 hrs.)

544./444. Reproductive Biology (3) S

Prerequisites: BIOL 342 or 345. (Undergraduates register in BIOL 444; graduates register in BIOL 544.) Discussion of current topics in comparative reproductive biology from the molecular, cellular, organismal, and population levels. Topics include: hormones and reproduction, gamete/gonad biology, reproductive lifespan, mating systems/strategies, environmental influence on reproductive capabilities, contraception/in vitro fertilization. This course includes discussion of scientific communication, including reading of scientific journal articles, along with exposure to scientific writing. Letter grade only (A-F). (Lecture 3 hrs.)

545./445. Metabolic Regulation (3) F

Prerequisites: CHEM 441B or BIOL 443 or 543. (Undergraduates register in BIOL 445; graduates register in BIOL 545.) Study of molecular mechanisms by which intermediary metabolism is regulated in various mammalian tissues with emphasis on mechanisms of hormone action and their role in the regulation of some key enzymes of carbohydrate, fat, and protein metabolism. Not open to students with a "C" or better in A/P 445/545. Letter grade only (A-F). (Lecture 3 hrs.)

546./446. Respiratory and Renal Physiology (3) F

Prerequisites: BIOL 342 or 345; PHYS 100A,B. (Undergraduates register in BIOL 446; graduates register in BIOL 546.) Functions of and interactions between the respiratory and renal systems of mammals. Not open to students with a "C" or better in A/P 446/546. Letter grade only (A-F). (Lecture 3 hrs.)

547./447. Molecular Plant Physiology (3) S

Prerequisites: BIOL 340, 370, both with grade of "C" or better. (Undergraduates enroll in BIOL 447; graduates enroll in BIOL 547.) Current molecular approaches to classical topics including plant hormones, photosynthesis, resistance to plant pathogens, adaptation of plants to environmental stress, and development of plants. Letter grade only (A-F). (Lecture 3 hrs.)

548./448. Cell and Molecular Neurobiology (3) S

Prerequisites: BIOL 340 or CHEM 441B and one of BIOL 341, 342, or 345. (Undergraduates enroll in BIOL 448; graduates enroll in BIOL 548.) Study of the molecular, cellular, and developmental principles that underlie the functioning of the nervous system in the control of physiological and behavioral processes. Focus on mechanisms of electrical signaling and principles of synaptic biochemistry, development, and plasticity. Letter grade only (A-F). (Lecture 3 hrs.)

550./450. Plant Ecology (3)

Prerequisites: BIOL 260, 350. Recommended: BIOL 427, 447. (Undergraduates register in BIOL 450; graduates register in BIOL 550.) Relationship of plants to their environment and principles of plant distribution. Letter grade only (A-F). (Lecture 2 hrs., laboratory and field 3 hrs.) Course fee may be required.

551./451. Wetlands and Mangrove Ecology (3) S, even years

Prerequisites: BIOL 260, 350. (Undergraduates register in BIOL 451; graduates register in BIOL 551.) Concepts of wetlands and mangrove ecology in relation to the general ecological processes that shape different types of wetland ecosystems. Physical and biogeochemical conditions, biological characteristics, specific players, and their interactions. Descriptions of specific coastal and inland wetland ecosystems: geomorphology, geochemistry, ecosystem structure, and function, and models. Included will be wetland management goals and concepts, and current approaches and practices in the US and the world. Lecture time may be used for field trips, two of which will extend beyond standard lecture time. Letter grade only (A-F). (Lecture 3 hrs.)

552./452. Behavioral Ecology (3) S

Prerequisites: BIOL 312 or 350 or 351. Undergraduates register in BIOL 452; graduates register in BIOL 552.) Detailed study of how behavior contributes to reproductive success and survival. Emphasis given to theoretical background, ecological setting, and evolutionary consequences of behavior, including both empirical and experimental studies. Letter grade only (A-F). (Lecture/discussion 3 hrs.)

553./453. Insect Ecology (3) F, even years

Prerequisites: BIOL 316, 350 with grades of "C" or better. (Undergraduates register in 453; graduates register in 553.) Field and experimental studies of abundance, dispersal, distribution, and behavior. Letter grade only (A-F). (Lecture 2 hrs., laboratory and field 3 hrs.) Course fee may be required.

554A./454A. Research in Tropical Marine Ecology (2) S, even years

Prerequisites: BIOL 260, either 350 or 353, and 313 or 413 or 419 or 425 and consent of instructor. (Undergraduates register in BIOL 454A; graduates register in BIOL 554A.) Field and laboratory studies, lectures, and individual research on tropical marine biological problems. Designed to engage students in experimental research, including: recognizing a problem, designing and carrying out a project, statistical data analysis, and oral and written report presentation. An eight-day field trip to Hawaii will be required during the spring recess at student expense. Enrollment is limited. Letter grade only (A-F) (Lecture 1 hr., 8 day field trip.)

554B./454B. Research in Tropical Terrestrial Ecology (3) S, odd years

Prerequisites: BIOL 350; one of BIOL 316, 324, 421, 424, 427, or 439; and consent of instructor. (Undergraduates register in BIOL 454B; graduates register in BIOL 554B.) Field based comparison of a tropical lowland deciduous forest and a tropical lowland rain-forest incorporating basic methodology in ecology. Forest structure and diversity of arthropods, birds, mammals, reptiles, and amphibians will be emphasized. Students will be required to maintain a field notebook, submit a final paper, and give an oral presentation. A nine-day field trip to Costa Rica is required during spring recess at student expense. Enrollment is limited. Letter grade only (A-F). (Lecture 2 hr., 9 day field trip.)

555./455. Ecology of Marine Communities (3) F

Prerequisites: BIOL 260, 350, 353. (Undergraduates register in BIOL 455; graduates register in BIOL 555.) Discussion of field studies on ecological principles related to marine communities. Includes an individual field research project and two class projects. Letter grade only (A-F). (Lecture 2 hrs., field 3 hrs.)

556./456. Population Ecology (3)

Prerequisites: BIOL 350, MATH 119B or 123. (Undergraduates register in BIOL 456; graduates register in BIOL 556.) Analysis of characteristics of animal and plant populations including population growth and regulation, competition, predation, parasitism, and other intraspecific and interspecific interactions; population fluctuations; spatial patterns. Letter grade only (A-F). (Lecture 3 hrs.)

557./457. Field Methods in Ecology (3) S, odd years

Prerequisites: BIOL 260, 350. (Undergraduates register in BIOL 457; graduates register in BIOL 557.) Design of field research projects, collection and analysis of data, writing and presentation of reports. Emphasis on field sampling techniques. Five weekend field trips required. Letter grade only (A-F). (Lecture 2 hrs., laboratory and field 3 hrs.)

558./458. Ecology of Marine Plankton (4) S, odd years

Prerequisites: BIOL 260, 353; CHEM 327 or 320A,B; MATH 119A or 122. (Undergraduates register in BIOL 458; graduates register in BIOL 558.) Physiological ecology of marine phytoplankton and zooplankton as a basis for study of structure, dynamics, and modeling of plankton communities. Letter grade only (A-F). (Lecture 3 hrs., laboratory and field 3 hrs.) Course fee may be required.

559./459. Conservation Biology (3) F

Prerequisites: BIOL 260, 350. Recommended: BIOL 370. (Undergraduates register in BIOL 459; graduates register in BIOL 559.) Central concepts in conservation biology including population dynamics, extinction processes, population viability analyses, metapopulations, community-level interactions, island biogeography, patterns of biological diversity, habitat fragmentation, reserve design, and landscape-level conservation. Lecture will include group discussions of relevant primary literature. Letter grade only (A-F). (Lecture 3 hrs., two weekend field trips may be required.)

563./463. Computer Modelling in Biology (4) F

Prerequisites: BIOL 260, 350. (Undergraduates register in BIOL 463; graduates register in BIOL 563.) History, modelling theory, different modelling approaches, theoretical, empirical, and quantitative modelling. Laboratory will use modelling software and focus on model construction and quantitative simulation, possibly of student's own research project. Applicable to ecology, microbiology, physiology, environmental sciences, etc. Letter grade only (A-F). (Lecture 3 hrs., laboratory 3 hrs.) Course fee may be required.

Biology Courses (BIOL)

564./464. Aquatic Toxicology (3) S

Prerequisites: BIOL 211A,B, 340; CHEM 320A or 327, all with grade of "C" or better. BIOL 353 and CHEM 448 or 441A,B recommended. (Undergraduates register in 464; graduates register in 564.) An in depth study of the interactions between anthropogenic chemicals and aquatic ecosystems. Topics include the origin, fate, chemical and biological detection, and quantification of pollutants and their impact at the molecular, biochemical, cellular, physiological, organismal, and community levels of organization. Individual research project required. Letter grade only (A-F). (Lecture 3 hrs.)

565./465. Experimental Design and Regression Analysis (4) F, even years

Prerequisites: BIOL 260; MATH 119B or 123; six units of upper division biological science or consent of instructor. (Undergraduates register in BIOL 465; graduates register in BIOL 565.) Techniques in experimental design and data analysis applied to problems in biology. Topics include analysis of variance and covariance, bivariate and multiple regression, experimental design, bootstrapping and randomization tests, and nonparametric statistics. Laboratory experience in analyzing biological data with computerized statistical packages. Letter grade only (A-F). (Lecture 3 hrs., laboratory 3 hrs.)

567./467. Multivariate Data Analysis (4) F, odd years

Prerequisites: BIOL 260; MATH 119B or 123; six units of upper division biological science or consent of instructor. (Undergraduates register in BIOL 467; graduates register in BIOL 567.) Multivariate data analysis techniques applied to biological data. Applied matrix algebra as needed for analyzing and understanding multivariate analysis methods. Topics covered include principal components analysis, factor analysis, discriminant analysis, cluster analysis as well as modern phylogenetic analysis techniques. Laboratory experience in analyzing multivariate biological data with computerized statistical packages. Letter grade only (A-F). (Lecture 3 hrs., laboratory 3 hrs.)

573./473. Molecular Genetics (3) S

Prerequisites: BIOL 370. CHEM 327 or 320A,B. (Undergraduates register in BIOL 473; graduates register in BIOL 573.) Nature, replication, regulation and mode of action of the genetic material. Letter grade only (A-F). (Lecture 3 hrs.)

577./477. Biotechnology: Applications of Molecular Techniques and Bioinformatics (4)

Prerequisites: BIOL 340 or 370, and CHEM 441A,B; all with a grade of "C" or better. (Undergraduates register in BIOL 477; graduates register in BIOL 577.) Intensive study of the theory and techniques involved in the isolation, amplification, and analysis of genes, genomes, transcripts, and proteins. Includes identification and isolation of genes by hybridization or complementation, analysis of gene expression, and detailed study of how DNAs, RNAs, and proteins are characterized. Data-mining (generating hypotheses concerning the structure or function of a gene or protein by identifying similar sequences in better characterized model organisms), the use of homologs for experimental design and/or function analysis, the use of computers in experimental design, the current use of microarrays, and the future use of nanotechnology are also explored. Letter grade only (A-F). (Lecture 3 hrs., activity 2 hrs.)

580./480. Seminars (1) F,S

Undergraduates register in BIOL 480; graduates register in BIOL 580. Weekly meetings at which professional biologists present the results of their research. Requires participation in the organization and the critical evaluation of these presentations. May not be repeated for credit towards any single degree. Letter grade only (A-F). (Seminar 1 hr.)

590./490. Special Topics in Biology (1-3)

Prerequisites: BIOL 211A, B, with grade of "C" or better, and consent of instructor. (Undergraduates register in BIOL 490; graduates register in BIOL 590.) Topics from selected areas of biology. Course content will vary from section to section. May be repeated to a maximum of 6 units with different topics. Topics may be announced in the *Schedule of Classes*. Letter grade only (A-F). (Lecture 1-3 hrs.)

590L./490L. Special Topics Laboratory in Biology (1-2)

Prerequisites: BIOL 211A, B, with grade of "C" or better, and consent of instructor. (Undergraduates register in BIOL 490L; graduates register in BIOL 590L.) Topics from selected areas of biology. Course content will vary from section to section. May be repeated to a maximum of 4 units with different topics. Topics may be announced in the *Schedule of Classes*. Letter grade only (A-F). (Laboratory 3 or 6 hrs.)

661. Seminar in Biology (2)

Critical evaluation of the primary literature of this field, including oral and/or written presentation of critiques. May be repeated to a maximum of 4 units with different topics. Letter grade only (A-F) (Seminar 2 hrs.)

663. Seminar in Cell and Molecular Biology (2)

Critical evaluation of the primary literature of this field, including oral and/or written presentation of critiques. May be repeated to a maximum of 4 units with different topics. Letter grade only (A-F) (Seminar 2 hrs.)

664. Seminar in Marine Biology (2)

Critical evaluation of the primary literature of this field, including oral and/or written presentation of critiques. May be repeated to a maximum of 4 units with different topics. Letter grade only (A-F) (Seminar 2 hrs.)

665. Seminar in Ecology (2)

Critical evaluation of the primary literature of this field, including oral and/or written presentation of critiques. May be repeated to a maximum of 4 units with different topics. Letter grade only (A-F) (Seminar 2 hrs.)

666. Seminar in Physiology (2)

Critical evaluation of the primary literature of this field, including oral and/or written presentation of critiques. May be repeated to a maximum of 4 units with different topics. Letter grade only (A-F) (Seminar 2 hrs.)

696. Research Methods (3) F

Prerequisites: Approved thesis proposal and graduate program on file in the departmental graduate office, and consent of instructor. Development of the ancillary skills related to biological research, from initiation to presentation and publication. Topics include experimental design, computer-aided information retrieval, technical writing, data presentation, computer design of graphics, preparation of figures and slides, photography. The course culminates with formal oral, poster, and written presentations of research in progress. Letter grade only (A-F). (Lecture 2 hrs., laboratory 3 hrs.) Course fee may be required.

697. Directed Research (1-3) F,S

Prerequisite: Consent of instructor. Research on a specific topic to be approved and directed by a faculty member in the biological sciences. A written report will be required. May be repeated for a letter grade and degree credit to a maximum of three units. Any units beyond the three taken for a letter grade in BIOL 697 or MICR 697 or any combination of the two must be taken credit/no credit.

698. Thesis (1-6) F,S

Prerequisites: Advancement to Candidacy for the Master of Science in Biology, and consent of the chair of the thesis committee and the departmental graduate advisor. Planning, preparation, writing, defense, oral presentation, and completion of a research thesis in the biological sciences. Letter grade only (A-F).

Microbiology Courses (MICR)

Students pursuing a major and/or a minor in this Department may receive unit credit for courses marked with the symbol '##' as a general elective but may not apply the units toward the specific or elective requirements for any degree or option in this Department. Majors in this Department may, however, take, for general education purposes, interdisciplinary courses offered by this department. All other courses in this Department are open to majors and minors but by Letter grade only. Courses with an asterisk may be used in graduate programs.

Lower Division

101. ## Introduction to Human Disease (3) F,S

Prerequisites: Completion of or concurrent enrollment in a course that fulfills the A.1 GE requirement. Introduction to the study of human disease including moral/ethical and economic issues. (Lecture 3 hrs.)

200. General Microbiology for Health Professionals (4) F,S

Prerequisites: CHEM 100 or 111A or 202 and completion of GE Foundation requirements. General microbiology for those planning careers in nursing, health care and education, and foods and nutrition. Introduction to the microorganisms, including structure, function, metabolism, growth, genetics, diversity and applied aspects, with special emphasis on their roles in human health. Not open for majors in the biological sciences. (Lecture 2 hrs., laboratory 6 hrs.) Course fee may be required. (CAN BIOL 14)

211. General Microbiology (5) F,S

Prerequisites: BIOL 211A with a grade of "C" or better, CHEM 111B. Introduction to the biology of the microorganisms, including structure, function, metabolism, growth, genetics, diversity, host-parasite relationships and applied aspects. Letter grade only (A-F). (Lecture 3 hrs., laboratory 6 hrs.) Course fee may be required. (CAN BIOL 14)

Upper Division

300I. ## Human Immunology: In Self-Defense (3) F

Prerequisites: Completion of GE Foundation requirements, one or more Explorations courses, and upper-division standing; one laboratory course in a life science. Introductory psychology and a laboratory course in a physical science recommended. Introduction to the mechanisms and cells responsible for protecting the human body from disease. Normal functions of the immune system, diseases involving the immune system, and psychological, endocrine and age factors affecting the immune system will be included. Impact of immunology on organ transplantation, immunotherapy and biotechnology will be discussed. Not applicable for credit towards the major in Microbiology. (Lecture 3 hrs.)

303.## Public Health and Pollution (3)

Survey of public health and ecological problems in the community, control of communicable diseases; air, water and soil contamination. Recommended for non-majors interested in ecology and pollution control. Letter grade only (A-F). (Lecture 3 hrs.)

320. Bacterial Pathogenesis (5) F,S

Prerequisites: MICR 211; CHEM 327 or 320A (may be taken concurrently). The first of a two-semester sequence (MICR 320/322) in medical microbiology designed for microbiology majors. Pathogenic bacteria of humans and animals; emphasis on bacterial ultrastructure, epidemiology, mechanisms of pathogenesis, host defense mechanisms, and antibiotic therapy; isolation and identification of microorganisms by morphological and cultural characteristics. Letter grade only (A-F). (Lecture 3 hrs., laboratory 6 hrs.) Course fee may be required.

322. Mycology/Parasitology (5) F,S

Prerequisites: BIOL 211B; MICR 320. The second of a two-semester sequence (MICR 320/322) in medical microbiology designed for microbiology majors. Survey of parasitic protozoa, helminths, and fungi of humans; emphasis on identification of fresh and preserved specimens, pathogenesis, host-parasite interactions, epidemiology, prevention, and control. Letter grade only (A-F). (Lecture 3 hrs., laboratory 6 hrs.) Course fee may be required.

423./523. Hematology (4) F

Prerequisites: BIOL 340. (Undergraduates register in 423; graduates register in 523.) Study of blood and the coagulation system. Normal cell structure and function and the physiological and morphological changes associated with inflammation, leukemias, and anemias are discussed. Clinical, diagnostic, and research techniques for observing blood and pathologic case-studies will be included. Useful for students interested in medical professions. Required for internship in clinical laboratory science (medical technology). Letter grade only (A-F). (Lecture 3 hrs., laboratory 3 hrs.) Course fee may be required.

*429 Epidemiology of Infectious Diseases (3)

Prerequisites: BIOL 260; MICR 320, 322. Principles of epidemiology and their application to health; fundamentals of biomedical statistics; basic factors in classic epidemiological studies and the prevention and control of infectious diseases. Letter grade only (A-F). (Lecture 3 hrs.)

*430. Immunology (3)

Prerequisites: BIOL 340. Study of the cellular and molecular components of the immune system, including how the immune system recognizes a vast number of pathogens and how it functions in various types of immune responses. Topics also include the mechanisms of vaccines, immunodeficiencies, transplantation, tolerance, allergy, and autoimmunity. Letter grade only (A-F). (Lecture 3 hrs.)

*430L. Immunology Laboratory (2)

Prerequisites: BIOL 340. Pre- or co-requisite: MICR 430. Experiments using modern and classical techniques in cellular and molecular immunology. Experimental techniques covered in this course have broader application to other fields in cell and molecular biology. Laboratory techniques include mammalian cell culture, antibody purification, SDS-PAGE, western blots, apoptosis assay, cell proliferation assays, cellular activation assay, and various antibody-antigen interaction assays. Letter grade only (A-F). (Laboratory 6 hrs.) Course fee may be required.

432./532. Immunohematology (2)

Prerequisites: A final grade of "B" or better in MICR 423 and 430 or consent of instructor required. (Undergraduates register in MICR 432; graduate students register in MICR 532.) Physical and biochemical characteristics of human erythrocytes. Detailed study of isoantigens and isoantibodies associated with human red blood cells; their detection, mechanisms of cellular destruction and relationship to hematopoietic disease. (Lecture 2 hrs.) MICR 432 will be accepted toward fulfillment of the 6 units of upper division microbiology electives. Letter grade only (A-F).

*450. Microbial Genetics (2) F

Prerequisites: MICR 211; CHEM 441B. Biochemical and cytological bases of microbial genetics; nature, replication, modification and transfer of genetic material. Letter grade only (A-F). (Lecture 2 hrs.)

*451. Microbial Genetics Laboratory (2) F

Prerequisites: MICR 450 (may be taken concurrently), consent of instructor. Laboratory study of microbial genetics. Genetic engineering techniques. Letter grade only (A-F). (Laboratory 6 hrs.) Course fee may be required.

*452. Virology (3) S

Prerequisites: CHEM 441A, B and either MICR 320 or BIOL 340. Virology at a molecular level including virus replication and the molecular basis for viral pathogenesis; a survey of human and animal viral diseases. Current trends for prevention and treatment of viral diseases. Letter grade only (A-F). (Lecture 3 hrs.)

*471. Bacterial Physiology (3) S

Prerequisites: MICR 320, CHEM 441A. Cellular physiology at the molecular level as related to bacterial growth, reproduction, nutrition, metabolism and ecology. Letter grade only (A-F). (Lecture 3 hrs.)

*473. Food and Industrial Microbiology (3) F

Prerequisites: MICR 200 OR 211; CHEM 441A OR 448. Role of microorganisms in food and other industrial processes; emphasis on bacteria, yeasts and molds. Letter grade only (A-F). (Lecture 2 hrs., laboratory 3 hrs.) Course fee may be required.

480./580. Seminars in Molecular and Cellular Biology and Microbiology (1)

Prerequisites: BIOL 211A, B, with a grade of "C" or better. (Undergraduates register in MICR 480; graduates register in MICR 580.) Weekly meetings at which professional biologists present the results of their research. Requires participation in the organization and critical evaluation of these presentations. May not be repeated for credit towards any single degree. Letter grade only (A-F). (Seminar 1 hr.)

Microbiology Courses (MICR)

490./590. Special Topics in Microbiology (1-3)

Prerequisites: MICR 211 with grade of "C" or better, and consent of instructor. (Undergraduates register in MICR 490; graduates register in MICR 590.) Topics from selected areas of microbiology. Course content will vary from section to section. May be repeated to a maximum of 6 units with different topics. Topics may be announced in the *Schedule of Classes*. Letter grade only (A-F). (Lecture 1-3 hrs.)

490L./590L. Special Topics Laboratory in Microbiology (1-2)

Prerequisites: MICR 211 with grade of "C" or better, and consent of instructor. (Undergraduates register in MICR 490L; graduates register in MICR 590L.) Topics from selected areas of microbiology.

Course content will vary from section to section. May be repeated to a maximum of 4 units with different topics. Topics may be announced in the *Schedule of Classes*. Letter grade only (A-F). (Laboratory 3 or 6 hrs.) Course fee may be required.

495. Instruction in Laboratory Teaching (1-2) F,S

Prerequisites: Consent of lecture instructor, a "B" or better in the course in which the student elects to do MICR 495 (another course with laboratory may be substituted with consent of instructor), and an overall GPA of at least 2.75. Individual instruction in the organization and techniques of teaching a microbiology laboratory. May be repeated for a letter grade and degree credit to a maximum of two units for any single degree or option. Any units beyond the two taken for a letter grade in BIOL 495 or MICR 495 or any combination of the two will be taken credit/no credit. (Conference 1 hr., laboratory 3 hrs. per unit.) Same course as BIOL 495. May be repeated to a maximum of 2 units.

496. Undergraduate Directed Research (1-3) F,S

Prerequisites: BIOL 211A, B, MICR 211, all with grade of "C" or better, and consent of instructor. Research in a specific topic in the biological sciences to be approved and directed by a faculty member in the Department of Biological Sciences. May be repeated for a letter grade and degree credit to a maximum of three units for any single degree or option. Any units beyond the three taken for a letter grade in BIOL 496 or MICR 496, or any combination of the two, will be taken credit/no credit. Not available to graduate students. (Conference 1 hr., laboratory 3 hrs. per unit.) Same course as BIOL 496.

Graduate Level

523./423. Hematology (4) F

Prerequisites: BIOL 340. (Undergraduates register in 423; graduates register in 523.) Study of blood and the coagulation system. Normal cell structure and function and the physiological and morphological changes associated with inflammation, leukemias, and anemias are discussed. Clinical, diagnostic, and research techniques for observing blood and pathologic case-studies will be included. Useful for students interested in medical professions. Required for internship in clinical laboratory science (medical technology). Letter grade only (A-F). (Lecture 3 hrs., laboratory 3 hrs.) Course fee may be required.

532./432. Immunohematology (2)

Prerequisites: A final grade of "B" or better in MICR 423 and 430 or consent of instructor required. (Undergraduates register in MICR 432; graduate students register in MICR 532.) Physical and biochemical characteristics of human erythrocytes. Detailed study of isoantigens and isoantibodies associated with human red blood cells; their detection, mechanisms of cellular destruction and relationship to hematopoietic disease. Letter grade only (A-F). (Lecture 2 hrs.) MICR 432 will be accepted toward fulfillment of the 6 units of upper division microbiology electives.

580./480. Seminars in Molecular and Cellular Biology and Microbiology (1)

Prerequisites: BIOL 211A,B, with a grade of "C" or better. (Undergraduates register in MICR 480; graduates register in MICR 580.) Weekly meetings at which professional biologists present the results of their research. Requires participation in the organization and critical evaluation of these presentations. May not be repeated for credit towards any single degree. Letter grade only (A-F). (Seminar 1 hr.)

590./490. Special Topics in Microbiology (1-3)

Prerequisites: MICR 211 with grade of "C" or better, and consent of instructor. (Undergraduates register in MICR 490; graduates register in MICR 590.) Topics from selected areas of microbiology. Course content will vary from section to section. May be repeated to a maximum of 6 units with different topics. Topics may be announced in the *Schedule of Classes*. Letter grade only (A-F). (Lecture 1-3 hrs.)

590L./490L. Special Topics Laboratory in Microbiology (1-2)
Prerequisites: MICR 211 with grade of "C" or better, and consent of instructor. (Undergraduates register in MICR 490L; graduates register in MICR 590L.) Topics from selected areas of microbiology. Course content will vary from section to section. May be repeated to a maximum of 4 units with different topics. Topics may be announced in the *Schedule of Classes*. Letter grade only (A-F). (Laboratory 3 or 6 hrs.) Course fee may be required.

661. Seminar in Microbiology (2)

Prerequisites: Consent of instructor. Critical evaluation of the literature of this field, including oral and/or written presentation of critiques. May be repeated to a maximum of 4 units with different topics. Letter grade only (A-F) (Seminar 2 hours)

697. Directed Research (1-3) F,S

Prerequisite: Consent of instructor. Research on a specific topic to be approved and directed by a faculty member in the biological sciences. A written report will be required. May be repeated for a letter grade and degree credit to a maximum of three units. Any units beyond the three taken for a letter grade in BIOL 697 or MICR 697 or any combination of the two must be taken credit/no credit.

698. Thesis (1-6) F,S

Prerequisites: Advancement to Candidacy for the Master of Science in Microbiology, consent of the chair of the thesis committee and the departmental graduate advisor. Planning, preparation, writing, defense, oral presentation, and completion of a research thesis in the biological sciences. Letter grade only (A-F).

FAQ Concerning Road Maps for Completion of Undergraduate Degrees

For each undergraduate major, the on-line Catalog shows plans for scheduling all required courses to complete the degree in four, five, or six years.

While CSULB will make every effort to schedule classes at the times shown in the plans, we cannot guarantee that courses will be available in specific semesters. It is possible that shortage or budget or of personnel will make it impossible to offer as many classes as we would wish.

The plans are not substitutes for working with an advisor. You are strongly encouraged to see an advisor when planning your program each term.

I am a freshman. Do I have to choose now whether to follow the four, five, or six-year plan?

No. Most freshmen take 12-15 units. You need at least 12 units to receive full financial aid. With experience, you will be able to judge how heavy a load you find comfortable. This will depend on your outside obligations, such as a job, and on your personal circumstances. In theory, each unit requires three hours a week, including preparing for class, attending class, and completing assignments. Use these guidelines to budget your time and plan an appropriate schedule.

Must I take the courses in the semesters shown on the plan?

The plan shows one possible way of completing all requirements for the degree. Consult your advisor about whether it is essential to take a given course in the semester shown. There are some rules to keep in mind:

1) You can take the General Education Foundation courses (Composition, Oral Communication, Critical Thinking, Mathematics) in any semester in the first 36 units of baccalaureate-level course work completed at CSULB.

2) You cannot take upper division courses until you have completed at least 30 units. (Exceptions can be made for students who already have completed advanced study in the subject.) You cannot take General Education Capstone courses until you have completed at least 60 units.

3) For some majors it is essential to complete courses in the correct sequence. You cannot take a more advanced course until you have completed the prerequisite course(s).

4) You must complete all requirements for admission to impacted majors within the first 60 units.

I have been told that I must take one or more pre-baccalaureate courses. How can I plan my program?

Your advisor at SOAR can help you identify which courses must be postponed. You must still complete the minimum number of baccalaureate units required for the degree.

You may be able to catch up by taking additional courses in later semesters or by taking classes in summer or winter session, or you may choose to spend an additional semester completing the program. You cannot begin the sequence of required courses for some majors until you are ready for baccalaureate-level Mathematics. See your major advisor to develop a plan for scheduling the required courses.

I didn't complete the exact list of courses shown. Can I still graduate on time?

The answer depends on your major and on what courses you have completed. The plans are not rigid requirements; they are only intended to provide guidance in planning a program. There are many reasons for students to follow a different pattern, such as changing the major, choosing to take fewer classes in a given semester, choosing to complete a minor or a second major. See your advisor for help in planning a program that will work for you.

If I follow the plan, will I have all requirements for graduation completed?

The plans include the specific courses required for the major. For some majors, there are restrictions on the choice of major electives. It is important that you select General Education courses to meet the required distribution pattern. You may need to take an additional General Education course to complete the minimum number of units required for each category. This is likely to happen if you took three-unit courses in Category B, Physical Universe.

View the CSU, Long Beach *Catalog* on-line at www.csulb.edu by clicking on "Academics" and then "CSULB Catalog."

Students desiring information should contact the department office for referral or the faculty advisor. The Black Studies curriculum is designed to provide general knowledge of Black culture and history and to offer training for professional work in the Black community. It offers programs to serve (1) business; (2) those entering a variety of occupations including government, teaching, school administration, foreign service, law, urban planning, communications, journalism, psychology, recreation, speech and linguistics; (3) majors in other fields, such as history, literature, creative writing, anthropology, who wish to include additional dimensions to their course of study.

Bachelor of Arts in Black Studies (code BSTBA01) (120 units)

Requirements

A minimum of 45 units is required.

Lower Division: B/ST 110 and 9 additional units selected one course from each of the following:

Group A) B/ST 120, 121, 200

Group B) B/ST 140, 155, 160

Group C) B/ST 170A, 170B, 210

Upper Division: B/ST 330, 332, 335, 495, plus 15 units with one or more courses selected from each of the following:

Group A) B/ST 310, 325, 331, 337, 410

Group B) B/ST 340, 343A, 346, 353I, 363

Group C) B/ST 304, 345, 380, 475

Social Science Requirement: Six upper division units from American Indian Studies, American Studies, Anthropology, Asian and Asian American Studies, Chicano and Latino Studies, Computer Studies, Economics, Geography, History, Human Development, Political Science, Psychology, Social Work, Sociology, Women's Studies. These units are in addition to those used to fulfill the requirements of any General Education category.

FOUR YEAR PLAN TO COMPLETE THE B.A. DEGREE in BLACK STUDIES (B/STBA01)

Certificate in Black Studies (code B/STCT01)

Students majoring in other departments of the University but interested in Black Studies may at the same time pursue a program leading to a Certificate in Black Studies. Courses used to meet the certificate requirement may, where applicable, also be used simultaneously to meet General Education requirements or the major and minor requirements of cooperating departments.

Requirements

1. A bachelor's degree with a major in a traditional discipline. (Certificate can be completed prior to or simultaneously with completion of the B.A. requirement.)
2. A minimum of 24 units of which at least 12 must be in upper-division courses, with two or more courses selected from each of the following:

Group A: B/ST 110, 210, 325, 330, 332, 335, 370, 420

Group B: B/ST 160, 340, 343A, 346, 363, 450

Group C: B/ST 120, 121, 200, 201, 304, 337, 400, 410

Minor in Black Studies (code B/STUM01)

Requirements

A minimum of 24 units of which at least 12 units must be in upper-division courses, with two or more courses selected from each of the following:

Group A: B/ST 110, 210, 325, 330, 332, 335, 370, 420

Group B: B/ST 160, 340, 343A, 346, 363, 450

Group C: B/ST 120, 121, 200, 201, 304, 337, 400, 410

The Minor in Black Studies is open to any non-Black Studies majors.

Courses (B/ST)

Lower Division

1. Language Skills (3)

Not open to students with credit in Language Skills 170A. Focuses on intensive development of grammatical skills and expository writing. Primarily for Black students. Credit/no credit only. Counts as part of student's course load but does not carry graduation credit.

100. Language Skills – Composition (3)

Prerequisite: A recorded total of 151 above on the English Placement test (EPT), or credit in B/ST 1 or its equivalent. The course focuses on organizational methods and techniques for writing compositional and expository prose, advanced grammar and some critical reading techniques for term papers. It is designed for first year students, especially Bidialectal and ESL students.

110. Introduction to Black Studies (3)

Prerequisite/Corequisite: One GE Foundation course. Survey of major themes, issues and concepts of Black Studies. Emphasis given to major schools of thought, research materials and sources, and major scholars of the discipline. Special attention will also be given to the historical evolution and academic rationale for Black Studies.

115. Introduction to African Politics (3)

A review of recent developments or changes in the government, parties, political ideologies, politics, leadership and political processes in selected African countries.

120. Afro-American History to 1865 (3)

Prerequisite/Corequisite: One GE Foundation course. Survey course which presents a description and analysis of African civilizations shortly before the coming of the European. It will also focus on the impact, significance and role played by the African from the colonial period through the American Revolution, to the Civil War.

121. Afro-American History 1865-Present (3)

Prerequisites/Corequisite: One GE Foundation course. Impact of social, economic and political change on Blacks in America after the Reconstruction period. Black migration, education, cultural development and business enterprises will be examined.

140. Introduction to African-American Literature (3)

Prerequisite/Corequisite: One GE Foundation course. A study of selected or representative literature of the African-American writer. Special attention will be given to style, content, methodology and thematic approach.

150. Critical Thinking in Black Studies (3)

Prerequisite: Completion of or concurrent enrollment in B/ST 100 or equivalent. An introduction to the nature, process and practice of critical thinking. Essential knowledge of and extensive practice in critical reasoning directed toward developing cognitive skills and dispositions central to its useful and effective application in academic work and in the analysis, critique and advocacy of personal perspectives and social issues.

155. Afro-American Music (3)

Prerequisite/Corequisite: One GE Foundation course. Nontechnical survey of African-American music. Some attention given to the impact of social movements on the musician and the music produced. Gospel, jazz and well-known derivatives will be highlighted.

160. Introduction to Black Arts (3)

Prerequisite/Corequisite: One GE Foundation course. A presentation of prevailing themes, methodology, concepts and meaning in African art. Equal time is given to contemporary art and art of recent history. The work of some African artists highlighted as appropriate.

167. Exploitation of the Black Athlete (3)

Study of the socio-dynamics of amateur, professional and collegiate sports activity in the United States as it relates to the African-American community. Case studies of well-known Black athletes will also be presented.

170A. Elementary Swahili (4)

Prerequisites/Corequisite: Any Foundation Course. For those who are just beginning the study of Swahili. Introduction to grammar, syntax comprehension, reading, writing and conversation in the language. Letter grade only (A-F).

170B. Elementary Swahili (4)

Prerequisites: B/ST 170A or equivalent competency. This course is a continuation of B/ST 170A. Advanced grammar, syntax, comprehension, reading, writing and conversation in the language. Letter grade only (A-F).

180. Black Language in America (3)

Historical, phonological, and sociological aspects of the language of Black Americans; traces Ebonics from early use in trading off west coast of Africa; linguistic development from lingua franca to pidgin and creole; linguistic symbols, terms, and analysis applied to Black English; difference versus deficit theories of learning.

190. Racism in the American Military (3)

Concise review of alternate policies of exclusion, restriction, segregation and conscription of the African-American in armed services.

200. Ancient African Civilizations (3)

Prerequisite: Completion of GE Foundation requirements. A study of ancient African empires and kingdoms. Topics include migration, education, family structure, political institutions, cultural transmission and commercial trade.

201. History of Slavery (3)

Prerequisite: Completion of GE Foundation requirements. Historical examination of the trans-Atlantic slave trade and its impact on Africa and the Western Hemisphere, with major emphasis on the nature of slavery in Africa, Greece, Italy, the Caribbean, the Middle East, South America, and the United States. Slavery's aftermath on social integration in America and other countries.

205. Modern Black South African Literature (3)

Prerequisite: Completion of GE Foundation requirements. The course studies South African literature written in English by Africans since the mid-1800's to present. "Black" is used broadly to include South Africans of mixed parentage whom the racial laws and policies of the white minority government had isolated from other Africans, classifying them as "Coloreds." Letter grade only (A-F).

210. African American Community (3)

Prerequisites: All Foundation Courses. Examines the social structure and changes in the community life of African-Americans as compared to other ethnic groups. It will also explore and analyze how institutional and stratified patterns, demographic changes, social movements, and community organizational programs affect Blacks. Several case studies will be presented to underscore the strength and resiliency of the Black community.

215. U.S. Diversity and the Ethnic Experience (3)

Prerequisites: Open only to Integrated Teacher Education Program students. This course is a survey of four major ethnic groups (American Indians, African American, Latino American, and Asian American) in American society from the colonial era to the present. Special attention is given to the formation and transformation of each ethnic group and their individual and collective roles in the development of the United States. Same course as AIS 215, ASAM 215, CHLS 215. The departments take turns offering the course in the Fall semester. Letter grade only (A-F).

240. African and African American Folklore and Culture (3)

An examination and presentation of material on folklore, folk tales, and folk heroes in the Black community. Some attention also given to Black mythology.

255. Introduction to Hip Hop (3)

Prerequisites: All Foundation Courses. A critical exploration of Hip Hop's history and culture, which includes analyses of its impact and influence on contemporary aesthetic culture, race relations, gender politics and struggles for social justice.

Upper Division

General Education Category A must be completed prior to taking any upper division course except upper division language courses where students meet formal prerequisites and/or competency equivalent for advanced study.

304. The African Colonial Experience (3)

A critical examination of colonialism as a world phenomenon focusing on colonialism in Africa as the paradigm and point of departure for a specific and comparative understanding.

310. Black Male and Female Relationships (3)

A comprehensive study of male/female patterns of interaction in the Black community. Some attention given to institutional impact, role changes and projected images of relationships.

319. The Ethnic Experience in the U.S. (3)

An examination of the dynamics of the development of our multicultural society, emphasizing study of the four distinct ethnic strands of American society (Asian American, Black American, Mexican American, and American Indian) and their role in the maintenance of cultural diversity in the United States. Same course as AIS 319, ASAM 319, CHLS 319, W/ST 319. (Lecture/Discussion.)

325. Psychology of Minorities (3)

Prerequisite: B/ST 110 or PSY 100. This course develops the concept of a minority psychology. Using comparative techniques and guest lecturers, this course introduces the student to common psychological consequences in the experience of being a minority person.

330. Politics of the Black Community (3)

Prerequisite: B/ST 210. Study of the perspectives, styles, problems and dynamics of political activity in the Black community.

331. Black Juvenile (3)

Prerequisite: B/ST 210 or consent of instructor. Critical approach to the problem of juvenile justice in the black community.

332. Civil Rights and the Law (3)

Designed to provide the student with a basic understanding of the interaction between the American legal system and civil rights of Blacks, other minorities, women, and the general citizenry.

335. Economic Development in the Black Community (3)

Prerequisite: B/ST 121. Development of business and banking institutions in the Black community. Some attention given to the impact of external factors on development.

337. Cultures of the Pan-African Peoples (3)

Prerequisite: B/ST 200 or consent of instructor. Presentation of a cultural map of African people emphasizing geography, migration and cultural similarities.

340. Research Topics in African-American Literature (3)

Prerequisite: B/ST 140. In-depth presentation and analysis of selected issues and dominant personalities in African-American literature; personality and issue to be matched.

343A. African Literature (3)

Prerequisites: Completion of GE Foundation requirements and one or more Explorations courses. A general survey of traditional and contemporary African Literature within the context of the historical, political, social, economic, and cultural movements. Also a comparison of Pan-African Literature and Western Literature.

343B. Caribbean Literature (3)

A general survey of traditional and contemporary Caribbean literature within the context of the historical, political, social, economic and cultural movements. Also a comparison of Pan-African literature and Western literature.

345. Politics of Black Power (3)

Systematic analysis of the Black Power movement of the 1960's, including contributions and contradictions of major organizations, leadership, and ideologies.

346. Black Theatre (3)

Prerequisites: All Foundation Courses. Introductory survey course of Black Theatre as a historic medium, profoundly revealing in its humanistic, literary, social and cultural heritage as it relates to Africa, America and the Caribbean.

353I. Black Religion (3)

Prerequisites: Completion of the GE Foundation, one or more exploration courses and upper division standing. A critical examination of selected spiritual and ethical traditions of the world African community with emphasis on Maat, Ifa, Christianity and Islam, their sacred texts and commentaries, major themes, representative figures, and including comparative analyses of the continental and diasporan expressions of these traditions.

363. History of African Art (3)

Survey of African art from antiquity to the present, with principal focus on sub-Saharan art.

370. Black Images in the Mass Media (3)

Prerequisite: B/ST 121. Examination of the portrayal of Black people in the mass media, past and present. Primary emphasis on newspapers, radio, films and television.

380. African Political Theory (3)

Prerequisite: B/ST 115. Examination of theorists and theories which shape African political philosophy. Special attention given to the concepts of Pan-Africanism, African socialism, Negritude and revolution.

381. Blacks and Party Politics (3)

An analysis of Black participation in the U.S. political party process. Special features will include information on Black participation in the Republican, Democratic and third-party organizations. Material and discussion on independent Black political party efforts will also be included.

400. Afro-American Social Thought (3)

Survey of African-American intellectual history, with emphasis on social theories and opposing schools of intellectual thought.

404. Contemporary Issues of the Third World Nations (3)

Study of the shifting power and international status of the Black world. Geo-politics and the diplomatic policies of selected countries will be highlighted.

410. The Black Family (3)

Prerequisite: B/ST 325 or consent of instructor. A systematic study and a social historical analysis of the structure and function of the Black family in the United States. There will also be a sociological/theoretical analysis and review of the models of family units, roles and interpersonal relations in society. The theoretical perspective will provide a framework to compare and contrast the Black family and other family units in America.

415. International Black Children's Literature (3)

A survey of literature for and/or about Black children by authors from Africa, the U.S., the Caribbean and the rest of the Diaspora.

420. Black Children in Public Schools (3)

Theories, concepts and principles relating to the intellectual growth, development and learning of Black children.

423. Problems in Psychological Assessment of African Americans (3)

Prerequisites: candidates must have a working knowledge of statistical concepts, upper-division standing in Black Studies or consent of instructor. Examination of issues, problems, and practices in the assessment of African American children.

424. Advocacy for Black Child Mental Health (3)

Prerequisites: Upper-division standing or consent of instructor. Examination of the essential mental health needs of Afro-American children, their legal and educational rights as well as preventive and remedial measures. Throughout the course, emphasis will be placed on many faces of advocacy the building of a system of delivery of human services at neighborhood levels for vital preventive and remedial needs.

430. African Political Leadership in the Twentieth Century (3)

The course is a critical examination of Africa's search in the 20th century for national liberation and cohesion, collectively built institutions, movement/parties, and ideological self-definition. A comparative study of traditional African leadership concepts and/or styles, and modern forms that have evolved since contact with the Europeans, will be undertaken. Focus will be on selected countries and major African leaders in Lusophone, Francophone, and Anglophone Africa. The content of the leaders' ideas will be analyzed; socio-politico-economic forces giving rise to those ideas will be studied.

432. Advanced Studies in Afro-American Music (3)

Prerequisite: B/ST 155. Study of the development, evolution and essence of Afro-American music in the 20th century from perspectives of Afro-American social and cultural history.

450. Black Writers Workshop (3)

Prerequisite: ENGL 100, B/ST 100, or equivalent. This course requires extensive writing in four major areas: poetry, drama, fiction and documentaries. It assumes that technical or grammatical problems of writing have been taken care of and focuses on themes which are Afro-centric.

452. Ecology of Black Crime (3)

Prerequisite: B/ST 210 or 332. Study of the interrelationships between the black criminal, the minority community and the criminal justice system.

460. African Thought (3)

Prerequisite: Background knowledge of Africa from history, political science, anthropology or sociology is highly recommended. Analysis of philosophical and religious systems of Africa from antiquity to present.

475. Racism and Sexism: An Analytical Approach (3)

Prerequisite: B/ST 332. An examination of institutions and a study of legislation which has been written and implemented in consequence of racism and sexism in American society. Social theories used to support concepts of racism and sexism will also be presented.

490. Special Topics in Black Studies (3)

Prerequisite: Consent of instructor. Topics of current interest in black studies selected for intensive development. May be repeated to a maximum of 6 units with different topics in the same semester. Topics will be announced in the *Schedule of Classes*.

495. Research Methods in Black Studies (3)

Prerequisites: B/ST 110, SOC 255 or equivalent statistics course, and 6 units upper-division work in Black Studies. This course is for the Department major. It will present information on the use of scientific methods in Black Studies, research theory, research design, sampling, measurement and science techniques. It will also focus on instrument construction as well as test reliability and validity.

498I. Ancient Egyptian Ethical Thought (3)

Prerequisites: Completion of the G.E. Foundation, one or more Exploration courses, and upper division standing. A critical study of the ethical thought of ancient Egypt with due attention to the theological, literary and socio-historical context in which it was developed and evolved. This will include a systematic examination of the major ethical texts of ancient Egypt: (1) the Sebaït (The Instructions); (b) the Ikeru (The Declarations of Virtue); (3) the Book of Khunanup; and (4) the Declarations of Innocence in the Pert-em-Heru (The Book of Coming Forth By Day). Also, appropriate comparisons will be made between the theological, ethical and general religious parallels of the ancient Egyptian tradition and the Jewish, Christian and Islamic traditions.

499. Directed Studies (1-3)

Prerequisite: Consent of instructor. Permits individual students to pursue topics of special research interest. May be repeated to a maximum of 6 units.

The College of Business Administration seeks to prepare its students for entry into successful careers in business. As each graduate pursues a successful career, it is anticipated that personal responsibility will be accepted for maintaining and enhancing the quality of the society in which business and the individual operate.

The College

The College of Business Administration has five departments: Accountancy; Finance, Real Estate and Law; Human Resources Management and Management; Information Systems and Marketing. Each is responsible for administering one or more of the degree options.

Overview of Programs

Accreditation

The College of Business Administration offers undergraduate and graduate programs of study. Both programs are nationally accredited by the Association to Advance Collegiate Schools of Business - International (AACSB), 600 Emerson Road, Suite 300, St. Louis, MO 63141-6762, phone: (314) 872-8481, and may lead to completion of the following:

Bachelor of Science in Business Administration

Specialization may be made in a choice of the following areas, hereafter referred to in this *Catalog* as Options:

Accountancy; Finance, Real Estate and Law; Human Resources Management; International Business; Management; Management Information Systems; Marketing; Operations Management. (See following pages for more information.)

Students who complete and formally declare two options may be regarded as having completed a double major, and appropriate notation can be made on the transcript.

Minors in Business Administration

The College of Business Administration has developed minors available to any undergraduate student. Significant preparation for business employment may be developed through completion of an organized program from one of the following areas: Management Information Systems, Human Resources Management, Marketing, Entrepreneurship. (Refer to the section on Minors for more information.)

Master of Business Administration

Specialization may be made in one of the following areas: Business Finance, Human Resources Management, Information Systems, Management, Marketing, Engineering Systems. (Refer to the following pages for more information.)

Student Services

Admission and Advising Information

The College of Business Administration maintains an advising and admissions office in CBA Room 105 for undergraduate students. There is an office for graduate students in CBA 363. Advisors are available in these offices throughout the semester to assist students with admission, registration, and degree requirement information. An undergraduate handbook is available in the campus copy center.

The Mentoring Business Program (MBP)

MBP is a support program within the College of Business Administration. Our focus is to assist students with their transition into college and into the business industry. Each student is paired with a mentor at each stage of their academic and professional development. Freshmen and sophomore students are mentored by upper division business students or faculty as they begin their educational journey at CSULB. Junior and senior students are connected with corporate professionals in business industry. This relationship assists our students with networking and internship opportunities as they prepare for their transition into their professional careers. The Mentoring Business Program also encourages students to become involved with a business student organization to assist them in meeting students and expanding their opportunities. We also provide business workshops, corporate tours and scholarships. For details regarding our application process, please call The Mentoring Business Program at (562) 985-2265.

Financial Assistance

Financial assistance is provided to business students through the University Financial Aid Office. That office administers funds made available through the federal and state governments and through certain private sources. Awards are made to students who demonstrate a need for assistance with educational expenses.

Selected scholarships and fellowships within the College of Business Administration are publicized. Consult the Director of Student Life and Development for information, CBA 210, (562) 985-8600.

Achievement Awards

Beta Gamma Sigma "Outstanding Student in Business" Applications are usually due April 1. The award is presented in early May at the annual Beta Gamma Sigma Installation and Banquet.

Outstanding Graduating Senior Applications are usually due March 1. The award is presented at the May commencement ceremony, and the recipient is also honored at an Alumni Association banquet in June.

The Wall Street Journal Award (Based on GPA) Applications from graduating seniors are usually due March 1. The award is presented at the May commencement ceremony.

Student Organizations

Numerous organizations are available for business students. They include: American Marketing Association, Beta Alpha Psi/Accounting Society, Human Resources Management Association (HRMA), Information Systems Students Association, The Society for the Advancement of Management, Beta Gamma Sigma, Black Business Students Association, Delta Sigma Pi, Hispanic Students Business Association, Long Beach Entrepreneur Society, Professional Women in Business, International Association of Students in Economics and Commerce (AIESEC), Financial Management Association, Operations Management Association and Pacific Rim.

The Associated Business Students Organization Council (ABSOC) is a facilitating and coordinating organization for business student organizations. ABSOC is composed of elected officers from each organization. Through these student organizations each year business students are provided opportunity to meet representatives of business and industry. Prominent executives are, in addition, invited to the campus for dialogue with business students. ABSOC and the Associated Students co-sponsor the

annual "Meet the Industries Night," a spring job fair which draws over 60 companies and several hundred students.

Beta Gamma Sigma: Beta Gamma Sigma, founded at the University of Wisconsin in 1907 as a business honor society, is the only honor society recognized by the AACSB - International. Membership is available to business students at California State University, Long Beach only because the College of Business Administration is accredited by AACSB.

Election to membership in Beta Gamma Sigma is the highest scholastic honor that a student in business administration can attain. To be eligible for membership at CSULB students must rank in the upper three percent of their junior class or the upper seven percent of their senior class, or rank in the upper ten percent of those receiving masters degrees in business administration.

The MBA Association is established to provide a mechanism to promote contact between members, potential employers and business people in the community through guest lecturers and other functions, to promote the flow of communication between individuals pursuing an MBA, and to establish a forum for discussion of issues affecting MBA students at CSULB. Every MBA student is eligible for membership and is encouraged to take an active role to enhance personal and association growth.

Computer and Information Technology

Students in the degree program develop basic understandings and competencies relating to information processing, the application of computers in business and government, management information systems concepts, and computer programming. A computer laboratory facility is maintained within the College to provide computer access for business students.

General Policies and Regulations

Specific University and College requirements are detailed in various sections of this *Catalog*. Every student must develop complete familiarity and understanding of the regulations and requirements by which successful completion of a program will be determined. (Also see pertinent section regarding University General Regulations and Procedures).

Admission Under Impaction

Fall and Spring freshman applicants to the Bachelor of Science in Business Administration will be placed in the pre-major code for Business Administration. Transfer applicants must apply to the University during the initial filing period of October and November for the following fall semester or August for the following spring semester. They must indicate their choice of major on the application.

Continuing students seeking admission to the upper-division major in Business Administration must submit a supplemental application to the College of Business Administration Advising Center (CBA, Room 105). Whereas there is no specific deadline for filing, it usually takes a minimum of two weeks to complete the application process. Therefore, students should file their applications no later than two weeks before their next Early Registration access date.

Applicants must be able to demonstrate that they will meet the following requirements for admission prior to the semester for which the application is submitted:

1. Completion of 56 semester units of baccalaureate-level work applicable toward a degree at CSULB.

2. Demonstration of computer literacy and competency by achieving one of the following.
 - A. A passing score (70 percent) on the CBA Computer Proficiency Examination, or
 - B. Completion with credit of IS 233 (Introduction to Computer Systems and Applications) or of an equivalent transfer course with a grade of "C" or better, or
 - C. Completion of IS 240 (Management Information Systems) or of an equivalent transfer course with a grade of "C" or better.

Applicants to the upper-division major with a cumulative GPA of 3.00 or higher are guaranteed admission to the major. Applicants with a cumulative GPA between 2.40 and 2.99 will be admitted on a space-available basis. Applicants with a cumulative GPA below 2.40 will not be admitted.

Special Enrollment Status

Enrollment through Open University (University College and Extension Services) is allowed only on a space available basis. Space availability is not based on the number of unoccupied chairs in a classroom. Instead, it is determined by the type of course and teaching method. The student must otherwise be qualified.

Disqualified students are not permitted to enroll in any course in the College of Business Administration.

Concurrent Enrollment/Transfer of Credit

Undergraduate students who wish to take course work in a community college or other university or college to meet CSULB College of Business Administration or General Education requirements must carefully observe University and College requirements. As noted below under Requirements for the Bachelor of Science in Business Administration, some courses must be taken at CSULB and cannot be transferred from another school. Business courses taken at other schools may be transferred for credit at CSULB if a grade of "C" or better was earned. No upper division credit will be given for lower division courses. For this purpose there are two categories of schools. Courses taken at a business school which is AACSB accredited are generally acceptable for major transfer credit at CSULB. Courses taken at non-AACSB accredited schools must have prior approval by the dean's designee.

Grading Policy

Business majors and minors may not exercise a Credit/No-Credit grading option for courses required by the College of Business Administration in their program. No course taken for Credit/No-Credit grading will be accepted to fulfill a Business requirement. Enrollment in a business course as an auditor is not permitted.

UNDERGRADUATE PROGRAMS

Bachelor of Science in Business Administration

Requirements

In order to graduate with a business degree from CSULB, a student must complete a minimum of 30 units here. At least 24 of these units must be upper division. Twelve of the upper division units must be in business.

A minimum of 124 units will be required for all options in business with the exception of Accountancy, which requires a minimum of 128 units. At least 12 upper division units in business, including MGMT 425 must be completed at CSULB. At least 50% of all units applied toward the degree must be taken outside of the College of Business Administration. Included in this 50% are statistics and economics courses.

1. Lower Division Courses:

ACCT 201; ECON 100, 101; FIN 220; MATH 114, 115, and PHIL 160 or 170 (Accountancy majors must take PHIL 160. MIS majors must take PHIL 170.

2. All business and pre-business majors shall demonstrate computer literacy and competency prior to taking junior and senior level courses. This requires one of the following:

A. A passing score (70%) on the Computer Proficiency Examination (CPE),

B. Completion of IS 233 with Credit (Cr) or "C" or better grade in a transfer equivalent course,

C. Completion of IS 240, or "C" or better grade in a transfer equivalent course.

3. Upper Division Courses (33-34 units):

A. CBA 300, ACCT 310 (Accountancy majors must take ACCT 320 instead of ACCT 310), ECON 333; FIN 300, 320; IS 300, 301, 310; HRM 360; MGMT 300; MKTG 300.

B. The capstone course, MGMT 425. This course must be taken at CSULB as a senior and after the upper division prerequisite core courses have been completed (ACCT 310 or 320, FIN 300; MGMT 300; MKTG 300).

C. Completion of at least one option (15-24 units); select from the options listed below.

4. Elective units to make up the total 124 units required for the degree (128 for Accountancy majors). Each student is encouraged to select electives for expansion of knowledge and intellectual interests as well as for preparation for business employment.

ACCOUNTANCY DEPARTMENT

**Option in Accountancy (code ACCTBS01)
(121 units)**

The Accountancy curriculum is designed to meet the general education goals of those entering the accounting profession. It satisfies the requirements established by the American Institute of Certified Public Accountants and may be used to meet educational requirements for the California CPA Certificate. The accounting program develops an understanding of an organization's management information system on a broad base of general education and business administration courses. The program is carefully planned and rigorous, building the conceptual, analytical, and communication skills necessary to succeed in the accounting profession. It prepares students for careers in all areas of accounting, including the necessary qualifications for professional examinations such as the C.P.A., C.M.A., C.I.A.

Requirements

ACCT 300A-B, 400, 451, 470, 480, and one course from ANTH, PSY, or SOC.

INFORMATION SYSTEMS DEPARTMENT

The Information Systems Department administers an option in Management Information Systems.

Option in Management Information Systems (code IS__BS01) (120 units)

This option prepares students for careers in Management Information Systems in business, education, and government. Emphasis is on systems management, information process and analysis, and new uses of information technology. Fundamentals of business information systems, computer hardware, system and application software, telecommunications, electronic business, and decision support systems are included to provide the student a solid foundation in this rapidly changing field. The curriculum is based on both the DPMA and ACM models.

Students in the Management Information Systems Option may choose one of the following three tracks within the Option: Applications Development, Business Telecommunications, or Electronic Commerce.

Applications Development Track

Requirements

A minimum of 18 units, of which 15 must include: IS 340, 355, 380, 385, 485; and one course to be selected from: IS 320, IS 464, IS 470, IS 480.

FAQ Concerning Road Maps for Completion of Undergraduate Degrees

For each undergraduate major, the on-line Catalog shows plans for scheduling all required courses to complete the degree in four, five, or six years.

While CSULB will make every effort to schedule classes at the times shown in the plans, we cannot guarantee that courses will be available in specific semesters. It is possible that shortage or budget or of personnel will make it impossible to offer as many classes as we would wish.

The plans are not substitutes for working with an advisor. You are strongly encouraged to see an advisor when planning your program each term.

I am a freshman. Do I have to choose now whether to follow the four, five, or six-year plan?

No. Most freshmen take 12-15 units. You need at least 12 units to receive full financial aid. With experience, you will be able to judge how heavy a load you find comfortable. This will depend on your outside obligations, such as a job, and on your personal circumstances. In theory, each unit requires three hours a week, including preparing for class, attending class, and completing assignments. Use these guidelines to budget your time and plan an appropriate schedule.

Must I take the courses in the semesters shown on the plan?

The plan shows one possible way of completing all requirements for the degree. Consult your advisor about whether it is essential to take a given course in the semester shown. There are some rules to keep in mind:

1) You can take the General Education Foundation courses (Composition, Oral Communication, Critical Thinking, Mathematics) in any semester in the first 36 units of baccalaureate-level course work completed at CSULB.

2) You cannot take upper division courses until you have completed at least 30 units. (Exceptions can be made for students who already have completed advanced study in the subject.) You cannot take General Education Capstone courses until you have completed at least 60 units.

3) For some majors it is essential to complete courses in the correct sequence. You cannot take a more advanced course until you have completed the prerequisite course(s).

4) You must complete all requirements for admission to impacted majors within the first 60 units.

I have been told that I must take one or more pre-baccalaureate courses. How can I plan my program?

Your advisor at SOAR can help you identify which courses must be postponed. You must still complete the minimum number of baccalaureate units required for the degree.

You may be able to catch up by taking additional courses in later semesters or by taking classes in summer or winter session, or you may choose to spend an additional semester completing the program. You cannot begin the sequence of required courses for some majors until you are ready for baccalaureate-level Mathematics. See your major advisor to develop a plan for scheduling the required courses.

I didn't complete the exact list of courses shown. Can I still graduate on time?

The answer depends on your major and on what courses you have completed. The plans are not rigid requirements; they are only intended to provide guidance in planning a program. There are many reasons for students to follow a different pattern, such as changing the major, choosing to take fewer classes in a given semester, choosing to complete a minor or a second major. See your advisor for help in planning a program that will work for you.

If I follow the plan, will I have all requirements for graduation completed?

The plans include the specific courses required for the major. For some majors, there are restrictions on the choice of major electives. It is important that you select General Education courses to meet the required distribution pattern. You may need to take an additional General Education course to complete the minimum number of units required for each category. This is likely to happen if you took three-unit courses in Category B, Physical Universe.

Business Telecommunications Track

Requirements

A minimum of 18 units, of which 15 units must include: IS 340, 355, 380, 455, 485; and one course to be selected from: IS 320, 456, 464, 470.

FINANCE, REAL ESTATE AND LAW DEPARTMENT

Option in Finance, Real Estate, and Law (code FIN__BS01) (120 units)

The objective of the finance curricula is to prepare students for a successful career in business with an understanding of the financial decision making process and its impact within the overall framework of the business enterprise. The finance curricula offers education in the management techniques and regulations applicable to financial management and investments. The curriculum draws on fundamental knowledge of statistics, computer logic and economics to develop advanced financial concepts. It explores the historical and current roles of various financial institutions and regulatory authorities; details the basic principles and techniques for valuing financial instruments on the basis of fundamentals and/or historical pricing trends; explores the methods of managing risk; and examines financial principles that govern international trade. The finance major may direct the concentration toward financial management or investments.

The financial management concentration provides an opportunity for the student to gain an understanding of the role of finance in the corporate environment. An understanding of investments at both the corporate and personal level is the objective of the investments concentration. Within these concentrations students are provided with an opportunity to gain an understanding of the role of the various aspects of law in

FAQ Concerning Road Maps for Completion
of Undergraduate Degrees

For each undergraduate major, the on-line Catalog shows plans for scheduling all required courses to complete the degree in four, five, or six years.

While CSULB will make every effort to schedule classes at the times shown in the plans, we cannot guarantee that courses will be available in specific semesters. It is possible that shortage or budget or of personnel will make it impossible to offer as many classes as we would wish.

The plans are not substitutes for working with an advisor. You are strongly encouraged to see an advisor when planning your program each term.

I am a freshman. Do I have to choose now whether to follow the four, five, or six-year plan?

No. Most freshmen take 12-15 units. You need at least 12 units to receive full financial aid. With experience, you will be able to judge how heavy a load you find comfortable. This will depend on your outside obligations, such as a job, and on your personal circumstances. In theory, each unit requires three hours a week, including preparing for class, attending class, and completing assignments. Use these guidelines to budget your time and plan an appropriate schedule.

Must I take the courses in the semesters shown on the plan?

The plan shows one possible way of completing all requirements for the degree. Consult your advisor about whether it is essential to take a given course in the semester shown. There are some rules to keep in mind:

1) You can take the General Education Foundation courses (Composition, Oral Communication, Critical Thinking, Mathematics) in any semester in the first 36 units of baccalaureate-level course work completed at CSULB.

2) You cannot take upper division courses until you have completed at least 30 units. (Exceptions can be made for students who already have completed advanced study in the subject.) You cannot take General Education Capstone courses until you have completed at least 60 units.

3) For some majors it is essential to complete courses in the correct sequence. You cannot take a more advanced course until you have completed the prerequisite course(s).

4) You must complete all requirements for admission to impacted majors within the first 60 units.

I have been told that I must take one or more pre-baccalaureate courses. How can I plan my program?

Your advisor at SOAR can help you identify which courses must be postponed. You must still complete the minimum number of baccalaureate units required for the degree.

You may be able to catch up by taking additional courses in later semesters or by taking classes in summer or winter session, or you may choose to spend an additional semester completing the program. You cannot begin the sequence of required courses for some majors until you are ready for baccalaureate-level Mathematics. See your major advisor to develop a plan for scheduling the required courses.

I didn't complete the exact list of courses shown. Can I still graduate on time?

The answer depends on your major and on what courses you have completed. The plans are not rigid requirements; they are only intended to provide guidance in planning a program. There are many reasons for students to follow a different pattern, such as changing the major, choosing to take fewer classes in a given semester, choosing to complete a minor or

a second major. See your advisor for help in planning a program that will work for you.

If I follow the plan, will I have all requirements for graduation completed?

The plans include the specific courses required for the major. For some majors, there are restrictions on the choice of major electives. It is important that you select General Education courses to meet the required distribution pattern. You may need to take an additional General Education course to complete the minimum number of units required for each category. This is likely to happen if you took three-unit courses in Category B, Physical Universe.

For each undergraduate major, the on-line Catalog shows plans for scheduling all required courses to complete the degree in four, five, or six years.

While CSULB will make every effort to schedule classes at the times shown in the plans, we cannot guarantee that courses will be available in specific semesters. It is possible that shortage or budget or of personnel will make it impossible to offer as many classes as we would wish.

The plans are not substitutes for working with an advisor. You are strongly encouraged to see an advisor when planning your program each term.

I am a freshman. Do I have to choose now whether to follow the four, five, or six-year plan?

No. Most freshmen take 12-15 units. You need at least 12 units to receive full financial aid. With experience, you will be able to judge how heavy a load you find comfortable. This will depend on your outside obligations, such as a job, and on your personal circumstances. In theory, each unit requires three hours a week, including preparing for class, attending class, and completing assignments. Use these guidelines to budget your time and plan an appropriate schedule.

Must I take the courses in the semesters shown on the plan?

The plan shows one possible way of completing all requirements for the degree. Consult your advisor about whether it is essential to take a given course in the semester shown. There are some rules to keep in mind:

1) You can take the General Education Foundation courses (Composition, Oral Communication, Critical Thinking, Mathematics) in any semester in the first 36 units of baccalaureate-level course work completed at CSULB.

2) You cannot take upper division courses until you have completed at least 30 units. (Exceptions can be made for students who already have completed advanced study in the subject.) You cannot take General Education Capstone courses until you have completed at least 60 units.

3) For some majors it is essential to complete courses in the correct sequence. You cannot take a more advanced course until you have completed the prerequisite course(s).

4) You must complete all requirements for admission to impacted majors within the first 60 units.

I have been told that I must take one or more pre-baccalaureate courses. How can I plan my program?

Your advisor at SOAR can help you identify which courses must be postponed. You must still complete the minimum number of baccalaureate units required for the degree.

You may be able to catch up by taking additional courses in later semesters or by taking classes in summer or winter session, or you may choose to spend an additional semester completing the program. You cannot begin the sequence of required courses for some majors until you are ready for baccalaureate-level Mathematics. See your major advisor to develop a plan for scheduling the required courses.

I didn't complete the exact list of courses shown. Can I still graduate on time?

The answer depends on your major and on what courses you have completed. The plans are not rigid requirements; they are only intended to provide guidance in planning a program. There are many reasons for students to follow a different pattern, such as changing the major, choosing to take fewer classes in a given semester, choosing to complete a minor or a second major. See your advisor for help in planning a program that will work for you.

If I follow the plan, will I have all requirements for graduation completed?

The plans include the specific courses required for the major. For some majors, there are restrictions on the choice of major electives. It is important that you select General Education courses to meet the required distribution pattern. You may need to take an additional General Education course to complete the minimum number of units required for each category. This is likely to happen if you took three-unit courses in Category B, Physical Universe.

Option in International Business

For requirements please see the International Business section of this catalog.

MANAGEMENT AND HUMAN RESOURCES MANAGEMENT DEPARTMENT

The Management/Human Resources Management Department offers options in Human Resources Management, Management and Operations Management.

Option in Management (code MGMTBS01) (120 units)

The objective of the management curricula is to prepare students for a successful career in management of the business enterprise. Attention is given to the need to create and maintain a desirable internal environment. Interface of that environment with the external environment in relation to success of the enterprise is considered. Philosophical basis for the practice of management, ethical considerations and human values are stressed. The student's exposure to theory and concepts leads to the acquiring of knowledge and skills to assume first professional positions and progress through middle and upper management careers.

**Option in Operations Management
(code MGMTBS02) (120 units)**

The objective of the operations management curriculum is to prepare and stimulate student competence in the conceptual, systematic and analytical tools prerequisite for entry level and advanced positions in goods-producing and service-orientated industries. Emphasis is placed on the systems approach which stresses the concepts, techniques and policies essential for the economical and effective design, operations and control of manpower, facilities, materials, capital and informational inputs of organizations. Students are introduced to productivity tools such as Total Quality Control, Manufacturing Resource Planning, Just-In-Time Techniques, Simulation and Animation of Production Operations, Optimized Production Techniques, Kanban Systems, Japanese Productivity Techniques. Decision Support Systems.

Requirements

15 units to be taken as follows:

1. 6 units from MGMT 410, 411
2. 3 to 9 units from MGMT 412, 413, 414
3. Up to 6 units from MGMT 426, 430, 454, 455.

FAQ Concerning Road Maps for Completion of Undergraduate Degrees

For each undergraduate major, the on-line Catalog shows plans for scheduling all required courses to complete the degree in four, five, or six years.

While CSULB will make every effort to schedule classes at the times shown in the plans, we cannot guarantee that courses will be available in specific semesters. It is possible that shortage or budget or of personnel will make it impossible to offer as many classes as we would wish.

The plans are not substitutes for working with an advisor. You are strongly encouraged to see an advisor when planning your program each term.

I am a freshman. Do I have to choose now whether to follow the four, five, or six-year plan?

No. Most freshmen take 12-15 units. You need at least 12 units to receive full financial aid. With experience, you will be able to judge how heavy a load you find comfortable. This will depend on your outside obligations, such as a job, and on your personal circumstances. In theory, each unit requires three hours a week, including preparing for class, attending class, and completing assignments. Use these guidelines to budget your time and plan an appropriate schedule.

Must I take the courses in the semesters shown on the plan?

The plan shows one possible way of completing all requirements for the degree. Consult your advisor about whether it is essential to take a

given course in the semester shown. There are some rules to keep in mind:

1) You can take the General Education Foundation courses (Composition, Oral Communication, Critical Thinking, Mathematics) in any semester in the first 36 units of baccalaureate-level course work completed at CSULB.

2) You cannot take upper division courses until you have completed at least 30 units. (Exceptions can be made for students who already have completed advanced study in the subject.) You cannot take General Education Capstone courses until you have completed at least 60 units.

3) For some majors it is essential to complete courses in the correct sequence. You cannot take a more advanced course until you have completed the prerequisite course(s).

4) You must complete all requirements for admission to impacted majors within the first 60 units.

I have been told that I must take one or more pre-baccalaureate courses. How can I plan my program?

Your advisor at SOAR can help you identify which courses must be postponed. You must still complete the minimum number of baccalaureate units required for the degree.

You may be able to catch up by taking additional courses in later semesters or by taking classes in summer or winter session, or you may choose to spend an additional semester completing the program. You cannot begin the sequence of required courses for some majors until you are ready for baccalaureate-level Mathematics. See your major advisor to develop a plan for scheduling the required courses.

I didn't complete the exact list of courses shown. Can I still graduate on time?

The answer depends on your major and on what courses you have completed. The plans are not rigid requirements; they are only intended to provide guidance in planning a program. There are many reasons for students to follow a different pattern, such as changing the major, choosing to take fewer classes in a given semester, choosing to complete a minor or a second major. See your advisor for help in planning a program that will work for you.

If I follow the plan, will I have all requirements for graduation completed?

The plans include the specific courses required for the major. For some majors, there are restrictions on the choice of major electives. It is important that you select General Education courses to meet the required distribution pattern. You may need to take an additional General Education course to complete the minimum number of units required for each category. This is likely to happen if you took three-unit courses in Category B, Physical Universe.

Option in Human Resources Management (code MGMTBS03) (120 units)

The Human Resources Management Option is designed not only for those who have an interest in working in the functional areas of HRM, but also for everyone who wants to become a member of management at any level in either the private or the public sector of the economy. The faculty integrate the theoretical with the practical to produce graduates with highly marketable skills. The major objectives of this option are (1) to provide students with theoretical foundations for understanding how employees are motivated to accomplish organizational goals, (2) to develop the practical skills necessary for employment in positions designed to attract, encourage, develop and retain human resources, (3) to de-

velop an understanding of the theoretical and practical approaches to human resources management, (4) to develop aspiring leaders with a strong sense of ethics and social responsibility and an awareness of how societal changes necessitate organizational change. The curriculum emphasizes critical thinking, creative problem solving, and personal development to enhance managers' performance in a dynamic, changing, culturally diverse and globally expanding work environment.

Requirements

1. HRM 361
2. 12 units selected from HRM 440, 445, 446, 458, 460, 462, 463, 465

MARKETING DEPARTMENT

Option in Marketing (code MKTGBS01)
(120 units)

The discipline of Marketing, which is fundamental to all business enterprises, is largely a social process. The justification of any enterprise, be it involved in service or in the production or delivery of goods, is that it meets the needs of individuals or segments of society. The function of marketing is to determine those needs, to provide the most effective means of informing actual and potential customers of the availability of the services and goods they require, and to deliver such services and goods.

Requirements

1. Nine units selected from MKTG 310, 330, 410, 420, 430, 437, 465, 480, 492
2. MKTG 470
3. MKTG 490
4. MKTG 494

FAQ Concerning Road Maps for Completion of Undergraduate Degrees

For each undergraduate major, the on-line Catalog shows plans for scheduling all required courses to complete the degree in four, five, or six years.

While CSULB will make every effort to schedule classes at the times shown in the plans, we cannot guarantee that courses will be available in specific semesters. It is possible that shortage or budget or of personnel will make it impossible to offer as many classes as we would wish.

The plans are not substitutes for working with an advisor. You are strongly encouraged to see an advisor when planning your program each term.

I am a freshman. Do I have to choose now whether to follow the four, five, or six-year plan?

No. Most freshmen take 12-15 units. You need at least 12 units to receive full financial aid. With experience, you will be able to judge how heavy a load you find comfortable. This will depend on your outside obligations, such as a job, and on your personal circumstances. In theory, each unit requires three hours a week, including preparing for class, attending class, and completing assignments. Use these guidelines to budget your time and plan an appropriate schedule.

Must I take the courses in the semesters shown on the plan?

The plan shows one possible way of completing all requirements for the degree. Consult your advisor about whether it is essential to take a given course in the semester shown. There are some rules to keep in mind:

- 1) You can take the General Education Foundation courses (Composition, Oral Communication, Critical Thinking, Mathematics) in any semester in the first 36 units of baccalaureate-level course work completed at CSULB.
- 2) You cannot take upper division courses until you have completed at least 30 units. (Exceptions can be made for students who already have completed advanced study in the subject.) You cannot take General Education Capstone courses until you have completed at least 60 units.
- 3) For some majors it is essential to complete courses in the correct sequence. You cannot take a more advanced course until you have completed the prerequisite course(s).
- 4) You must complete all requirements for admission to impacted majors within the first 60 units.

I have been told that I must take one or more pre-baccalaureate courses. How can I plan my program?

Your advisor at SOAR can help you identify which courses must be postponed. You must still complete the minimum number of baccalaureate units required for the degree.

You may be able to catch up by taking additional courses in later semesters or by taking classes in summer or winter session, or you may choose to spend an additional semester completing the program. You

cannot begin the sequence of required courses for some majors until you are ready for baccalaureate-level Mathematics. See your major advisor to develop a plan for scheduling the required courses.

I didn't complete the exact list of courses shown. Can I still graduate on time?

The answer depends on your major and on what courses you have completed. The plans are not rigid requirements; they are only intended to provide guidance in planning a program. There are many reasons for students to follow a different pattern, such as changing the major, choosing to take fewer classes in a given semester, choosing to complete a minor or a second major. See your advisor for help in planning a program that will work for you.

If I follow the plan, will I have all requirements for graduation completed?

The plans include the specific courses required for the major. For some majors, there are restrictions on the choice of major electives. It is important that you select General Education courses to meet the required distribution pattern. You may need to take an additional General Education course to complete the minimum number of units required for each category. This is likely to happen if you took three-unit courses in Category B, Physical Universe.

MINORS IN BUSINESS

The College of Business Administration offers several minors for non-Business majors.

Minor in Human Resources Management (code MGMTUM01)

Requirements

1. HRM 360, 361;
2. 12 units selected from HRM 440, 445, 446, 458, 460, 462, 463, 465.

Minor in Entrepreneurship (code CBA_UM01)

Requirements

1. MGMT 300, MGMT 421;
2. 12 units selected from ACCT 201; CBA 300; FIN 220, 300, 340, 495; HRM 360; IS 300, 355, 380, 445, 483, 484; MKTG 300, 330, 492, 310, 410, 430, 465, 480, 490, 495; MGMT 495 (two topics) as approved by the Management area of the Management/HRM Department.

Minor in Management Information Systems (code IS__UM01)

Requirements

1. IS 300;
2. 15 units chosen from IS 320, 340, 343, 355, 380, 385, 445, 446, 455, 456, 464, 470, 480, 483, 484, and 485.

Minor in Marketing (code MKTGUM01)

Requirements

1. 18 units including: MKTG 300;
2. 5 units selected from MKTG 310, 330, 420, 430, 437, 465, 470, 480, 490, 492, 495 or CBA 300 as approved by the Marketing Department.

Prerequisites

1. IS 310 is a prerequisite for MKTG 470;
2. MKTG 480 is a prerequisite for MKTG 481;
3. MKTG 300 is a prerequisite for MKTG 420, 430, 465, 470, 480, 481, 490 and 492.

Honors in Business

The College of Business Administration (CBA) at California State University, Long Beach, offers the opportunity for a selected group of outstanding students to earn a Certificate of Honors in Business. This enriched, more demanding program gives students an opportunity to enroll in special 'Honors Program' seminars composed of a small number of the CBA's most outstanding students that are taught by a select group of the College's faculty. In addition, students complete a senior project which can resemble an honors thesis or 'real-world' business project, depending on the individual student's interests and skills. Thus, the Honors Program offered by the CBA (CBAHP) is intended to be intellectually rewarding, and to provide a valuable experience that enhances students' future careers.

The program is designed as a 3-semester program, beginning in the Spring semester of the junior year. The program may be adjusted to accommodate students whose degree plan is 'off-track.' Typically, CBAHP students take a preliminary honors seminar the first semester, and progress to advanced honors seminars and their senior project the following academic year.

Admission

Admission is limited to approximately 20 students per year, but may increase depending on demand and college resources. Applicants are selected for their promise as interesting and creative individuals, not simply on the basis of grades or test scores.

Admission Requirements

Each applicant must meet the following basic requirements:

1. A minimum 3.5 cumulative GPA in all college and university courses, and a minimum of 3.5 GPA in the major. Students with a 3.2 – 3.49 may be admitted if they are nominated by two tenured faculty members of the CBA. A maximum of 10% of the students in the program will be admitted by nomination.
2. A minimum score of 14 on the WPE writing exam.
3. A completed application form. A personal interview may be requested at the discretion of the Program Director or Advisory Board.

4. At least one letter of reference from a tenured faculty member of the CBA. Additional outside character references (maximum of 2) are admissible as supplemental support for admission.

Applications should be addressed to the:
Director of the CBA Honors Program
College of Business Administration
1250 Bellflower Blvd.
Long Beach, CA 90840

Program Requirements

Award of the Certificate of Honors in Business requires:

1. Completion of the requirements of the major, with a minimum overall GPA of 3.5 and a minimum GPA in the major of 3.5.
2. A minimum GPA of 3.5 for all CBA Honors Program courses and seminars.
3. Completion of the 3 Honors Seminars. The seminars bring together scholars and noted business leaders from a broad range of disciplines/industries, and may involve multiple CBA faculty over the course of the program. Course projects are designed to 'fit' with the nature of the issues addressed, the expertise of the various distinguished guest speakers, and interests of the individual student.
4. Successful completion of the required Honors Thesis or Honors Practicum.
5. Students who fail to meet the above requirements or those who fail to enroll in CBA Honors Program courses will be withdrawn from the program. Others may also be withdrawn at the discretion of the Program Director for such reasons as unethical behavior or misconduct.

CERTIFICATES IN BUSINESS

Certificate in International Business

For requirements please see the International Business section of this catalog.

Certificate in Transportation (code CBA_CT01)

Requirements

1. A bachelor of science degree in Business Administration which may be completed concurrently with the certificate requirements;
2. A minimum of 15 units of transportation and transportation-related course work at California State University, Long Beach to be selected with the approval of the Program Director.
3. A grade of "C" or higher will be required for every course;
4. The certificate program does not permit the use of the Credit/No Credit option.

GRADUATE PROGRAMS

The College of Business Administration offers graduate study leading to the Master of Business Administration (MBA). The degree offered by the College of Business Administration is accredited by the AACSB - International.

The MBA is designed to serve the community by providing graduate business education to persons who show promise of leadership and success in business or related fields. For this reason, the faculty of the College of Business Administration has established rigorous standards of admission and completion for the program.

Admission to Graduate Study

In addition to admission by the University Office of Admissions and Records, an applicant for graduate study in business must apply to and be admitted by the College of Business Administration. It is the responsibility of the student to purchase a current *CSULB Catalog* which sets forth the policies of the University and the College of Business Administration graduate program.

Admission Procedures

1. Students interested in applying to the MBA program at CSULB should request a University application and an MBA Application Packet from the MBA office. Students must complete and submit both applications in order to be considered for admission into the graduate program in business. Students should submit Part A and B of the University Common Admissions form to the University Admissions Office. Students applying for the MBA should mark "other masters" as the degree objective, and 05011 as the major code. Students should submit the MBA application with two letters of recommendation directly to the MBA office.
2. Two complete sets of official transcripts of all college work attempted are required. One set must be sent to:
California State University, Long Beach, Office of Admissions and Records, 1250 Bellflower Blvd., Long Beach, CA 90840
The other set of official transcripts must be sent directly to the MBA Office at the following address:
California State University, Long Beach, College of Business Administration, MBA Office, 1250 Bellflower Blvd., Long Beach, CA 90840
3. Graduate Management Admission Test (GMAT) scores must be forwarded directly from the Educational Testing Service to the College of Business Administration MBA Office. Test scores over 5 years old will not be considered.
4. Foreign students should first contact the Center for International Education on campus for special deadlines. Foreign students are required to take the TOEFL test and achieve a score of 570, in addition to the steps above required of all applicants to the MBA program.

Deadlines for International applications are:

November for Fall Semester

August for Spring Semester

All transcripts, the MBA Application Packet, GMAT score and TOEFL score (if applicable), must be filed in the MBA Office by:

October 30 for Spring Semester

May 30 for Fall Semester (except for GMAT scores which must be received by June 15)

Because of high demand for admission to the MBA program, it is advisable that students make their application to the program early. No action can be taken on applications until all required documents are received. Application materials submitted after these dates will be reviewed and students will be admitted as time and space permits.

Criteria

Admission will be granted to students showing high promise of success in post-baccalaureate business study. Each applicant's potential for graduate management education is evaluated on the basis of six major criteria:

1. Past Academic Record, as reflected in undergraduate GPA.
2. Graduate Management Admission Test (GMAT)
3. Managerial Experience: demonstration of increasing levels of responsibility.
4. Communication: ability to clearly identify the applicant's leadership potential, educational goals and academic strengths.
5. Two Letters of Recommendation
6. Essays

Upon completion of evaluation by the College of Business Administration MBA office, the student is notified by mail of acceptance or rejection. If accepted, the letter includes an evaluation listing prerequisites met by the student in previous course work and those still requiring completion. Course work over ten years old at the time of acceptance will not be considered for satisfaction of the First Year Core.

Enrollment

Admission to the University as a graduate student does not constitute admission to graduate study in the College of Business Administration. MBA programs require additional admissions criteria.

Admission to Graduate Courses

Only students who have been admitted to the MBA program may take graduate courses in Business Administration. The only exception is that students who have been admitted to other Master's programs at CSULB may take select graduate courses in Business Administration to meet the requirements for their programs, with the permission of their major advisor and the MBA office.

Enrollment in graduate courses through the Open University will normally be permitted only for students in an AACSB accredited graduate program elsewhere with a letter of permission from the Associate Dean/Dean of the student's home university.

Continuous Enrollment

Once a student is accepted and enrolled in the MBA Program, he/she is expected to attend classes both semesters of the academic year. (Fall and Spring semesters are considered the regular semesters of the academic year; Summer attendance is optional.) Registration and completion of at least one course each semester satisfies the Continuous Enrollment requirement.

If a student is unable to satisfy the Continuous Enrollment requirement, he/she must complete the Educational Leave of Absence procedures detailed below. Continuous Enrollment

status will only be preserved if the student's absence from a regular semester has been processed and approved through the Educational Leave of Absence procedures.

Students failing to maintain Continuous Enrollment status will be administratively removed from the MBA Program. Registration privileges will be revoked. Students planning to continue in the MBA Program who have been administratively removed due to the violation of the Continuous Enrollment condition will be required to re-apply to the MBA Program.

Leave of Absence

Any MBA student in good academic standing may request an Educational Leave. Students requesting an Educational Leave must complete an Educational Leave Form, in advance, including an explanation of their reasons for seeking the leave and a statement of when they intend to resume academic work. The completed form is to be submitted for approval to the MBA Office and the University Admission & Records Office in accordance with University Policy.

The minimum initial leave will be one full semester; the maximum will be one calendar year. A student may request, in writing, in advance, an extension of leave. Under no circumstances will the total number of approved educational leaves exceed two, nor will the duration of approved educational leaves extend beyond two calendar years.

Students returning from an approved one semester educational leave are not required to submit an application form. Students on leave longer than one semester must apply for re-admission to the university. Students returning from an absence for which an educational leave was appropriate but not approved in advance must complete the entire MBA admission process.

An Educational Leave of Absence, if properly requested and processed, allows a student to satisfy the Continuous Enrollment requirement and therefore does not affect their good standing status. Students on an approved educational leave of absence will continue to receive registration information and access to the VRR system until the authorized leave time expires.

Graduate students who plan to enroll for credit at another institution of higher education during the leave period must obtain prior approval for the transfer of course credit to the student's program for the department chair in question and the MBA Director.

The period of an educational leave is counted in the calculation of elapsed time under the regulations governing the seven year maximum period for completion of the MBA degree requirements.

For the period of an educational leave the student's rights under the "Election of Regulation" rule are preserved, maintaining the right of the student to elect regulations as if he or she had maintained continuous attendance. See the *CSULB Catalog*, General Rules and Procedures section, for a complete explanation of the Election of Regulation - "Catalog Rights".

An educational leave presupposes no expenditure of University resources or faculty and staff time in behalf of the student during the period of the leave. In addition, no computer facilities, no library privileges, and no student services are available to a student on educational leave.

Transfer Credit

Assuming the Continuous Enrollment requirement has been satisfied, a maximum of six credits that closely complement the student's degree objectives may be applied toward the requirements for the MBA degree beyond the First Year Core under the following conditions:

1. the credits under consideration must be graduate credits
2. the course work must be taken at an AACSB accredited graduate program.
3. prior approval must be obtained from the MBA Director
4. prior approval must be obtained from the department chair of the course work being transferred.

The remaining units must be completed in courses at CSULB reserved exclusively for graduate students.

Scholastic Standards/Probation/Disqualification

A student who fails to maintain a cumulative GPA of 3.0 or higher in all work completed as a graduate student at this University or in all transferred work applied to the program will be placed on academic probation. The semester in which the student's GPA falls below 3.0 is the First Probationary Semester.

A student on probation, who at the end of the Second Probationary Semester (or summer, if classes are taken) fails to obtain a cumulative GPA of 3.0 or higher on all units attempted in post-baccalaureate work at CSULB, will be disqualified and removed from the graduate program. The student should note that the cumulative GPA is calculated by the University Admissions and Records Office and includes all upper division and graduate courses taken while enrolled in the graduate program.

A grade of "C" or better is required in any course taken to satisfy first or second year Core requirements. A grade of "B" or better is required in GBA 699. If either of these requirements is not met, a student must take the course a second time or withdraw from the program. A second failure to achieve the requirement grade will result in involuntary separation from the program. This requirement operates independently of the requirement for a cumulative GPA of 3.0 or better.

Master of Business Administration (code CBA_MB01)

The Master of Business Administration program develops competencies essential to functioning professionally in a complex and competitive business environment. The program prepares students for responsible administrative positions and provides the background essential for advancement in professional management careers. The Master of Business Administration degree encompasses a program of breadth which builds a wide range of competencies required for effective management while permitting students to specialize in a functional area.

The Master of Business Administration is normally a 48-unit program for the graduate without an undergraduate degree in Business.

Requirements

The Master of Business Administration program requires completion of a minimum of 36 units of graduate course work as established and approved by the College of Business Administration MBA office. The MBA program must include:

I. First Year Core	0-12
II. Second Year Core	21
III. Advanced Study	9
IV. Capstone Course	3
V. Integrative	<u>4</u>
Total units	36-48

Students who have not had an economics course prior to entering the MBA program must complete an economics course as a condition to obtaining an MBA degree.

I. First Year Core: Common Body of Knowledge

The masters degree presupposes mastery of a common body of knowledge. Students with a bachelor's degree in business from this University or from other AACSB accredited business schools within the last 10 years will have met much of the First Year Core requirements. Individual business Administration courses taken as an undergraduate student at another AACSB institution may also meet specific First Year Core requirements. Upon acceptance to the program, a student's transcripts are reviewed for completion of the necessary course work for mastery of the common body of knowledge. A grade of "C" or better is required to meet the criteria.

Waivers of First Year Core are based upon previous educational background at either a graduate or undergraduate level. Information on waivers may be obtained from the College of Business Administration, MBA Office. Students who have not met the entire common body of knowledge requirements prior to admission to the MBA Program will be required to enroll in the appropriate First Year Core courses. This core must be completed before enrollment in the Second Year Core: ACCT 500, FIN 520, MGMT 500, MKTG 500.

II. Advancement to Candidacy

Students admitted with all First Year Core requirements completed must file an application for Advancement to Candidacy for the degree after completion of their first 6 units. Other students must file the application during the semester in which the First Year Core requirements are to be completed. Prior to advancement to candidacy, a student must:

1. Be accepted into the MBA Program.
2. Maintain an overall minimum 3.0 cumulative GPA, including work transferred from other institutions, and a minimum 3.0 GPA in all work completed at this University.
3. Complete all First Year Core Requirements, with no grade lower than "C".
4. Pass the Writing Proficiency Examination. (See next section)
5. Prepare an official student program in consultation with the MBA Office. This program must include the Second-Year Core in effect at the time of Advancement to Candidacy, the 9 unit program for the area of Advanced Study and the Capstone Course, GBA 699, for a total of 37 units.

6. File the application for Advancement to Candidacy with the MBA office for approval by the MBA Director.

III. Second Year Core

Upon completion of the First Year Core, either by waiver or graduate course work, students move directly into the Second Year Core. (See section on Advancement to Candidacy). This core consists of seven courses (21 units) which provide the breadth requirements for the MBA degree at the advanced level: ACCT 610, FIN 600, HRM 652, IS 601, IS 602, MGMT 647, MKTG 661.

IV. Advanced Study

General MBA

The General MBA is designed for students with an undergraduate business degree or any other student desiring a more broad-based MBA curriculum. The General MBA normally requires 9 units of graduate course work in three different areas within the College of Business Administration subject to approval by the MBA Office.

Specialization

The specializations require 9 units of graduate course work in one area, one second year course and three electives. Each specialization should be planned in consultation with the MBA Office. Specializations are available in the following areas:

Accountancy

Requirements: nine elective units to be selected from ACCT 620, 630, 640, 650, 660, 670, 680, 695, 697.

Engineering Systems

The engineering systems specialization allows students with a strong engineering background to specialize within the MBA program in an area that may more closely match their career objectives. This specialization consists of graduate courses within the College of Engineering, subject to approval by the MBA Director.

Finance

Requirements: Nine elective units to be selected from FIN 524, 525, 620, 630, 650, 690.

Health Care Management

Requirements: HCA 502 and any two of the following: HCA 536, 537, 538, 550, 552.

Human Resources Management

Requirements: Nine elective units to be selected from HRM 650, 654, 655, 657, 658, 697.

Information Systems

Requirements: Nine elective units to be selected from IS 550, 564, 580, 584, 685.

Management

Requirements: Nine elective units to be selected from MGMT 542, 543, 645, 646, 647, 697.

Marketing

Requirements: Nine elective units to be selected from MKTG 610, 663, 665, 666, 668, 669, 695, 697.

Students may count 3 units of Directed Studies (697) toward the Advanced Study requirements. Elective courses designed to fulfill specialization requirements must be approved by the MBA Office through the completion and acceptance of the student's Advancement to Candidacy form.

V. Capstone Course: GBA 699

Integrated Analysis, GBA 699, is taken as the last or capstone course in the program. Students must plan to complete the Second Year Core before enrolling in GBA 699. This critical course is given during the Fall and Spring semesters. In this comprehensive analysis, the student will integrate the knowledge obtained in the functional areas. This capstone course serves in place of either comprehensive examination or thesis as the required evaluation of candidate competency. In lieu to completion of the required GBA 699, an MBA candidate may elect to complete a thesis for a minimum of four units credit.

Students must obtain a grade of "B" or better in GBA 699 in order to receive an MBA degree.

Application for acceptance into GBA 699 must be filed in the MBA Office before the end of the fourth week of instruction in the semester preceding enrollment in the course. Application forms and advisement relating to this important requirement are available in the MBA Office.

VI. Time Limitation

All courses on the official student program must be completed within seven years of the commencement of the first class toward fulfillment of the Second Year Core requirement.

VII. Writing Proficiency Examination

The Writing Proficiency Examination (WPE) is a unique requirement of this University. Satisfactory completion of the WPE is required before a student may Advance to Candidacy. Therefore, graduate students should register for the WPE in person when they first arrive on campus. CSULB will accept certain Graduation Writing Assessment Requirement (GWAR) Tests offered at other CSU campuses. The test must have been taken prior to initial enrollment at CSULB. The staff in Admissions and Records (BH 101) can clarify documentation required from each campus. Graduates must present the requirement documentation to the MBA Office as part of their application for Advancement to Candidacy. There are no exemptions to the requirement of an approved form of writing proficiency exam.

Undergraduate Courses (CBA)

Lower Division

130. Current Concepts of Business (3)

An overview of CBA options, including professional preparation and employment opportunities. Orientation to current CBA programs and requirements. Development of an understanding of contemporary business issues, including an introduction to major business functions. Strongly recommended for students interested in business careers.

Upper Division

300. International Business (3)

An introduction to the nature, dimensions, and environment of international business. Emphasis on business functions, practices, and decisions as they are influenced by cultural, political, economic, social, and institutional factors in various parts of the world. Diffusion of information technology. Letter grade only (A-F).

397. Junior Honors Seminar

Prerequisite: Acceptance into the CBA Honors Program. Empirical, theoretical, and applied research methodology: fundamentals and advanced topics. Visits by faculty and business professionals focus on current issues and methods for solving business problems. Literature review and written proposal required for Honors Thesis/Practicum. Letter grade only (A-F).

493. Business Internship (1-3)

Prerequisites: Classified business major and Instructor consent. Qualifying students will be placed in career-related paid assignments in private or public agencies or businesses. An organized plan utilizing a series of seminars and learning agreements is required along with selected reading and writing assignments. A minimum of 120 hours paid experience per semester is required. May be repeated to a maximum of 6 units.

495. Selected Topics (3)

Prerequisite: Consent of instructor. Topics of current interest in business administration selected for intensive study. May be repeated to a maximum of 6 units in different semesters. Topics will be announced in the *Schedule of Classes*.

497 Senior Honors Seminar I

Prerequisite: CBA 397. A continuation of CBA 397 with special emphasis on sampling, instrumentation, and data analysis (facilitated by sophisticated statistical software). Other topics covered may vary year-to-year depending on student interests and the expertise of contributory faculty/business professionals. Students are expected to perform the majority of the data collection and preliminary data analysis for their Honors Thesis/Practicum. Letter grade only (A-F).

499 Senior Honors Seminar II

Prerequisite: CBA 497. Final seminar in the CBA Honors Program, culminating with completion of the Honors Thesis/Practicum. All data analysis for the thesis/practicum is completed, findings are interpreted relative to the research hypotheses; and the final report is submitted for approval. Attention given to preparing manuscripts for publication, the academic review process, and making professional presentations. Learning by illustration and application via completion of the Honors Thesis/Practicum and visits by faculty and business leaders. Letter grade only (A-F).

Graduate Courses (GBA)

698. Thesis (2-4)

Prerequisite: GBA 601. Planning, preparation, and completion of a thesis in business administration.

699. Integrated Analysis (3)

Prerequisites: Student shall have completed all 2nd year core classes. Classified MBA status in the last semester or within six units of completion of the 33-unit minimum graduate program and advanced to candidacy. A comprehensive course which serves as the required terminal examination for College of Business Administration graduate candidates. A project is required. A study of a wide range of business problems and formulation of solutions to them. The object of this course is to assess student skills in integrating knowledge from all functional areas of business and applying them to complex business problems arising out of changing technology, competitive market conditions, social changes and governmental actions. The methodology may include cases, business simulation, and team teaching. A grade of "B" or better is required for successful completion. Students must file application for entry into GBA 699 no later than the fourth week of instruction in the semester preceding the one in which GBA 699 will be taken. Application forms are available in the MBA Office. Letter grade only (A-F).

Students desiring detailed information about Civil Engineering or Construction Engineering Management programs should contact the department office for referral to one of the faculty advisors.

Bachelor of Science in Civil Engineering

The Civil Engineering Program provides students with a broad educational background essential to modern civil engineering practice and research. The program is built around a basic core of mathematics, natural and engineering sciences common to accredited professional engineering programs. It is planned to give a selection of basic engineering-science and design education to enable the graduate to begin a career in any of the various fields of practice in civil engineering or to prepare for graduate study in related engineering majors. It makes possible a systematic and integrated foundation in the principles of structural analysis and design, transportation systems, environmental systems, geo-technical engineering, water resources engineering, materials, construction engineering management, and information technology. Opportunity to explore a particular area of interest is offered in the wide selection of civil engineering design electives to permit students a sequence of courses related to the area of their choice.

Bachelor of Science in Construction Engineering Management

The four-year program in Construction Engineering Management leads to the Bachelor of Science degree. Major emphasis is placed on organizing and managing the construction phase of society's efforts to improve the environment. The constructor is an important member of the building team and requires a professional knowledge of techniques, materials, equipment, job planning and cost control to add to the contributions of the planning and design professions. Graduates of this program can help supply the urgent needs of the construction industry and its related fields.

Every effort is made to provide a well-integrated program which will give the student the opportunity to develop the proficiencies necessary for a successful, professional career in construction. The program is also designed to accommodate students who may wish to enter the University in a four-year program, or who may wish to transfer credits earned at other colleges or approved technical or military service schools. It is recommended that prospective students, prior to submitting an application for admission, be advised by a member of the Construction Engineering Management faculty to discuss departmental requirements and the admission requirements of the University.

Facilities

The four engineering buildings house laboratory facilities in fluid mechanics and hydraulics, materials of construction geo-technical engineering, earthquake engineering and structures, engineering mechanics, surveying urban and environmental engineering, and construction methods and practice. The Department of Civil Engineering offers graduate study programs leading to the degrees of Master of Science in civil engineering (M.S.C.E.) and the advanced degree of civil engineer (C.E.). These programs provide opportunities for graduate students to develop as civil engineers capable of competent research, design, and application through integrated curricula of engineering and science while permitting a concentration in the student's area of interest. Areas of specialization include: construction engineering management, environmental engineering, water resources engineering, geo-technical engineering, structural engineering, and transportation engineering.

Additional information concerning the programs, special facilities, laboratories and research possibilities is contained in the Civil Engineering Department brochures. The department actively participates in MSE programs of interdisciplinary nature with course offerings and theses/directed studies in management engineering, safety engineering systems and structural mechanics.

Some graduate laboratory, teaching and research assistantships are available to qualified graduate students. Applications should be sent to the department chair.

Advisory and Development Council

The Department of Civil Engineering is supported by two Advisory and Development Councils:

The Civil Engineering Advisory and Development Council

The Advisory Council consists of *outstanding engineers and executives* from industry and government in Southern California. Its function is to form a liaison between the University and industry and to keep the administration and faculty informed of modern engineering practices. This ensures that the curricula are kept up-to-date. It also advises on placement opportunities before and after graduation.

Construction Engineering Management Advisory and Development Council

The advisory council, composed of leaders actively engaged in areas of construction with which the programs are concerned, continually provides information and guidance about industrial developments in methods, materials and techniques so that the programs reflect the best of current practices. The members examine various aspects of the programs and make recommendations in course content, methods and/or facilities. Present membership in the council is made up of representatives from the different sectors of the construction industry.

ABET Accreditation

The Bachelor of Science in Civil Engineering is accredited by the EAC (Engineering Association Commission) of the Accreditation Board for Engineering and Technology (ABET) (Accreditation Board for Engineering and Technology, Inc., 111 Market Place, Suite #1050, Baltimore, MD 21202, phone: 410-347-7710, website: <http://www.abet.org>). Students enrolling in this program are strongly advised to meet with their undergraduate advisor as early as possible to become familiar with the details of the ABET requirements in math/sciences, humanities and social sciences areas, engineering sciences, and design.

Construction Engineering Management and Engineering Technology Advisory Council

The advisory council, composed of leaders actively engaged in areas of construction and technology with which the programs are concerned, continually provides information and guidance about industrial developments in methods, materials and techniques so that the programs reflect the best of current practices. The members examine various aspects of the programs and make recommendations for changes in course content, methods and/or facilities. Present membership in the council is made up of representatives from the different sectors of the American industries or corporations.

Bachelor of Science in Civil Engineering (code CE__BS01) (131 units)

Mission

To educate and prepare students to succeed in the civil engineering profession by providing them with essential technical tools and skills which will enable them to perform current and future civil engineering tasks and to promote the need for life long learning.

Objectives

1. Graduates will have the necessary analytical and experimental skills to perform in the civil engineering profession.
2. Graduates will be prepared to apply the theory and experimental tools to the solution of practical design problems.
3. Graduates will be provided with the knowledge to understand the role of civil engineers in the global and societal contexts and to recognize the need for life long learning.
4. Graduates will be educated in the potential ethical and social implications in civil engineering practice and foster communication and interaction skills with other professionals and community at large.

Requirements

A minimum of 131 units required.

A grade of "C" or better must be achieved in all prerequisites for all Civil Engineering courses.

Lower Division: BIOL 200 or MICR 200; CHEM 111A; CE 130, 200, 205, 206; MATH 122, 123, 224; MAE 172; PHYS 151, 152 (or EE 210 and 210L).

Upper Division: GEOL 370; CE 335, 345, 346, 359, 364, 406, 407, 426, 437, 459, 481, 490; ECON 300; MATH 370A; MAE 330, 371, 373; six units of technical design electives from: CE 427, 438, 445, 455, 456, 457, 466, 495; two laboratories from: CE 336, 491, MAE 374; three units of technical electives from: CE 429, 435, 446, 458.

FOUR YEAR PLAN TO COMPLETE THE BACHELOR OF SCIENCE IN CIVIL ENGINEERING DEGREE (CE__BS01)

Engineering students may waive six units of General Education. (Category D.2 and c.3 or E)

Bachelor of Science in Construction Engineering Management (code ET__BS01) (132 units)

The four-year program in Construction Engineering Management leads to the Bachelor of Science degree. Major emphasis is placed on organizing and managing the construction phase of society's efforts to improve the environment. The constructor is an important member of the building team and requires a professional knowledge of techniques, materials, equipment, job planning and cost control to add to the contributions of the planning and design professions. Graduates of this program can help supply the urgent needs of the construction industry and its related fields.

Every effort is made to provide a well-integrated program which will give the student the opportunity to develop the proficiencies necessary for a successful, professional career in construction. The program is also designed to accommodate students who may wish to enter the University in a four-year program, or who may wish to transfer credits earned to other colleges or approved technical or military service Schools. It is recommended that prospective students, prior to submitting an application for admission, be advised by a member of the Construction Engineering Management faculty to discuss departmental requirements and the admission requirements of the University.

All Construction Engineering Management students must receive a minimum grade of "C" in each of the prerequisite courses before enrolling in any Construction Engineering Management course. In addition to any other all-university requirements regarding grade point averages for graduation, a Construction Engineering Management student must achieve a minimum 2.0 average in all Construction Engineering Management courses.

Requirements

Lower Division Basic Engineering Science Courses: MATH 122; ENGR 203; PHYS 100 A&B; CEM 121, 125, 130, 130L, 202, 204, 205, 205L.

Construction Engineering Management Courses:

Lower Division: ACCT 201 or CEM 201, 225, 235, 235L.

Upper Division: CEM 300L, 304, 321, 325, 328, 335, 335L, 345, 365, 375, 404, 410, 421, 423, 425, 426, 428, 430, 431, 435, 438, 490; ECON 300; ENGR 310; MGMT 300.

Upper Division Elective Courses: Plus four units of approved electives selected in consultation with an advisor from:

A. *Design-build Emphasis*: CEM 373, 374, 409, 443

B. *Facility Management Emphasis*: CEM 409, 432, 433, 434, 436

C. *Specialty Contractors*: CEM 409, 465, 475

Fieldwork Requirements

Fieldwork experience is required for the BS in Construction Engineering Management, consisting of no less than three months full-time (or equivalent part-time) of employment in an approved industry or governmental agency. The student must hold a position equivalent to a technician or higher which affords the opportunity to exercise responsibility usually given to those who have completed two years of college. The fieldwork must be completed prior to graduation, be certified and approved by the faculty of the Department.

FOUR YEAR PLAN TO COMPLETE THE B.S. IN CONSTRUCTION ENGINEERING MANAGEMENT (ET_BS01)

132 UNITS REQUIRED DEPARTMENT OF CIVIL ENGINEERING AND CONSTRUCTION ENGINEERING MANAGEMENT

Semester 1		Semester 2	
Univ 100	1	CEM 130&130L Const Surv & LAB	2

FAQ Concerning Road Maps for Completion of Undergraduate Degrees

For each undergraduate major, the on-line Catalog shows plans for scheduling all required courses to complete the degree in four, five, or six years.

While CSULB will make every effort to schedule classes at the times shown in the plans, we cannot guarantee that courses will be available in specific semesters. It is possible that shortage or budget or of personnel will make it impossible to offer as many classes as we would wish.

The plans are not substitutes for working with an advisor. You are strongly encouraged to see an advisor when planning your program each term.

I am a freshman. Do I have to choose now whether to follow the four, five, or six-year plan?

No. Most freshmen take 12-15 units. You need at least 12 units to receive full financial aid. With experience, you will be able to judge how heavy a load you find comfortable. This will depend on your outside obligations, such as a job, and on your personal circumstances. In theory, each unit requires three hours a week, including preparing for class, attending class, and completing assignments. Use these guidelines to budget your time and plan an appropriate schedule.

Must I take the courses in the semesters shown on the plan?

The plan shows one possible way of completing all requirements for the degree. Consult your advisor about whether it is essential to take a given course in the semester shown. There are some rules to keep in mind:

1) You can take the General Education Foundation courses (Composition, Oral Communication, Critical Thinking, Mathematics) in any semester in the first 36 units of baccalaureate-level course work completed at CSULB.

2) You cannot take upper division courses until you have completed at least 30 units. (Exceptions can be made for students who already have completed advanced study in the subject.) You cannot take General Education Capstone courses until you have completed at least 60 units.

3) For some majors it is essential to complete courses in the correct sequence. You cannot take a more advanced course until you have completed the prerequisite course(s).

4) You must complete all requirements for admission to impacted majors within the first 60 units.

I have been told that I must take one or more pre-baccalaureate courses. How can I plan my program?

Your advisor at SOAR can help you identify which courses must be postponed. You must still complete the minimum number of baccalaureate units required for the degree.

You may be able to catch up by taking additional courses in later semesters or by taking classes in summer or winter session, or you may choose to spend an additional semester completing the program. You cannot begin the sequence of required courses for some majors until you are ready for baccalaureate-level Mathematics. See your major advisor to develop a plan for scheduling the required courses.

I didn't complete the exact list of courses shown. Can I still graduate on time?

The answer depends on your major and on what courses you have completed. The plans are not rigid requirements; they are only intended to provide guidance in planning a program. There are many reasons for students to follow a different pattern, such as changing the major, choosing to take fewer classes in a given semester, choosing to complete a minor or a second major. See your advisor for help in planning a program that will work for you.

If I follow the plan, will I have all requirements for graduation completed?

The plans include the specific courses required for the major. For some majors, there are restrictions on the choice of major electives. It is important that you select General Education courses to meet the required distribution pattern. You may need to take an additional General Education course to complete the minimum number of units required for each category. This is likely to happen if you took three-unit courses in Category B, Physical Universe.

Waste Engineering and Management Certificate (code CE__CT01)

The 24-unit Certificate Program in Waste Management is designed to provide the interested student or qualified practitioner with the very latest in education and training in the field of management of waste as well as related resource and energy recovery.

The program is conducted in cooperation with local engineering consulting firms and government agencies and could accommodate an internship of three units through directed study (CE 697).

The 24-unit certificate program may be taken (1) by a graduate as a matriculated student, (2) admitted to a CSULB graduate degree program, or admitted as an unclassified graduate student.

Regardless of how the program is taken, a grade of "C" or better must be obtained in all courses applied to the certificate, with an overall G.P.A. of 3.0. Courses taken on Credit/No Credit or Audit basis will not apply to the certificate. Graduate students taking courses in this program are reminded that grades received will be included in calculations of the M.S. requirement.

Requirements

1. Completion of an accredited baccalaureate degree in engineering or a related scientific discipline, with appropriate prerequisites to be met.
2. Satisfactory completion of 24 units which must include 15 units selected from C E 531, 543, 565; Public Policy and Administration 590 (Waste Management and Policy Regulation); a minimum of nine units (electives) selected from the following: C E 504, 562, 563, 564, 566, 567, 569; CH E 555, and 585.. At least one course should normally be from non-Civil Engineering offerings.
3. Passing score in WPE.
4. File a program application card with Admissions and Records, and file for the Certificate at least one semester prior to completion.

Facilities Operations Certificate (code ET__CT01)

Advisor - Tesfai Goitom (Civil Engineering)

Department Office - VEC 301

Telephone - (562) 985-8020

The Certificate Program in Facilities Operations is designed to qualify the graduate to serve in plant engineering, industrial construction coordination, facilities development and design, plant layout, and facilities project management. Examples of the myriad positions available to the graduate of this program include facilities planner, construction supervisor, facilities or plant supervisor, facilities project analyst, and facilities designer analyst.

This program provides the Facilities Operations graduate with a depth of technical knowledge in facilities operations-oriented technical courses, as well as the knowledge of behavioral sciences essential for managing technical functions.

Requirement

1. The Certificate in Facilities Operations may be earned concurrently with or subsequent to the baccalaureate degree.
2. This program is open to all majors who have fulfilled the prerequisites as stated below.
3. The program requires a total of 25 units as specified below.
 - a. The completion of supporting technical courses chosen in consultation with an advisor.
 - b. 25 units are required from the following courses: CEM 410 or ET 410, CEM 121, 321, 374, 409, 431, 432, 433, 434, 436.
4. Any deviation from this program requires the written permission of the program advisor.

Master of Science in Civil Engineering (code CE__MS01)

Prerequisites

1. A bachelor's degree in an accredited curriculum in civil engineering; or
2. A bachelor's degree in engineering, a natural science or other appropriate discipline with the requirement that essential undergraduate prerequisites in civil engineering be satisfied with a minimum GPA of 2.7 in the last 60 semester units attempted;
3. Graduate students must consult with the graduate advisor for information concerning procedures and requirements for appropriate approval of their courses of study prior to enrolling in their graduate programs.

Advancement to Candidacy

1. Removal of all undergraduate deficiencies as determined by the Department Graduate Studies Committee;
2. Completed at least 12 graduate units at CSULB; minimum GPA of 3.0; currently enrolled;
3. Passing the Writing Proficiency Examination.

Requirements

Completion of a minimum of 30 units beyond the bachelor's degree and graduate coursework as follows:

1. A minimum of 24 units in engineering, probability and statistics and mathematics courses with 18 units of 500-/600-level courses in Civil Engineering. Within these 18 units a student may include six units of CE 698 or three units of CE 697; Students are required to complete successfully either CE 697 or CE 698;
2. Six units of electives selected from approved upper-division or graduate courses in appropriate subjects;
3. Fulfill one of the following alternatives:
 - I - Write and present orally a thesis to be approved by the thesis committee;
 - II - Pass a written comprehensive examination on coursework in the student's program.

Civil Engineer Degree (code CE__CE01)

The program leading to the Civil Engineer degree offers the qualified student professionally oriented courses with greater concentration in civil engineering than is required by the master of science in civil engineering. This program encourages appropriate advanced studies in other disciplines of the University.

Prerequisites

1. A master of science degree in civil engineering from an accredited institution with a minimum GPA of 3.5; or
2. A bachelor of science degree in civil engineering from an accredited institution with a minimum GPA of 3.0; or
3. A bachelor of science degree in engineering, mathematics, physical sciences or other appropriate disciplines from an accredited institution with a minimum GPA of 3.0 with the requirement that essential undergraduate prerequisites in civil engineering will be satisfied prior to commencing the student's civil engineering degree program;
4. The graduate student must consult with the graduate advisor and Civil Engineering Department graduate brochure for information concerning departmental procedures and requirements and for appropriate approvals of the course of study prior to enrolling in courses in the student's graduate program.

Exceptional cases not meeting the above minimum GPA may be considered by the Department Graduate Studies Committee.

Advancement to Candidacy

1. A Department Graduate Studies Committee, consisting of the graduate student's advisor and at least two other faculty members, will be responsible for the formulation and supervision of each individual graduate student's program;
2. The committee shall determine candidacy admission, and requirements as to removal of undergraduate and/or graduate prerequisite deficiencies;
3. Prior to determining advancement requirements the committee may, at its discretion, require the student to take an examination in the chosen area.

Requirements

1. Completion of a minimum of 60 units beyond the bachelor's degree and graduate courses, approved by the student's Department Graduate Studies Committee including:
 - a. A minimum of 36 units of 500- and 600-level civil engineering courses including a thesis of nine units to be written and presented orally;
 - b. Twenty-four units of 400-, 500- and 600-level approved electives.
2. No more than 30 units completed before advancement to candidacy may be used in completing the requirements for the CE degree.

Courses (C E)

Lower Division

130. Surveying and Mapping (2)

Corequisite: MAE 172, or consent of instructor. Theory and practice of plane surveying, including the use of instruments, measurements and keeping field notes of distances, angles, elevations, traversing and plane tabling. Plotting of surveying data as related to profiling contours and topography. Study and interpretation of maps relating to civil engineering. Integration of laser theodolite data with computer surveying software. (Lecture-Problems 1 hour, Fieldwork 3 hours.) (CAN ENGR 10)

200. Materials for Civil Engineering (2)

Prerequisites: CHEM 111A, PHYS 151. Prerequisite or corequisite: CE 205. Basic properties of materials in civil engineering, including concrete, masonry, steel, wood, asphalt and composites. (Lecture 1 hour, Laboratory 3 hours.) Letter grade only (A-F).

205. Analytical Mechanics I (Statics) (3)

Prerequisite: PHYS 151. Prerequisite or corequisite: MATH 123. Application of the mechanics of equilibrium to force systems using analytical and graphical solutions of problems involving structures and machines. (Lecture-Problems 3 hours.) (CAN ENGR 8)

206. Computer Programming and Civil Engineering Applications I (2)

Prerequisites: MATH 122, PHYS 151. Introduction to Fortran programming and application of computers to elementary civil engineering problems. (Lecture-Problems 1 hour, Laboratory 3 hours.)

Upper Division

306. Computer Programming and Civil Engineering Applications II (2)

Prerequisite: CE 206. Application of numerical methods and computer programming to the solution of civil engineering problems. Letter grade only (A-F). (Lecture-Problems 1 hour, Laboratory 3 hours.)

335. Fluid Mechanics (3)

Prerequisites: MATH 224, C E 205 or consent of instructor. Properties of fluids, fluid statics, fluid dynamics, dynamic similitude, flow of compressible and incompressible fluids in closed conduits, uniform flow in prismatic open channels. Letter grade only (A-F). (Lecture-Problems 3 hours.)

336. Fluid Mechanics Laboratory (1)

Prerequisite: ENGL 100 or equivalent. Prerequisite or corequisite: C E 335. Experiments in and study of the phenomena of fluid flow. Letter grade only (A-F). (Laboratory 3 hours.)

345. Geotechnical Engineering I (3)

Corequisites: MAE 373; GEOL 370. Soil mechanics applied to engineering structures. Soil exploration, identification, classification, drainage, stability and bearing capacity. (Lecture-Problems 3 hours.)

346. Geotechnical Engineering Laboratory (1)

Prerequisite: ENGL 100 or equivalent. Corequisite: CE 345. Laboratory investigation and experiments in the phenomena of soil mechanics. (Laboratory 3 hours)

359. Structural Analysis I (3)

Prerequisite: MAE 373. Analysis of structures including trusses, beams, and frames, conjugate beam, virtual work, energy methods, approximate methods, and influence lines. Use of code based finite element computer programs in analysis of frame and truss type structures. (Lecture-Problems 3 hours). Letter grade only (A-F)

364. Environmental Engineering (3)

Prerequisite or corequisite: CE 335; Prerequisite: ENGL 100 or equivalent. Study, simulations and design of the environmental elements of a community. Special emphasis is made in the field of water quality. Introduction to land and air pollution abatement and environmental health engineering. Standard laboratory methods of water and wastewater analysis. (Lecture 2 hours, Laboratory 3 hours)

370. Analytical Mechanics (3)

Prerequisites: PHYS 151; Prerequisite or corequisite: MATH 123. Fundamental principles of statics, kinematics and kinetics, with application to idealized structures and systems. Intended for Electrical Engineering majors. Not open to Civil or Mechanical Engineering majors. Letter grade only (A-F). (Lecture-Problems 3 hours.)

404. Laboratory Techniques (1)

Prerequisites: ENGL 100 or equivalent, senior standing in civil engineering and consent of instructor. Study in the techniques of organizing and directing of the civil engineering laboratory. May be repeated to maximum of 3 units. Letter grade only (A-F). (Conference 1 hour, Laboratory 3 hours.)

405. Special Topics in Civil Engineering (3)

Prerequisite: Senior standing in civil engineering or consent of instructor. Selected topics from recent advances in civil engineering. Course content will vary from year to year. May be repeated to a maximum of 6 units. (Lecture-Problems 3 hours.)

406./514. Engineering Economy and Administration (3)

Prerequisite or Corequisite: ECON 300 or consent of instructor. Engineering management principles and economic analysis: with time value of money, after-tax analysis for rate of return. Graduate students will be required to do an additional assignment. (Lecture-Problems 3 hours.) Letter grade only (A-F).

407. Probability and Statistics in Civil Engineering (2)

Prerequisites: MATH 370A and senior standing. Analysis of uncertainties, and applications of the basic theories of probability and statistics in civil engineering areas of geotechnical, environmental, water resources, structural and transportation engineering. (Lecture-problems 1 hour, Laboratory 3 hrs.) Letter grade only (A-F).

408. Special Problems (1-3)

Prerequisite: Senior standing in civil engineering. Assigned topics in technical literature or laboratory projects and report on same. Letter grade only (A-F).

410. Concrete Materials and Construction Engineering (3)

Prerequisite: CE 200 or consent of instructor. Advances in materials for making concretes, mixed design using computers. Modern applications of concrete construction including buildings, transportation structures, rehabilitation of infrastructures. Polymer concretes. Quality control, durability and economics. Graduate students will be required to do additional readings from journals, research reports and advanced texts, and write a research term paper to deal with Problems of current interest on concrete materials and advanced concrete construction engineering methods. (Lecture-Problems 2 hours, Laboratory 3 hours).

411. Computer Aided Design and Analysis for Civil Engineers (3)

Prerequisite: CE 206 and senior standing. Techniques for utilizing selected computer models currently recognized by the civil engineering profession. Case studies, capabilities and limitations of these models. Application of selected models in the planning, analysis and design of civil engineering projects. (Lecture-Problems 3 hours.) Letter grade only (A-F).

426. Transportation Engineering (3)

Prerequisites: CE 345, CE 406 and Senior standing, or consent of the instructor. Theory, Design and operation of various modes of transportation. (Lecture-Problems 3 hours).

427. Highway Design (3)

Prerequisite: C E 345. Design problems in highway engineering. Design project. (Lecture-Problems 3 hours.)

429./529. Traffic Engineering (3)

Prerequisite: CE 426 or consent of instructor. Traffic Engineering as related to studies, planning, operation and administration. Graduate students will be required to do extra work, including assigned readings and a term paper in order to understand the planning and design of complex highway projects involving the relationship of traffic data and interpretation for design and applications. (Lecture-Problems 3 hours.) Letter grade only (A-F).

435. Hydrology and Water Resources Engineering (3)

Prerequisite: C E 335. Fundamental surface and ground water hydrology concepts and quantitative methods. Selected topics and procedures of the hydrological cycle. Planning, development and management of water resource surface systems. (Lecture-Problems 3 hours.)

437. Engineering Hydraulics (3)

Prerequisites: C E 335, MATH 370 A. Theory and analysis of steady uniform and non-uniform flow in open conduits. Energy and momentum principles, critical flow computations and applications, design of channels, computations of gradually varied, spatially varied and rapidly varied flows. (Lecture-Problems 3 hours.)

438. Hydraulic Engineering Design I (3)

Prerequisite: CE 335. Application of hydraulic principles to the design of dams, water courses, water systems and their related structures and devices. (Lecture-Problems 3 hours)

445. Geotechnical Engineering II (3)

Prerequisites: CE 345, 346. Methods of design and construction of various geotechnical engineering projects utilizing theory of soil mechanics. (Lecture-Problems 3 hours.) Letter grade only (A-F).

446./542. Geotechnical Projects (3)

Prerequisite: CE 345. Design and problem solving oriented geotechnical projects using soil mechanics theory and experimental methods according to the current state-of-the-art practice. Emphasis is placed on the fields of slope stability, pile foundation, seepage and soil dynamics. Graduate students will be required to do additional readings from journals, research reports and advanced texts, and write a research term paper to deal with current topics in geotechnical engineering, including soil remediation for waste treatment and landfill, and soil dynamics problems in foundations and earthquake engineering. (Lecture-Problems 3 hours)

455. Structural Steel Design (3)

Prerequisite: C E 458. Detailed design of components with typical codes and specifications. (Lecture-Problems 3 hours.)

456./516. Timber Design (3)

Prerequisite: CE 359. Corequisite: CE 458. Design of stressed skin panels, supporting members, frames and their connections. Applications to timber structures and concrete framework. Graduate students will be required to do required readings and term paper linking material and structural behavior to design codes, applications. (Lecture-Problems 3 hours). Letter grade only (A-F).

Courses (C E)

457./517. Reinforced Masonry Design (3)

Prerequisite: CE 359. Corequisite: CE 458. Theory, design and application of reinforced masonry (brick and block) in compliance with the Uniform Building Code. Earthquake provisions. Construction and specifications. Design of high rise buildings, industrial buildings, retaining walls. Advanced students will be required to do a design project using a response spectrum of a two-story building; assigned readings from journals and a research term paper linking behavior of reinforced masonry systems to design codes and design applications for wind and seismic effects. Learn to utilize code based masonry finite element programs in design of footings, shear walls, beams and columns. (Lecture-Problems 3 hours.) Letter grade only (A-F).

458. Structural Analysis II (3)

Prerequisite: CE 359. Solution of indeterminate truss and frame structures using moment distribution and slope deflection methods. Introduction to matrix methods. Energy theorems and virtual work principles. Use of code based finite element computer programs in the analysis of indeterminate structural systems including frames, trusses, plates and shells. (Lecture-Problems 3 hours.)

459. Reinforced Concrete Design I (3)

Prerequisite: C E 200 and C E 359. Theory and design of structural elements of reinforced concrete, analysis by working stress and ultimate strength design theories. (Lecture-Problems 3 hours.)

466. Environmental Systems Design (3)

Prerequisites: CE 364 or consent of instructor. Principles of environmental systems design. Design and planning of systems for water distribution, wastewater collection and storm water management. (Lecture-Problems 3 hours)

469./569. Hazardous and Toxic Waste Engineering Management (3)

Prerequisite: Consent of instructor. Engineering analysis of hazardous and toxic waste problems of contemporary interest. Current technical specifications at federal, state and local level. Engineering planning, design and management considerations. Detailed engineering, chemical, biological and risk-cost effectiveness and effect on public health. Current literature. Case studies. Term project for graduate students. (Research paper/design project.) (Lecture-Problems 3 hours.) Letter grade only (A-F).

481. Professional Practice In Civil Engineering (1)

Prerequisite: Senior standing. Topics related to practice of civil engineering profession. Professional society meetings and readings. (Lecture-Problems 1 hour.)

490. Senior Design Project (3)

Prerequisites: WPE, completion of all 300-level engineering courses for the civil engineering major and consent of department undergraduate advisor. Normally taken in the last year of the undergraduate program. A supervised design laboratory, with a required group project incorporating all aspects from concept to completed design and oral presentations. In addition to technical and design issues, social, environmental, and economic issues are discussed relative to each project. Ethical concepts relating to Civil Engineering profession are also discussed within each group, as well as by guest lecturers consisting of professional Civil Engineers. Letter grade only (A-F). (Lecture-Problems 2 hours, Design laboratory 3 hours.)

491. Structures Laboratory (1)

Prerequisites: CE 359 and ENGL 100 or equivalent. Prerequisites or corequisites CE 455, CE 459; Laboratory examination of structural concepts. Utilize computer simulation modeling techniques in combination with structural tests. (Laboratory 3 hours.)

495. Seismic Design I (3)

Prerequisites: CE 455, 459. Elements of lateral-force design in steel, concrete, masonry, and timber structures. Application of current building codes. (Lecture 3 hours.)

497. Senior Problem Directed Studies (2)

Prerequisite or corequisite: CE 406, 481, 490. Directed study on assigned topics or lab/field studies practicum and report on same.

Graduate Level**500. Engineering Analysis I (3)**

Prerequisites: MATH 370A. Application of analytical methods to engineering problems. Differential equations and series solutions, Bessel functions and Legendre polynomials, boundary value and eigenvalue problems, Fourier series, partial differential equations, vector analysis. (Lecture-Problems 3 hours) Letter grade only (A-F).

501. Engineering Analysis II (3)

Prerequisites: MATH 370A. Analysis of engineering mechanics by matrix theory and complex variables; introduction to numerical techniques. (Lecture-Problems 3 hours.) Letter grade only (A-F).

502. Finite Element Methods II (3)

Prerequisite: Consent of instructor. Theory of finite element methods. Discretization of continuum, element stiffness matrices and direct stiffness formulation. Application to frame, plane stress and strain, plate and shell problems using SAP. (Lecture-Problems 3 hours.) Letter grade only (A-F).

503. Selected Topics in Civil Engineering (3)

Prerequisites: Graduate standing and consent of instructor. Selected topics, with laboratory work required, from the most recent developments in civil engineering. Course content will vary from year to year and the specific topic will be recorded on the student's transcript. May be repeated to a maximum of 6 units. No more than six units of CE 503 or CE 504 may be counted for the Master's Degree. (Lecture-Problems 2 hours, Laboratory 3 hrs) Letter grade only (A-F).

504. Advanced Topics in Civil Engineering (3)

Prerequisites: Graduate standing or consent of instructor. Selected topics from recent developments in civil engineering. Course content will vary from year to year. May be repeated to a maximum of 6 units. No more than six units of CE 503 and/or CE 504 may be counted for the master's degree. (Lecture-Problems 3 hrs) Letter grade only (A-F).

508. Probabilistic and Statistical Methods in Engineering Applications (3)

Prerequisites: Graduate standing or consent of instructor. Civil Engineering applications of nondeterministic models and decision theory. Applications of proven statistical computer programs. (Lecture-Problems 3 hours.) Letter grade only (A-F).

509. Computational Methods in Civil Engineering (3)

Prerequisites: Graduate standing or consent of instructor. Numerical analysis and computer methods applied to various branches, including special problem-oriented languages. Application of proven computer programs. (Lecture-problems 2 hours, Laboratory 3 hours) Letter grade only (A-F).

514./406. Engineering Economy and Administration (3)

Prerequisite or Corequisite: ECON 300 or consent of instructor. Engineering management principles and economic analysis: with time value of money, after-tax analysis for rate of return. Graduate students will be required to do an additional assignment. (Lecture-Problems 3 hours.) Letter grade only (A-F).

516./456. Timber Design (3)

Prerequisite: CE 359. Corequisite: CE 458. Design of stressed skin panels, supporting members, frames and their connections. Applications to timber structures and concrete formwork. Graduate students will be required to do required readings and term paper linking material and structural behavior to design codes, applications. (Lecture-Problems 3 hours) Letter grade only (A-F).

517./457. Reinforced Masonry Design (3)

Prerequisite: CE 359. Corequisite: CE 458. Theory, design and application of reinforced masonry (brick and block) in compliance with the Uniform Building Code. Earthquake provisions. Construction and specifications. Design of high rise buildings, dustrial buildings, retaining walls. Advanced students will be required to do a design project using a response spectrum of a two-story building; assigned readings from journals and a research term paper linking behavior of reinforced masonry systems to design codes and design applications for wind and seismic effects. Learn to utilize code based masonry finite element programs in design of footings, shear walls, beams and columns. (Lecture-Problems 3 hours.) Letter grade only (A-F).

520. Seaport Planning and Design (3)

Prerequisite: CE 426 or consent of instructor. Planning and design of seaports and facilities as access systems. Support transportation, use analysis and ocean transport crafts. Site selection and comprehensive planning. (Lecture-Problems 3 hours.) Letter grade only (A-F).

522. Transportation Planning (3)

Prerequisite: C E 426 or consent of instructor. Planning of fixed facilities for various modes of transportation in urban areas. Engineering administration and integration of transportation systems. (Lecture-Problems 3 hours) Letter grade only (A-F).

526. Pavement Engineering (3)

Corequisite: C E 427 or consent of instructor. Aggregate, binder systems. Theory and design of pavement structures. (Lecture-Problems 3 hours.) Letter grade only (A-F).

529./429. Traffic Engineering (3)

Prerequisite: CE 426 or consent of instructor. Traffic Engineering as related to studies, planning, operation and administration. Graduate students will be required to do extra work, including assigned readings and a term paper in order to understand the planning and design of complex highway projects involving the relationship of traffic data and interpretation for design and applications. (Lecture-Problems 3 hours) Letter grade only (A-F).

531. Groundwater and Seepage (3)

Prerequisites: C E 335, 345 or consent of instructor. Theory and application of ground-water flow and seepage through earth structures. (Lecture-Problems 3 hours.) Letter grade only (A-F).

532. Sediment Transportation (3)

Prerequisite: C E 437. Phenomena of sediment transportation related to streams and marine environments. (Lecture-Problems 3 hours.) Letter grade only (A-F).

535. Advanced Hydrology (3)

Prerequisites: Graduate standing or consent of instructor. Theory and application of surface hydrology. Hydrologic statistics, dynamic wave routing, frequency analysis and risk analysis. Simulation of design flows, flood forecasting, flood plain analysis and hydrologic design. Mathematical models, numerical methods in analysis and evaluation. (Lecture-Problems 3 hours.) Letter grade only (A-F).

536. Urban Surface Water Management (3)

Prerequisite: CE 437 or consent of instructor. Planning and design of facilities to control flooding, erosion, sedimentation, and non-point source pollution for urban storm water runoff management. Presentation of analysis and design methodologies, structural and non-structural measures for management, and master planning principles. (Lecture-Problems 3 hours.) Letter grade only (A-F).

538. Hydraulic Engineering Design II (3)

Prerequisites: C E 437, 438 or consent of instructor. Design of water supply networks, hydraulic transitions, controls and structures. Hydraulic power conversion. River engineering. Water resources systems. (Lecture-Problems 3 hours.) Letter grade only (A-F).

542./446. Geotechnical Projects (3)

Prerequisite: CE 345. Design and problem solving oriented geotechnical projects using soil mechanics theory and experimental methods according to the current state-of-the-art practice. Emphasis is placed on the fields of slope stability, pile foundation, seepage and soil dynamics. Graduate students will be required to do additional readings from journals, research reports and advanced texts, and write a research term paper to deal with current topics in geotechnical engineering, including soil remediation for waste treatment and landfill, and soil dynamics problems in foundations and earthquake engineering. (Lecture-Problems 3 hours) Letter grade only (A-F).

543. Waste Management and Landfill Engineering (3)

Prerequisites: Graduate standing or consent of instructor. Advanced principles and practices of landfill engineering for waste management and subsurface flow problems. Presentation of research and case studies in geotechnical aspects of waste management and landfill engineering. (Lecture-Problems 3 hours) Letter grade only (A-F).

545. Rock Mechanics in Engineering Practice (3)

Prerequisites: CE 345, 346, or consent of instructor. Principles of rock mechanics with emphasis on engineering practices for problems of slopes, foundations and tunnels. Same course as GEOL 545. (Lecture-Problems 3 hours) Letter grade only (A-F).

546. Theory and Design of Foundation Structures (3)

Prerequisites: CE 345 or consent of instructor. Foundation, explorations, stress and deformation relationships and design of various footings, piles, piers and caissons. Analysis of lateral loads and design of retaining structures, machinery foundations and foundation dewatering. (Lecture-Problems 3 hours) Letter grade only (A-F).

547. Soil Dynamics (3)

Prerequisites: CE 345 or consent of instructor. Theories and field behaviors of dynamically loaded foundation systems and soil responses with emphasis on engineering applications. (Lecture-Problems 3 hours) Letter grade only (A-F).

548. Geotechnical Engineering III (3)

Prerequisite: C E 345 or consent of instructor. Stress-strain time relationship of soils. Theory and methods of analysis with special emphasis on the applications and limitations in soil engineering. (Lecture-Problems 3 hours.) Letter grade only (A-F).

551. Prestressed Concrete (3)

Prerequisite: C E 459. Principles of prestressed concrete. materials used, applications to structural design, review of existing specifications. (Lecture-Problems 3 hours.) Letter grade only (A-F).

552. Theory of Plates and Shells (3)

Prerequisite: Completion of C E Graduate MATH Requirement. Review of theory of elasticity; formulation of general equation of bending of thin elastic plates; methods of obtaining exact and approximate solutions; membrane and bending theories of shells with emphasis on cylindrical shells and shells of revolution. (Lecture-Problems 3 hours.) Letter grade only (A-F).

553. Behavior and Design of Steel Structures (3)

Prerequisite: C E 455. Study of torsion, unsymmetrical bending, stability. Plastic design, code provisions and commentary. Design of complete structural systems in steel. (Lecture-Problems 3 hours.) Letter grade only (A-F).

555. Seismic Design II (3)

Prerequisite: C E 495 or consent of instructor. Characteristics of earthquakes and seismicity response spectra, modal methods of analysis, practical examples of elastic and inelastic response of structures to earthquake motions. New development in codes, computer applications. (Lecture-Problems 3 hrs) Letter grade only (A-F).

557. Advanced Structural Analysis (3)

Prerequisite: C E 458 or consent of instructor. Virtual forces and displacements, strain energy and complementary energy. Force and displacement matrix methods. Computer applications to planar and space frames, trusses, floor beams and shear wall systems. (Lecture-Problems 3 hours.) Letter grade only (A-F).

558. Dynamics of Structures (3)

Prerequisite: CE 458 or consent of instructor. Response of structures and structural components having one or more degrees of freedom. Damping and inelastic action; earthquake and nuclear blasts, dynamic resistance of structural elements and structures, elastic and inelastic response of structures. (Lecture-Problems 3 hours) Letter grade only (A-F).

562. Water and Wastewater Treatment Design I (3)

Prerequisite: C E 364 or consent of instructor. Design of physical and chemical processes for water and wastewater treatment, with emphasis on water treatment plants. (Lecture-Problems 3 hours.) Letter grade only (A-F).

563. Water and Wastewater Treatment Design II (3)

Prerequisite: C E 562 or consent of instructor. Design of chemical and biological processes for water and wastewater treatment with emphasis on wastewater treatment. (Lecture-Problems 3 hours.) Letter grade only (A-F).

564. Environmental Health Engineering (3)

Prerequisites: CE 364 or consent of instructor. Health and safety aspects of environmental quality and related engineering systems. Regulatory aspects. Projects and case studies. (Lecture-Problems 3 hours) Letter grade only (A-F).

Courses (C E)

565. Environmental Waste Engineering (3)

Prerequisites: CE 364 or consent of instructor. Generation, treatment, resource recovery and disposal of industrial wastes, solid wastes and hazardous materials. (Lecture-Problems 3 hrs)

566. Unit Operations in Environmental Engineering (3)

Prerequisites: CE 364 or consent of instructor. Civil engineering applications of the fundamentals of chemical reactions, kinetics of biochemical systems, gas transfer operations, liquid/solid separations, solubility equilibria, adsorption, ion exchange and membrane processes. (Lecture-Problems 3 hours) Letter grade only (A-F).

567. Liquid and Solid Waste Project Planning and Management (3)

Prerequisites: CE 364 or consent of instructor. The presentation of research and case studies of liquid and solid waste project planning and management. (Lecture-Problems 3 hours) Letter grade only (A-F).

569./469. Hazardous and Toxic Waste Engineering Management (3)

Prerequisite: Consent of instructor. Engineering analysis of hazardous and toxic waste problems of contemporary interest. Current technical specifications at federal, state and local level. Engineering planning, design and management considerations. Detailed engineering, chemical, biological and risk-cost effectiveness and effect on public health. Current literature. Case studies. Term project for graduate students (Research paper/design project.) (Lecture-Problems 3 hours.) Letter grade only (A-F).

570. Engineering Management Principles and Practices (3)

Prerequisites: CE 406, graduate standing or consent of instructor. Transition of engineers into management. Analysis of technical manager's functions at lower and middle levels as support to corporate management. Principles of engineering management and applications to private and public sector organizations. Case studies of practices in different technical organizations. (Lecture 3 hours.) Letter grade only (A-F).

571. Construction Planning and Cost Control (3)

Prerequisites: Graduate standing or consent of instructor. Planning, scheduling and resource allocation for a complex construction project. Topics include traditional critical path method, advanced computer expert systems and optimization techniques for construction planning and cost control. (Lecture-Problems 3 hours.) Letter grade only (A-F).

573. Engineering Specifications, Law and Contracts (3)

Prerequisite: Graduate standing or consent of instructor. Application of law of contracts to construction contracts. Legal matters of concern to engineers. (Lecture-Problems 3 hours) Letter grade only (A-F).

574. Methods, Analysis and Design of Construction Operations (3)

Prerequisite: CE 571 or consent of instructor. Equipment, methods, analysis and design of a construction operation, from site work improvement and data acquisition to modeling and design. Particular attention will be paid to interfacing between design and construction activities and work method development, productivity and safety. (Lecture-Problems 3 hours.) Letter grade only (A-F).

576. Construction Organization and Management (3)

Prerequisites: Graduate standing or consent of instructor. An introduction to construction organization, control concepts and labor, emphasizing the business aspects of construction engineering management. Topics include legal framework, finance in construction management, labor, accounting and other decision making in the construction business. (Lecture-Problems 3 hours) Letter grade only (A-F).

577. Business Aspects and Finance of Construction Projects (3)

Prerequisite: CE 406 or consent of instructor. Economics and business aspects in construction, financing structure, methodology, and project financial evaluation. Emphasis is on financial aspects in property acquisition, development, construction, and project management. (Lecture-Problems 3 hours.) Letter grade only (A-F).

578. Management of Advanced Technologies in Construction (3)

Prerequisite: Consent of instructor. New development of advanced technology as applied to construction industry. Productivity and competitiveness in construction on the basis of new technology. Comparison of construction innovation in the U.S., Japan, and other countries. (Lecture-problems 3 hours) Letter grade only (A-F).

582. Management of Productivity and Quality (3)

Prerequisite: CE 570 or consent of instructor. System approaches to quality and productivity in construction. Total Quality Management (TQM) in construction engineering and management. Investigation of methods and strategies for improving competitiveness at the company level. Domestic and international competitiveness in the construction business. (Lecture-Problems 3 hours.) Letter grade only (A-F).

629./729. Traffic Operations (3)

Prerequisite: CE 429 or CE 529, or consent of instructor. Principles of traffic flow, signal timing optimization, signal coordination, and traffic. Graduates enroll in CE 629; post graduates enroll in CE 729. Post-graduate students will be required to do additional work (Lecture-Problems 3 hours). Letter grade only (A-F).

630./730. Mathematical Modeling in Hydraulic Engineering (3)

Prerequisite: CE 437 or consent of instructor. Numerical techniques for solving hydraulic problems in water supply, waste water disposal and storm drainage systems. Prediction of important parameters by mathematical modeling on problems encountered in artificial channels, rivers, estuaries and marine environments. M.S. students register in CE 630; Ph.D. students register in CE 730. Ph.D. students will be required to complete a more rigorous computer project. (Lecture-Problems 3 hours.) Letter grade only (A-F).

640./740. Mathematical Modeling in Geotechnical Engineering (3)

Prerequisite: Graduate standing or consent of instructor. Mathematical modeling techniques used in geotechnical engineering. Application of proven computer programs. M.S. students register in CE 640; Ph.D. students register in CE 740. Ph.D. students will be required to complete a more rigorous computer project. (Lecture-Problems 3 hours.) Letter grade only (A-F).

696. Research Methods (1)

Prerequisite: Candidacy or consent of instructor. Bibliographical and library techniques and resources. Preparation and presentation of theses and directed studies technical papers. Letter grade only (A-F).

697. Directed Studies (1-3)

Prerequisite: Graduate standing. Corequisite: CE 696 or written consent of directed studies advisor. MSCE and MSE degree candidates in Civil Engineering and Interdisciplinary Areas need to have either CE 697 or CE 698 as their program requirement. Theoretical and experimental problems in civil engineering requiring intensive analysis. Letter grade only (A-F).

698. Thesis (2-6)

Prerequisite: Admission to candidacy for degree of master of science in civil engineering. Corequisite: CE 696 or written consent of faculty advisor. Planning, preparation and completion of a thesis and/or project in the field of civil engineering. May be repeated to a maximum of 6 units.

699. Thesis (3-9)

Prerequisite: Admission to candidacy for degree of Civil Engineer. Corequisite: CE 696 or written consent of faculty advisor. Planning, preparation and completion of a thesis in the field of civil engineering practice. May be repeated to a maximum of 9 units.

729./629. Traffic Operations (3)

Prerequisite: CE 429 or CE 529, or consent of instructor. Principles of traffic flow, signal timing optimization, signal coordination, and traffic. Graduates enroll in CE 629; post graduates enroll in CE 729. Post-graduate students will be required to do additional work (Lecture-Problems 3 hours). Letter grade only (A-F).

730./630. Mathematical Modeling in Hydraulic Engineering (3)

Prerequisite: CE 437 or consent of instructor. Numerical techniques for solving hydraulic problems in water supply, waste water disposal and storm drainage systems. Prediction of important parameters by mathematical modeling on problems encountered in artificial channels, rivers, estuaries and marine environments. M.S. students register in CE 630; Ph.D. students register in CE 730. Ph.D. students will be required to complete a more rigorous computer project. (Lecture-Problems 3 hours). Letter grade only (A-F).

740./640. Mathematical Modeling in Geotechnical Engineering (3)

Prerequisite: Graduate standing or consent of instructor. Mathematical modeling techniques used in geotechnical engineering. Application of proven computer programs. M.S. students register in CE 640; Ph.D. students register in CE 740. Ph.D. students will be required to complete a more rigorous computer project. (Lecture-Problems 3 hours.) Letter grade only (A-F).

Construction Engineering Management Courses (CEM)

121. Construction Drawing I (2) F

Use of scale, drawing instruments, lettering and drawing media. Interpretation of plan, elevation, section, perspective and isometric drawings. Blueprint symbols, abbreviations, terminology. Basic design parameters as required by the building code. Familiarity with reference materials and texts, including Sweets Catalogues, laboratory including a simple building design set of drawings. (Lecture 1 hr, laboratory 3 hrs.) Letter grade only (A-F).

125. Fundamentals of Construction (2)

Survey of the professional activities and environments of Construction Engineering Management. Overview of residential, commercial, institutional and industrial construction areas of focus to include type of foundations, equipment, material, contract documents and working drawings. Overview of the approval processes. (Lecture 1 hour and Activity 2 hours) Letter grade only (A-F).

130. Construction Surveying (1)

Prerequisites: CEM 121, 125. Corequisite: CEM 130L. Fundamentals of surveying methods as applied to construction layout. Use of level and transit for location and control of structures, vertical and horizontal control, area determination, care and use of instruments. (Lecture-Problem 1 hour). Letter grade only (A-F)

130L. Construction Surveying Laboratory (1)

Prerequisites: CEM 121, 125; Corequisite: CEM 130. Laboratory exercises on land measurement, differential and profile leveling, construction layout and plotting profiles using tape, leveling and transit instruments. (Laboratory 3 hours). Letter grade only (A-F).

201. Cost Accounting for Construction Engineering (3)

Theoretical Practical and concepts of cost accounting. Variable and fixed costs, break-even point, interrelationships of cost, volume and profits; job-order accounting, general and flexible budgeting, standard costs; product costing methods; cost allocation; inventory planning; control and valuation; joint product and by products; process costing. (Lecture-Problems 3 hours.) Letter grade only (A-F).

202. Probability and Statistics for Construction Engineering Management (3)

Prerequisite: High School Algebra. Statistics and probability theories, sampling, correlation, regression applied to Construction Engineering Management. Laboratory. (Simulation using statistical packages.) (Lecture-Discussion 3 hours) Letter grade only (A-F).

204. Applied Mechanics–Statics (3)

Prerequisite: MATH 120 and PHYS 100A Force systems acting on a structures, moments, equilibrium, centroids, trusses, beams, cables, frames, machines, friction, section properties, masses, both U.S. and S.I. units of measurements. (Lecture 2 hours, Activity 2 hours.) Letter grade only (A-F).

205. Computer Systems and Programming (1)

Corequisite: CEM 205L. An overview of computer systems, computer hardware, and software development. Hardware topics include updated coverage of the central processing unit and memory, input/output devices, storage mechanism, and communication technology. Software topics include programming and languages, operating systems, and systems analysis and design. A programming language will be used for lab activities. (Lecture – discussion, exercise, 1 unit) Letter grade only (A-F). Same as ET205.

205L. Computer Systems and Programming Lab (1)

Corequisite: CEM 205. Laboratory exercises in computer programming to solve problems in business, manufacturing, research and simulation. An object-oriented programming language will be used for these activities. (Laboratory 3 hours.) Letter grade only (A-F). Same as ET 205L

225. Residential and Light Commercial Construction Practices (2)

Prerequisites: CEM 130, 130L. Interpretation of construction documentation that includes, basic skills and techniques required to produce construction contract documents conforming to current building codes and standards, including specification, working drawings, bid documents, addenda and change orders for use in residential and light commercial buildings also includes, construction practices related residential and light commercial structures that deals with building systems, equipment, materials, techniques and quantities take off. Two designated field trips required (one residential and one light commercial construction sites). (Seminar 1 hour and Activity 2 hours) Letter grade only (A-F).

235. Concrete Construction (1)

Prerequisite: CEM 125; Corequisite: CEM 235L. Modern concepts which form the basis for solution to problems of concrete construction. Includes significant developments in concrete chemistry and strength theory. Concrete mix design, physical properties of concrete, use of admixtures, concrete batching, curing and testing. Includes physical testing of designed mixes. (Lecture-Discussion 1 hour).

235L. Concrete Construction Laboratory (1)

Prerequisite: CEM 125; Corequisite: CEM 235. Laboratory exercises in support of CEM 235, Concrete Construction. Develop concrete mix designs and prepare concrete samples for testing, such as compressive strength, slump and air entrainment, and aggregate testing. (Laboratory 3 hours). Letter grade only (A-F).

Upper Division

300L. Computer Applications for Construction Engineering Management Laboratory (1)

Prerequisites: CEM 205, 205L. Laboratory exercises in computer systems to control cost scheduling, manpower, and materials in construction operation in building industry, development of construction management games. (Laboratory 3 hours). Letter grade only (A-F).

304. Applied Mechanics Strength of Materials (3)

Prerequisite: CEM 204. Analysis of strength and rigidity of structural members in resisting applied forces, stress, strain, shear, moment, deflections, combined stresses, connections, and moment distribution. (Lecture-Problems 3 hours.) Letter grade only (A-F).

321. Operations Management in Contemporary Organizations (3)

Prerequisites: MGMT 300, ENGR 310. This course provides an overview of managerial and organizational theory and practice including an introduction to the basic concepts and methods used to analyze and improve performance of operations in construction and service organizations. Focus of the course is on the decision-making and problem-solving processes that influence organization's effectiveness and efficiency and affect managerial performance in planning, implementing, and controlling the work of contemporary organizations as well as are related to operations in the construction industry. (Lecture-Discussion 3 hours). Letter grade only (A-F).

325. Commercial, Institutional and Industrial Construction Practices (2)

Prerequisites: CEM 225, ENGR 310. Interpretation of construction documentation that includes, basic skills and techniques required to produce construction contract documents conforming to current building codes and standards, including specification, working drawings, bid documents, addenda and change orders for use in large commercial, institutional and industrial buildings also includes, construction methods and practices related to large commercial, institutional, and industrial structures that deals with building systems, equipment, materials, techniques and quantities take off. One designated field trip required. (Seminar 1 hour and Activity 2 hours) Letter grade only (A-F).

Construction Engineering Management Courses (CEM)

328. Construction Safety (2)

Prerequisites: CEM 225, ENGR 310. Terminology, safety functions, accident costs, workman's compensation and liability laws, O.S.H.A., governmental and non-governmental codes, regulations and field safety methods pertinent to the construction industry. Field trips. (Lecture 1 hour, Activity 2 hours). Letter grade only (A-F).

335. Soil Mechanics Technology (2)

Prerequisite: ET 304. Corequisite: CEM 335L. Soil Composition, description, and classification; soil compaction; determination of physical properties of soils. (Lecture-Problems 2 hours.) Letter grade only (A-F).

335L. Soil Mechanics Technology Laboratory (1)

Prerequisite: ET 304. Corequisite: CEM 335. Laboratory investigations and experiments in the phenomena of soil mechanics. Field trips. (Laboratory 3 hours) Letter grade only (A-F).

345. Concrete Formwork and Temporary Structures (2)

Prerequisites: CEM 335, 335L. Methods and techniques used in the design and construction of concrete formwork, temporary earth retaining systems, and other temporary construction structures. (Lecture 1 hour and Activity 2 hours) Letter grade only (A-F).

365. Mechanical Equipment for Buildings (2)

Prerequisites: CEM 325, PHYS 100B. Principles and current practices in water supply, waste disposal, heating, ventilating, air conditioning and fire protection. (Lecture 1 hour and Activity 2 hours) Letter grade only (A-F).

373. Design Presentation Methods (2)

Prerequisite: CEM 325. Solid modeling of the different phase of design, processes and construction methods. Interpretation from two dimensional to three-dimensional drawings. Visualization in space of three-dimensional construction phases and their relationship to two-dimensional drawings. (Lecture 1 hour and Activity 2 hours) Letter grade only (A-F).

374. Plant Planning and Layout (2)

Prerequisite: CEM 121 or consent of instructor. Planning practices, procedures and requirements for laying out industrial facilities. (Lecture - Discussion 2 hours.) Letter grade only (A-F).

375. Electrical Equipment for Buildings (2)

Prerequisites: CEM 325, PHYS 100B. Principles and current practices in the application of electrical equipment and material utilization, sound and signal systems. (Lecture 1 hour, Activity 2 hours.) Letter grade only (A-F).

404. Structural Design I (2)

Prerequisite: CEM 304. Analysis and design of structural concrete and masonry building in compliance with the Uniform Building Code. (Lecture 1 hour, Activity 2 hours) Letter grade only (A-F).

409. Direct Studies in Construction Engineering Management (1-3)

Prerequisites: Senior standing in ET, consent of instructor. Advanced work of a technical nature within an area of specialization on an experimental or research basis. Letter grade only (A-F).

410. Cost Engineering and Analysis (3)

Prerequisites: ECON 300. Introduction to the concepts of capital and operations budgets, capital acquisitions, economic evaluations of capital alternatives and factors of the time-value of money in industrial operations and construction industries. (Lecture-Discussion 3 hours.) Letter grade only (A-F).

421. Construction Planning and Scheduling (3)

Prerequisite: CEM 325. Planning, scheduling and control by graphic charts and PERT/CPM networks. Resource allocation and leveling. Manual and computer methods. Field trips. (Lecture-Discussion 3 hours.) Letter grade only (A-F).

423. Site Analysis (2)

Prerequisite: CEM 410. Detailed analysis and investigation of construction sites. Economics and feasibility of land development. Field trips (Lecture 1 hour, Activity 2 hours) Letter grade only (A-F).

425. Earthwork and Civil Works Construction Practices (2)

Prerequisite: CEM 325. Interpretation of construction documentation that includes, basic skills and techniques required to produce construction contract documents conforming to current building codes and standards, including specification, working drawings, bid documents, addenda and change orders for use civil structures also includes earthwork and civil works construction methods, stressing field operations management, engineering estimating. (Seminar 1 hour and Activity 2 hours) Letter grade only (A-F).

426. Business and Construction Law (3)

Prerequisite: CEM 328. Contractors license laws; mechanics lien laws; real estate and subdivision law; public works projects bid and bid requirements, O.S.H.A.; administration enabling legislation and penalties; citations and appeals; current litigation and legal trends in affirmative action and minority subcontractor quotas, design professional's liability. Letter grade only (A-F).

428. Contract Administration (2)

Prerequisites: CEM 425, 426. Survey administrative procedures of general and subcontractors. Study documentation, claims, liens, waivers, arbitration, litigation, bonding, insurance, and indemnification. Discuss ethical practices. Field trips. (Lecture-Discussion 2 hours). Letter grade only (A-F).

430. Advanced Estimating and Bidding (3)

Prerequisites: CEM 421, 425. A study of the concepts and practices involved in the total estimate bidding process in construction, from initial project selection to submission of final bids. Covers consideration in project selection, variables affecting labor productivity, sub-bid analysis, contingency and risk analysis, pricing concepts, bidding models, and an introduction to computer applications. A complete project estimate and bid is prepared by each study. (Lecture 2 hours, Activity 2 hours.) Letter grade only (A-F).

431. Construction Cost Control (3)

Prerequisites: CEM 430, and Senior Standing. Basic applications of construction cost control systems and the use of cost information and associated reports. (Lecture - Discussion 3 hours.) Letter grade only (A-F).

432. Facility Administration (3)

Prerequisite: CEM 374. Management skills for facility management. Emphasis is placed on the management functions of planning, organizing, directing and controlling. Topics include: negotiation; communication; performance measurement; job enrichment; motivation; contracting services and interpersonal relationships. (Lecture-Discussion 3 hours.) Letter grade only (A-F).

433. Facility Finance Management (3)

Prerequisite: CEM 432. Analysis of financial management strategies associated with facility management. Topics include: buy-lease considerations; building efficiency; leasing considerations; cost control and record keeping; facility capitalization; facility budgeting; cost benefit analysis and financial reports. (Lecture-Discussion 3 hours.) Letter grade only (A-F).

434. Facility and Property Management (3)

Prerequisite: CEM 433. Principles of facility and property management. Topics include: property development; cost benefit analysis; site selection; architectural design; layout plans; building engineering; specifications; stacking and blocking plans; aesthetic standards; renovation and contracting standards. (Lecture-Discussion 3 hours.) Letter grade only (A-F).

435. Construction Materials (3)

Prerequisites: CEM 325, 335, 335L. A comprehensive study in selecting and evaluating construction materials such as masonry, metals, woods, thermal materials, finishes, composite materials, insulation that are used in the construction industry. (Lecture 2 hours, Activity 2 hours.) Letter grade only (A-F).

436. Facility Operations Management (3)

Prerequisite: CEM 374. Analysis of the functions of facility operations management. Topics include: building systems; mechanical systems; energy management; electrical systems; trades operations; grounds maintenance; custodial; furniture and equipment; waste removal contracting services; furniture standards; security systems and planned maintenance. (Lecture-Discussion 3 hours.) Letter grade only (A-F).

438. Structural Design II (2)

Prerequisite: CEM 304. Analysis and design of structural steel and wood building in compliance with the Uniform Building Code. (Lecture 1 hour, Activity 2 hours.) Letter grade only (A-F).

443. Project Development and Design (2)

Prerequisites: CEM 373 and 423. Detailed analysis and investigation of a construction project from a design-built perspective. Advanced site and building development parameters and design. The design-build process. (Lecture 1 hour and Laboratory 3 hours) Letter grade only (A-F).

465. Mechanical and Electrical Estimating (2)

Prerequisites: CEM 365, 375. Analysis and organization of performing a cost estimate for both mechanical and electrical construction projects. Computer usage. (Lecture 1 hour and Activity 2 hours) Letter grade only (A-F).

475. Mechanical and Electrical Project Management (2)

Prerequisite: CEM 465. Specialty contracts and agreements, scheduling, material handling, labor unit analysis, and job costing for mechanical and electrical construction. (Lecture-Discussion 2 hours) Letter grade only (A-F).

490. Construction Project Management (3)

Prerequisites: CEM 365, 375, 426, 428, 431. Principles of project management are applied to a case study of an actual construction project. Topics include site facilities planning, procurement, shop drawings, scheduling coordinating subcontracts and contract administration. Relationships with owners, designers and other officials are analyzed. (Lecture-Discussion 3 hours.) Letter grade only (A-F).

Accreditation

The Bachelor of Science in Computer Engineering is accredited by the Engineering Accreditation Commission (EAC) and the Bachelor of Science in Computer Science by the Computing Accreditation Commission (CAC) of the Accreditation Board for Engineering and Technology (ABET), 111 Market Place, Suite 1050, Baltimore, MD 21202 – telephone: 410/ 347-7700; website: <http://www.abet.org>.

Advisory Board

The Department of Computer Engineering and Computer Science is supported by an Advisory Board composed of engineers, computer scientists, and business executives in the Southern California area. This liaison helps the department keep its curricula responsive to the needs of the community.

Undergraduate Educational Objectives

All courses and programs in the Department of Computer Engineering and Computer Science are designed to meet the following objectives: Students will receive a comprehensive education in Computer Engineering and/or Computer Science, as well as the sciences and humanities, that will serve them in both their professional and personal lives. Students will be able to analyze and solve problems in Computer Engineering and/or Computer Science using modern techniques, skills, and tools. Students will be able to communicate effectively. Students will be able to design systems, components or processes that meet performance, cost, time, safety, and quality requirements. Students will understand their professional responsibilities, including remaining current in their field of study, and will be able to analyze the social and ethical implications of their work.

Undergraduate Degree Programs

The Department of Computer Engineering and Computer Science offers programs leading to a Bachelor of Science in Computer Engineering, or a Bachelor of Science in Computer Science. The goal of both programs is to prepare graduates for a wide variety of computer-related careers by integrating the theoretical foundations of the discipline with practical applications. The degree in Computer Engineering focuses on computer hardware (design, construction, and operation of computer systems) while the Computer Science degree places more emphasis on computer software (algorithms). The high school student planning to enter either program is advised to pursue a strong program in science and mathematics.

Bachelor of Science in Computer Engineering (code CECSBS02) (129 units)

The Bachelor of Science in Computer Engineering degree program has a two-part objective. The first is to provide students with a strong background in mathematics, physics, and engineering science. The curriculum includes courses in digital systems, embedded systems, integrated circuits design, including operating systems and software engineering. The second objective is to provide students with the skills necessary to be effective contributors in a quality-oriented, customer-focused environment. Courses throughout the program, especially those in the junior and senior years, emphasize an open-ended, design-oriented approach to solving engineering problems. Teamwork, communication skills, and an interdisciplinary approach to problem solving are integrated into the senior, computer engineering design courses.

Requirements

Lower Division: CECS 174, 201, 228, 261, 274, 277; MATH 122, 222; PHYS 151, 152 (or EE 210 and 210L).

Upper Division: CECS 301, 311, 326, 340, 346, 347, 360, 440, 443, 447, 460A, 460B; EE 380 (or MATH 380), 386; MATH 323, 370A; plus nine units of approved electives to be selected from CECS 406, 451, 474, 475, 497, EE 486, ENGR 310 (or ENGL 317).

FOUR YEAR PLAN TO COMPLETE THE BS IN COMPUTER ENGINEERING (CECSBS02)

Bachelor of Science in Computer Science (code CECSBS01) (129 units)

The Bachelor of Science in Computer Science degree is designed to prepare graduates for a variety of professional careers in the computer field. The curriculum is designed to provide students with both breadth and depth in computer science. Breadth is achieved through a series of core courses that stress a balance between the theoretical and practical aspects of computer science. The topics covered in these courses include the following: the basics of programming languages, software design and analysis, data structures, algorithms, digital systems, computer organization, computer architecture, and operating systems. Extensive laboratory time is required for these courses, and design and analysis experiences are emphasized. Depth is achieved through courses (both required and elective) on advanced computer science topics. These courses provide students with in-depth knowledge of the material covered in the breadth portion of the curriculum.

Requirements

Lower Division: CECS 174, 201, 228, 261 or 381, 274, 277; MATH 122, 222, 247; PHYS 151, 152 (or EE 210 and 210L); four units of approved courses in science or with strong emphasis in quantitative methods.

Upper Division: CECS 323, 325, 326, 328, 340, 424, 440, 443; ENGR 350; MATH 380 (or EE 380); ENGR 310 or ENGL 317; One course selected from CECS 472, 474, 476; plus twelve units of approved electives to be selected as follows: three (3) units from CECS 471, 475, 481; and nine (9) units from MATH 323, CECS 405, 406, 419, 423, 426, 428, 444, 448, 449, 451, 455, 470, 473, 478, 497, and 472, 474, 476 if not taken as required course.

FAQ Concerning Road Maps for Completion of Undergraduate Degrees

For each undergraduate major, the on-line Catalog shows plans for scheduling all required courses to complete the degree in four, five, or six years.

While CSULB will make every effort to schedule classes at the times shown in the plans, we cannot guarantee that courses will be available in specific semesters. It is possible that shortage or budget or of personnel will make it impossible to offer as many classes as we would wish.

The plans are not substitutes for working with an advisor. You are strongly encouraged to see an advisor when planning your program each term.

I am a freshman. Do I have to choose now whether to follow the four, five, or six-year plan?

No. Most freshmen take 12-15 units. You need at least 12 units to receive full financial aid. With experience, you will be able to judge how heavy a load you find comfortable. This will depend on your outside obligations, such as a job, and on your personal circumstances. In theory, each unit requires three hours a week, including preparing for class, attending class, and completing assignments. Use these guidelines to budget your time and plan an appropriate schedule.

Must I take the courses in the semesters shown on the plan?

The plan shows one possible way of completing all requirements for the degree. Consult your advisor about whether it is essential to take a given course in the semester shown. There are some rules to keep in mind:

- 1) You can take the General Education Foundation courses (Composition, Oral Communication, Critical Thinking, Mathematics) in any semester in the first 36 units of baccalaureate-level course work completed at CSULB.
- 2) You cannot take upper division courses until you have completed at least 30 units. (Exceptions can be made for students who already have completed advanced study in the subject.) You cannot take General Education Capstone courses until you have completed at least 60 units.
- 3) For some majors it is essential to complete courses in the correct sequence. You cannot take a more advanced course until you have completed the prerequisite course(s).
- 4) You must complete all requirements for admission to impacted majors within the first 60 units.

I have been told that I must take one or more pre-baccalaureate courses. How can I plan my program?

Your advisor at SOAR can help you identify which courses must be postponed. You must still complete the minimum number of baccalaureate units required for the degree.

You may be able to catch up by taking additional courses in later semesters or by taking classes in summer or winter session, or you may choose to spend an additional semester completing the program. You cannot begin the sequence of required courses for some majors until you are ready for baccalaureate-level Mathematics. See your major advisor to develop a plan for scheduling the required courses.

I didn't complete the exact list of courses shown. Can I still graduate on time?

The answer depends on your major and on what courses you have completed. The plans are not rigid requirements; they are only intended to provide guidance in planning a program. There are many reasons for students to follow a different pattern, such as changing the major, choosing to take fewer classes in a given semester, choosing to complete a minor or a second major. See your advisor for help in planning a program that will work for you.

If I follow the plan, will I have all requirements for graduation completed?

The plans include the specific courses required for the major. For some majors, there are restrictions on the choice of major electives. It is important that you select General Education courses to meet the required distribution pattern. You may need to take an additional General Education course to complete the minimum number of units required for each category. This is likely to happen if you took three-unit courses in Category B, Physical Universe.

Bachelor of Science in Engineering Technology

Technology and Engineering Education Option (code ET__BS15)

For requirements, see the description in the Engineering Technology Programs section of this catalog.

Minor in Computer Science (code CECSUM01)

The minor in Computer Science is designed to prepare students in other majors for careers in a wide variety of fields which require computer science expertise.

Requirements

A minimum of 24 units. CECS 174, 201, 228, 274, 277, 325 and two courses to be selected from CECS 323, 326, 328, 340, 423, 443, 449, 470, 474, 475, ENGR 350.

Minor in Web and Technology Literacy (code ET__UM01)

For requirements, see the description in the Engineering Technology Programs section of this catalog.

Minor in Computer Science Applications (code ET__UM02)

For requirements, see the description in the Engineering Technology Programs section of this catalog.

Certificate in Web and Technology Literacy (code ET__CT03)

For requirements, see the description in the Engineering Technology Programs section of this catalog.

Master of Science in Computer Science

The Master of Science in Computer Science is offered by the Department of Computer Engineering and Computer Science, College of Engineering. Two options are offered:

1. Option in Computer Engineering
2. Option in Computer Science

The Option in Computer Engineering offers advanced study in the theory, analysis, design and applications of both computer hardware and software. The Option in Computer Science offers advanced study in modeling software systems, operating systems, compiler construction, and analysis of algorithms.

Admission Procedures

To be considered for admission the graduate applicant must have earned a bachelor's degree from an accredited institution, have been in good standing at the last institution attended, and have a grade point average (GPA) of at least 2.7 for the last 60 semester units (90 quarter units) attempted. The general Graduate Record Examination (GRE) is required. There is no separate department application, but applicants should submit a second set of transcripts to the department.

Option in Computer Engineering (code CEC-SMS02)

Prerequisites

1. A bachelor's degree in computer science, engineering, or other appropriate discipline from an accredited college or university, with a minimum grade point average (GPA) of 2.7 in the last 60 semester units attempted.
2. Credit in the following courses or their equivalents: CECS 274, 301, 326, 340, 346, 347, 360, 440, 443, and MATH 370A.
3. Students must consult with the program graduate advisor prior to enrolling in any course for the program.

Requirements

Students must complete a minimum of 30 graduate and approved upper-division course units including the following:

1. At least 21 units at the graduate level of instruction;
2. CECS 460A, 460B, 530, and either 531 or 546;
3. One course from the Computer Engineering Fundamental Areas;
4. One additional course from the MSCS Application Courses;
5. All students must complete either:
 - A. a comprehensive examination, or
 - B. a thesis with oral defense which requires a total of 6 units of CECS 697 or 698, of which at least 4 units must be CECS 698.

Option in Computer Science (code CECSMS01)

Prerequisites

1. A bachelor's degree in computer science, engineering, or other appropriate discipline from an accredited college or university, with a minimum grade point average (GPA) of 2.7 in the last 60 semester units attempted.
2. Credit in the following courses or their equivalents: One year of instruction in an object-oriented programming language, CECS 228, 323 (or 421), 325, 326, 328, 440, 443, MATH 380, and either 419, 424, or 444.
3. Students must consult with the program graduate advisor prior to enrolling in any course for the program.

Requirements

Students must complete a minimum of 30 graduate and approved upper-division course units including the following:

1. At least 21 units at the graduate level of instruction;
2. CECS 528;
3. One course from the Computer Science Fundamental Areas;

4. Two courses from the MSCS Application courses;
5. All students must complete either:
 - A. a comprehensive examination, or
 - B. a thesis with oral defense which requires a total of 6 units of CECS 697 or 698, of which at least 4 units must be CECS 698.

Advancement to Candidacy

Students applying for advancement to candidacy must:

1. have completed all undergraduate deficiencies with grades of "C" or better;
2. have attained an overall grade point average (GPA) of 3.0;
3. have completed at least 12 units applicable to the degree with a GPA of at least 3.0;
4. have passed the University Writing Proficiency Examination;
5. and have their program of studies approved by the CECS department graduate advisor.

Courses (CECS)

Lower Division

101. The Digital Information Age (3)

Prerequisite: Category B2 General Education course. An introduction to commonplace digital information systems for non-majors. Information sources. Digital logic. Computer hardware and software. The Internet and the World Wide Web. (Lecture 3 hours.)

110. Introduction to the Internet (3)

Prerequisite: Some computer experience. Provides a general overview of computer systems, networking, and the Internet. World-Wide Web, email, telnet, ftp, newsgroups, finding information on the Internet, and basic Web page creation. Considers legal, ethical, privacy and security issues on the Internet. (Lecture 2 hours, laboratory 3 hours.)

126. Introduction to the UNIX Operating System (3)

Prerequisite: Consent of instructor. UNIX operating system's user interface. File and directory commands, editor commands, communication commands and other UNIX utilities. UNIX access permissions and security, I/O redirection, pipes, metacharacters, and full-screen editing with vi. Electronic communication, simple shell programming, and using the Xwindow System. (Lecture 2 hours, laboratory 3 hours.)

174. Programming and Problem Solving I (3)

Prerequisite: MATH 117 (or equivalent.) Introduction to the basic concepts of computer science and the fundamental techniques for solving problems using the C++ programming language. Structured problem solving, object-oriented programming, programming style. Applications to numerical and non-numerical problems. Not open to students with credit in CECS 175. (Lecture 2 hours, laboratory 3 hours.) Letter grade only (A-F).

200. Introduction to Web Design (3)

Prerequisite: Some computer experience. Introductory web page design using modern tools. Development of web pages from layout to posting on the Internet. Web security and ethics. (Lecture 2 hours, laboratory 3 hours.) Letter grade only (A-F).

201. Computer Logic Design I (3)

Prerequisite: MATH 117 (or equivalent). Basic topics in combinational and sequential switching circuits with applications to the design of digital devices. Laboratory projects with Small Scale Integration (SSI) implementations using Computer Aided Design (CAD). (Lecture 2 hours, lab 3 hours.) Letter grade only (A-F).

228. Discrete Structures with Computer Science Applications I (3)

Prerequisites: CECS 174 and MATH 122. The specification, development and analysis of algorithms. Sets, relations and functions. Logic and mathematical structures used in computer science. Introduction to combinatorics. Programming projects to exemplify these concepts. (Lecture 2 hours, laboratory/problem session 3 hours.) Letter grade only (A-F).

261. Computing with Java (3)

Prerequisite: CECS 174. Comparison of basic Java constructs to similar constructs in C++. Object-oriented programming in Java. Applets and graphical user interfaces. Mouse, key, and window events. Exception handling and files. (Lecture 2 hours, laboratory 3 hours.) Letter grade only (A-F).

271. Introduction to Numerical Methods (3)

Prerequisites: CECS 174 and MATH 123. An introduction to numerical methods and the FORTRAN programming language. Analysis of computational errors; iterative methods for finding roots and for solving systems of equations. Numerical techniques for evaluating integrals, determining derivatives, and solving ordinary differential equations. FORTRAN programming projects will be assigned. Not open to students with credit in CECS 342. (Lecture 2 hours, laboratory 3 hours.) Letter grade only (A-F).

274. Programming and Problem Solving II (3)

Prerequisite: CECS 174; Prerequisite/Corequisite: CECS 201. Disciplined methods of design, coding and testing using the C++ programming language. Data abstraction, object-oriented design. Introduction to data structures (linked lists, stacks, queues and trees.) Recursion. Sorting and searching. (Lecture 2 hours, laboratory 3 hours.) Letter grade only (A-F).

277. Programming and Problem Solving III (3)

Prerequisite: CECS 274. Advanced introduction to the fundamentals of computer science and software engineering methodology. Advanced programming techniques and design methodology typically used in large programming projects using the C++ programming language. (Lecture 2 hours, laboratory 3 hours.) Letter grade only (A-F).

Upper Division

300. Web Authoring (3)

Prerequisite: CECS 200. Web page design using modern tools. Design and development of web pages from layout to posting on the Internet. Website usability, accessibility, security, and ethics. (Lecture 2 hours, laboratory 3 hours.) Letter grade only (A-F).

301. Computer Logic Design II (3)

Prerequisite: CECS 174. Prerequisite/Corequisite: CECS 311 or EE 331. Sequential logic, programmable logic design, basic Arithmetic Logic Unit (ALU) design and memory devices. Laboratory projects with Medium Scale to Very Large Scale Integration (MSI to VLSI) implementations and Computer Aided Design (CAD). (Lecture 2 hours, laboratory 3 hours.) Letter grade only (A-F).

310E. Computer-Based Learning Resources (3)

Prerequisite: Some Internet experience. Explore and learn to use the many existing web-based education tools that focus on teaching technology. Evaluation of resources for age appropriateness and gender preferences. Students will develop a web-based tool to teach a technical subject of their choice. Field work required. (Lecture 2 hours, laboratory 3 hours.) Letter grade only (A-F).

311. Data Acquisition, Processing, and Display (3)

Prerequisites: CECS 201, EE 210 and 210L or PHYS 152. Hardware and software used to acquire, process, and display real-time signals. Transducers. Amplifiers. Buffers and isolators. Interrupt generators. Analog-to-digital and digital-analog converters. Display hardware. Software packages for electronics simulation and data acquisition. Sources of noise in digital systems. (Lecture 2 hours, laboratory 3 hours.) Letter grade only (A-F).

323. Database Fundamentals (3)

Prerequisites: CECS 228, 274, MATH 222. Fundamental topics on database management. Topics include entity-relationship models, database design, data definition language, the relational model, data manipulation language, database application programming and normalization. (Lecture 2 hours, laboratory 3 hours.) Letter grade only (A-F).

325. Computer Organization and Assembly Language Programming (3)

Prerequisites: CECS 201 and 274. Basic computer organization, representation of information and instruction, addressing techniques, input/output, assembly language programming, macros and macro processing. Introduction to software systems, including assemblers, linkage editors and loaders. Programming assignments in assembly language. (Lecture 2 hours, lab 3 hours.) Letter grade only (A-F).

326. Operating Systems (3)

Prerequisites: CECS 277 and 325 (or 346). The structure and functions of operating systems. Interrupt handling, processes and inter-process communication, memory management, resource scheduling, information sharing and protection. Project implementation in C/C++. (Lecture 3 hours, laboratory 3 hours.) Letter grade only (A-F).

328. Discrete Structures with Computer Science Applications II (3)

Prerequisite: CECS 228. Corequisite: CECS 277. A broad view of data structures and the structure-preserving operations on them. Abstract data types, algorithms, complexity. Programming projects to exemplify these concepts. (Lecture 2 hours, laboratory 3 hours.) Letter grade only (A-F).

340. Discrete Event Systems Modeling and Simulation (3)

Prerequisites: CECS 201, 228 and 274. Modeling and simulation of discrete event systems specific to computer science and computer engineering including networks, queuing systems, digital logic, and computer architecture. The use of general purpose and specialized languages for these systems will be explored. Various methods for system input data (stochastic and deterministic) will be explored. (Lecture 2 hours, laboratory 3 hours.) Letter grade only (A-F).

346. Microprocessors and Controllers I (3)

Prerequisites: CECS 274 and 311. Introduction to microprocessor, micro controller and embedded system programming and design. Basic computer organization, representation of information and instruction, addressing techniques, input/output, assembly language programming. Introduction to software systems, including assemblers, linkage editors and loaders. Review of microprocessors and micro controllers with an in-depth study of the 8051 microprocessor. Design of microprocessor-based systems to solve practical problems. Laboratory projects using CAD implementations and hardware design tools for simulation of designs. (Lecture 2 hours, laboratory 3 hours.) Letter grade only (A-F).

347. Microprocessors and Controllers II (3)

Prerequisites: CECS 301 and 346. Study of embedded processor applications and interfacing. Embedded systems design, control of external devices, embedded programming in C and assembly. A/D and D/A converters, digital signal processing, motor and LCD controllers. Laboratory implementation of embedded designs and hardware-assisted debugging. (Lecture 2 hours, laboratory 3 hours.) Letter grade only (A-F).

360. Integrated Circuit Design Software (3)

Prerequisites: CECS 301, 325 (or 346), MATH 123 or 222. Introduction to Computer Aided Design tools used in the design and fabrication of integrated circuits. Discussion of the IC fabrication process, the layout and routing of basic gates, transistor level design of gates, synthesis and RTL level design, floor planning, and IC development costs. (Lecture 2 hours, lab 3 hours.) Letter grade only (A-F).

381. GUI Programming (3)

Prerequisite: CECS 174. Introduction to programming in a graphical user interface (GUI) environment. Menus, dialog boxes, forms, textboxes, toolbars and other controls. Properties, methods and events of objects. Program control statements including if, case, while, loop, and do. System objects including the mouse, screen and printer. (Lecture 2 hours, laboratory 3 hours.) Letter grade only (A-F).

401E. Programming Robots – for Teachers and Parents (3)

Prerequisite: Some programming experience. Learn how to inspire interest in engineering and computer science among children ages 9 through 16. Using robotic kits, gain hands-on experience in problem solving and computer programming while constructing and programming unique robot inventions. (Lecture 2 hours, laboratory 3 hours.) Letter grade only (A-F).

*405. Special Topics in Computer Science (3)

Prerequisite: Senior standing in computer science major. Selected topics from recent advances in computer science and technology. Course content will vary from year to year. (Lecture-problems 3 hours.) May be repeated to a maximum of 6 units with different topics. Letter grade only (A-F).

*406. Special Topics in Computer Science (3)

Prerequisite: Senior standing in the computer science major. Each offering is based upon an area of computer science and technology in which recent advances have been made. Repeatable to a maximum of 6 units with different topics in different semesters. (Lecture 2 hours, laboratory 3 hours.) Letter grade only (A-F).

*410E. Computers and Networks (3)

Prerequisite: Course design assumes familiarity with computers. Gain practical, hands-on experience in installing hardware and software on a PC. Learn what a computer network is and how it is similar to the telephone network. Learn the parts that make up a computer and a network. (Lecture 2 hours, laboratory 3 hours.) Letter grade only (A-F).

*419. Theory of Computation (3)

Prerequisite: CECS 328. Finite automata and regular expressions. Pushdown automata and context-free languages. Turing machines and computability. Computational complexity. (Lecture-problems 3 hours.) Letter grade only (A-F).

*423. Database Applications (3)

Prerequisite: CECS 323 (or 421). Preparation for work on commercial database systems. Advanced modeling and analysis, data definition, constraints, retrieval, manipulation, security and usability. Commercial development tools, distributed/multi-tier environments and integration of databases with intranets and internets. Projects may include cooperation with students from other departments. (Lecture 2 hours, laboratory 3 hours.) Letter grade only (A-F).

*424. Organization of Programming Languages (3)

Prerequisites: CECS 326 and 328. Understanding the variety of programming languages and the design trade-offs between current programming language paradigms. Comparison of programming languages in their design, implementation, and run-time supports. Includes programming projects. (Lecture 2 hours, laboratory 3 hours.) Letter grade only (A-F).

*426. Topics in Operating Systems (3)

Prerequisite: CECS 326. Advanced operating system analysis and design. Topics of current interest. Project implementation (Lecture 2 hours, laboratory 3 hours.) Letter grade only (A-F).

*428. Analysis of Algorithms (3)

Prerequisite: CECS 328. Applications of standard combinatorial techniques to applied programming problems. Rigorous analysis of the correctness and complexity of algorithms. Advanced graph algorithms are emphasized. Topics include shortest paths on graphs, sorting, string matching, union find problem, divide-and-conquer technique, and weighted-edge problem. (Lecture 2 hours, laboratory 3 hours.) Letter grade only (A-F).

440. Computer Architecture (3)

Prerequisites: CECS 340 and 325 (or 346). Review of logic design. Register transfer and micro-operations. Basic computer organization. Central processor organization. Microprogram control organization. Arithmetic processor design. Arithmetic algorithms. Input-output organization. Memory organization. (Lecture 2 hours, laboratory 3 hours.) Letter grade only (A-F).

443. Software Engineering (3)

Prerequisite: CECS 326. Software life cycle. Functional decomposition, data flow and object-oriented development. Reusability and portability. (Lecture 2 hours, laboratory 3 hours.) Letter grade only (A-F).

*444. Compiler Construction (3)

Prerequisites: CECS 325 and 328. Syntax directed compiler study. Organization of a compiler and overall design: parsing, semantic analysis, optimization and code generation. (Lecture 3 hours, laboratory 3 hours.) Letter grade only (A-F).

447. Microprocessors and Controllers III (3)

Prerequisite: CECS 347. Embedded system applications and techniques. Real-time multi-tasking systems, schedulers, kernels, and operating systems for embedded processors. Advanced I/O technologies include CAM, I²C, Ethernet. Embedded Internet applications. Polling versus interrupt handling. Laboratory implementation of embedded designs and hardware-assisted debugging. (Lecture 2 hours, laboratory 3 hours.) Letter grade only (A-F).

*448. User Interface Design (3)

Prerequisites: CECS 323 (or 421), and any one of CECS 471, 475, 481. Evaluation, design and programming of user interface systems. Fundamentals of human cognition, system characteristics, and the interaction between humans and systems. Usability methods and user/task-centered design. Tools for designing and building user interfaces, with emphasis on rapid applications development. (Lecture 2 hours, laboratory 3 hours.) Letter grade only (A-F).

*449. Computer Graphics (3)

Prerequisites: MATH 247, CECS 261 and 274. Basic software and hardware of 2-D computer graphics. Applications. (Lecture 2 hours, laboratory 3 hours.) Letter grade only (A-F).

*451. Artificial Intelligence (3)

Prerequisites: CECS 228, 274, MATH 380 or EE 380. Introduction to the history and implementation of artificial intelligence agents. Topics include search, constraint satisfaction, game-playing, logical agents, belief networks, optimal sequential decision systems. Project implementation. (Lecture 2 hours, laboratory 3 hours.) Letter grade only (A-F).

455. Introduction to Game Programming (3)

Prerequisite: CECS 328 or consent of instructor. Introduction to game programming and graphics. "Slow" games. Real-time games with no adversary. Adversarial real-time games in 2-D. (Lecture 2 hours, laboratory 3 hours.) Letter grade only (A-F).

460A. System on Chip Design I (3)

Prerequisite: CECS 360 or 440. A complete System on a Chip (SOC) design flow beginning with a design specification and ending with a working SOC. Creation of RTL level modules designed for reuse, integration of Intellectual Property (IP) for both RTL level and physical level IP, IC verification, and the creation of self-checking test benches for SOC designs. (Lecture 2 hours, laboratory 3 hours.) Letter grade only (A-F).

*460B. System on Chip Design II (3)

Prerequisite: CECS 460A. System on a Chip (SOC) design applications. A variety of SOC designs will be built as class project which involve both the hardware and software aspect of a SOC along with hardware/software integration problems. Design reviews, design specification and team design implementation will be stressed along with project planning and tracking mechanisms for system level design problems. (Lecture 2 hours, laboratory 3 hours.) Letter grade only (A-F).

***470. World-Wide Web Development (3)**

Prerequisites: CECS 277 and 323 (or 421). Introduction to commercial practice in World-Wide Web site development. Web server and client software and the underlying networking technologies and protocols. Page and site design and programming using contemporary development tools and languages. Typography, graphics, database integration, usability, ethics and future directions. Projects will include site development for an actual client and may include cooperation with students from other departments. (Lecture 2 hours, laboratory 3 hours.) Letter grade only (A-F).

***471. Internet Applications Using Java (3)**

Prerequisites: CECS 261 and 277. Threads, images, and animation. User interface component libraries. Streams, readers and writers. Client-server applications. Java beans. Internationalization. Introduction to remote method invocation, Java database connectivity, and multimedia applications. (Lecture 2 hours, laboratory 3 hours.) Letter grade only (A-F).

***472. Computer Network Programming (3)**

Prerequisites: CECS 326 and 328. Fundamentals of client-server programming. Concepts of computer network programming including RPC and CORBA. Introduction to the principles of TCP and routing. (Lecture 2 hours, laboratory 3 hours.) Letter grade only (A-F).

***473. Enterprise Web Applications (3)**

Prerequisites: CECS 323 (or 421), 470, and any one of CECS 471, 475, 481. Web commerce, high-availability Web sites, and information architecture. Advanced client side and server side scripting, advanced searching and indexing, application servers. Legal and business aspects. Projects may include cooperation with students from other departments. (Lecture 2 hours, laboratory 3 hours.) Letter grade only (A-F).

***474. Computer Network Interoperability (3)**

Prerequisite: CECS 326. An overview of computer network theory and practice from a systems perspective. Topics include network infrastructure, local area network (LAN) protocols, wide area network (WAN) protocols, switching technologies, Internet Protocol (IP), Transmission Control Protocol (TCP), network security, and network configuration, design, and performance. (Lecture 2 hours, laboratory 3 hours.) Letter grade only (A-F).

***475. Object-Oriented Programming and C++ (3)**

Prerequisite: CECS 277. An overview of object-oriented programming, data abstraction, and the C++ language. Classes, constructors, destructors, function and operator overloading, inheritance, polymorphism, input/output, standard template library (STL), templates, Visual C++, Microsoft Foundation Class (MFC), and object-oriented design. (Lecture 2 hours, laboratory 3 hours.) Letter grade only (A-F).

***476. System and Network Administration (3)**

Prerequisites: CECS 326 and 328. Introduction to the management and administration of Unix systems and TCP/IP networks. Managing users, local and network file systems, electronic mail, print queues. Establishing and managing a network. (Lecture 2 hours, laboratory 3 hours.) Letter grade only (A-F).

478. Introduction to Computer Security (3)

Prerequisites: CECS 323, 328, and one course selected from 472, 474, 476. Controlling the risk of computer security. Security threats and vulnerabilities in the development and use of computer systems. Tools and controls that can reduce or block these threats. Law, privacy and ethics. (Lecture 2 hours, laboratory 3 hours.) Letter grade only (A-F).

***481. Event Driven Programming (3)**

Prerequisite: CECS 326. A rigorous introduction to Graphical User Interface (GUI) programming as provided in a number of popular software development products. Topics include Windows API (Application Programming Interface) using C and C++, Visual Basic and other development tools. (Lecture 2 hours, laboratory 3 hours.) Letter grade only (A-F).

496. Computer Science Problem Solving (1)

Prerequisites: CECS 274 and consent of instructor. A study of problem solving in Computer Science. Discussion of the theory necessary to solve computer science problems as well as the solutions to the problems. Problems studied will involve applications of graph theory, data structures, recursion, and algorithms. The aim of the course is to enhance the student's problem solving ability. (Lecture 1 hour.) May be repeated to a maximum of 6 units in different semesters. Letter grade only (A-F).

***497. Directed Studies (1-3)**

Prerequisite: Consent of instructor. Assigned study in topics in current computer literature or computer-related projects with a final report. May be repeated to a maximum of 6 units with written permission of the Department Chair.

Graduate Level**521./621. Database Architecture (3)**

Prerequisites: CECS 328 and 323 (or 421). (Master's students register in CECS 521 or 621; Ph.D. students register in CECS 621.) Relational database design theory—a rigorous approach. Security, recovery, transaction management, distributed databases and query optimization. Additional projects required for CECS 621. (Lecture-problems 3 hours.) Letter grade only (A-F).

524./624. Advanced Topics in Programming Languages (3)

Prerequisite: CECS 424 and 471. (Master's students register in CECS 524 or 624; Ph.D. students register in CECS 624.) Intensive study of languages of current interest which support object-oriented, client-server, and multimedia applications (e.g. JAVA). Additional projects required for CECS 624. (Lecture-problems 3 hours.) Letter grade only (A-F).

526./626. Advanced Operating Systems (3)

Prerequisites: CECS 228 and 326. (Master's students register in CECS 526 or 626; Ph.D. students register in CECS 626.) Theoretical foundations of concepts applied in the design of operating systems. Control of concurrent processes, deadlocks, mutual exclusion, virtual memory, resource management and scheduling. Additional projects required for CECS 626. (Lecture-problems 3 hours.) Letter grade only (A-F).

528./628. Advanced Analysis of Algorithms (3)

Prerequisite: CECS 328 and MATH 380. (Master's students register in CECS 528 or 628; Ph.D. students register in CECS 628.) Theoretical analysis of algorithms. Divide and conquer, dynamic programming and greedy algorithms; basic search and traversal techniques including search trees; sorting; matrix manipulations; NP-completeness. Additional projects required for CECS 628. (Lecture-problems 3 hours.) Letter grade only (A-F).

530./630. Advanced Computer Architecture I (3)

Prerequisite: CECS 440. (Master's students register in CECS 530 or 630; Ph.D. students register in CECS 630.) Fundamentals of computer architecture. Description of architecture and description languages. Basic computer design and central processor implementation. Memory hierarchy and input/output. Pipelining. Vector processor, multiprocessor systems and dataflow machines. Additional projects required for CECS 630. (Lecture 2 hours, laboratory 3 hours.) Letter grade only (A-F).

531./631. Advanced Computer Architecture II (3)

Prerequisite: CECS 530. (Master's students register in CECS 531 or 631; Ph.D. students register in CECS 631.) Advanced computer architecture with emphasis on parallel processing. Vector processors and multiprocessor systems. Dataflow computation. RISC/CISC. Hypercube. Parallel software. Applications in artificial intelligence, signal/image processing, neural network and optical computing. Additional projects required for CECS 631. (Lecture-problems 3 hours.) Letter grade only (A-F).

543./643. Advanced Software Engineering (3)

Prerequisite: CECS 443. (Master's students register in CECS 543 or 643; Ph.D. students register in CECS 643.) Study of software engineering as a broad, problem-solving discipline. Includes structured programming and software project management. Additional projects required for CECS 643. (Lecture 2 hours, laboratory 3 hours.) Letter grade only (A-F).

544./644. Software Testing and Verification (3)

Prerequisite: CECS 543. Various types of software testing and verification techniques for software development including black box, white box, incremental, top-down and bottom-up, static and dynamic, performance, regression, thread, and stress testing. Discussion of object-oriented software testing with a hierarchical approach. Metrics in complexity for testing, test, and verification plan will be introduced. Automatic software testing and some case studies. Additional projects required for CECS 644. (Lecture 2 hours, laboratory 3 hours.) Letter grade only (A-F).

545./645. Software Architecture (3)

Prerequisite: CECS 543. Topics include architectural styles, pipes and filters, data abstraction and object-oriented organization, event-based, implicit invocation, layered systems, repositories, interpreters, process control, distributed processes, domain-specific software architectures, and heterogeneous architecture. Component-based design patterns and some case studies. Additional projects required for CECS 645. (Lecture 2 hours, laboratory 3 hours.) Letter grade only (A-F).

546./646. Fault Tolerant Computing Systems (3)

Prerequisite: CECS 530. (Master's students register in CECS 546 or 646; Ph.D. students register in CECS 646.) Fault tolerant techniques are studied as tools to assure the reliability and continuous availability of computing systems. Case studies of modern fault tolerant systems reviewed. Software fault tolerant systems studied as alternatives to verification and validation approaches to software reliability. Additional projects required for CECS 646. (Lecture-problems 3 hours.) Letter grade only (A-F).

549./649. Advanced Computer Graphics (3)

Prerequisite: CECS 449. (Master's students register in CECS 549 or 649; Ph.D. students register in CECS 649.) Three-dimensional representations, transformations and viewing. Color models and modeling methods. Hidden-line and hidden-surface removal. Lighting and shading. Visual realism. Topics of current interest. Additional projects required for CECS 649. (Lecture 2 hours, laboratory 3 hours.) Letter grade only (A-F).

551./651. Advanced Artificial Intelligence (3)

Prerequisite: CECS 451. (Master's students register in CECS 551 or 651; Ph.D. students register in CECS 651.) Advanced concepts in artificial intelligence. Topics include knowledge acquisition and representation, fuzzy logic, logical reasoning, multi-sensor integration, Dempster-Shafer's theory of evidential reasoning, real-time expert systems and neural networks. Additional projects required for CECS 651. (Lecture-problems 3 hours.) Letter grade only (A-F).

552./652. Computer Simulation and Modeling (3)

Prerequisites: EE 380 (or MATH 380) and CECS 326. (Master's students register in CECS 552 or 652; Ph.D. students register in CECS 652.) Studies of general purpose and special simulation software. Model verification including graphical models Applications in various areas. Additional projects required for CECS 652. (Lecture-problems 3 hours.) Letter grade only (A-F).

553./653. Machine Vision (3)

Prerequisite: Graduate standing in engineering or computer science. (Master's students register in CECS 553 or 653; Ph.D. students register in CECS 653.) Discussion and laboratory implementation of current research in vision and image understanding. Topics include image formation, early processing, segmentation, relational structures in 2-D and 3-D, motion, stereo, 3-D reconstruction, morphological methods and computer architecture for machine vision. Additional projects required for CECS 653. (Lecture-problems 2 hours, laboratory 3 hours.) Letter grade only (A-F).

570./670. Concurrent Parallel Programming (3)

Prerequisite: CECS 428 or 440. (Master's students register in CECS 570 or 670; Ph.D. students register in CECS 670.) An introduction to concurrent and parallel programming for multiprocessing as well as distributed systems. Computational models and paradigms. Parallel programming languages and programming tools. Portable parallel programming and mapping techniques. Heterogeneous concurrent programming. Concurrent programming on local networks on workstations and personal computers. Additional projects required for

CECS 670. (Lecture-problems 2 hours, laboratory 3 hours.) Letter grade only (A-F).

572./672. Advanced Computer Networking (3)

Prerequisite: CECS 474. (Master's students register in CECS 572 or 672; Ph.D. students register in CECS 672.) Advanced concepts in computer network theory and practice. Computer network design and standards for local area networks (LANs) and wide area networks (WANs). Computer network configuration and performance issues. Additional projects required for CECS 672. (Lecture 2 hours, laboratory 3 hours.) Letter grade only (A-F).

575./675. Object-Oriented Analysis and Design (3)

Prerequisite: CECS 475 and either CECS 443 or 543. (Master's students register in CECS 575 or 675; Ph.D. students register in CECS 675.) An object-oriented approach to software development based on modeling objects from the real world and then using the model to build a language-independent design organized around those objects. Object-oriented methodology from problem statement through analysis, system design, and object design. Implementation of object-oriented designs in various target environments. Case studies. Additional projects required for CECS 675. (Lecture 2 hours, laboratory 3 hours.) Letter grade only (A-F).

590./690. Special Topics in Computer Science (3)

Prerequisites: Graduate standing and consent of instructor. (Master's students register in CECS 590 or 690; Ph.D. students register in CECS 690.) Each offering is based on an area in computer science and technology in which recent advances have been made. Additional projects required for CECS 690. (Lecture-problems 3 hours.) May be repeated to a maximum of 6 units with consent of department. Letter grade only (A-F).

621./521. Database Architecture (3)

Prerequisites: CECS 328 and 323 (or 421). (Master's students register in CECS 521 or 621; Ph.D. students register in CECS 621.) Relational database design theory-a rigorous approach. Security, recovery, transaction management, distributed databases and query optimization. Additional projects required for CECS 621. (Lecture-problems 3 hours.) Letter grade only (A-F).

624./524. Advanced Topics in Programming Languages (3)

Prerequisite: CECS 424 and 471. (Master's students register in CECS 524 or 624; Ph.D. students register in CECS 624.) Intensive study of languages of current interest which support object-oriented, client-server, and multimedia applications (e.g. JAVA). Additional projects required for CECS 624. (Lecture-problems 3 hours.) Letter grade only (A-F).

626./526. Advanced Operating Systems (3)

Prerequisites: CECS 228 and 326. (Master's students register in CECS 526 or 626; Ph.D. students register in CECS 626.) Theoretical foundations of concepts applied in the design of operating systems. Control of concurrent processes, deadlocks, mutual exclusion, virtual memory, resource management and scheduling. Additional projects required for CECS 626. (Lecture-problems 3 hours.) Letter grade only (A-F).

628./528. Advanced Analysis of Algorithms (3)

Prerequisite: CECS 328 and MATH 380. (Master's students register in CECS 528 or 628; Ph.D. students register in CECS 628.) Theoretical analysis of algorithms. Divide and conquer, dynamic programming and greedy algorithms; basic search and traversal techniques including search trees; sorting; matrix manipulations; NP-completeness. Additional projects required for CECS 628. (Lecture-problems 3 hours.) Letter grade only (A-F).

630./530. Advanced Computer Architecture I (3)

Prerequisite: CECS 440. (Master's students register in CECS 530 or 630; Ph.D. students register in CECS 630.) Fundamentals of computer architecture. Description of architecture and description languages. Basic computer design and central processor implementation. Memory hierarchy and input/output. Pipelining. Vector processor, multiprocessor systems and dataflow machines. Additional projects required for CECS 630. (Lecture 2 hours, laboratory 3 hours.) Letter grade only (A-F).

631./531. Advanced Computer Architecture II (3)

Prerequisite: CECS 530. (Master's students register in CECS 531 or 631; Ph.D. students register in CECS 631.) Advanced computer architecture with emphasis on parallel processing. Vector processors and multiprocessor systems. Dataflow computation. RISC/CISC. Hypercube. Parallel software. Applications in artificial intelligence, signal/image processing, neural network and optical computing. Additional projects required for CECS 631. (Lecture-problems 3 hours.) Letter grade only (A-F).

643./543. Advanced Software Engineering (3)

Prerequisite: CECS 443. (Master's students register in CECS 543 or 643; Ph.D. students register in CECS 643.) Study of software engineering as a broad, problem-solving discipline. Includes structured programming and software project management. Additional projects required for CECS 643. (Lecture 2 hours, laboratory 3 hours.) Letter grade only (A-F).

644./544. Software Testing and Verification (3)

Prerequisite: CECS 543. Various types of software testing and verification techniques for software development including black box, white box, incremental, top-down and bottom-up, static and dynamic, performance, regression, thread, and stress testing. Discussion of object-oriented software testing with a hierarchical approach. Metrics in complexity for testing, test, and verification plan will be introduced. Automatic software testing and some case studies. Additional projects required for CECS 644. (Lecture 2 hours, laboratory 3 hours.) Letter grade only (A-F).

645./545. Software Architecture (3)

Prerequisite: CECS 543. Topics include architectural styles, pipes and filters, data abstraction and object-oriented organization, event-based, implicit invocation, layered systems, repositories, interpreters, process control, distributed processes, domain-specific software architectures, and heterogeneous architecture. Component-based design patterns and some case studies. Additional projects required for CECS 645. (Lecture 2 hours, laboratory 3 hours.) Letter grade only (A-F).

646./546. Fault Tolerant Computing Systems (3)

Prerequisite: CECS 530. (Master's students register in CECS 546 or 646; Ph.D. students register in CECS 646.) Fault tolerant techniques are studied as tools to assure the reliability and continuous availability of computing systems. Case studies of modern fault tolerant systems reviewed. Software fault tolerant systems studied as alternatives to verification and validation approaches to software reliability. Additional projects required for CECS 646. (Lecture-problems 3 hours.) Letter grade only (A-F).

649./549. Advanced Computer Graphics (3)

Prerequisite: CECS 449. (Master's students register in CECS 549 or 649; Ph.D. students register in CECS 649.) Three-dimensional representations, transformations and viewing. Color models and modeling methods. Hidden-line and hidden-surface removal. Lighting and shading. Visual realism. Topics of current interest. Additional projects required for CECS 649. (Lecture 2 hours, laboratory 3 hours.) Letter grade only (A-F).

650./750. Pattern Recognition Using Artificial Intelligence (3)

Prerequisite: CECS 451 or consent of instructor. (Master's students register in CECS 650; Ph.D. students register in CECS 750.) General concepts of pattern recognition and trainable classifiers, decision theory, supervised learning, non-parametric techniques, rule-based systems and neural networks. Additional projects required for Ph.D. students. (Lecture-problems 2 hours, laboratory 3 hours.) Letter grade only (A-F).

651./551. Advanced Artificial Intelligence (3)

Prerequisite: CECS 451. (Master's students register in CECS 551 or 651; Ph.D. students register in CECS 651.) Advanced concepts in artificial intelligence. Topics include knowledge acquisition and representation, fuzzy logic, logical reasoning, multi-sensor integration, Dempster-Shafer's theory of evidential reasoning, real-time expert systems and neural networks. Additional projects required for CECS 651. (Lecture-problems 3 hours.) Letter grade only (A-F).

652./552. Computer Simulation and Modeling (3)

Prerequisites: EE 380 (or MATH 380) and CECS 326. (Master's students register in CECS 552 or 652; Ph.D. students register in CECS 652.) Studies of general purpose and special simulation software. Model verification including graphical models Applications in various areas. Additional projects required for CECS 652. (Lecture-problems 3 hours.) Letter grade only (A-F).

653./553. Machine Vision (3)

Prerequisite: Graduate standing in engineering or computer science. (Master's students register in CECS 553 or 653; Ph.D. students register in CECS 653.) Discussion and laboratory implementation of current research in vision and image understanding. Topics include image formation, early processing, segmentation, relational structures in 2-D and 3-D, motion, stereo, 3-D reconstruction, morphological methods and computer architecture for machine vision. Additional projects required for CECS 653. (Lecture-problems 2 hours, laboratory 3 hours.) Letter grade only (A-F).

670./570. Concurrent Parallel Programming (3)

Prerequisite: CECS 428 or 440. (Master's students register in CECS 570 or 670; Ph.D. students register in CECS 670.) An introduction to concurrent and parallel programming for multiprocessing as well as distributed systems. Computational models and paradigms. Parallel programming languages and programming tools. Portable parallel programming and mapping techniques. Heterogeneous concurrent programming. Concurrent programming on local networks on workstations and personal computers. Additional projects required for CECS 670. (Lecture-problems 2 hours, laboratory 3 hours.) Letter grade only (A-F).

672./572. Advanced Computer Networking (3)

Prerequisite: CECS 474. (Master's students register in CECS 572 or 672; Ph.D. students register in CECS 672.) Advanced concepts in computer network theory and practice. Computer network design and standards for local area networks (LANs) and wide area networks (WANs). Computer network configuration and performance issues. Additional projects required for CECS 672. (Lecture 2 hours, laboratory 3 hours.) Letter grade only (A-F).

673./773. Topics in Distributed Computer Systems (3)

Prerequisite: CECS 572 or 672. (Master's students register in CECS 673; Ph.D. students register in CECS 773.) Network operating systems vs distributed operating systems, research and design issues of distributed operating systems, resources and resource management in distributed systems, communication security and user authentication. Additional projects required for Ph.D. students. (Lecture-problems 3 hours.) Letter grade only (A-F).

675./575. Object-Oriented Analysis and Design (3)

Prerequisite: CECS 475 and either CECS 443 or 543. (Master's students register in CECS 575 or 675; Ph.D. students register in CECS 675.) An object-oriented approach to software development based on modeling objects from the real world and then using the model to build a language-independent design organized around those objects. Object-oriented methodology from problem statement through analysis, system design, and object design. Implementation of object-oriented designs in various target environments. Case studies. Additional projects required for CECS 675. (Lecture 2 hours, laboratory 3 hours.) Letter grade only (A-F).

690./590. Special Topics in Computer Science (3)

Prerequisites: Graduate standing and consent of instructor. (Master's students register in CECS 590 or 690; Ph.D. students register in CECS 690.) Each offering is based on an area in computer science and technology in which recent advances have been made. Additional projects required for CECS 690. (Lecture-problems 3 hours.) May be repeated to a maximum of 6 units with consent of department. Letter grade only (A-F).

694. Seminar in Computer Science (3)

Prerequisite: Six units of 500 or 600 level CECS courses. Intensive study of a broad selection of conceptual and theoretical problems in computer science. A written student research project and an oral presentation are required. Letter grade only (A-F).

697. Directed Research (1-3)

Prerequisite: Classified Graduate standing. Theoretical and experimental problems in computer science and engineering requiring intensive analysis. (Independent Study.) Letter grade only (A-F).

698. Thesis or Industrial Project (2-6)

Prerequisite: Advancement to Candidacy. Planning, preparation, and completion of a thesis or equivalent industrial project report on a suitable topic in computer engineering and computer science following the library's prescribed format. Requires consultation with department's Graduate Advisor and submission of an Agreement for Independent Study form each semester of enrollment. May be repeated to a total of 6 units.

750./650. Pattern Recognition Using Artificial Intelligence (3)

Prerequisite: CECS 451 or consent of instructor. (Master's students register in CECS 650; Ph.D. students register in CECS 750.) General concepts of pattern recognition and trainable classifiers, decision theory, supervised learning, non-parametric techniques, rule-based systems and neural networks. Additional projects required for Ph.D. students. (Lecture-problems 2 hours, laboratory 3 hours.) Letter grade only (A-F).

773./673. Topics in Distributed Computer Systems (3)

Prerequisite: CECS 572 or 672. (Master's students register in CECS 673; Ph.D. students register in CECS 773.) Network operating systems vs distributed operating systems, research and design issues of distributed operating systems, resources and resource management in distributed systems, communication security and user authentication. Additional projects required for Ph.D. students. (Lecture-problems 3 hours.) Letter grade only (A-F).

Chemical engineers apply their knowledge of chemistry and engineering to make useful products that improve the quality of our lives. Industries employing our graduates include fuels, chemicals, polymers, microelectronics, biotechnology, environmental, aerospace, food, consumer products, design and construction. The chemical engineering curriculum provides a thorough background in chemical and physical science, mathematics, and engineering for application to the solution of technical problems encountered in the development, operation, design, and support of a diverse variety of industries.

Educational Mission and Objectives

The Chemical Engineering Department at California State University, Long Beach is a practice-oriented program that aims to develop well-trained professionals who will be successful in their careers and prepared for further advanced studies.

In order to achieve this, the program strives to:

- Provide students the technical foundations to become competent, practicing chemical engineers. Students learn to apply their knowledge of scientific principles to problem identification and solution, to conduct and analyze experimental work, and to design processes and systems to meet specified objectives using modern tools and technologies.
- Prepare students to be successful in their future workplace relationships. Students develop effective communication skills, gain abilities to function productively in teams, and obtain the foundation to support lifelong learning to promote personal and professional growth.
- Instill in students an understanding of their professional and ethical responsibilities and create awareness of the societal impact that their professional activities may have.
- Continuously improve the academic program in partnership with industry, alumni, and government.

Chemical Engineering Professional Advisory Council

The Department of Chemical Engineering Advisory and Development Council, consisting of outstanding engineers and executives from industry and government in Southern California, provides guidance to our program. Its mission is to advise and assist in developing the Department and to support its efforts to serve students, the community, and industry. This liaison between the University and industry ensures that industry concerns are addressed in our curricula and provides career guidance for our graduates.

ABET Accreditation

The Bachelor of Science in Chemical Engineering is accredited by the EAC (Engineering Accreditation Commission) of ABET (Accreditation Board for Engineering and Technology, 111 Market Place, Suite 1050, Baltimore, MD 21202, website: www.abet.org). Students enrolling in our program must see an undergraduate advisor as early as possible to ensure conformity with ABET requirements.

Other Related Programs

Students interested in obtaining a Minor in Environmental Engineering should refer to the College of Engineering section of this *Catalog*. Students who take required Chemistry courses are most likely eligible for Minor in Chemistry degree. See the College of Natural Science and Mathematics section of this *Catalog*.

Students wishing to pursue advanced study may be interested in the College of Engineering's Master of Science in Engineering (MSE) degree. Graduate study leading to the MSE can be tailored to the goals of a student with a background in chemical engineering by taking advanced course work in the interfacing areas of chemistry, civil engineering (environmental area), electrical engineering (control area), computer engineering (microelectronic device area), mechanical engineering (thermal, fluids, and materials areas) and mathematics in addition to chemical engineering. Thesis work may be supervised by chemical engineering faculty. Detailed requirements for the MSE are specified in the College of Engineering section of this *Catalog*.

Grade Requirements

In addition to other University requirements, all students must obtain a grade of "C" or better in each prerequisite for any chemical engineering course. Also, required Written English (GE A1), Speech (GE A2), and Interdisciplinary (IC) courses must be taken for a letter grade, not Credit/No Credit.

Bachelor of Science In Chemical Engineering (code CHE_BS01) (131 units)

Requirements

Lower Division: CH E 200, 210, 220; CHEM 111A, 111B; one course from CHEM 251, BIOL 211A, or MICR 200; C E 205; E E 211; ENGR 101; MATH 122, 123, 224; PHYS 151; PHYS 152 (or E E 210 and 210L).

Upper Division: CH E 320, 330, 410, 420, 430, 440, 450, 460, 470; CHEM 320A, B or 327 and an approved laboratory science; CHEM 377B; MATH 370A; six units from CH E 300, 385, 415, 425, 435, 436, 437, 445, 455, 465, 475, 480, 485; an ECON course or C E 406; three units of approved engineering electives or pass the FE exam.

FOUR YEAR PLAN TO COMPLETE THE BS in CHEMICAL ENGINEERING (CHE_BS01)

131 Units Required Department of Chemical Engineering

Semester 1		Semester 2

ECON class (GE D.2) or CE 406	3
GE Capstone class	3

TOTAL UNITS 15

Most CH E courses are offered only once a year. It is essential to take them in the semester shown.

Engineering majors may waive 6 units of General Education (Categories D.2 and B.1.a or C.3 or E)

The degree can be completed in 131 units only if the student uses BIOL 211A or MICR 200 in Semester 4 and an ECON GE class in Semester 8. Otherwise two additional GE courses are required.

* The degree requirement of "a course in economics" can be satisfied by any ECON course (can meet a GE requirement) or by CE 406 (Engineering Economics). (meets a major requirement.)

A list of Approved Engineering Electives is available in the department office. Engineering elective can be waived if student passes FE Exam.

**CHEM 327(3 units) plus approved laboratory science class (min. 4 units) may be substituted for CHEM 320A&B (8 units).

**** waived for upper-division transfers. After factoring in waivers and double-counting the minimum number of units is 130.

Most CH E courses are offered only once a year. It is essential to take them in the semester shown.

Engineering majors may waive 6 units of General Education (Categories D.2 and B.1.a or C.3 or E) The degree can be completed in 131 units only if the student uses BIOL 211A or MICR 200 in Semester 4 and an ECON GE class in Semester 8. Otherwise two additional GE courses are required.

* The degree requirement of "a course in economics" can be satisfied by any ECON course (can meet a GE requirement) or by CE 406 (Engineering Economics).(counts as major elective.) A list of Approved Engineering Electives is available in the department office. Engineering elective can be waived if student passes FE Exam.

**CHEM 327(3 units) plus approved laboratory science class (min. 4 units) may be substituted for CHEM 320A&B (8 units).

FAQ Concerning Road Maps for Completion of Undergraduate Degrees

For each undergraduate major, the on-line Catalog shows plans for scheduling all required courses to complete the degree in four, five, or six years.

While CSULB will make every effort to schedule classes at the times shown in the plans, we cannot guarantee that courses will be available in specific semesters. It is possible that shortage or budget or of personnel will make it impossible to offer as many classes as we would wish.

The plans are not substitutes for working with an advisor. You are strongly encouraged to see an advisor when planning your program each term.

I am a freshman. Do I have to choose now whether to follow the four, five, or six-year plan?

No. Most freshmen take 12-15 units. You need at least 12 units to receive full financial aid. With experience, you will be able to judge how heavy a load you find comfortable. This will depend on your outside obligations, such as a job, and on your personal circumstances. In theory, each unit requires three hours a week, including preparing for class, attending class, and completing assignments. Use these guidelines to budget your time and plan an appropriate schedule.

Must I take the courses in the semesters shown on the plan?

The plan shows one possible way of completing all requirements for the degree. Consult your advisor about whether it is essential to take a given course in the semester shown. There are some rules to keep in mind:

1) You can take the General Education Foundation courses (Composition, Oral Communication, Critical Thinking, Mathematics) in any semester in the first 36 units of baccalaureate-level course work completed at CSULB.

2) You cannot take upper division courses until you have completed at least 30 units. (Exceptions can be made for students who already have completed advanced study in the subject.) You cannot take General Education Capstone courses until you have completed at least 60 units.

3) For some majors it is essential to complete courses in the correct sequence. You cannot take a more advanced course until you have completed the prerequisite course(s).

4) You must complete all requirements for admission to impacted majors within the first 60 units.

I have been told that I must take one or more pre-baccalaureate courses. How can I plan my program?

Your advisor at SOAR can help you identify which courses must be postponed. You must still complete the minimum number of baccalaureate units required for the degree.

You may be able to catch up by taking additional courses in later semesters or by taking classes in summer or winter session, or you may choose to spend an additional semester completing the program. You cannot begin the sequence of required courses for some majors until you are ready for baccalaureate-level Mathematics. See your major advisor to develop a plan for scheduling the required courses.

I didn't complete the exact list of courses shown. Can I still graduate on time?

The answer depends on your major and on what courses you have completed. The plans are not rigid requirements; they are only intended to provide guidance in planning a program. There are many reasons for students to follow a different pattern, such as changing the major, choosing to take fewer classes in a given semester, choosing to complete a minor or a second major. See your advisor for help in planning a program that will work for you.

If I follow the plan, will I have all requirements for graduation completed?

The plans include the specific courses required for the major. For some majors, there are restrictions on the choice of major electives. It is important that you select General Education courses to meet the required distribution pattern. You may need to take an additional General Education course to complete the minimum number of units required for each category. This is likely to happen if you took three-unit courses in Category B, Physical Universe.

Bachelor of Science In Engineering Technology

Environmental Technology Option (code ET__BS06)

For requirements, see the description in the Engineering Technology Programs section of this catalog.

Safety Operations Certificate (code ET__CT02)

Advisor - Hamid Kavarianian (Chemical Engineering)

Department Office - VEC 136

Telephone - (562) 985-2260

The Certificate Program in Safety Operations is designed to prepare students for safety positions that require a strong background in the technology of safe industrial environments. Examples of this kind of position are manufacturer's safety representative, manufacturing facilities safety analyst, traffic safety analyst, and representative of California or Federal agencies involving public safety. This interdisciplinary program provides the student with a depth of technical training in safety, and related technical courses, including the experiences in human resources management necessary to effectively supervise safety programs.

Requirements

1. The Certificate of Safety Operations may be earned concurrently with or subsequent to the baccalaureate degree.
2. This program is open to all majors who have fulfilled the required prerequisites as stated below.
3. The program requires a total of 24 units as specified below:
 - a. The completion of supporting technical courses chosen in consultation with an advisor.
 - b. 24 units are required from the following courses: ET 307, 309, 311, 319, 329, 329L, 400, 400L, 409, 410, 420, 449, 449L.
4. Any deviation from this program requires the written permission of the program advisor.

Courses (CH E)

Lower Division

200. Chemical Engineering Fundamentals (3)

Prerequisites: CHEM 111A, MATH 123, PHYS 151. Dimensional analysis of units, steady and transient balances of mass, momentum and energy, the mathematical solution of chemical engineering problems. (Lecture-problems 3 hrs.)

210. Computer Methods in Chemical Engineering (3) F

Prerequisites: CHEM 111A, MATH 122, PHYS 151. Beginning programming and techniques of numerical analysis applied to typical problems in chemical engineering. (Lecture-problems 2 hours, laboratory 3 hours.)

220. Chemical Engineering Thermodynamics I (3) S

Prerequisite: CH E 200. Applications of the first and second laws of thermodynamics to chemical processes. Concepts of heat, work, and energy. Energy balances in batch and flow processes, with and without chemical reaction. Gas behavior, phase change, vapor pressure, humidity. (Lecture-problems 3 hours)

Upper Division

300. The Chemical Industry (3)

Prerequisites: CH E 200, CHEM 320A or consent of instructor. Survey of industrial chemical processing techniques and the activities of engineers in this area, illustrated by field trips, speakers, professional society meetings, films, readings, etc. (Lecture-problems 2 hr, lab 3 hrs.)

320. Fluids (3) S

Prerequisites: CH E 200, C E 205. Study of the deformation and flow of fluids, both liquids and gases, with applications to chemical engineering. (Lecture-problems 3 hours.)

330. Separation Processes (4) F

Prerequisites: CH E 210, 220. Computation methods for predicting the separation of materials by distillation, absorption, extraction and other methods. (Lecture-problems 3 hours, lab 3 hrs.)

*385. Manufacture of Microelectronic Devices (3)

Prerequisites: CHEM 111A, PHYS 152, and ENGR 223 or consent of instructor. Application of diffusion, oxidation, reaction rate, heat transfer and surface science to semiconductor and secondary processing. Processes include film growth, chemical vapor deposition, ion implantation and surface alloying, microlithography, etching, metalization, coating and adhesion. Numerically-controlled machining and computer modeling. (Lecture-problems 2 hours, laboratory 3 hours.) Letter grade only (A-F).

*410. Chemical Engineering Thermodynamics II (3) F

Prerequisites: CH E 210, 220. Analysis and design of process equipment and systems using thermodynamics. Turbines, compressors, power plants, refrigeration cycles. Phase equilibria and nonideal solution behavior. Chemical reaction equilibria and heat effects. (Lecture-problems 3 hours.)

415./515. Occupational and Environmental Safety Engineering and Management (3)

Prerequisite: CHEM 327 or consent of instructor. Safety engineering and management, legislation, regulations and standards; toxicology and personal protective equipment; fire hazards; noise control; electrical safety; system safety analysis; container and spill management; use of computer systems and statistical methods. Extra requirements for graduate students: term papers or projects. (Lecture-problems 3 hours.)

*420. Heat and Mass Transport (3) F

Prerequisite: CH E 210, 320; CHEM 377B. Heat exchange by conduction, convection and radiation. Diffusion in fluids and solids. Simultaneous heat and mass transport. (Lecture-problems 2 hours, laboratory 3 hours.)

*425. Polymer Synthesis and Characterization (3)

Prerequisite: CHEM 320A or consent of instructor. Physical and chemical concepts in the production of polymers. Relation of the chemical structure to bulk properties of plastics. Laboratory synthesis of polymers and their mechanical, thermal and molecular characterization. (Lecture-problems 2 hours, laboratory 3 hours.)

*430. Chemical Reactor Kinetics (3) F

Prerequisites: CHEM 377B. Homogeneous and heterogeneous reactions and application to reactor design, catalysts. (Lecture-problems 2 hours, laboratory 3 hours.) Letter grade only (A-F).

*435. Chemical and Electrochemical Manufacturing Processes (3)

Prerequisites: MAE 322, 330; or CHEM 371A or consent of instructor. Theory of electrochemical processing. Electroplating and electroless plating solutions, processes and equipment. Anodizing and other surface treatments. Carburizing, nitriding atmospheres and equipment. Diffusion in solids. The effect of surface treatments on mechanical properties. Same course as MAE 425. (Lecture-problems 3 hours.) Letter grade only (A-F).

*436. Corrosion Engineering (3)

Prerequisites: MAE 322 or CHEM 371A or consent of instructor. Principles of oxide film growth and electrochemical corrosion, corrosion testing, environmental and metallurgical effects on corrosion, environmental stress cracking, corrosion control and prevention. (Lecture-problems 3 hours.) Letter grade only (A-F).

437./537. Materials Purification Processes (3)

Prerequisite: CH E 330, 420, or consent of instructor. Rate-controlled separation processes such as membrane separations, pressure swing adsorption, molecular sieve separation, supercritical fluid extraction, reverse osmosis, and spray drying. Additional projects required for CH E 537. (Lecture-problems 3 hours.) Letter grade only (A-F).

*440. Chemical Engineering Laboratory I (2) F

Prerequisites: CH E 220, 320, 330. Laboratory study of fluid mechanics, separation processes and thermodynamics. Experimental design and analysis and preparation of engineering reports. (Laboratory 6 hours.)

445./545. Pollution Prevention (3)

Prerequisite: CH E 330. Overview of pollution prevention strategies in chemical industry and related industries. Hierarchical approach of minimizing industrial wastes and pollutants. Discussions of life cycle analyses of wastes, identifying and prioritizing pollutants from industrial sites, selecting environmentally compatible materials, design of unit operations for minimizing waste, economics of pollution prevention, and computer-aided process flowsheeting for minimizing waste. Extra requirement for graduate students: term papers or projects. (Lecture-problems 3 hours.) Letter grade only (A-F).

*450. Chemical Engineering Laboratory II (2) S

Prerequisites: CH E 410, 420, 430, 440; prerequisite or corequisite: CH E 460. Laboratory study of heat and mass transport, chemical kinetics and control theory. Experimental design and analysis and preparation of engineering reports. (Lab 6 hours.)

455./555. Environmental Compliance (3)

Prerequisite: CHEM 327 or consent of instructor. Physical and chemical properties of hazardous materials and wastes. Environmental hazards. An examination of environmental laws, regulations and standards dealing with storage, transportation, treatment and disposal of hazardous wastes. Emergency planning and preparedness. Extra requirement for graduate students: term papers or projects. (Lecture-problems 3 hours.)

*460. Chemical Process Control (3) S

Prerequisites: CH E 420; MATH 370 A. Control theory and practice, instrumentation, system responses, transfer functions, feedback control, and stability as applied to chemical engineering processes. (Lecture-problems 2 hours, laboratory 3 hours.)

465./565. Biochemical Engineering (3)

Prerequisite: CH E 200, 330, 430, and life science course(s) with instructor's approval. Microbial physiology and genetics. Chemicals of life. Metabolic stoichiometry and energetics. Kinetics of enzyme-catalyzed reactions. Kinetics of substrate utilization, product formation and biomass production. Design and analysis of bioreactors. Product recovery operations. Bioprocess economics. Applications to natural systems wastewater treatment, and biohydrometallurgy. Extra requirements for graduate students: term papers and laboratory projects on biomass production, microbial enhanced oil recovery or metal recovery. (Lecture-problems 3 hrs)

*470. Chemical Engineering Design (4) S

Prerequisites: CH E 220, 330, 420, 430; CHEM 320A. Design based upon economics and chemical engineering design and analysis. (Lecture-problems 3 hours, problem-design session 3 hrs.)

*475. Environmental Pollution (3)

Prerequisites: CHEM 111A-B. Recommended: Chemistry 320A, 371A. Application of chemistry to the problems of pollution. (Lecture-problems 3 hours.)

480./580. Theoretical Methods in Chemical Engineering (3)

Prerequisites: CH E 420, 430. Simulation and optimization of chemical engineering processes by mathematical formulation and computer modeling. Extra requirements for graduate students: term papers or projects. (Lecture-problems 3 hours.)

485./585. Air Pollution (3)

Prerequisites: CH E 475 or CE 364 or consent of instructor. Air pollution chemistry; control strategies; origin of pollutants; meteorology; vapor dispersion models; control principles for particulates, sulfur dioxide, and nitrogen oxides. Extra requirement for graduate students: term papers or projects. (Lecture-problems 3 hours)

490. Special Problems (1-3)

Prerequisite: Consent of instructor. Assigned topics in technical literature or laboratory projects and reports on same.

Graduate Courses

510. Multiphase Flow and Interfacial Phenomena (3)

Prerequisites: CH E 320 or consent of instructor. Equation of motion in multiphase systems such as slurries and fluidized beds involving bubbles, drops, and particles. Effects of interfacial tension, particle-surface and interparticulate interactions. (Lecture-Problems 3 hours) Letter grade only (A-F).

515./415. Occupational and Environmental Safety Engineering and Management (3)

Prerequisite: CHEM 327 or consent of instructor. Safety engineering and management, legislation, regulations and standards; toxicology and personal protective equipment; fire hazards; noise control; electrical safety; system safety analysis; container and spill management; use of computer systems and statistical methods. Extra requirements for graduate students: term papers or projects. (Lecture-problems 3 hours.)

520. Advanced Transport Phenomena (3)

Prerequisites: CH E 320, 420, 430. Application of differential and integral mass, momentum and energy balances to chemical engineering processes. Analysis of fluid flow, heat transfer, diffusion and chemical reaction in various unit operations. (Lecture-Problems 3 hours) Letter grade only (A-F).

530. Advanced Reactor Kinetics (3)

Prerequisites: CH E 430. Modeling of chemical reactors: effects of multiple phases, mixing, adsorption, diffusion and catalysts on reactor performance. (Lecture-Problems 3 hrs) Letter grade only (A-F).

537./437. Materials Purification Processes (3)

Prerequisites: CH E 330, 420, or consent of instructor. Rate-controlled separation processes such as membrane separations, pressure swing adsorption, molecular sieve separation, supercritical fluid extraction, reverse osmosis, and spray drying. Additional projects required for CH E 537. (Lecture-problems 3 hours.) Letter grade only (A-F).

545./445. Pollution Prevention (3)

Prerequisite: CH E 330. Overview of pollution prevention strategies in chemical industry and related industries. Hierarchical approach of minimizing industrial wastes and pollutants. Discussions of life cycle analyses of wastes, identifying and prioritizing pollutants from industrial sites, selecting environmentally compatible materials, design of unit operations for minimizing waste, economics of pollution prevention, and computer-aided process flowsheeting for minimizing waste. Extra requirement for graduate students: term papers or projects. (Lecture-problems 3 hours.) Letter grade only (A-F).

555./455. Environmental Compliance (3)

Prerequisite: CHEM 327 or consent of instructor. Physical and chemical properties of hazardous materials and wastes. Environmental hazards. An examination of environmental laws, regulations and standards dealing with storage, transportation, treatment and disposal of hazardous wastes. Emergency planning and preparedness. Extra requirement for graduate students: term papers or projects. (Lecture-problems 3 hours.)

565./465. Biochemical Engineering (3)

Prerequisite: CH E 200, 330, 430, and life science course(s) with instructor's approval. Microbial physiology and genetics. Chemicals of life. Metabolic stoichiometry and energetics. Kinetics of enzyme-catalyzed reactions. Kinetics of substrate utilization, product formation and biomass production. Design and analysis of bioreactors. Product recovery operations. Bioprocess economics. Applications to natural systems wastewater treatment, and biohydrometallurgy. Extra requirements for graduate students: term papers and laboratory projects on biomass production, microbial enhanced oil recovery or metal recovery. (Lecture-problems 3 hrs.)

580./480. Theoretical Methods in Chemical Engineering (3)

Prerequisites: CH E 420, 430. Simulation and optimization of chemical engineering processes by mathematical formulation and computer modeling. Extra requirements for graduate students: term papers or projects. (Lecture-problems 3 hours.)

585./485. Air Pollution (3)

Prerequisites: CH E 475 or CE 364 or consent of instructor. Air pollution chemistry; control strategies; origin of pollutants; meteorology; vapor dispersion models; control principles for particulates, sulfur dioxide, and nitrogen oxides. Extra requirement for graduate students: term papers or projects. (Lecture-problems 3 hrs)

697. Directed Research (1-3)

Prerequisites: Graduate standing. Individual research or intensive study under the guidance of a faculty member on theoretical or experimental problems in chemical engineering. (Independent Study) Letter grade only (A-F).

698. Thesis or Industrial Project (2-6)

Prerequisite: Advancement to Candidacy. Preparation and completion of a thesis or industrial project in chemical engineering. May be repeated to a maximum of 6 units.

Students desiring information should contact the department office for referral to one of the faculty advisors.

View the CSU, Long Beach *Catalog* on-line at www.csulb.edu by clicking on "Academics" and then "CSULB Catalog."

The Department of Chemistry and Biochemistry offers three bachelor's degrees, the B.S. in Chemistry, the B.S. in Biochemistry, and the B.A. in Chemistry, and two master's degrees, the M.S. in Chemistry and the M.S. in Biochemistry. These programs combined serve about 350 majors. In addition, the Department offers a Minor in Chemistry. The Chemistry and Biochemistry Department Advisory Council, including persons prominent in the community, fosters communication between academic and industrial chemistry. It advises the Department concerning the instructional program and informs the Department of opportunities for interaction with the community.

Degree Programs

The program in chemistry at the bachelor's degree level is planned to develop background in a specific science, to serve as preparation for graduate work in chemistry or biochemistry, and to provide a foundation for those students seeking careers in the chemical sciences, teaching, law, medicine, dentistry, pharmacy and other health-related professions, and in industrial and governmental scientific occupations. The B.S. degree in chemistry is certified by the American Chemical Society (American Chemical Society, Committee on Professional Training, 1155 Sixteenth St., NW, Washington, DC 20036, phone: 202-872-4589).

Transfer Students: A student who transfers to the University must take at least 16 units of upper division chemistry courses here. To receive credit towards the major for courses taken elsewhere in place of CHEM 320A,B and/or 371A,B and/or 377A,B, consent of the Department Chair is required. Satisfactory performance on appropriate proficiency examinations may also be required.

The Department of Chemistry and Biochemistry offers graduate study leading to research-based master of science degrees in chemistry and biochemistry. The candidate is urged to observe the general requirements stated in this *Catalog* as well as the specific departmental requirements stated here and, more fully, in the Graduate Studies Brochure of the Department which is available upon request.

A limited number of teaching associate and graduate and research assistantships are available. Usually, these involve half-time work in the instructional program at the freshman and sophomore level or work in the laboratory. Application forms for these positions are available from the Graduate Advisors, Department of Chemistry and Biochemistry.

Students Desiring Entrance into a Health Professions Program

Students desiring entrance into one of the various health-related professional schools including chiropractic, dentistry, medicine, optometry, osteopathy, pharmacy, podiatry, and veterinary, or to graduate program in physical therapy, should consult with the Health Professions Advising Office in the College of Natural Sciences and

Mathematics (FO5-109) for more information. Most of these schools do not require students to major in any particular discipline and many do not even require a bachelor's degree; rather, they want students who have done well in their major and who also took the prerequisite courses required by that particular school.

Facilitated Enrollment into Classes

All entering students who declare a major in a degree program offered by this Department should participate in the College of Natural Sciences and Mathematics' Science Safari to Success (for first-time freshmen) or EONS (Enrollment and Orientation in the Natural Sciences and Mathematics for transfer students) Program. These programs are held in June-July for those starting in the fall semester and in January for those starting in the spring semester. Department advisors will be available to provide an overview of the students' chosen baccalaureate degree program, to assist with academic advisement, to provide information on the many career opportunities available, and to aid students in enrolling in classes. Contact the Student Access to Sciences and Mathematics Center (Faculty Office 5-109) or Department Office for additional information.

Bachelor of Science in Chemistry (code CHEMBS01) (122 units)

The bachelor of science degree program is intended to provide a thorough background in chemistry for those planning to pursue careers as professional chemists or to do graduate study in chemistry or biochemistry. This program, when supplemented with study in other appropriate areas, can serve as preparation for admission to the health professional schools (medicine, dentistry, pharmacy, etc.). Each student should consult with a faculty advisor to plan his or her individual program. Students may also wish to contact the Health Professions Advising Office in the Student Access to Sciences and Mathematics Center (FO5-109) for additional information and services.

Chemistry majors must achieve a grade of "C" or better in each chemistry course required for the major.

Requirements

Lower Division: CHEM 111A, B, 251; courses to support the major to include PHYS 151, 152, 254; MATH 122, 123, 224; and BIOL 211A

Upper Division: CHEM 320A,B, 371A, B, 373, 420, 431, 451; one course chosen from among ENGL 317, 417, 418, 419, or CHEM 466H; and an additional six units of upper division chemistry which must include at least one unit of CHEM 496. A maximum of three units from CHEM 495, 496, and 499 and CHE 330, 425, 430, or 475 may be used to fulfill this six unit requirement. One additional course in computer programming must be taken from CHE 210 or CECS 174.

B.S. candidates are encouraged to acquire competence in reading scientific German, French, Russian, Chinese or Japanese. Students are also advised to take one or more additional courses in mathematics, such as MATH 247, 364A, 370A, 380.

Bachelor of Arts in Chemistry (code CHEMBA01) (120 units)

The bachelor of arts degree program in chemistry is intended to provide a background in chemistry, but not in the depth required for a bachelor of science degree. This program, when complemented with study in other areas, will serve as preparation for a career in chemical and related industries or secondary science education. The bachelor of arts program is also an appropriate preparation for medical, dental, law, and pharmacy schools. Students may also wish to contact the Health Professions Advising Office in the Student Access to Sciences and Mathematics Center (FO5-109) for additional information and services. In order to take full advantage of the bachelor of arts program for various career objectives, adequate counseling by chemistry advisors is indispensable. Each student must confer with an advisor to set up his/her individually tailored program in chemistry and one or more complementary areas prior to beginning the course of study.

Chemistry majors must achieve a grade of "C" or better in each chemistry course required for the major.

Requirements

Lower Division: CHEM 111A,B, 251; courses to support the major to include PHYS 100A,B or 151, 152; and MATH 122, 123.

Upper Division: CHEM 320A,B, 371A,B or 377A,B, 420, 451; one course chosen from among ENGL 317, 417, 418, 419, or CHEM 466H. A minimum of 3 additional units to be chosen in consultation with an advisor must be taken from CHEM 373, 421, 431, 441A,B, 496. Students must consult an advisor to select additional courses to meet the student's individual goals and interests.

FAQ Concerning Road Maps for Completion of Undergraduate Degrees

For each undergraduate major, the on-line Catalog shows plans for scheduling all required courses to complete the degree in four, five, or six years.

While CSULB will make every effort to schedule classes at the times shown in the plans, we cannot guarantee that courses will be available in specific semesters. It is possible that shortage or budget or of personnel will make it impossible to offer as many classes as we would wish.

The plans are not substitutes for working with an advisor. You are strongly encouraged to see an advisor when planning your program each term.

I am a freshman. Do I have to choose now whether to follow the four, five, or six-year plan?

No. Most freshmen take 12-15 units. You need at least 12 units to receive full financial aid. With experience, you will be able to judge how heavy a load you find comfortable. This will depend on your outside obligations, such as a job, and on your personal circumstances. In theory, each unit requires three hours a week, including preparing for class, attending class, and completing assignments. Use these guidelines to budget your time and plan an appropriate schedule.

Must I take the courses in the semesters shown on the plan?

The plan shows one possible way of completing all requirements for the degree. Consult your advisor about whether it is essential to take a given course in the semester shown. There are some rules to keep in mind:

1) You can take the General Education Foundation courses (Composition, Oral Communication, Critical Thinking, Mathematics) in any semester in the first 36 units of baccalaureate-level course work completed at CSULB.

2) You cannot take upper division courses until you have completed at least 30 units. (Exceptions can be made for students who already have completed advanced study in the subject.) You cannot take General Education Capstone courses until you have completed at least 60 units.

3) For some majors it is essential to complete courses in the correct sequence. You cannot take a more advanced course until you have completed the prerequisite course(s).

4) You must complete all requirements for admission to impacted majors within the first 60 units.

I have been told that I must take one or more pre-baccalaureate courses. How can I plan my program?

Your advisor at SOAR can help you identify which courses must be postponed. You must still complete the minimum number of baccalaureate units required for the degree.

You may be able to catch up by taking additional courses in later semesters or by taking classes in summer or winter session, or you may choose to spend an additional semester completing the program. You cannot begin the sequence of required courses for some majors until you are ready for baccalaureate-level Mathematics. See your major advisor to develop a plan for scheduling the required courses.

I didn't complete the exact list of courses shown. Can I still graduate on time?

The answer depends on your major and on what courses you have completed. The plans are not rigid requirements; they are only intended to provide guidance in planning a program. There are many reasons for students to follow a different pattern, such as changing the major, choosing to take fewer classes in a given semester, choosing to complete a minor or a second major. See your advisor for help in planning a program that will work for you.

If I follow the plan, will I have all requirements for graduation completed?

The plans include the specific courses required for the major. For some majors, there are restrictions on the choice of major electives. It is important that you select General Education courses to meet the required distribution pattern. You may need to take an additional General Education course to complete the minimum number of units required for each category. This is likely to happen if you took three-unit courses in Category B, Physical Universe.

Bachelor of Science in Biochemistry (code CHEMBS02) (121 units)

The Bachelor of Science degree in biochemistry is intended to provide a rigorous background in chemistry and biochemistry for those planning for graduate study in biochemistry or other life sciences, or for careers in biochemical and related industries. This program is also an appropriate preparation for medicine, dentistry, pharmacy and clinical chemistry at the graduate level. Students must confer with an advisor to set up an appropriate program for their goals.

Biochemistry majors must achieve a grade of "C" or better in each chemistry and biochemistry course required for the major.

Requirements

Lower Division: CHEM 111A, B, 251; courses to support the major to include BIOL 211A,B; MATH 122, 123; and PHYS 100A,B or 151, 152.

Upper Division: CHEM 320A,B, 371A or 377A, 371B or 377B (371A,B is recommended as preparation for graduate studies in biochemistry) 420, 441A,B, 443, BIOL 342 and 342L, BIOL 370 or MICR 450 and 451, 3 units of elective from CHEM 373, 421, 431, 451, BIOL 340, 445, 448, 473, MICR 452, 473, and one course chosen from among ENGL 317, 417, 418, 419, or CHEM 466H.

FAQ Concerning Road Maps for Completion of Undergraduate Degrees

For each undergraduate major, the on-line Catalog shows plans for scheduling all required courses to complete the degree in four, five, or six years.

While CSULB will make every effort to schedule classes at the times shown in the plans, we cannot guarantee that courses will be available in specific semesters. It is possible that shortage or budget or of personnel will make it impossible to offer as many classes as we would wish.

The plans are not substitutes for working with an advisor. You are strongly encouraged to see an advisor when planning your program each term.

I am a freshman. Do I have to choose now whether to follow the four, five, or six-year plan?

No. Most freshmen take 12-15 units. You need at least 12 units to receive full financial aid. With experience, you will be able to judge how heavy a load you find comfortable. This will depend on your outside obligations, such as a job, and on your personal circumstances. In theory, each unit requires three hours a week, including preparing for class, attending class, and completing assignments. Use these guidelines to budget your time and plan an appropriate schedule.

Must I take the courses in the semesters shown on the plan?

The plan shows one possible way of completing all requirements for the degree. Consult your advisor about whether it is essential to take a given course in the semester shown. There are some rules to keep in mind:

1) You can take the General Education Foundation courses (Composition, Oral Communication, Critical Thinking, Mathematics) in any semester in the first 36 units of baccalaureate-level course work completed at CSULB.

2) You cannot take upper division courses until you have completed at least 30 units. (Exceptions can be made for students who already have completed advanced study in the subject.) You cannot take General Education Capstone courses until you have completed at least 60 units.

3) For some majors it is essential to complete courses in the correct sequence. You cannot take a more advanced course until you have completed the prerequisite course(s).

4) You must complete all requirements for admission to impacted majors within the first 60 units.

I have been told that I must take one or more pre-baccalaureate courses. How can I plan my program?

Your advisor at SOAR can help you identify which courses must be postponed. You must still complete the minimum number of baccalaureate units required for the degree.

You may be able to catch up by taking additional courses in later semesters or by taking classes in summer or winter session, or you may choose to spend an additional semester completing the program. You cannot begin the sequence of required courses for some majors until you are ready for baccalaureate-level Mathematics. See your major advisor to develop a plan for scheduling the required courses.

I didn't complete the exact list of courses shown. Can I still graduate on time?

The answer depends on your major and on what courses you have completed. The plans are not rigid requirements; they are only intended to provide guidance in planning a program. There are many reasons for students to follow a different pattern, such as changing the major, choosing to take fewer classes in a given semester, choosing to complete a minor or a second major. See your advisor for help in planning a program that will work for you.

If I follow the plan, will I have all requirements for graduation completed?

The plans include the specific courses required for the major. For some majors, there are restrictions on the choice of major electives. It is important that you select General Education courses to meet the required distribution pattern. You may need to take an additional General Education course to complete the minimum number of units required for each category. This is likely to happen if you took three-unit courses in Category B, Physical Universe.

Teaching Credential

Requirements Related to a Chemistry Specialization

The Science Teaching Credential with a Specialization in Chemistry is formally administered by the Department of Science Education and the Single Subject Teacher Education Program in the College of Education. The student is strongly encouraged to consult with an advisor in the Department of Chemistry and Biochemistry, the Department of Science Education, or the Single Subject Credential Program for more information about additional requirements for the credential.

Lower Division: ASTR 100; BIOL 211A,B; CHEM 111A,B, 251; GEOL 102, 104, 160; PHYS 100A,B or 151,152, MATH 119,B or 122, 123.

Upper Division: CHEM 320A-B, 441A, 451, 496, either 431 or 441B; SCED 403.

Honors in Biochemistry or Chemistry

Students majoring in the B. S. in Biochemistry, B. S. in Chemistry, or B. A. in Chemistry who would like an enriched academic program including an intensive research experience may be eligible to graduate with Honors in the Major through the University Honors Program. Students may complete General Honors through the University Honors Program as well; in such cases the General Honors thesis requirement is met through Honors in the Major (see University Honors in this *Catalog*).

Chemistry majors should be aware that this program is designed for students with career goals in life science areas, and, as such, chemistry majors who wish to participate must take additional coursework in biology beyond the minimum required for a chemistry degree.

The requirements for Honors in the Major will also satisfy the requirements of a college-wide program, Honors in Biological Sciences, created with the support of a grant from the Howard Hughes Medical Institute. This grant provides opportunities for monetary support to students for completion of their research and thesis. While Honors in the Major requires junior or senior standing, the college-wide program offers an enriched curriculum beginning in the freshman year, including a freshman seminar (BIOL 110H), a critical thinking course designed for science majors, and an introduction to bioinformatics (BIOL 220H). Interested students should contact the Honors in Biological Sciences program director or the Student Access to Sciences and Mathematics Center.

Requirements for Admission to Honors in the Major

1. Junior or senior standing with at least one year remaining before graduation.
2. Declared major of B. S. in Biochemistry, B. S. in Chemistry, or B. A. in Chemistry.
3. Submission of an application detailing interest in the program and willingness to commit to a year-long research experience.
4. Letter of recommendation from a CSULB faculty member familiar with the student's work.

5. Completion of BIOL 211A, B; CHEM 251, 320A, B at time of entry with grades of at least "C" in each course. Students may apply during the semester in which they expect to complete these courses.
6. GPA of at least 3.00 in all courses in the major and in all upper division courses in the major.

Requirements for Graduation with Honors in the Major

1. GPA of at least 3.30 in all upper division courses in the major and in Honors courses.
2. Completion of all requirements for the B. S. in Biochemistry, B. S. in Chemistry, or B. A. in Chemistry.
3. Completion of BIOL/CHEM 466H, Research Design and Methods - Honors (3 units).
4. Completion of 3 units CHEM 496, Undergraduate Directed Research.
5. Completion of 3 units of CHEM 498H, Senior Thesis - Honors.
6. Presentation of research results in a public forum. This requirement may be met by presentation at a scientific conference or at a local venue; consult the Honors in the Major advisor for additional information

Substitutions to this program must be approved by the Honors in the Major Advisor.

Minor in Chemistry (code CHEMUM01)

The Minor in Chemistry is available to any non-Chemistry or Biochemistry major.

A minimum of 20 units of chemistry which must include CHEM 111A,B. A minimum of nine units must be taken from upper division chemistry courses. The following courses are not acceptable toward the minor: CHEM 100, 101, 202, 302.

Concurrent and/or Summer Enrollment in Another College

Students who wish to take course work in a community or other college to meet curricular requirements while enrolled as undergraduates in the College of Natural Sciences and Mathematics must petition the appropriate department for prior approval to enroll in specific courses. This policy applies to concurrent enrollment or summer enrollment. University policy must also be complied with. See "Concurrent Enrollment" and "Transfer of Undergraduate Credit" in this *Catalog*. Courses not receiving prior approval will not be accepted for credit by the Department.

Graduate Credit Earned as an Undergraduate Chemistry or Biochemistry Major

Graduate credit usually may not be earned in advance of the baccalaureate degree. However, based upon the recommendation of the Department Chairman and the Chairman of the Department Graduate Studies Committee, academic performance (a grade point average of 3.00 overall and 3.00 in the major), and promise of academic achievement in post-graduate study, a student in his/her senior year may be granted approval to earn a maximum of 12 units of course work in the 400 and 500 level taken at this University toward his/her prospective graduate program, subject to the following conditions:

1. The course work must be in addition to that required by the Department for the B.A. or B.S. degree in Chemistry or the B.S. degree in Biochemistry.
2. The undergraduate student must have a "Petition to Earn Credit in the Senior Year" approved by the appropriate Department Graduate Advisor, the Associate Dean for Graduate Accountability in the College of Natural Sciences and Mathematics, and the Dean of Graduate Studies.

Master of Science in Chemistry (code CHEMMS01)

Prerequisites

1. Acceptance as a graduate student by the Chemistry and Biochemistry Department;
2. A bachelor's degree with a major in chemistry; or
3. A bachelor's degree with undergraduate preparation in chemistry, physics and mathematics equivalent to that required for the bachelor of science degree with a major in chemistry at this University;
4. Entering graduate students are required to take placement examinations in analytical, inorganic, organic and physical chemistry. Any student failing to take and pass a placement examination in any of these subjects is required to enroll in an appropriate course as recommended by the Graduate Studies Committee. Usually the recommended courses are: CHEM 451 if the subject is analytical chemistry; CHEM 431 if the subject is inorganic chemistry; CHEM 320A and/or 320B if the subject is organic chemistry; CHEM 371A and/or 371B if the subject is physical chemistry.
5. The placement examinations are usually given on Monday and Tuesday of the week preceding the first day of instruction. The Graduate Studies Committee evaluates the examinations and recommends appropriate courses to correct for any deficiencies in chemistry. The chemistry graduate advisor meets with the student at this time to prepare a tentative degree program.

Advancement to Candidacy

The Department recommends advancement to candidacy after the graduate student has:

1. Either passed the placement examinations in analytical, inorganic, organic and physical chemistry or passed the courses as recommended by the Graduate Studies Committee for correcting deficiencies;
2. Earned an average of at least 3.0 (B) in all work completed at this University as a graduate student;
3. Passed the Writing Proficiency Examination;
4. Obtained approval of a graduate degree program by the Chemistry Graduate Advisor, the Department Chair (in consultation with the Graduate Studies Committee), Associate Dean for Graduate Accountability in the College of Natural Sciences and Mathematics, and the Dean of Graduate Studies.

The student is expected to be advanced to candidacy by the beginning of the third semester of graduate work. Upon advancement to candidacy, a Thesis Committee will be selected in consultation with the Graduate Studies Committee.

Requirements

1. Advancement to candidacy at least one semester before the graduation date;
2. The completion of a minimum of 30 units to be distributed in the following way:
 - A. Minimum of nine units in chemistry lecture courses in the 500 series (excluding CHEM 595). These courses must be selected from at least two of the following fields: analytical, inorganic, organic, physical and biological chemistry;
 - B. Two units of CHEM 595;
 - C. One unit of CHEM 660, a maximum of 3 units of CHEM 697 and/or 695 and 4 to 6 units of CHEM 698;
 - D. Nine to 12 units from 400 and 500 series courses (excluding CHEM 595). The exact number of units depends on the number of 600-level courses taken. Changes in the above pattern of course requirements may be made only at the discretion of the Graduate Studies Committee and the graduate advisor.
3. Completion of an acceptable thesis.

Master of Science in Biochemistry (code CHEMMS02)

Prerequisites

1. Acceptance as a graduate student by the Chemistry and Biochemistry Department;
2. A bachelor's degree with a major in chemistry or one of the biological sciences. Prerequisite courses include CHEM 251, 320A,B, 377A,B, 441A,B, MATH 122,123, or their equivalents, and courses in general biology and cell/molecular biology. A student deficient in any of these courses must complete the course as a graduate student;
3. Entering graduate students are required to take placement examinations in analytical, biological, organic and physical chemistry. Any student failing to take and pass a placement examination in any of these subjects is required to enroll in an appropriate course. The courses usually designated are: CHEM 451 if the subject is analytical chemistry; CHEM 441A and/or 441B if the subject is biochemistry; CHEM 320A and/or 320B if the subject is organic chemistry; CHEM 371A and/or 371B; or 377A and/or 377B if the subject is physical chemistry.
4. The placement examinations are usually given on Monday and Tuesday of the week preceding the first day of instruction. Entering students should correspond with the Biochemistry Graduate Advisor before arrival to arrange to take these examinations. The Graduate Studies Committee evaluates the examinations and recommends appropriate courses to correct any deficiencies in chemistry or biochemistry. The Biochemistry Graduate Advisor will meet with the student at this time to prepare a tentative degree program.

Advancement to Candidacy

The Department recommends advancement to candidacy after the graduate student has:

1. Either passed the placement examinations in analytical, biological, organic and physical chemistry or passed courses recommended by the Graduate Studies Committee for correcting the deficiencies;
2. Earned at least a 3.0 ("B") average in all graduate work completed at this University;
3. Passed the Writing Proficiency Examination;
4. Obtained approval of a graduate degree program by the graduate advisor, the Department Chair (in consultation with the Graduate Studies Committee), Associate Dean for Graduate Accountability in the College of Natural Sciences and Mathematics, and the Dean of Graduate Studies.

The criteria above should be met by the beginning of the third semester of graduate study. Deficient students may continue at the discretion of the Department Graduate Studies Committee.

Requirements

1. Advancement to candidacy;
2. The completion of a minimum of 30 units with:
 - A. A minimum of nine units in chemistry lecture courses in the 500 series (excluding CHEM 595);
 - B. Three units of CHEM 595;
 - C. One unit of CHEM 660, a maximum of 3 units of CHEM 697, and 4 to 6 units of CHEM 698;
 - D. The following courses taken either prior to or during the course of this program: (1) CHEM 377A or 371A and CHEM 377B or 371B; (2) CHEM 443 and either CHEM 420 or 451; (3) at least one senior or graduate level course in cell/molecular biology or a related area. Credit earned in these courses may be included in the student's official program at the discretion of the Graduate Advisor.
 - E. Additional 400 and 500 level science courses (excluding CHEM 595) approved by the Graduate Advisor.
3. Completion of an acceptable thesis.

Changes in the above pattern of course requirements may be made only at the discretion of the Graduate Studies Committee and the Graduate Advisor subject to approval by the Associate Dean for Graduate Accountability and Dean of Graduate Studies.

Courses (CHEM)

Lower Division

100. Chemistry and Today's World (4)

Prerequisites: One course from the Foundation (GE categories A1, A2, A3, and B2). Introduction to the basic principles of chemistry and a consideration of the benefits and problems arising from applications of chemistry. Discussions of foods and food additives, drugs, plastics and other materials of everyday life, fuel sources, the atmosphere, and fresh water. Suitable for general education credit. Not open for credit to chemistry or biochemistry majors or students with credit in CHEM 111A or CHEM 202. (Lecture 3 hrs., laboratory 3 hrs.) Course fee may be required.

101. Introduction to General Chemistry (4)

Prerequisite: Two years of high school algebra. (This course is a prerequisite to CHEM 111A for students who have not achieved a satisfactory score on the Chemistry Placement Examination.) Basic principles and concepts including atomic structure, nomenclature and chemical calculations with emphasis on problem solving. Does not count for General Education. Letter grade only (A-F). (Lecture 3 hrs., lab-problem session 3 hrs.) Course fee may be required.

105. Chemistry Explorations (1)

Prerequisites: A general education math class, which may be taken concurrently. Central concepts of chemistry, including states of matter, atomic structure, periodic properties, chemical compounds and reaction energy, and equilibrium, illustrated with a series of experiments. Intended for students in the Integrated Teacher Education Program (ITEP). (Laboratory 3 hours). Course fee may be required.

111A. General Chemistry (5)

(Recommended for students who intend to pursue careers in science or engineering.) Prerequisite: A passing score on the Chemistry Placement Examination or credit in CHEM 101 within the preceding year; MATH 112 or higher (may be taken concurrently). One year of high school chemistry is strongly recommended. The first semester of a two semester sequence (CHEM 111A and 111B). Introduction to the principles of chemistry including chemical bonding, solution properties and chemical equilibrium and kinetics. (Lecture 3 hrs., laboratory and problem session 6 hrs.) Course fee may be required. (CAN CHEM 2)

111B. General Chemistry (5)

Prerequisite: CHEM 111A with a grade of "C" or better. The second semester of a two-semester sequence (CHEM 111A and 111B). Continuation of the study of chemical principles with application to inorganic systems. Includes application of modern bonding theories to inorganic molecules and study of trends and reactivities of the elements and their compounds. Qualitative inorganic analysis and extensive solving of aqueous equilibrium problems are emphasized in laboratory and problem solving sessions. (Lecture 3 hrs., lab and problem solving sessions 6 hrs.) Course fee may be required. (CAN CHEM 4)

202. Survey of General and Organic Chemistry (3)

Prerequisites: High school chemistry or equivalent. Three years of high school mathematics including intermediate algebra (or MATH 10) or the equivalent. The first semester of a two-semester sequence (CHEM 202 and 302) covering general and organic chemistry and biochemistry. CHEM 202 deals with general chemistry and organic chemistry. Not open for credit to students with credit in CHEM 111A. (Lecture 3 hrs.)

251. Quantitative Analysis (4)

Prerequisites: CHEM 111B with a grade of "C" or better. It is strongly recommended that CHEM 251 be taken within one calendar year of CHEM 111B. Introduction to the techniques and theory of gravimetric and volumetric analysis, spectrophotometry, potentiometry and chromatography. (Lecture 2 hrs., laboratory 6 hrs.) Course fee may be required.

Upper Division

302. Survey of Biochemistry (3)

Prerequisites: CHEM 202 with a grade of "C" or better and completion of GE Foundation requirements (GE categories A1, A2, A3, and B2). The second semester of a two-semester sequence (CHEM 202, 302). Study of the chemistry, structures, metabolic reactions and functions of the major classes of biochemical compounds. Does not meet the requirements of medical or dental schools. (Lecture 2 hrs., laboratory 3 hrs.) Course fee may be required.

320A. Organic Chemistry (3)

Prerequisites: CHEM 111B with a grade of "C" or better. CHEM 251 is recommended. The first semester of a two-semester sequence (CHEM 320A and 320B). This sequence meets the requirements for medical and dental schools. Emphasis is upon the application of modern principles of structure, reactivity, methods of synthesis, physical properties and spectroscopy. (Lecture 3 hrs., discussion 1 hr.)

320B. Organic Chemistry (5)

Prerequisites: CHEM 320A with a grade of "C" or better. The second semester of a two-semester sequence (CHEM 320A and 320B). A continuation of the study of organic chemistry including the chemistry of compounds containing more than one functional group, bioorganic molecules and special topics. (Lecture 3 hrs., laboratory 6 hrs.) Course fee may be required.

327. Organic Chemistry (3)

Prerequisites: CHEM 111A with a grade of "C" or better; CHEM 111B is recommended. CHEM 202 may not substitute for CHEM 111A. Lecture course in the chemistry of the carbon compounds. Not applicable to a degree in chemistry. (Lecture 3 hrs.)

371A. Physical Chemistry (3) F

Prerequisite: CHEM 111B and 251 with a grade of "C" or better, MATH 224 (may be taken concurrently), PHYS 152. The first semester of a two-semester sequence (CHEM 371A and CHEM 371B). Principles and applications of classical thermodynamics. Introduction to statistical thermodynamics. (Lecture 3 hrs.)

371B. Physical Chemistry (3) S

Prerequisite: CHEM 371A with a grade of "C" or better. The second semester of a two-semester sequence (CHEM 371A and 371B) in physical chemistry. Introduction to quantum chemistry, spectroscopy and chemical kinetics. (Lecture 3 hrs.)

373. Physical and Inorganic Chemistry Laboratory (3) S

Prerequisites: CHEM 251, CHEM 371A,B or CHEM 377A,B (CHEM 371B or CHEM 377B may be taken concurrently), all with a grade of "C" or better. Introduction to basic techniques in inorganic synthesis and also physico-chemical experimental techniques with applications to the principles discussed in CHEM 371A,B and CHEM 377A,B. (Lecture 1 hr., laboratory 6 hrs.) Course fee may be required.

377A. Fundamentals of Physical Chemistry (3)

Prerequisites: CHEM 111B and 251 with a grade of "C" or better; MATH 123 (may be taken concurrently); PHYS 100B or 152. The first semester of a two-semester sequence. Principles of physical chemistry with emphasis on thermodynamics and chemical kinetics. Examples from biological and environmental sciences will be used to illustrate principles. (Lecture 3 hrs.)

377B. Fundamentals of Physical Chemistry (3)

Prerequisite: CHEM 377A or 371A, each with a grade of "C" or better. The second semester of a two-semester sequence. Principles of physical chemistry with emphasis on molecular structure and spectroscopy. (Lecture 3 hrs.)

*420. Advanced Organic Chemistry Laboratory (3)

Prerequisites: CHEM 251 and CHEM 320B both with a grade of "C" or better. The synthesis and characterization of organic compounds. Analysis of organic structures through the interpretation of spectral data. Emphasis on the use of high field NMR, mass spectrometry, IR, and UV. Applications of modern separation techniques. In addition to regularly scheduled lectures, students are expected during the semester to attend three hours of lecture on use of the chemical literature. Letter grade only (A-F). (Lecture 1 hr., laboratory 6 hrs.) Course fee may be required.

421./521. Physical Organic Chemistry (3) F

Prerequisites: CHEM 320B with a grade of "C" or better or pass the organic entrance exam; CHEM 371B or 377B (may be taken concurrently). (Undergraduates register in CHEM 421; graduates register in CHEM 521.) Theoretical interpretation of the chemical and physical properties of organic compounds including the following: mathematical derivations of rate equations from experimental results, calculations of reaction rate constants from experimental data, quantitative comparison of the reactivities of organic compounds, mathematical correlations of structure and properties. Practice in solving problems relating reaction mechanisms to the factors derived above. (Lecture 3 hrs.)

*431. Advanced Inorganic Chemistry (3) F

Prerequisites: CHEM 371B with a grade of "C" or better. Detailed quantitative study of chemical bonding in inorganic molecules with emphasis on molecular orbital theory. Extensive coverage of transition metal chemistry including coordination chemistry, ligand field theory, application of spectroscopy to structural analysis of inorganic molecules and a review of properties and reactivities of the elements and their compounds. (Lecture 3 hrs.)

*441A. Biological Chemistry (3)

Prerequisites: CHEM 320B with a grade of "C" or better; a biology or microbiology course is recommended. The first semester of a two-semester sequence (CHEM 441A and 441B) in biochemistry. A chemical and mathematical treatment of the energetics and kinetics of reactions in living systems, including the chemistry and metabolism of carbohydrates and the chemistry of proteins. (Lecture 3 hrs.)

*441B. Biological Chemistry (3)

Prerequisite: CHEM 441A with a grade of "C" or better. The second semester of a two-semester sequence (CHEM 441A and 441B) in biochemistry. Metabolism of lipids, proteins and nucleic acids and other advanced topics in metabolism. (Lecture 3 hrs.)

*443. Biological Chemistry Laboratory (4)

Prerequisites: CHEM 251 and 441B, both with a grade of "C" or better. Theory and practice of laboratory techniques used in biochemical research. (Lecture 1 hr., laboratory 9 hours.) Course fee may be required.

447. Clinical Chemistry (3)

Prerequisites: CHEM 251, 441A and 441B, all with grades of "C" or better (CHEM 441B may be taken concurrently). Methods of analysis and chemical properties of blood, urine, and other biological materials. (Lecture 1 hr., laboratory 6 hrs.) Course fee may be required.

448. Fundamentals of Biological Chemistry (3)

Prerequisites: CHEM 111A and 327, both with a grade of "C" or better. CHEM 201A or CHEM 202 may not substitute for CHEM 111A, and CHEM 201A-B or CHEM 202/302 may not substitute for CHEM 327. Major principles of biochemistry including metabolic processes, biological control and regulatory processes, nutrition and chemical energetics and kinetics of animals, plants and microorganisms. Emphasis on major concepts and problem solving. Not open to chemistry majors. (Lecture 3 hrs.)

449. Nutritional Biochemistry Laboratory (3)

Prerequisite: CHEM 448 with a grade of "C" or better. Analytical and biochemical analyses of foodstuffs and other compounds of biochemical interest. (Lecture 1 hr., laboratory 6 hrs.) Course fee may be required.

*451. Instrumental Methods of Analysis (4)

Prerequisites: CHEM 251 and 371A or 377A, all with a grade of "C" or better, or consent of instructor. Theory and application of instrumental methods to chemical problems. Techniques covered include the following: atomic and molecular absorption and emission, electroanalytical chemistry, techniques of separations, nuclear methods, and other modern methods of analysis. (Lecture 2 hrs., laboratory 6 hrs.) Letter grade only (A-F). Course fee may be required.

466H. Research Design and Methods – Honors (3)

Prerequisites: BIOL 211A,B, either BIOL 260 or CHEM 251, CHEM 320A,B, all with a grade of "C" or better, and completion of the GE Foundation. A rigorous introduction to the following: i) hypothesis testing, experimental design, and regression modeling of biological data; ii) methodological and technical procedures for experimentation; and iii) techniques for written and oral presentation of research results to prepare students for undergraduate research. Research paper and oral presentation required. Same course as BIOL 466H. Letter grade only (A-F). (Lecture 3 hours.)

495. Colloquium in Chemistry (1)

Prerequisites: One semester of organic chemistry. Presentation of reports by students on original research or current literature. May be repeated to a maximum of 3 units; only one unit may be counted toward the major requirement of the chemistry degree. An oral report is required.

496. Special Problems in Chemistry (1-3)

Prerequisite: Consent of instructor. Problems selected for considered and mature analysis. A written report will be required. May be repeated to a maximum of 6 units (Independent Study). Letter grade only (A-F).

498H. Senior Thesis – Honors (1-3)

Prerequisites: One unit of CHEM 496 and consent of instructor. Planning, preparation, and completion of a thesis based on a research project in chemistry or biochemistry. Letter grade only (A-F). Not available to graduate students.

499. Directed Reading (1)

Thorough survey of the chemical literature on some topic of current interest under the supervision of a faculty member. Preparation of a written report based on this reading. Not open to graduate students.

Graduate Level

521./421. Physical Organic Chemistry (3) F

Prerequisites: CHEM 320B with a grade of "C" or better or pass the organic entrance exam; CHEM 371B or 377B (may be taken concurrently). (Undergraduates register in CHEM 421; graduates register in CHEM 521.) Theoretical interpretation of the chemical and physical properties of organic compounds including the following: mathematical derivations of rate equations from experimental results, calculations of reaction rate constants from experimental data, quantitative comparison of the reactivities of organic compounds, mathematical correlations of structure and properties. Practice in solving problems relating reaction mechanisms to the factors derived above. Letter grade only (A-F). (Lecture 3 hrs)

522. Special Topics in Organic Chemistry (3)

Prerequisite: CHEM 421 or 521 or consent of instructor. Areas of current interest in organic chemistry. Normally two of the following topics are treated. May be repeated to a maximum of 6 units with different topics. Letter grade only (A-F). (Lecture 3 hrs.)

Natural Products

Structure, biological activity, biogenesis and synthesis of selected naturally occurring compounds.

Organic Synthesis

Modern synthetic reactions as demonstrated in recent syntheses of molecules of biological or theoretical interest.

Organophosphorus Chemistry

Nomenclature, synthesis and reactivity of phosphorus-containing organic compounds. Emphasis is placed upon mechanisms of reactions of such compounds. Some discussion of the biochemistry of organophosphorus compounds will be given.

Photochemistry

The effects of light absorption by organic compounds. Involves a study of the types and mechanisms of reactions, energy transfer, fluorescence and phosphorescence.

Kinetics and Mechanism

A survey of methods of elucidation of reaction mechanisms. Theory and application of kinetics, isotope effects, acidity functions. Catalysis and linear free energy relationships may be included as related to molecular rearrangements, hydrolyses, hydration reactions and intra-molecular catalysis.

Bioorganic Mechanisms

The application of mechanistic organic chemistry to the mechanism of action of biological compounds. Emphasis may center on drug action or enzyme catalysis.

Stereochemistry

Molecular configurations, conformations and stereochemical effects in the organic reactions of carbon and heteroatom compounds.

Reactive Intermediates

Organic chemistry of reactive intermediates such as carbenes, nitrenes and free radicals.

531. Advances in Inorganic Chemistry (3)

Prerequisite: CHEM 431 or consent of instructor. Current topics and advances in inorganic chemistry. May be repeated to a maximum of 6 units with different topics. Letter grade only (A-F). (Lecture 3 hrs.)

Metallo-organic Chemistry

Complexes of transition metals in low oxidation states, emphasizing structure of complexes and bonding, reaction types and homogeneous catalysis.

Physical Methods of Inorganic Chemistry

A brief survey of the basic theoretical principles of the quantum mechanics of bonding, followed by an intensive discussion of modern physical techniques. Application of most physical methods to selected inorganic compounds will be discussed.

Mechanisms of Inorganic Reactions

Inorganic reactions in aqueous solution, emphasizing the substitution mechanisms of octahedral complexes, types of electron-transfer reactions of complexes, application of Marcus-Hush theory and catalysis by transition metal complexes.

Bioinorganic Chemistry

The role of inorganic chemistry in biology, emphasizing the chemistry of dioxygen and related species, metalloproteins (including superoxide dismutase, catalase, peroxidase, and cytochrome P450), Vitamin B-12, and inorganic models of their activity.

542. Special Topics in Biochemistry (3)

Prerequisites: CHEM 441B or consent of instructor. A detailed intensive discussion of a limited aspect of biochemistry with reference to current literature. Course content will vary from year to year. May be repeated to a maximum of 6 units with consent of graduate advisor. Letter grade only (A-F). (Lecture 3 hrs.)

544. Physical Biochemistry (3)

Prerequisites: Either CHEM 371B or 377B, or consent of instructor and CHEM 441B. Physical chemical aspects of protein and nucleic acid chemistry and related analytical methods. Letter grade only (A-F). (Lecture 3 hrs.)

545. Enzymology (3)

Prerequisites: CHEM 371A or 377A and 441B, or consent of instructor. Detailed study of the mechanisms and kinetics of enzyme-catalyzed reactions and mechanisms of enzyme regulation. Letter grade only (A-F). (Lecture 3 hrs.)

547. Biochemistry of Nucleic Acids (3)

Prerequisites: CHEM 441A and 441B or consent of instructor. A detailed treatment of gene expression with emphasis on regulatory mechanisms. Analytical techniques for isolation, purification, and characterization of nucleic acids. Letter grade only (A-F). (Lecture 3 hrs.)

548. Cell Membranes (3)

Prerequisites: CHEM 441A, BIOL 370 and BIOL 340. An in-depth examination of modern membrane biochemistry geared toward the graduate student and qualified senior undergraduate. Topics may include membrane structure, phospholipid biosynthesis and transport, organelle biogenesis, membrane protein and phospholipid sorting, membrane transport, vesicular transport, membrane coat protein structure and function, and membrane-dependent signal transduction. Letter grade only (A-F). (Lecture 3 hrs.)

552. Special Topics in Analytical Chemistry (3)

Prerequisite: CHEM 451 or consent of instructor. Selected topics including electrochemical measurements, chromatographic techniques, spectroscopic techniques (molecular and atomic absorption and emission), radiochemical analysis and basic electronic components of instrumentation. Emphasis will be placed on an in-depth understanding of the chemical principles involved, along with the utility and limitations of each method. Other topics include trace analysis by electrochemical methods and instrumental analysis of water and air pollution control. May be repeated to a maximum of 6 units with different topics. Letter grade only (A-F). (Lecture 3 hrs.)

572. Advanced Physical Chemistry (3)

Prerequisite: CHEM 371B or consent of instructor. Special topics in physical chemistry. May be repeated to a maximum of 6 units with different topics. Letter grade only (A-F). (Lecture 3 hrs.)

Group Theory:

Group theory and its application in chemistry. Topics covered will include hybridization, molecular orbital theory, crystal and ligand field theories and molecular vibrations.

Spectroscopy and Molecular Structure:

The use of spectroscopic methods to elucidate molecular structure. Topics covered will include microwave, infrared, visible, ultraviolet, Raman, nuclear magnetic resonance, electron spin resonance, nuclear quadrupole and Mossbauer spectroscopy.

Dynamics of Chemical Reactions:

Review of phenomenological kinetics equations; methods of elucidating complex photochemical and thermal gas phase reaction mechanisms; theoretical approaches to physico-chemical reactions including the RRKM method and quantum mechanical scattering; applications of kinetics to the various fields of chemistry.

595A. Colloquium in Biochemistry (1)

595B. Colloquium in Organic Chemistry (1)

595C. Colloquium in Analytical, Physical and Inorganic Chemistry (1)

Prerequisite: Graduate standing or consent of instructor. Discussion of advances in chemistry as reported in recent literature. Designed to give experience in library use, organization and presentation and critical evaluation of the chemical literature. May be repeated to a maximum of 3 units (not more than a total of 3 units may be earned in any combination of CHEM 595 courses). Letter grade only (A-F). (Seminar 1 hr.)

660. Seminar in Chemistry (1)

Weekly meetings for presentation and discussion of advanced work in special fields including original research by faculty and graduate students. Credit/No Credit grading only. (Seminar 1 hr.) May be repeated to a maximum of 2 units.

695. Directed Reading (1)

Survey of the information in chemical literature on a current research topic, under the direction of a faculty member. Preparation of a written report based on this reading. Letter grade only (A-F).

697. Directed Research (1-3)

Prerequisite: Arrangement with instructor. Laboratory work supervised on an individual basis. A written report will be required. Letter grade only (A-F)

698. Research and Thesis (1-6)

Prerequisites: Advancement to candidacy and arrangement with instructor. Planning, preparation and completion of a thesis in chemistry or biochemistry.

Chicano and Latino Studies courses are designed to train students to work effectively in multicultural settings, to enhance their analytical and technological skills, and to provide them a profound understanding of the Chicano and Latino experiences in the United States. The department offers programs to serve the interests and goals of (1) those entering a variety of occupations including urban studies, government, journalism, social work, school administration, business, criminology, law, foreign service and other related areas; (2) teachers, counselors, administrators; (3) majors in other fields such as history, sociology, psychology, economics, literature, anthropology, who wish to include additional scope to their field of study.

Bachelor of Arts in Chicano and Latino Studies (code CHLSBA01) (120 units)

Requirements

Lower Division (6 units): Core Courses CHLS 100 or 101; and CHLS 105. Students will choose one course between CHLS 100 and 101. CHLS 105 is required.

Upper Division (33 units) Core Course (12 units required): CHLS 300, 310, 350, 498.

Upper Division (continued): 21 units of electives from Cultural Studies courses: CHLS 390I, 395, 420, 490, 499; and Social Inquiry courses: CHLS 319, 340, 352, 362, 415, 421, 470I, 490, 499.

Departmental Requirement: The language requirement may be met by one of the following options: 1) Two years of college Spanish; 2) Successful completion of SPAN 250 (Spanish for Spanish Speakers) or 3) A score of 4 or above on the high school advanced placement exam in Spanish language or literature.

Special Track

In addition to the general major in Chicano and Latino Studies, the department also offers a program for students who wish to complete a Special Track major in Chicano and Latino Studies. Within the Special Track, students may receive up to a maximum of 12 units of credit for upper division Chicano and Latino Studies related course work taken from other disciplines. Students wishing to pursue the Special Track major must develop an approved program of study in consultation with the Chicano and Latino Studies Department academic advisor.

The Special Track consists of 39 units total, 30 of which must be upper division, including the following:

Lower-division: CHLS 100 or 101 and 105.

Upper-division: CHLS 300, 310, 350, 498.

Special Track: A maximum of 12 units of upper division course work from related fields, selected with the approval of the Chicano and Latino Studies Department advisor.

Language Requirement: Two years of college Spanish. If student is proficient in Spanish, the two years' requirement may be met by successful completion of proficiency examination.

FOUR YEAR PLAN TO COMPLETE THE B.A. DEGREE in CHICANO LATINO STUDIES (CHLSBA01)

120 units required Department of Chicano and Latino Studies

Semester 1		Semester 2

*Students who have not met the language requirement for the major with an AP score of 4 or better, or with SPAN 250, must complete Spanish language courses through SPAN 201B (only two of these course may count for GE requirements (C2c and C3): SPAN 101B, 201 A, or 201B) SPAN 101A does not count for GE.

FAQ Concerning Road Maps for Completion of Undergraduate Degrees

For each undergraduate major, the on-line Catalog shows plans for scheduling all required courses to complete the degree in four, five, or six years.

While CSULB will make every effort to schedule classes at the times shown in the plans, we cannot guarantee that courses will be available in specific semesters. It is possible that shortage or budget or of personnel will make it impossible to offer as many classes as we would wish.

The plans are not substitutes for working with an advisor. You are strongly encouraged to see an advisor when planning your program each term.

I am a freshman. Do I have to choose now whether to follow the four, five, or six-year plan?

No. Most freshmen take 12-15 units. You need at least 12 units to receive full financial aid. With experience, you will be able to judge how heavy a load you find comfortable. This will depend on your outside obligations, such as a job, and on your personal circumstances. In theory, each unit requires three hours a week, including preparing for class, attending class, and completing assignments. Use these guidelines to budget your time and plan an appropriate schedule.

Must I take the courses in the semesters shown on the plan?

The plan shows one possible way of completing all requirements for the degree. Consult your advisor about whether it is essential to take a given course in the semester shown. There are some rules to keep in mind:

1) You can take the General Education Foundation courses (Composition, Oral Communication, Critical Thinking, Mathematics) in any semester in the first 36 units of baccalaureate-level course work completed at CSULB.

2) You cannot take upper division courses until you have completed at least 30 units. (Exceptions can be made for students who already have completed advanced study in the subject.) You cannot take General Education Capstone courses until you have completed at least 60 units.

3) For some majors it is essential to complete courses in the correct sequence. You cannot take a more advanced course until you have completed the prerequisite course(s).

4) You must complete all requirements for admission to impacted majors within the first 60 units.

I have been told that I must take one or more pre-baccalaureate courses. How can I plan my program?

Your advisor at SOAR can help you identify which courses must be postponed. You must still complete the minimum number of baccalaureate units required for the degree.

You may be able to catch up by taking additional courses in later semesters or by taking classes in summer or winter session, or you may choose to spend an additional semester completing the program. You cannot begin the sequence of required courses for some majors until you are ready for baccalaureate-level Mathematics. See your major advisor to develop a plan for scheduling the required courses.

I didn't complete the exact list of courses shown. Can I still graduate on time?

The answer depends on your major and on what courses you have completed. The plans are not rigid requirements; they are only intended to provide guidance in planning a program. There are many reasons for students to follow a different pattern, such as changing the major, choosing to take fewer classes in a given semester, choosing to complete a minor or a second major. See your advisor for help in planning a program that will work for you.

If I follow the plan, will I have all requirements for graduation completed?

The plans include the specific courses required for the major. For some majors, there are restrictions on the choice of major electives. It is important that you select General Education courses to meet the required distribution pattern. You may need to take an additional General Education course to complete the minimum number of units required for each category. This is likely to happen if you took three-unit courses in Category B, Physical Universe.

Minor in Chicano and Latino Studies (code CHLSUM01)

A prerequisite to taking this minor is a score of 4 or above on the high school advanced placement exam in Spanish language or literature or successful completion of two courses recommended by the Chicanos and Latino Studies Department Academic Advisor.

Requirements

Upper Division: a minimum of 24 units distributed as follows: 12 units of core requirements: CHLS 300, 310, 350, 498; 12 units selected from Cultural Studies courses: 390I, 395, 420, 490, 498, 499; and Social Inquiry courses: 300, 310, 319, 340, 350, 352, 362, 415, 421, 470I, 490, 498, 499.

Graduate Certificate in Chicano and Latino Studies (code CHLSCT01)

The Chicano and Latino Studies Department has established a program which offers students interested in this field the opportunity to pursue courses leading to a certificate in Chicano and Latino Studies. Courses used to meet this certificate requirement may be counted also, where applicable, toward the General Education requirements and the degree or credential requirements of the cooperating departments.

Requirements

1. A bachelor's degree with a major in another discipline;
2. A minimum of 24 units distributed as follows: 12 units of core requirements: CHLS 300, 310, 350, 498; 12 units selected from Cultural Studies courses: 390I, 395, 420, 490, 498, 499; and Social Inquiry courses: 300, 310, 319, 340, 350, 352, 362, 415, 421, 470I, 490, 498, 499.

Courses (CHLS)

Lower Division

1. Bilingual Communication Skills-English (3)

Basic fundamentals of English communication for students of bilingual background. Credit/no credit only. Counts as part of student's course load but does not carry graduation credit.

100. Introduction to Chicano and Latino Studies (3)

Prerequisite: One course from GE category A2. This is an introductory-level course designed with two goals in mind. The first is to acquaint students with the most important social, political, economic and historic aspects of the Chicano/Latino experience and how they are reflected through various and diverse forms of cultural expression in the United States. The second goal is to discuss these aspects of Latino life in relationship to their historic relevance in contemporary and future Latino culture and society within a humanities based framework. Letter grade only (A-F).

101. Introduction to Chicano Life (3)

Prerequisite or Corequisite: One course from GE category A1. This course is designed to introduce students to the study of Chicano culture and society in the Southwest U.S. from 1540 to the 1980. The course will emphasize three topics: 1) The cultural formation and transformation of Chicano communities; 2) The relationship between culture and identity; 3) The dynamic role of women in shaping Chicano culture. Letter grade only (A-F).

104. Bilingual Communication Skills-English (3)

Prerequisite: A recorded total score of 151 or above on the English Placement Test, or credit in CHLS 1 (or its equivalent) and consent of the instructor. Advanced fundamentals of English communication for students of bilingual background. Letter grade only (A-F).

105. Identity and Assimilation in Chicano Life (3)

Prerequisite or Corequisite: One course from GE category A2. An interdisciplinary introduction to the study of cultural and historical issues that have influenced formation of Chicano communities from pre-Columbian times to the present. Evolution of Chicano identity examined through survey of Mexican-American regional cultures and development of societal divisions based on gender, race, and class categories. Letter grade only (A-F).

150. Introduction to Chicano Literary Studies (3)

Prerequisite or Corequisite: One course from GE category A1. Introductory survey course in Chicano and Latino literature covering traditional and contemporary literary styles and forms from selected translated Chicano and Latino readings. Letter grade only (A-F). Not open to students with credit in CHLS 205.

215. U.S. Diversity and the Ethnic Experience (3)

Prerequisites: The course is open only to Integrated Teacher Education Program students. This course is a survey of four major ethnic groups (American Indians, African American, Latino American, and Asian American) in American society from the colonial era to the present. Special attention is given to the formation and transformation of each ethnic group and their individual and collective roles in the development of the United States. Same course as AIS 215, ASAM 215, B/ST 215. The departments take turns offering the course in the Fall semester. Letter grade only (A-F).

230. Chicano Community Organization (3)

Analysis of Chicano community groups; emphasis on development of community organizational techniques.

Upper Division

General Education Category A must be completed prior to taking any upper division course except upper division language courses where students meet formal prerequisites and/or competency equivalent for advanced study.

300. Chicano History (3)

Chicanos in the settlement and development of the Southwest and in contemporary U.S. society; Chicano experience as a U.S. minority group; emerging civil rights movement of La Raza. Letter grade only (A-F). Same course as HIST 370.

310. Chicano Thought (3)

Study of the ideas, philosophies and events affecting Chicano life; identification and examination of the Chicano world view, of a Chicano reality.

319. The Ethnic Experience in the U.S. (3)

An examination of the dynamics of the development of our multicultural society, emphasizing study of the four distinct ethnic strands of American society (Asian American, Black American, Mexican American, and American Indian) and their role in the maintenance of cultural diversity in the United States. Same course as AIS 319, ASAM 319, B/ST 319, W/ST 319. (Lecture/Discussion.)

335I. Asian and Latino Immigration since World War II (3)

Prerequisites: Completion of GE Foundation requirements, one or more Explorations courses, and upper-division standing. Analyzes the causes of a dramatic post-World War II shift in immigration from Europe to Asia and Latin America, immigrants' settlement and adaptation patterns, and the Asian and Latino communities' social, racial, political and economic impact on American society. Same course as ASAM 335I. (Lecture and discussion, 3 hours)

340. Latino Education in the U.S. (3)

A theoretical and empirical examination of Latino educational issues in the United States. Special emphasis is placed on disentangling the effects of ethnicity, gender, class and immigrant status on educational attainment and achievement. A critical understanding of how historical, social, political, and economic forces impact on Latinos/as with regard to their experience in the educational system. Letter grade only (A-F).

350. The Latino Population in the United States (3)

Survey of the most recent socio-economic information on "Hispanics," issues of immigration and settlement patterns, employment and income, family, language and culture will be examined. Particular attention will be paid to the changing points at which racism has intersected with factors of class and gender. This is a comparative course designed to highlight heterogeneity of the larger Latino aggregate population. Letter grade only (A-F). Same course as SOC 340.

352. Central American and Caribbean Peoples in California (3)

Survey of the socioeconomic conditions and cultural life of the Central American and Spanish-speaking Caribbean communities of California: Salvadorans, Guatemalans, Puerto Ricans, Cubans, etc. Not all groups will necessarily be dealt with each time the course is offered. Similarities with and differences from the Mexican American community will be examined. Same course as SOC 341.

362. Chicanos and the Law (3)

Analysis of the relationship of the Chicano to the U.S. legal and judicial system. Topics include traditional sociological and criminological theories of Chicano criminality, the Pachuco image, and Chicano experiences with the police and correctional institutions. Letter grade only (A-F).

390I. The "Hispanic" Southwest: Historical and Literary Images (3)

Prerequisites: Completion of GE Foundation requirements, one or more Explorations courses, and upper-division standing. Critical, interdisciplinary examination of the portrayals of Latinos in selected historical and literary texts by Euro-American authors.

395. Latino Cultural Images in Film (3)

Critical, interdisciplinary examination of selected Latino cultural traits and values as these are depicted in motion pictures, documentaries, and other types of film.

403. Asian American and Chicano/Latino Cinema (3)

Prerequisites: Completion of the Foundation courses, at least one Explorations course, and upper division status. This course is a team-taught class that explores the connections between Asian American and Chicano/Latino film. It is designed to examine the politics of representation in mainstream releases and independent films and videos by artists of color. Special attention will be paid to themes of collectivity, sexuality, racialized gender, race, and class formations, and social transformations. Emphases will be given to grounding issues presented in films within historical, literary, and cultural studies frameworks. Same course as ASAM 403.

415. Latina Women in the United States (3)

Prerequisite: Junior standing or consent of instructor. This course will examine the cultural, political, economic, and sexual forces that mold Latina women. The first section of the course will focus on cultural stereotypes and responses to these stereotypes by Latina women scholars. The second section of the course will focus on Latina class differences and the politics of race. This will provide an overview of the contemporary public policy issues affecting Latinas and the broader Latino community. The contradictions that are identified in this course segment will be juxtaposed against selected African American perspectives to identify areas of symmetry as well as areas of divergence in the domain of political strategizing for political reform and Latina empowerment. The last section of the course will address issues of gender identity and sexuality that challenge, undermine, and strengthen the position of Latina women in the greater society. Same course as W/ST 320.

420. Chicano Heritage in the Arts of Mexico and the Southwest (3)

Historical and philosophical analysis of Indian Mestizo and Chicano plastic arts, music and dances with a view to understanding the Chicano heritage.

421. Street Gangs in Comparative Perspective (3)

This course addresses the contemporary issue of street gangs within the Chicano/Latino community. It analyzes the relationships across the United States of the Chicano gangs with African American gangs, the South East Asian gangs and the White (PUNKERS, Heavy Metalists and Skinheads)-- street gangs. Structural forces of the urban societies, such as proletariat socialization, patriarchy traditions and problems revolving around gender identity are examined. Through theory and a historical analysis, the basis for addressing this contemporary subject is set. This course is a comparative study of youth behavior using both a public health model and a criminal justice model. Letter grade only (A-F).

450I. Consequences of the Encounter: The Americas, Europe, and Africa (3)

Prerequisites: Completion of the GE Foundation requirement, completion of one or more Exploration courses and upper-division status. The study of the consequences of the encounter between Africa, Europe, and the Americas from the voyages of Columbus to contemporary times. Through several disciplines: Art, Literature, and the Social Sciences the course examines the complex results of the encounter in respect to the obliteration, suppression and creation of culture among the peoples of both the Old and New Worlds. Same course as RGR 450I.

470I. Latinas/Latinos: Health Status and Health Care Access (3)

Prerequisites: Completion of the GE Foundation, one or more Explorations courses, and upper-division standing. This course is a critical interdisciplinary examination of the health status and health care access of Latinos in the United States. The primary objective of the course is to provide an overview of the policies, epidemiologic, and cultural factors that influence the etiologies of disease within Latino subpopulations. This cross disciplinary approach will also be used to analyze the health care problems faced by Latino subpopulations that constrain efficient management of services and equitable delivery of health care. Letter grade only (A-F). Same course as HCA 470I.

490. Special Topics in Chicano Studies (1-3)

Prerequisite: Consent of instructor. Topics of current interest in Chicano and Latino Studies selected for intensive development. May be repeated to a maximum of 6 units. Topics will be announced in the *Schedule of Classes*.

D. Academic Conferences

498. Senior Colloquium (3)

Prerequisite: Consent of the instructor. Analysis of issues and problems in Chicano and Latino studies. Designed as a seminar in research and methodology. The material discussed will center about a general theme selected by the instructor. May be repeated to a maximum of 6 units with different topics (no more than 3 units may be used to satisfy the requirements for the majors). Letter grade only (A-F).

499. Directed Studies (1-3)

Prerequisite: Consent of instructor. Preparation of research reports on selected topics relating to the Mexican-American. May be repeated to a maximum of 6 units.

The College of Liberal Arts provides courses in the Humanities and Social Sciences for all university students, as well as for majors in its disciplines. The College is also responsible for much of the General Education required of all students and provides professional training in Journalism. Through the Liberal Arts, students acquire a fundamental understanding of social and individual behavior and of cultures and belief systems in the past and present. Communication, verbal and written, in English and other languages, and across cultures, is a fundamental emphasis throughout the curriculum. Liberal Arts disciplines also emphasize the acquisition and analysis of information and its use to understand and to help resolve complex social problems. The College of Liberal Arts is the center of the university's commitment to developing greater knowledge and understanding of international and multicultural issues in the contemporary world.

Degree programs offered

Bachelor of Arts:

Anthropology, American Studies, Asian Studies, Asian American Studies, Black Studies, Business Economics Chicano and Latino Studies, Chinese Studies, Classics, Comparative Literature, Economics, English, Environmental Science and Policy, Geography, French, French Studies, German, History, Human Development, International Studies, Italian Studies, Japanese, Journalism, Philosophy, Political Science, Psychology, Religious Studies, Sociology, Spanish, Speech Communication, and Women's Studies.

Master of Arts:

Anthropology, Asian Studies, Economics, English, French, Geography, German, History, Linguistics, Philosophy, Political Science, Psychology (with options in general research and in industrial and organizational psychology), Religious Studies, Spanish, and Speech Communication.

Master of Fine Arts in English

Master of Science in Psychology

Certificate Programs:

American Indian Studies, Asian Studies, Asian American Studies, Black Studies, Japanese, Latin American Studies, Legal Studies in the Liberal Arts, Medieval and Renaissance Studies, Russian-East European Studies, Teaching English as a Second Language, Technical and Professional Writing, and Urban Studies

Minor Programs:

American Indian Studies, Anthropology, Asian Studies, Asian American Studies, Black Studies, Chicano and Latino Studies, Comparative Literature, Classical Studies, English (Literature, Language and Composition, Creative Writing, Teaching, or Special Option), French, Geography, German, Greek, History, International Economics, Italian, Jewish Studies, Latin, Latin American Studies, Linguistics, Medieval and Renaissance Studies, Middle Eastern Studies, Philosophy, Political Science, Public Administration, Psychology, Religious Studies, Russian, Sociology, Spanish, Speech Communication, and Women's Studies.

Language Courses:

Arabic, Chinese (Mandarin), Cambodian (Khmer), French, German, Greek, Hebrew, Italian, Japanese, Latin, Russian, Spanish, and Swahili.

Special Facilities

The College operates special facilities including archeology, geography, language, psychology, writing, and general computer laboratories.

Student Activities

Most of the departments in the College of Liberal Arts have either a student association or honor organization which provides students with a program of activities. Students should contact the department of their major to inquire about the kinds of organizations available to them or contact the College Coordinator for Student Life and Development, Anna Nazarian (985-4181).

The College and Associated Students promote the College Student Council with its representation from each department acting as liaison between the College administration, faculty, and members of the College's student body. The Student Council provides a forum for the development of student leadership skills.

Internships

The College of Liberal Arts offers internships with on- and off-campus cooperating organizations designed to provide students with practice in the field under supervision. Many individual departments also offer discipline-based internships for advanced students.

Credential Programs

Single subject credential programs are offered in English, French, German, Spanish, Japanese, and Social Science. Students who plan to teach these subjects in the secondary schools are strongly advised to consult the Single Subject Advisor as early as possible in their studies, so that they fulfill subject matter preparation requirements while completing an undergraduate major.

Credential Advisors

Japanese - Dr. Hsin-Sheng C. Kao (985-7530)
Social Science - Dr. Arlene Lazorowitz (985-4423)
English - Linda Morrow (985-4231)
English - Dr. Joe Potts (985-7929)
French, German, Spanish - Dr. Griselda Sasayama (985-4319)

Courses (C/LA)

Lower Division

190. Special Topics (1-3)

Topics of special interest in the liberal arts. Topics will be announced in the *Schedule of Classes* each semester. May be repeated to a maximum of 3 units.

195. Introduction to the Learning Community-Transition to College Success (1)

Prerequisite: Acceptance into the Learning Alliance Program. This course will provide members of the Learning Alliance with an introduction to the learning community in the College of Liberal Arts. Will address scholarly and academic research skill development, literacy in basic computer skills including e-mail and the Internet, methods to integrate the two disciplines featured in the paired courses, and how to develop a personal academic and life plan. Students will be able to initiate their community volunteer and service learning requirement for the program. Letter grade only (A-F).

250. Elementary Statistics (4)

Prerequisites: Knowledge of mathematical procedures usually covered in elementary high school algebra. Introduction to descriptive and inferential statistics and their applications in social and behavioral science research; performance of statistical exercises by interactive computer. Emphasis upon knowledge of which statistical tests to use and how to interpret their results. Not open to students with credit in ANTH 302, MATH 180 or PSY 110. (Discussion 3 hours, laboratory 2 hours.) Same course as HDEV 250.

Upper Division

General Education Category A must be completed prior to taking any upper division course except upper division language courses where students meet formal prerequisites and/or competency equivalent for advanced study.

305. British Life and Culture (3)

This series of lectures with follow-up discussion and written responses is a required part of the London Semester Program. The lectures are designed to offer in-depth information on a wide range of social, artistic, and intellectual issues relevant to contemporary England. Although the course is specifically geared to students participating in the London Semester Program, the materials covered are closely related to many topics covered in classes offered during the rest of the students' work on campus.

314I. Introduction to Contemporary Europe (3)

Prerequisites: Completion of GE Foundation requirements, one or more Explorations courses, and upper-division standing. An interdisciplinary introduction to contemporary European cultures and related issues through a combination of travel and study. Students will be introduced to some principles and methods useful for analyzing cultures and their own interactions with them.

315I. Contemporary European Society (3)

Prerequisites: Completion of GE Foundation requirements, one or more Explorations courses, and upper-division standing. An interdisciplinary approach to understanding cultural and political developments in contemporary European societies. Although the study of history serves as the foundation of the course, the perspectives and methodologies of several other social science disciplines are an important component of the course.

471. History/Social Science Content and Standards for Elementary Classrooms (2)

Prerequisites: Limited to Liberal Studies majors in the Integrated Teacher Education Program (ITEP), who have completed all Area IV Core requirements with a "C" or better grade. Corequisites: EDEL 471 and EDEL 473A. This course will provide a review, analysis and assessment of the content of the California State Social Science Curriculum for grades K through 8. The content of the California History-Social Science Framework will be examined in depth and aligned with the teaching methods and pedagogy taught concurrently in EDEL 471 and EDEL 473A. This is a capstone course and students will be asked to explicitly demonstrate the breadth and depth of their subject-matter content mastery in the social sciences pursuant to the California State qualifications for a Multiple Subject Teaching Credential. Assessment and inquiry will focus upon student literacy in the social sciences, integrating geographical perspectives with historical analysis, and facilitating student depth of knowledge and global perspective in California, Early American, and Pre-Modern World history. Letter grade only (A-F).

485. Oral History Methods (1)

Through a series of workshops and through field experience, skills in oral history will be developed which will enable students to use oral history either for their own personal use in family history or for class projects. Same course as HIST 402.

490. Special Topics (1-3)

Topics of special interest in the liberal arts for intensive study. Topics will be announced in the *Schedule of Classes* each semester. May be repeated to a maximum of 9 units with different topics.

491. Special Topics (2)

Topics of special interest in the liberal arts for intensive study. Topics will be announced in the *Schedule of Classes* each semester.

495. Social Science for Teachers (3)

Prerequisites: Students must have completed all coursework in the Social Science Subject Matter Program. A capstone course for students in the Social Science Subject Matter Program, to be offered just prior to student teaching. Examination of issues in social science education in accord with topics highlighted in the California History/Social Science Framework. A grade of "B" or better is required for advancement to student teaching. Letter grade only (A-F).

498. Directed Studies in Oral History (1-6)

Permission of faculty required. Directed study on a research topic using the methodology of oral history. May be repeated to a maximum of 6 units. Same course as HIST 498O.

In a world where science plays an increasingly important role and where an understanding of the sciences is essential for a participating and informed citizenry, the College of Natural Sciences and Mathematics provides quality educational opportunities in the life, physical sciences, and mathematics. Students are provided a broad-based, fundamental education in the natural sciences and mathematics, and are challenged to think critically, analytically, and creatively. Alumni of the College demonstrate that science and mathematics graduates are well-prepared to enter graduate and professional schools or to assume responsible positions in industry or government. Employment opportunities for students with backgrounds in science and mathematics are traditionally excellent.

The College is dedicated to the concept that a university has a special responsibility toward academic excellence and the advancement of knowledge. The faculty and staff of the Departments of Biological Sciences (including the former departments of Anatomy and Physiology, Biology, and Microbiology), Chemistry/Biochemistry, Geological Sciences, Mathematics and Statistics, Physics/Astronomy, and Science Education are committed to providing an outstanding educational experience for all students.

The College takes its responsibilities in teacher preparation in the sciences and mathematics very seriously. It has recently embarked on several new projects that will provide a stronger, more rigorous, and more engaging set of teacher preparation programs at CSULB. With funding from the National Science Foundation, NASA, and the Knight Foundation, and in collaboration with Colleges of Education and Liberal Arts, Long Beach Unified School District, and Long Beach City College, science and mathematics faculty are working to enrich and align teacher preparation coursework and internship opportunities.

Degrees Offered

Five departments within the College of Natural Sciences and Mathematics offer both the Bachelor of Science and Master of Science degrees. The Department of Science Education offers the Master of Science degree. The Departments of Chemistry/Biochemistry, and Physics/Astronomy also offer the Bachelor of Arts degree. Each degree has unique requirements and students should refer to the particular department's section of this *Catalog* to determine specific requirements. Ideally, all students participate in the Science Safari to Success (for first time freshmen) or EONS (Enrollment and Orientation in Natural Sciences and Mathematics for transfer students) Programs offered each June-July (for those entering in August) and January (for those entering in January). A department advisor will be available to assist in developing an appropriate academic plan consistent with career goals. During the semester, students may obtain academic advising by contacting the appropriate adviser(s) in the department offering the chosen degree program.

Student Research Opportunities

Faculty in the College involve more than 200 students annually, both undergraduate and graduate, in a wide variety of research activities. Many of these students are supported by research grants, especially during the summer months. Each year many of these students present the results of their research at scientific conferences. It is not unusual for a student to co-author an article appearing in a major scientific journal.

The faculty's commitment to these students is based on the knowledge that involvement in scientific research makes the study of science more real and provides strong motivation for the student to pursue a career in science. Since the anticipated need for scientists far exceeds the enrollment of science majors, we are committed to meeting the short-fall by making the study of science at CSULB as "real world" as possible.

Student Access to Science and Mathematics (SAS) Center and Programs Offered

A student center (FO5-109) adjacent to the Dean's office is dedicated to promoting success for students who pursue majors in the College and those who take courses in its departments. The Center also facilitates several externally funded programs including The National Institutes of Health (MARC, MSD, and Bridges to the Baccalaureate), and National Science Foundation (CRUI, AMP, LBESTEP). The Center provides space for studying, tutoring, mentoring, computer access, and meeting sites for student-centered activities. The Center also serves as the resource center for health profession advising, graduate school opportunities, summer research opportunities and fellowships.

SAS coordinates and assures effective integration of all of our mentoring, enrichment, and outreach programs — including those based on undergraduate research. SAS is dependent on external funding for its success.

There are a host of activities and programs that strive to involve students and promote their success in science and mathematics. Several federally funded programs focus on underrepresented students and address the diversity of our campus. In addition to fostering involvement of students in science and mathematics, they feature an ethnic identity that provides a unique encouragement for 250 of our science majors.

MARC/MSD Programs. The College hosts both programs funded by The National Institutes of General Medical Sciences: Minority Access to Research Careers (MARC) and Minority Student Development (MSD). Both programs have the goal of increasing the number and quality of students from historically underrepresented ethnic groups who pursue careers in scientific research. The 30 students supported by these programs carry out state-of-the-art biomedical research projects in conjunction with a member of the faculty. Virtually all of these students continue study toward advanced degrees in science. The MARC program is an honors program (GPA 3.0) for upper division students, while the MSD program can support students as early as the freshman year and can also support graduate students. As a result of their research activities, most students present papers at scientific conferences and often co-author publications appearing in leading scientific journals. In addition to their research involvement, MARC/

MSD students are active in various outreach and mentoring activities.

Beckman Scholars Program. In 2003, CSULB was selected as one of 13 institutions nationwide to be the recipient of these prestigious Beckman Scholars Awards. The goal of the Beckman Scholars Program at CSULB is to advance the education, research training, and personal development of students who have the potential to achieve distinction in their academic field, as well as become outstanding leaders in their careers and professions. Support is provided for four students working toward bachelor's degrees in chemistry, biology, or physics in the form of student stipends, laboratory supplies and funds for travel to appropriate scientific meetings. Depending on the laboratory chosen for the research experience, students will receive rigorous training by faculty members in the use and applications of a variety of different techniques involved in nucleic acid research, protein biochemistry, biophysics, etc. The program will also provide counseling and career opportunities for entrance into higher degree programs in the sciences.

Bridges to the Baccalaureate Program. This program is funded by the National Institutes of General Medical Sciences and its goal is to provide historically underrepresented community college students with research opportunities in the biomedical sciences and to facilitate their seamless transition into baccalaureate granting institutions.

G-DEP Program. The Geoscience Diversity Enhancement Program (G-DEP) is an innovative, collaborative partnership between CSULB Departments of Geological Sciences, Geography, and Anthropology, and several community colleges and local high schools to improve the research and educational experiences of underrepresented students in geoscience (geologic, physical geographic, archaeologic and environmental sciences disciplines). The goals of G-DEP are to (1) increase the number of underrepresented students who have a broad educational and research experience in the geosciences; (2) enhance the quantity and quality of Geoscience research and teaching by faculty members from the University, community colleges and high schools; (3) increase the awareness by community college and high school students of the field of geoscience, and related research careers and educational requirements; (4) create a seamless transition of underrepresented students from community colleges to study geosciences at the undergraduate level; and (5) increase the number of geoscience majors who are retained in their disciplines.

AMP Program. The College hosts the National Science Foundation's Alliance for Minority Participation (AMP) program. Its goal is to improve the mathematics and science preparation for historically underrepresented students majoring in the sciences, mathematics, and engineering.

UPP. The University Preparatory Program (UPP) provides an enriched curriculum in mathematics and sciences for underrepresented high school students and introduces, presents, and facilitates their entrance into the university.

Science Enrichment and Peer Mentor Programs. Peer mentoring provides our college students opportunities for tutoring to strengthen their academic and communication skills. This program is designed to provide first time freshmen in the College of Natural Sciences and Mathematics with the

guidance and personal support that are vitally important to their success at CSULB. This program allows students to enroll in classes appropriate for their major and background, provides them with enriched learning experiences, and peer role models during their first academic year. The Science Enrichment Program begins the week prior to the start of the fall semester. In order to be part of the program, students must be declared science or math majors and be enrolled in the presemester University 100H course.

HHMI. The Honors in Biological Sciences program is sponsored by a grant from the Howard Hughes Medical Institute. Open to students with majors or career goals in the life sciences or related fields, it features an honors curriculum including courses in bioinformatics and research design as well as undergraduate research leading to a senior honors thesis. Participating students will be eligible for financial support for their research experience as well as for travel to scientific conferences.

Health Professions Advising Office (HPAO). The Health Professions Advising Office (HPAO) provides a wide range of advising and support services designed to meet the needs of CSULB students as they navigate through the often-complex process of preparation and application to professional school. The HPAO offers individual counseling, academic planning, application assistance, and many other resources designed specialty for students interested in medicine, dentistry, veterinary, pharmacy, optometry, podiatry, chiropractic, physician assistant, physical therapy, and graduate nursing.

The Electron Microscopy Facility

The study of the natural sciences requires observation of the macroscopic, microscopic, and sub-microscopic character of our universe. With this in mind, the College has established a modern Electron Microscope (EM) Facility which is used by several undergraduate courses in addition to undergraduate and graduate research projects. The pride of the EM Facility is the Joel-1200EXII transmission electron microscope (TEM), obtained through a National Science Foundation instrumentation grant. The Joel-1200EXII has a resolution of 0.14 nm and a magnification range of from 50 to 1,000,000 times. The EM Facility also houses additional TEMs and an AMR 1000 scanning electron microscope. The latter will be upgraded to include analytical capabilities.

Student Organizations

The College of Natural Sciences and Mathematics Student Council sponsors annual events including: a fall open house and spring picnic, Science Career Days, and the Nobel Laureate Speaker series. Six departmental associations plan various social and academic-related programs that offer peer support, as well as opportunities for students and faculty to interact outside of the classroom.

Four other student-led groups offer activities for students who are planning careers in one of the health professions (medicine, dentistry, etc.). The Organization of PreProfessional Students (T.O.P.P.S.) and Association of Pre-Dental Students (A.P.D.S.) have speaker series with representatives from professional schools; the group also holds social functions and provides a peer advising network. Chicanos/Latinos for Community Medicine (CCM) sponsors community outreach activities, an annual workshop on interviewing techniques, and an annual conference on applying to medical/professional schools.

Health Professions Advising Office

Please see Health Professions Advising Office under *Student Access to Science and Mathematics (SAS) and Programs Offered* for assistance and services available for preparation and application to health profession schools.

Southern California Marine Institute (SCMI)

The Institute operates a number of research vessels, and provides the mechanism whereby students from CSU Ocean Studies Consortium campuses at Dominguez Hills, Fullerton, Long Beach, Los Angeles, Northridge, Pomona, San Diego, and San Marcos, as well as Occidental College and the University of Southern California can share courses and degree programs. In addition, Institute staff conduct research and facilitate the research of CSU faculty. The major focus is on harbors and coastal areas, with emphasis on environmental issues.

California Desert Studies Consortium

CSULB participates in the California Desert Studies Consortium, which has a Desert Studies Center in the heart of the Mojave Desert at Soda Springs near the town of Baker. The surrounding area consists of typical Mojave Desert with dry lakes, sand dunes, and mountain ranges; it is the gateway to Death Valley and the Kelso Dunes. The Center has excellent facilities for teaching field classes and for research. California State Universities at Dominguez Hills, Fullerton, Long Beach, Los Angeles, Northridge, Pomona, and San Bernardino are the Consortia members.

Courses (NSCI)

Lower Division

200. Introduction to Computer Methods in Science (2)

Prerequisites: Major in the College of Natural Sciences and Mathematics; and MATH 119A or MATH 122 or consent of instructor. Introduction to computer methods used in collecting, analyzing, and presenting scientific data. Introduces word processing, spreadsheet analysis, and elementary programming. Credit/No Credit grading only. Course fee may be required. (Lecture 1 hr., discussion 1 hr.)

Upper Division

308. Community and Careers in the Health Professions (3) S

Prerequisites: Completion of Foundation Courses, one or more Explorations Courses, upper division status, and 3 units of Natural Sciences coursework. This course is an upper division, service-learning, capstone course designed to develop students' abilities to critically think and analyze issues concerning health care in communities and the roles of professionals involved in the delivery of that care. Topics concerning biomedical ethics are also included. Students will be required to provide service in a community agency providing health care. In class, students will hear guest speakers, participate in discussions, analyze and reflect upon their volunteer experiences and how these experiences relate to in-class topics. This course will enhance oral and written communication skills, better define career goals, provide understanding of community needs and foster greater civic responsibility. Letter grade only (A-F). (Lecture 2 hrs., laboratory 3 hrs.)

309I. Women in Science (3) F, S

Prerequisites: Completion of the G.E. Foundation, six-units of general education science courses, and upper-division standing, and permission of instructor. The purpose of this course is to increase awareness of the accomplishments of women in natural science, engineering, and mathematics in their socio-historical context; and the obstacles that have precluded easy access to careers for wom-

en in these areas. Specific topics include historical roles of women in science, contributions of celebrated women scientists, and women scientists who made significant contributions but were ignored or devalued by their scientific peers. Other key issues include stereotypes and images of women in science: cultural, societal, and institutional obstacles to the entry and success of women in science; and ways of overcoming these obstacles. Disciplines included in this course are science, history, and sociology. Letter grade only (A-F). Same course as W/ST 3091. (Lecture 3 hrs.)

333. Natural Science Field Studies (2)

Prerequisites: All with a grade of "C" or better: GEOL 106 or 102 and either 104 or 105; CHEM 100 or 105 or 111A; PHSC 112; BIOL 200; and upper-division standing. The purpose of this course is to provide students with field experience in observation, interpretation and recognition of natural processes and features in the varied natural environments of southern California. The course will be team-taught by a geologist and a biologist. In-class lectures and discussions will provide students with pertinent theoretical and practical knowledge prior to each field trip. Topics of discussion and study will focus on the geological and biological aspects of selected field sites, and on the underlying physical and chemical relationships involved at each site. Specific topics include the following: origin and recognition of faults; earthquake generation and hazards; geologic history of California; effect of mountain-building on climate, nearshore ocean processes, biology of nearshore, marine, estuarine and wetlands habitats; coastal, desert and mountain ecosystems; influence of rock/sediment on plant growth and diversity; geology and biology of lakes; and ground water and surface water flow, storage and contamination. Letter grade only (A-F). (Lecture 1 hr., laboratory and required field trips, 3 hrs.)

375I. Science and Society (3)

Prerequisites: Completion of GE Foundation requirements, one or more Explorations courses, and upper-division standing; 3 units of general education natural science courses. The purpose of this course is to learn about the nature of science by studying major discoveries in the life and physical sciences that currently have an impact on our lives. In addition to the basic science that contributed to these technological advances, the historical, political, philosophical, and economic contexts of these events will be examined. Included will be discussions of what is science, how is it done, and is it beneficial or destructive? Traditional views of science will be challenged and the social/cultural aspects will be explored. Recent discoveries and the underlying basic science also will be critically evaluated. A special focus will be the demands placed on society by rapidly advancing technology. Letter grade only (A-F). (Lecture 3 hrs)

490. Special Topics in the Natural Sciences (1-3)

Prerequisites: At least upper division standing in the College of Natural Sciences and Mathematics and consent of instructor. Faculty and student discussions and analysis of a current topic in the natural sciences. Letter grade only (A-F). (Lecture 1-3 hrs.) May be repeated to a maximum of 6 units with different topics.

491. Special Topics Laboratory in Natural Science (1-2)

Prerequisites: Senior standing in the College of Natural Sciences and Mathematics and consent of instructor. Topics from selected areas of the natural sciences. Course content will vary from section to section. May be repeated to a maximum of 2 units toward any single degree. Letter grade only (A-F). (Laboratory 3-6 hrs.)

492. Internships In Natural Science (3)

Prerequisites: Major in the College of Natural Sciences and Mathematics, completion of 9 units of upper division science coursework, a 2.5 GPA overall or 2.75 GPA in the student's major, and consent of the instructor prior to registration. Students who qualify will be placed in a major or career-related assignment in private industry or at a public agency. Students may be placed in either a volunteer or paid work assignment. Teacher aide positions may be used for students interested in pursuing a career in science education in K-12 schools. Learning assignments will be arranged through the Career Development Center and the instructor. A final written report is required. Class attendance and internships to be arranged by the instructor. A minimum of 120 hours of field experience is required. Credit/No credit grading only.

496. Investigations in Natural Sciences and Mathematics (1-3)

Prerequisites: Consent of instructor. Supervised study of current topics in the natural sciences or mathematics by a faculty member in the College of Natural Sciences and Mathematics. Letter grade only (A-F).

The Communicative Disorders Department provides specialized course work for students planning careers in speech-language pathology or audiology. Departmental majors may complete work leading to bachelor of science, bachelor of arts and/or master of arts degrees, as well as Certificates of Clinical Competence in either audiology or speech-language pathology from the American Speech-Language-Hearing Association and the requirements for licensure by the State of California.

Students seeking special education credentials may obtain specific credentials while completing the Master's degree. Students in allied health fields and linguistic sciences will find courses to supplement their regular majors.

The department maintains a language, speech and hearing clinic to serve as a clinical and research laboratory on campus for both graduate and undergraduate students. Field placements are available in the many nearby hospitals, rehabilitation agencies and nonprofit language/speech/hearing clinics.

Students desiring information should contact the department office for referral to one of the faculty advisors: Undergraduate Advisor, Graduate Advisor, Student Teacher Coordinator, and Clinic Director.

The Department of Communicative Disorders offers graduate study leading to the Master of Arts degree in communicative disorders with options in audiology and speech-language pathology. This coursework meets requirements for certification by the American Speech and Hearing Association (American Speech-Language-Hearing Association, Council on Academic Accreditation, 10801 Rockville Pike, Rockville, MD 20852, phone: 301-897-5700), licensing by the State of California, and appropriate educational credentials.

Bachelor of Arts in Communicative Disorders (code CD__BA01) (120 units)

Students desiring a bachelor's degree in Communicative Disorders must complete a course in language and culture/society, (e.g., ANTH 412I or 413), in addition to completing the following required courses:

Lower Division: C D 260, 261, 271; PSY 110 or equivalent.

Upper Division: C D 329, 330, 373, 431, 432, 440, 456, 466, 476, 481A, 481B, 483, 489.

Bachelor of Science in Audiology (code CD__BS01) (122 units)

The Bachelor of Science degree in Audiology is designed primarily for students who intend to pursue careers in audiology by seeking a Master's Degree in audiology, a professional Doctorate in Audiology (Au.D.), or a research doctor in audiology (Ph.D.). The coursework will provide students with a broad-based undergraduate education with emphasis in the physical and behavioral sciences.

Students completing a Bachelor of Science degree in Audiology must take the following courses:

- A. *Communicative Disorders* (39 units) CD 261, 271, 280, 281, CD 329, 330, 373, 431/531, 432/532, 440, 481A/581A, 481B/581B, and 3 units of 499
- B. *Biological Sciences* (10-12 units chosen from the following) either BIOL 205 or 207, BIOL 204, 208, 211A, 211B, MICR 200
- C. *Chemistry* (6-10 units chosen from the following) CHEM 202 and 302, or CHEM 111A and 111B
- D. *English* (3 units chosen from the following) ENGL 101, 102, or 317
- E. *Mathematics* (6-8 units chosen from the following) MATH 119A and 119B, or 122 and 123
- F. *Statistics* (4 units) PSY 110

- G. *Physics* (8-10 units chosen from the following) PHYS 100A or 101A, 100B or 101B, 151 or 151P, 152 or 152P
- H. *Psychology/Human Development* (15 units chosen from the following) PSY 100 and four courses from the following: PSY 141, 200, 331, 315, 341, 342, 361, 365, 370, 438/538, GERN 400I, H/SC 427
- I. *Culture and Communication* (3 units chosen from the following) ANTH 413/LING 413, ANTH 412I, or COMM 330
- J. *Economics* (3 units) ECON 300

Credentials for Service in Public Education

Students who wish to complete credentials for service as language, speech and hearing specialists or educational audiologists must be admitted to the graduate program in speech pathology or audiology. The following credentials are offered:

Clinical-Rehabilitative Services Language, Speech and Hearing Specialist Credential (code 901)

Candidates must:

1. Complete the master's degree in speech-language pathology.
2. Complete EDP 350 and 564; C D 483, 489, 686A (Field Experience(s) in order to complete 100 contact hours as a Language, Speech and Hearing Specialist trainee in the school setting).

Clinical-Rehabilitative Services Audiologist Credential (code 903)

Candidates must:

1. Complete the master's degree in audiology.
2. Complete EDP 350, C D 280, C D 281, 669G, and 680 (internship to be completed in the schools in order to complete 100 contact hours as an Audiologist trainee in a public school environment.)

Clinical-Rehabilitative Services Language, Speech and Hearing Specialist Credential with Special Class Authorization to Teach Language Disordered Children (code 910)

Candidates must:

1. Complete the master's degree in speech pathology;
2. Complete ED P 350 and ED P 564; C D 483, 489; EDEL 550, 686A; EDCI 560, 570, .

Master of Arts in Communicative Disorders (code CD__MA01)

Admission to the Graduate Program

Enrollment in 500/600 level courses in communicative disorders is restricted to students who have been accepted to the graduate program of the department as unconditionally classified. Students wishing to be admitted must complete the following procedures:

1. Students must meet the criteria for acceptance by the University as a graduate student;
2. Every student (new or continuing) must apply to the Office of Admissions and Records to obtain admission to the University with graduate standing;
3. Every student then must apply to the Department of Communicative Disorders for admission to the graduate program using the department application form. This form must be

filed with the graduate advisor by March 1 for admission in the fall semester. The following supportive materials must be filed with the department admission application:

- a. Change of objective form available at department office (continuing CSULB students only);
 - b. Transcripts of all undergraduate and graduate work. (These transcripts are in addition to those required by the Office of Admissions and Records.) These transcripts should reflect the following minimum criteria:
 - (1) a GPA of 3.0 or better in the last 60 units of coursework; and
 - (2) confirmation of acceptable GPA obtained during the final senior semester.
 - c. Three letters of recommendation from academic faculty in Speech-Language Pathology, Linguistics, etc. Our standard recommendation forms can be obtained from the Graduate Advisor and must be completed.
 - d. Results of the Graduate Record Examination (GRE). Students must make arrangements to take this test in the semester prior to filing for admission to the department graduate program. This is to insure that the student's test results will be available by the filing date since test scores are used as one criterion for acceptance into the graduate program. Students can make arrangements to take the GRE at the Testing Office in SS/AD Rm 216. The Testing Office will supply students with further information and provide them with a description and sample items.
4. Any deficiencies will be determined by the department graduate committee after consultation with the student and the student's faculty advisor and study of transcript records.
 5. Student will have completed one of the two prerequisites listed in the next section.

Prerequisites

1. A bachelor's degree from an accredited institution with a major in communicative disorders (speech pathology and/or audiology); or
2. A bachelor's degree from an accredited institution. The applicant must have at least 33 units of course work by the first semester of admission to the graduate program in speech science, speech pathology and/or audiology including courses in (a) anatomy and physiology, (b) phonetics, and (c) introduction to communicative disorders. If student has not completed sufficient units or courses to meet this requirement, he/she may enroll in the University as a conditionally classified graduate student to complete the required undergraduate courses prior to applying to the Graduate Program in Communicative Disorders.

Although the student may apply to our Graduate Program with a minimum of 33 units in Speech-Language-Hearing, all courses required for the B.A. in Communicative Disorders at CSULB (approximately 58 units), or equivalent courses, must be completed before the M.A. in Communicative Disorders will be awarded.

Advancement to Candidacy

In order to be advanced to candidacy for a Master's degree, a student must meet the following criteria:

1. enrollment in the semester or summer session in which advancement takes place;
2. selection of Speech-Language Pathology or Audiology option;
3. satisfactory completion of C D 696 and three additional units;

4. satisfactory completion of the CSULB Writing Proficiency Examination. The Writing Proficiency Examination must be passed before the student is advanced to candidacy. (After paying a fee at the Business Office [SS/AD Room 148], take your receipt to the Testing Office [SS/AD Room 216] and sign up for the examination. This examination is administered several times per year. A detailed description of the test is available at the Testing Office);
5. maintenance of a GPA of at least 3.0 in (a) all graduate work completed in Communicative Disorders, (b) all graduate work completed at CSULB, and (c) all graduate work transferred to meet graduation requirements;
6. filing of the student Program for the Master of Arts Degree in Communicative Disorders after completion of items 2-5;
7. the Department's standard written program of graduate courses approved by the student's department advisor, the department graduate advisor, the department chairperson, and the College of Health and Human Services Associate Dean.

Requirements

Students must elect one of two available options: audiology or speech-language pathology.

For speech-language pathology, 41 units of course work are required: C D 696, 662, 663, 664, 665, 666, 669A, 669C, 669D, 669F, 669G, 669J, 669L, C D 670 or C D 686A, and C D 698 or 695 (Comprehensive Examinations) plus a three-unit elective. Within the context of the C D 669L clinical course, the student will complete a minimum of 25 hours of clinical experience under appropriate supervision with a client determined to be of a language or dialect different from that of the student clinician. C D 483 and 489 and/or C D 460/560, or equivalent content, are prerequisite to C D 669L.

For audiology 40 units of course work are required: C D 696, 530, 574, 669A or 669C, 669G, 673, 6 units of 674 (3-3), 675, 6 units (2-2-2) of 679, 680, and either 698 or 695 (Comprehensive Examinations) and 3 units of electives.

Regulations governing the preparation and eligibility for the administration of comprehensive examinations are available in the Department Office. Departmental regulations concerning preparation of these are also available in the office.

Courses (C D)

Lower Division

60. Special Topics (1)

Prerequisite: Consent of instructor. Speech, language and hearing therapy to students enrolled in the University. May be repeated to a maximum of 2 units.

260. Introduction to Communicative Disorders (3)

Features of human communication dysfunction. Survey of major communicative disorders. Role of speech-language pathologist and audiologist in medical, educational, and private practice settings.

261. Anatomy and Physiology of the Speech and Hearing Mechanism (3)

Anatomical, physiological and neurological components of the speech and hearing mechanism. Designed for students planning to enter the clinical program in communicative disorders.

271. Phonetics (3)

Phonetic basis of speech sounds and the various factors which influence pronunciation. Consideration is given to linguistic variations, regional dialects and standards. (Lecture 2 hours, laboratory 2 hours.)

280. Sign Language (3)

Sign Language and Non-Vocal Communication Systems. Origin, development and principles of sign language. Practice with American Manual Alphabet, American Sign Language and Signing Exact English to provide basic conversational skills; other sign systems and modes of non-vocal communication are discussed.

281. Intermediate Sign Language (3)

Prerequisite: C D 280. Continuation of C D 280 (Sign Language and Non-Vocal Systems) with emphasis on development of receptive/ expressive skills and building of vocabulary. Introduction into use of sign language in educational and therapy settings. Discussion of philosophical and cultural aspects of the deaf community. Required for school audiology credential. Letter grade only (A-F).

Upper Division

329. Introduction to Language Acquisition (3)

Introduction to the study of the acquisition of first and second languages. Linguistic perspectives on the development of phonological, syntactic, semantic, and pragmatic aspects of language. The influence of developmental stages and social and cultural factors on the individual. Letter grade only (A-F). Same course as LING 329.

330. Speech and Hearing Science (3)

This course examines human communication in its neurological, psychological, anatomical, physiological, acoustic and social aspects. Through readings, discussions, films and experiments the student is expected to become more appreciative, more aware, more analytical and more tolerant of the communication behavior of himself and other speaker/hearers.

373. Audiology I (3)

Introduction to audiology; acoustics, anatomy and physiology of the ear, pure-tone audiometry/masking, speech audiometry/ masking, principles of taking a case history, and report writing.

431./531. Pediatric Audiology (3)

Prerequisite: C D 373. Pathologies of hearing loss (e.g., syndromes), High-Risk Register/case history, speech and voice characteristics of the hearing-impaired, behavioral observation audiometry, visual reinforcement audiometry, play audiometry, speech audiometry, auditory evoked response, acoustic immittance, counseling parents, hearing screening in the schools, hearing aids/special listening devices. (Lecture 2 hours, laboratory 3 hours.)

432./532. Audiology II (3)

Prerequisites: C D 373. Anatomy/pathology/ evaluation of the (1) outer and middle ears, (2) inner ear, (3) central auditory system, and (4) functional hearing loss, taking case history, and report writing.

440. Aural Rehabilitation for the Hearing Impaired (3)

Prerequisites: C D 373 and C D 431 or 432. Acoustic features of speech, visual features of speech, hearing impairment and counseling, vibrotactile communication, total communication and the deaf community, speech reading, the geriatric population, assistive listening devices, cochlear implants, learning and hearing impairment, assessment tools, hearing aid evaluation and case history, amplification/hearing aids in the classroom, and classroom acoustics/noise.

456. Speech Pathology I: Disorders of Phonology (3)

Prerequisites: CD 261, 271, 329. Etiology, assessment, and treatment for disorders of phonology.

460./560. Language Assessment of the Limited English Proficient Child (3)

Prerequisites: CD 329 or equivalent, or consent of instructor. Provides an understanding of the non-discriminatory assessment process for the Limited English Proficient child referred for a language assessment. (Lecture-Discussion.) Letter grade only (A-F).

466./566. Speech Pathology II: Fluency Disorders (3)

Prerequisite: CD 261, 271, 330. Etiology, assessment, and therapy for disturbances in the fluency of speech with emphasis on psychological, physiological, and linguistic variables correlated to disfluent behaviors.

476./576. Speech Pathology III: Disorders of Voice/Oro-facial Mechanism (3)

Prerequisites: C D 261, 271, 330. The processes of phonation and resonance and their application to etiology, diagnosis and therapy of functional and organic voice disorders, such as those arising from laryngeal pathology, vocal abuse, neurological impairment, auditory impairment and oro-facial abnormalities.

481A./581A. Speech Pathology IV: Disorders of Language (3)

Prerequisites: CD 271, 329, 330. An analysis of the components of language and how each is involved with language disorders in children. Provides for the understanding and recognition of variables for the assessment and clinical management of such children.

481B./581B. Speech Pathology IV: Disorders of Language Neuropathologies (3)

Prerequisite: CD 271, 329, 330. Neurophysiological and neurolinguistic basis for language and speech disorders associated with central nervous system pathologies. Provides for the recognition and understanding of variables for the assessment and clinical management of such disorders.

483. Assessment of Monolingual and Bilingual Clients (3)

Prerequisites: CD 261, 271, 329, 330 and either ANTH 170 or a course in language and culture/society. Principles underlying assessment procedures in speech language disorders for both monolingual and bilingual clients. Focus is on the cultural and linguistic variables affecting standardized and non-standardized assessment procedures. (Lecture 2 hours, laboratory 3 hours.)

489. Management of Monolingual and Bilingual Clients (3)

Prerequisites: CD 483. Pre- or corequisites: At least 4 of the following: CD 456, 466, 476, 481A, 481B. Principles underlying management procedures in speech and language disorders for monolingual, bilingual, and/or bicultural clients. Focus is on the relationship of assessment to management, formulation of objectives, task analysis, data collection, clinical techniques and materials, and transfer and maintenance programs (including parent training). 25 hours of clinic observation and participation will be distributed equitably between campus clinic, schools, and hospital/rehabilitation settings. (Lecture 2 hours, laboratory 3 hours.)

491. Proctoring in Communicative Disorders (2-3)

(Open only to students who have achieved the grade of "A" in the course in which they are serving as proctor.) Advanced students shall engage in peer teaching and examination scoring in specific Communicative Disorders undergraduate courses under the specific direction of the course instructor. May be repeated to a maximum of 6 units.

499. Directed Studies in Communicative Disorders (1-3)

Prerequisite: Consent of instructor. Independent study under supervision of a faculty member. May be repeated to a maximum of 6 units. Not acceptable for graduate credit toward the master's degree.

Graduate Level

530. Audiological Instrumentation (3)

Prerequisite: Consent of instructor. Acoustics/ decibel, psychoacoustics, calibration of pure-tone and speech audiometers, sound field calibration, industrial audiology and noise measurement. (Lecture 1 hour, laboratory 6 hrs.) Letter grade only (A-F).

531./431. Pediatric Audiology (3)

Prerequisite: C D 373. Pathologies of hearing loss (e.g., syndromes), High-Risk Register/case history, speech and voice characteristics of the hearing-impaired, behavioral observation audiometry, visual reinforcement audiometry, play audiometry, speech audiometry, auditory evoked response, acoustic immittance, counseling parents, hearing screening in the schools, hearing aids/special listening devices. (Lecture 2 hours, laboratory 3 hours.) Letter grade only (A-F).

532./432. Audiology II (3)

Prerequisites: C D 373. Anatomy/pathology/ evaluation of the (1) outer and middle ears, (2) inner ear, (3) central auditory system, and (4) functional hearing loss, taking case history, and report writing. Letter grade only (A-F).

560./460. Language Assessment of the Limited English Proficient Child (3)

Prerequisites: CD 329 or equivalent, or consent of instructor. Provides an understanding of the non-discriminatory assessment process for the Limited English Proficient child referred for a language assessment. (Lecture-Discussion.) Letter grade only (A-F).

566./466. Speech Pathology II: Fluency Disorders (3)

Prerequisites: CD 261, 271, 330. Etiology, assessment, and therapy for disturbances in the fluency of speech with emphasis on psychological, physiological, and linguistic variables correlated to disfluent behaviors. Letter grade only (A-F).

574. Hearing Aids (3)

Prerequisite: Consent of instructor. Electro-acoustic characteristics, hearing aid evaluation in children and adults, case history, probe tube measurements, earmolds, binaural hearing aids, CROS and its modifications, signal processing and control, programmable hearing aids, digital hearing aids, batteries, assistive listening devices, hearing aid orientation and counseling, cochlear implants, classroom amplification and acoustics, hearing aid dispensing.v

576./476. Speech Pathology III: Voice/Oro-Facial Mechanism (3)

Prerequisites: C D 261, 271, 330. The processes of phonation and resonance and their application to etiology, diagnosis and therapy of functional and organic voice disorders, such as those arising from laryngeal pathology, vocal abuse, neurological impairment, auditory impairment and oro-facial abnormalities. Letter grade only (A-F).

581A./481A. Speech Pathology IV: Disorders of Language (3)

Prerequisites: C D 271, 329, 330. An analysis of the components of language and how each is involved with language disorders in children. Provides for the understanding and recognition of variables for the assessment and clinical management of such children. Letter grade only (A-F).

581B./481B. Speech Pathology IV: Disorders of Language Neuropathologies (3)

Prerequisites: CD 271, 329, 330. Neurophysiological and neurolinguistic basis for language and speech disorders associated with central nervous system pathologies. Provides for the recognition and understanding of variables for the assessment and clinical management of such disorders. Letter grade only (A-F).

590. Advanced Topics and Current Issues in Communicative Disorders (1-3)

Selected topics from the most recent developments and issues in speech-language pathology and audiology. Course content will vary with each offering. May be repeated to maximum of 3 units with different topics. Topics will be announced in the *Schedule of Classes*.

662. Seminar in Language Disorders in Children (3)

Prerequisite: C D 481A, 696. The components of language, cognitive and perceptual abilities and communication are examined in children with normal and impaired language development. Major approaches to language intervention are discussed. Letter grade only (A-F).

663. Seminar in Disorders of Phonology (3)

Prerequisites or corequisite: CD 456. Information in the description, assessment and treatment of phonological disorders. Survey of current literature and practices. Practice in conducting procedures. Letter grade only (A-F).

664. Seminar in Disorders of Voice and the Oro-facial Mechanism (3)

Prerequisites: C D 476, 696. Selected problems in voice disorders through an investigation of the literature and clinical research. Letter grade only (A-F).

665. Seminar in Language Disorders in Adults (3)

Prerequisites: C D 481B, 696. Provides an understanding of neuropathological substrates of language disorders in adults resulting from brain damage. Provides for the recognition and assessment of the syndromology and clinical aspects of adult language disorders relative to current research. Letter grade only (A-F).

666. Seminar in Speech Motor and Swallowing Disorders (3)

Prerequisites: CD 466/566, 696. Historical and current research and its effect upon the assessment and management of speech motor and swallowing disorders. Letter grade only (A-F).

669A. Clinical Practice in Phonological Disorders (2)

Prerequisites: C D 489; pre- or co-requisite: C D 663 and consent of instructor. Student conducts assessment of phonological disorders and management of therapy, under supervision, with clients in the university speech and hearing clinic. Students handle all aspects of clinical program including initial interviews, parent counseling, and testing. Letter grade only (A-F).

669C. Clinical Practice With Language Delayed/Disordered Children (2)

Prerequisites: C D 483, 489; pre- or co-requisite: C D 662 and consent of instructor. Students provide assessment and management of preschool and school-age children with identified delays/disorders. Under supervision, the practicum includes standardized and non-standardized assessment, parent interviews and conferences, development and implementation of a management program and report writing. Letter grade only (A-F).

669D. Clinical Practice with Voice and Oro-facial Mechanism Disorders (2)

Prerequisites: C D 489; pre- or co-requisite: C D 664 and consent of instructor. Student conducts therapy sessions under supervision for persons with functional and/or organic voice disorders. Practicum includes initial interviews, diagnostics, therapy program planning, counseling and report writing. Letter grade only (A-F).

669F. Clinical Practice with Fluency Disorders (2)

Prerequisites: C D 489; pre- or co-requisite: C D 666 and consent of instructor. Assessment, planning, and management in a supervised clinical experience with persons who have fluency disorders. Letter grade only (A-F).

669G. Clinical Practice in Audiology (2)

Prerequisites: C D 431, 432, 440, and consent of the instructor. Student will conduct individual and group therapy with hearing impaired clients, as well as audiological evaluation of hearing impaired persons. Letter grade only (A-F).

669H. Clinical Practice-Special Programs (2)

Prerequisites: At least one of the C D 669A through J courses. Specialized practice placement to obtain experience with speech, language, and hearing disorders. May be repeated to a maximum of 4 units. Letter grade only (A-F).

669J. Clinical Practice with Language Disordered Adults (2)

Prerequisites: C D 489; pre- or co-requisite: C D 665 and consent of instructor. Student conducts clinical management sessions, under supervision, for adults with neurological language disorders. Practicum includes initial interviews, assessment, management program planning, counseling and report writing, and application of research findings to the clinical process. Letter grade only (A-F).

669L. Clinical Practice with Linguistically Different Clients (2) F, S

Prerequisites: 1) Completion of all disorder-specific graduate seminars; 2) completion of a minimum of 3 core clinics (CD 669 A-J); 3) CD 483 and CD 489, or equivalent as approved by the instructor, and/or CD 560; 4) and consent of instructor. Practicum includes assessment and management of speech and language disorders in clients whose native language is determined to be different from that of the student clinician. Under supervision, students choose, train, and direct a bilingual interpreter with whose assistance the student clinician provides clinical services in the client's native language. (A minimum of 25 clinical clock hours is required). Letter grade only (A-F).

670. Internship in Speech and Language Pathology (5)

Prerequisites: C D 669A or C,D,F,G, and J with a GPA of 3.0. Advanced clinical supervised practice with speech and language disordered persons in either a hospital, rehabilitation agency or speech and language center. Letter grade only (A-F).

673. Assessment of Outer, Middle, and Inner Ears (3)

Prerequisite: Consent of instructor. Advanced masking concepts, anatomy/physiology/pathology of the outer-middle-inner ears, immittance testing, calibration of immittance meters, functional hearing loss. Letter grade only (A-F).

674. Seminar in Audiology: Current Topics in Hearing and Hearing Aid Evaluation (3)

Prerequisite: Consent of instructor. Emphasis will be placed on critically analyzing recent articles in (1) hearing aid evaluation for children and adults, (2) evaluating special populations (the elderly, difficult to test, school, and/or industrial), and (3) current topics in audiology. This course will allow students to obtain an in-depth knowledge in areas of interest, and will allow the instructor to share areas of expertise. May be repeated to a maximum of 6 units. Letter grade only (A-F).

675. Assessment of Central Auditory Nervous and Vestibular Systems (3)

Prerequisite: Consent of instructor. Anatomy/ physiology/pathology of the 8th cranial nerve, vestibular system, brainstem, and central auditory system; auditory evoked potentials, calibration of auditory evoked systems, tone decay, Bekesy, SISI, ABLB, electro-nystagmography, functional hearing loss. Letter grade only (A-F).

679. Practicum in Audiology (2-10)

Prerequisites: C D 431, 432, 440, or consent of instructor. Student conducts evaluation and rehabilitative sessions under supervision with persons with more complex hearing disorders. Student handles all aspects of the audiology program including evaluation, consultation, program planning and execution. May be repeated to a maximum of 10 units. Letter grade only (A-F).

680. Internship in Audiology (5)

Prerequisites: CD 669A or B or C, 679 and 669G, or consent of the instructor. Advanced clinical practice in audiology with hearing impaired persons in a community facility. Letter grade only (A-F).

686A. Advanced Field Studies with Communication Handicapped (5)

Prerequisites: Passing of CBEST, completion of C D 662, 664, 665, 666, and all but one of the following: 669A, 669C, 669D, 669F, 669G, 669J. Enrollment by application to the Communicative Disorders Department only. Assignments to one or two settings with a commitment of 3 or 5 days a week depending on credential objective. Inservice meetings with University Coordinator to be arranged. Clinical Rehabilitative Services, Language Speech and Hearing Specialist students are assigned to complete a practicum in an itinerant speech and language setting for the equivalent of one semester earning 5 units of field study. Credit/No Credit grading only. (Fieldwork)

695. Directed Readings (1-3)

Prerequisite: Consent of instructor. Readings in communication sciences/disorders. Required of all candidates for the master's degree not electing the thesis option. (Under special circumstances, may be repeated to a maximum of 6 units.) Letter grade only (A-F).

696. Research Methods: Applied and Basic (3)

Prerequisite: PSY 110 or equivalent or consent of instructor. This course is taken the first semester of graduate study. This course focuses on the application of the scientific method in the experimental and clinical settings. Scientific reasoning applied to the clinical and research process is stressed through examination of group and single-subject designs. Strategies and procedures for the control and manipulation of independent variables to effectuate change are explored. Evaluation of the components of research articles and their application to the clinical and research processes are introduced into class readings and discussions. Methods for the organization and analysis of clinical and research data are presented. (Lecture 3 hours.) Letter grade only (A-F).

697. Directed Research (1-3)

Pre- or Corequisite: C D 696 and consent of instructor. Independent research under supervision of a faculty member. Letter grade only (A-F).

698. Thesis (1-4)

Prerequisites: Advancement to candidacy for master's degree. Preparation, completion and submission of an acceptable thesis in partial fulfillment of the requirements for the master's degree.

Students desiring information about the communication studies program at CSULB should contact the department undergraduate advisor or the graduate advisor.

Located within the College of Liberal Arts, the Department of Communication Studies provides students with a solid liberal arts education in communication arts and sciences with specialized training in communication skills and practices at the baccalaureate and graduate levels. The Department of Communication Studies maintains a tradition of liberal education which traces the world's heritage of humanistic tradition in its multicultural diversity. The communication studies curriculum focuses on issues of ethics, creative thought, historical and scientific inquiry, critical thinking, understanding of communication phenomena, aesthetic expression, and the development of excellent human communication skills. To this end, the Department of Communication Studies provides two major services to the University community. First, through specialized curricula, the Department stresses inquiry, analysis, and critical evaluation to students who seek to apply a comprehensive background of communication theory and practice in business, industry, professional fields, or education. Second, through its general education and service offerings, the department provides a variety of courses stressing critical thinking, and oral and written communication designed to give all students experiences in the traditions of the liberal arts and to prepare them for responsible citizenship in a pluralistic society.

The various degree options in the Department of Communication Studies are intended to provide students with the opportunity to emphasize an area of communication studies which will best suit their personal and career goals. Each student is required to consult with the department undergraduate or graduate advisor as appropriate for advisement. Student advising is available during the Fall and Spring semesters only.

NOTE: Lower division 100 and 200 level classes taken through California Community Colleges satisfy lower division CSULB Communication Studies requirements.

Bachelor of Arts in Speech Communication

The Department of Communication Studies offers three undergraduate degree programs in Communication arts and sciences: The Bachelor of Arts Degree in Speech Communication, the Option in Interpersonal and Organizational Communication, and the Option in Rhetorical Studies.

Speech Communication majors will not be permitted to take any class in the major on a credit/non-credit basis. Speech Communication majors will not be permitted to drop a class in the major after the third week of classes without compelling justification or unless they present acceptable evidence of a change of work schedule that causes a conflict between their work hours and their class schedule, or unless they are totally withdrawing from the University.

Six of the lower division units may be applied to meet General Education requirements in oral communication and critical thinking.

Option in General Speech (code COMMB A01) (120 units)

The General Speech option, as the title implies, is concerned with all the dimensions found in the communication field. It requires course work in both the rhetorical and behavioral dimensions of the field and then permits the student to elect additional work in communication theory, rhetoric and public address.

Requirements

This major consists of 48 units of which 39 are upper division.

1. Nine lower division units including COMM 110, 131, and three lower division units from COMM 130, 132, 171, or 220.
2. A core consisting of 18 units drawn from COMM 300, 301, 306, 307, 309, and 330.
3. Six units in performance courses drawn from COMM 331, 333, 334, 335, 338, 344, 352, 355, 358.
4. Nine units in theory courses drawn from COMM 400, 410, 411, 412, 430, 433, 436, 437, 439, 441, 449, 490.
5. Six units in special studies drawn from COMM 337, 414, 420, 421, 432, 434, 442I, 450, 452, 490.

Only courses in which adequate ("C" or above) grades have been earned may be applied to satisfy upper division requirements in the major. Classes taken in which less than adequate grades are received must be repeated until an adequate grade is achieved.

The faculty of the Department of Communication Studies recommend that students pursue a minor, certificate program, second language proficiency, and/or a single-subjects teaching credential in addition to the major.

Option in Interpersonal and Organizational Communication (code COMMB A03) (120 units)

The Interpersonal and Organizational Communication option is designed for students who wish to prepare themselves for careers in public and private organizations requiring well-developed communication skills and a knowledge of interpersonal and organizational behavior. Students choosing this option will study the theoretical and applied aspects of interpersonal and organizational communication as they function in complex organizations. They will also develop a wide range of communication skills useful in organizational environments.

Requirements

This major consists of 48 units of which 36 are upper division.

1. Twelve lower division units including COMM 110, 130, 220, and three lower division units from COMM 131, 132, or 171.
2. A core consisting of 24 units drawn from COMM 300, 301, 306, 307, 309, 330, 410, and 420.
3. Six units in performance/special studies courses drawn from COMM 331, 333, 334, 335, 338, 355, 414, 421, 432, 434, 439, 441I, 442I, 450, 452, 490, 492A or 492B or 495.
4. Six units in theory courses drawn from COMM 334, 337, 400, 411, 412, 430, 433, 449, 490.

Only courses in which adequate ("C" or above) grades have been earned may be applied to satisfy upper division requirements in the major. Classes taken in which less than adequate grades are received must be repeated until an adequate grade is achieved.

The faculty of the Department of Communication Studies recommend that students pursue a minor, certificate program, second language proficiency, and/or a single-subjects teaching credential in addition to the major.

Option in Rhetorical Studies (code COMMBAA02) (120 units)

The Rhetorical Studies option is designed for students who wish to approach the study of human communication from a cultural or historical-critical perspective. In this option, students will give particular attention to the historical development of rhetoric, the study of persuasion, popular and media culture, and political and public affairs.

Requirements

This major consists of 48 units of which 39 are upper division.

1. Nine lower division units including COMM 130, 131, and three lower division units from COMM 132, 171, or JOUR 110.
2. A core consisting of 18 units drawn from COMM 300, 301, 306, 307, 309, and 330.
3. Six units in performance courses drawn from COMM 331, 333, 335, 336, 337, 352.
4. Nine units in theory courses drawn from COMM 433, 436, 437, 439, 441, 449, 490.
5. Six units in special studies drawn from COMM 411, 412, 421, 430, 432, 442, 492A or 492B or 495.

Only courses in which adequate ("C" or above) grades have been earned may be applied to satisfy upper division requirements in the major. Classes taken in which less than adequate grades are received must be repeated until an adequate grade is achieved.

FAQ Concerning Road Maps for Completion of Undergraduate Degrees

For each undergraduate major, the on-line Catalog shows plans for scheduling all required courses to complete the degree in four, five, or six years.

While CSULB will make every effort to schedule classes at the times shown in the plans, we cannot guarantee that courses will be available in specific semesters. It is possible that shortage or budget or of personnel will make it impossible to offer as many classes as we would wish.

The plans are not substitutes for working with an advisor. You are strongly encouraged to see an advisor when planning your program each term.

I am a freshman. Do I have to choose now whether to follow the four, five, or six-year plan?

No. Most freshmen take 12-15 units. You need at least 12 units to receive full financial aid. With experience, you will be able to judge how heavy a load you find comfortable. This will depend on your outside obligations, such as a job, and on your personal circumstances. In theory, each unit requires three hours a week, including preparing for class, attending class, and completing assignments. Use these guidelines to budget your time and plan an appropriate schedule.

Must I take the courses in the semesters shown on the plan?

The plan shows one possible way of completing all requirements for the degree. Consult your advisor about whether it is essential to take a given course in the semester shown. There are some rules to keep in mind:

- 1) You can take the General Education Foundation courses (Composition, Oral Communication, Critical Thinking, Mathematics) in any semester in the first 36 units of baccalaureate-level course work completed at CSULB.
- 2) You cannot take upper division courses until you have completed at least 30 units. (Exceptions can be made for students who already have completed advanced study in the subject.) You cannot take General Education Capstone courses until you have completed at least 60 units.
- 3) For some majors it is essential to complete courses in the correct sequence. You cannot take a more advanced course until you have completed the prerequisite course(s).
- 4) You must complete all requirements for admission to impacted majors within the first 60 units.

I have been told that I must take one or more pre-baccalaureate courses. How can I plan my program?

Your advisor at SOAR can help you identify which courses must be postponed. You must still complete the minimum number of baccalaureate units required for the degree.

You may be able to catch up by taking additional courses in later semesters or by taking classes in summer or winter session, or you may choose to spend an additional semester completing the program. You cannot begin the sequence of required courses for some majors until you are ready for baccalaureate-level Mathematics. See your major advisor to develop a plan for scheduling the required courses.

I didn't complete the exact list of courses shown. Can I still graduate on time?

The answer depends on your major and on what courses you have completed. The plans are not rigid requirements; they are only intended to provide guidance in planning a program. There are many reasons for students to follow a different pattern, such as changing the major, choosing to take fewer classes in a given semester, choosing to complete a minor or a second major. See your advisor for help in planning a program that will work for you.

If I follow the plan, will I have all requirements for graduation completed?

The plans include the specific courses required for the major. For some majors, there are restrictions on the choice of major electives. It is important that you select General Education courses to meet the required distribution pattern. You may need to take an additional General Education course to complete the minimum number of units required for each category. This is likely to happen if you took three-unit courses in Category B, Physical Universe.

Minor in Speech Communication (code COM-MUM01)

The Minor in Speech Communication is available to any non-Speech Communication major. A minimum of 21 units in Communication Studies is required, of which at least 15 must be upper division, chosen in consultation with the Department Undergraduate Advisor.

Master of Arts in Speech Communication

The Department of Communication Studies at California State University, Long Beach offers a Master of Arts degree in Speech Communication. A student may construct a personalized program that draws from the following areas: rhetorical, interpersonal, organizational, or intercultural communication, performance studies, forensics, or instructional communication.

Admission

1. Application for Admission to the University. The office of Enrollment Services processes applications to the University (forms available through that office) and forwards those meeting University criteria to the Department.
2. Application to the Department. In addition to the University application, prospective students are also required to submit an application and supporting materials directly to the Department. An application form along with detailed instructions are available on-line at the Department's website (<http://www.csulb.edu/depts/comstudies>). Generally, the department accepts students who have a minimum 3.0 Overall Undergraduate GPA and a minimum combined score of 900 on the Verbal and Quantitative sections of the Graduate Record Exam (minimum of 400 per section). The decision to admit is never based on a single indicator. Students who do not meet these requirements may seek admission through appeal.
3. Admissions Appeal Policy. Students whose GPA and/or GRE scores are below the minimum may seek admission through an appeal letter to the Graduate Advisor. The Graduate Advisor shall distribute copies of any appeal letters to the Graduate Committee. The Graduate Committee shall consider the merits of each appeal letter and determine whether an exception ought to be made with regard to the GPA and/or GRE requirements. The decision of the Graduate Committee is final. Students who are not accepted into the program may not enroll in graduate courses in the Department of Communication Studies. Graduate courses taken through Open University will not apply to the student's degree program in the Department of Communication Studies.
4. Teaching Associateships and Graduate Assistantships. Employment as a Teaching Associate or Graduate Assistant falls under the jurisdiction of the Personnel Committee of the Department. The positions pay approximately \$950.00 per month. Tuition is not waived. Interested students should send letters of application, transcripts, GRE scores, and three letters of recommendation to: Chair, Department of Communication Studies, California State University, Long Beach, 1250 Bellflower Blvd., MHB-717, Long Beach, CA 90840-2407.
5. Advising. Consult the Graduate Advisor to plan a program of study and to receive information regarding Department procedures prior to enrollment. The Graduate Advisor and/or a faculty mentor will guide students through their programs.

Prerequisites and Requirements

General Considerations

1. Requirements

- A. All requirements date from the time at which a student receives approval for Advancement to Candidacy, not from when a student begins graduate study.
- B. The Department requires a minimum of thirty semester hours (including four thesis credits in the Thesis Option) for the Master's Degree. The University requires a minimum of twenty-four graduate credits be completed in residence.
- C. Students must either pass the Department's comprehensive examination or write an acceptable thesis.

- D. The Department expects its graduate students to possess the writing skills necessary for advanced study. The University mandates that students pass the Graduate Writing Proficiency Examination or its equivalent. Persons who have passed the CSULB University Writing Examination do not need to take the test again. If you believe you have taken an equivalent examination, consult the Graduate Advisor. Students should pass an acceptable writing examination no later than the end of the first semester of graduate study.
2. Prerequisites
 - A. Units obtained fulfilling prerequisites or deficiencies do not count toward the minimum of thirty semester hours needed to complete the Master's degree.
 - B. Students must meet all prerequisites before enrolling in graduate courses, except for COMM 541 or 546. Individuals may petition for waiver of this rule prior to registering for courses if compelling reasons warrant such a waiver.
 3. Students must comply with all University regulations outlined in the *CSULB Catalog*.

Option in Speech Communication (code COMMMA01)

Prerequisites

Individuals with a Bachelor's degree in Speech Communication (or its equivalent) from a fully-accredited college or university must have approved coursework in:

- A. Survey of Rhetorical Theory (COMM 300)
- B. Communication Criticism (COMM 301)
- C. Measurement in Communication Research (COMM 307)
- D. Communication Theory (COMM 306)
- E. Language and Behavior (COMM 309)

Requirements

1. A minimum of thirty hours of graduate work in Speech Communication distributed as follows:

These requirements are those listed in the 1996-97 *University Catalog* and thus are relevant to students advancing to candidacy during or after Fall 1995. For requirements applicable to students advancing to candidacy prior to Fall 1995, consult appropriate *University Catalog*.

 - A. COMM 541 and 546 to be completed prior to advancement to candidacy and preferably within the first semester of graduate work (6 units);
 - B. twelve units consisting of:
 - 1) COMM 640 and 646 (6 units),
 - 2) one course selected from COMM 633, 635, 636, 637, 638 or 639 (3 units), and
 - 3) one course selected from COMM 600, 610, 611, 614, 620, 630, 632, 648, or 649 (3 units).
 - C. twelve elective units of 500 or 600 level coursework approved by the student's advisor and the Graduate Committee, including four thesis units (COMM 698) if the student elects the thesis option.
2. A minimum of six graduate units taken from one or any combination of the following areas:
 - A. graduate courses from within the Department of Communication Studies,
 - B. graduate courses from outside the Department of Speech Communication (maximum of six units)
 - 1) classes taken outside the discipline in a department at California State University, Long Beach require prior approval by the Graduate Committee,
 - 2) classes taken outside the discipline in a department at another university require approval by the Graduate Committee, or
 - 3) classes taken within the discipline in a department at another university.
3. Completion of the Department's Comprehensive Examination or of an acceptable thesis.
4. Please note that Internships and student teaching cannot be included in the required thirty units.

Enrollment in Communication Studies 697

COMM 697 (Directed Research) should enable students to study topics and methods not normally available through regular coursework. Persons who choose the Thesis Option MAY NOT use COMM 697 to complete any part of the thesis project; however, COMM 697 may function to develop research proficiencies relevant to the thesis. The policy regarding COMM 697 is:

1. The Graduate Committee will approve the inclusion of COMM 697 in a graduate program only if:
 - a. the research topic is not available through regular coursework during the student's tenure in graduate study,
 - b. the student has completed 6 units from the graduate core courses,
 - c. the student has been advanced to candidacy or has submitted her or his Graduate Program to the Graduate Advisor.
2. Students may take a maximum of three units of COMM 697.
3. Candidates must secure approval for COMM 697 before taking the course. Prior to the semester of enrollment, students must submit two forms to the Graduate Committee:
 - a. a "Petition for Directed Research,"
 - b. an "Agreement for Independent Study Course" signed by the graduate faculty member directing the independent research (obtain this form from the Department office)
4. The Graduate Committee will determine whether the proposed study conforms to the purposes of COMM 697. The faculty member directing the research has the responsibility of judging the student's ability to complete the research and also assigning the grade for the project.
5. Students must file their final 697 projects with the Department Chair.
6. Only members of the Department graduate faculty may direct COMM 697.

Advancement to Candidacy

Advancement to Candidacy defines a candidate's program of study and establishes her or him as an official graduate student in the University. Programs must meet the requirements in effect at the time of advancement. Candidates must submit the form for advancement required by the College of Liberal Arts (forms available in the Department office) to the Graduate Committee. Individuals are eligible for Advancement to Candidacy in the Option in Speech Communication after completing COMM 541 and 546. Students should have an average of "B" or better to be advanced to candidacy. Candidates considering the thesis option should submit a list of ten or more courses, starring (*) the class or classes to be omitted if the thesis option is selected.

1. To qualify for advancement, a person must:
 - a. be enrolled in the University during the semester or session he or she requests advancement,
 - b. have removed all deficiencies,
 - c. have earned a minimum cumulative grade point average of 3.0 (B) for work taken – i.e., graduate courses and undergraduate prerequisites,
 - d. have completed six units of graduate core courses with an average of "B" or better,
 - e. have passed the Graduate Writing Proficiency Examination or completed its equivalent.
2. If the student fails to petition for Advancement to Candidacy at the recommended time, he or she must do so at least one semester prior to the semester in which she or he intends to graduate. The deadline each semester is exactly four weeks before the last day of instruction. Do not wait for the deadline! The Graduate Committee may require the student to resubmit a program. Students can neither take the Master's Comprehensive Examination nor enroll in COMM 698 until a program is approved.
3. All submitted programs should indicate the semester in which courses were or will be taken and should report ALL grades in courses completed. No grades of Incomplete (I) or Satisfactory Progress (SP) can appear on the program.
4. If a program contains courses taken outside the Department, a student must obtain approval from the Graduate Advisor and the Graduate Committee before including such classes in her or his course of study. This restriction applies to courses taken at CSULB and to ones transferred from other colleges or universities. Failure to obtain Graduate Committee approval for including such courses prior to enrollment may result in students' taking classes which cannot be included in their programs of study. Candidates must submit the appropriate petition to the Graduate Committee to obtain the necessary approval.
5. After receiving the appropriate form, "Petition for Advancement to Candidacy," the Graduate Advisor will seek approval of the Graduate Committee and the Graduate Dean of the College of Liberal Arts.

Change in Graduate Program

If a student desires to amend her or his program of study after its approval, he or she must submit the College of Liberal Arts "Change of Program" form (available in the Department office) to the Graduate Committee for approval. Approval must be given prior to enrollment in any courses involved in the change; otherwise, the course will not be considered part of the minimum thirty units needed to complete the degree.

Comprehensive Examination Option

1. Comprehensive Examinations are given during the third weeks of November and April for the Fall and Spring semesters, respectively. Students may not take their Comprehensive Examinations during either the Winter or Summer sessions.
2. The following provisions govern election of the Comprehensive Examination Option:
 - A. If a student elects the Comprehensive Examination option at the time of approval of her or his Graduate Program, the student may not change to the thesis option except with a special permission from the Graduate Committee.
 - B. Eligibility: Candidates may take the Comprehensive Examination if they have:
 - 1) been advanced to candidacy, and
 - 2) maintained a grade point average of at least 3.0 (B) in courses in the Master's degree program (i.e., graduate classes and prerequisites).
3. Description and Preparation
 - A. Description. The Examination consists of two sections:
 - 1) a written section spanning three, three-hour sessions during a single week,
 - 2) an oral defense, generally held within two weeks of writing the examination. The oral defense permits the student to elaborate on written answers and to answer questions that may develop out of those answers. Other discussions may arise from issues that occur to the examining committee during the oral segment of the Comprehensive Examination.
 - B. Preparation. Students should prepare for the Examination by beginning their study well before the actual assignment of an examining committee. Once the Graduate Committee appoints that group, a candidate should meet with his or her Committee Chair to discuss procedures relevant to the Examination. Individuals are responsible for the subject matter of their courses regardless of whom the instructor is. The persons on their committees may or may not be those who have taught the actual seminars taken by the candidates. Professors writing questions are under NO obligation to discuss them with the students. The professors may, however, choose to provide candidates with general guidelines to aid in preparation for the Examination. Students should be familiar with all relevant literature integral to a particular area. Because the Examination is "closed book," no notes may be taken into the examination room. Students may obtain bibliographies from individual instructors or from the Graduate Advisor.
4. Student Petitions, Committee Formation, Guidance, and Facilities/Supervision
 - A. Petitioning. Students must petition to take the Comprehensive Examination no later than the end of the semester prior to the term in which they will write the Examination. Students may not petition to take the Comprehensive Examination until all grades of Incomplete (I) and/or Satisfactory Progress (SP) have been removed.

B. Committee Assignment. The Graduate Committee will consider petitions and assign committees during the last week of the first month of each semester. The examining committee consists of three examiners with one member serving as chair. Each member will compose questions for one of the three sessions of the examination.

C. Guidance. Graduate students taking the Comprehensive Examination should understand that faculty are free to develop questions from the subject areas in which students take courses, including the undergraduate core. Candidates are responsible for the subject matter in those areas whether or not such material is addressed in a particular class. Faculty may, but are not required to, provide guidance about the content for which the student is responsible. Faculty may, but are not required to, provide sample questions, reading lists, and/or assign open-ended questions for study. Furthermore, graduate students should understand that questions normally require integration of material in original ways.

D. Facilities/Supervision

- 1) The Department will provide rooms in which candidates can write the examination.
- 2) Students wishing to use computers may bring their own computers, or make arrangements with a specific faculty member to use that person's computer.
- 3) The Graduate Advisor or his/her designee will be available on each day of the Examination to answer questions and cope with difficulties.

5. Defense, Decision, and Appeal Procedure

A. Each Comprehensive Examination Oral Defense will begin by giving candidates the opportunity to explain any revisions they feel will strengthen their written responses.

B. Decisions of the Comprehensive Examination Committees

1) A Comprehensive Examination Committee may render one of the following decisions:

- Pass: Three votes to pass
- Fail: Three votes to fail
- Rewrite: Two pass, one fail
- Fail: One pass, two fails

2) If two members of the committee vote to pass and one votes to fail, the student shall be given the opportunity to rewrite once in the area of deficiency. Students must receive question(s) for revision within three working days of the oral examination. The student must respond in writing to the faculty member(s) by the final day of instruction of the semester as specified by the University calendar. The committee will reconvene during the final examination week to review the student's work and to decide whether the candidate passes or fails the Comprehensive Examination.

3) If the Committee's decision is that the candidate failed the Examination, members shall make themselves available to the candidate to explain their decisions and to facilitate his or her preparation to retake the Examination. A student may petition to retake the Examination no earlier than the semester following that in which she or he has first taken the test. The Examination may be retaken only once.

C. The Department will use the following procedure if a student appeals the decision of a Comprehensive Examination Committee:

- 1) The Graduate Committee of the Department will serve as the review board to determine whether the appeal has merit on procedural grounds.
- 2) Members of the Graduate Committee will be ineligible to serve on the review board if they are part of the original examining committee.
- 3) If such eligibility reduces the membership of the Graduate Committee to fewer than three persons, a replacement will be selected by lottery from among remaining eligible members of the Department faculty.

Thesis Option

1. Electing the Thesis Option

A. This option requires a candidate to include four units of COMM 698 (Thesis) in her or his program. Students may not enroll in COMM 698 until after Advancement to Candidacy or, in rare cases, when advancement occurs in the same semester as the initial enrollment. Note that the Department facilitates timely Advancement to Candidacy of persons writing a thesis by allowing them to submit an advancement form listing ten courses (30 units) or more and starring (*) the course or courses to be omitted if the thesis option is selected.

B. The "Petition for Permission to the Elect the Thesis Option"

1) The candidate must submit the petition to the Graduate Committee through the Graduate Advisor. The form provides space for the signatures of the proposed committee members certifying their willingness to serve on the committee and their approval of the candidate's prospectus. Acceptance of the prospectus by the Thesis Committee certifies both the acceptability of the thesis topic and the willingness of the Committee to direct the student's thesis.

2) The Graduate Committee will not approve the petition until the student completes all requirements in COMM 541 and 546.

C. The Thesis Committee

1) The student is responsible for securing faculty to serve on her or his Thesis Committee. At least two members of a three-person committee or three members of a five-person committee must be tenure-track or tenured faculty from the Department of Communication Studies. Faculty holding parallel status in other departments at CSULB or in other Communication Studies departments in the CSU system may fill the other slots on the committee.

2) The Committee Chair must be a member of the Department's graduate faculty.

D. The candidate shall prepare a prospectus in consultation with the Thesis Committee Chair and other committee members. The project should be more than a minor extension of a seminar project. It should constitute an original contribution to literature in communication studies and should develop a student's research abilities. Candidates must submit a completed, approved prospectus to the Graduate Committee no later than the semester prior to that in which the thesis is to be completed.

2. Completing the thesis

A. COMM 698

1) If the "Petition for Permission to Elect the Thesis Option" is approved by the Graduate Committee, a student may not change to the Comprehensive Examination Option except by special permission of the Graduate Committee. If a student has been enrolled for a semester or more in COMM 698, he or she cannot change options under any condition.

2) If a candidate does not demonstrate satisfactory and continuous progress on the thesis after enrolling in COMM 698, the Graduate Committee, on the recommendation of the Thesis Committee and/or the Graduate Advisor, may terminate the student's graduate program and, if the student is enrolled in COMM 698 at the time, will assign an "F" for the semester.

3) The Department may endorse a petition for one semester of concurrent enrollment in COMM 698 and in another graduate or professional school only if the candidate's Thesis Committee presents evidence that a draft of the thesis requiring only mechanical revision has been submitted.

B. Neither the Thesis Committee nor the Department is responsible for advising or supervising thesis candidates when they are not enrolled in the graduate program.

C. For thesis specifications and deadlines consult:

- 1) The University Thesis Reviewer whose office is in the Library;
- 2) the official thesis document: *Master's Thesis and Projects: Guide to Style and Format*;
- 3) the Thesis Committee;
- 4) thesis guidelines available in the following manuals:
 - a) typing requirements (e.g., formatting, table of contents, appendices, etc.): Turabian, Kate. *A Manual for Writers of Term Papers, Theses, and Dissertations*, latest edition
 - b) style sheets for technical requirements:
 - i) *Publication Manual of the American Psychological Association*, latest edition, or
 - ii) *MLA Handbook for Writers of Research Papers*, latest edition

D. Approval of the completed thesis

1) Upon completion of an acceptable thesis, the student will defend the thesis before the Thesis Committee. Other departmental faculty and students may choose to attend. The Chair of the Thesis Committee will make all necessary arrangements for the oral defense and announce its time and place to the Department. The decision of the examining committee is by secret ballot and requires a majority vote. The Committee will notify candidates of their decision immediately after the oral defense. A candidate whose thesis and/or defense does not receive approval may revise and resubmit the thesis and/or defend it no sooner than the following semester. Resubmission or redefense, however, may take place only once.

2) The completed draft of the thesis must meet the approval of the University Thesis Reviewer.

3) Candidates must deposit the thesis in the University Library. Copies are given to the Department Library and to the Chair of the Thesis Committee if requested.

To Graduate

The *CSULB Catalog* states: "All requirements of the degree program must be completed within seven years of the date . . . when the first course appearing on the student program was completed. . . . A graduate student who expects to receive a degree at the end of any semester or summer session must be enrolled during that . . . [term] and must complete the Request to Graduate Form within the first three weeks of classes of the prior semester. Students completing their degrees in May or in the following summer session should file the application by the preceding October 1. Students completing their degrees January should file by the preceding February 15 at the Admissions and Records Office. . . . Graduate Studies 700 may be used to fulfill the enrollment requirement if the applicant has completed all degree program coursework prior to the semester of graduation."

Graduate Student Honors

Several honors for graduate students are awarded each year at commencement. In accordance with the Department policy, such honors shall be awarded to deserving students using criteria such as the following:

1. grade point average
2. papers published or presented at professional conferences
3. conventions attended
4. professional community service not a part of a student's employment
5. Graduate Communication Association involvement
6. Student Communication Association involvement
7. Departmental service — e.g., volunteer forensic assistant, class lecturer, committee membership

Financial Assistance

Refer to the *University Catalog* for information regarding financial assistance which is available on a University-wide basis.

Forms and Petitions

Sample forms and petitions relevant to enrolled graduate students appear in the Appendix of the Graduate Handbook available only to students registered in the Graduate Program.

Questions

Any questions not answered in these pages should be directed to the Department Graduate Advisor.

Graduate Courses in Communication Studies

Students may apply the following graduate courses in Communication Studies toward the Master's Degree: COMM 531, 541, 546, 590, 600, 610, 611, 614, 620, 630, 632, 633, 635, 636, 637, 638, 639, 640 (540), 646 (696), 648, 649, 650, 697, 698

Undergraduate Core Courses

COMM 300 (440), 301 (435), 307 (230), 306 (446), 309 (448) Course numbers in parentheses are old course numbers.

Graduate Faculty

Terre H. Allen, Amy Bippus, Nancy E. Briggs, Aaron C. Cargile, Sharon D. Downey, Norah Dunbar, Ann Johnson, Patricia Kearney, Lisa Lindsey, G. Bruce Loganbill, Valerie C. McKay, Mary McPherson, Timothy Plax, Karen Rasmussen, Marc Rich, José Rodríguez, James S. Saucedo Manseau, Craig R. Smith, Rachel Smith, Matt Taylor, Stacy Young

Courses (COMM)

Lower Division

110. Interpersonal Communication (3)

Prerequisite: Concurrent enrollment in 110 Workshop. LECTURE: Basic characteristics of the processes underlying the formation, maintenance and termination of interpersonal relationships; theoretical and practical implications of these characteristics in various forms of interpersonal communication. WORKSHOP: Planned exercises and activities designed to develop interpersonal communications skills. (Lecture 2 hours, Workshop 2 hours). Not Open to students with credit in COMM 210. (CAN SPCH 8)

130. Essentials of Public Speaking (3)

Composition and delivery of speeches to inform and persuade. Logical organization is stressed. (CAN SPCH 4)

131. Essentials of Argumentation (3)

Corequisite: Concurrent enrollment in 131 workshop. Lecture: Theory of argumentation. Includes examination of forms and sources of evidence, inductive and deductive arguments, construction of case briefs, and refutation. Workshop: Develops critical thinking abilities with planned exercises and speeches including construction and presentation of arguments, cases, and refutation. (CAN SPCH 6)

132. Small Group Discussion (3)

Basic principles and techniques of discussion. Relationship of discussion to democratic processes and contemporary society including a study and practice of critical thinking and problem-solving techniques in various group discussion settings. (CAN SPCH 10)

171. Voice and Applied Speaking (3)

Application of speaking clarity and proficiency, voice quality and pacing, and related communication modification objectives. Speaking process is applied to realize personal, social, and professional verbal communication skills. Not Open to students with credit in COMM 271.

220. Elements of Organizational Communication (3)

Role of communication in achieving organizational goals; theory and practice of communication in private and public organizations; techniques to enhance understanding in organizations.

236. Forensic Activity (1-3)

Participation in intercollegiate forensic activities. Any student who expects to participate in such activities during the semester should enroll. The student's specific assignments will be determined in consultation with the staff. Maximum credit, 4 units.

Upper Division

General Education Category A must be completed prior to taking any upper division course except upper division language courses where students meet formal prerequisites and/or competency equivalent for advanced study.

300. Survey of Rhetorical Theory (3)

A history of major rhetorical theories from the ancient Greeks to the Twentieth century. Where theories are directly provided, as in the case of Gorgias, Plato, Aristotle, Cicero, Quintilian, Augustine, Machiavelli, Locke, and others, they are explained and explored. In such cases as Marx, Freud, and the existentialists, the theories are deduced from primary philosophical writings.

301. Communication Criticism (3)

Prerequisite: COMM 300. The analysis and criticism of public communication events including speeches, editorials, advertisements, and mass media from a variety of rhetorical perspectives.

306. Communication Theory (3)

Conceptual perspectives and studies of coding, meaning, thinking, information, and persuasion within interpersonal, group and organizational contexts; theoretical contributions from other disciplines.

307. Measurement in Communication Research (3)

Prerequisites: COMM 306 and completion of University GE requirement in mathematics. Application of the scientific method to the study of speech communication; examination of the role empirical methodologies play in communication research; fundamental statistical processes. Letter grade only (A-F). (Formerly COMM 305)

309. Language and Behavior (3)

Symbolic basis of human communicative behavior; relationship between language and behavior; investigation and analysis of discourse and behavioral effects.

330. Intercultural Communication (3)

Study of the relationship between culture and communication with emphasis given to social, psychological, linguistic and nonverbal variables; problems in the practice of intercultural communication.

331. Argumentation and Debate (3)

Techniques of argumentation and their application to debate; logic, reasoning and fallacies of reasoning; experience in various forms of formal argument and debate; techniques of debate program administration.

333. Interpretive Communication of Literature (3)

Derivation of meaning in various literary forms and its communicative interpretation to specific audiences.

334. Business and Professional Communication (3)

Prerequisite: COMM 130 or consent of instructor. Skills and technologies related to the assessment, strategic planning, development, implementation, and evaluation of effective communication in the business and professional setting.

335. Persuasive Speaking (3)

Prerequisites: Completion of GE Foundation requirements. Beginning with analysis of audience behaviors, this course teaches the skills necessary for advanced public speaking in various venues including legislative, legal, and ceremonial public address. The course explores various theories of motivation including speaker credibility, the use of emotional appeals, the importance of evidence and argument, style in language, and delivery skills.

336. Forensic Activity (1-3)

Participation in intercollegiate forensic activities. Any student who expects to participate in such activities during the semester should enroll. Student's specific assignments will be determined in consultation with the staff. Max. credit, 4 units.

337. Conference Management (3)

Organization and direction of professional, business and political conferences or conventions; program simulation; leadership of and participation in decision making and parliamentary sessions. May be repeated to a maximum of 6 units.

338. Ensemble Interpretive Reading (3)

Programming and presentation of prose, poetry and drama by an ensemble of readers. Emphasis is placed on experimental presentations and on the development of analytical insight into literary forms.

344. Theory and Techniques of Interviewing (3)

Theory and techniques of oral communication in the process of interviewing. Practical application in employment, information gathering and persuasive interviews.

352. Story Telling (3)

Cultural heritage in story telling; analysis of story types for oral presentation; techniques of preparation, presentation and listening.

355. Communication in the Classroom (3)

Designed primarily for prospective elementary, secondary, and community college teachers, this course focuses on communication theories, principles, and skills applicable to teaching more generally, and to the teaching of speech communication specifically. Because effective teaching relies on effective communication, this course focuses on those communication variables and strategies that contribute to greater student learning. Moreover, students, will develop an instructional package for teaching specific units in speech communication.

358. Speech Arts for Children (3)

Use of creative dramatics, improvisations, puppetry, choral speech, radio, television and group discussion for the purpose of developing fluency, responsiveness and imagination in children. Integration of speech arts activities with curricular subjects will be stressed. Opportunity to apply the theories in actual situations.

400. Nonverbal Communication (3)

Prerequisites: COMM 110 Lecture and Lab. Basic characteristics of the nonverbal elements of human communication in the oral communication setting.

410. Advanced Concepts in Interpersonal Communication (3)

Prerequisites: COMM 110 and 307. Systems and symbolic interaction approaches to interpersonal communication, consideration of interpersonal needs, self disclosure, understanding, interpersonal perception, interpersonal attraction, and social conflict; role and performance-centered theories of interpersonal communication.

411. Communication in Conflict Resolution (3)

Prerequisites: Completion of GE Foundation requirements, completion of one or more Explorations courses, and upper division standing. An analytical investigation of the nature and dynamics of interpersonal conflict; approaches to the study and understanding of conflict management as examined from intrapersonal, interpersonal, intragroup, organizational, and international perspectives.

Prerequisites: Completion of GE Foundation requirements, completion of one or more Explorations courses and upper-division status. Survey of theories and research literature with the objective of increasing students' understanding of, and familiarity with, major issues regarding communication between men and women in various contexts.

414. Communication in Families (3)

Prerequisites: COMM 307. A survey course emphasizing the role of communication in families; theoretical perspective of family interaction, current family issues, intercultural aspects of family interaction, effects of changing career/family roles and intergenerational interaction. Letter grade only (A-F).

420. Advanced Concepts in Organizational Communication (3)

Prerequisites: COMM 220 and 307. Philosophy, methods and designs for studying the communication systems of complex organizations; organizational communication-needs assessment, methods for developing and improving communication in organizations are examined and studied.

421. Communication in Bargaining and Negotiation (3)

Prerequisites: COMM 220 and 307. Role of communication in the decision-making process of negotiation and bargaining. Emphasis on the functions of communication in resolving disputes through bargaining.

430. Advanced Concepts in Intercultural Communication (3)

Prerequisites: COMM 330 or consent of instructor. Continued study of communication processes involved in interaction between people from different cultural groups. Exploration of culturally variable means of thinking and behaving, and study of social psychological processes affecting all forms of intergroup interaction. Letter grade only (A-F).

432. Communication Leadership (3)

Development of leadership skills in problem-solving communication environments; leadership theories, strategies and techniques of problem-solving and decision making.

433. Trends in Interpretive Communication (3)

Trends and issues in the theoretical and historical development of oral interpretation as applied to current times.

434. Advanced Oral Presentation Skills (3)

Prerequisite: Completion of General Education foundation courses; one or more General Education Exploration course; and upper-division standing. Development of advanced skills in oral presentations, including integration of multi-disciplinary oral presentation activities (i.e., presenting a business plan, statistical data, or visual design). Exploration, research, and skills practice in audience analysis, presentation technologies, and multi-media applications in advanced oral presentations. Special consideration paid to research and critical analysis of written and oral presentation content and delivery. Letter grade only (A-F).

436. Communication Strategies of American Speakers (3)

Prerequisites: COMM 300 and 301. Comparison and contrast of famous American speakers and their techniques, effects and environments from the colonial period to present.

437. Communication Strategies of International Speakers (3)

Prerequisites: COMM 300 and COMM 301. Comparison and contrast of famous International speakers and their techniques, effects, and environments from Demosthenes and Churchill to Hitler and Ghandi. Letter grade only (A-F).

439. Communication and Popular Culture (3)

Examines the relationship between communication and popular culture in the public sphere. The course aims at improving students' abilities to respond critically to everyday mass social messages. Letter grade only (A-F).

441. Issues in Freedom of Communication (3)

Prerequisites: Upper division standing and completion of Foundation Level GE Courses, and at least two Exploration Level Courses. It is recommended that one of these be either COMM 331 (Argumentation and Debate) or COMM 335 (Persuasive Speaking). This course examines the evolution and impact of First Amendment rights on American society and its political system. The course emphasizes the evolution of the First Amendment from the colonial period to its adoption in 1791, significant Supreme Court cases interpreting First Amendment law, the First Amendment and electronic media, and the application of case law covering the clauses of the First Amendment that deal with religion, speech, press, and assembly. The course is recommended for pre-law students.

442. Campaign Persuasion (3)

Prerequisites: Completion of GE Foundation requirements, upper division standing, and at least two Exploration Level Courses. It is recommended that one of these be either COMM 331 or COMM 335. An examination of persuasive communicative strategies in political campaigns inclusive of campaign speeches, commercials, news media coverage, image-building, audience analysis through polling, and fund raising.

449. Studies in Oral Persuasion and Attitude Change (3)

Attitude formation and change through oral communication; factors in persuasion; problems in determining the effects of persuasive messages; source credibility, message variables; and personality factors in the process of persuasion.

450. Communication Training in Organizations (3)

The nature and role of communication training in a variety of social, educational, and business organizations are investigated and analyzed. Communication effectiveness programs are examined and studied in terms of goals, structure, and impact. Use of audiovisual aids and communication training techniques are emphasized.

452. Communication in the Multinational Organization (3)

Study and analysis of communication patterns in multinational and multicultural organizational settings; the nature and impact of different organizational structures, value systems and cultural norms considered and examined in relation to productivity, employee and organizational obligations and expectations.

490. Special Topics in Speech Communication (3)

Topics of current interest selected for intensive study in speech communication. May be repeated to a maximum of 6 units with different topics. Topics announced in the *Schedule of Classes*.

492A-B. Internship (3-3)

Prerequisite: "PERMIT" required to enroll with consent of instructor; open only to senior majors. At least 120 hours with cooperating organizations on or off-campus. Work to be directed and evaluated by the instructor in consultation with supervisor of the participating organizations. Assignments will be varied. Credit/No Credit grading only. COMM 492A is for unpaid Internship. COMM 492B is for paid internship.

495. Service Learning Internship (3)

Prerequisites: Communication Studies Major with Senior Standing; Minimum 3.0 GPA for all college coursework taken; COMM 130 or 335 or their equivalents; COMM 352 or 355 or 358, or the consent of instructor if one of these courses has not been taken; Consent of COMM 495 instructor. Service Learning Internship in Communication Studies is designed for dedicated Communication Studies majors to apply their academic knowledge of communication skills in the community outside of CSULB. Specifically, students will be trained by the instructors to provide public speaking, listening, interpersonal communication, group communication, multicultural communication, and/or interviewing skills training (1) to students in the elementary, middle, and high schools, or (2) to persons in the public sector. The purpose of the course is to serve others' needs for communication skills via strong connections among the community, CSULB, and the communication discipline. Letter grade only (A-F). May be repeated to a maximum of 6 units.

499. Special Studies (1-6)

Prerequisites: "Permit" required to enroll. Open to upper division students or graduate standing and consent of instructor. An approved "Agreement for Independent Study" must be on file with the Department prior to enrolling in this course. Individualized laboratory or library research selected in consultation with instructor. Written report of the research is required. Not acceptable for graduate credit toward the master's degree.

Graduate Level

531. Administering the Forensic Program (3)

Prerequisite: "PERMIT" required to enroll with consent of instructor. Principles of constructing and administering a forensic program, including recruiting, squad direction, budgeting, tournament policies and current literature on forensics direction. Letter grade only (A-F).

541. Rhetorical Theory and Criticism I (3)

Introduction to research in rhetorical studies. Examination of major figures and schools of thought on rhetorical theory and criticism from the Pre-socratics through the modern British era.

546. Communication Theory and Research I

An examination of theories and research in social cognition, interpersonal, small group, organizational, intercultural, mass, instructional, language and behavior, and nonverbal communication. Critical analysis of empirically-based articles in the field. Social-scientific research proposal required. Letter grade only (A-F).

590. Special Topics in Speech Communication (3)

Prerequisite: Consent of instructor. Investigation of topics of current interest and concern to students in speech communication and allied areas. Topics will be announced in the *Schedule of Classes*. May be repeated to a maximum of 6 units with different topics, but no more than 3 units may count toward the master's degree in speech communication.

600. Seminar in Nonverbal Communication (3)

Prerequisite: COMM 546 or consent of instructor. Review and analysis of theoretical writings and critical studies in nonverbal communication; the relationship of nonverbal behavior to oral communication. Letter grade only (A-F).

610. Seminar in Interpersonal Communication (3)

Prerequisite: COMM 546 or consent of instructor. Current theories and research in interpersonal communication. Letter grade only (A-F).

611. Seminar in Negotiation and Conflict Resolution (3)

Prerequisites: COMM 411 or 421 and 546 or consent of instructor. Investigation, analysis, and criticism of the nature, development, and dynamics of conflict and the role of negotiation in interpersonal, group, organizational, and international and intercultural communication; study and understanding of conflict management. Letter grade only (A-F).

614. Gender and Family Research (3)

This course covers major theoretical perspectives that explain the role of communication in family and gender issues. Epistemological, conceptual, and methodological issues in researching family and gender communication are also explored. Letter grade only (A-F).

620. Seminar in Organizational Communication (3)

Prerequisite: COMM 546 or consent of instructor. Theories and models of communication in large organizations; design and management of organizational communication systems. Letter grade only (A-F).

630. Seminar Intercultural Communication (3)

Prerequisites: COMM 541 and 546 or consent of instructor. Analysis of cultural influences on interpersonal communication; emphasis given to cultural values, perception, social organization, language and nonverbal codes; development of strategies of effective intercultural communication in both international and domestic settings.

632. Seminar in Small Group Communication (3)

Prerequisite: COMM 546 or consent of instructor. Research in small group discussions. Letter grade only (A-F).

633. Seminar in Interpretive Communication (3)

Prerequisite: COMM 541 or consent of instructor. Theories of communicative interpretation of literature, with emphasis upon the theory and evaluation of oral presentation of literature as an art form and a pedagogical instrument. Letter grade only (A-F).

635. Seminar in Communication Criticism (3)

Prerequisite: COMM 541 or consent of instructor. Critical theories of rhetoric and major systems of communication criticism; development of criteria and approaches for the evaluation of select communication acts and contexts. Letter grade only (A-F).

636. Seminar in American Public Communication (3)

Prerequisite: COMM 541 or consent of instructor. Studies of American rhetorical events and their social, political and intellectual settings, application of rhetorical theory in the analysis of these events. Letter grade only (A-F).

637. Seminar in International Public Communication (3)

Prerequisite: COMM 541 or consent of instructor. Studies of international rhetorical events and their social, political, and intellectual settings; application of rhetorical theory in the analysis of these public communication events. Letter grade only (A-F).

638. Seminar in Greek and Roman Public Communication (3)

Prerequisite: COMM 541 or consent of instructor. Studies of Greek and Roman rhetorical events and their social, political and intellectual settings, application of rhetorical theory in the analysis of these events. Letter grade only (A-F).

639. Seminar in Communication and Popular Culture (3)

Prerequisite: COMM 541 or consent of instructor. Surveys literature on rhetoric, critical studies, and popular culture to provide a basis for investigating communication in popular culture. Letter grade only (A-F).

640. Rhetorical Theory and Criticism II (3)

Prerequisite: COMM 541. Examination of major figures and themes in rhetorical theory and criticism in the contemporary era.

646. Communication Theory and Research II (3)

Prerequisites: COMM 307 (or equivalent) and 546. Empirical research methodologies applied to communication research. Theory and design of scientific research; analysis of findings; computer applications. Research report required.

648. Seminar in Language and Behavior (3)

Prerequisite: COMM 546 or consent of instructor. Contemporary theories and models in linguistic, psycholinguistic and sociolinguistic research; communication discourse and speech acts analysis. Letter grade only (A-F).

649. Seminar in Persuasion and Attitude Change (3)

Prerequisite: COMM 546 or consent of instructor. Contemporary theories and models of persuasion; structure and relationships of beliefs, values and attitudes; methods of assessing persuasive effects; analysis of research literature. Letter grade only (A-F).

650. Seminar in Instructional Communication (3)

Prerequisites: COMM 541 and 546 or consent of instructor. Designed for either beginning or experienced teacher/trainers, the course will identify those communication variables and strategies which contribute to greater student/client learning as well as greater satisfaction with the learning process. Students will develop an instructional/training package. Letter grade only (A-F).

697. Directed Research (1-6)

Prerequisites: COMM 541 and 546; authorization of the department Graduate Advisor, Agreement for Independent Study Course form, consent of instructor. Directed research leading to the definition and discussion of a selected problem or issue in speech communication and the presentation of research results in a formal paper submitted to the department. May be repeated to a maximum of 6 units with different topics. (Independent Study) Letter grade only (A-F).

698. Thesis (2-4)

Prerequisites: COMM 541, 546, 640 and 646, authorization of the department Graduate Advisor, Agreement for Independent Study Course form, consent of instructor. Preparation, completion and submission of an acceptable thesis in partial fulfillment of the requirements for the master's degree. Credit/No Credit grading only.

View the CSU, Long Beach *Catalog* on-line at www.csulb.edu by clicking on "Academics" and then "CSULB Catalog."

The Cooperative Education Office serves as a link between the University's academic programs and those public and private employers interested in the Internship Program. The program is designed to offer students academic credit for participation in monitored part-time or full-time practical and professional work experience that is directly related to their academic major or career goal.

The internships offered by the Internship Program are also designed to assist students in gaining a deeper understanding of the relationship between theory and practical application. Through on-the-job experience, students can assess their capabilities, clarify values, and explore career goals.

The accompanying internship courses (see below) provide students with up to 6 units of elective academic credit based on the work experience and required course assignments. Course discussions include relevant topics such as, work ethics, communication skills, conflict resolution, and employer-employee relations. Written assignments enable students to review and process the learning that takes place in the hands-on environment.

Cooperative Education (Co-Op) Internships

Cooperative Education internships offer students paid work experience in business, industry, government and the non-profit sector. Co-Op students may choose from two types of work experience. Students may alternate full-time work periods with full-time academic periods or they may work part-time while simultaneously attending the University. Upper-division Co-Op courses are available for up to 6 units of elective academic credit.

Educational Participation in Communities (EPIC)

The (EPIC) program provides volunteer internship opportunities for students who wish to participate in career-related field experiences that complement their classroom study. EPIC internships are available with organizations and agencies in the not-for-profit sector. Upper-division Co-Op courses are available for up to 6 units of elective academic credit.

Curriculum

CBA 493. Business Internship (1-3)

Prerequisites: Classified business major and instructor consent. Qualifying students will be placed in career-related paid assignments in private or public agencies or businesses. An organized plan utilizing a series of seminars and learning agreements is required along with selected reading and writing assignments. A minimum of 120 hours paid experience per semester is required. May be repeated to a maximum of 6 units.

ED P 492. Internship in Human Services (3)

Prerequisite: Consent of instructor. Students in any major are placed in agencies and organizations to engage in volunteer or paid work in human services/mental health. The required fifteen hour seminar shall focus on personal values, interpersonal communications skills, critical thinking, and problem solving as they relate to the students' field placement. Development of knowledge and skills transferable to future careers will be stressed. A minimum of 120 hours field experience is required for the semester.

ENGR 492B. Internship In Engineering (3)

Prerequisite: Upper division standing and consent of the instructor. A Co-Op field experience. Students who qualify can be placed in a major - or career related, pre-professional experience as an employee in private industry or in public agencies. May be repeated to a maximum of 6 units. (Lecture-problems 3 hours).

HHS 492. Field Studies and Career Exploration (1-3)

Prerequisites: Consent of the instructor and a minimum GPA of 2.0. Provides a student with a career-related experience by allowing the student to work in the field or profession related to his or her major. Students qualifying may work in either a major or career-related volunteer or paid assignment in private industry, a non-profit agency, or a public agency. In addition to the practical experience, students will attend a series of seminars designed to complement this field experience by focusing on common issues to the work setting.

NSCI 492. Internships In Natural Science (3)

Prerequisites: Upper division standing and consent of instructor prior to registration. Students who qualify will be placed in a major or career-related assignment in private industry and public agencies. All participants utilize learning agreements. A final written report is required. Class attendance to be arranged by instructor. (9 hours experience per week). May be repeated to a maximum of 6 units. Credit/No Credit grading only.

CREDENTIAL PROGRAMS

Credentials

Public school teaching and service credentials in the State of California are regulated by the State Legislature and administered by the California Commission on Teacher Credentialing (CCTC). Credential programs offered at CSULB have been developed to meet current requirements which are complex and continually reviewed and changed by legislative action. Candidates for all credentials must meet legal requirements in effect when completing credential programs. It is the responsibility of the student to be familiar with the program requirements contained in this *Catalog* and to obtain current information from departments offering individual programs. For information regarding admission, academic requirements and field work, contact the specific credential program coordinator. For information on general credential requirements, regulations, pending changes and new legislation, contact the Credential Center, Education (ED) 1 Room 42 (credentials@csulb.edu).

Basic Credentials

There are three types of basic teaching credentials. The Multiple Subject Credential authorizes the holder to teach all subjects in a self-contained classroom, generally in an elementary school. A teacher authorized for multiple subject instruction may be assigned to teach in any self-contained classroom — pre-school, kindergarten, grades 1 through 12, or in classes for adults. CSULB offers the Multiple Subject Teaching Credential with subject matter met by passing California Subject Examinations for Teachers: Multiple Subjects (CSET: Multiple Subjects). All three parts of the CSET exam must be passed as a condition of entry to the program (per EO 896). Another pathway to Multiple Subject Teaching is the Integrated Teacher Education Program (ITEP). ITEP combines study of academic subjects aligned to the California standards for the K-8 curriculum with professional preparation courses and field experiences leading to a Multiple Subject Credential. ITEP students are required to pass the CSET: Multiple Subjects exam to demonstrate subject matter competence. All three parts of the CSET exam must be passed as a condition of advancement to student teaching (per EO 896). For more information, consult the Liberal Studies section of this catalog. For detailed information on the Multiple Subject Credentials, please refer to the section in this catalog listed within the department of Teacher Education or visit the Elementary and Special Education Admissions and Advising Center located in ED1-67.

The Single Subject Credential authorizes the holder to teach within a specified subject-matter category. A teacher authorized for single subject instruction may be assigned to teach this subject at any grade level — pre-school, kindergarten, grades 1 through 12, or in classes for adults. In practice, most teachers with a single subject authorization teach departmentalized classes in middle, junior high or senior high schools. CSULB offers CCTC-approved Subject Matter Programs in Art, Biological Sciences, Chemistry, English, Foreign Language (French, German, Japanese, Spanish),

Geosciences, Health Science, Home Economics, Mathematics, Music, Physical Education, Physics, and Social Science.

The Education Specialist Credential authorizes a candidate to teach in a special education assignment with students with special needs. This K-12 credential certifies individuals to work as a special day class teacher, inclusion support teacher, or as a resource specialist. All three parts of the CSET exam must be passed as a condition of entry to the program (per EO 896).

Elementary and secondary teachers wishing to diversify their teaching authorizations may do so by fulfilling specific requirements. Further information is available in the Credential Center, ED 1 – 42.

Specialist Credentials

CSULB offers specialist teaching credential programs in Early Childhood Education, the Resource Specialist Certificate of Competence, Reading and Language Arts Specialist, Reading Certificate, and the Adapted Physical Education Certificate. All specialist teaching credentials require a valid basic teaching credential.

Service Credentials

Service credential programs are available in the following areas: Preliminary Administrative Services, Professional Administrative Services, Library Media Teacher Services, Health Services (School Nurse), School Counseling, School Psychology, Clinical Rehabilitative Services – Language, Speech and Hearing, Clinical Rehabilitative Services – Language, Speech and Hearing with Special Class Authorization, Clinical Rehabilitative Services – Audiology, and School Social Work and Child Welfare and Attendance. Both the Preliminary Administrative Services and Library Media Teacher credentials require a valid basic teaching credential.

Designated Subjects Credentials

CSULB offers CCTC-approved programs leading to Designated Subjects, Adult, Vocational, and Designated Subjects Supervision credentials. Contact the Department of Occupational Studies, Engineering Technology (ET) – 233, for information.

Obtaining a Credential

Current credentialing law provides for a two-step program for basic teaching credentials, the Preliminary credential and the Professional Clear credential. The Preliminary credential requires:

1. a bachelor's degree from an accredited institution,
2. an approved professional preparation program, including the teaching of reading and student teaching,
3. verification of subject matter competence (program or examination),
4. passage of CBEST (California Basic Educational Skills Test), and
5. completion of an approved course or examination in the U.S. Constitution,
6. demonstration of Level I computer technology proficiency (course or exam).

The Preliminary credential is valid for five years from date of issuance, and is not renewable.

New requirements for the Professional Clear credential under Senate Bill (SB) 2042 became effective September 1, 2002. During the transition from the Ryan Professional Clear credential requirements to the SB 2042 Professional Clear credential requirements, teachers holding the Ryan Multiple or Single Subject Preliminary credential may complete one of the following options to qualify for the Professional Clear credential:

1. a CCTC-accredited SB 2042 Professional Teacher Induction Program, if available, and the CPR component of the health education requirement if it was not already completed for the Preliminary credential; or
2. a Beginning Teacher Support and Assessment (BTSA) Program and the three additional requirements of health education (including CPR), special education, and computer technology if not already completed for the Preliminary credential; or
3. a fifth year of study (30 post-baccalaureate units) and the three additional requirements of health education (including CPR), special education, and computer technology if not already completed for the Preliminary credential.

Teachers holding the SB 2042 Preliminary credential may complete one of the following options to qualify for the Professional Clear credential:

1. a CCTC-accredited SB 2042 Induction Program through the district of employment; or
2. a Beginning Teacher Support and Assessment (BTSA) Program and the four statutory requirements of advanced work in health education, teaching special populations, teaching English learners, and advanced technology (if advanced work in the four statutory areas is met as courses taken at a college or university, the courses must be taken after completion of the Preliminary Credential); or
3. a fifth year Program at a college or university requiring 30 units of post-baccalaureate study and advanced course work in the four statutory areas of health education, teaching special populations, teaching English learners, and advanced technology. The advanced level courses in the four statutory areas must be taken after completion of the Preliminary Credential.

Please contact the Credential Center in the College of Education for more information (ED1-42).

Entry Levels for Basic Credential Programs

Students may begin credential programs at five different levels:

1. Qualified candidates who wish to earn the Multiple Subject Credential may begin the Integrated Teacher Education Program (ITEP) in the Liberal Studies Department as first-term freshman. This program leads to the Multiple Subject Credential in four and a half years of full time, accelerated study.
2. Qualified transfer students from partner community colleges who wish to earn the Multiple Subject Credential and who have started the Integrated Teacher Education Program (ITEP) at their community college may continue the program as transfer students. This program leads to the Multiple Subject Credential in four and a half years of full time, accelerated study.

3. Junior level – With a carefully planned program, initial education courses may be taken at the junior level with completion of the program within the four-year degree program culminating in a Preliminary teaching credential.
4. Senior level – Part of the credential program may be taken as an undergraduate to complete electives toward degree requirements. The remaining credential requirements are then completed at the post-baccalaureate level. The Preliminary credential is issued after completion of the credential program.

Note: By petition only, up to twelve units of course work taken in the final undergraduate semester (not needed to meet major or degree requirements) may be counted as postgraduate credit toward the Professional Clear Credential. Criteria and petition forms are available in the Single Subject Program Office, ED 1 – 54, and the Multiple Subject Program Office, ED 1 – 13.

5. Graduate level – The entire credential program may be completed at the post-baccalaureate level.

Application to Credential Programs

Information on application to credential programs is available from the appropriate department or program coordinator. Students planning to enroll in credential programs must also file an application for admission to the University.

Note: Multiple Subject Credential Programs have established application periods each year which are separate from the University application periods and process.

Application for Field Work and Student Teaching

Candidates for field work and student teaching for the Summer or Fall term of any year must apply by March 1. Spring candidates must apply by October 1.

Appeal Process

A student has the right to address an appeal to the appropriate committee regarding any policy related to admission and continuation in a teacher preparation program. Petition forms and assistance are available through the credential program coordinator or the department office.

View the CSU, Long Beach *Catalog* on-line at www.csulb.edu by clicking on "Academics" and then "CSULB Catalog."

The department of Criminal Justice offers an undergraduate bachelor of science degree and a graduate master of science degree. These programs are designed to provide students with an appropriate academic background for a professional career in corrections, law enforcement, probation, parole, or social service agencies. In addition, the programs are designed to prepare students for continuing graduate studies in criminal justice, criminology, or law.

Bachelor of Science in Criminal Justice (code CRIMBS01) (120 units)

The program in criminal justice offers the bachelor of science degree to individuals interested in seeking a comprehensive education leading to a professional career in criminal justice. The program is designed to accommodate the needs of the continuing student, the transfer student, and the experienced criminal justice practitioner. Unfortunately, it is not possible to always offer sufficient courses in the evenings for students to graduate with a degree in criminal justice.

Students intending to transfer from community colleges to this University for a bachelor of science degree in criminal justice are advised to complete general education requirements while attending the community college. A course equivalent to CRIM 101, *The Criminal Justice System in Society*, should be taken while attending community college. Other criminal justice courses taken at community colleges will only be accepted as lower division electives provided the college where they were taken designated them as transferable to CSU. These courses can not be substituted for upper division criminal justice courses.

Requirements

All students are required to take a minimum of 42 units of criminal justice course work to meet the department requirements for a bachelors degree in criminal justice: 30 units are core and 12 units are upper division electives in the major. CRIM 101 is a prerequisite or corequisite for all core courses. Students who would like to declare and/or change to criminal justice as their major/minor must have an overall G.P.A of 2.0 and be enrolled in or have completed CRIM 101 or an equivalent course at another college or university.

The 30 units of required courses that constitute the core are: CRIM 101, 301, 303, 331, 351, 404, 468, 480, 483, and 495. Students with upper division transfer units should consult the undergraduate advisor regarding substitutions for core classes. Courses taken at a two-year college may not be substituted for upper division core courses. All core courses must be passed with a letter grade of "C" or better (credit/no credit is not an option). Specifically, every core course in which a student receives a final grade of "D" or "F" must be repeated until a grade of "C" or higher is achieved.

In addition to the core classes, students are required to complete 12 units of upper division criminal justice electives which may be taken before, concurrently, or after the core courses. Any criminal justice course in the CSULB catalog numbered 300 to 499 that is not a core class may be used as a criminal justice elective. Students with upper division transfer

units should consult the undergraduate advisor regarding substitutions. Alternative admission requirements may apply during times when the department is impacted.

FAQ Concerning Road Maps for Completion of Undergraduate Degrees

For each undergraduate major, the on-line Catalog shows plans for scheduling all required courses to complete the degree in four, five, or six years.

While CSULB will make every effort to schedule classes at the times shown in the plans, we cannot guarantee that courses will be available in specific semesters. It is possible that shortage or budget or of personnel will make it impossible to offer as many classes as we would wish.

The plans are not substitutes for working with an advisor. You are strongly encouraged to see an advisor when planning your program each term.

I am a freshman. Do I have to choose now whether to follow the four, five, or six-year plan?

No. Most freshmen take 12-15 units. You need at least 12 units to receive full financial aid. With experience, you will be able to judge how heavy a load you find comfortable. This will depend on your outside obligations, such as a job, and on your personal circumstances. In theory, each unit requires three hours a week, including preparing for class, attending class, and completing assignments. Use these guidelines to budget your time and plan an appropriate schedule.

Must I take the courses in the semesters shown on the plan?

The plan shows one possible way of completing all requirements for the degree. Consult your advisor about whether it is essential to take a given course in the semester shown. There are some rules to keep in mind:

1) You can take the General Education Foundation courses (Composition, Oral Communication, Critical Thinking, Mathematics) in any semester in the first 36 units of baccalaureate-level course work completed at CSULB.

2) You cannot take upper division courses until you have completed at least 30 units. (Exceptions can be made for students who already have completed advanced study in the subject.) You cannot take General Education Capstone courses until you have completed at least 60 units.

3) For some majors it is essential to complete courses in the correct sequence. You cannot take a more advanced course until you have completed the prerequisite course(s).

4) You must complete all requirements for admission to impacted majors within the first 60 units.

I have been told that I must take one or more pre-baccalaureate courses. How can I plan my program?

Your advisor at SOAR can help you identify which courses must be postponed. You must still complete the minimum number of baccalaureate units required for the degree.

You may be able to catch up by taking additional courses in later semesters or by taking classes in summer or winter session, or you may choose to spend an additional semester completing the program. You cannot begin the sequence of required courses for some majors until you are ready for baccalaureate-level Mathematics. See your major advisor to develop a plan for scheduling the required courses.

I didn't complete the exact list of courses shown. Can I still graduate on time?

The answer depends on your major and on what courses you have completed. The plans are not rigid requirements; they are only intended to provide guidance in planning a program. There are many reasons for students to follow a different pattern, such as changing the major, choosing to take fewer classes in a given semester, choosing to complete a minor or a second major. See your advisor for help in planning a program that will work for you.

If I follow the plan, will I have all requirements for graduation completed?

The plans include the specific courses required for the major. For some majors, there are restrictions on the choice of major electives. It is important that you select General Education courses to meet the required distribution pattern. You may need to take an additional General Education course to complete the minimum number of units required for each category. This is likely to happen if you took three-unit courses in Category B, Physical Universe.

Minor in Criminal Justice (code CRIMUM01)

Requirements

All students are required to take a minimum of 21 units of criminal justice course work to meet the department requirements for a minor in criminal justice: 15 units are core plus six units of upper division criminal justice elective classes. CRIM 101 is a prerequisite or corequisite for all core courses. Students who would like to declare and/or change to criminal justice as their minor must have an overall G.P.A. of 2.0 and be enrolled in or have completed CRIM 101 or an equivalent course at another college or university. Alternative admission requirements may apply during times when the department is impacted.

The 15 units of required courses that constitute the core are: CRIM 101, 351, 404, 468 and 483. All core courses must be passed with a letter grade of "C" or better (credit/no credit is not an option). Specifically, every core course in which a student receives a final grade of "D" or "F" must be repeated until a grade of "C" or higher is achieved.

In addition to the core classes, students are required to complete 6 units of upper division criminal justice electives, which may be taken before, concurrently, or after the core courses. Any criminal justice course in the CSULB catalog numbered 300 to 499 that is not a core class may be used as a criminal justice elective. Students with upper division transfer units should consult the undergraduate advisor regarding substitutions. Courses taken at a two-year college may not be used to meet this requirement.

Master of Science in Criminal Justice (code CRIMMS01)

Graduate study in criminal justice provides the requisite knowledge and opportunity for individuals to (1) be competitive for administrative positions in the courts, corrections, law enforcement, private security, probation and parole, (2) fill research positions in criminal justice agencies, (3) pursue advanced degrees (J.D. or Ph.D.), and (4) fill community college teaching positions in criminal justice.

The master of science degree in criminal justice will expand and increase individual competency, develop and mature thought processes, aid in gaining insights into professional leadership and knowledge, permit an exchange between students and faculty, and further the spirit of research and scholarship to enhance professional and personal development.

Admission

Students seeking admission to the Department of Criminal Justice Graduate Program should have an undergraduate degree and a desire for graduate study. Applicants must apply for admission to the Criminal Justice Department in addition to being admitted by the Office of Admissions and Records. Students must be accepted for admission by the Department before their program for a master's degree can be formulated. Students are not allowed to take graduate course work in criminal justice before being accepted to the program. The following items must be completed:

1. A graduate application. The original must be sent to the Office of Admissions and Records and a copy to the Department of Criminal Justice.
2. Scholastic achievement as represented by official transcripts of all undergraduate course work. Each applicant must request that official transcripts be sent to both the Graduate Advisor in the Criminal Justice Department and the Office of Admissions and Records.
3. Resume and statement of goals must be sent to the Department's Graduate Advisor and University Enrollment Services;
4. Three letters of recommendation from persons able to testify to the student's academic ability. These letters must be sent to the Department of Criminal Justice Graduate Advisor.

Prerequisites

1. A bachelor's degree with a major or minor in criminal justice or a related discipline. The acceptability of other undergraduate preparation shall be determined by the Department Graduate Committee;
2. A student must have an overall undergraduate average (GPA) and average in their major of 3.0 or better. A student whose overall grade point average is less than 3.0, but who presents acceptable evidence of professional potential either through recent academic performance and/or experiential background, may be admitted by special action of the Department's Graduate Committee.

Advancement to Candidacy

1. Students must satisfy the general University requirements for advancement to candidacy, as specified in this bulletin.
2. Before advancing to candidacy students must have passed the Writing Proficiency Examination.
3. Before advancing to candidacy students must successfully complete CRIM 581, CRIM 582, CRIM 583, and CRIM 584 with a minimum grade of "B" in each of the courses.
4. Each student's graduate program must be approved by the Department Graduate Advisor and Director of Graduate Studies and Research, College of Health and Human Services.

Requirements

Eighteen (18) units of required courses constitute the core: CRIM 581, 582, 583, 584, 695, 698

In addition to the core classes, students are required to complete 12 units of electives. These courses are to be selected after consultation with the graduate advisor. A maximum of 6 units may be taken from 300 or 400-level courses in Criminal Justice designated with a * in the *CSULB Catalog*. Undergraduate courses that are not designed with a * may not be applied toward the master's degree. No more than six units of CRIM 599 can be taken. Up to six units of graduate work may be transferred from another accredited university or another department in CSULB. Transfer credit must be a "B" or better. All students must earn a grade of "A" or "B" for each required course. Students may not have more than 6 units of "C" grades apply toward the master's degree. Advancement to candidacy is necessary before Thesis I or Thesis II can be taken.

Thesis or Project

The thesis or project is a supervised experience in the application of theory and analytical tools to an issue in criminology or criminal justice. The thesis should prepare students for further graduate work or research in the field. The project should provide an experience that is directly applicable to an occupation in the criminal justice field.

The thesis is a written product of the systematic study of a significant problem. It clearly identifies the problem, states the major assumptions, explains the significance of the undertaking, sets forth the sources for and methods of gathering information, analyzes the data, and offers a conclusion or recommendations. The finished product evidences originality, critical and independent thinking, appropriate organization and format, and thorough documentation. The coursework is supervised by a committee of three, including the Thesis Chair, who must be a full-time tenure-track or tenured faculty member in the Criminal Justice Department and two other faculty members.

The project is a significant undertaking appropriate to the professional field. It evidences originality and independent thinking, appropriate form and organization, and a rationale. It is described and summarized in a written report that includes the project's significance, a review of the literature, objectives, methodology, and a conclusion or recommendations. The finished product evidences originality, critical and independent thinking, appropriate organization and format, and thorough documentation. The coursework is supervised by a committee of three, including the Project Chair, who must be a full-time tenure-track or tenured faculty member in the Criminal Justice Department and two other faculty members.

Courses (CRIM)

Lower Division

101. The Criminal Justice System in Society (3)

Prerequisites/Corequisites: One of the foundation courses (may be taken concurrently). Introduction to the study of criminal justice as a social institution in American society. History and philosophy of the criminal justice system; survey of theories of crime, punishment and rehabilitation; study of ethical issues in social control. The functions and role expectations of the criminal justice system will be explored. Interaction between the citizen and the components of the system will be examined. (CAN AJ2) Letter grade only (A-F).

151. Introduction to Criminal Law (3)

Prerequisite: CRIM 101. Historical development and current application of criminal law and related constitutional provisions. Focus is on major crimes against the person and against property. Capacity to commit crimes and affirmative defenses are also covered.

Upper Division

301. Contemporary Issues in Criminal Justice (3)

Prerequisite/Corequisite: CRIM 101. Criminal Justice studied as a total interacting system: police, corrections, probation and the judiciary. Special emphasis is placed on current issues and problems.

302. Communication for Criminal Justice (3)

Prerequisites: ENGL 100; upper division standing; open only to Criminal Justice majors. Written communication principles and practice in the criminal justice profession.

303. Statistics for Criminal Justice Administrators (3)

Prerequisite/Corequisite: CRIM 101. This course will explore statistical procedures used for the analysis of data by criminal justice administrators in decision-making situations. Emphasis is placed upon understanding and satisfying the restrictions placed upon the most commonly used statistical procedures, descriptive as well as inferential. A discussion of frequently used statistical programs for the computer analysis of data will also be covered, including a "hands-on" approach to computer applications. Letter grade only (A-F).

*305. Ethical Concerns in Criminal Justice (3)

Identifies and explores ethics, values definitions and applications in the criminal justice system: police, courts, probation, parole, corrections, and private security organizations. Discusses remedial strategies and behavior relating to unethical behavior from an individual and group perspective.

325. Police Administration (3)

Program approach to the study of police administration. Overview of administration of the police function in the United States. Organization, management and operation of policing agencies.

331. Security and the Criminal Justice System (3)

Prerequisite/Corequisite: CRIM 101. A study of the differences in the theoretical and actual associations between security functions and the criminal justice system. Major topics that are explored include the historical and contemporary relationship between private security and sworn law enforcement, institutional culture, terrorism, computer technology, forensics and physical/operational security. Letter grade only (A-F).

351. Adjudication Process in Criminal Justice (3)

Prerequisite/Corequisite: CRIM 101. Topics related to the adjudication process in criminal cases are covered including: arraignments and preliminary hearings; suppression hearings; sanity hearings; trials; sentencing in capital and non-capital cases; juvenile court proceedings; and revocation of probation and parole. Civil Rights Act cases and other civil suits involving criminal justice personnel are discussed. Letter grade only (A-F).

356. Legal Aspects of Corrections (3)

An overview of court decisions related to corrections. Study of current legal issues and their impact on adult and juvenile procedures.

*359. Substance Abuse and the Criminal Justice System (3)

An examination of substance abuse. Consideration of the social and psychological factors related to alcohol and drug use, abuse and addiction. Concentration on the legal and social elements of substance abuse and their relationship to the criminal justice system; characteristics and categories of various controlled substances; categories of drug offenses; and investigation of drug cases.

361. Criminal Investigation (3)

The study of basic principles in criminal investigation. Analysis of current investigative techniques, patterns and modus operandi, interviewing and interrogation strategies, collection and management of evidence, surveillance, and crime scene investigation. Course will also cover theories, philosophies, and concepts related to prevention and suppression of crime.

369. Correctional Environments (3)

An introduction to the history and current practice of American penology. A first-hand examination of penal institutions and correctional facilities including county, state and federal facilities. It also includes the Department of Children Services (foster care, county, and private facilities), juvenile halls and court, and the California Youth Authority. Field trips will be required. Course fee may be required.

404. Theories of Crime Causation, Prevention and Control (3)

Prerequisite/Corequisite: CRIM 101. This course explores the theories and policy implications of crime in our society. The political, social, and economic environment in our society will serve as the context for the exploration of the etiology of criminal behavior. The underpinnings of criminological theory will be traced through history by focusing on its connection to biology, psychology, and sociology. Letter grade only (A-F).

405. Job Stress and the Criminal Justice System (3)

Theoretical foundations of stress based on current research findings with emphasis on individual assessment, signs and symptoms, causes and effects. In addition, specific stress management skills such as relaxation, meditation, self hypnosis, pain control, biofeedback, nutrition, and exercise will be covered. Not available to students with credit in CRIM 499: Job Stress and the Criminal Justice System.

420./520. Criminal Justice Information and Technology (3)

An examination of the use of computers and technology in the administration of criminal justice. This seminar focuses on current technology. This seminar will focus on a computer desktop mapping geographical information system (GIS) software that utilizes database information to conduct spatial, frequency, and time analysis of crime. The basic approach of this seminar will be to explore procedures that can be used to collect, manage, analyze, and display crime information as a map, chart, or table. Also, a review of the internet and various websites will be utilized to identify data sources, e.g., census, crime, other. Graduate students will be expected to complete two rather than one project. Grades for these projects are weighted differently for graduate students than undergraduate students. Letter grade only (A-F).

421. Contemporary Issues in Law Enforcement (3)

An examination of various timely law enforcement related subjects including policy and procedures; recruitment of women and minorities; mob and riot activities; hate crimes; ethics and ethical training; administrative and management strategies; special assignments and units; organized crime; task forces; and community policing.

424. Theories of Complex Criminal Justice Organizations (3)

Theories, concepts, issues and applications of administrative and management styles within various criminal justice organizations. Emphasis on various organizational systems, leadership approaches, the organizational culture, occupational socialization; recruitment and retention, communications, change and adaptiveness, and motivation of organizational members.

***451. Search and Seizure, Confessions and Evidence (3)**
A study of criminal procedures mandated by the U.S. Constitution with emphasis on search and seizure, confessions, and the right to counsel. Course also covers evidentiary rules that must be employed to introduce testimony and physical evidence in a court proceeding. Not available for students with credit in CRIM 353.

468. Correctional Systems (3)
Prerequisite/Corequisite: CRIM 101. Historical and philosophical development of societal reactions to law violators. Overview of the two major components of the correctional system: institutional and community corrections. Examination of the differing types of penal institutions and an evaluation of rehabilitation as a crime control strategy. Probation, parole, and other alternatives to incarceration will be explored as practical criminal sanctions. Field trips may be required. Letter grade only (A-F).

***470. Probation, Parole and Community Corrections (3)**
Historical and philosophic overview of community corrections. The focus is on probation and parole as well as wide range of intermediate sanctions and community treatment options. Community corrections will be examined from both punishment and treatment model perspectives. The process and components of the presentence investigation (PSI) will be analyzed. Supervision of the offender in the community will be explored as well as the revocation process. Field trips may be required.

***477. Correctional Counseling (3)**
Theories and techniques of counseling utilized by correctional workers. Evaluation of the effectiveness of correctional treatment. Various correctional counseling and crisis intervention strategies will be examined including reality therapy, behavior modification, group counseling, and 12-step programs. Special areas of correctional treatment such as substance abuse, mental illness, sex offenders, and the elderly will be considered.

480. Introduction to Research Methods in Criminal Justice (3)
Prerequisite/Corequisite: CRIM 101. Introduction to basic techniques in criminal justice research including library research, report writing, research design models, sampling techniques, questionnaire construction, interview techniques and participant observation. Letter grade only (A-F).

***482. Crime, Criminal Justice Systems and the Political Process (3)**
This course explores the impact of politics on the criminal justice system. The social, historical, economic, and political forces that shape policies in criminal justice are explored. A critical analysis of the legal structure, police, courts and corrections is used to examine the efficacy, fairness and quality of justice in our society. This lecture course is designed to promote and develop critical thinking skills.

483. Enforcement Systems (3)
Prerequisite/Corequisite: CRIM 101. Historical tracing of modern American policing from its ancient and Anglo-Saxon roots. Examination of police as a social institution and a control agent. Consideration of modern police patrol strategies; the contemporary role of the police officer; training procedures; ethical standards; women and minority officers; discretion; and corruption in police agencies. Letter grade only (A-F).

484. Comparative Criminal Justice Systems (3)
Prerequisites: CRIM 101 or consent of instructor. Survey of nationwide and worldwide criminal justice philosophies and techniques. Evaluation of current major hypotheses. Review of recent developments and contributions by agencies and academic institutions. Review of current literature in the field. Letter grade only (A-F).

487. Juvenile Justice (3)
Theoretical foundations of delinquency causation. Historical tracing of the American juvenile justice system including the juvenile court and its jurisdiction. Police interaction with juveniles; treatment and correctional strategies for young offenders. Examination of prevention and treatment approaches.

490. Independent Study (1-3)
Prerequisite: Consent of instructor. Individual research and study approved by major professor.

***492. Criminal Justice Response to Domestic Violence (3)**
Domestic violence is studied as a phenomenon that impacts the criminal justice system. Spouse abuse, child abuse and elder abuse are studied. Strategies for criminal justice personnel handling these cases are stressed.

493. Computer Applications in Criminal Justice (3)
The course will focus on computer technology and its application to criminal justice. The use of data processing in training, research, field operations, supervision, and administration will be examined. Federal, state, local and private applications; issues concerning civil liberties; and bank security policy options are also discussed.

494. Criminal Justice and Gangs (3)
This course covers the multifaceted aspects of gangs, gang membership and identification. Subjects include historical, psychological, sociological, and economic rationales for gang involvement. Topics include origins, identification, causal factors, coping mechanisms, and remedial systematic approaches. Not open to students with credit in CRIM 499D.

***495. Internship (3)**
Prerequisite: Consent of instructor and CRIM 101. Supervised work experience in criminal justice agency in the immediate area. May be repeated to a maximum of 6 units. (Not open to employed criminal justice officials.)

499. Special Topics in Criminal Justice (3)
Prerequisite: Consent of instructor. Topics of current interest in the field of criminal justice selected for intensive development. Topics are announced in the *Schedule of Classes*. May be repeated to a maximum of 9 units with different topics.

E. Readings in Criminology and Criminal Justice

Graduate Level

512. Seminar on Diversity and Criminal Justice Practices (3)
Study of the effect social, economic, and cultural diversity has on the development and implementation of criminal justice practices. Will include topics such as hate crimes, minority perceptions of crime, victim services, and cultural awareness. Letter grade only (A-F).

520./420. Criminal Justice Information and Technology (3)
An examination of the use of computers and technology in the administration of criminal justice. This seminar will focus on computer desktop mapping geographical information system (GIS) software that utilizes database information to conduct spatial, frequency, and time analysis of crime. The basic approach of this seminar explores procedures that can be used to collect, manage, analyze, and display crime information on a map, chart, or table. Also, a review of the internet and various websites will be utilized to identify data sources, e.g., census, crime. Graduate students will be expected to complete two rather than one project. Grades for these projects are weighted differently for graduate students than undergraduate students. Letter grade only (A-F).

551. Legal Issues in Criminal Justice (3)
Prerequisite: Permission of Graduate Advisor. Key legal issues involved in the criminal justice system are discussed with the aim of developing feasible solutions to problem areas: arrest, search and seizure, confessions; pre-trial court procedures; mental health issues; Exclusionary Rule; role of judge, prosecutor and defense attorney; trial procedure; jury system; sentencing; prisoner rights; civil cases against criminal justice personnel and civil forfeiture proceedings. Letter grade only (A-F).

581. Theories of Crime Causation and Prevention (3)
Relationship and interaction between social structure and crime. Investigation into the classical and behavioral theories of crime and crime prevention. Letter grade only (A-F).

- 582. Advanced Statistics for Criminal Justice Research (3)**
Prerequisites: One undergraduate social science statistics and research methods course. Statistical inference in normally distributed populations. Regression and multivariate analysis of research data. Utilization of non-parametric statistics. (Lecture 3 hours). Letter grade only (A-F).
- 583. Research Methodology (3)**
Prerequisites: One undergraduate research and statistics course. Scientific method of research; variations in research design and methodology; application of research findings to problem solution. Not available to students with credit in CRIM 696. Letter grade only (A-F).
- 584. Professional Literature (3)**
Critical analysis and comparative review of professional literature in criminal justice practice, theory, and research. Will include topics of components of research publications; substantive content of articles; library/online searches; critiques of the literature, citations, reference styles, and literature reviews. Required core course. Not available for students with credit in CRIM 691. Letter grade only (A-F).
- 590. Independent Study (1-3)**
Prerequisite: Consent of instructor. Individual research and study approved by graduate advisor. Letter grade only (A-F).
- 599. Special Topics in Criminal Justice (3)**
Group investigation of selected topics in criminal justice. Topics to be announced in the *Schedule of Classes*. May be repeated to a maximum of 6 units. Letter grade only (A-F).
- 621. Seminar on the Administration and Management of Criminal Justice Organizations (3)**
Study of criminal justice policy development and implementation; administrative theory and issues; problems and current agency activities. Letter grade only (A-F).
- 623. Seminar in Comparative Criminal Justice Administration (3)**
Advanced study of the theories, philosophies and techniques of criminal justice worldwide and nationwide. Intensive review of the literature, recent developments, and individual research. Letter grade only (A-F).
- 624. Crime and Public Policy (3)**
Intensive study of problem areas in crime and justice. Will include topics of control and prevention of crime in urban settings; changing law enforcement and correctional policies; philosophy of law; inter-agency relationships. Letter grade only (A-F).
- 630. Seminar on Organized Crime (3)**
Historical development of organized crime and various techniques used to control this form of criminality. Detailed consideration of the political, social and economic conditions of its evolution. Not available to students with credit in CRIM 599 on the topic "Organized Crime." Letter grade only (A-F).
- 640. Seminar on Police Organization and Management (3)**
Leadership theories, practices, issues, and trends in managing police organization. Thematic areas of focus are: values, ethics, teambuilding, empowerment, politics, Community Oriented policing, and future forecasting. Letter grade only (A-F).
- 641. Seminar in Correctional Policy and Administration (3)**
Study of the history, development, and implementation of correctional programs. Analysis of the theories, philosophies, concepts and issues related to the administration and management of prisons, probation, and parole. Letter grade only (A-F).
- 650. Seminar in Juvenile Justice (3)**
Study of juvenile justice programs administered by the police, court, and correctional agencies; analysis of theories of delinquency causation and prevention; current issues. Letter grade only (A-F).
- 695. Thesis or Project I (3)**
Prerequisite: Advancement to Candidacy. Student works under direct faculty supervision to complete a proposal for the research study or project. Comprehensive review of the literature on a topic and development of appropriate methodology. For project option student must obtain agency approval and agreement. Letter grade only (A-F).
- 697. Directed Research (3)**
Extensive independent research on assigned topics addressing theoretical criminology and synthesis of literature on current issues in criminal justice. Work produced in CRIM 697 will be presented in CRIM 699. Not available to students in thesis option. Letter grade only (A-F).
- 698. Thesis or Project II (1-4)**
Prerequisite: CRIM 695. For thesis option, student conducts research and data analysis to complete thesis. For project option, student documents progress in project design and implementation. Letter grade only (A-F).
- 699. Integrated Analysis of Criminal Justice (3)**
Prerequisite: CRIM 697. Integration and synthesis of key concepts and issues related to the administration of criminal justice. Project is required. Not available to students in thesis option. Letter grade only (A-F).

Students desiring information should contact the department office for an appointment with the advisor.

Comparative World Literature is the study of foreign literatures in translation and the relationships among those literatures and between literature and other fields such as art, music, history, philosophy, and theatre. At CSULB, Comparative World Literature also offers a strong focus in cultural studies and mythology as bases for understanding literature and for the ways we see ourselves in a multicultural environment. Suggested preparation: course work in world literature, history, English composition, and foreign language.

Classics includes the studies of ancient Greek, Latin, and classical literature, archaeology, mythology and civilizations, and their influence on later eras. Suggested preparation: course work in Latin, Greek, and classical history, art and literature.

Bachelor of Arts in Comparative World Literature (code C/LTBA01) (120 units)

The Bachelor of Arts in Comparative World Literature consists of the Core of 24 units and one of the three emphases that follow.

The Core

24 units, required of every major, distributed as follows:

1. CWL 330A AND 330B.
2. *Genre*. At least one of the following: CWL 346, 405, 440, 4221*, 4511*, 453, CLSC 4211*.
3. *Author*. At least one of the following: CWL 430, 449.
4. *Non-Western or Mythology*. At least one of the following: CWL 334, 336, 342*, 350, 402, 403, 440, 445, 452.
5. *Theory*. At least one of the following: CWL 361, 461.
6. *Literary Movement or Comparative Study*. At least one of the following: CWL 310I*, 312I*, 349, 404, 406, 410, 448.
7. *European Period*. At least one of the following: CWL 431, 432, 437, 438.

Note: CWL 440 may be used in both groups 2 and 4 with appropriate different topics.

Courses denoted by an asterisk (*) may be used to satisfy Core requirements with the approval of the course instructor and completion of supplementary work.

Emphasis I: Language and Literature

The traditional undergraduate major in comparative world literature, designed to prepare the student for graduate study in comparative world literature or related fields.

Requirements

1. *The 24 Unit Core*
2. *The First Concentration*. 12 upper division units in one foreign language, six of which must be in literature classes. If a language is chosen which offers a limited number of courses, some lower division units will suffice, but they must be, as a minimum, the equivalent of four semesters of college study.

3. *The Second Concentration*. 12 upper division units in any one of the following areas: American Indian Studies, Art History, Asian Studies, Asian American Studies, Black Studies, Chicano and Latino Studies, Classics, English Literature, English-Option in Creative Writing, film studies, History, music history, Philosophy, Religious Studies, Theatre Arts, Women's Studies, or a second foreign language.

If the concentration is in American Indian Studies, Asian Studies, Asian American Studies, Black Studies, Chicano and Latino Studies, English-Option in Creative Writing, Theatre Arts, Women's Studies, or a second foreign language area, 6 of the units must be in literature courses. If the concentration is in Theatre Arts, Women's Studies or film studies, appropriate courses may be chosen from any department offering such courses, including Comparative World Literature and Classics.

Emphasis II: World Literature

This emphasis offers a broad background in world literature in translation with a strong concentration in one specific related field. It is also appropriate for the student who elects the comparative world literature teaching option of the English Single Subject Credential program.

Requirements

1. *The 24 Unit Core*.
2. *The Concentration*. 18 upper division units in one of the following areas: American Indian Studies, Art History, Asian Studies, Asian American Studies, Black Studies, Chicano and Latino Studies, Classics, English Literature, English-Option in Creative Writing, English-Option in English Education (Comparative Literature Emphasis), film studies, History, music history, Philosophy, Religious Studies, Theatre Arts, Women's Studies, or a single foreign language.

If the concentration is in American Indian Studies, Asian Studies, Asian American Studies, Black Studies, Chicano and Latino Studies, English-Option in Creative Writing, Theatre Arts, Women's Studies, or a foreign language area, at least 9 of the units must be in literature courses. If the concentration is in an ethnic studies area, Women's Studies, Theatre Arts or film studies, appropriate courses may be chosen from any department offering such courses, including Comparative World Literature and Classics. Students taking the English-Option in English Education must take the 35 unit English Education core and must consult with an English education advisor as well as a Comparative World Literature advisor.

Foreign Language Requirement. Reading proficiency in a foreign language is required. Proficiency may be certified by examination or by successful completion of four semesters of college study of the foreign language, or equivalent. Consult a department advisor.

FAQ Concerning Road Maps for Completion of Undergraduate Degrees

For each undergraduate major, the on-line Catalog shows plans for scheduling all required courses to complete the degree in four, five, or six years.

While CSULB will make every effort to schedule classes at the times shown in the plans, we cannot guarantee that courses will be available in specific semesters. It is possible that shortage or budget or of personnel will make it impossible to offer as many classes as we would wish.

The plans are not substitutes for working with an advisor. You are strongly encouraged to see an advisor when planning your program each term.

I am a freshman. Do I have to choose now whether to follow the four, five, or six-year plan?

No. Most freshmen take 12-15 units. You need at least 12 units to receive full financial aid. With experience, you will be able to judge how heavy a load you find comfortable. This will depend on your outside obligations, such as a job, and on your personal circumstances. In theory, each unit requires three hours a week, including preparing for class, attending class, and completing assignments. Use these guidelines to budget your time and plan an appropriate schedule.

Must I take the courses in the semesters shown on the plan?

The plan shows one possible way of completing all requirements for the degree. Consult your advisor about whether it is essential to take a given course in the semester shown. There are some rules to keep in mind:

1) You can take the General Education Foundation courses (Composition, Oral Communication, Critical Thinking, Mathematics) in any semester in the first 36 units of baccalaureate-level course work completed at CSULB.

2) You cannot take upper division courses until you have completed at least 30 units. (Exceptions can be made for students who already have completed advanced study in the subject.) You cannot take General Education Capstone courses until you have completed at least 60 units.

3) For some majors it is essential to complete courses in the correct sequence. You cannot take a more advanced course until you have completed the prerequisite course(s).

4) You must complete all requirements for admission to impacted majors within the first 60 units.

I have been told that I must take one or more pre-baccalaureate courses. How can I plan my program?

Your advisor at SOAR can help you identify which courses must be postponed. You must still complete the minimum number of baccalaureate units required for the degree.

You may be able to catch up by taking additional courses in later semesters or by taking classes in summer or winter session, or you may choose to spend an additional semester completing the program. You cannot begin the sequence of required courses for some majors until you are ready for baccalaureate-level Mathematics. See your major advisor to develop a plan for scheduling the required courses.

I didn't complete the exact list of courses shown. Can I still graduate on time?

The answer depends on your major and on what courses you have completed. The plans are not rigid requirements: they are only intended to provide guidance in planning a program. There are many reasons for students to follow a different pattern, such as changing the major, choosing to take fewer classes in a given semester, choosing to complete a minor or a second major. See your advisor for help in planning a program that will work for you.

If I follow the plan, will I have all requirements for graduation completed?

The plans include the specific courses required for the major. For some majors, there are restrictions on the choice of major electives. It is important that you select General Education courses to meet the required distribution pattern. You may need to take an additional General Education course to complete the minimum number of units required for each category. This is likely to happen if you took three-unit courses in Category B, Physical Universe.

Emphasis III: Cultural Studies

Cultural Studies is the interdisciplinary and multicultural study of literary and other forms of cultural expression analyzed within their social and historical contexts. This emphasis is designed for students wishing to concentrate in cultural studies firmly grounded in literary study. It provides for an interdisciplinary pattern of courses in cultural studies drawn from various disciplines with the approval of a faculty committee.

Requirements

1. *The 24 Unit Core.*
2. *The Cultural Studies Concentration.* 18 upper division units in appropriate cultural studies courses, approved by a faculty committee and drawn from the following departments or areas: American Indian Studies, Anthropology, Art History, Asian and Asian American Studies, Black Studies, Chicano and Latino Studies, Classics, Dance, English, Film and Electronic Arts, History, Romance, German, Russian Languages and Literatures, Women's Studies, or other appropriate departments and areas of study. The faculty committee shall consist of the Chair of the Department of Comparative World Literature and Classics and one additional full time faculty member in Comparative World Literature. Students are strongly encouraged to select a faculty committee and have their pattern of course work approved by the beginning of the junior year, but it must be approved by the beginning of the senior year.

Foreign Language Requirement: Basic reading knowledge of one foreign language is required. It may be certified by examination or by successful completion of two semesters of college study, or the equivalent. Consult a department advisor.

FOUR YEAR PLAN TO COMPLETE THE B.A. in COMPARATIVE WORLD LITERATURE (CULTURAL STUDIES)(C/LTBA01)

120 units required Department of Comparative Literature and Classics

Minor in Comparative World Literature (code C/LTUM01)

In addition to the bachelor of arts degree, the Department offers a minor in comparative world literature. The minor provides a flexible program for the student who is majoring in another discipline, but who is interested in comparative world literature either for professional advantages or for intellectual enrichment.

Requirements

A minimum of 18 units in comparative world literature, of which at least 12 are upper division excluding CWL 499.

Comparative World Literature Courses (CWL)

Lower Division

100. World Literature (3)

Prerequisite/Corequisite: Any G.E. Foundation course. Readings in translation from masterpieces of world literature with emphasis on the technique and form of literary art as developed in various cultures.

101. Introduction to Comparative Literature (3)

Prerequisite/Corequisite: Any G.E. Foundation course. An introduction to the basics of literary interpretation and comparative literature. Strongly recommended for majors in Comparative World Literature.

103. Introduction to Comparative Asian Literature and Culture (3)

Prerequisite/Corequisite: Any G.E. Foundation course. Introduction to two major Asian cultures—India and China—through an exploration of their literatures, cultures, and diasporas. Focus will be on the modern period.

104. Literature and Culture of the Middle East (3)

Prerequisite/Corequisite: Any GE Foundation course. Introduction to the cultures of the Middle East and North Africa through an exploration of their literatures, with focus on some of the major figures of the twentieth and twenty-first centuries, such as Naguib Mahfouz, Ghassan Kanafani, Edward Said, and others. Letter grade only (A-F).

124. Introduction to World Theatre and Drama (3)

Prerequisite/Corequisite: Any G.E. Foundation course. Introduction to all aspects of theatre including criticism, dramatic literature, movements, themes, historical background and theatrical production from different parts of the world.

161. Reading the World (3)

Prerequisite/Corequisite: Completion or concurrent enrollment in ENGL 100 or equivalent. An introduction to contemporary theories of reading and interpretation in the humanities. Lectures and classroom discussion will examine various and diverse forms of human expression and critical understanding from around the world and across the disciplines while developing and refining a broad repertoire of reading tools and practices.

232. Folklore and Mythology (3)

Prerequisites: Completion of GE Foundation requirements. Introduction to the study of mythology and folklore in a global context, with an emphasis on their application in literature.

250. European Literature and the Other Arts I (3)

Prerequisites: Completion of GE Foundation requirements. Investigation of the interrelationships between the arts. Analysis of literary, fine art and music materials from ancient periods through the Middle Ages in regard to movements, techniques, philosophies and formal organization to achieve artistic expression.

251. European Literature and the Other Arts II (3)

Prerequisites: Completion of GE Foundation requirements. Interrelationships among the arts through analysis of literary, fine art, and music materials in the western world from the Renaissance to the present. Movements, techniques, philosophies and the formal organization necessary to achieve artistic expression will be examined.

Upper Division

General Education Category A must be completed prior to taking any upper division course except upper division language courses where students meet formal prerequisites and/or competency equivalent for advanced study.

310I. Greek World (3)

Prerequisites: Completion of GE Foundation requirements, one or more Explorations courses, and upper-division standing. An interdisciplinary examination of major events and ideas in the society and culture of ancient Greece with an emphasis on literature, the arts, and the historical forces at work. Topics include the foundations of Greek culture, Minoan civilization, Homer and the Trojan War, mythology and religion, lyric poetry, the Persian Wars, the "Golden Age" of Athens, the Peloponnesian War, Hellenistic culture and the contributions of the Greeks to the modern world. Same course as HIST 310I.

312I. Roman World (3)

Prerequisites: Completion of GE Foundation requirements, one or more Explorations courses, and upper-division standing. An interdisciplinary examination of major events and ideas in the society and culture of ancient Rome with an emphasis on literature, the arts, and the historical forces at work. Topics include genesis and growth of the Roman world, transition from Republic to Empire, Imperial maturity, decay and decline, and the contributions of the Romans to the modern world. Same course as HIST 312I.

320I. Comic Spirit (3)

Prerequisites: Completion of GE Foundation requirements, one or more Explorations courses, and upper-division standing. An investigation of comedy as a literary genre and of the manifestation of the comic spirit in related art forms such as music, art, and film. Examination is given to the history of comedy as well as to theories of the causes and effects of laughter.

324I. Theatre Today (3)

Prerequisites: Completion of the G.E. Foundation, one or more Explorations courses, and upper-division standing. This course examines current trends, achievements and problems in contemporary western theatre and dramatic literature. Particular attention will be paid to multicultural expression in the theatre. Same course as THEA 324I.

330A,B. Masterpieces of European Literature (3,3)

Prerequisite: One course in literature or consent of instructor. Representative selections, in translation, of European texts to and since the Renaissance, and their relation to the development of Western civilization.

334. Introduction to East Asian Literatures and Cultures (3)

Prerequisites: Completion of GE Foundation requirements. A comprehensive introduction to the comparative study of East Asian cultures through the reading of representative selections from the literatures of China, Korea, and Japan in historical context. Focus is on the modern period.

336. Introduction to Southeast Asian Literatures and Cultures (3)

Prerequisites: Completion of GE Foundation requirements. A survey of the traditional and modern literatures and cultures of Southeast Asia with a focus on the modern period.

342. The Bible as Literature (3)

Prerequisite: Completion of GE Foundation requirements. Reading of representative Biblical selections interpreted from a literary standpoint.

344. Literature of the Holocaust (3)

Prerequisites: One course in literature or consent of instructor. Intensive study of literary works of different genres and cultural backgrounds, from 1945 to the present, to analyze the strategies writers use to present the historical events and the cultural reverberations of the Holocaust.

346. Readings in World Poetry (3)

Prerequisite: One course in literature or consent of instructor. Representative selections of the poetry of the world from the earliest examples to the present. Facing-page translations will be included.

349. Literary Movements (3)

Prerequisite: One course in literature or consent of instructor. Intensive study of a movement or theme in world literature. Specific movement or theme will be announced in the *Schedule of Classes*. May be repeated to a maximum of 9 units with different topics.

350. Global Literature in American Culture (3)

Prerequisites: Completion of the GE Foundation requirement, one or more Explorations courses, and upper-division standing. A comparative and thematic study of transnational literature of the emerging global culture as represented in various ethnic groups in modern America. The literature and culture of at least three distinct American ethnic groups will be examined in relation to contemporary trans-national themes and the literatures of the countries of origin.

361. Masterpieces of Literary Criticism (3)

Representative selections of literary theory from Plato to the present. Readings from each theory will be supplemented by applications to a specific literary text. Course will provide students with a broad historical background and the critical and practical tools to analyze a literary text.

402./502. Studies in Middle Eastern Literature and Culture (3)

Prerequisite: One course in literature or consent of instructor. Study of specific authors, themes, genres, movements, or aspects of literature and culture in the Middle East or between the Middle East and the West. Topics to be announced in the *Schedule of Classes*. May be repeated to a maximum of 6 units with different topics.

403./503. Studies in Asian Literature (3)

Prerequisite: One course in literature or consent of instructor. Interrelationships of two or more authors, themes, genres, movements or aspects of literature and culture in Asia or between Asia and the West. Topics to be announced in the *Schedule of Classes*. May be repeated to a maximum of 9 units with different topics.

404./504. Women in World Literature (3)

Prerequisite: One course in literature or consent of instructor. Study of the role of women in world literature. Specific movement, area, or theme will be announced in the *Schedule of Classes*. May be repeated to a maximum of 6 units with different topics.

Comparative World Literature Courses (CWL)

405./505. The Modern Confessional Novel (3)

Prerequisite: One course in literature or consent of instructor. A comparative analysis of the thematic and structural characteristics of the confessional novel in the 19th and 20th centuries. Representative novels from Europe, Asia and Latin America are examined.

406./506. Studies in East European Literature and Culture (3)

Prerequisite: One course in literature or consent of instructor. Major movements, authors, and/or themes in Eastern European literature and culture (Slavic and non-Slavic) and/or relationship of East European literature and culture and Western Europe and North America. Topics to be announced in the *Schedule of Classes*. May be repeated to a maximum of 6 units with different topics.

410. Literature and Music (3)

Prerequisite: One course in literature or consent of instructor. An examination of the relationship between music and literature in the 19th and 20th centuries with emphasis placed on representative literary works and musical compositions that show mutual influences and common features and structures.

412I. Art and Literature (3)

Prerequisites: Completion of GE Foundation requirements, one or more Explorations courses, and upper-division standing. An interdisciplinary study of the dominant movements in art and literature during the 19th and 20th centuries, from Realism through Post-modernism. The course emphasizes comparative analysis of the styles, methods, and aesthetic principles characteristic of the various movements, focusing on the works of major artists, writers and theorists, and examines the social and historical context in which the movements developed.

414I. Medieval World (3)

Prerequisites: Completion of the G.E. Foundation, one or more Explorations courses, and upper-division standing. An interdisciplinary examination of major themes in medieval society and culture with emphasis on literature, the arts, and the historical forces at work. Topics will include the Roman heritage of the middle ages, pre/non-Christian culture, the so-called "dark ages," Romanesque and Gothic worlds, crusades and pilgrimages, commerce and cathedrals, and late medieval problems. Same course as HIST 414I.

415I. Ethnic Literature and Culture in America (3)

Prerequisites: Completion of the GE Foundation, one or more Explorations courses, and upper-division standing. A comparative, interdisciplinary study of multicultural literature along with issues of racism and ethnic discrimination. Two or more of the following ethnic groups will be studied: Native American, African American, Latino/Latina, Asian American. In addition, European American, Middle Eastern American or other ethnic groups may be studied. Recurrent themes in literature will be situated in their historical and sociopolitical context using print and media materials.

422I. Renaissance Theatre and Drama (3)

Prerequisites: Completion of GE Foundation requirements, one or more Explorations courses, and upper-division standing. An interdisciplinary study of the achievements, problems, themes and trends of Renaissance drama in Italy, Spain, France, and England between 1350 and 1650. Major plays of the period are read in translation, including works by Machiavelli, Tasso, Tirso de Molina, Lope de Vega, Calderon, and Shakespeare. Texts are treated both as literature and as theatre.

430./530. Dante (3)

Prerequisite: One course in literature or consent of instructor. A reading, in translation, of the major works of Dante, including the *Vita Nuova* and the *Divine Comedy*. Examination is also given to the comparative nature of Dante's work: his sources and his influence on later writers, artists, and composers.

431./531. Medieval Literature (3)

Prerequisite: One course in literature or consent of instructor. Representative selections, in translation, from writings of the medieval period, reflecting dominant ideas of the time.

432./532. Continental Renaissance Literature (3)

Prerequisite: One course in literature or consent of instructor. A comparative study of the major works of the chief non-dramatic authors of Renaissance Europe, including all or some of the following: Petrarch, Boccaccio, Lorenzo de' Medici, Machiavelli, Ariosto, Tasso, Ronsard, Rabelais, Erasmus, and Cervantes. Emphasis is also given to influences, trends, and contributions to the modern world.

437./537. Romantic Literature (3)

Prerequisite: One course in literature or consent of instructor. Representative selections in translation, from European writers of the Romantic period with an emphasis on a comparative study of works from Germany and France from about 1770-1850.

438./538. 20th Century European Literature (3)

Prerequisite: One course in literature or consent of instructor. Comparative study of continental European literature, in translation from 1900 to the present. Novelists studied include Kafka, Gide, Proust, Hesse, Moravia, Kazantzakis, and Mann; dramatists include Pirandello, Chekhov, Beckett, Sartre, and Camus. Movements include realism, naturalism, the development of the psychological novel, existentialism, and the theatre of the absurd.

440./540. Latin American Literary Studies (3)

Prerequisite: One course in literature or consent of instructor. A comparative study of major literary genres in Latin American literature in relation to the principal periods and movements of the Western literary tradition. The genres for the semester will be announced in the *Schedule of Classes*. May be repeated to a maximum of 9 units with different topics.

445./545. American Folklore Studies (3)

Prerequisite: One course in literature or consent of instructor. Special topics in American folklore. Topics are chosen to provide a bridge between literary, aesthetic and specialized folkloristic studies of American culture. Special attention will be paid to European and Third World contributions to American folklore. Topics to be announced in the *Schedule of Classes*. May be repeated to a maximum of 9 units with different topics.

448./548. Comparative Studies (3)

Prerequisite: One course in literature or consent of instructor. Interrelationship of two or more disciplines, with emphasis on reciprocal influences and borrowing of materials during various literary periods. The class will feature a different interdisciplinary study each semester to be announced in the *Schedule of Classes*. May be repeated to a maximum of 9 units with different topics.

449./549. Critical Studies in Major Continental Writers (3)

Prerequisite: One course in literature or consent of instructor. Intensive and comparative study of one to three major continental authors. Authors to be studied will be announced in the *Schedule of Classes*. May be repeated to a maximum of 9 units with different topics.

451I. The Novel and the Motion Picture in Contemporary Society (3)

Prerequisites: Completion of GE Foundation requirements, one or more Explorations courses, and upper-division standing. Interdisciplinary study of two genres, with particular focus on novels made into films and on the aesthetic distinction of both forms as major genres in the 20th and 21st centuries.

452./552. Studies in Mythology (3)

Prerequisites: One course in literature or consent of instructor. Interrelation of two or more mythologies, mythological themes or theories of mythology. This class will feature a different area of an interdisciplinary or comparative nature in the study of mythology each semester, to be announced in the *Schedule of Classes*. May be repeated to a maximum of 9 units with different topics.

453./553. Fairy Tales (3)

Prerequisite: One course in literature or consent of instructor. An in-depth study of the fairy tale as a unique literary genre and art form. Class will investigate various theories as applied to the tales and identify psychological, religious, cultural, and alchemical patterns and symbols that reappear in fairy tales and manifest man's early realization of his identity and of the creative process.

461./561. Topics in Contemporary Literary Criticism (3)

Prerequisite: Two upper division literature courses or consent of instructor. An in-depth study of a particular critic or movement in contemporary literary theory. May be repeated to a maximum of 9 units with different topics.

492. Internship Program (1-3)

Prerequisites: Consent of instructor and department chair. Field work in literature related industries. Internships and other assignments directed by a supervising faculty member. May be repeated to a maximum of 6 units. Credit/No Credit grading only.

495. Genre (1-3)

Prerequisite: Consent of instructor. Production of the student journal, *Genre*, including editing, design, soliciting contributors, working with printer, desktop publishing, and financial management. Organizational meeting previous fall semester. Contact department office for information. May be repeated to a maximum of 9 units. Credit/No Credit grading only.

499. Directed Studies (1-4)

Prerequisite: Consent of instructor. Independent study of special topics under supervision of a faculty member. May be repeated to a maximum of 6 units with consent of department.

Graduate Level**501. Advanced Interdisciplinary Study (3)**

Intensive study of the theories and methods of comparing and interrelating literature with other disciplines such as various areas among the fine arts, the social sciences and the sciences. Course will involve independent research. Letter grade only (A-F).

502./402. Studies in Middle Eastern Literature and Culture (3)

Prerequisite: One course in literature or consent of instructor. Study of specific authors, themes, genres, movements, or aspects of literature and culture in the Middle East or between the Middle East and the West. Topics to be announced in the schedule of classes. May be repeated to a maximum of 6 units with different topics.

503./403. Studies in Asian Literature (3)

Prerequisite: One course in literature or consent of instructor. Interrelationships of two or more authors, themes, genres, movements or aspects of literature and culture in Asia or between Asia and the West. Topics to be announced in the *Schedule of Classes*. May be repeated to a maximum of 9 units with different topics.

504./404. Women in World Literature (3)

Prerequisite: One course in literature or consent of instructor. Study of the role of women in world literature. Specific movement, area, or theme will be announced in the *Schedule of Classes*. May be repeated to a maximum of 6 units with different topics.

505./405. The Modern Confessional Novel (3)

Prerequisite: One course in literature or consent of instructor. A comparative analysis of the thematic and structural characteristics of the confessional novel in the 19th and 20th centuries. Representative novels from Europe, Asia and Latin America are examined. Letter grade only (A-F).

506./406. Studies in East European Literature and Culture (3)

Prerequisite: One course in literature or consent of the instructor. Major movements, authors, and/or themes in Eastern European literature and culture (Slavic and non-Slavic) and/or relationship of East European literature and culture and Western Europe and North America. Topics to be announced in the *Schedule of Classes*. May be repeated to a maximum of 6 units with different topics. Letter grade only (A-F).

530./430. Dante (3)

Prerequisite: One course in literature or consent of instructor. A reading, in translation, of the major works of Dante, including the *Vita Nuova* and the *Divine Comedy*. Examination is also given to the comparative nature of Dante's work: his sources and his influence on later writers, artists, and composers. Letter grade only (A-F).

531./431. Medieval Literature (3)

Prerequisite: One course in literature or consent of instructor. Representative selections, in translation, from writings of the medieval period, reflecting dominant ideas of the time. Letter grade only (A-F).

532./432. Continental Renaissance Literature (3)

Prerequisite: One course in literature or consent of instructor. A comparative study of the major works of the chief non-dramatic authors of Renaissance Europe, including all or some of the following: Petrarch, Boccaccio, Lorenzo de' Medici, Machiavelli, Ariosto, Tasso, Ronsard, Rabelais, Erasmus, and Cervantes. Emphasis is also given to influences, trends, and contributions to the modern world. Letter grade only (A-F).

537./437. Romantic Literature (3)

Prerequisite: One course in literature or consent of instructor. Representative selections in translation from European writers of the Romantic period with an emphasis on a comparative study of works from Germany and France from about 1770-1850.

538./438. 20th Century European Literature (3)

Prerequisite: One course in literature or consent of instructor. Comparative study of continental European literature, in translation from 1900 to the present. Novelists studied include Kafka, Gide, Proust, Hesse, Moravia, Kazantzakis, and Mann; dramatists include Pirandello, Chekhov, Beckett, Sartre, and Camus. Movements include realism, naturalism, the development of the psychological novel, existentialism, and the theatre of the absurd. Letter grade only (A-F).

540./440. Latin American Literary Studies (3)

Prerequisite: One course in literature or consent of instructor. A comparative study of major literary genres in Latin American literature in relation to the principal periods and movements of the Western literary tradition. The genres for the semester will be announced in the *Schedule of Classes*. May be repeated to a maximum of 9 units with different topics. Letter grade only (A-F).

545./445. American Folklore Studies (3)

Prerequisite: One course in literature or consent of instructor. Special topics in American folklore. Topics are chosen to provide a bridge between literary, aesthetic and specialized folkloristic studies of American culture. Special attention will be paid to European and Third World contributions to American folklore. Topics to be announced in the *Schedule of Classes*. May be repeated to a maximum of 9 units with different topics.

548./448. Comparative Studies (3)

Prerequisite: One course in literature or consent of instructor. Interrelationship of two or more disciplines, with emphasis on reciprocal influences and borrowing of materials during various literary periods. The class will feature a different interdisciplinary study each semester to be announced in the *Schedule of Classes*. May be repeated to a maximum of 9 units with different topics. Letter grade only (A-F).

549./449. Critical Studies in Major Continental Writers (3)

Prerequisite: One course in literature or consent of instructor. Intensive and comparative study of one to three major continental authors. Authors to be studied will be announced in the *Schedule of Classes*. May be repeated to maximum of 9 units with different topics. Letter grade only (A-F).

550. Topics in Comparative World Literature (3)

Prerequisite: CWL 501 or consent of instructor. Special studies of movements, figures and relationships in world literature; or between world literature and other disciplines. Topics to be announced in the *Schedule of Classes*. May be repeated to a maximum of 9 units with different topics. Letter grade only (A-F).

552./452. Studies in Mythology (3)

Prerequisites: One course in literature or consent of instructor. Interrelation of two or more mythologies, mythological themes or theories of mythology. This class will feature a different area of an interdisciplinary or comparative nature in the study of mythology each semester, to be announced in the *Schedule of Classes*. May be repeated to a maximum of 9 units with different topics. Letter grade only (A-F).

Comparative World Literature Courses (CWL)

553./453. Fairy Tales (3)

Prerequisite: One course in literature or consent of instructor. An in-depth study of the fairy tale as a unique literary genre and art form. Class will investigate various theories as applied to the tales and identify psychological, religious, cultural, and alchemical patterns and symbols that reappear in fairy tales and manifest man's early realization of his identity and of the creative process. Letter grade only (A-F).

561./461. Topics in Contemporary Literary Criticism (3)

Prerequisite: Two upper division literature courses or consent of instructor. An in-depth study of a particular critic or movement in contemporary literary theory. May be repeated to a maximum of 9 units with different topics.

CLASSICS

Classics includes the study of the languages, the literatures and the civilizations of the ancient Greeks and Romans and the peoples with whom they had contact. The Department of Comparative World Literature and Classics offers the Bachelor of Arts in Classics and minors in Classical Studies, Latin, and Greek. Within the Classics major two options are offered, Roman Civilization and Greek Civilization.

Classics, along with rhetoric, made up undergraduate education in Europe and the Americas from the Renaissance to the late nineteenth century. Today classical studies remains a practical liberal arts major for developing critical thinking skills, for understanding the core of Western civilization, for developing facility with English, and for cultivating aesthetic and moral sensitivity. Classics majors are often successful in law, government service, business, secondary and elementary education, library science and medicine. Students interested in graduate school in either Classics or Classical Archaeology should consult with the departmental advisor as early as possible in their academic careers.

The department recommends that some time be spent in either Italy or Greece on one of the many programs designed to familiarize students with the physical remains of these civilizations (College Year at Athens, the American School of Classical Studies at Athens, the Aegean Institute, the Intercollegiate Center for Classical Studies in Rome, etc.). Courses at one of these institutions may be substituted for CSULB courses with departmental approval.

Bachelor of Arts in Classics (120 units)

Option in Roman Civilization (code CLSCBA01)

Requirements

41-43 units with a minimum of 21 upper division units (excluding LAT 321)

1. Elementary Latin - 6-8 units selected from the following: LAT 101A and 101B (8) or LAT 321 (6).

The requirements in this category may be met by high school equivalents, but total units must still equal 41.

2. Upper Division Latin – 12 units selected from the following: LAT 301, 401, 402, 403, 404, 405, 406, 407, 408, 409, 410A, 410B, 410C, 490.

3. Classics 202.

4. Classics Courses – 12 units selected from the following: CLSC 110, 100, 135, 191, 310I, 410I, 421I, 440, 490, CWL 312I.

5. Courses in Antiquity – A minimum of 8 units selected from the following: GK 101A, 101B; AH 408, 417; CLSC 330I; COMM 300; CWL 452**; HIST 131, 314, 318; PHIL 490**; POSC 301; R/ST 471I.

** with topic appropriate to ancient Roman studies and approval of advisor.

The Department also recommends CWL 232.

FOUR YEAR PLAN TO COMPLETE THE B.A. DEGREE in CLASSICS (ROMAN) (CLSCBA01)

*Some of the major electives can be used for GE/Interdisciplinary Capstone and major requirements - see advisor

Option in Greek Civilization (code CLSCBA02)

Requirements

43 total units with a minimum of 21 upper division units:

1. Elementary Greek - 8 units: GK 101A, 101B.
2. Upper Division Greek – 12 units selected from the following: GK 301A, 301B, 351, 352, 490.
3. Classics 201.
4. Additional Classics Courses – 12 units selected from the following: CLSC 110, 100, 135, 191, 310I, 410I, 421I, 430, 490; CWL 310I*
*The Department strongly recommends that this course be taken in Greece during the winter session.
5. Courses in Antiquity – A minimum of 8 units selected from the following: LAT 101A, 101B, 321; AH 408, 416; CLSC 330I; COMM 300; CWL 452**; HIST 131, 313, 318; PHIL 421, 422, 490**; POSC 301; R/ST 471I.
**With topic appropriate to ancient Greek studies and approval of advisor.

"I" capstone courses are chosen, it/they may count for GE and major requirements

FAQ Concerning Road Maps for Completion of Undergraduate Degrees

For each undergraduate major, the on-line Catalog shows plans for scheduling all required courses to complete the degree in four, five, or six years.

While CSULB will make every effort to schedule classes at the times shown in the plans, we cannot guarantee that courses will be available in specific semesters. It is possible that shortage or budget or of personnel will make it impossible to offer as many classes as we would wish.

The plans are not substitutes for working with an advisor. You are strongly encouraged to see an advisor when planning your program each term.

I am a freshman. Do I have to choose now whether to follow the four, five, or six-year plan?

No. Most freshmen take 12-15 units. You need at least 12 units to receive full financial aid. With experience, you will be able to judge how heavy a load you find comfortable. This will depend on your outside obligations, such as a job, and on your personal circumstances. In theory, each unit requires three hours a week, including preparing for class, attending class, and completing assignments. Use these guidelines to budget your time and plan an appropriate schedule.

Must I take the courses in the semesters shown on the plan?

The plan shows one possible way of completing all requirements for the degree. Consult your advisor about whether it is essential to take a given course in the semester shown. There are some rules to keep in mind:

1) You can take the General Education Foundation courses (Composition, Oral Communication, Critical Thinking, Mathematics) in any semester in the first 36 units of baccalaureate-level course work completed at CSULB.

2) You cannot take upper division courses until you have completed at least 30 units. (Exceptions can be made for students who already have completed advanced study in the subject.) You cannot take General Education Capstone courses until you have completed at least 60 units.

3) For some majors it is essential to complete courses in the correct sequence. You cannot take a more advanced course until you have completed the prerequisite course(s).

4) You must complete all requirements for admission to impacted majors within the first 60 units.

I have been told that I must take one or more pre-baccalaureate courses. How can I plan my program?

Your advisor at SOAR can help you identify which courses must be postponed. You must still complete the minimum number of baccalaureate units required for the degree.

You may be able to catch up by taking additional courses in later semesters or by taking classes in summer or winter session, or you may choose to spend an additional semester completing the program. You cannot begin the sequence of required courses for some majors until you are ready for baccalaureate-level Mathematics. See your major advisor to develop a plan for scheduling the required courses.

I didn't complete the exact list of courses shown. Can I still graduate on time?

The answer depends on your major and on what courses you have completed. The plans are not rigid requirements; they are only intended to provide guidance in planning a program. There are many reasons for students to follow a different pattern, such as changing the major, choosing to take fewer classes in a given semester, choosing to complete a minor or a second major. See your advisor for help in planning a program that will work for you.

If I follow the plan, will I have all requirements for graduation completed?

The plans include the specific courses required for the major. For some majors, there are restrictions on the choice of major electives. It is important that you select General Education courses to meet the required distribution pattern. You may need to take an additional General Education course to complete the minimum number of units required for each category. This is likely to happen if you took three-unit courses in Category B, Physical Universe.

Minor in Classical Studies (code CLSCUM01)

The Minor offers students majoring in any subject an opportunity to supplement their education with background in the oldest European tradition.

The Minor consists of a minimum of 20 units that must include a minimum of 9 units of upper division coursework selected from the following:

- Two courses in Latin or Greek, both in the same language.
- A minimum of two courses from: CLSC 100, 110, 135, 191, 201, 202, 310I, 410I, 421I, 430, 440, 490; CWL 452 (with an appropriate topic); or additional courses in Latin or Greek, not necessarily in the same language as selected in (1).
- A minimum of two courses from the following: CLSC 330I; CWL 310I, or HIST 310I, CWL 312I, or HIST 312I; HIST 313, 314; PHIL 421, 422; AH 408, 416, 417; ANTH 140, 450; POSC 301; R/ST 471I.

Interested students should contact the Classics Advisor prior to or during the first semester of taking courses toward the Minor.

Minor in Greek (code CLSCUM03)

A minimum of 20 units in Greek which must include four upper division courses. Prospective teachers are strongly urged to take, in addition, HIST 313, CLSC 191, 310I, and other courses touching on the ancient world.

Minor in Latin (code CLSCUM02)

A minimum of 20 units in Latin which must include four upper division courses. Prospective teachers are strongly urged to take, in addition, HIST 314, CLSC 191, and 310I, and other courses touching on the ancient world.

Classics Courses (CLSC)

Lower Division

100. The Classical World of Greece and Rome (3)

Prerequisite/Corequisite: One GE Foundation course. Introduction to the literature, language and culture of the ancient Greek and Roman worlds. Use of primary sources, such as drama, epic, inscriptions, and the visual arts to explore issues of gender, mythology, the hero, theater, combat and sports, slavery and the family. Students will compare institutions of the ancient world and their modern counterparts.

110. Classical Archaeology (3)

Prerequisite/Corequisite: One GE Foundation course. Introduction to the study of the material culture of Greece, Etruria and Rome from the Minoans to the emperor Constantine. Covers history of archaeology, chronology and dating systems and analytical methods of all aspects of material culture of the Mediterranean basin including urban planning, construction techniques, religious and secular artifacts, and domestic and civic architecture.

135. Women in the Classical World (3)

Prerequisite/Corequisite: One GE Foundation course. A survey of the roles and status of women in ancient Greece, Rome and Etruria through literature by and about women and other ancient source material.

191. Greek Mythology (3)

Prerequisite/Corequisite: One GE Foundation course. A survey of the major Greek myths, sagas and tales of gods and heroes, and their influence on later eras, particularly ancient Rome.

Upper Division

General Education Category A must be completed prior to taking any upper division course except upper division language courses where students meet formal prerequisites and/or competency equivalent for advanced study.

310I. Pagan Culture (3)

Prerequisites: Completion of Foundation requirement, completion of one or more Explorations Course, and upper division standing. This course examines the mass cultures of the Greek and Roman periods, its world view, and its philosophical and religious underpinnings through literary, artistic, archaeological and documentary sources.

330. Pirates Merchants and Marines (3)

Prerequisites: Completion of GE Foundation requirements, upper division standing and one of the following: CLSC 110, ANTH 140, HIST 131 or consent of instructor. Introduction to the history and archaeology of seafaring in the ancient Mediterranean based on a survey of the evidence for maritime commerce and warfare of ancient Egyptian, prehistoric, classical Greek and Roman ages.

410I. Law and Literature in the Classical World (3)

Prerequisites: Completion of GE Foundation requirements, one or more Explorations courses, and upper-division standing. An introduction to the study of the philosophy and interpretation of law through classical literature that encompasses fundamental legal questions and ancient legal source material and the application of modern theories of literary criticism to ancient and modern law.

421I. Classical Drama (3)

Prerequisites: Completion of the G.E. Foundation, one or more Exploration courses, and upper division standing. Examination in translation of the plays of Aeschylus, Sophocles, Euripides, and Aristophanes both as literature and as theater. Includes discussion of origins of tragedy and comedy, later Greek and Roman drama, and the debt of modern drama to the theater of ancient Greeks.

430. Archaeology of Ancient Greece (3)

Prerequisite: one of the following courses: CLSC 110, CLSC 330I, ANTH 140, HIST 131, or AH 416/516, or consent of instructor. The material culture of ancient Greece, from the Minoans (2nd millennium BCE) to the 5th century CE including urban planning, architecture, sculpture, painting, ceramics, burial customs religious and secular artifacts, epigraphy, numismatics, and military constructions and equipment. Also examines chronology and dating systems, analytical methods and history of classical archaeology.

440. Archaeology of the Roman World (3)

Prerequisite: Completion of one of the following: CLSC 110, CLSC 330I, ANTH 140, HIST 131, or AH 416/516, or consent of instructor. Examination of the material culture of Rome and its empire, from the Villanovans (9th century BC) through the 4th century AD. Primary topics of study include: urban planning; civic, religious, and domestic architecture; sculpture, painting, and ceramics; burial customs; religious and secular artifacts; epigraphy; numismatics; military constructions and equipment; analytical methods and history of archaeology of Rome and its empire; chronology and dating systems.

490. Special Topics in Classics (1-4)

Prerequisite: Consent of instructor. Topics of special interest in Classics selected for intensive study. Topics will be announced in the *Schedule of Classes*. May be repeated to a maximum of 6 units with different topics.

A. Antiquity in Film

499. Directed Studies (1-3)

Prerequisite: Consent of instructor. Directed studies to permit individual students to pursue topics of special interest. May be repeated to maximum of 6 units.

Graduate Level

598. Directed Readings in Classics (1-4)

Prerequisites: Graduate standing and consent of instructor. Selected topics in Classics or Classical Archaeology will be studied in depth. A term paper is required. Letter grade only (A-F).

Greek Courses (GK)

Lower Division

101A. Elementary Greek (4)

Prerequisite/Corequisite: Any Foundation course. Introduction to ancient Greek, the language of Sophocles, Plato, Aristophanes, Homer and Demosthenes. Forms, syntax and basic vocabulary leading also to a reading knowledge of New Testament Greek. Designed for those beginning a study of ancient Greek.

101B. Elementary Greek (4)

Prerequisite/Corequisite: Any Foundation course. Prerequisite: GK 101A or equivalent. Continuation of Greek 101A.

102. New Testament and Early Christian Greek (1)

Corequisite: GK 101B. Supplemental graded readings and writing exercises in New Testament Koine Greek and other very early Christian literature such as the *Didache* and the *Epistle of Clement*.

Upper Division

General Education Category A must be completed prior to taking any upper division course except upper division language courses where students meet formal prerequisites and/or competency equivalent for advanced study.

301A-B. Intermediate Greek (3-3)

Continued study of the language and culture. Reading and translating selections of classical writers.

301A. Prerequisite: GK 101B or equivalent.

301B. Prerequisite: GK 301A or equivalent.

351. Plato (3)

Prerequisite: GK 301B or equivalent. Translation and literary study of one or more dialogues of Plato.

352. Homer (3)

Prerequisite: GK 301B or equivalent. Translation and literary study of selected books of the *Iliad* or *Odyssey*.

Greek Courses (GK)

490. Special Topics (1-3)

Prerequisites: 12 units of upper division Greek courses or consent of instructor. Translation and literary study of the selected works of an author, genre (e.g., oratory) or period (e.g., Hellenistic Greek). May be repeated to a maximum of 12 units.

499. Directed Studies (1-3)

Prerequisite: Consent of instructor. Directed studies to permit individual students to pursue topics of special interest. May be repeated to a maximum of 6 units.

Latin Courses (LAT)

Lower Division

101A. Elementary Latin (4)

Prerequisite/Corequisite: Any Foundation course. Introduction to the Latin language as used by Vergil, Cicero, Livy, Catullus, Seneca, Tacitus, and Juvenal as well as late Latin and medieval writers. Roman culture and civilization. Forms, syntax, and basic vocabulary to equip students to begin the study of these and other writers. Designed for those beginning the study of Latin or who have one year of high school Latin.

101B. Elementary Latin (4)

Prerequisite/Corequisite: Any Foundation course. Prerequisite: LAT 101A or equivalent. Continuation of LAT 101A.

Upper Division

General Education Category A must be completed prior to taking any upper division course except upper division language courses where students meet formal prerequisites and/or competency equivalent for advanced study.

301. Intermediate Latin (4)

Prerequisite: LAT 101B or 321 or equivalent. Continued study of the language and culture of the ancient Romans. Reading and translating selections of classical writers.

321. Intensive Latin (6)

Equivalent to two semesters of Elementary Latin. Designed for undergraduate and graduate students with little or no knowledge of Latin, whose degree programs require or recommend a reading knowledge of the language. Not open to students with credit in LAT 101B.

401. Vergil (3)

Prerequisite: LAT 301 or equivalent. Reading of selections from Vergil's *Aeneid*, and/or selections from the *Georgics* and *Eclogues*. May be repeated to a maximum of 6 units with different topics in different semesters.

402. Cicero (3)

Prerequisite: LAT 301 or equivalent. Reading of one or more works of Cicero. May be repeated to a maximum of 6 units with different topics in different semesters.

403. Latin Lyric and Elegy (3)

Prerequisite: LAT 301 or equivalent. Reading of selected poems of one or more of the lyric and elegiac poets: Catullus, Horace (*Odes*, *Epodes*, *Carmen Saeculare*), Propertius, Tibullus, and Ovid (*Amores*). May be repeated to a maximum of 6 units with different topics in different semesters.

404. Latin Epic (3)

Prerequisite: LAT 301 or equivalent. Reading of selections from Lucretius' *De Rerum Natura* and/or Ovid's *Metamorphoses*. May be repeated to a maximum of 6 units with different topics in different semesters.

405. Historiography of the Republic (3)

Prerequisite: LAT 301 or equivalent. Reading of selections from Sallust and/or Julius Caesar. May be repeated to a maximum of 6 units with different topics in different semesters.

406. Historiography of the Empire (3)

Prerequisite: LAT 301 or equivalent. Reading of selections from Livy and/or Tacitus. May be repeated to a maximum of 6 units with different topics in different semesters.

407. Latin of the Early Principate (3)

Prerequisite: LAT 301 or equivalent. Reading of selections from the following authors and works: Pliny the Younger, Martial, Seneca's letters, Suetonius. May be repeated to a maximum of 6 units with different topics in different semesters.

408. Roman Comedy (3)

Prerequisite: LAT 301 or equivalent. Reading of one or more plays of Plautus and Terence. May be repeated to a maximum of 6 units with different topics in different semesters.

409. Roman Satire (3)

Prerequisite: LAT 301 or equivalent. Reading of selected satires of Horace, Juvenal, or Persius, the *Satyricon* of Petronius or the *Apocolocyntosis* of Seneca the Younger. May be repeated to a maximum of 6 units with different topics in different semesters.

410A-B-C. Latin Prose Composition (1-1-1)

Thorough instruction in writing Latin prose at the advanced level. Extensive coverage of syntax and morphology of Latin.

A. Prerequisite: LAT 301 or equivalent. Beginning Latin prose composition

B. Prerequisite: LAT 410A. Continuation of prose composition.

C. Prerequisite: LAT 410B. Continuation of prose composition.

490. Special Topics (1-3)

Prerequisites: LAT 301 or equivalent. Translation and study of authors of a particular period (e.g., Medieval Latin) or of a methodological specialty (e.g., Latin epigraphy). May be repeated to a maximum of 9 units with different topics in different semesters.

A. Medieval Latin

499. Directed Studies (1-3)

Prerequisite: Consent of instructor. Directed studies to permit individual students to pursue topics of special interest. May be repeated to a maximum of 6 units.

View the CSU, Long Beach *Catalog* on-line at www.csulb.edu by clicking on "Academics" and then "CSULB Catalog."

The CSULB Department of Dance is committed to artistic and academic excellence that promotes the value of dance for the individual and society. Its curricula emphasize modern dance performance and composition with supporting course work in ballet, jazz, tap, world dance, and dance theory. The course of study embraces creative, historical, and scientific perspectives of dance. The Department is also committed to the artistic enhancement of the campus and community through practical/theoretical dance courses for the general university student, performances, and residencies. In addition, the Department avidly promotes the profession through creative activity and scholarly research, leadership in professional organizations, and participation in dance festivals/conferences at the regional, and national levels.

The Department offers two undergraduate degree programs: the Bachelor of Fine Arts and the Bachelor of Arts in Dance. Both degrees provide a wide breadth of exploration in the creative, physical, and academic aspects of the art of dance. The BA provides students with a balanced course of study that helps prepare them for careers in education, arts administration, health and fitness, or further academic pursuits. The BFA, a professional degree in

Dance, offers students more concentrated study in the areas of technique, performance, and choreography aimed at preparing the student for a professional career.

The Department also offers two graduate degree programs: the Master of Fine Arts and the Master of Arts in Dance. The MFA is a demanding program designed to challenge professionally experienced students to develop their artistic and analytical work through numerous performances and choreographic opportunities. This terminal degree prepares candidates for careers in education, performance, and choreography. The MA in Dance is a concentrated program for dance educators currently working in high schools and community colleges. This advanced degree enhances teaching and choreographic skills, while broadening aesthetic, historical, and scientific understandings of dance.

Non-major studio classes in ballet, modern, jazz, and tap are open to all students and do not require any audition. Several courses are offered which meet the General Education Exploration and Capstone requirements in categories C, D, E, and IC.

A large number of part-time faculty members supplement the expertise of the full-time faculty.

Dance concerts with faculty, students, and visiting choreographers are held in the Martha B. Knoebel Dance Theater. Dance majors and minors are encouraged to participate in activities of the Dance student organization "Off 7th Dancers."

Students wishing to major or minor in dance must audition for placement prior to starting the program. Auditions are held four times per year. Applicants should contact the Department of Dance to obtain audition dates and an audition application form. Students desiring more information should contact the Department office for referral to one of the faculty advisors. All new students enter the major under the BA degree. A separate audition for entrance into the BFA degree plan is required.

The Department is an accredited institutional member of the National Association of Schools of Dance (National Association of Schools of Dance, 11250 Roger Bacon Drive, Suite 21, Reston, VA 20190, phone: 703-437-0700).

Bachelor of Arts in Dance (code DANCBA01) (120 units)

Requirements

Composition (8 units): DANC 120, 220, 320.

Theory (21 units): DANC 100, 131, 260, 373I, 435I, 442B, 470, or 475, three units from 488, 491A, or 491B.

Performance/Production (4 units): Two units from 181A, 181B, 381A, 381B, 481A, or 481B; two units from 180A, 180B, 295, 380A, 380B, 480A, 480B, or 495.

Technique (20 units): Twelve units from DANC 152, 252, 312, 412, (3 units must be earned from 312 or 412); eight units from DANC 154, 254, 314, 316, 414 (3 units must be earned from 314 or 414).

Electives (6 units): Select six units from DANC 161, 262, 350, 360, 362, 420, 442A, 445, 470, 475, 488, 491A, or 491B.

FAQ Concerning Road Maps for Completion of Undergraduate Degrees

For each undergraduate major, the on-line Catalog shows plans for scheduling all required courses to complete the degree in four, five, or six years.

While CSULB will make every effort to schedule classes at the times shown in the plans, we cannot guarantee that courses will be available in specific semesters. It is possible that shortage or budget or of personnel will make it impossible to offer as many classes as we would wish.

The plans are not substitutes for working with an advisor. You are strongly encouraged to see an advisor when planning your program each term.

I am a freshman. Do I have to choose now whether to follow the four, five, or six-year plan?

No. Most freshmen take 12-15 units. You need at least 12 units to receive full financial aid. With experience, you will be able to judge how heavy a load you find comfortable. This will depend on your outside obligations, such as a job, and on your personal circumstances. In theory, each unit requires three hours a week, including preparing for class, attending class, and completing assignments. Use these guidelines to budget your time and plan an appropriate schedule.

Must I take the courses in the semesters shown on the plan?

The plan shows one possible way of completing all requirements for the degree. Consult your advisor about whether it is essential to take a given course in the semester shown. There are some rules to keep in mind:

1) You can take the General Education Foundation courses (Composition, Oral Communication, Critical Thinking, Mathematics) in any semester in the first 36 units of baccalaureate-level course work completed at CSULB.

2) You cannot take upper division courses until you have completed at least 30 units. (Exceptions can be made for students who already have completed advanced study in the subject.) You cannot take General Education Capstone courses until you have completed at least 60 units.

3) For some majors it is essential to complete courses in the correct sequence. You cannot take a more advanced course until you have completed the prerequisite course(s).

4) You must complete all requirements for admission to impacted majors within the first 60 units.

I have been told that I must take one or more pre-baccalaureate courses. How can I plan my program?

Your advisor at SOAR can help you identify which courses must be postponed. You must still complete the minimum number of baccalaureate units required for the degree.

You may be able to catch up by taking additional courses in later semesters or by taking classes in summer or winter session, or you may choose to spend an additional semester completing the program. You cannot begin the sequence of required courses for some majors until you are ready for baccalaureate-level Mathematics. See your major advisor to develop a plan for scheduling the required courses.

I didn't complete the exact list of courses shown. Can I still graduate on time?

The answer depends on your major and on what courses you have completed. The plans are not rigid requirements; they are only intended to provide guidance in planning a program. There are many reasons for students to follow a different pattern, such as changing the major, choosing to take fewer classes in a given semester, choosing to complete a minor or a second major. See your advisor for help in planning a program that will work for you.

If I follow the plan, will I have all requirements for graduation completed?

The plans include the specific courses required for the major. For some majors, there are restrictions on the choice of major electives. It is important that you select General Education courses to meet the required distribution pattern. You may need to take an additional General Education course to complete the minimum number of units required for each category. This is likely to happen if you took three-unit courses in Category B, Physical Universe.

Option in Dance Science (code DANCBA02) (120 units)

The B.A. in Dance, Option in Dance Science offers the dance major a course of study combining dance with specific science courses for students interested in teaching careers in dance, or careers in dance fitness. This degree also gives preparation for those who seek graduate education in the areas of dance science or related dance studies.

Admission into the program is the same for the general B.A. in Dance, which requires passing an entrance audition for placement in the major sequence of dance technique courses and meeting all University entrance requirements.

Requirements

Composition (5 units): DANC 120, 220.

Theory (40 units): DANC 100, 131, 161, 260, 262, 360, 373I, 442B, 470; BIOL 207, 208; KPE 300, 301, 312.

Performance/Crew (2 units): one unit from DANC 181A, 181B, 381A, 381B, 481A, 481B; one unit from DANC 180A, 180B, 295, 380A, 380B, 480A, 480B, 495.

Technique (20 units): twelve units from DANC 152, 252, 312, or 412; 3 must be earned in 312 or 412. Eight units from DANC 154, 254, 314, 316, or 414; 3 must be from 314 or 414.

Electives: 5-6 units from DANC 362, FCS 430, KPE 307, 309, 315, 339I, 363, 368, 430, 462, 467.

FAQ Concerning Road Maps for Completion of Undergraduate Degrees

For each undergraduate major, the on-line Catalog shows plans for scheduling all required courses to complete the degree in four, five, or six years.

While CSULB will make every effort to schedule classes at the times shown in the plans, we cannot guarantee that courses will be available in specific semesters. It is possible that shortage or budget or of personnel will make it impossible to offer as many classes as we would wish.

The plans are not substitutes for working with an advisor. You are strongly encouraged to see an advisor when planning your program each term.

I am a freshman. Do I have to choose now whether to follow the four, five, or six-year plan?

No. Most freshmen take 12-15 units. You need at least 12 units to receive full financial aid. With experience, you will be able to judge how heavy a load you find comfortable. This will depend on your outside obligations, such as a job, and on your personal circumstances. In theory, each unit requires three hours a week, including preparing for class, attending class, and completing assignments. Use these guidelines to budget your time and plan an appropriate schedule.

Must I take the courses in the semesters shown on the plan?

The plan shows one possible way of completing all requirements for the degree. Consult your advisor about whether it is essential to take a given course in the semester shown. There are some rules to keep in mind:

- 1) You can take the General Education Foundation courses (Composition, Oral Communication, Critical Thinking, Mathematics) in any semester in the first 36 units of baccalaureate-level course work completed at CSULB.
- 2) You cannot take upper division courses until you have completed at least 30 units. (Exceptions can be made for students who already have completed advanced study in the subject.) You cannot take General Education Capstone courses until you have completed at least 60 units.
- 3) For some majors it is essential to complete courses in the correct sequence. You cannot take a more advanced course until you have completed the prerequisite course(s).
- 4) You must complete all requirements for admission to impacted majors within the first 60 units.

I have been told that I must take one or more pre-baccalaureate courses. How can I plan my program?

Your advisor at SOAR can help you identify which courses must be postponed. You must still complete the minimum number of baccalaureate units required for the degree.

You may be able to catch up by taking additional courses in later semesters or by taking classes in summer or winter session, or you may choose to spend an additional semester completing the program. You cannot begin the sequence of required courses for some majors until you are ready for baccalaureate-level Mathematics. See your major advisor to develop a plan for scheduling the required courses.

I didn't complete the exact list of courses shown. Can I still graduate on time?

The answer depends on your major and on what courses you have completed. The plans are not rigid requirements; they are only intended to provide guidance in planning a program. There are many reasons for students to follow a different pattern, such as changing the major, choosing to take fewer classes in a given semester, choosing to complete a minor or a second major. See your advisor for help in planning a program that will work for you.

If I follow the plan, will I have all requirements for graduation completed?

The plans include the specific courses required for the major. For some majors, there are restrictions on the choice of major electives. It is important that you select General Education courses to meet the required distribution pattern. You may need to take an additional General Education course to complete the minimum number of units required for each category. This is likely to happen if you took three-unit courses in Category B, Physical Universe.

Bachelor of Fine Arts in Dance (code DANCBF01) (132 units)

The Bachelor of Fine Arts in Dance is the only professional undergraduate degree in Dance in the CSU. The primary objective of the degree program is to prepare graduates for positions as performers and/or choreographers in dance companies, musical theatre, film, and television. The program also will prepare students for entry into Master of Fine Arts programs in Dance. Preparation: All students wishing to pursue the BFA in Dance must demonstrate intermediate/advanced technical skill in dance by audition. Students may take the BFA studio audition, for entrance into this degree plan, after completing the following course work with a grade of "B" or better: DANC 120, 220, 252, 254, 380A or B, 381A or B.

Requirements

Composition (11 units): DANC 120, 220, 320, 420.

Theory (29 units): DANC 100, 131, 260, 161 or 262, 350 or 445, 373I, 442A, 442B, 470 or 475; six units from 488, 491A, or 491B.

Performance/Production (7 units): Two units from 181A, 181B, 381A, 381B, 481A, or 481B; five units from 180A, 180B, 295, 380A, 380B, 480A, 480B, or 495.

Technique (25 units): Fifteen units from DANC 152, 252, 312, 412; 3 must be earned from 412. Ten units from DANC 154, 254, 314, 316, 414; 3 must be earned from 414.

General Education (6 units): DANC 373I and one course from one of the following: AH 115B, 115C, 335I; C/LT 124, 161, 232, 324I, 412I; PHIL 361; MUS 180, 190, 290, 363I, 364I, 375, 490; THEA 124, 324I.

Minor in Dance (code DANCUM01)

Students wishing to minor in dance must audition for placement prior to starting the program. The Minor in Dance is available to any non-dance major.

Requirements

24 units of which 9 must be upper division. *Technique* (9 units): 6 units from DANC 152, 252, 312, or 412 (3 of which must be from DANC 252); Three units from DANC 154, 254, 314, or 414. *Theory/Production/Performance* (12 units): DANC 120, 131, 220, 442B; 1 unit from DANC 380A, 380B, 480A, 480B, or 495; and one unit from DANC381A, 381B, 481A, 481B. *Electives* (3 units): DANC 161, 320, 350, 360, 362, 373I, 442A, 435I, 445, 475.

FAQ Concerning Road Maps for Completion of Undergraduate Degrees

For each undergraduate major, the on-line Catalog shows plans for scheduling all required courses to complete the degree in four, five, or six years.

While CSULB will make every effort to schedule classes at the times shown in the plans, we cannot guarantee that courses will be available in specific semesters. It is possible that shortage or budget or of personnel will make it impossible to offer as many classes as we would wish.

The plans are not substitutes for working with an advisor. You are strongly encouraged to see an advisor when planning your program each term.

I am a freshman. Do I have to choose now whether to follow the four, five, or six-year plan?

No. Most freshmen take 12-15 units. You need at least 12 units to receive full financial aid. With experience, you will be able to judge how heavy a load you find comfortable. This will depend on your outside obligations, such as a job, and on your personal circumstances. In theory, each unit requires three hours a week, including preparing for class, attending class, and completing assignments. Use these guidelines to budget your time and plan an appropriate schedule.

Must I take the courses in the semesters shown on the plan?

The plan shows one possible way of completing all requirements for the degree. Consult your advisor about whether it is essential to take a given course in the semester shown. There are some rules to keep in mind:

1) You can take the General Education Foundation courses (Composition, Oral Communication, Critical Thinking, Mathematics) in any semester in the first 36 units of baccalaureate-level course work completed at CSULB.

2) You cannot take upper division courses until you have completed at least 30 units. (Exceptions can be made for students who already have completed advanced study in the subject.) You cannot take General Education Capstone courses until you have completed at least 60 units.

3) For some majors it is essential to complete courses in the correct sequence. You cannot take a more advanced course until you have completed the prerequisite course(s).

4) You must complete all requirements for admission to impacted majors within the first 60 units.

I have been told that I must take one or more pre-baccalaureate courses. How can I plan my program?

Your advisor at SOAR can help you identify which courses must be postponed. You must still complete the minimum number of baccalaureate units required for the degree.

You may be able to catch up by taking additional courses in later semesters or by taking classes in summer or winter session, or you may choose to spend an additional semester completing the program. You cannot begin the sequence of required courses for some majors until you are ready for baccalaureate-level Mathematics. See your major advisor to develop a plan for scheduling the required courses.

I didn't complete the exact list of courses shown. Can I still graduate on time?

The answer depends on your major and on what courses you have completed. The plans are not rigid requirements; they are only intended to provide guidance in planning a program. There are many reasons for students to follow a different pattern, such as changing the major, choos-

ing to take fewer classes in a given semester, choosing to complete a minor or a second major. See your advisor for help in planning a program that will work for you.

If I follow the plan, will I have all requirements for graduation completed?

The plans include the specific courses required for the major. For some majors, there are restrictions on the choice of major electives. It is important that you select General Education courses to meet the required distribution pattern. You may need to take an additional General Education course to complete the minimum number of units required for each category. This is likely to happen if you took three-unit courses in Category B, Physical Universe.

Master of Arts in Dance

General Option (code DANCMMA01)

The Master of Arts Degree in Dance is designed for experienced dance faculty in high schools and community colleges.

Criteria for Admission into the Program

Candidates must meet the following criteria for entrance into the M.A. in Dance:

1. Bachelor's degree from an accredited institution with a degree in dance or a related field;
2. Minimum of 3 years experience teaching dance in a high school with a secondary teaching credential, or minimum of 3 years part-time or full-time experience teaching dance in a community college (exceptions will be considered for extensive part-time employment teaching in a high school, or for an exemplary employment history of teaching dance in other venues);
3. A minimum 3.0 gpa is required in the last 60 semester units of the BA or BFA, or any previous graduate course work applied to this degree;
4. Three letters of recommendation, of which one must be from a supervisor or colleague;
5. Movement audition.

Admission will be granted to students who show high promise of success in graduate study, based on past academic record and record of teaching experience.

Retention Criteria

1. Maintain a GPA of 3.0 in all graduate work completed at CSULB.
2. Continue satisfactory progress toward the degree objective.

Advancement to Candidacy

1. Satisfy the general university requirements for advancement to candidacy and departmental criteria for admission.
2. Satisfactory completion of the CSULB Writing Proficiency Examination.
3. Maintain a minimum of a 3.0 GPA in all work undertaken for the graduate program.
4. Completion of a minimum of six units of graduate work.
5. Removal of any incompletes.
6. Filing of the student's graduate program form for the Master of Arts in Dance, signed by the student's graduate committee and approved by the Associate Dean for graduate accountability.

Requirements

A minimum of 30 units with 24 units in DANC 510A, 510B, 521, 565, 591A, 591B, 605, 642; 6 units in DANC 698.

Master of Fine Arts in Dance (code DANCMF01)

This 60-unit plan of study emphasizes performance and choreography grounded in the modern dance genre, and requires 3 years in residence to complete all course work. The Master of Fine Arts degree is the terminal degree in the studio area of dance. It offers professional training preparatory for careers in performance and choreography, and is highly desired by major dance schools in the United States for university and college teaching. CSULB offers the only MFA in Dance in the California State University system.

The Dance Department has chosen to keep the MFA degree program small and selective in order to provide adequate resources to all students in the degree plan. It is expected that applicants for the MFA in Dance should have some life experiences in the field prior to application; therefore, this would normally preclude a person who recently was awarded an undergraduate degree.

Criteria for Admission into the Program

Candidates admitted into this program will be selected on the following criteria:

1. meet University admissions requirements;
2. B.A., B.F.A., or M.A. degree in dance or equivalent with a 3.0 GPA in upper division dance courses;
3. professional goals consistent with the plan of study;
4. life experiences in the field;
5. audition in performance and choreography.

All MFA candidates are admitted on a conditional status. Removal of the conditional admit will occur after the following:

1. passing the Writing Proficiency Exam;
2. completion of all prerequisites;
3. completion of 20 graduate dance units with a GPA of 3.0;
4. Approval of Graduate Advisor.

Prerequisites

Advanced technique, Dance Composition (3 courses), Dance History (2 courses), Music for Dance, Anatomy/Kinesiology, Dance Notation or Laban Movement Analysis, Dance Production (2 courses). Candidates may take prerequisite courses along with graduate courses.

When an undergraduate degree is completed in a program which has different requirements than those of the CSULB dance major, additional preparation may be required before the student can be considered for classified status. Up to 24 units from an M.A. degree program may be acceptable, with approval of the graduate advisor.

Application Requirements

1. A CSULB post-baccalaureate application.
2. The following returned to the CSULB Dance Department:
 - a. letter of application;
 - b. resume;
 - c. 3 letters of reference;
 - d. VHS video of a recent group choreographic work;
 - e. 2-page (typed, double spaced) personal statement ad-

ressing how graduate work will fulfill intended professional goals.

3. Audition on the CSULB campus to include a technique class and presentation of a 3-5 minute solo composition.

Advancement to Candidacy

Advancement to candidacy will occur based on the following:

1. unconditional admission status;
2. completion of 30 graduate dance units with a GPA of 3.0;
3. successful choreography produced in a graduate concert;
4. evaluation by graduate faculty of the candidate's satisfactory progress toward the degree;
5. removal of any incompletes.

Performance/Choreography Concentration

60 units total: 16 units in Technique from DANC 512, 514, with a minimum of 12 units from DANC 512, and a minimum of 4 units from DANC 514; 18-20 units in Theory from DANC 505, 531, 565, 588, 597, 599, 605, 642; 10 units in Choreography from DANC 520 A, B,C,D,E; 4 units in Performance from 580 A,B, 585 A,B, 595; 6 units DANC 699, 4-6 units electives.

Courses (DANC)

Dance Technique

Note: Dance majors must take technique courses and composition in sequence and screen for level placement in all technique classes. Screening will take place the previous semester and the first day of class. (Non-major technique classes are not screened. They are open to all students.)

Lower Division

100. Orientation to Dance (1)

Corequisite: DANC 152 or 154. Introductory information, degree requirements, career opportunities, current problems and issues in the field. Credit/No Credit grading only.

101. Introduction to Modern Dance (3)

Prerequisite: Completion of General Education Foundation courses. An exploration of modern dance concert dance art form through the study of its aesthetic principles and characteristics. Lectures and video viewing identify major choreographers, performers, choreographic works, and historical development; movement sessions explore elementary exercises in modern dance technique. Not open to dance majors.

102. Introduction to Ballet (3)

Prerequisite: Completion of General Education Foundation courses. An exploration of ballet as a concert dance art form through the study of its aesthetic principles and characteristics. Lectures and video viewing identify major choreographers, performers, choreographic works, and historical development; movement sessions explore elementary exercises in ballet technique. Not open to dance majors.

103. Introduction to Jazz (3)

Prerequisite: A General Education Foundation course. An introduction to jazz dance as a concert and entertainment art form through the study of its aesthetic principles and characteristics. Lectures and video viewing identify major choreographers, performers, choreographic works, and historical development; movement sessions explore elementary exercises in jazz technique. Open only to non-dance majors.

104. Introduction to Tap (3)

Prerequisite: A General Education Foundation course. An introduction to tap as a concert and entertainment art form through the study of its aesthetic principles and characteristics. Lectures and video viewing identify major choreographers, performers, choreographic works, and historical development; movement sessions explore elementary exercises in tap technique. Open only to non-dance majors.

105. Latin Jazz (2)

Basic skills and techniques in Latin Jazz. Not open to dance majors. May be repeated to a maximum of 4 units. (4 studio hours)

106. African Dance (2)

Basic skills and technique in African dance designed to incorporate its role in African culture. May be repeated to a maximum of 4 units. (4 studio hours)

108. Beginning Flamenco (2)

Basic skills and technique in the style of Flamenco dance designed to incorporate its role in Spanish culture. May be repeated to a maximum of 4 units. (4 studio hours)

109. Beginning Hip-Hop (2)

Basic skills and technique in the style of Hip-Hop dance. May be repeated to a maximum of 4 units. (4 studio hours)

110. Viewing Dance (3)

Prerequisite/Corequisite: A General Education Foundation course. Introduction to contemporary dance theater through viewing dance films (modern dance, ballet and ethnic), dance performances, and lecture/discussions on dance.

111. Beginning Modern Dance (2)

Basic skills and techniques of modern dance. Not open to dance majors. May be repeated to a maximum of 4 units in different semesters. (4 studio hours)

112. Intermediate Modern Dance (2)

Prerequisites: DANC 111 or consent of instructor. Open to Non-majors. Increased skill and techniques of modern dance. May be repeated to a maximum of 8 units in different semesters. (4 studio hours)

113. Beginning Ballet (2)

Basic skills and techniques of ballet. Not open to dance majors. May be repeated to a maximum of 4 units in different semesters. (4 studio hours)

114. Intermediate Ballet (3)

Prerequisites: DANC 113 or consent of instructor. Open to Non-majors. Increased skill and techniques of ballet. May be repeated to a maximum of 12 units in different semesters. (6 studio hours)

115. Beginning Jazz (2)

Basic skills and techniques of jazz. Not open to dance majors. May be repeated to a maximum of 4 units in different semesters. (4 studio hours)

116. Intermediate Jazz (2)

Prerequisite: DANC 115 or consent of instructor. Basic theory and practice of modern jazz dance. May be repeated to a maximum of 8 units in different semesters. (4 studio hours)

117. Beginning Tap Technique (2)

Basic technique in the tap dance idiom, time steps, stylistic patterns, rhythmic patterns and tap combinations. May be repeated to a maximum of 4 units. (4 studio hours)

120. Improvisation I (2)

Use of improvisation as an introduction to structural form; individual and group problems. (4 studio hours) Letter grade only (A-F).

131. Introduction to Music for Dance (2)

Basic music notation, simple and complex rhythmic patterns, poly-rhythms, skill in the use of percussion instruments and a brief survey of the historical periods of music for dance. (4 studio hours) Letter grade only (A-F).

152. Modern Technique I (3)

Prerequisites: Dance Major or Minor, and placement screening. Corequisite: DANC 181A or B. Intermediate skill in modern technique. Letter grade only (A-F). May be repeated to a maximum of 12 units. (6 studio hours)

154. Ballet Technique I (3)

Prerequisites: Dance Major or Minor, and placement screening. Corequisite: DANC 181A or B. Intermediate skill in ballet technique. Letter grade only (A-F). May be repeated to a maximum of 12 units. (6 studio hours)

160. Makeup for Dance (1)

Prerequisite: Dance major or minor. Designed to develop expertise in proper makeup techniques integral to dance performance. Instruction, exploration, and experimentation with various types of makeup include corrective and fantasy makeup, hair, masks, and makeup rendering. (2 studio hours) Letter grade only (A-F). May be repeated to a maximum of 2 units.

161. Placement for the Dancer (2)

Prerequisites: Open to Dance Majors and Minors. Body Placement and corrective exercises for modern dance and ballet classes. Letter grade only (A-F). (4 studio hours)

179. Exploring Dance: The Language of Movement (3)

Prerequisites: Open to all Liberal Studies Majors, open to others with consent of the instructor based on availability. Exploration of the movement language of dance: as it relates to the creative process in producing dance; to historical and cultural aspects of dance; as the basis for critical thinking and aesthetic valuing in dance; and to activities geared to the developmental aspects of children, 5-12 years, as outlined in the California State Framework for the Visual and Performing Art, and guidelines. Dance Component, grades k-8. Letter grade only (A-F). (Lecture 2 hrs, 2 studio hours)

180A. Dance Performance (1)

Prerequisites: Audition, dance major or minor. Participation in dance productions. Letter grade only (A-F). May be repeated to a maximum of 4 units. Letter grade only (A-F). (2 studio hours)

180B. Dance Performance (1)

Prerequisites: Audition, dance major or minor. Participation in dance productions. Letter grade only (A-F). May be repeated to a maximum of 4 units. Letter grade only (A-F). (2 studio hours)

181A. Dance Production Technical (1)

Corequisite: DANC 152, 252, 154 or 254. Technical participation in Dance Department-sponsored productions. May be repeated to a maximum of 4 units. Letter grade only (A-F). (2 studio hours)

181B. Dance Production Technical (1)

Corequisite: DANC 152, 252, 154 or 254. Technical participation in Dance Department-sponsored productions. May be repeated to a maximum of 4 units. Letter grade only (A-F). (2 studio hours)

214. Ballet Pointe (1)

Prerequisite DANC 114 or consent of instructor. Development of the technique of dancing in pointe shoes. May be repeated to a maximum of 4 units. Letter grade only (A-F). (2 studios hours).

216. Intermediate/Advanced Jazz (2)

Prerequisites: DANC 116 or consent of instructor. Basic theory and practice of modern jazz dance. May be repeated to a maximum of 8 units in different semesters. (4 studio hours)

217. Intermediate Tap Technique (2)

Prerequisite: DANC 117 or placement screening. Intermediate skills in tap technique concentrating on rhythmic complexity, heightened tempos, and contemporary tap styles. May be repeated to a maximum of 4 units. (4 studio hours)

220. Dance Composition I (3)

Prerequisite or Corequisite: DANC 120, 131. Theory and practice in the basic elements of dance composition. Letter grade only (A-F). (Lecture 1 hour, 4 studio hours).

252. Modern Technique II (3)

Prerequisites: Dance Major or Minor, and placement screening. Intermediate skill in modern technique. Letter grade only (A-F). May be repeated to a maximum of 12 units. (6 studio hours)

254. Ballet Technique II (3)

Prerequisites: Dance Major or Minor, and placement screening. Intermediate skill in ballet technique. Letter grade only (A-F). May be repeated to a maximum of 12 units. (6 studio hours)

260. Functional Anatomy for the Dancer (3)

Prerequisites: DANC 161 or consent of the instructor. A thorough examination of the muscles, bones, and joints of the spine, foot, ankle, knee, shoulder, and pelvis as they relate to the functional application of dance movement. Letter grade only (A-F).

262. Pilates I (3)

Prerequisites: DANC 260 or BIOL 208. Pilates-based conditioning program for dance majors employs a prescribed series of exercises performed on the floor mat and augmented to Reformer use. Letter grade only (A-F). (6 studio hours)

295. Repertory (1-3)

Prerequisites: Audition, dance major. Experience in rehearsal and performance practice in an intensive format. Letter grade only (A-F). May be repeated to a maximum of 6 units. (2-6 studio hours)

Upper Division**312. Modern Technique III (3)**

Prerequisites: Dance major or minor or placement screening. A course for undergraduate dance majors in the intermediate/advanced skill of modern dance techniques. Letter grade only (A-F). May be repeated to a maximum of 12 units in different semesters. (6 studio hours)

313. Modern Dance Workshop (1-3)

Prerequisites: Dance major or minor or consent of instructor. Exploration of the techniques of modern dance. May be repeated for a maximum of 6 units in different semesters. Letter grade only (A-F). (2-6 studio hours)

314. Ballet Technique III (3)

Prerequisites: Dance Major or Minor, and placement screening. Advanced/intermediate skill in ballet technique. Letter grade only (A-F). May be repeated for a maximum of 12 units in different semesters. (6 studio hours)

315. Ballet Workshop (1-3)

Prerequisites: Dance major and minor or consent of instructor. Exploration of the techniques of ballet. Letter grade only (A-F) May be repeated for a maximum of 6 units in different semesters. (2-6 studio hours)

316. Advanced Jazz (2)

Prerequisites: DANC 216 or consent of instructor. Advanced theory and practice of jazz technique. May be repeated to a maximum of 8 units. (4 studio hours)

317. Advanced Tap Technique (2)

Prerequisites: DANC 117 and 217 or consent of instructor. Advanced skills in tap technique concentrating on rhythmic complexity, heightened tempos, improvisational work, and contemporary tap styles. May be repeated to a maximum of 8 units in different semesters. (4 studio hours)

***318. World Dance (1-3)**

Theory and technique of various world forms. (2 studio hours per unit.)

319. Dance Laboratory (1-3)

Participation in dance technique projects. Consent of instructor. May be repeated to a maximum of 8 units. Letter grade only (A-F). (2 studio hours per unit.)

320. Dance Composition II (3)

Prerequisite: DANC 220. Development of theme and style in small group studies. Letter grade only (A-F). (Lecture 1 hour, 4 studio hours)

321. Directed Choreography (1-3)

Prerequisites: Permission of instructor. Independent choreographic projects finalized in a performance venue under supervision of a faculty member. Letter grade only (A-F). May be repeated to a maximum of 6 units in different semesters. (2-6 studio hours)

331. Music for Dance (3)

Prerequisite: DANC 131 and DANC 220. Theoretical and practical analyses of music form and style as appropriate for use in dance classes and performance. Includes a brief survey of historical periods and the development of music repertoire for dance. Letter grade only (A-F). (Lecture 1 hour, 4 studio hours)

350. Dance Notation I (3)

Prerequisite: DANC 131. Theory and practice of notating movement through Labanotation. Letter grade only (A-F).

360./560. Prevention and Care of Dance Injuries (3)

Prerequisite: DANC 260 or consent of instructor. The application of principles of anatomy and kinesiology, integrated with principles of training, for the purpose of fostering a scientific understanding of common dance injuries and their prevention. This course will also focus on the development of the primary components of health-related physical fitness: muscular strength, muscular endurance, flexibility, cardiovascular fitness and body composition in an effort to reduce injury risk and facilitate healthy dance training while attempting to maximize each individual dancer's physiological potential. Letter grade only (A-F).

362. Pilates II (2)

Prerequisites: DANC 262 or consent of instructor. Intermediate level Pilates-based conditioning program which employs a series of exercises designed to enhance dance performance and prevent injury, utilizing apparatus based on the designs of Joseph Pilates, exercise balls, free weights and the body for resistance. Letter grade only (A-F). (4 studio hours)

370./570. Video for Dance (2)

Skills and techniques in analyzing, documenting, and editing dance performances and rehearsals; use and interface of the digital camera. Examines the field of dance documentation and the editing and creative concepts most associated with dance for the camera. Letter grade only (A-F). (Lecture 1 hour, 2 studio hours)

373I. Nonverbal Communication: Interaction of Mind and Body (3)

Prerequisites: Completion of GE Foundation requirements, completion of one or more Exploration course(s), and upper division status. History and theories of the development of mind/body integration. Enhancement of personal and interpersonal relations through lectures, discussion, films and movement experiences. Analysis and synthesis of the interdependence of the psychological and physical processes in nonverbal communication. Same course as ED P 373I.

380A,B. Dance Performance (1, 1)

Prerequisite: Open to Dance Majors and Minors only. Participation as a performer and/or choreographer in Dance Department productions. Concert participation is by audition only. A combination of 380A,B and 480A,B may be repeated to a maximum of 8 units. (3 or more studio hours)

381A Dance Production Technical (1)

Prerequisites: Open to dance majors and minors. Technical production participation in Dance Department sponsored productions. A combination of 381A,B and 481A,B may be repeated for a total of eight units in different semesters. Letter grade only (A-F). (2 studio hours per unit)

381B Dance Production Technical (1)

Prerequisites: Open to dance majors and minors. Technical production participation in Dance Department sponsored productions. A combination of 381A,B and 481A,B may be repeated for a total of eight units in different semesters. Letter grade only (A-F). (2 studio hours per unit)

398. Fieldwork in Dance Elementary (1-3)

Prerequisite: DANC 475. Supervised teaching experience in dance in an off-campus setting. Practical experience working with students in kindergarten through 6th grade. Credit/No Credit grading only. May be repeated to a maximum of 6 units.

399. Fieldwork in Dance Secondary (1-3)

Prerequisite: DANC 470. Supervised teaching experience in dance in an off-campus setting. Practical experience working with students in grades 7 through 12 or community college. Credit/No Credit grading only. May be repeated to a maximum of 6 units.

412. Modern Technique IV (3)

Prerequisites: Dance Major or Minor, and placement screening. Advanced skill in modern dance technique. Letter grade only (A-F). May be repeated to a maximum of 12 units. (6 studio hours)

414. Ballet Technique IV (3)

Prerequisites: Dance Major or Minor, and placement screening. Advanced skills in the techniques of ballet. Letter grade only (A-F). May be repeated to a maximum of 12 units in different semesters. (6 studio hours).

*416. Ballet Variations (2)

Prerequisites: DANC 254 or consent of instructor. The interpretation and analysis of style, technique, musicality, content, and phrasing in classical and modern ballet variations. May be repeated to a maximum of 6 units in different semesters. Letter grade only (A-F). (4 studio hours)

420. Advanced Composition (3)

Prerequisite: DANC 320 or consent of instructor. Approaches to the development of choreographic materials of extended structure and content. Letter grade only (A-F). (Lecture 1 hour, 4 studio hours)

*422. Improvisation II (1-3)

Prerequisites: DANC 220 or consent of instructor. Development of the individual performer's improvisational skills, exploration of a wide range of subject matter and styles, study of techniques of structuring improvisations. May be repeated for a maximum of 6 units in different semesters. Letter grade only (A-F). (2-6 studio hours)

426. Intermediate/Advanced Ballet Pointe (1)

Prerequisites: DANC 214 or consent of instructor. Intermediate skill development in ballet pointe technique. May be repeated for a maximum of 4 units in different semesters. Letter grade only (A-F). (2 studio hours)

435I. Dance in Film (3)

Prerequisites: Completion of GE Foundation requirements and one or more Exploration course(s), and upper division status. Examination of the relationship between dance and film; study of historical and theoretical connections placed in both aesthetic and cultural contexts.

442A. History of Dance to 1900 (3)

Prerequisites: Successful completion of the writing proficiency exam. Development of dance from Aboriginal to 20th Century. Letter grade only (A-F).

442B. Twentieth Century Dance History (3)

Prerequisites: Successful completion of the writing proficiency exam. Development of Ballet and Modern dance in the 20th Century. Letter grade only (A-F).

445./545. Movement Analysis (3)

Prerequisites: Open to Dance Majors and Minors only. Study of the principles underlying movement and their application to all areas of movement study. Letter grade only (A-F). (Lecture 2 hours, 2 studio hours)

470. Principles of Teaching Dance Technique (3)

Prerequisites: DANC 312, or consent of instructor. Methods of teaching dance technique for studios, recreation departments, companies, secondary schools, colleges, and universities. Emphasis on teaching teenagers and adult beginners. Letter grade only (A-F). (Lecture 2 hours, 2 studio hours)

475. Dance for Children (3)

Prerequisites: DANC 120, 312, or consent of instructor. Practical experience in teaching dance to elementary school children employing improvisational approaches to basic elements of dance as integrated into the total elementary curriculum; as a basic form of communications, as an instrument for the development of individual creativity, as identification of dance as an art form. Letter grade only (A-F).

480A,B. Dance Performance (1,1)

Prerequisite: Open to Dance Majors and Minors only. Participation as a performer and/or choreographer in Dance Department approved University-sponsored production. Most concert participation is by audition only. A combination of 380A,B and 480A,B may be repeated to a total of 8 units. (3 or more studio hours)

481A. Dance Production-Technical (1)

Prerequisites: Open to dance majors or minors. Technical participation in Dance Department-sponsored productions. A combination of 381A,B and 481A,B may be repeated for a total of 8 units in different semesters. Letter grade only (A-F). (2 studio hours per unit)

481B. Dance Production-Technical (1)

Prerequisites: Open to dance majors or minors. Technical participation in Dance Department-sponsored productions. A combination of 381A,B and 481A,B may be repeated for a total of 8 units in different semesters. Letter grade only (A-F). (2 studio hours per unit)

*485. Contemporary Dance and the Fine Arts (3)

Prerequisites: DANC 331 or consent of instructor. Advanced theory and practice relating contemporary dance to the fine arts. Letter grade only (A-F).

488. Organization of Dance Production (3)

Prerequisite or Corequisite: DANC 312. Analysis and practice in the production elements of dance concerts. Course is coordinated with a department concert. Letter grade only (A-F).

489. Special Topics in Dance (1-3)

Prerequisite: Consent of instructor. Topics of current interest in the field of dance selected for special presentation and development. Topics will be announced in the *Schedule of Classes*. May be repeated to a total of 6 units. (2-6 studio hours).

490. Special Topics in Dance (1-3)

Prerequisite: Consent of instructor. Topics of current interest in the field of dance selected for special presentation and development. May be repeated to a maximum of 12 units with different topics, or consent of department chair. Topics will be announced in the *Schedule of Classes*. (2-6 studio hours)

*491A. Design for Dance Lighting (3)

Prerequisites: Upper division status or consent of instructor. Techniques of designing lighting for dance. Practical applications include designing and executing lighting for dance for concerts in various settings. Letter grade only (A-F). (6 studio hours)

*491B. Design for Dance Costuming (3)

Prerequisites: Upper division status or consent of instructor. Designing and constructing costumes for dance. (6 studio hours)

493. Computers for Dance (3)

Prerequisites: Dance major or minor. Theory and practice in the basic techniques of computer usage in the art form of dance. Letter grade only (A-F). May be repeated to a maximum of 6 units.

495. Repertory (1-3)

Prerequisite: Audition. Students learn and perform works of distinguished choreographers. Leads to concert performance. May be repeated to a maximum of 18 units provided it is with a different instructor each time. (2-6 studio hours)

499. Directed Studies in Dance (1-3)

Prerequisite: Consent of Instructor. Independent projects and research of advanced nature in any area of dance.

Graduate Level

05. Seminar in Dance Methodology (3)

Prerequisite: Acceptance into the MA or MFA program or consent of advisor. Discussion specific to the teaching of dance in preparation for teaching in secondary and post-secondary education. Letter grade only (A-F).

510A,B,C,D. Technique Laboratory (1-3, 1-3, 1-3, 1-3)

MFA Choreography option students are required to take a technique class each semester. By registering for DANC 510, each will be assigned to an appropriate level technique class. Additional work will be required as appropriate to a graduate level course. May be repeated to a maximum of 6 units. (2-6 studio hours)

512. Advanced Modern Technique (3)

Prerequisites: Placement screening. A course for graduate dance majors in the advanced skill of modern dance techniques. Letter grade only (A-F). May be repeated to a maximum of 18 units. (6 studio hours)

514. Advanced Ballet Technique (3)

Graduate level skills in ballet technique. Letter grade only (A-F). May be repeated to a maximum of 12 units. (4 studio hours)

518. World Dance II (1-3)

For graduate dance majors to learn the techniques and styles of ethnic dance forms. A dancer from the culture will teach the class. A different culture will be studied each semester. Letter grade only (A-F). May be repeated to a maximum of 8 units. (2 studio hours per unit.)

520A. Choreography A (2)

A course in advanced approaches to the development of choreographic materials and techniques. The class will include an introduction of video and other multi-media techniques as choreographic tools. Letter grade only (A-F). (4 studio hours)

520B. Choreography B (2)

Prerequisite: DANC 520A. Course in advanced study of choreographic methods with an emphasis on the use of costumes, sets/props, and lighting for dance. Letter grade only (A-F). (4 studio hours)

520C. Choreography C (2)

Prerequisite: DANC 520B. A course in advanced methods and techniques of choreography concentrating on the individual style of the students' work and in depth study in developing a full-length dance work. Class will involve choreographing works of substantial length using small and large numbers of dancers. Instruction will emphasize consistency in choreographic style and content. Letter grade only (A-F). (4 studio hours)

520D. Choreography D (2)

Prerequisite: DANC 520C. A course in the advanced study of choreographic methods, with an emphasis on the use of costuming, lighting, music/sound and other production techniques in preparation for performance. The course involves presenting finished full-length costumed dance works, lighting designs for the work or works and learning the methods of directing dancers during the production run of a concert. Letter grade only (A-F). (4 studio hours)

520E. Choreography E (2)

Prerequisites: DANC 520D or consent of instructor. Methods and practice of developing choreography utilizing an integration of related art forms as the basis for compositional exploration. Letter grade only (A-F). (4 studio hours)

521. Dance Composition III (3)

Prerequisite: Admission to the MA degree program in Dance. Methods and practice of developing choreography as related to the high school and community college setting. Letter grade only (A-F).

531. Music for Dance II (1-3)

Prerequisite: DANC 331 or equivalent. This course is to provide dance students an opportunity for advanced, in-depth study of musical form and style as it applies to dance. Letter grade only (A-F).

545./445. Movement Analysis (3)

Prerequisites: Open to Dance Majors and Minors only. Study of the principles underlying movement and their application to all areas of movement study. Letter grade only (A-F). (Lecture 2 hours, 2 studio hours)

560./360. Prevention and Care of Dance Injuries (3)

Prerequisite: DANC 260 or consent of instructor. The application of principles of anatomy and kinesiology, integrated with principles of training, for the purpose of fostering a scientific understanding of common dance injuries and their prevention. This course will also focus on the development of the primary components of health-related physical fitness: muscular strength, muscular endurance, flexibility, cardiovascular fitness and body composition in an effort to reduce injury risk and facilitate healthy dance training while attempting to maximize each individual dancer's physiological potential. Letter grade only (A-F).

565. Dance Science as Related to Teaching Technique (3)

Prerequisite: DANC 260 and 505, or consent of instructor. A regional presentation of key kinesiological principles will be utilized to develop an understanding of mechanics, strength, and flexibility exercises, which can then be applied to enhance dance technique and prevent injuries. Scientific principles drawn from exercise physiology will also be combined with anatomical principles to evaluate and better design dance technique classes. Letter grade only (A-F).

570./370. Video for Dance (2)

Skills and techniques in analyzing, documenting, and editing dance performances and rehearsals; use and interface of the digital camera. Examines the field of dance documentation and the editing and creative concepts most associated with dance for the camera. Letter grade only (A-F). (Lecture 1 hour, 2 studio hours)

580A,B. Dance Performance (1)

Prerequisite: Audition. Participation as a performer and/or choreographer in Dance Department approved University-sponsored production. Letter grade only (A-F). May be repeated to a maximum of 2 units. (3 or more studio hours)

585A,B. Dance Performance (1)

Prerequisite: Audition. Participation as a performer and/or choreographer in Dance Department approved University-sponsored production. Letter grade only (A-F). May be repeated to a maximum of 2 units. (3 or more studio hours)

588. Seminar in Dance Management (2)

Techniques and practices in producing and promoting dance performances in fixed sites and in touring venues relevant to the production of MFA thesis concerts and to venues outside the University. For graduate students with prior experience in the field. Letter grade only (A-F).

590. Special Topics (1-3)

Prerequisite: Acceptance into MFA program in dance. Topics of current interest to graduate students in dance will be selected for intensive study. Letter grade only (A-F). May be repeated to a maximum of 6 units with different topics.

591A. Advanced Design for Dance Lighting (3)

Provides students with advanced work in design lighting for dance, and offers the in-depth technical knowledge and practical experience necessary to the execution of complete lighting plots. Letter grade only (A-F). (6 studio hours)

591B. Advanced Design for Dance Costuming (3)

Provides graduate students with advanced coursework in designing costumes for dance, and with skills necessary to execute the designs. Letter grade only (A-F). (6 studio hours)

592. Special Topics (1-3)

Prerequisite: Acceptance into MFA program in dance. Topics of current interest to graduate students in dance will be selected for intensive study. Letter grade only (A-F). May be repeated to a maximum of 6 units with different topics. (2-6 studio hours)

595. Repertory (1-3)

Prerequisite: Audition. A course for graduate dance majors to learn more advanced works from the repertoire of noted choreographers or to have new works created on the students by distinguished choreographers. Instruction, rehearsal and performance gives the dance student a broader knowledge of the various methods used by professional choreographers and the experience of performing those works on stage before an audience with full theatrical production including music, sound, costumes and sets. Letter grade only (A-F). May be repeated to a maximum of 6 units. (2-6 studio hours)

597. Criticism and Analysis of Dance (2)

Students will analyze choreography and write critiques in order to learn how to look at and evaluate dance works. Letter grade only (A-F).

599. Directed Studies (1-3)

Prerequisite: Consent of instructor. Individual research or project under the guidance of a faculty member. May be repeated to a maximum of 6 units. Letter grade only (A-F).

605. Seminar in Dance (1-3)

Prerequisites: Acceptance into the MA or MFA in Dance. The course will be conducted as a seminar. Literature, including research appropriate to the particular topic of the course, will be examined and discussed. Letter grade only (A-F).

642. Seminar in Dance History (3)

Intensive study of selected topics in the History of Dance. Letter grade only (A-F). May be repeated to a maximum of 9 units with different topics.

698. Thesis/Project (1-6)

Prerequisite: Advancement to candidacy. Planning, preparation, and completion of a thesis/project in dance for the M.A. degree. May be repeated to a maximum of 6 units. Letter grade only (A-F).

699. Thesis/Project (1-6)

Prerequisite: Advancement to Candidacy. Planning, preparation, and completion of a thesis/project in dance. Letter grade only (A-F). May be repeated to a maximum of 6 units.

The Department of Design was established to provide an administrative and academic framework for professional design training in the fields of Industrial Design, Interior Architectural Design, and Display/Exhibition Design. The degree programs that may be pursued are the Bachelor of Fine Arts, the Master of Arts, the Master of Fine Arts, and the Bachelor of Science, offered in the Industrial Design curriculum.

The faculty of Design believe that an appropriate education for the professional designer must include a comprehensive body of technical knowledge. Such knowledge should include historical sources, tools, techniques, and materials; a methodology for encouraging the creative process; and the attainment of the requisite level of skill to express visual ideas with clarity. While being fully equipped to meet the objectives of the marketplace, today's designer must also achieve sufficient educational breadth to adapt successfully to the varying demands imposed on design work by economic, social, and psychological factors.

The academic programs of the Department of Design have been accredited by the National Association of Schools of Art and Design (National Association of Schools of Art and Design, 11250 Roger Bacon Drive, Suite 21, Reston, VA 20190, phone: 703-437-0700). Student demand for these programs is high. Requirements for admission and degree requirements are given below.

Bachelor of Fine Arts in Art

The Bachelor of Fine Arts in Art degree is offered as preparation for the student who will eventually seek the Master's degree or a position as a professional designer. The BFA program is a rigorous and competitive one. One hundred and thirty-two semester units are required for the degree, including 81 units for the major and 51 for General Education. Portfolio review is required for admission to the professional BFA program. Portfolios are reviewed in the spring semester for fall admission to junior standing and the upper division program.

Option in Interior Design (code ART_BF09) (132 units)

Requirements

Lower Division: AH 115B, 115C; DESN 120A, 120B, 132A, 132B, 141, 142, 151, 232, 241, 242, 243, 244, 245, 246.

Upper Division: DESN 341A, 341B, 342, 343, 346, 367, 369, 440, 441A, 441B; eight units of design/art electives, outside of Interior Design approved by the major adviser. Approved lower and upper division electives to total 132 units.

Students must achieve "C" or better in each required design course to progress in the sequence of study.

Bachelor of Science in Industrial Design (code DESNBS01) (132 units)

This degree program is concerned with the relationship between technology and the visual arts. It includes background courses in engineering and sciences. Students must achieve "C" or better in each required design course to progress in the sequence of study. A grade of "B" or better in DESN 280 and consent of instructor is required in order to enroll in DESN 331A.

Requirements

Lower Division: AH 115B, 115C; DESN 120A, 120B, 132A, 132B, 150, 151, 154, 156, 232, 254, 256, 280. A grade of "B" or better in DESN 280 and consent of instructor is required in order to enroll in DESN 331A.

Upper Division: DESN 331A, 331B, 333A, 333B, 368, 431A, 431B; twelve units of design/art electives, nine units of which must be outside of Industrial Design approved by the major adviser. Approved lower and upper division electives to total 132 units.

Students must achieve "C" or better in each required design course to progress in the sequence of study.

**FAQ Concerning Road Maps for Completion
of Undergraduate Degrees**

For each undergraduate major, the on-line Catalog shows plans for scheduling all required courses to complete the degree in four, five, or six years.

While CSULB will make every effort to schedule classes at the times shown in the plans, we cannot guarantee that courses will be available in specific semesters. It is possible that shortage or budget or of personnel will make it impossible to offer as many classes as we would wish.

The plans are not substitutes for working with an advisor. You are strongly encouraged to see an advisor when planning your program each term.

I am a freshman. Do I have to choose now whether to follow the four, five, or six-year plan?

No. Most freshmen take 12-15 units. You need at least 12 units to receive full financial aid. With experience, you will be able to judge how heavy a load you find comfortable. This will depend on your outside obligations, such as a job, and on your personal circumstances. In theory, each unit requires three hours a week, including preparing for class, attending class, and completing assignments. Use these guidelines to budget your time and plan an appropriate schedule.

Must I take the courses in the semesters shown on the plan?

The plan shows one possible way of completing all requirements for the degree. Consult your advisor about whether it is essential to take a given course in the semester shown. There are some rules to keep in mind:

1) You can take the General Education Foundation courses (Composition, Oral Communication, Critical Thinking, Mathematics) in any semester in the first 36 units of baccalaureate-level course work completed at CSULB.

2) You cannot take upper division courses until you have completed at least 30 units. (Exceptions can be made for students who already have completed advanced study in the subject.) You cannot take General Education Capstone courses until you have completed at least 60 units.

3) For some majors it is essential to complete courses in the correct sequence. You cannot take a more advanced course until you have completed the prerequisite course(s).

4) You must complete all requirements for admission to impacted majors within the first 60 units.

I have been told that I must take one or more pre-baccalaureate courses. How can I plan my program?

Your advisor at SOAR can help you identify which courses must be postponed. You must still complete the minimum number of baccalaureate units required for the degree.

You may be able to catch up by taking additional courses in later semesters or by taking classes in summer or winter session, or you may choose to spend an additional semester completing the program. You cannot begin the sequence of required courses for some majors until you are ready for baccalaureate-level Mathematics. See your major advisor to develop a plan for scheduling the required courses.

I didn't complete the exact list of courses shown. Can I still graduate on time?

The answer depends on your major and on what courses you have completed. The plans are not rigid requirements; they are only intended to provide guidance in planning a program. There are many reasons for students to follow a different pattern, such as changing the major, choosing to take fewer classes in a given semester, choosing to complete a minor or a second major. See your advisor for help in planning a program that will work for you.

If I follow the plan, will I have all requirements for graduation completed?

The plans include the specific courses required for the major. For some majors, there are restrictions on the choice of major electives. It is important that you select General Education courses to meet the required distribution pattern. You may need to take an additional General Education course to complete the minimum number of units required for each category. This is likely to happen if you took three-unit courses in Category B, Physical Universe.

Master of Arts in Art (code ART_MAO1)

The Design Department Master of Arts in Art program provides professional specializations within the degree: Industrial Design, Interior Design, and Display/Exhibition Design.

Prerequisites

1. A bachelor's degree from an accredited institution with a minimum of 24 upper division units in design/art comparable to those required of a major in Design at this University;
2. Completion of 16 units minimum of upper division course work in the area of specialization;
3. Completion of 12 units of design/ art history, six units of which must be upper division;
4. Successful completion of the Writing Proficiency Examination;
5. Presentation, to the student's specialization faculty, of a portfolio of representative studio work with emphasis in the area of specialization. Reviews are completed by the first week in October for the following spring semester, by the first week in March for the following fall semester;
6. A GPA of 3.0 or better in upper division design/art course work. Students who do not meet the minimum 3.0 GPA within the required 24 units as an undergraduate may count units taken as a post-baccalaureate student to meet this GPA. Course work taken as a graduate to validate undergraduate preparation may not be used to satisfy any requirement in the student's MA program.

All prerequisites must be fulfilled before a student can become classified in a graduate degree program.

Advancement to Candidacy Requirements

1. Classified graduate standing. Completion of all prerequisites;
2. A graduate program approved by the student's committee, the Graduate Advisor, the Design Department Chairman, and the Dean of the College of the Arts;
3. A GPA of 3.0 or higher in all work undertaken for the program;
4. The removal of any Incompletes;
5. Successful completion of the Advancement Review;

Requirements

Completion of all requirements established by the student's graduate advisory committee, including:

1. A minimum of 33 units of approved upper division and graduate-level courses; a minimum of 15 units at the 500- and 600-level; a minimum of 20 units in the specialization;
2. A studio thesis project. All studio projects must be formally exhibited (DESN 692) with a written Artists Statement.

Master of Fine Arts in Art (code ART_MF01)

The Design Department Master of Fine Arts degree program provides specializations in: interior design and display/exhibition design.

Prerequisites

1. A bachelor's degree from an accredited institution with a minimum of 24 units of upper division design course work comparable to those required for the BFA in Design at this University;
2. Completion of a minimum of 18 units of upper division course work in the area of specialization for the proposed MFA;
3. Completion of a minimum of 12 units of design/art history, six units of which must be upper division;
4. Successful completion of the Writing Proficiency Examination;
5. Presentation, to the student's specialization faculty, of a portfolio of representative studio work with emphasis in the area of specialization. Reviews are completed by the first week in October for the following spring semester, by the first week in March for the following fall semester. (See MA and MFA procedures, "Screening for Acceptance" for details);
6. A GPA of 3.0 or better in upper division design/art course work. Students who do not meet the minimum 3.0 GPA within the required 24 units as an undergraduate may count units taken as a post-baccalaureate student to meet this GPA. Course work taken as a graduate to validate undergraduate preparation may not be used to satisfy any requirement in the student's MA program.

All prerequisites must be fulfilled before a student can become classified in a graduate degree program.

Advancement to Candidacy Requirements

1. Classified Graduate standing. Completion of all prerequisites;
2. A graduate program approved by the student's committee, the Graduate Advisor, the Design Department Chairman, and the Dean of the College of the Arts;
3. A GPA of 3.0 or higher in all work undertaken for the program;
4. The removal of any Incompletes;
5. Successful completion of the Advancement Review;

Requirements

A minimum of 60 units of approved coursework, at least 60 percent of which must be at the 500- and 600-levels, including at least:

1. Thirty-six 36 units in the area of specialization. Thirty of these units must be in the 500- and 600-levels and must include 690A, 690B, 692, and 699;
2. Six units of approved upper-division or graduate coursework outside of design;
3. A comprehensive review, administered by the student's graduate advisory committee, after the completion of 21 units of studio coursework. This review is to determine whether the candidate will continue in the MFA program;
4. A minimum of 6 units of approved upper division or graduate design/ art history beyond that required as prerequisite work;
5. Twelve units of upper division or graduate level elective coursework in design;
6. A studio project (DESN 699), exhibited and described in a studio thesis (DESN 692).

MFA Transfer and Residence Policy

1. Transfer credit allowable on the MFA may not exceed 24 units;
2. MFA candidates must complete a minimum of 18 specialized units with graduate numbers in residence;
3. All transferred credit used in the MFA must be determined by the student's graduate committee and approved by the department Graduate Advisor;
4. The CSULB Master of Arts degree may be counted for a maximum of 24 units (18 in specialization) toward the MFA degree.

Courses (DESN)

Lower Division

120A-B. Fundamentals of Design (3-3)

Prerequisites: for 120A: none; for 120B: 120A. A systematic approach to the process of designing two and three-dimensional objects including color theory, surface and volume investigation. (6 hours laboratory) Letter grade only (A-F).

132A-B. Perspective and Rendering Systems (3-3)

Prerequisites: for 132A: none; for 132B: 132A. Fundamentals of drawing, perspective and rendering techniques used in the design disciplines for accurate and dramatic presentations. (6 hours laboratory.) Letter grade only (A-F).

141. Interior/Architectural Drafting (3)

Architectural drafting and graphic techniques used in light framing and commercial construction with emphasis on interiors. (6 hours laboratory)

142. Beginning Space Planning (3)

Prerequisites: DESN 141. Functional, human, and aesthetic factors of space planning for interiors. (Laboratory 6 hours) Letter grade only (A-F).

150. Design Drafting (3)

Introduction to manual and computer aided drafting. Includes descriptive geometry; mechanism sketching; orthographic and isometric drafting; blueprint reading, printing and plotting. (6 hours laboratory) Letter grade only (A-F).

151. Industrial Design Materials and Tools (2)

Hands-on experience with wood, metal and plastic materials and the technical tools for creating form. Includes appropriate safety instruction for the use of power equipment. (4 hours laboratory) Letter grade only (A-F).

154. Modeling and Prototyping Techniques (2)

Prerequisites: DESN 150, 151. Materials, processes and techniques for creating mock-ups, models and prototypes used by industrial designers. (4 hours laboratory). Letter grade only (A-F).

156. 3D Computer-Aided Design (3)

Prerequisites: DESN 150. Computer aided modeling strategies and techniques for depicting three-dimensional surfaces and solids. (6 hours laboratory) Letter grade only (A-F).

232. Visualization Techniques (3)

Prerequisites: DESN 120B, 132B, consent of instructor. Introduction to technical drawing and visual presentation of concepts using communication techniques employed by professional design studios. (6 hours laboratory) Letter grade only (A-F). May be repeated to a maximum of 9 units.

241. Design Drawing and Processes (3)

Prerequisites: DESN 120B, 132B or consent of instructor. Introduction to Design Drawing and Design Processes. Sketching and solving limited scale interior and architectural problems. (Laboratory 6 hours.) Letter grade only (A-F).

242. Interior/Architectural Model Building (3)

Prerequisites: DESN 120B, 132B, 142. Building of interior/architectural models for construction, design analysis and presentation. (Laboratory 6 hours.) Letter grade only (A-F).

243. Materials of Interiors (3)

Prerequisites: DESN 120B, 132B, or consent of instructor. Materials, processes and resources as they relate to interior architecture. Examination of technology and application through lecture, demonstration and field trips.

244. Lighting Design for Interior Architecture (3)

Prerequisites: DESN 120B, 132B, 142. Use of conceptual and practical design problems. The nature and properties of light and color are studied. (Laboratory 6 hours.) Letter grade only (A-F).

245. Building Systems for Interior Architecture (3)

Prerequisites: DESN 142. Survey of design implications of typical building systems (structural, mechanical, plumbing, electrical, acoustical, energy conservation) as influences on interior architectural design. Letter grade only (A-F).

246. Computer-aided Drafting (3)

Prerequisite: DESN 141. Principles and methods of computer graphic applications utilizing AutoCad. Computer drafting of commercial and residential projects. May be repeated to a maximum of 6 units.

254. Production Materials and Technical Processes (3)

Prerequisites: DESN 150, 151, 154, 156. The study of production processes and industrial materials utilized in the manufacturing of products. Includes introduction to rapid prototyping. (6 hours laboratory) Letter grade only (A-F).

256. 2D Computer-Aided Design (2)

Prerequisites: DESN 150. Computer aided drawing, rendering, and image manipulation for presentation authoring. Includes lighting and animation techniques. (4 hours laboratory) Letter grade only (A-F).

280. Industrial Design Processes (3)

Prerequisites: DESN 120B, 132B, 156, 232, 254, 256. Introductory course in the design processes utilized by industrial designers for product development. (6 hours laboratory) Letter grade only (A-F).

290. Design Methods and Practice (3)

Prerequisites: DESN 150, 151. Survey of design office procedures, methods and professional practices. Includes creative problem solving, market analysis and management.. (6 hours laboratory) Letter grade only (A-F).

Upper Division

*331A-B. Industrial Design (3-3)

Prerequisites: for DESN 331A: Completion of DESN 280 with a "B" or better and consent of instructor; for DESN 331B: DESN 331A. Planning and design of useful products for industrial production. (6 hours laboratory.)

*333A-B. Industrial Design Methodology (3-3)

Prerequisites: for 333A: Consent of instructor; for 333B: DESN 333A or consent of instructor. Examination of methods and techniques in design problem solving. (6 hours laboratory.)

*341A-B. Interior Design (3-3)

Prerequisites: for 341A: DESN 232, 243; ART 115B, 115C; for 341B: DESN 341A. Design of interior environments emphasizing interrelationships between interior space, architectural form and human factors in design. (6 hours laboratory.)

342. Interior/Architectural Presentations (3)

Prerequisites: DESN 232, 241, and Junior standing in the professional program. Exploring and using various techniques and methods of visually and verbally presenting design concepts, ideas, and finished projects. (Laboratory 6 hours.) Letter grade only (A-F).

343. Advanced Drafting and Detailing (3)

Prerequisites: DESN 242, 245, and Junior standing in the professional program. Advanced drafting and detailing skills of architectural interior design related to light frame and other construction processes. (Laboratory 6 hours.) Letter grade only (A-F).

*344A-B. Display and Exhibition Design (3-3)

Prerequisites: ART 115B, 115C; DESN 120B, 232 or consent of instructor. Use of materials, processes, and design concepts in the planning and preparation of displays and exhibits. (6 hours lab.)

346. Computer-Aided Design – 3D Modeling (3)

Prerequisites: DESN 132B, 242, 246. Computer-aided drawing, rendering, 3D drawing and solid modeling. Includes lighting and animation techniques for spatial/architectural modeling and design. May be repeated to a maximum of 6 units.

351A. Process of Architectural/Interior Lighting Design (3)

Prerequisites: DESN 232, 142, 244 or 254; or consent of instructor. Exploration of processes used to conceptualize, present and develop architectural lighting designs. Letter grade only (A-F). (Laboratory)

351B. Applications of Architectural/Interior Lighting Design (3)

Prerequisites: DESN 246, 351A, or 256. Exploration of the major categories of applications (e.g., residential, office, etc.) and the specific principles, conventions and codes that apply to them as well as the basic use of lighting equipment common to these applications. Letter grade only (A-F).

367. History and Theory of Architecture (3)

Prerequisite: Completion of GE Foundation requirements. Evolution of architecture relative to the human need to shape environment in accordance with governing concerns of specific periods in history. Not open to students with credit in ART 417.

368. History and Theory of Design (3)

Prerequisite: Completion of GE Foundation requirements. Development of design as an independent creative activity including a consideration of both pre-technological and technological culture. Not open to students with credit in ART 418.

369. History of Furniture and Decorative Arts (3)

Study of the history of furniture, finish materials, and accessories. (Lecture-discussion 3 hrs.) Letter grade only (A-F).

370. Design in Contemporary Society (3)

Prerequisite: Completion of GE Foundation requirements. Discover the principles of design by examining the human relationship to the built environment through a sequence of scales: from the organization of cities, to public architecture and housing, the design of furniture and products. Emphasis will be on experiencing design through lecture, lab, field observations and projects. Letter grade only (A-F).

*431A-B. Advanced Industrial Design (4-4)

Prerequisites: DESN 331B, PHYS 100AB or consent of instructor. Advanced planning and design of projects in the area of mass produced objects, packaging, traffic, transportation, mechanical design and shelter. (8 hours laboratory.)

*432. Advanced Rapid Visualization (3)

Prerequisites: DESN 232 or consent of instructor. Advanced idea generation and visualization for designers. (6 hours laboratory)

*435A. Furniture Design (3)

Prerequisites: DESN 232, 331A, 341A, or consent of instructor. Design of public and private interior furnishings with an in depth study of the potentials of contemporary production methods and materials. (6 hours laboratory.)

435B. Advanced Furniture Design (3)

Prerequisites: DESN 435A, or consent of instructor. Continuation of DESN 435A. Projects focus upon research and the impact of human factors on the design of furniture. Letter grade only (A-F).

440. Professional Practices for Interior Architecture (3)

Prerequisites: Consent of instructor. Examination of professional practices for commercial (corporate) institutional/public interior architectural design. Letter grade only (A-F).

*441A-B. Advanced Interior Design (4-4)

Prerequisites: DESN 341B, 343 or consent of instructor. Advanced interior design and space planning problems emphasizing relationships between the built environment and human factors in design. (6 hours laboratory.) Letter grade only (A-F).

*442G. Internship in Industrial Design (3)

Prerequisite: Consent of instructor. Student internship experience in selected industrial design offices. Opportunity to work under supervision of industrial designers in the field to expand student understanding of the complexities, discipline and challenges in the practice of industrial design. May be repeated to a maximum of 6 units. (6 hours laboratory.)

*442H. Internship in Interior Design (3)

Prerequisite: Consent of instructor. Student internship experience in selected interior design offices. An opportunity to work under supervision of interior designers and architects in the field to expand student understanding of the complexities, discipline and challenges in the practice of interior design. Limited to six units in one semester and a total of nine units. (6 hours laboratory.)

*490. Special Topics in Design (1-3)

Prerequisite: Consent of instructor. Special topics of current interest in design will be selected for intensive study. May be repeated to a maximum of 12 units with different topics. Topics will be announced in the *Schedule of Classes*. (2-6 hours lab.)

*495. Field Studies in Design (1-6)

An opportunity to study design movements, objects, theories, techniques at appropriate off-campus locations. Up to 6 units of cumulative credit may be earned in DESN 495.

*499C. Special Studies in Display and Exhibition Design (3)

Prerequisite: Consent of instructor. Opportunity for extensive work with faculty supervision on individual problems in display and exhibition design. Limited to 6 units in one semester and a total of nine units. (6 hours laboratory.)

*499G. Special Studies in Industrial Design (3)

Prerequisite: Consent of instructor. Opportunity for extensive work with faculty supervision on individual problems in industrial design. Limited to 6 units in one semester and a total of 9 units. (6 hrs laboratory.)

*499H. Special Studies in Interior Design (3)

Prerequisite: Consent of instructor. Opportunity for extensive work with faculty supervision on individual problems in interior design. Limited to 6 units in one semester and a total of 9 units. (6 hours laboratory.)

Graduate Level

590. Special Problems in Design (1-3)

Prerequisite: Consent of instructor. Special problems of current interest in design will be selected for intensive study. May be repeated to a maximum of 12 units with different topics. Topics will be announced in the *Schedule of Classes*. (2-6 hours laboratory.) Letter grade only (A-F).

599. Studio Problems in Design (3)

Prerequisite: Consent of instructor. Advanced individual graduate projects, with faculty supervision, in an area of design specialization. Limited to six units in one semester and a total of 12 units in any one area. Areas will be designated by letter at the time of registration. (6 hours laboratory.) Letter grade only (A-F).

C. Display and Exhibition

G. Industrial Design

H. Interior Design

690A. Seminar in Design (3)

Prerequisite: Consent of instructor. Selected reading and writing concerning topics relevant to student's specific disciplines in design with an opportunity for interdisciplinary discussion. Letter grade only (A-F).

690B. Seminar in Design (3)

Prerequisite: Consent of instructor. Professional preparation for designers stressing practical concerns as well as current trends in design practices, theory and criticism. Letter grade only (A-F).

692. Public Exhibition (2-3)

Prerequisite: Consent of instructor. Planning, preparation and administration of a public exhibition of creative work related to the design field. Two units only for all M.A. candidates. Three units only for all M.F.A. candidates. The course will result in a public exhibition by each M.A. and M.F.A. candidate. Letter grade only (A-F). (6 hours or more laboratory.)

694. Directed Studies Studio (1-3)

Prerequisite: Consent of instructor. Independent studies in creative studio. Letter grade only (A-F).

695. Field Problems in Design (1-6)

Opportunity to study design movements, objects, theories, techniques or literature at appropriate off-campus locations. Up to 6 units of cumulative credit may be earned in DESN 695.

697. Directed Studies (1-3)

Prerequisite: Consent of instructor. Independent studies in technical and historical aspects of design. Letter grade only (A-F).

698. Thesis or Project (1-6)

Prerequisite: Advancement to candidacy. Planning, preparation and completion of a thesis or project. Required of all Master of Arts candidates.

699. Thesis or Project (1-6)

Prerequisite: Advancement to candidacy. Planning, preparation and completion of thesis or project. Required of all M.F.A. candidates and all candidates seeking a second M.A.

When resources are scarce, difficult choices must be made on how resources are to be divided among competing uses. Economics is a social science that addresses the allocation of scarce resources. When applied to individuals, economics attempts to understand the behavior of individuals as consumers, managers and government officials. When applied to society as a whole, economics attempts to explain and predict the economy's total output, level of employment and price level.

Bachelor of Arts in Economics (code ECONBA01) (120 units)

The bachelor of arts degree with a major in economics prepares students for a variety of careers in business and government. The degree also provides the foundation for teaching in elementary and secondary schools and for more advanced study in economics, business, law, and other related fields.

Requirements

Lower Division: ECON 100, 101, ACCT 201, and either MATH 115 or 122. Students with upper division status declaring Economics as a major may substitute ECON 300 for ECON 100 and 101.

Upper Division: 310, 311, 380, and six additional upper division courses in economics of which at least two must be at the 400-level. The following courses may not be used to satisfy the elective requirement in economics: ECON 300, 309I, 495 and 499.

The major also requires a minimum of two courses outside of Economics (totaling at least six units). Students may take any upper division courses from the departments listed below, or any of the following lower division courses: ANTH 120, GEOG 100, HIST 131, 132; MATH 114, 117, 123, 224; POSC 201; PSY 100; S W 220; SOC 100.

FOUR YEAR PLAN TO COMPLETE THE B.A. DEGREE in ECONOMICS (ECONBA01)

120 units required				Department of Economics			
Semester 1		Semester 2		Semester 3		Semester 4	
University 100	1	Oral Comm or Composition	3	Critical Thinking or other GE	3	ACCT 201	3
Composition or Oral Comm	3	ECON 100	3	GE Class	3-4	GE Class	3
Math 115 or 122 (GE B2)	3-4	GE Class	3	GE Class	3	Elective Class	3
GE Class	3	GE Class	3	GE Class	3	Elective Class	3
GE Class	3	Elective Class	1	TOTAL UNITS	14-15	TOTAL UNITS	15-16
Elective Class	1	TOTAL UNITS	14-15	TOTAL UNITS	15-16	TOTAL UNITS	15-16

Semester 5		Semester 6

Major Elective	3	Major Elective	3
GE Capstone Class	3	Elective Class	3
Elective Class	3	Elective Class	3
Elective Class	3	Elective Class	3
TOTAL UNITS	15	TOTAL UNITS	15

6 units must be taken outside of Econ from the following depts.: ANTH, GEOG, HIST, MATH, POSC, PSY, S W, SOC and may satisfy both GE and major requirements. See University Catalog or major advisor for specific requirements. ECON 300, 495, and 499 may not be used to satisfy the elective requirement in Economics

Two of the upper division major requirements must be at the 400 level

Option in Mathematical Economics and Economic Theory (code ECONBA02) (120 units)

The Bachelor of Arts in Economics with an option in Mathematical Economics and Economic Theory provides students with the tools of economic analysis with an emphasis on economic theory, economic optimization and statistics. This option is recommended for students interested in graduate study in economics.

Requirements

Lower Division: ECON 100 and 101, MATH 122, 123, 224 and 247. Students with upper-division status declaring the option may substitute ECON 300 for ECON 100 and 101 with departmental consent.

Upper Division:

Economic Theory: ECON 310 and 311.

Statistics: ECON 380 and 485, or MATH 380 and 381.

Advanced Theory and Quantitative Methods: At least one of the following courses: ECON 403, 410H, 411H, 420, 433, or 486.

Elective Courses: At least four additional upper-division courses in economics of which at least one must be taken at the 400 level. Students may take one course from the following in meeting the elective requirement: MATH 364A, 480, 483 or 485. ECON 300, 309I, 380, 485, 495 and 499 may not be taken to meet the elective requirement.

FOUR YEAR PLAN TO COMPLETE THE B.A. DEGREE in MATHEMATICAL ECONOMICS & ECONOMIC THEORY (ECON-BA02)

120 units required		Department of Economics	
Semester 1		Semester 2	
University 100	1	Oral Comm or Composition	3
Composition or Oral Comm	3	MATH 123 (GE B3)	4
Math 122 (GE B2)	4	ECON 100	3
GE Class	3	Critical Thinking or other GE	3
GE Class	3	GE Class	3

GE Capstone Class*	3	Major Elective	3
Elective Class	3	GE Capstone Class*	3
Elective Class	3	Elective Class	3
TOTAL UNITS	15	TOTAL UNITS	15

Semester 7		Semester 8	
Major Elective-Adv Theory/Quant Methods	3	Major Elective 400 level	3
Major Elective	3	Major Elective (if needed)	3
Major Elective (if needed)	3	Elective Class	3
GE Capstone Class*	3	Elective Class	3
Elective Class	3	Elective Class	3
TOTAL UNITS	15	TOTAL UNITS	15

* GE Interdisciplinary Capstones may count in GE and major if selected - see advisor
Major elective courses should be decided in consultation with advisor. Students may take one course from the following to meet the elective requirement: MATH 364A, 480, 483 or 485; these will not substitute for the 400 level economics requirement. ECON 300, 380, 495, and 499 may not be taken to meet the elective requirement..

Bachelor of Arts in Business Economics (code ECONBA03) (120 units)

The bachelor of arts degree with a major in business economics provides students with the tools of economic analysis and their application in a business environment.

The business economics major prepares students for careers in the private or public sector. Students completing this major will have a solid foundation in microeconomic theory, macroeconomic theory, and quantitative methods.

They will have also completed courses in international economics and business administration. The bachelors degree in business economics is excellent preparation for graduate study in economics, business administration, public administration, and law.

Requirements

Lower Division Requirements: ECON 100, 101, ACCT 201, and either MATH 115 or MATH 122. Students with upper division status declaring economics as a major may substitute ECON 300 for ECON 100 and 101.

Upper Division Requirements: ECON 310, 311, and 380, and six additional upper division courses of which at least two must be at the 400 level. At least three courses must be selected from Group A; at least one course must be selected from Group B; and, at least one course from Group C. The remaining elective may be selected from Group A, B, or C, or any other upper division course in economics except ECON 300, 309I, 495, and 499.

Group A: Business Economics and Quantitative Economics (select at least three courses): ECON 320, 333, 355, 403, 420, 422, 430, 432, 433, 434, 441, 463, 485, 486.

Group B: International Economics (select at least one course): ECON 361I, 365, 368, 369, 370, 372, 465, 472.

Group C: Business Administration (select at least one course): ACCT 310, CBA 300, FIN 300, FIN 320, HRM 360, MGMT 300, MKTG 300.

FAQ Concerning Road Maps for Completion of Undergraduate Degrees

For each undergraduate major, the on-line Catalog shows plans for scheduling all required courses to complete the degree in four, five, or six years.

While CSULB will make every effort to schedule classes at the times shown in the plans, we cannot guarantee that courses will be available in specific semesters. It is possible that shortage or budget or of personnel will make it impossible to offer as many classes as we would wish.

The plans are not substitutes for working with an advisor. You are strongly encouraged to see an advisor when planning your program each term.

I am a freshman. Do I have to choose now whether to follow the four, five, or six-year plan?

No. Most freshmen take 12-15 units. You need at least 12 units to receive full financial aid. With experience, you will be able to judge how heavy a load you find comfortable. This will depend on your outside obligations, such as a job, and on your personal circumstances. In theory, each unit requires three hours a week, including preparing for class, attending class, and completing assignments. Use these guidelines to budget your time and plan an appropriate schedule.

Must I take the courses in the semesters shown on the plan?

The plan shows one possible way of completing all requirements for the degree. Consult your advisor about whether it is essential to take a given course in the semester shown. There are some rules to keep in mind:

1) You can take the General Education Foundation courses (Composition, Oral Communication, Critical Thinking, Mathematics) in any semester in the first 36 units of baccalaureate-level course work completed at CSULB.

2) You cannot take upper division courses until you have completed at least 30 units. (Exceptions can be made for students who already have completed advanced study in the subject.) You cannot take General Education Capstone courses until you have completed at least 60 units.

3) For some majors it is essential to complete courses in the correct sequence. You cannot take a more advanced course until you have completed the prerequisite course(s).

4) You must complete all requirements for admission to impacted majors within the first 60 units.

I have been told that I must take one or more pre-baccalaureate courses. How can I plan my program?

Your advisor at SOAR can help you identify which courses must be postponed. You must still complete the minimum number of baccalaureate units required for the degree.

You may be able to catch up by taking additional courses in later semesters or by taking classes in summer or winter session, or you may choose to spend an additional semester completing the program. You cannot begin the sequence of required courses for some majors until you are ready for baccalaureate-level Mathematics. See your major advisor to develop a plan for scheduling the required courses.

I didn't complete the exact list of courses shown. Can I still graduate on time?

The answer depends on your major and on what courses you have completed. The plans are not rigid requirements; they are only intended to provide guidance in planning a program. There are many reasons for students to follow a different pattern, such as changing the major, choosing to take fewer classes in a given semester, choosing to complete a minor or a second major. See your advisor for help in planning a program that will work for you.

If I follow the plan, will I have all requirements for graduation completed?

The plans include the specific courses required for the major. For some majors, there are restrictions on the choice of major electives. It is important that you select General Education courses to meet the required distribution pattern. You may need to take an additional General Education course to complete the minimum number of units required for each category. This is likely to happen if you took three-unit courses in Category B, Physical Universe.

Minor in Economics (code ECONUM01)

The Minor in Economics is available to any non-Economics or non-Business Economics major.

The economics minor is designed to provide students with a broad-based introduction to the methods of economic analysis. It is suitable for students planning careers in many fields including primary and secondary education, journalism, law, or government. A minimum of 24 units which must include:

Lower Division: ECON 100 and 101, and either MATH 115 or 122. Students with upper division status declaring the minor may substitute ECON 300 for ECON 100 and 101 with departmental consent.

Upper Division: ECON 310 and either ECON 311 or 320, and at least three additional upper division economics courses, of which at least one must be at the 400 level. The following courses may not be taken as upper division electives in economics: ECON 300, 309I, 495, and 499

Minor in Business Economics (code ECONUM02)

The Minor in Business Economics is available to any non-Economics or non-Business Economics major.

The minor in business economics is equally suitable for students pursuing baccalaureate degrees in non-business and business fields. The minor provides students with a strong concentration in the techniques of economic analysis most closely related to business decision-making. A minimum of 24 units which must include:

Lower Division: ECON 100 and 101, and one of the following: ACCT 201, MATH 115 or 122. Students with upper division status declaring the minor may substitute ECON 300 for ECON 100 and 101.

Upper Division: ECON 310 or 333, 311 or 320. The remaining 9 units (3 courses) may be selected from the upper division courses listed immediately above or any of the following courses: IS 310 or ECON 380, 372, 420, 422, 430, 432, 433, 434, 441, 462, 472.

Minor in International Economics (code ECONUM03)

The Minor in International Economics is available to any non-Economics or non-Business Economics major.

The minor in international economics provides students with an introduction to the techniques of economic analysis and the application of those techniques to issues in the world economy. Students will learn about the economic history and institutions of other countries, issues associated with the economic growth of less developed countries, and international trade and finance.

The minor is suitable for students from all majors planning careers in a wide variety of fields including business, government, journalism and education. A minimum of 24 units is required and must include:

Lower Division: ECON 100 and 101, and either MATH 115 or 122. Students with upper division status declaring the minor may substitute ECON 300 for ECON 100 and 101.

Upper Division: ECON 310 or 333 and ECON 311 or 320, and any three of the following courses: ECON 361I, 365, 368, 369, 370, 372, 465, or 472.

Master of Arts in Economics (code ECONMA01)

The master of arts degree in economics is designed to provide academic preparation for positions in industry, government, consulting agencies and teaching. The emphasis is on the immediate application of more advanced principles of analysis to business, management and government. Candidates are responsible for observing the general requirements stated in the *Catalog* as well as requirements specified by the Economics Department. Detailed information on requirements may be obtained from the department graduate advisor.

A limited number of graduate assistantships are available to qualified students.

Prerequisites

1. A bachelor's degree with a major in economics; or
2. A bachelor's degree with 24 units of upper division courses comparable to those required of a major in economics at this University. (Deficiencies will be determined by the Economics Department.);
3. A minimum undergraduate GPA of 3.0 (B) in upper division economics courses. (A student who fails to meet this requirement may submit Graduate Record Examination scores on the verbal, quantitative and advanced economics sections, and petition the Economics Department for a waiver.);
4. Graduate students must consult with the graduate advisor for information concerning department procedures and for approval of their course of study before entering the master of arts program in economics.

Advancement to Candidacy

Satisfy the general requirements of the University for advancement to candidacy.

Requirements

1. Thirty units of upper-division (400-level courses marked with an asterisk) and graduate courses (500- and 600-level courses), of which 24 units must be in economics with a minimum of 18 units in the 500 and 600 series. All students must develop three fields of concentration in economics, including economic theory (microeconomics and macroeconomics);
2. Satisfactory completion of ECON 503, 510, 511, 585 and 586;
3. Students must pass two comprehensive examinations, one in microeconomics and one in macroeconomics. Students must also successfully complete coursework in two elective fields of concentration with grades of "B" or better in the appropriate 600-level courses. A field of concentration includes a 600-level course and at least one upper-division or 500-level prerequisite course.

Master of Arts in Global Logistics (code ECONMA02)

The Master of Arts in Global Logistics is a Pilot Program effective from Fall 2002 through Spring 2007.

Prerequisites

1. A bachelor's degree with a grade-point average of 2.75 or better. A student whose overall grade-point average is less than 2.75, but who possesses a strong employment history in supply chain management or logistics or who possesses a recent record of academic excellence by completion of certificate or other coursework, may be admitted by special action of the Admissions Committee.
2. Students are required to submit: a completed application form; transcripts of all undergraduate and graduate coursework; two letters of recommendation from members of the academic profession under whom the applicant studied or from individuals in positions of leadership with whom the applicant worked; and a statement of the applicant's interest in pursuing a career in global logistics.

Advancement to Candidacy

Satisfy the general requirements of the University for advancement to candidacy.

Course Requirements

Completion of a minimum of 30 units beyond the bachelor's degree and graduate coursework as follows:

1. Core requirements (15 units): Satisfactory completion of ECON 500, 555, 556 and MGMT 500 and 541.
2. Satisfactory completion of at least one course in each of the following three emphases (9 units):
 - A. International Emphasis (ECON 572 or MGMT 543);
 - B. Transportation Planning and Policy Emphasis (CE 522, PPA 550, or PPA 541); and
 - C. Coordination, Negotiation and Conflict Resolution Emphasis (PPA 570 or HRM 654).
3. Satisfactory completion of a Concentration Emphasis by completing one additional course (3 units) in either:
 - A. International Emphasis (ECON 572 or MGMT 543);
 - B. Transportation Planning and Policy Emphasis (CE 522, PPA 550, or PPA 541); or
 - C. Coordination, Negotiation and Conflict Resolution Emphasis (PPA 570 or HRM 654).
4. Completion of ECON 655 (3 units).

Courses (ECON)

Lower Division

100. Principles of Macroeconomics (3)

Prerequisite or corequisite: One course from the Foundation curriculum. Money and banking, price changes, national income analysis, business cycles, economic growth, fiscal and monetary policy, international trade. Not open to students with credit in ECON 202. (CAN ECON 2)

101. Principles of Microeconomics (3)

Prerequisite or corequisite: MATH 103 or higher. Business organization, price theory, allocation of resources, distribution of income, public economy. Not open to students with credit in ECON 201. (CAN ECON 4)

Upper Division

General Education Category A must be completed prior to taking any upper division course except upper division language courses where students meet formal prerequisites and/or competency equivalent for advanced study.

300. Fundamentals of Economics (3)

Prerequisites: Completion of GE Foundation requirements. Designed for non-majors. Presents basic training in economics for social studies teachers or citizens who wish to exercise a reasoned judgment about economic issues in public affairs. Content generally same as ECON 100, 101, in condensed form. Not open to students with credit in ECON 100 or 101 except by consent of the Economics Department.

306I. Environmental Issues of the World Economy (3)

Prerequisites: Completion of the G.E. Foundation and the Category B requirement, Economics 101, and upper-division standing. Interdisciplinary analysis of human impact on the atmosphere and biological diversity; consideration of policies to foster sustainable development with emphasis on the economic perspective; international political economy of negotiations to promote global cooperation in defense of our common environment.

309I. The Consumer in the Legal and Economic Environment (3)

Prerequisites: Completion of the G.E. Foundation, one or more Explorations courses; upper-division standing. Combines the economic and ethical components of consumer issues with a critical analysis of relevant substantive aspects of consumer law. Incorporates an integrated coverage of the economic, legal and regulatory environment of consumers in avoiding and resolving disputes regarding fraudulent transactions, financial matters, personal and real property contracts, torts, credit and investment issues, and family relationships. Team taught. Same as FCS 309I and FIN 309I. (Lecture-Discussion 3 hours.)

310. Microeconomic Theory (3)

Prerequisites: ECON 100, 101 and MATH 115 OR 122. Any prerequisite course in which a grade lower than "C" is received must be retaken and successfully completed prior to enrolling in ECON 310. Analysis of economic concepts and their applications to business situations. Emphasis on supply and demand analysis, costs of production, variations of competition and monopoly, revenues, prices, profits and losses, and other aspects of the operations of the business enterprise.

311. Macroeconomic Theory (3)

Prerequisites: ECON 100, 101 and either MATH 115 OR 122. Any prerequisite course in which a grade lower than "C" is received must be retaken and successfully completed prior to enrolling in ECON 311. Determinants of levels of income, employment, and prices; of secular and cyclical changes in economic activity; and of the effects of public policies upon aggregative economic experience.

313. History of Economic Thought (3)

Prerequisites: ECON 100 and 101, or 300. Evolution of economics as a science. Doctrines of the different schools of economic thought. Study of the contributions of outstanding economists.

320. Money and Banking (3)

Prerequisites: ECON 100, 101 and either MATH 115 or 122. Nature and functions of money and its relation to prices; the monetary system of the United States; the functions of banks, bank credit, foreign exchange and monetary control.

333. Managerial Economics (3)

Prerequisites: ECON 100, 101 and either MATH 115 or 122. Development of the tools of marginalist analysis and their application to managerial decisions and planning. Emphasis upon the calculation of solutions to operational problems of the business firm. Topics include demand analysis, production and cost, pricing, and output decisions under different market structures. Product and factor markets will be analyzed.

355. Law and Economics (3)

Prerequisites: ECON 100 and 101, or 300. Analysis of economic concepts and their application to law and legal institutions. Emphasis on property law, contract law, accident law, crime control and judicial administration.

360I. American Economic History (3)

Prerequisites: Completion of GE Foundation requirements, one or more Explorations courses, and upper-division standing. Economic analysis of growth and welfare in the American economy from the beginnings of industrialization to the present, with emphasis upon the material and social factors affecting the transformation of our economy since the early nineteenth century.

361I. European Economic History (3)

Prerequisites: Completion of GE Foundation requirements, one or more Explorations courses, and upper-division standing. Economic analysis of the principal features of the European economy from the Industrial Revolution to the present, with emphasis upon the problems of economic growth, capital formation and technological and demographic change in this era.

365. Economics of Modern China (3)

Prerequisites: Completion of GE Foundation requirements. Economic analysis of the Chinese economy in the modern era. After a brief historical background, the main focus of the course will be on the socialistic transformation of the economy (1949-1978). The post-1978 Total Economic Reform will be discussed as a contrast and to suggest some patterns for the future. Economic topics will be supplemented by attention to institutional, geographic, and demographic aspects.

368. Comparative Economic Systems (3)

Prerequisites: Completion of GE Foundation requirements. Handling of economic problems in differing national and ideological contexts. Combines an overall conceptual framework with the study of specific national approaches.

369. East/Central European Economies in Transition (3)

Prerequisites: Completion of GE Foundation requirements. This course focuses on the East/Central European countries of Hungary, East Germany, Poland and the Czech/Slovak Federal Republic. Topics to be covered include the economic experiences of these countries under Communism (central planning), the movement towards the market allocative process (decentralized choice), as well as the development and influence of neighboring countries and institutions, including Romania, Yugoslavia, West Germany, the European Common Market, the former Soviet Union and the United States.

370. Pacific Rim Economy (3)

Prerequisites: Completion of GE Foundation requirements. Examines economic backgrounds and resource bases of the nations comprising the Pacific Rim, patterns of growth in trade among the Pacific Rim countries, flows of capital, activities of multinationals, interdependence of domestic and trade policies among the Pacific Rim countries, and future prospects of trade opportunities and possible constraints on expanded trade relations.

372. International Economics (3)

Prerequisites: ECON 100 and 101, or 300. International trade and exchange rate theory. Types of trade control: tariffs, quotas, exchange manipulation, monopolies. Basic U.S. and European commercial policies since 1930. Not open to students with credit in ECON 471.

380. Economic Statistics (4)

Prerequisites: ECON 100, 101 and either MATH 115 OR 122. Any prerequisite course in which a grade lower than "C" is received must be retaken and successfully completed prior to enrolling in ECON 380. Use of descriptive and inferential statistical concepts for the analysis of economic data. Topics applied to economics include measures of central tendency and dispersion, probability theory, discrete and continuous probability distributions, hypothesis testing, regression and correlation analysis, economic time series and index numbers.

403./503. Mathematical Economics (3)

Prerequisites: ECON 310, 311 and consent of instructor. Applications of calculus, linear algebra and other mathematical tools in formulating and solving economic problems. Designed for exceptional undergraduate students who intend to pursue a graduate degree in economics. Letter grade only (A-F). (Not open to students with credit in 483./583.)

410H./510H. Advanced Microeconomics (3)

Prerequisites: ECON 310, 311 and consent of the instructor. Applications of microeconomic theory. Detailed examination and analysis of particular markets and contemporary issues in light of economic theory. Specific emphasis on policy analysis for government and business decisions. This course is designed for exceptional undergraduate students who intend to pursue a graduate degree in economics. Letter grade only (A-F).

411H./511H. Advanced Macroeconomics and Forecasting (3)

Prerequisites: ECON 310, 311 and consent of the instructor. Applications of macroeconomics, monetary and forecasting theory to operational management and planning decisions of government and business. This course is designed for exceptional undergraduate students who intend to pursue a graduate degree in economics. Letter grade only (A-F).

***420. Forecasting (3)**

Prerequisite: ECON 311 or 320. Principles and methods of forecasting. Evaluation of the reliability of existing forecasting techniques. Also covers use of the macroeconomic model as a basis for forecasting and the role of forecasts in the formulation of national economic policy.

422./522. Macroeconomics for Management (3)

Prerequisites: ECON 311. Managerial applications of macroeconomic concepts. Emphasis on developing tools to analyze and predict aggregate economic activity and on promoting understanding of interrelationships and interdependencies of the macroeconomic environment for managerial decision making. Topics include: macroeconomic goals and efficient management; measurement and sources of economic data; modeling the macroeconomy; structural, or supply-side, changes affecting the macroeconomy; business cycle forecasts and the use of economic indicators; econometric forecasting, input-output analysis.

***430. Industrial Organization (3)**

Prerequisites: ECON 310 or 333. Exploration of corporate economics. The structure, behavior and performance of the relatively few large enterprises that originate more than two-thirds of the GDP of the U.S. An economic analysis of the arguments for and against 'big business.' Implications of separation of ownership and control, Corporate social responsibility and the profit motive. The dilemma of size versus competition.

***432. Economics of Antitrust (3)**

Prerequisites: ECON 310 or 333. The attempt of government to produce superior economic practices and results by the legal imposition of purportedly more competitive market structures and behavior patterns on business firms. An economic analysis of the leading judicial decisions comprising the modern law of antitrust. A rigorous examination of the underlying presupposition of antitrust that competition is the best model for economic activity. The future of antitrust including a discussion of proposals for legislative overhaul, including repeal of existing antitrust law.

***433. Capital Theory and Financial Analysis (3)**

Prerequisites: ECON 310 or 333. Intertemporal choice and decision-making under uncertainty. Topics include multiperiod consumption, multiperiod production, capital budgeting and financial management.

***434. Economics of Regulation (3)**

Prerequisites: ECON 310 or 333. The attempt of government to intervene in the existing market sector for the purpose of producing more competitive and socially acceptable practices and results while retaining the efficiency of large-scale economic organization. A comprehensive survey of the past, present and future of the political regulation of economic and business activity. Consideration of the rationale for regulation and deregulation and the creation, design and removal of regulatory practices. The changing concept of the public interest.

***441. Labor Economics (3)**

Prerequisite: ECON 310. Manpower resources and their utilization, with particular reference to labor unions, collective bargaining and related public policies. Effects of these institutions on production, employment, prices and patterns of income distribution.

***445. Economics of Health (3)**

Prerequisite: ECON 310. Analysis of health as an economic good. Health services as scarce resources. Use of tools of economic theory in study of special problems of health resources, markets, manpower shortages, non-profit enterprises, insurance programs and Medicare. Procedures stress individual studies and reports. Same course as HCA 451.

***450. Public Sector Economics (3)**

Prerequisites: ECON 310 and 311. The economic role of government. Analysis of the theory of public goods. Criteria for efficient allocation of resources between the private and the public sector. Possible responses of government externalities, such as environmental degradation. Emphasis on the allocation and distribution effects of government expenditures and taxation.

***462. Environmental Economics (3)**

Prerequisite: ECON 310. Economic analysis of environmental problems and policy. Market failures due to externalities, public goods, and common property resources will be examined. Private (market) and public (governmental) solutions to environmental problems are examined.

***463. Energy Economics (3)**

Prerequisite: ECON 310. Application of economic analysis to energy problems and policies. Representative topics include macroeconomic effects of energy price shocks, international financial fragility, OPEC pricing strategies, determinants of demand and supply, industrial organization and finance, investor and publicly owned utilities, domestic and international policies.

***464. Natural Resource Economics (3)**

Prerequisite: ECON 310. Microeconomic and capital theory applied to problems of conserving and managing natural resources. Analysis of public policies affecting renewable and nonrenewable resources including price controls, taxation and leasing. Representative topics include: forestry, fishery, energy, water, and mineral economics.

465./565. Economic Development (3)

Prerequisites: ECON 310, 311 and consent of instructor. Economic and social factors underlying economic development. Analysis of problems associated with economic growth of less developed countries. Evaluation of development policies.

472./572. International Trade and Finance (3)

Prerequisite: ECON 310, 311, and consent of the instructor. Pure theory of trade. Consequences of balance of payments disequilibrium for national income and prices. Tariffs, customs, unions and the theory of commercial policy. Foreign exchange market and international financial institutions.

485. Econometrics I (3)

Prerequisites: ECON 310, 311, and 380. This is the first course in a two-semester sequence introducing students to basic techniques in econometrics. Basic statistics and the classical linear regression model are covered. Emphasis is given to computing estimators using simulated and actual data sets. Not open to students with credit in ECON 481 or 581. (Lecture 3 hours, laboratory 2 hours.)

486. Econometrics II (4)

Prerequisites: ECON 485. This is the second course in a two-semester sequence introducing students to basic techniques in econometrics: advanced regression and special topics, including time-series and panel data analysis. Introduction to problems of observation, estimation, and hypothesis testing in economics through the study of the theory and application of linear normal regression model, critical evaluation of selected examples of empirical economic research, and exercises in applied econometrics. By the end of the course, student will have an understanding of the types of research designs that can lead to convincing anal-

ysis and be comfortable working with large-scale data sets. (Lecture 3 hours, laboratory 2 hours.)

***490. Special Topics in Economics (3)**

Prerequisite: Consent of instructor. Topics of current interest in economics selected for intensive development. May be repeated to a maximum of 6 units. Topics will be announced in the *Schedule of Classes*.

491H. Senior Honors Seminar in Economics (3)

Prerequisites: Senior status, ECON 485 or 486, and consent of instructor. Provides opportunity for students to integrate their knowledge of economics, statistics-econometrics and computer studies. Designed as a seminar in research where students will be expected to write a paper and present their research results orally. Research topics must be approved by instructor.

495. Field Studies Practicum (3)

Prerequisites: ECON 310 or 333 and consent of instructor. Observation and practical experience, at a managerial level, in an appropriate business or government enterprise. Applications for permission to enroll must be filed with the Economics Department at least six weeks prior to beginning of the semester involved. May be repeated to a maximum of 6 units.

499. Directed Study (1-3)

Prerequisite: Consent of instructor. Independent study under the supervision of a faculty member. May be repeated to a maximum of 6 units.

Graduate Level

500. Business Economics (3)

Workings of the price system in the allocation of resources, and the determination of the level and fluctuations of aggregate economic activity, with special emphasis on the role of business enterprise in the economy. Analysis of the economic implications of various forms of industrial organization and the application of public policy to business activity, including antitrust policy and regulation. Not open to students majoring in economics or pursuing an M.A. in economics. Letter grade only (A-F).

503./403. Mathematical Economics (3)

Prerequisites: ECON 310 and 311. Applications of calculus, linear algebra and other mathematical tools in formulating and solving economic problems. (Not open to students with credit in 483./583.)

510H./410H. Advanced Microeconomics (3)

Prerequisites: ECON 310, 311 and 503. Applications of microeconomic theory. Detailed examination and analysis of particular markets and contemporary issues in light of economic theory. Specific emphasis on policy analysis for government and business decisions. Letter grade only (A-F).

511H./411H. Advanced Macroeconomics and Forecasting (3)

Prerequisites: ECON 310, 311 and 503. Applications of macroeconomics, monetary and forecasting theory to operational management and planning decisions of government and business. Letter grade only (A-F).

522./422. Macroeconomics for Management (3)

Prerequisites: ECON 311. Managerial applications of macroeconomic concepts. Emphasis on developing tools to analyze and predict aggregate economic activity and on promoting understanding of interrelationships and interdependencies of the macroeconomic environment for managerial decision making. Topics include: macroeconomic goals and efficient management; measurement and sources of economic data; modeling the macroeconomy; structural, or supply-side, changes affecting the macroeconomy; business cycle forecasts and the use of economic indicators; econometric forecasting, input-output analysis. Letter grade only (A-F).

555. Transportation Economics (3)

Prerequisites: ECON 310 and 311 or ECON 500 or consent of instructor. Economic analysis of intercity transportation, cost measurement, applications of pricing principles, project evaluation, and economic regulation. Policies towards railroads, air transportation, and intercity highways. Letter grade only (A-F).

556. Economics of Logistics Management (3)

Prerequisites: M.A.G.L. core (Econ 500 and MGMT 500). Applications of research methods to topics in logistics. Emphasis on tools required to complete a capstone project. Topics include: developing a research question, conducting a literature review, data collection, and statistical analysis, including descriptive statistics and hypothesis testing. Letter grade only (A-F).

565./465. Economic Development (3)

Prerequisites: ECON 310 and 311. Economic and social factors underlying economic development. Analysis of problems associated with economic growth of less developed countries. Evaluation of development policies. Letter grade only (A-F).

572./472. International Trade and Finance (3)

Prerequisites: ECON 310 and 311. Pure theory of trade. Consequences of balance of payments disequilibrium for national income and prices. Tariffs, customs, unions and theory of commercial policy. Foreign exchange market and international financial institutions. Letter grade only (A-F).

585. Econometrics I (3)

Prerequisites: ECON 310, 311, 380 and consent of instructor. This is the first course in a two-semester sequence introducing students to basic techniques in econometrics. Basic statistics and the classical linear regression model are covered. Emphasis is given to computing estimators using simulated and actual data sets. Not open to students with credit in ECON 481 or 581. Letter grade only (A-F).

586. Econometrics II (3)

Prerequisites: ECON 585 and consent of instructor. This is the second course in a two-semester sequence introducing students to basic techniques in econometrics: advanced regression and special topics, including time-series and panel data analysis. Introduction to problems of observation, estimation, and hypothesis testing in economics through the study of the theory and application of linear normal regression model, critical evaluation of selected examples of empirical economic research, and exercises in applied econometrics. By the end of the course, student will have an understanding of the types of research designs that can lead to convincing analysis and be comfortable working with large-scale data sets. Letter grade only (A-F).

597. Directed Studies (1-3)

Prerequisite: Consent of instructor. Intensive reading and/or practical research in economics. Letter grade only (A-F).

655. Seminar in Global Logistics (3)

Prerequisites: Completion of at least 27 units in the M.A.G.L. program A capstone seminar in global logistics. Students will complete a major research project that allows them to integrate their knowledge of global logistics. The research topics may include case studies developed by the Council of Logistics Management. Students will work in teams. Each student will submit a written report. Students will be required to make an oral presentation of their research. Letter grade only (A-F).

660. Seminar in Natural Resources and the Environment (3)

Prerequisites: ECON 510H, 511H, and one of the following: ECON 462, 463 or 464. Research methods applied to selected topics from energy, natural resources, and the environment. Letter grade only (A-F). (Seminar, 3 hours.)

670. Seminar in International Trade and Development (3)

Prerequisites: ECON 510H, 511H, and one of the following: ECON 565 or 572. Selected topics dealing with current problems and solutions in international trade, finance, and development. Letter grade only (A-F).

686. Seminar in Econometrics (3)

Prerequisites: ECON 586, 510H and 511H. Development of methods for the estimation and testing of the relationships among economic variables and use of econometric models for prediction and economic policy purposes. Letter grade only (A-F).

690. Seminar in Economics (3)

Prerequisite: Consent of instructor. Seminar on topics of current interest in economics. May be repeated to a maximum of 6 units with different topics. Letter grade only (A-F).

697. Directed Research (1-3)

Prerequisite: Consent of instructor. Independent research under the guidance of a faculty member. Letter grade only (A-F).

698. Thesis (2-6)

Prerequisite: Consent of graduate advisor. Planning, preparation and completion of a thesis related to a field in economics.

The Department of Educational Psychology, Administration and Counseling offers graduate level course work in the following program areas: Educational Administration; Educational Psychology; Social and Philosophical Foundations Education; Career Counseling; Marriage and Family Therapy (MFT); School Counseling; School Psychology; Student Development in Higher Education; and Special Education; as well as undergraduate service courses in life skills and other areas.

Students desiring information should contact the department office for referral to one of the faculty advisors.

All CED graduate level courses (500/600) are assumed to be Letter grade only (A-F) unless stated otherwise.

Graduate Degrees

Master of Arts degrees in Education with the following options are offered:

- Educational Administration
- Educational Psychology
- School Librarianship
- Social and Multicultural Foundations of Education
- Educational Technology

Two Master of Science degrees are available:

- Special Education
- Counseling

MS in Counseling offers five options:

- Career Counseling (discontinuance under consideration)
- Marriage and Family Therapy
- School Counseling
- Student Development in Higher Education
- Vocational Rehabilitation Counseling (Discontinuance is under consideration.)

Credentials

The department offers credentials in Administrative Services (Preliminary and Professional), Pupil Personnel Services (School Counseling, School Counseling Internship, School Psychology, School Psychology Internship), Special Education (Mild/Moderate and Moderate/Severe) and Library Media Teacher Services. In addition, a Graduate Certificate in Career Guidance Specialist and Community College are offered. (Please note: Graduate Certificate in Career Guidance Specialist is under consideration for discontinuance.)

Required credential courses must be completed with a grade of "C" or better. The minimum grade point average for successful progress in the credential programs of the department is 3.0 on all units to be applied to the credential program. Students falling below 3.0 will be placed on probation. To maintain their status in the credential program students must earn sufficient grade points to bring their GPA back to 3.0 by the end of the regular semester following the semester in which their GPA fell below 3.0. Refer to this catalog for policy.

Interdisciplinary Minor in Crosscultural Language and Academic Development Studies (code COEDUM01)

The minor comprises courses that integrate studies of culture, language, learning and the academic environment, and human development. It is an interdisciplinary program designed to support career objectives related to public education in Crosscultural Language and Academic Development. The minor consists of a minimum of 18 units selected with an advisor. Courses in the department of the student's major may not be used.

1. One course from each of the following areas (12 units):

Culture: ANTH 421/LING 425 or EDP 432/EDEL 430

Language: EDP 454 or LING/CD 329

Schooling: EDP/LING 485

Development: EDP 301, 302, HDEV 307I, or PSY 361

2. Six additional units, selected with an advisor, from the following:

Culture: AIS 319, ASAM 319, B/ST 319, CHLS 319, W/ST 319, ANTH 329, ANTH 412I, ANTH/LING 413, ANTH 419, ANTH 421/LING 425, ANTH/WST 475, CHLS/ASAM 335I, EDP 432/EDEL 430

Language: ANTH 170, CHLS 402, EDP 454, LING/CD 329, LING/ENGL 327, LING 363I, LING 435, LING 472, LING 486.

Schooling: AIS 361, ASAM 310, B/ST 420, CHLS 340, EDP 305, EDP 350.

Development: EDP 301, EDP 302, HDEV 307I, PSY 361.

Master of Arts in Education

Please submit a separate program application as well as a [University application](#) for all masters and credential programs. Program application dates may vary (please see individual program).

Option in Educational Administration (code EDADMA01)

Educational leaders serve in many capacities. No matter what position an individual holds within an educational organization, all energies should be directed at maximizing the academic achievement of all students being served. The courses in the Educational Administration Option are designed to prepare leaders for this important work. Emphasis is placed on the role of schooling in a democratic society, instructional leadership, building collaboratives, managing and guiding change, and working with diverse populations. Because of our location, issues associated with urban schools are a primary focus of the program.

Prerequisites

15 upper-division units in education including ED P 400, or equivalent experience.

University Admission

File a "University Application for Graduate Admission" along with one complete set of official transcripts with the University Office of Admissions. Online University application may be completed at www.csumentor.edu.

Conditional Admission to the Program

File a separate "Preliminary Administrative Services Masters/Credential Program Application" with the College of Education Graduate Office (ED1-7) along with one complete set of official transcripts and items 1-3 listed below no later than March 1 for fall admission.

1. Transcripts verifying a minimum 2.85 overall GPA in the last 60 semester (or 90 quarter) units of course work taken;
2. Two non-confidential letters of recommendation (following Letter of Recommendation Guidelines found with program application) from individuals familiar with your professional competence and potential as an educational leader, one of which must be from your principal or immediate supervisor;
3. A double-spaced typed personal statement (following Personal Statement Guidelines found with program application) describing your educational preparation, leadership experiences, and leadership philosophy;
4. Participate in a screening process that includes an oral interview and submission of an onsite impromptu writing sample.

Clear Admission to the Program (Advancement to Candidacy)

In addition to 1-4 above, a candidate must:

1. Pass Writing Proficiency Exam (WPE);
2. Complete EDP 400;
3. Resolve all incomplete grades;
4. Complete the following core course: EDAD 541, and one other EDAD course for a total of six (6) units.
5. A 3.0 grade point-average in all completed program courses;
6. Complete an approved plan of study in consultation with a program advisor.

Requirements

A minimum of 30 units with a 15 unit concentration in Educational Administration is required; 21 units must be in the 500/600 level series taken at this University.

1. One of the following (3 units): EDP 574 or EDAD 649.
2. One of the following (3 units): EDP 575, 576, or 672.
3. One of the following (3 units): EDP 520, 595, or 696.
4. One of the following chosen in consultation with the faculty advisor: EDAD 695 Master's Research Study in Educational Administration (3 units) or EDAD 698 thesis (6 units).
5. All of the following (18 units): EDAD 541, 544, 647, 648, 650, EDP 677.

Option in Educational Psychology (code ED_PMA02)

A research-oriented option in the Masters of Arts (MA) in Education has been designed for students and educators who seek to develop their understanding of learning and development, testing and assessment, research, and program evaluation in education. This program offers a rigorous curriculum in each of these areas and requires that the student declare a "foundation" emphasis within the Option. All students who are admitted to the master's program are assigned to Track 1. Admission to the MA, Option in Educational Psychology does not guarantee acceptance to the highly competitive School Psy-

chologist Credential Program. Students with this credential objective must apply separately to the School Psychologist Credential Program. (Check the CSULB *Catalog* and the Department Office for application deadlines.)

Admission Requirements

University Admission Application

1. File an "Application for Graduate Admission" along with one complete set of official transcripts with the University Office of Admissions prior to March 1 for Fall. Online application at www.csumentor.edu
2. Complete Parts A and B. In Part B, insert program code ED_PMA02.

Conditional Admission to the Program

1. Meet University admission requirements.
2. Complete and submit a program application (see application for requirements) and submit with official transcripts, one from each college attended, to the Graduate Office in the College of Education (ED1-7). Transcripts must verify a GPA of 3.00 or higher on the last 60 semester (or 90 quarter) units of college course work taken. Evidence of completing at least a baccalaureate degree majoring in the behavioral sciences, education, or a related program prior to beginning the Master of Arts in Education (Educational Psychology Option). (Applicants with other majors should seek advisement from the program faculty.)
3. Send an official transcript of test scores obtained from the Educational Testing Service for the Graduate Record Exam (GRE) General Test to the Graduate Office in the College of Education. For admission consideration, the criterion is a combined Verbal and Quantitative score of 1000.
4. For international students, whose primary language is not English, in addition to GRE scores, send an official transcript of test scores obtained from the Educational Testing Service (ETS) for the Test of English as Foreign Language (TOEFL) to the Graduate Office in the College of Education. For admission consideration, the criterion is a TOEFL score of 550 or higher is required.
5. Official transcript(s), GRE scores, and TOEFL score if applicable must be on file in the Graduate Office in College of Education no later than March 1 for consideration to enter the Fall semester.
6. Note: "Conditional admission" status does not guarantee admission to the master's program. To qualify for University admission in "conditionally classified" or "classified" graduate standing, a student must be accepted into a graduate degree program on a "conditional" basis or as "clear admission" status.
7. Applicants are not allowed more than 9 semester units of credit applied to curriculum requirements of this option completed prior to admission into the first semester of the program.

Clear Admission to the Program

The catalog published in the academic year in which the student is advanced to candidacy governs the course of that student's program.

Requirements for Advancement to Candidacy

1. Evidence of completing the following prerequisites: EDP 301 or 302, 305, 350, 405, 419, and 420, or acceptable equivalents.

2. Completion of the following core courses: EDP 519 and 520.
3. Verification of a 3.0 grade point-average on the prerequisites plus 6 to 9 units of core courses.
4. Removal of all incomplete grades.
5. Pass the Writing Proficiency Exam (WPE).
6. An approved plan of study completed in consultation with the program advisor.

Program Requirements

MA Objective (Track 1)

The degree objective requires a total of 36 units made up of a 30-unit core and a 6-unit "foundation" that culminates in either (a) a master's thesis or (b) a written comprehensive examination.

1. Degree Core:
 - A. EDP 519, 520, 541, 595, 596, and 619
 - B. 9 units from EDP 604, 605; PSY 632, 634, or 637
 - C. 3 units from EDP 529 or 564
2. For the "foundation" culminating in a master's thesis, the student completes all of the above 30 units of core courses plus 6 units of EDP 698. OR, for the "foundation" culminating in a written comprehensive examination, the student complete all of the above 30 units of core courses plus 6 units 500/600 electives selected with the approval of the program advisor; and a written comprehensive examination.

MA Objective (Track 2)

Assignment to Track 2 requires that students admitted to the School Psychologist Credential Program petition the Graduate Office to transfer from Track 1 to Track 2. The degree objective requires a total of 37 units made up of a 31-unit core and a 6-unit "foundation" that culminates in either (a) a master's thesis or (b) a written comprehensive examination. All courses are 3 units unless specified otherwise.

1. Degree Core:
 - A. EDP 519, 520, 524 (4 units), 541, 595, and 596
 - B. 9 units from EDP 579A, 604, 605; PSY 632, 634, or 637
 - C. 3 units from EDP 525, 529, or 564
2. For the "foundation" culminating in a master's thesis, the student completes all of the above 31 units of core courses plus 6 units of EDP 698. OR, for the "foundation" culminating in a written comprehensive examination, the student complete all of the above 31 units of core courses plus 6 units 500/600 electives selected with the approval of the school psychology credential program advisor; and a written comprehensive examination.

Option in Educational Technology (code ED_PMA05)

Serving the mission of enhancing education through the use of technology, educational technology specialists perform many functions in schools, educational institutions, and training agencies. This option prepares leaders in the field who will evaluate, design, and effectively use technology for educational purposes. Combining both theory and practice, this option is designed for individuals seeking career growth in K-12 and university settings and for those planning to pursue doctoral degrees.

Admission to the Program

File a "Master of Arts in Education, Option in Educational Technology" application with the College of Education Graduate Office along with one complete set of transcripts no later than April 15 for fall admission or October 15 for spring admission, including information to satisfy requirements 1-6 below.

1. A bachelor's degree from an accredited college or university.
2. Upper-division coursework in the use of technology and computer applications (3 units), e.g., ETEC 444, EDP 443, EDP 523, or equivalent experience (see advisor).
3. A 3.0 GPA in the last 60 semester or 90 quarter units of upper division and/or graduate course work completed at an accredited college or university and a 3.0 GPA in all prerequisite course work.
4. Three (3) letters of recommendation, preferably from teachers, supervisors, or colleagues in education or related fields.
5. A word-processed personal statement — see the program application for the specific questions to address.
6. An official transcript of scores obtained from the Graduate Record Exam (GRE) of the Educational Testing Service (ETS).

University Admission

File an "Application for Graduate Admission" along with one complete set of official transcripts with the University Office of Admission by April 15 for fall admission or October 15 for spring admission. Online application at www.csumentor.edu.

Advancement to Candidacy

1. Provide evidence of passing the Writing Proficiency Examination (WPE).
2. Maintain a 3.0 GPA in all course work.
3. Resolve any Incomplete grades.
4. At least 6 units of program and all prerequisites courses must be completed. If planned course of study includes EDP 520, the following prerequisites must be completed: EDP 400 or both EDP 419 and 420.

Prerequisites

ETEC 444 or EDP 443 or 523 or equivalent experience satisfying the California Level I computer technology standard.

Requirements

Students must complete a minimum of 30 units of upper division and graduate courses, of which at least 21 units must be at the 500/600 level taken at this university. With consent of the faculty committee, students may count up to 9 units of previously taken graduate courses toward the degree.

1. Core courses (21 units):
 - Research methods: EDP 520 or 595
 - Educational technology: ETEC 523, 525, 530, 551, 553, and 623.
2. Electives (6 units): In consultation with advisors, students should select 6 additional units. Options include, but are not limited to, the following:
 - A. Educational Psychology: EDP 520, 595 (if not taken as a core course)
 - B. Library Media: LI 530A, 530B, 540, 550

C. Special Education: EDP 542

D. Courses outside the College of Education, chosen in consultation with faculty advisors.

3. One of the following chosen in consultation with the faculty advisor:
 - A. ETEC 695 (3 units) plus pass a comprehensive examination
 - B. EDP 699 Project with written Project Report (3-6 units)
 - C. EDP 698 Thesis (6 units)

Option in School Librarianship (code ED_PMA06)

Library media teachers implement school library media programs through teaching, information access and delivery, and program administration. The Library Media Teacher Services Credential prepares students to serve in K-12 settings; for additional information go to www.csulb.edu/programs/lmt. The Master's degree option in School Librarianship provides a rigorous academic foundation for professional leadership in school librarianship. Because the Master of Arts degree option incorporates work towards the credential, students may pursue their credential and degree simultaneously.

Program Admission

Submit a program application to the Office of Graduate Studies, ED1-7 as well as a University application to the Office of Enrollment Services no later than March 1 for fall consideration or October 1 for spring consideration.

Prerequisites

A current valid basic teaching credential (multiple subject, single subject, or special education) and completion of a bachelor's degree; passage of CBEST.

Clear Admission

1. Meet University admission requirements;
2. Copies of transcripts verifying a GPA of 3.0 or higher on the last 30 semester units of course work taken;
3. Three letters of recommendation;
4. A written personal statement describing your educational and experiential background, and professional goals; accompanying resume;
5. Screening interview.

Advancement to Candidacy

1. Pass the Writing Proficiency Examination (WPE).
2. Maintain a 3.0 GPA from the time of admittance to the program.
3. Complete at least six units in the approved program.

Program Requirements

A minimum of 37 units is required, with at least 21 units in the 500/600 level series taken at this University. Students may choose either the comprehensive examination track or the thesis track, in consultation with the advisor.

Core Requirements

1. The following (3 units): LI 500
2. The following (21 units): LI 510, 520, 530A, 530B, 540, 550, 570
3. The following (3 units): EDCI 625; or equivalent
4. The following (3 units): EDP 520

5. The following (4 units): LI 580
6. One of the following chosen in consultation with the faculty advisor upon advancement to candidacy:
 - A. Comprehensive examination and research paper: EDP 697 (3 units); or
 - B. EDP 698 Thesis (6 units)

Option in Social and Multicultural Foundations of Education (code ED_PMA03)

Students pursuing the Option in Social and Multicultural Foundations engage both traditional and contemporary perspectives through focused, interdisciplinary study. The option is designed for individuals seeking careers in multicultural/multilingual education programs, international education, contemporary urban educational environments, and for students interested in pursuing higher academic degrees.

Admission Procedures

Program Application: No later than March 1 for Fall semester consideration, file an application for the option, "Social and Multicultural Foundations," with the Graduate Office in the College of Education. Failing to supply a complete application by the deadline may jeopardize your acceptance into the program. Include the following material with the application:

One complete set of transcripts from all educational institutions attended. Transcripts must verify a minimum grade point average of 2.85 in the last 60 semester (or 90 quarter) units of course work.

A type written 3-page personal statement that discusses a) academic and career experience b) intellectual or academic strengths c) proposed course of study in the program with respect to professional goals.

One representative sample of applicant's academic writing.

Two letters of recommendation from individuals qualified to evaluate your abilities and potential for academic success.

University Application: No later than March 1 for Fall semester consideration, file an "Application for Graduate Admission" with the University Office of Admissions, along with one complete set of official transcripts from all educational institutions attended.

Program Prerequisites

Fifteen (15) units of advisor-approved upper division or graduate level courses. May be taken concurrently with program courses, but must be completed prior to advancement to candidacy. Courses should be chosen from each of the following categories.

1. A course on Race or Ethnic Issues
2. A course on Gender or Women's Issues
3. A course on Research Methods (qualitative or quantitative)
4. EDP 432, "Social and Cultural Diversity in Educational Settings" (or equivalent from CSULB or another university)
5. EDP/LING 485, "Theoretical Foundations of Language Minority Education" (or equivalent from CSULB or another university)

Program Requirements

A minimum of thirty-three (33) units of upper division and graduate courses, of which a minimum of twenty-one (21) units must be at the 500/600-level.

Core Requirements: Fifteen (15) of the 33-36 units must include: EDP 574, EDP 575, EDP 576, EDP 582 and one of the following: EDP 520 or EDP 595/LING 595.

Electives: Additionally, students must complete a minimum of fifteen (15) units of elective courses. The program provides flexibility for students to design their course of study (with advisor's approval) by enrolling in courses from those listed below, in any combination. For convenience, related courses are grouped together under areas of concentration. (When selecting courses below the 500 level, students may choose only those with an asterisk beside the course number, indicating that they are acceptable for credit in a master's degree — or those courses appearing on the List of Approved 400 Level Courses).

Race, Class, and Gender Studies in Education: EDP 573; EDCI 505; ANTH 519/419; HIST *469, *406A, *406B, *394; POSC *401

Language, Literacy, and Culture in Education: EDP 672, EDP *454, EDP 578/LING 475/575, EDP 589, EDRG 540, EDP 577/LING 500, LING *460, LING *486, LING 650, ENGL 510, ANTH *413, ANTH 530, ART *301, PSY 539/439

International/Global Education: EDP 583, ETEC 525, ANTH *421/LING *425, POSC *455, POSC 600

Special Concentration: Alternatively and with advisor's approval, students may focus their program of study on a specialized area of their choice. (Suggested areas of concentration include, but are not limited to, education for ethnic/race/gender-specific groups, or populations with special needs; bicultural/bilingual education/urban education; instructional technology among marginalized populations.)

Advancement to Candidacy

Students may advance to candidacy, at which time they receive catalog rights, after they have:

1. Met with the advisor
2. Completed all prerequisites
3. Completed 6 units of program courses
4. Passed the Writing Proficiency Exam
5. Maintained a 3.0 GPA in all program course work, including prerequisites
6. Completed any Incomplete grades

Exit Requirement

After completing all course work and advancing to candidacy, the candidate must select either the Directed Research and Comprehensive Exam or Thesis option. Either choice requires the consent of the program coordinator, department chair, and associate dean. Candidates choose one path from:

Path 1. Directed Research: EDP 697 (3), one semester and Comprehensive Exam

Path 2. Thesis: EDP 698 (6), over two semesters

Master of Science in Counseling

Counselors serve valuable functions in fields of education, health and human services, and business. Their domains of practice include public and private educational institutions, medical facilities and allied health agencies, social service agencies and organizations, state and federal human service

agencies and programs, correctional facilities, business and industry, and private practice. The program's philosophy is to introduce students to a variety of approaches to counseling, and to encourage the development of competencies within these approaches.

The program combines theory and practice utilizing on and off campus course work and field work assignments. Required courses are offered predominantly in the evening, but most field assignments require daytime participation during normal business hours defined by the off campus sites.

Students coming from diverse experiential backgrounds are trained at the graduate level to be able to perform entry level duties expected by the counseling profession and its specialty areas. Students are prepared to assume future leadership positions in their area(s) of expertise after additional work experiences have been acquired in the field following graduation.

The Master of Science in Counseling Program consists of five options:

1. Career Counseling (discontinuance under consideration)
2. Marriage and Family Therapy
3. School Counseling
4. Student Development in Higher Education
5. Vocational Rehabilitation Counseling (Discontinuance is under consideration)

The total number of course units needed to satisfy requirements for graduation depends upon the option selected by the student.

University Admission

File an "Application for Graduate Admission" along with one complete set of official transcripts from all educational institutions with the University Office of Admissions no later than March 1 for Fall consideration.

Program Admission

File a completed "Master of Science in Counseling" application to only one program option area with the College of Education Graduate Office (ED1-7) along with one complete set of official transcripts no later than March 1 including steps 1-3 listed below:

1. Transcripts must verify a GPA of 2.85 or higher on the last 60 semester (or 90 quarter) units of course work taken. Evidence of completing at least a baccalaureate degree majoring in the behavioral sciences, education, or related program prior to beginning the Master of Science in Counseling program (those with other majors should seek advisement from the program faculty);
2. Send three (3) letters of recommendation along with the Program Application;
3. Send a type-written personal statement along with the Program Application;
4. Screening interview(s) (upon notification by the option area);
5. Items 1-3 above must be on file in the Graduate Office no later than March 1 for the following fall semester (students are admitted to begin course work in the fall semester only) except as noted below.

Career Counseling applicants only: Items 1-5, along with

results of the Miller Analogies Test (MAT) and current edition of the Strong Interest Inventory, must be on file in the College no later than March 15 (discontinuance under consideration).

MFT applicants only: Items 1-3 must be on file in the College no later than March 1. Item 6 is required. (MFT students are permitted to begin course work in either summer, fall, or spring semester upon admission to this option);

School Counseling applicants only: Items 1-3 must be on file in the College of Education Graduate Office no later than March 1.

Student Development in Higher Education applicants only: Items 1-3 must be on file in the College of Education Graduate Office no later than March 1.

6. Applicants are not allowed more than one-third the total number of semester units credit applied to curriculum requirements of the option selected completed prior to admission into the first semester of the program.

Option in Career Counseling (code ED_PMS01)

Students in this option prepare to provide career counseling and guidance services to adults and adolescents in the community and public agencies, college and university settings, business and industry settings, and private practice. The training prepares individuals for the California Registered Professional Counselor (CRPC) and National Master Career Counselor (MCC) examinations (discontinuance under consideration).

Requirements

All of the following (37 units): EDP 430, 502, 510, 513, 515, 529, 530, 531, 637, 638, 643C, 644C; and,

All requirements of ONE of the following tracks (21 units):

Thesis Track – EDP 419, 420, 519, 520, 696, 698; OR

Comprehensive Examination Track – EDP 400; and six elective courses from EDP 505, 516, 517, 520, 524, 555, 564, 566, 580, 596, and 601.

Advancement to Candidacy

EDP 430, 515, 530, and 400 or 419; pass the Writing Proficiency Examination.

Option in Marriage and Family Therapy (code ED_PMS04)

Students in this option will prepare for licensed independent MFT practice to work in private practice, community-agency settings, government-court settings, hospitals, clinics, Employee Assistance Programs, and city-county-state agencies to provide counseling services for adults, children, families and couples.

Prerequisite

EDP 400 or its equivalent.

Requirements

All of the following (61 units): EDP 508A, 508B, 510, 511, 512, 513, 514, 515, 520, 522, 543, 555, 556, 557, 601, 608, 609, 638, 643D, 644D, and EDP 698 or comprehensive examination. Students electing the comprehensive examination must complete an additional 6 units of approved electives from coursework in the counseling program.

Advancement to Candidacy

EDP 400, 508A, 510, 513; pass the Writing Proficiency Examination (WPE).

Option in School Counseling (code ED_PMS02)

The school counseling program is designed to prepare counselors to work in elementary, middle, and high schools. The program supports a comprehensive, developmental, and collaborative school counseling model. Students are expected to become proactive leaders who will advocate for their students and themselves, as counseling professionals working toward equity, achievement, and opportunity for all students.

Requirements

All of the following (51-57 units): EDP 400, 430, 506, 515, 520, 530, 531, 536, 555, 596, 604, 607, 638, 639, 643A, 644A, 695C, and EDP 698 or comprehensive examination.

Advancement to Candidacy: EDP 400, 430, 506, 515; and pass the Writing Proficiency Examination (WPE).

Option in Student Development in Higher Education (SDHE) (code ED_PMS03)

Students completing this option are employed in residence halls, financial aid, student activities, adult re-entry, admissions, career centers, academic advising, disabled student services, counseling centers, orientation, trio and educational opportunity programs, multicultural affairs, and community outreach in two- and four-year institutions.

Requirements

All of the following (47-54 units): EDP 400, 430, 515, 516, 538, 547, 548, 549, 555, 576, 593, 596, 638, 643B, 644B, 693, and one from EDP 520 or 595; and EDP 698 or comprehensive examination.

Advancement to Candidacy: EDP 400, 430, 515, 593; and pass the Writing Proficiency Examination (WPE)

Option in Vocational Rehabilitation Counseling (VRC) (code ED_PMS05)

Students in this option prepare to provide vocational rehabilitation services to people with disabling conditions in state rehabilitation service offices, community-based sheltered workshops, hospitals, clinics, geriatric centers and hospices, Employee Assistance Programs, Social Security Disability Administration offices, private counseling firms, private practice, and School-to-Work Transition Programs. They also prepare for national Certified Rehabilitation Counselor (CRC) and California Registered Professional Rehabilitation Counselor (CR-PRC).

Applicants should be aware that this option is under consideration for suspension or discontinuance and selected courses will not be offered in the 2004-05 academic year.

Requirements

All of the following (59-65 units): EDP 419, 420, 430, 501, 505, 510, 513, 515, 520, 524, 529, 531, 555, 637, and one from 564 or 580; and EDP 698 (Thesis) or comprehensive examination.

Advancement to Candidacy: EDP 419, 430, 501; pass the Writing Proficiency Examination (WPE).

Master of Science in Special Education (code ED_PMS06)

Students in the master's degree program are working toward attaining leadership positions in public and private schools and agencies in the community that provide services for individuals with disabilities. The master's degree program is aimed at developing advanced skills and knowledge of current research in special education, and demonstration of the ability to engage in reflective inquiry. The master's degree program ends with a thesis or comprehensive exam. The master's degree program does not result in a credential to teach students with disabilities. Students who want to teach individuals with disabilities should refer to the Education Specialist Credential Program section.

Admission

1. Submit a program application with copies of transcripts from all educational institutions verifying a GPA of 2.85 or higher on the last 60 semester units (or 90 quarter units) of course work taken.
2. Verification of a Baccalaureate degree from an accredited institution.
3. A typed essay of three to five pages, double-spaced, outlining the candidate's reasons for entering the program, experiences and training related to the program, and anticipated outcomes from completing the program.
4. An interview with program faculty (conducted at a later date).
5. 2 letters of recommendation from persons able to attest to the student's professionalism and preparedness for advanced academic studies.
6. Attendance at an on-campus program orientation.

Prerequisites

A bachelor's degree with 24 upper division units to include the following 3 areas of study (suggested courses in education noted in parentheses) and a teaching credential in Special Education or equivalent experience:

1. Developmental: 3 units (EDP 301, 302)
2. Statistics and measurement: 3 units (EDP 400)
3. Individual differences: 3 units (EDP 350); and

Requirements

Students must complete a minimum of 30 units of upper division and graduate courses with a minimum of 21 units at the 500/600-level taken at this university. Degree requirements include the following courses:

1. Foundation Courses: EDP 520, 546C, 550
2. Required Specialization Courses: EDP 535, 542, 566
3. One of the following advanced methods courses: EDP 563 or 565
4. One of the following in consultation with faculty advisor:
Comprehensive exam or Thesis
Comprehensive exam pathway: EDP 695S (3 units) and written comprehensive exam
Thesis pathway: EDP 698 (6 units)
5. 3-6 units of electives selected with the program faculty advisor.

CREDENTIAL PROGRAMS

Pupil Personnel Services

The College of Education at CSULB offers two of the four Pupil Personnel Services Credential programs issued by the California Commission on Teacher Credentialing (CCTC): school counseling and school psychology.

School Counseling Credential (code 802)

The school counseling credential is required of persons serving counseling and guidance functions beyond the advisory duties customarily performed by classroom teachers. A teaching credential or experience is not required. The credential holder is authorized to work in California public schools from kindergarten through grade 12. The counseling credential requirements include (1) undergraduate course work in the behavioral sciences and (2) specific graduate courses including practicum and field experience.

Minimum Requirements for Admission

1. Copies of transcripts verifying a GPA of 2.85 or higher on the last 60 semester units (or 90 quarter units) of course work taken;
2. Evidence of completing at least a baccalaureate degree prior to beginning the school counseling credential program;
3. Three letters of recommendation;
4. A type-written personal statement;
5. Interview.

Applicants are responsible for obtaining the 2003-2004 revision of the school counseling information packet including application materials, available in the department office (ED1-Room 10).

Program applications must be submitted to the College of Education Graduate Office (ED1-7). Application Deadline for Fall Admission: March 1

A Master of Science in Counseling or an approved equivalent degree is now required as part of the Pupil Personnel Services School Counseling Credential Program. Applicants to the Pupil Personnel Services School Counseling Credential Program who lack a Master of Science in Counseling or approved equivalent degree must concurrently apply to the Master of Science in Counseling (School Counseling Option) Program to be considered.

Prerequisites

1. Application for Certificate of Clearance is required for public school field work. Apply at least one year prior to the expected first field work semester. Persons possessing a valid California credential are exempt from this requirement.
2. Applicants are required to take the California Basic Educational Skills Test (CBEST) no later than the second available administration date following enrollment in the program.

Requirements

1. Completion of the Master of Science in Counseling (School Counseling Option) or an approved equivalent degree.
2. Complete all of the following (51 units): EDP 400, 430, 506, 515, 520, 530, 531, 536, 555, 596, 604, 607, 638, 639, 643A, 644A, and 695C.

3. Field Work Prerequisites:

A. School Counseling Field Work (EDP 643A) (300 hours of approved activities, average of 20 hours per week):

- (1) EDP 607
- (2) Certificate of Clearance (see Prerequisites above)

B. Advanced School Counseling Field Work (EDP 644A) (300 hours of approved activities, average of 20 hours per week):

- (1) EDP 530, 638, 643A, and 536 (or concurrent enrollment in 536)
- (2) Pass CBEST

4. Certification of program completion by the faculty is required. The faculty may require students to complete additional course work, field work, or demonstrate specific competencies before recommendation to the state CCTC for the school counseling credential.

School Counseling Internship

For additional information, contact the School Counseling Program Coordinator.

School Psychology Credential (code 804)

School Psychologists consult with teachers, parents, and others regarding student learning and behavior difficulties. They monitor the progress of students with special needs, assist students to develop more productive school careers, and assist teachers in the areas of behavior management and teaching methods. A teaching credential is not required.

Admission

1. Copies of transcripts verifying a GPA of 3.0 or higher on last 60 semester units (or 90 quarter units) of course work taken.
2. Possession of a baccalaureate degree from an accredited university;
3. Three letters of reference by persons who have had professional work association with applicant;
4. A written personal statement - the application form contains a list of all the items to be included.
5. Screening interview - after the admission committee reviews the papers sent in by each applicant, those selected for the interview will be notified as to time and place.
6. Masters degree in related field or admission into Masters of Arts in Education Option in Educational Psychology.
7. Evidence of having taken the CBEST is required prior to clear admission to the program.

Requirements for the Completion of the School Psychology Credential

1. Completion of an acceptable master's degree in one of the behavioral sciences. Master's degrees which typically meet this requirement in the Department of Educational Psychology, Administration and Counseling are: Master of Science in Counseling; Master of Arts in Education with an option in Educational Psychology; Master of Science in Special Education or approved equivalent master's degree;
2. Completion of a minimum of 60 units in graduate coursework or their equivalents (with the approval of the PPS School Psychology faculty) in the following areas of study - Educational Psychology: EDP 405, 520, 528, 596; Counsel-

ing: EDP 517, 601; Assessment and Intervention: EDP 524, 525, 527, 536, 560, 579A, 605; Practica and fieldwork: EDP 641A, 641B, 641C, 642A, and 642B; and 3 advisor approved elective courses.

3. Certification of program completion by the PPS credential School Psychology faculty is required. The student may be required to complete additional course work, field work, or demonstrate specific competencies before approval;
4. A Certificate of Clearance and successful performance on CBEST is required prior to field work/ internship;
5. Field Work in School Psychology prerequisites: Approval of field work-school psychology internship application by the faculty. All program courses except EDP 527, 536, 560, and 642. Application deadlines are March 1 for Summer and Fall and October 1 for Spring fieldwork.
6. Complete the National School Psychology Examination (ETS/ PRAXIS II #10400) prior to completion of the credential program.

School Psychology Internship

See Program Coordinator for details.

An internship is paid field work, performed under the supervision and with the permission of the PPS credential School Psychology faculty and the school district which hires the intern. In order to be recommended to a district as a possible intern, the student must have completed the prerequisites listed above in "1" and "5," and be approved by the School Psychology credential coordinator.

Special Education Credentials

As a result of regulation changes by the California Commission on Teacher Credentialing (CCTC) in the Spring of 1996, the Department of Educational Psychology, Administration and Counseling now offers the Education Specialist Credential. This credential program prepares and certifies special education teaching candidates in the CCTC Education Specialist Credential categories of Mild/Moderate and Moderate/Severe. This program does not require a Multiple or Single Subject credential as a prerequisite. An Intern Option is also available in collaboration with certain school districts. Please consult with the department office for further information.

Preliminary Level I – Education Specialist Credential and Intern Option: Mild/Moderate Disabilities (code 468) and Moderate/Severe Disabilities (code 469)

Professional Level II – Education Specialist Credential: Mild/Moderate Disabilities (code 468) and Moderate/Severe Disabilities (code 469)

This Specialist credential program prepares candidates in the areas of Mild/Moderate and Moderate/Severe disabilities in a program approved by the California Commission on Teacher Credentialing. The program is designed so that candidates may be certified in both areas of authorization if they complete two separate field experiences, i.e., one with students with mild and moderate disabilities and one with students with moderate and severe disabilities. Upon admission to the program, candidates must identify an area of authorization and indicate whether their

goal is to become certified in one or both areas. The program has two tiers: the Preliminary Level I Education Specialist Credential and the Professional Level II Education Specialist Credential. Following receipt of the Preliminary Level I Credential, candidates need to complete the Professional Level II preparation in special education within five years of the date of issuance of the preliminary credential. An Intern Option is also available in partnership with selected school districts. Please consult the College of Education Student Information Center for further information. An Education Specialist Credential can also be earned in conjunction with the Integrated Teacher Education Program (ITEP). Please refer to the Liberal Studies Department for information on this.

Preliminary Level I Education Specialist Credential: Mild/Moderate and Moderate/Severe

Application for admission to the Education Specialist Credential Program should be made the semester before beginning the required courses in Level I. Students may apply to the program concurrent with completion of prerequisite courses and conditions, and may be admitted on a conditional basis pending completion of these preparatory experiences. To be considered for full acceptance, students must provide verification of the following:

1. Admission to the University
2. GPA of 2.75 in college and university course work (last 60 units);
3. Demonstration of subject matter competence - California Subject Examinations for Teachers: Multiple Subjects (CSET: Multiple Subjects) passed (3 parts).
4. Prerequisites for full acceptance (must be completed or in progress before enrolling in level I courses): EDP 301 (or HDEV 307I or PSY 361) or EDP 302; EDP 350; EDP 454; *ETEC 444 or meet clear credential competencies through testing.

To complete the admissions process, students should:

1. Complete and submit the Education Specialist Credential Program application;
2. Specify area of authorization (Mild/Moderate, Moderate/Severe, or both);
3. Provide verification that prerequisites have been met;
4. Provide verification of California Basic Educational Skills Test (CBEST) attempt; and
5. Participate in a face to face interview with program faculty.
6. Each applicant will be informed in writing of the decision of the program faculty regarding acceptance into the program shortly after the interview. Upon admission, students are required to meet with assigned program faculty for advisement and may begin taking coursework in Level I in the advised sequence after acceptance into the program.

Requirements: Level I

1. EDP 480, 405; EDEL 452, 462; EDP 564, 558.
2. Pass CBEST and apply for certificate of clearance prior to field study.
3. Pass Reading Instruction Competency Assessment (RICA) Test prior to applying for credential.
4. EDP 587 A, B or 588 A, B Advanced Field Study and Seminar (A and B at 6 units each)

5. U.S. Constitution Requirement (meet competencies through testing or POSC 100 or 391).

Preliminary Level I Education Specialist Intern Option: Mild/Moderate and Moderate/Severe

Application for admission to the Education Specialist Intern Program should be made the semester before beginning the required courses in Level I. Application packets are available from the Credential Processing Center or the Education Specialist Intern Program Coordinator. Students may apply to the program concurrent with completion of prerequisite courses. To be considered for admission, candidates must provide verification of the following:

1. Employment by a collaborating school district in a qualifying special education classroom or setting
2. Subject Matter Competence (passage of all 3 parts of the CSET: Multiple Subjects)
3. Passing score on the CBEST
4. A GPA of 2.75 in College or University coursework (last 60 units)
5. U.S. Constitution Requirement

The Admission Process

To complete the admissions process, students must:

1. Complete and submit the Education Specialist Intern Program Application to the Credential Processing Center
2. Specify area of authorization (Mild/Moderate or Moderate/Severe)
3. Apply to the University
4. Participate in an oral interview with program faculty

Upon acceptance to the Education Specialist Intern Program, students will complete a program advisement sheet with a Program Advisor and may begin taking prescribed coursework in Level I.

Requirements Level I, Intern Option

Prerequisite Courses: EDP 301 (or HDEV 3071 or PSY 361) or EDP 302; EDP 350; EDP 454; and ETEC 444.

1. EDP 480, 405, EDEL 452, 462, EDP 564, 558
2. EDP 587 A, B or 588 A, B Advanced Field Study and Seminar (A and B at 6 units each)
3. Pass Reading Instruction Competence Assessment (RICA) Test prior to applying for credential.

Professional Level II Education Specialist Credential: Mild/Moderate and Moderate/Severe

Professional Level II Education Specialist Credential preparation is intended to enable new Education Specialist teachers to apply their Level I preparation to the demands of their professional positions while also developing as reflective practitioners in advanced skill areas and knowledge. The Level II program incorporates several courses in the Masters of Science in Special Education program and students are encouraged to apply to the M. S. in Special Education program.

Application and Admission

Candidates are encouraged to apply for admission to the Professional Level II Education Specialist Credential program in the semester immediately prior to their anticipated completion of Level I. The CCTC requires that candidates complete

Level II within five years of the completion of Level I. Candidates must be employed for at least 2 years under a Level I credential to be granted a Level II credential. Upon completion of the Level I credential, candidates have 120 days of employment to select a support provider and develop a Level II Individual Induction Plan. To be considered for admission, candidates must provide verification of the following:

Prerequisite Conditions and Requirements

1. Admission to the University
2. Overall GPA of 2.85 in college and university course work (last 60 units)
3. Completion of Preliminary, Level I Credential or Certificate of Eligibility
4. Employment in a special education position in the area listed on your Level I credential
5. HSC 411 A or B (Health Science requirements)
6. CPR certification
7. Two letters of recommendation (from employer and a university faculty member at previous institution)
8. Interview with program faculty.

Professional Level II Education Specialist Credential Requirements

1. Complete 546C Practicum in Special Education and complete an Individualized Induction Plan. Select area of emphasis (mild/moderate or moderate/severe); identify specialization and action research focus; and identify non-university activities.
2. Complete the following Core courses: EDP 550 and 535.
3. Complete one Specialization course: EDP 542 or 566
4. Complete one Advanced Methods course: EDP 563 or 565
5. Participate in an Exit interview with University Faculty Mentor and District Support Provider.

Administrative Services Credential

Certification of school administrators is established in a two-level Administrative Services Credential.

The Preliminary Administrative Services Certificate (first tier) has no expiration and authorizes the holder to seek an administrative position. The Certificate informs the employing school district/agency of eligibility to serve. The Certificate must be registered with the CCTC at the time the candidate accepts employment as an administrator. The CCTC will then issue the Preliminary Administrative Services Credential authorizing the candidate to serve as an administrator. Once issued, the Preliminary Credential is valid for five (5) years and it is not renewable.

The Professional Administrative Services Credential (second tier) cannot be pursued until the candidate is employed in a position requiring an administrative credential. Once issued it is valid for five years and is renewable subject to fulfillment of professional development requirements.

Preliminary (code 501)

Certification under this credential authorizes the candidate to serve in any position requiring the Administrative Services Credential. The program is oriented toward the following positions: elementary and secondary principals, assistant principals, supervisors of instruction, curriculum directors, and other building level positions. The program has been revised to meet the new

Commission on Teacher Credentialing program standards. Approval pending. See Department for further information.

Clear Admission

Preference will be given to individuals with 3 or more years of classroom teaching and/or related educational experiences.

1. Complete the "Conditional Admission to Program" requirements (#'s 1-4) as listed for the MA in Education, Option Educational Administration;
2. Possess a valid teaching credential, or pupil personnel, or library media teacher, or health services credential, or vocational education instructor's credential or clinical rehabilitative services credential.

Requirements

Prerequisite: Enrollment in courses is contingent upon acceptance into the Educational Administration Program or permission from the program faculty. Candidates must be admitted into the Educational Administration Program before enrolling in courses.

1. EDAD 541, 544, 580, 647, 648, 650, 680, ED P 677 and EDAD 649 or ED P 574.
2. Two field experiences must also be completed, EDAD 580 and EDAD 680.
3. The CBEST must be passed prior to entrance in advanced field experience (EDAD 680). The CBEST must be taken no later than the second available test administrative date following enrollment in the program.

Exit Requirements

1. Verification of three years of successful experience in a position requiring one of the credentials listed in "Clear Admission", Item 2;
2. Satisfy the state requirement for mainstreaming;
3. Present to program faculty a professional portfolio of course and field experience projects and papers completed during the program which demonstrate candidate competency.

Professional (code 502)

Certification under the Professional Administrative Services Credential (Tier II) authorizes the candidate to serve in any position requiring the Administrative Services Credential. The professional Credential cannot be pursued until the candidate is employed in a position requiring an administrative credential. The program requirements must be completed within the five year authorization of the Preliminary Administrative Services Credential. Once issued, the Professional Credential is valid for five years and is renewable subject to fulfillment of professional development requirements.

Prerequisites

1. Possession of a valid Preliminary Administrative Services Credential;
2. Verification of employment by an educational agency in an administrative position.

Admission

1. Program application and evidence that prerequisites have been met;
2. Copy of transcript verifying a 3.0 minimum overall GPA in most recent thirty (30) semester units of graduate work;
3. Two (2) non-confidential letters of recommendation, one of which must be from the applicant's immediate supervisor;

4. A personal statement (double spaced 2-3 page) regarding experience and educational background, and philosophy of educational leadership;
5. Personal interview with the Coordinator of the Professional Administrative Services Credential Program;
6. Employer verification of support for the induction and mentoring program.

Requirements

The Professional Administrative Services Credential Program has a unique design intended to better meet the needs of the new administrator. The unit requirement ranges from 16-24 semester units, with an option for non-university professional development activities of up to 120 clock hours to substitute for any or all of the 8 elective units. The program has been designed to provide the candidate with professional support through a two (2) unit mentoring and professional development plan. The plan is developed collaboratively by the candidate, the school district mentor, and the University supervisor. The academic core consists of 12 units which must be completed with a grade of "B" or better. In the final semester there is a two (2) unit candidate assessment conducted through the Portfolio Exhibition. The balance of the program is completed through approved electives and/or professional development plan activities.

1. Individual candidate professional development plan prepared in EDAD 640.
2. The Program includes four (4) components:
Mentoring and Professional Development Planning - 2 units: EDAD 640;
Core Courses - 12 units: EDAD 641, 657, 658, and 659;
Electives/Professional Development Plan Activities - up to 8 units: selected from approved courses throughout the University; EDAD 691 for 1-8 units; and/or up to 120 clock hours of professional development activities to substitute for the 8 elective units. (non-university);
Candidate Assessment - 2 units: EDAD 692.
3. Satisfactory completion of the professional development plan as demonstrated through the Portfolio Exhibition in EDAD 692.
4. Minimum of two years of successful, full-time school administrative experience in the public school, or private school of equivalent status.

Exit Requirements

1. Provide verification of two years of successful full time experience in a position requiring the Administrative Services Credential;
2. Present to program faculty, school district mentor, and a panel of other candidates a professional portfolio of course and professional development projects, activities, and papers completed during the program which demonstrate candidate competency.

Library Media Teacher Services Credential (code 700)

The 28 unit program in Library Media prepares students for service as a library media teacher, grades K-12, in the State of California. For additional information go to www.csulb.edu/programs/lmt.

Admission

1. Submit a University Application, March 1 for Fall or October 1 for Spring (a maximum of six units may be completed through Open University/Extension Services prior to enrollment into the University);
2. Completion of a bachelor's degree;
3. Possession of a valid California teaching credential;
4. Passage of CBEST;
5. Overall 3.0 GPA in the last 60 semester or 90 quarter units of course work or 3.0 GPA in the completion of first 15 units of basic teaching credential course work;
6. Three letters of recommendation (submit to program advisor or department office prior to screening interview);
7. A one page personal statement (submit to program advisor or department office prior to screening interview) resume;
8. Screening interview.

Requirements

1. Core Course (3 units): EDCI 625, or equivalent;
2. Specialization Courses (21 units): LI 510, 520, 530A, 530B, 540, 550, 570;
3. Field Experience (4 units): LI 580.

A working knowledge of word processing, databases, spreadsheets, desktop publishing, presentation software, Internet searching and e-mail usage is expected.

Graduate Certificate Community College (code COEDCT02)

The community college graduate certificate is designed to prepare graduate students to work in community college settings as teaching faculty or counselors. Courses offered in this program provide students with an overview of the community college and its role in the American higher education system. Students will gain insights and experiences in the classroom and in fieldwork that will strengthen their knowledge and skills in working with community college students, faculty, and staff. The certificate program consists of 18 units; 9 units are from the master's degree program and must be approved by the student's master's degree program graduate advisor; and 9 units are specific to the study of college students, the community college, and fieldwork. All students will be required to:

1. Submit a Graduate Certificate in Community College application to the Office of Graduate Studies by April 1 for fall consideration or October 15 for spring consideration
2. Be enrolled in a master's degree program or have an earned master's degree in a discipline leading to teaching or counseling in post-secondary education settings.
3. Complete 9 units of coursework in Educational Psychology: Introduction to the Community College (EDP 552), Students in U.S. Higher Education (EDP548), and a fieldwork class that is counseling or teaching focused (EDP 644B).
4. Complete an additional 9 units approved by their master's degree program graduate advisor for consideration to fulfill the 18 units required for the certificate. These courses may include pedagogy, learning theory, instructional management, and/or teaching methodology courses in the student's major area of study, or any other courses in the discipline deemed appropriate by the master's degree program graduate advisor.

Graduate Certificate for Career Guidance Specialist (code COEDCT01)

This post-baccalaureate certificate program is planned for counselors and educators with interests in career education and career counseling.

Applicants should be aware that this option is under consideration for suspension or discontinuance and selected courses will not be offered in the 2004-05 academic year.

Admission

1. File an "Application for Graduate Admission," along with two complete sets of official transcripts, with the University Office of Admissions no later than March 1 for fall semester or October 1 for spring semester;
2. Transcripts must verify a GPA of 2.85 or higher on the last 60 semester (or 90 quarter) units of course work taken;
3. Evidence of completing at least a baccalaureate degree prior to beginning the Graduate Certificate program;
4. Two letters of recommendation (send only after notification by the program);
5. A type-written personal statement (send only after notification by the program);
6. Screening interview(s) (upon notification by the program);
7. Items 1-5 above must be on file in the department no later than November 1 for the following spring semester, or April 1 for the following fall semester;
8. Applicants are allowed only nine semester units credit applied to curriculum requirements completed prior to admission into the first semester of the program.

Requirements

1. 19 core course units: ED P 529, 530, 531, 637, and 643C;
2. Passage of the Writing Proficiency Examination (WPE);
3. Approved electives in the Departments of Educational Psychology, Administration and Counseling; Human Resources Management; Occupational Studies; Psychology or Sociology as needed to fulfill 19 units upon waiver of any core course units granted upon admission to certificate program.

Joint Doctor of Education in Educational Administration and Leadership (code EDADPH01)

This joint doctoral program is a collaborative partnership between the University of California and selected campuses of the California State University (CSU) system. The program has many options designed to prepare current and future K-16 educational leaders to develop and nurture organizations that can serve the diverse populations of southern California. Program graduates will be reflective scholar practitioners aware of the complex challenges of curricula, finance, organizational dynamics, and effective collaborative partnerships with local, state, and national stakeholders in California K-16 school systems. Emphasis will be placed on the expanding and changing role of education as an intervention for social change in meeting the multifaceted needs of society. Graduates, in a cohort learning community, will experience an interdisciplinary approach to educational leadership, teaching and learning, organizational development and management, and research.

California State University, Long Beach provides the direction for the higher education leadership option. Candidates for this

option/program will be selected by the Joint Admissions Committee and will be required to (a) meet the general admissions requirements of the UCI Graduate Division and (b) be recommended for admission by the Program's Joint Graduate Admission Committee. Standards of excellence and criteria such as the following will be considered for graduate review: (a) completion of the Master's Degree study in education, normally from one of the participating CSU campuses; (b) a minimum grade point average of 3.0 in coursework taken for the baccalaureate degree; the GPA in Master's Degree study will also be considered; (c) three letters of recommendation from individuals familiar with the applicant's ability to perform graduate level work; (d) a specified minimum total score on the verbal and quantitative sections of the Graduate Record Examination aptitude test; (e) quality of written materials required to be submitted by the applicants; and (f) a successful interview with at least one member of the Program's Joint Graduate Admissions Committee.

A prescribed sequence of courses for this program is designed for three years of study including summers. After completion of all course work, the candidate advances to candidacy and undertakes the dissertation. All candidates must be formally in residence (enrolled in the equivalent of at least one 4-unit course) at the University of California, Irvine (UCI) as well as at a CSU campus for no less than three quarters/two semesters. A typical student course of study would consist of approximately 18 courses plus the dissertation beyond the Master's Degree.

A joint Memorandum of Understanding addresses program issues and requirements. See the Ed.D. Advisor in the Educational Psychology, Administration and Counseling Department for details and the Educational Psychology, Administration and Counseling website at <http://www.edpac.csulb.edu>.

Departmental Courses

The courses offered by the department align with several academic disciplines and traditions as listed below:

Counseling

EDP 191 Career and Personal Explorations
 EDP 357 Self Management
 EDP 430 Orientation to Counseling
 EDP 502 Vocational Aspects of disability
 EDP 504 Family Systems Approach to School Discipline Problems
 EDP 505 Job Development and Consultation
 EDP 506 Counseling in School Settings
 EDP 510 Laws and Ethics for Counselors
 EDP 511 Counseling the Alcohol/Chemically Dependent Person
 EDP 512 Child and Spousal/Partner Abuse
 EDP 513 Introduction to Clinical Interviewing
 EDP 514 Medications and Counseling
 EDP 515 Counseling Theory
 EDP 516 Counseling the Adult
 EDP 517 Seminar in School Counseling
 EDP 522 Counseling Methods and Techniques
 EDP 529 Assessment in Career Counseling
 EDP 530 Career Development and Decision Theory

EDP 531 Career Information Resources
 EDP 535 Collaborative Partnerships and Effective Communication in School Settings
 EDP 536 Collaborative Consultation in the Schools
 EDP 538 Student Development in Higher Education
 EDP 543 Human Sexuality Counseling
 EDP 547 Student Development Theory
 EDP 548 Students in U.S. Higher Education
 EDP 549 Management of Student Development in Higher Education
 EDP 552 Introduction to the Community College
 EDP 555 Cross-Cultural Counseling
 EDP 556 Counseling Children and Adolescents
 EDP 557 Counseling Couples
 EDP 580 Vocational Work Evaluation Systems
 EDP 593 Seminar in Professional Development in Counseling and Human Services
 EDP 595 Qualitative Research Methods
 EDP 601 Trauma and Grief counseling
 EDP 607 School Counseling Practicum
 EDP 608 Seminar and Practicum in Marriage and Family Therapy
 EDP 609 MFT Practicum
 EDP 615 Seminar in Home-School – Community Relations
 EDP 634 Family Systems Therapy: Theory and Practice
 EDP 637 Career Counseling Practicum
 EDP 638 Group Counseling
 EDP 639 Seminar in Organization of Pupil Personnel Services
 EDP 643A-D Counseling Field Work
 EDP 644A-D Advanced Counseling Field Work
 EDP 692 Special Topics in Counseling
 EDP 693 Advanced Seminar in Professional Development and Counseling
 EDP 695C Seminar in Professional Development in Counseling and Human Services

Educational Administration

EDAD 541 Leadership, Decision Making, and Collaboration
 EDAD 544 Legal Aspects of Education: Equity and Access
 EDAD 580 Introduction to Field Experience in Administration
 EDAD 590 Special Problems in Educational Administration
 EDAD 640 Mentoring and Professional Development Planning for the New Administrator
 EDAD 641 Advanced Instructional Leadership
 EDAD 647 Human and Financial Resources
 EDAD 648 Schools as Organizations: Development, Management, and Assessment
 EDAD 649 Urban Schools and the Community: Social, Political, Policy Issues
 EDAD 650 Instructional Leadership and Assessment

Educational Administration Courses (EDAD)

Graduate Level

541. Leadership, Decision-Making, and Collaboration (3)

Prerequisite: A valid regular teaching credential or 15 upper division or graduate units in education. Leadership theory, styles, skills and their relationship to effective schools. Importance of developing a vision and skills for leading an organization to accomplish goals supportive of academic achievement for all pupils. Decision-making, communication, group dynamics, conflict resolution, and collaboration. Participate in a personal assessment, develop a philosophy and vision statement, a professional and academic plan, and begin a professional portfolio to demonstrate educational leadership competence. Letter grade only (A-F).

544. Legal Aspects of Education: Equity and Access (3)

Prerequisite: EDAD 541. Study of school law with particular emphasis on California law, as set forth in the State and Federal Constitutions, statutes, judicial decisions, and in the rules and regulations of the U.S. Department of Education, California Department of Education and local units of administration. Letter grade only (A-F).

580. Introduction to Field Experience in Administration (3)

Prerequisite: Approval by the Program Coordinator, Department of Educational Psychology, Administration and Counseling. Written application should be made by October 1 for the spring semester and March 1 for the fall semester. This is the first of two on-the-job experiences involving the student in the solution of problems in administration and supervision at the elementary and secondary levels. The course requires 100 hours of field experiences at the Candidate's school site. Credit/No Credit grading only.

590. Special Problems in Educational Administration (1-3)

Prerequisite: Enrollment limited to graduate students who hold a standard teaching credential and consent of instructor. Advanced study in educational administration within an area of specialization

done on experimental, research and/or seminar basis. Area will be designated by department at the time course is scheduled. May be repeated to a maximum of 6 units for certificate and degree purposes, subject to suitable change in course content. Non-degree and non-certificate students may enroll for additional units subject to suitable change in course content. Letter grade only (A-F).

597A,B,C. Directed Study (1,2,3)

Prerequisite: Approval of program coordinator and Graduate Studies Office. Application for enrollment must be made to the Office of Graduate Studies by March 1 for the summer or fall semester or by October 1 for the spring semester. Individual creative activity; projects, surveys, intensive reading; practical and action research in an area significant to the field of educational administration. Could also involve small group activity focused on an educational problem or issue. May be repeated to a maximum of 6 units, with no more than 3 units in one semester or for degree purposes. Letter grade only (A-F).

640. Mentoring and Professional Development Planning for the New Administrator (2)

Prerequisite: Admission to EDAD Professional Administrative Services Program. The candidate, the University supervisor, and the school district mentor work together to develop an individualized induction plan for the support and professional development of the beginning administrator. The plan is based on a pre-assessment of the candidate's skills and competence. The plan includes a mentoring component, portfolio, academic course work, and optional non-university based professional development activities. Emphasis is placed on preparation to provide leadership in socioculturally diverse schools. Credit/No Credit grading only.

641. Advanced Instructional Leadership (3)

Prerequisite: EDAD 640. A major intent of the course is to guide instructional leaders in broadening their theoretical knowledge of transformational pedagogy (transformative theories based on constructivism, critical, and affective pedagogies), and in applying these transformative constructs to structure schools for student success. The course is designed to present a holistic approach to educational leadership and curricular decision-making through the integration of the major themes: 1) organizational and cultural environment, 2) ethical and reflective leadership, and 3) management and information systems. Letter grade only (A-F).

647. Human and Financial Resources (3)

Prerequisite: EDAD 541. Examine civil service systems, study the role and structure of personnel administration used in public school education. Review bureaucracy, rules and regulations, limitations in hiring and firing, PERB decisions, case law; labor contracts and limitations imposed by those contracts. Examine the costs associated with human resources and other fiscal infrastructure costs associated with the provision of free public education in California. Letter grade only (A-F). (Lecture 2 hours; Lab 2 hours.)

648. Schools as Organizations: Development, Management, and Assessment (3)

Prerequisite: EDAD 541. Concepts and skills of managing educational organizations. Decision making, conflict management, motivation, leadership, team building, communication, planning, and organizational change, culture and renewal. Perspectives and analysis of complex organizations and the theoretical and conceptual advances in the field. Letter grade only (A-F).

649. Urban Schools and the Community: Social, Political, Policy Issues (3)

Examination of characteristics of urban schools and the diversity of student populations and attitudes towards them. Study of the social, political, cultural forces impacting schools. Study of school programs and community collaboratives for delivering instruction and services which lead to safe, effective urban schools. Letter grade only (A-F).

650. Instructional Leadership and Assessment (3)

Prerequisite: Admission to MA and/or Preliminary Administrative Services Credential program. Examine instructional leadership practices which have been proven successful in maximizing achievement for all students in urban schools. Examples of such

practices included: working with teachers to develop a learning community which values diversity and provides powerful learning experiences based on knowledge of constructivist pedagogy, cognitive and language development; planning and utilizing valid and reliable assessments of student progress; utilizing instructional supervision models which provide for formative evaluation of teachers; planning and implementing staff development. Letter grade only (A-F).

657. Practical Application of Human and Fiscal Resources (3)

Prerequisite: EDAD 640. Examination and application of principles, practices, procedures and guidelines affecting the management of fiscal and human resources, and information systems in public education. Course will include labor relations, collective bargaining, contract management, staffing, and budgeting issues. Letter grade only (A-F).

658. Organizational Development, Culture, and Change (3)

Prerequisite: EDAD 640. An examination of the current and historical contexts of schooling; macro and micro factors and conditions that influence schools as organizations; moral and ethical leadership principles; and the application and management of change to improve the cultural and organizational environments of schools. Letter grade only (A-F).

659. Educational Governance, Politics and Policy (3)

Prerequisite: EDAD 640. A critical examination of the moral and ethical dimensions of schooling, policies related to equity and access issues, political, economic, and legal perspectives and how they influence educational organizations, and the effects of collaborative leadership models on evolving school governance systems. Letter grade only (A-F).

680. Advanced Field Experience in Administration (3)

Prerequisites: EDAD 541, approval by the Coordinator of Educational Administration, successful completion of EDAD 580. Application should be made by March 1 for the fall semester and October 1 for the spring semester. This is the second of two on-the-job experiences involving the student in the solution of problems in administration and supervision at the elementary and secondary levels. The course requires three weeks of full time field experiences completed at a location other than the candidate's school site. Credit/No Credit grading only.

691. Educational Administration Professional Development (1-8)

Prerequisite: EDAD 640. Participation in field-based professional development activities as specified in the candidate's individual Professional Development Plan created and approved in EDAD 690. One unit credit may be granted for 15 contact hours of professional development activity. May be repeated to a maximum of 8 units. Credit/No Credit grading only.

692. Administrator Portfolio Development and Exhibition (2)

Prerequisite: Completion of the Professional Development Plan, including the core courses, electives and/or professional development activities. Presentation of the candidate's Professional Portfolio consisting of academic course accomplishments such as papers, projects, action research; a personal mission statement; a reflective journal and/or artifacts which portray accomplishments in the administrative work setting, mentor involvement, and optional professional development activities completed during the credential program. The presentation will be made to the instructor, the school district mentor, and a panel of other candidates. Credit/No Credit grading only.

693. Developing Teacher Leadership in Middle Level Education (3)

Prerequisite: Students must be enrolled in either a Teacher Education Masters Program, or the Tier II Professional Administrative Services Credential Program, or consent of the instructor. Contemporary research on effective schools identifies teacher empowerment as critical to school improvement and success. This course will involve administrators and teachers in developing middle level teacher leadership. Students will learn and practice collaborative and action research models. Letter grade only (A-F). Same course as EDEL 693 and EDMS 693.

695. Master's Research Study in Educational Administration (3)

Prerequisites: EDP 520 or 595; advancement to candidacy in Educational Administration Option, approval of graduate advisor and written application to the Graduate Office. Application for enrollment must be made to the Graduate Office by March 1 for the summer or fall semester or by October 1 for the spring semester. Utilization of action based research methods to identify, study, and analyze a school/district based problem with recommended solutions. Students must prepare a culminating research study describing the issue under investigation, related literature, data collection methods, findings and recommendations for problem resolution. Credit/No Credit grading only. May be repeated to a maximum of 6 units in different semesters. (Not open to students pursuing the Thesis option.)

697. Directed Research (1-3)

Prerequisites: Consent of instructor, department chair and associate dean. Individual research or intensive study under the guidance of a faculty member. May be repeated to a maximum of 3 units for certificate and degree purposes, subject to suitable change in course content. Application for enrollment must be made by March 1 for the fall semester or by October 1 for spring. Letter grade only (A-F).

698. Thesis (3,3)

Prerequisites: Advancement to candidacy, ED P 595 or 696, approval by director, department chair and associate dean. Planning, preparation and completion of a thesis under supervision of a faculty committee. Must be taken for six units. Application for enrollment must be made to the Graduate Studies Office by March 1 for the fall semester or summer session or October 1 for the spring semester. Letter grade only (A-F).

Educational Psychology Courses (EDP)

Lower Division

180. Family, School, Community Partnerships (3)

Introduce students to current family, school, and community partnership models and approaches fostering two-way partnerships with families and communities of diverse backgrounds from primary grades through high school: historical, legal, social, and political perspectives regarding educational access and equity for diverse student populations found in contemporary classrooms; building relationships with ethnically and linguistically diverse families and communities. Letter grade only (A-F).

190. Current Topics in Education (1-3)

Orientation to and exploration of topics relevant to the college student as a learner-scholar and decision-maker within the changing campus, community and societal milieu. Lectures, discussion, field study. May be repeated to a maximum of 6 units with different topics. Topics will be announced in the *Schedule of Classes*.

191. Career and Personal Explorations (3)

Prerequisite or Corequisite: Any foundation (G.E. Category A1, A2, A3, or B2) class. Not open to students with credit in EDP 360I. A course designed for, but not limited to, entering and undeclared students. An exploration of the issues, topics and tasks related to personal, educational and career choices. Includes educational and career planning, exploration of personal characteristics and individual differences, life and work values and interests, decision making, goal setting, and job/career search preparation.

Upper Division

301. Child Development and Learning: A Cross-Cultural Perspective (3)

Explores the physical, cognitive, communicative/linguistic, and socio-emotional development of the child from the prenatal through adolescent period across diverse cultures with an emphasis on the learning process and developmentally appropriate teaching practices.

Educational Psychology Courses (EDP)

302. Early and Late Adolescent Development and Learning: A Cross-Cultural Perspective (3)

Explores social, emotional, cognitive, and physical development in early and late adolescence across cultures with an emphasis on the learning process and developmentally appropriate teaching practices.

303. Preparing to Teach Special Populations in the General Education Classroom (1)

Prerequisites: Concurrent enrollment in EDEL 380. Roles and responsibilities of the general education teacher in the Individualized Education Program (IEP) process, including identification; referral; assessment; IEP planning and meeting; implementation; and evaluation. Relevant state and federal laws pertaining to the education of exceptional populations will be addressed as they relate to the major categories of disabilities. An emphasis will be placed on the general educator's role as a member of a multi-disciplinary team. Letter grade only (A-F).

305. Educational Psychology (3)

This course is a broad overview of the field of Educational Psychology. Analysis of theories of learning as they relate to intellectual, social, and personal domains of development with diverse learners. Emphasis on learning, motivation, and development with attention to educational practices to foster critical thinking, problem solving, and performance skills.

350. Education of Exceptional Individuals (3)

Survey of the education of individuals who have communication disabilities, visual disabilities, hearing disabilities, physical disabilities, learning disabilities, severe disabilities, and those labeled as gifted and talented. Field work.

357. Self-Management (3)

(Not open to students with credit in PSY 357.) Prerequisite: PSY 100. Introduction to theory, research and application of self-management procedures. Methods for integrating and managing the cognitive, emotional, behavioral, and physiological aspects of an individual will be discussed. Topics will include systematic self-observation, career decision-making, interpersonal relations, time management, stress and emotion management, and habit change and maintenance.

360I. Life and Career Decisions (3)

Prerequisites: Completion of GE Foundation requirements, one or more Explorations courses, and upper-division standing. Not open to students with credit in EDP 191. The course content will cover self-awareness (locus-of-control, personal characteristics, life values, etc.), personal styles and preferences (study and work skills and preferences), analysis of educational progress, decision making, selecting a major, and selecting a career. A series of assessments and assignments will be used to explore each of these areas. This course is designed to assist juniors and seniors who are undeclared majors or who have declared a major but are unsure that their choice of major is the right one for them. Letter grade only (A-F).

373I. Nonverbal Communication: Interaction of Mind and Body (3)

Prerequisites: Completion of GE Foundation requirements, completion of one or more Exploration course(s), and upper division status. History and theories of the development of mind/body integration. Enhancement of personal and interpersonal relations through lectures, discussion, films, and movement experiences. Analysis and synthesis of the interdependence of the psychological and physical processes in nonverbal communication. Same course as DANC 373I.

390. Current Topics in Education (1-3)

Orientation to and exploration of topics relevant to the college student as a learner-scholar and decision-maker within the changing campus, community and societal milieu. Lectures, discussion, field study. May be repeated to a maximum of 6 units with different topics. Topics will be announced in the *Schedule of Classes*.

*400. Introduction to Educational Measurement and Statistics (3)

An introductory course in educational testing and measurement and statistical concepts that support these methods. Basic concepts of measurement including descriptive statistics, norms, reliability, and validity; correlation and simple regression; derived and transformed scores, issues related to the development of educational measures; interpretation of test scores. This course may not be used as a substitute for EDP 419 or 420.

*405. Positive Strategies for Classroom Management (3)

Applications of existing models and strategies of classroom management to promote student prosocial behaviors and academic growth and development. Includes information regarding functional analysis, hypothesis testing, instruction of alternative behaviors, crisis management and program modification in school settings.

*419. Educational Statistics (3)

Prerequisite: Satisfactory completion of an undergraduate mathematics course suitable for general education math credit and, if required by the major, a lower division statistics course. Introduction to descriptive and inferential statistical methods with application to educational research problems. Emphasis upon understanding statistical concepts, computation skills, and the use of computer programs in data analysis (Lecture 2 hours, laboratory 2 hours).

*420. Tests, Measurements and Evaluations (3)

Prerequisite: ED P 419. Determination, meaning and use of fundamental statistical concepts applied to problems of measurement and evaluation; construction, interpretation and use of standardized and teacher-made tests.

428. Language, Learning and the Developing Child: A Cross-Cultural Perspective (3)

Explores the communicative-linguistic, cognitive, physical, and socio-emotional development of the child from the prenatal to adolescent period across diverse cultures with an emphasis on language acquisition and the learning process. Letter grade only (A-F). Not open to students currently enrolled in the Liberal Studies program. Same course as LING 429, FCS 409, and EDEL 429.

*430. Orientation to Counseling (3)

A survey of the specialties, functions, roles, models and activities commonly employed in the counseling profession. The course will also include practice in rudimentary active listening skills, a survey of historical and conceptual frameworks, voluntary participation in community-educational services, and developing a professional orientation perspective, and exploring the special needs of clients and other professional considerations.

431. Cultural and Linguistic Diversity in Schools (3)

This course surveys the multiple forms of diversity present in schools, including issues surrounding culture ethnicity, race, linguistics, faith, special needs, gender, sexual orientation, and socio-economic status. Emphasis is on multicultural education, language minority education, and the promotion of learning for all students. The course addresses concepts of culture, educational equity, social justice, anti-bias and anti-racist curriculum, stereotyping, and cultural and linguistic contact. An overview is provided of the history, policy and practices regarding cultural and linguistic minorities in the United States and the impact on education. Special focus is placed on educational initiatives to address the rich ethnic diversity of California schools. Models of English language development and bilingual education are examined. Letter grade only (A-F). Same course as EDEL 431 and LING 431.

*432. Social and Cultural Diversity in Educational Settings (3)

Experiential opportunity to examine personal attitudes toward distinct groups of persons, to develop multicultural competencies, and examine racism. Study of cultural, historical, social, and psychological factors that promote equal human worth. Same course as EDEL 430.

439. SDAIE: Specially Designed Academic Instruction in English (3)

Theories of second language acquisition and practical application: methods of teaching content to English language learners, reading

and writing strategies, and curriculum development with application to K-12. Letter grade only (A-F). Same course as EDEL 439 and EDSE 439.

***454. Development of Communication Skills in Bilingual Contexts (3)**

Prerequisite: Consent of instructor. Normal and atypical development of language skills in school-aged children from non-English language backgrounds. Focus on the skills needed in the classroom, including communicative competence, pragmatics and literacy. Distinguishing between normal language development and linguistic problems.

***480. Foundations of Inclusive Education in a Diverse Society: Philosophical and Historical Perspectives and Legal Mandates (3)**

Prerequisites: Admission to Education Specialist credential program. Introduction to the philosophical and historical foundations of special education in a diverse society. Examination and discussion of educational theories, philosophies, models, legal mandates, and traditions of inclusive education. Discussion of impact of contemporary school practices on students with disabilities and their families. Letter grade only (A-F).

***485. Theoretical Foundations of Language Minority Education (3)**

Introduction to theoretical foundations of language minority instruction. Background on the historical and political context of the development of educational language policies. Letter grade only (A-F). Same course as LING 485.

***490. Special Topics in Educational Psychology (1-6)**

Prerequisite: Consent of instructor. Topics of current interest in educational psychology selected for intensive study. May be repeated to a maximum of 6 units with different topics. Topics will be announced in the *Schedule of Classes*.

492. Internships in the Human Services (3)

Prerequisite: Consent of instructor. Students in any major are placed in agencies and organizations to engage in volunteer or paid work in human services/mental health. The required fifteen hour seminar will focus on personal values, interpersonal communications skills, critical thinking, and problem solving as they relate to the students' field placement. Development of knowledge and skills transferable to future careers will be stressed. A minimum of 120 hours field experience is required for the semester.

***497. Independent Study (1-3)**

Prerequisites: Consent of instructor and department chair. Independent study undertaken under the supervision of a faculty member. May be repeated to a maximum of 6 units, with no more than three units applicable to credential or major requirement.

Graduate Level

500. Educational Research (3)

Prerequisite: ED P 400. Types and applications of educational research, research design, problems of internal and external validity, uses of research resources, and critiques of research studies. Recommended to be taken early in a master's degree program. Letter grade only (A-F).

501. Foundations of Vocational Rehabilitation (3)

History, philosophy, and legislation of rehabilitation affecting people with disabilities served by public and private rehabilitation delivery systems. Letter grade only (A-F).

502. Vocational Aspects of Disability (3)

Medical, psychological, and sociocultural aspects of disabling conditions related to vocational activities. Emphasizes identification of functional limitations, attitudinal barriers to employment, and methods of remediating disabling conditions. Letter grade only (A-F).

504. A Family Systems Approach to School Discipline Problems (3)

Designed to help teachers and parents develop appropriate student behavior. A communications based family systems approach to discipline. Letter grade only (A-F).

505. Job Development and Consultation (3)

Job development methods leading to employment. Includes resume writing, job interviewing, networking, and employer consultation methods. Conceptual and applied distinctions between employability and placeability are addressed.

506. Counseling in School Settings (3)

Prerequisite: Official admission to the School Counseling Program. An overview of issues related to school counseling and the role of the professional school counselor. Includes a practicum component designed to develop counseling skills and promote helping relationships. Field experiences are required. School Counseling students are expected to take this course in their first semester in the program. Letter grade only (A-F).

508A. Family Systems Therapy Applied to Lifespan Development (3)

Family systems assessment and counseling applied to lifespan development theories. Letter grade only (A-F).

508B Family Systems Methods (3)

Prerequisite: EDP 508A or consent of instructor. The application and practice of family systems therapeutic methods. Letter grade only (A-F).

510. Laws and Ethics for Counselors (3)

Prerequisites: ED P 430 and/or consent of instructor. Examines laws governing the professional aspects of counseling. Included are the legal and ethical considerations of the practice of family/child and clinical community counseling services. The emphasis will focus on clinical practice. Letter grade only (A-F).

511. Counseling the Alcohol/ Chemically Dependent Person (2)

Survey of the theories, etiologies, and major treatment approaches for counseling and preventing alcohol and chemical dependency, and the role of family and community resources, referrals, and prevention programs. Letter grade only (A-F).

512. Child and Spousal/Partner Abuse (1)

Child and spousal/partner abuse assessment indicators, laws, community resources, mandatory reporting requirements for child abuse and spousal/partner violence, assessment, detection, and interventions for the child, family, spouse/partner, and the offender. Designed for licensure requirements for mental health practitioners and graduate students. Letter grade only (A-F).

513. Introduction to Clinical Interviewing (3)

Theoretical bases and applications in the conduct of problem identification and diagnostic interviewing in career, clinical, college, school, and vocational rehabilitation counseling settings. Letter grade only (A-F).

514. Medication and Counseling (2)

Prerequisites: EDP 513 or Consent of Instructor. An examination of the categories of psychotropic medications: antidepressants including antipsychotics, anxiolytics, and mood stabilizers. Major side-effects of these medications and a brief overview of their medical management are reviewed. Herbal alternatives to pharmacologic agents will be explored. Identification of information resources for counselors and clients. Letter grade only (A-F).

515. Counseling Theory (3)

Prerequisite or Corequisite: EDP 430. Major counseling theories examined and the competencies of each developed for use in helping relationships. Letter grade only (A-F).

516. Counseling the Adult (3)

Prerequisite: ED P 515. Theory and practice of counseling and guidance of the adult. Letter grade only (A-F).

517. Seminar in School Counseling (3)

Prerequisite: ED P 515. Theory, research and techniques of counseling; use and analysis of case studies. Clinical work is required. (Not open to students with credit in ED P 631.) Letter grade only (A-F).

519. Quantitative Educational Data Analysis I (3)

Prerequisites: EDP 419 and 420 or equivalent. An advanced educational univariate data analysis course: hypothesis testing using analysis of variance, analysis of covariance, multiple regression, and path analysis. Letter grade only (A-F).

Educational Psychology Courses (EDP)

520. Research Methods in Education (3)

Prerequisites: For majors in Educational Psychology: EDP 419 and 420, or equivalents. For other majors, with approval of program advisor: EDP 400 or equivalent. Examination and application of educational research methodology including various types of qualitative and quantitative methods, research designs, sampling methods, inferential statistics and hypothesis testing, and the structure and content of a research proposal. Letter grade only (A-F).

522. Counseling Methods and Techniques (3)

Prerequisites/Corequisites: EDP 513, 515. An applied course which provides practice in the methods and techniques of the major theoretical approaches employed in counseling. Letter grade only (A-F).

524. Psychoeducational Assessment (4)

Prerequisites: EDP 420, EDP 528, and admittance to the School Psychology Program or consent of instructor. Practice in administration and interpretation of individually administered intelligence tests, tests of psychological processing and achievement. Students will administer practice tests to adults and children, be observed for proficiency, and assess clinical cases. (Lecture 3 hrs, lab 3 hrs). Letter grade only (A-F).

525. Psychoeducational Diagnosis in Multicultural Settings (4)

Prerequisite: EDP 524. Theory and practice of assessment of individuals with an emphasis on the linguistically and culturally diverse. Application of assessment results to regular and special education programs. (lecture 3 hrs., lab 3 hrs.) May only be offered in the Spring semester. Letter grade only (A-F).

527. Clinical Practice in School Psychology (3)

Prerequisites: ED P 525, and concurrent enrollment in ED P 642A. Diagnostic and remedial techniques with individuals, including those with learning disabilities and those with low-incidence exceptionalities. Discussion of problems and solutions in school psychology practice. Letter grade only (A-F).

528. Orientation to Professional School Psychology (3)

Prerequisites: Admittance to the School Psychologist Program; EDP 515. Introduction to the field of school psychology. History of the field, orientation to public education, roles and functions, laws and ethics, research base, organization and supervision, social and cultural influences, service delivery models, and current literature will be discussed. Letter grade only (A-F).

529. Assessment in Career Counseling (3)

Prerequisite: ED P 420 or equivalent or consent of instructor. The selection, administration, scoring, and interpretation of assessment instruments in career counseling. Assessment areas include interests, values, personal characteristics, and aptitudes and abilities. Techniques for developing and using special assessment instruments will also be covered. Letter grade only (A-F).

530. Career Development and Decision Theory (3)

Emphasis on life planning concepts as related to the world of work, theories of career development and the career decision process. Letter grade only (A-F).

531. Career Information Resources (3)

Knowledge, use and management of information resources in the career development field. Letter grade only (A-F).

535. Collaborative Partnerships and Effective Communication in School Settings (3)

Prerequisites: Acceptance in Education Specialist Level II program or Master of Science in Special Education program, development of an Individualized Induction Plan, or consent of instructor. Methods for developing collaborative partnerships and effectively communicating with educators, community members, families, and individuals with disabilities. Letter grade only (A-F).

536. Collaborative Consultation in the Schools (3)

Prerequisites/Corequisites: EDP 642A, 642B, 643A, 644A, or Field Placement in Special Education. Theory and practice of collaborative consultation in the schools. Models, roles and skills will be discussed, rehearsed during in-class simulations, and practiced in field settings. Field experiences are required. Letter grade only (A-F).

538. Student Development in Higher Education (3)

Survey of student development in public and private colleges and universities, focusing on historical, philosophical and theoretical foundations; roles and functions; legal, ethical, and organizational issues. Letter grade only (A-F).

541. Seminar in Educational Measurement and Assessment (3)

Prerequisites: EDP 419, 420, 519, and 520 or equivalents. Advanced studies examining the reliability and validity of test scores, item response theory, and other statistical approaches for the improvement of educational testing, and practical application of administration and interpretation of assessment outcomes. Letter grade only (A-F).

542. Technology in Special Education (3)

Prerequisites: Acceptance in Education Specialist Level II program or Master of Science in Special Education program, development of an Individualized Induction Plan, or consent of instructor. Overview of Assistive Technology and Augmentative communication for individuals with exceptional needs. Examination of legislation, devices, and services using assistive technology and augmentative communication. Advanced development of Computer Assisted Instruction across the curriculum for individuals with exceptional needs. Introduction to assistive technology assessment. Principles of augmentative communication systems. Letter grade only (A-F)

543. Human Sexuality Counseling (3)

Prerequisite: ED P 515. Training in human sexuality education, counseling, and therapy. An examination of personal attitudes and values. The study of the physiological, psychological, and socio-cultural variables associated with sexual behavior, sexual identity, and sexual disorders. For MFCC certification only. Letter grade only (A-F).

546A,B,C,D,E,F. Practicum in Special Education (3,3,3,3,3,3)

Prerequisites:

A. Acceptance in Education Specialist Level II program or Master of Science in Special Education program and consent of instructor; for the Education Specialist Credential Program, Level II and MS in Special Education.

B. Admission to Education Specialist Intern Program, Level I (first semester) or paraeducation program or consent of instructor

C. Level I (first semester) & EDP 546D; for the Education Specialist Intern Program, Level I (second semester).

D. Level I (second semester) & EDP 546E; for the Education Specialist Intern Program, Level I (third semester).

Supervised experience with individuals with exceptionalities in schools, clinics, post-secondary education, workplaces, and residential settings. Application should be made by March 1 for the fall semester and October 1 for the spring semester. Letter grade only (A-F).

547. Student Development Theory in Higher Education: Theory to Practice (3)

Prerequisite: EDP 538. This course will explore student development theory and the application of theory to practice for programs and services in student affairs/higher education. Students will examine cognitive, psychosocial, topology, and person/environment theories and their application to traditional and non-traditional student populations. Critiques of these models for viability and usefulness with diverse student populations will be considered. Program models that allow for the translation of theory to practice will guide students in designing an effective program for college student populations as a requirement for this class. Letter grade only (A-F).

548. Students in U. S. Higher Education (3)

Prerequisite: ED P 538. Focus on the concepts of community and culture in the United States college with an emphasis on understanding the diversity of the student population to include age, gender, ethnic culture, sexual orientation, and people with disabilities. Letter grade only (A-F).

549. Management of Student Development in Higher Education (3)

An analysis of the management and organizational theory and practice as it pertains to student development in higher education. Includes study of human and physical resources management. Letter grade only (A-F).

550. Emerging Perspectives in Special Education (3)

Prerequisite: Acceptance in Education Specialist Level II program or Master of Science in Special Education program, development of an Individualized Induction Plan, or consent of instructor. Interpretation and application of emerging research in special education. Historical foundations, litigation, legislation, policy and practice in special education, emphasizing the last century. Current and emerging issues in the field, and the relationships between research and practice. Letter grade only (A-F).

552. Introduction to the Community College (3)

Prerequisite: Enrollment in M.A., M.S. or Credential Programs. An introduction, orientation, and survey of the California and American community college. Components and modules include teaching and learning, leadership and governance issues, organization and administration, student development, classroom research, institutional resources, and student diversity and equity in the community college. Letter grade only (A-F).

555. Cross-Cultural Counseling (3)

Prerequisite: EDP 515 or consent of instructor. Examination of discriminatory attitudes and practices including historical antecedents. Problems of minorities in cross cultural counseling. Psychological, sociological, cultural, and educational concerns regarding counseling of multicultural populations. Letter grade only (A-F).

556. Counseling Children and Adolescents (3)

Prerequisites: EDP 515 and 522, or consent of instructor. Theories and application of the methods and techniques of the major theoretical approaches employed in counseling children and adolescents.

557. Counseling Couples (3)

Prerequisites: EDP 515. Couple development theories, issues, and practices pertaining to counseling couples. Letter grade only (A-F).

558. Curriculum and Instruction for Students with Disabilities (3)

Prerequisites: Full admission to the Level I Education Specialist Credential program or Education Specialist Intern program or acceptance in the Integrated Teacher Education Program - Education Specialist option and completion of or concurrent enrollment in EDP 564. Curricular issues, models and practices for students with disabilities. Emphasis on core curriculum in public schools and appropriate modifications and delivery of content to students with disabilities. Additional emphasis on effective instructional practices and methods for use with students with disabilities. Individualized instructional planning procedures, validated instructional strategies, and collaborative teaching are emphasized. Letter grade only (A-F).

559. Play and Art Therapy for Children/Adolescents (3)

Prerequisites: EDP 508A and EDP 556 or consent of instructor. Experiential survey and the practice of play and art techniques employed in therapy as applied to theoretical orientations and problematic behavior. Letter grade only (A-F).

560. Behavioral Analysis and Positive Behavioral Interventions (3)

Prerequisite: Admission to the field work (internship) in school psychology (EDP 642 A or B) or consent of instructor. Multidimensional and functional assessments of student behavioral problems. Developing data-based positive behavioral interventions for students with severe behavioral difficulties, including students with traumatic brain injury (TBI), Autism, emotional disturbance (ED), etc. Letter grade only (A-F).

563. Advanced Methods of Teaching Individuals with Significant Disabilities (3)

Prerequisite: Acceptance in Education Specialist Level II program or Master of Science in Special Education program, development of an Individualized Induction Plan, or consent of instructor. This course will focus on the utilization of formal and informal assessment procedures that are responsive to the cultural, socio-economic and linguistic characteristics of individual students with disabilities; the use of data-based decision making; the acquisition of knowledge and skills necessary to adapt, modify and integrate curriculum; implementation of systems to provide academic and

social skill instruction to students with disabilities; and collaboration with community agencies for successful transition from school to work. Letter grade only (A-F).

564. Assessment and Evaluation of Students with Disabilities (3)

Prerequisites: Admission to the Education Specialist Credential program, EDP 350, 405, 480, or consent of instructor. Knowledge of appropriate use of formal, informal and authentic assessment procedures for planning, monitoring and evaluating instructional programs for students with disabilities. Emphasis on issues in assessing and evaluating culturally and linguistically diverse students. Letter grade only (A-F).

565. Advanced Methods of Teaching Individuals with Mild/Moderate Disabilities (3)

Prerequisites: Acceptance in Education Specialist Level II program or Master of Science in Special Education program, development of an Individualized Induction Plan, or consent of instructor. Advanced assessment, methods, strategies, and curriculum adaptations for students with mild/moderate disabilities at all levels. Emphasis on collaboration, diversity, literacy, technology and transition. Letter grade only (A-F).

566. Transition Into, Through, and Beyond School for Individuals with Disabilities (3)

Prerequisites: Acceptance in Education Specialist Level II program or Master of Science in Special Education program, development of an Individualized Induction Plan, or consent of instructor. Examination of major issues and approaches to promoting successful transition of youth with disabilities into, through, and beyond school. Emphasis on instructional strategies for teaching adolescent youth with disabilities at the secondary level. Letter grade only (A-F).

571. Advanced Approaches to Teaching Special Populations in General Education Settings (3)

Prerequisite: Hold Preliminary Multiple or Single Subject Credential, or equivalent, or consent of instructor. Issues in teaching in elementary and secondary schools for special populations including students who are gifted, who are at risk, and who have disabilities. Emphasis on establishing inclusive climates. Covers federal, state, and local regulations; assessment; instructional strategies and modifications; school structure and classroom management; and collaborative models. Meets state clear credential requirement. Letter grade only (A-F).

572. Advanced Study of Teaching English Learners (3)

Prerequisites: Hold Preliminary Multiple or Single Subject Credential, or equivalent, or consent of instructor. Theories of first and second language acquisition, as well as assessment of students' language proficiency levels. Practical application of language proficiency results and language theories; methods of teaching content to English language learners; reading and writing strategies; curriculum development with application to K-12. Meets state clear credential requirement. Letter grade only (A-F).

573. Intercultural Communication in Education (3)

Analysis of patterns and functions of communication in the classroom and school from the perspective of intercultural communication; structures of participation; communication and social structure; communicative events and interaction; attitudes toward languages and language skills in school contexts; comparison of school and community styles and expectations regarding communication. Course fulfills a requirement for the Supplementary Authorization in Teaching English as a Second Language. Letter grade only (A-F).

574. Sociological Foundations of Education (3)

Relationships between society and the schools: local/national ideologies and political/economic influences; education as a social function; current trends and issues as they affect education. (Not open to students with credit in ED P 480.) Letter grade only (A-F).

575. Intellectual Foundations of Educational Reforms, 19th Century to Present (3)

Historical survey of the intellectual and ideological foundations of educational reform movements in the United States, with emphasis from the late 19th century to present. Focus on individual educational philosophers and on major curriculum orientations; comparison of the major educational ideologies; canons for basic mass literacy education versus elite education are compared, with consideration of their impact on diverse groups. Letter grade only (A-F).

Educational Psychology Courses (EDP)

576. Education and Diversity: Historical and Contemporary Perspectives (3)

Major themes in the history of education from the perspectives of ethnic, racial, linguistic diversity, and gender in the United States and in California with an emphasis on the 19th and 20th centuries; survey of educational approaches for diversity; focus on the experiences of various groups; examination of the implications of major educational ideologies, policies and curriculum movements for various groups. Letter grade only (A-F).

577. Educational Linguistics (3)

Prerequisites: Six units in linguistics or consent of instructor. A graduate introduction to the role of language and linguistics in contemporary education; analysis of the context of language acquisition; attitudes toward multilingualism; language policies which set guidelines and expectations for instruction; cultural factors which influence language acquisition. Same course as LING 500. Letter grade only (A-F).

578. Literacy and Linguistics (3)

Prerequisites: Six units in linguistics or consent of instructor. This course provides a general introduction to the field of literacy studies from a linguistic and sociocultural perspective. Among the major topics presented are the relationship between oral and written language; the relationship between literacy and socioeconomic/sociocultural factors; and the impact of societal expectations regarding literacy. Pedagogical implications of these issues are explored. Same course as LING 575. Letter grade only (A-F).

579A. Curriculum-based Academic Assessments and Interventions (4)

Prerequisites: Admission to the school psychology credential program, and EDP 420. Effective instructional strategies for diverse learners, including students with disabilities. Emphasis will be placed on on-going curricular-based assessments and their usefulness in identifying and maintaining effective academic interventions. Students will apply these skills in the Educational Psychology Clinic by problem-solving for clients who are experiencing academic failure. (lecture 3 hrs, lab 3 hrs) May only be offered in the Spring semester. Letter grade only (A-F).

580. Vocational Work Evaluation Systems (3)

Prerequisites: ED P 430, 529. Concepts and processes of vocational work evaluation systems as they pertain to the assessment of occupationally disabled clientele. The role and functions of work evaluators in industry, private and public vocational rehabilitation agencies, schools, and personnel/training activities will be examined in regard to their theoretical and situational applications. Letter grade only (A-F).

582. Comparative International Education (3)

An overview of education in selected countries; a study of institutional organization, as well as issues which develop in particular social, economic, and political contexts; an examination of types of educational problems and solutions which are commonly shared. Letter grade only (A-F).

583. Global Education (3)

Background on critical world issues and cultural influences, as well as methods and resources for application in the classroom. Format includes resource speakers and practitioners, map activities, and cultural simulation exercises. Letter grade only (A-F).

587A. Advanced Field Study and Seminar: Education Specialist Credential in Mild/Moderate Disabilities (6)

Prerequisite: Admission to the Level I Education Specialist Credential in Mild/Moderate Disabilities. Must complete all Level I courses. Application for admission should be made by March 1 for the summer and fall semester and October 1 for the spring semester. Advanced field study in a public or private school or community based site serving individuals with mild/moderate disabilities. Candidates will be assigned to field sites five days a week with a master teacher or demonstrate competencies in their own classroom with an emergency/intern credential, under the supervision of a university supervisor. Students may concurrently enroll in EDP 587B upon advisement by their faculty advisor. Credit/No Credit grading only.

587B. Advanced Field Study and Seminar: Education Specialist Credential in Mild/Moderate Disabilities (6)

Prerequisite: EDP 587A or concurrent enrollment in EDP 587A upon advisement by their faculty advisor. Application for admission should be made by March 1 for the summer and fall semester and October 1 for the spring semester. Advanced field study in a public or private school or community based site serving individuals with mild/moderate disabilities. Candidates will be assigned to field sites five days a week with a master teacher or demonstrate competencies in their own classroom with an emergency/intern credential, under the supervision of a university supervisor. Credit/No Credit grading only.

588A. Advanced Field Study and Seminar: Education Specialist Credential in Moderate/Severe Disabilities (6)

Prerequisite: Admission to the Level I Education Specialist Credential in Moderate/Severe Disabilities. Must complete all Level I courses. Application for admission should be made by March 1 for the summer and fall semester and October 1 for the Spring semester. Advanced field study in a public or private school or community based site serving individuals with moderate/severe disabilities. Candidates will be assigned to field sites five days a week with a master teacher or demonstrate competencies in their own classroom with an emergency/intern credential, under the supervision of a university supervisor. Students may concurrently enroll in EDP 588B upon advisement by their faculty advisor. Credit/No Credit grading only.

588B. Advanced Field Study and Seminar: Education Specialist Credential in Moderate/Severe Disabilities (6)

Prerequisite: 588A or concurrent enrollment in 588A upon advisement by their faculty advisor. Application for admission should be made by March 1 for the summer and fall semester and October 1 for the spring semester. Advanced field study in a public or private school or community based site serving individuals with moderate/severe disabilities. Candidates will be assigned to field sites five days a week with a master teacher or demonstrate competencies in their own classroom with an emergency/intern credential, under the supervision of a university supervisor. Credit/No Credit grading only.

589. Adult Literacy and Language Diversity (3)

Prerequisite: Three (3) units from ED P 578/LING 575, ENGL 510; ENGL 535, or from an instructor approved course in literacy studies or adult second language acquisition. A general survey of issues in adult and family literacy/biliteracy and native language literacy with special focus on the educational needs of language minority adults and their families; consideration of the relationship between theory, policy and practice with attention to the social, economic and cultural characteristics of populations in need of literacy services. Letter grade only (A-F).

593. Seminar in Professional Development in Counseling and Human Services (1)

Prerequisite: EDP 538 and 548 (must have completed or concurrently enrolled) This course is an experiential orientation to the profession of counseling and student development/student affairs in higher education with an emphasis on opportunities to observe the interactions between organizational cultures, student cultures, and the functions and role of student affairs professionals in the work environment. Students will meet in a seminar format to discuss and analyze their observations and intentional learning activities from shadowing a professional and completing a fifty-hour practicum. Letter grade only (A-F).

595. Qualitative Research Methods (3)

Introduction to the theory and application of ethnographic and qualitative methods in educational settings with special emphasis on applications for educational linguistics, educational anthropology, and research related to language arts instruction. Surveys the basic rationale for qualitative/ethnographic inquiry and basic concepts and methods for applications in teacher-as-researcher approaches and for action research. Same course as LING 595. Letter grade only (A-F).

596. Program Evaluation in Education (3)

Prerequisites: For majors in Educational Psychology: EDP 419, 420, and 520 or equivalents. For other majors, EDP 400 and 520 or

equivalents. Identifying and comparing various approaches to program evaluation in educational settings including needs assessments; selecting evaluation questions and criteria; collecting, analyzing, and interpreting qualitative and quantitative evaluation data; the mechanics and process of developing an evaluation plan. Letter grade only (A-F).

601. Trauma and Grief Counseling. (3)

Prerequisites: EDP 556 or consent of instructor. A required course for students in the Marriage and Family Therapy Program and a recommended course for graduate students in the other Counseling Programs. Will provide an overview of developmentally informed models of trauma response, training in identifying and assessing problematic responses to trauma and loss, and guidelines for working with traumatized children, adolescents and families in various settings. Current treatment approaches for the treatment of acute and chronic forms of post-traumatic distress and traumatic bereavement will be covered. Will not cover the treatment of childhood sexual or physical abuse. Letter grade only (A-F).

604. Seminar in Human Development (3)

Prerequisites: EDP 301 or 302, and EDP 400 or 419. Theories and issues in developmental psychology, Cognitive, linguistic, perceptual, biological, psychomotor, social and emotional development; nature-nurture and individual differences. Letter grade only (A-F).

605. Seminar in Consultation on School Learning (3)

Prerequisites: ED P 305, and ED P 400 or ED P 419. Analysis of current theory and research in the area of student motivation, achievement and learning problems in the classroom; role of consultation among pupil service personnel, teachers, special educators and parents in maximizing the school learning of all students. Letter grade only (A-F).

607. School Counseling Practicum (3)

Prerequisites: EDP 506, EDP 515. Practical application of counseling theory to work with children and adolescents. Supervised counseling, consultation, and case management experiences conducted in the educational psychology/counseling clinic and in school settings. (Not open to students with credit in EDP 517.) Letter grade only (A-F).

608. Seminar in Marriage and Family Therapy (3)

Prerequisites: EDP 510, 511, 512, 513, 515, 522. Recommended: EDP 556 and 634. Theories, research, treatment planning, and therapeutic methods of MFT counseling utilizing major psychotherapeutic approaches regarding assessment, diagnosis, and treatment of various mental health problems. Letter grade only (A-F).

609. MFT Practicum (2)

Prerequisites: EDP 510, 511, 512, 513, 515, 522. Practicum application submitted no later than March 1 for the following fall semester, and October 1 for the spring semester. May be taken concurrently with EDP 608. MFT counseling in an appropriate non profit setting with closely supervised experiences prior to MFT fieldwork. Students will be required to assess, diagnose, describe appropriate interventions and conduct counseling services for individuals and/or families. Credit/No Credit grading only.

615. Seminar in Home-School – Community Relations (3)

Prerequisite: EDP 430. Theory and research into the social influences of home, school, and community on child behavior; techniques to foster close home-school relations and use of community agencies. (Open only to School Counseling Master's Degree students who have advanced to candidacy prior to Fall 1999 and to PPS/SC credential-only students admitted to the program prior to Spring 1999.) Letter grade only (A-F).

619. Quantitative Educational Data Analysis II (3)

Prerequisites: EDP 419 and 519 or equivalents. An advanced multivariate statistical analysis course: multivariate analysis of variance, discriminant function analysis, canonical correlation, exploratory factor analysis, and structural equation modeling. Letter grade only (A-F).

634. Family Systems Therapy: Theory and Practice (3)

Major family systems therapy theories, research issues, and techniques for counseling families. Letter grade only (A-F).

637. Career Counseling Practicum (4)

Prerequisites: EDP 510, 515, 529, 530 or 531, and 524 or 564 or 580. Career counseling at the secondary and post secondary levels with closely supervised clinical experiences. Students will be required to assess, diagnose, develop treatment plans, write progress and termination reports, provide appropriate interventions and conduct counseling services for individuals seeking career/vocational guidance.

638. Group Counseling (3)

Prerequisite: EDP 515. Theory and application of small group processes in guidance and counseling, laboratory practice in selection of participants, leadership, interaction methods, problem solving and evaluation. Letter grade only (A-F).

639. Seminar in Organization of Pupil Personnel Services (3)

Prerequisite: EDP 430, 506. Practices in organizing, administrating, supervising, and evaluating pupil personnel programs at various educational levels. Letter grade only (A-F).

641A. School Psychology Practicum (1)

Prerequisites: Admission to the school psychology program and EDP 528. Students will complete 100 hours of field placement with experienced school psychologist(s). ED P 641 A, B, & C may be taken concurrently, however, recorded practicum hours may not be duplicated. Credit/No Credit grading only.

641B. School Psychology Practicum (1)

Prerequisites: Admission to the school psychology program and EDP 528. Co-requisites: EDP 524. Students will complete 100 contiguous hours of field placement with experienced school psychologist(s). A contiguous practicum consist of a minimum of one full day and a maximum of 5 full days per week, a minimum of 4 weeks and a maximum of 1 year, at no more than two sites and with no more than two supervisors. ED P 641 A, B, & C may be taken concurrently, however, recorded practicum hours may not be duplicated. Credit/No Credit grading only.

641C. School Psychology Practicum (1)

Prerequisites: Admission to the school psychology program, EDP 524 and EDP 528. Students will complete 100 contiguous hours of field placement with experienced school psychologist(s). A contiguous practicum consist of a minimum of one full day and a maximum of 5 full days per week, a minimum of 4 weeks and a maximum of 1 year, at no more than two sites and with no more than two supervisors. ED P 641 A, B, & C may be taken concurrently, however, recorded practicum hours may not be duplicated. Credit/No Credit grading only.

642A. Field Work I - School Psychology (3)

Prerequisites: ED P 525, completion of acceptable masters degree, concurrent enrollment in ED P 527, and approval of program committee. Application for field work should be made by October 1 for the spring semester, or by March 1 for summer (if offered) or fall semester. Credit/No Credit grading only.

642B. Field Work II - School Psychology (3)

Prerequisites: ED P 527, 642A, and approval of program committee. Continuation of school psychology field work experiences. Application for field work should be made by October 1 for the spring semester, or by March 1 for summer (if offered) or fall semester. Credit/No Credit grading only.

643A-D. Counseling Field Work (3)

A. School Counseling

Prerequisites: EDP 607, Certificate of Clearance. Credit/No Credit grading only.

B. Student Development in Higher Education

Prerequisites: ED P 516, 538. Credit/No Credit grading only.

C. Career Counseling

Prerequisites: ED P 637. Credit/No Credit grading only.

D. Marriage, Family, Child Counselor

Prerequisites: ED P 608.

Practical experiences in counseling and guidance activities under supervision in approved settings. Applications for field work must be made no later than March 1 for the following summer or fall semester, and October 1 for the spring semester. (Not open to students with credit in ED P 541.) Credit/No Credit grading only.

Educational Psychology Courses (EDP)

644A-D. Advanced Counseling Field Work (3)

Continued field work under licensed/credentialed supervisors (if required by specialty area or work setting). Applications for field work must be made no later than March 1 for the following summer or fall semester, and October 1 for the spring semester. (Not open to students with credit in ED P 545.) Credit/No Credit grading only.

A. Advanced School Counseling

Prerequisites: EDP 530, 536 (may take concurrently with 644A), 638, EDP 643A, pass CBEST.

B. Student Development in Higher Education

Prerequisites: ED P 549, 638, 643B.

C. Career Counseling

Prerequisites: ED P 638, 643C.

D. Marriage, Family, Child Counselor

Prerequisites: ED P 638, 643D.

672. Language and Educational Policies (3)

Examination and analysis of contemporary and historical language policies, educational language policies, and legal decisions in the United States which provide the context for current language practices in the schools; comparison of U.S. experiences with those of other nations; discussion of the relationship between language attitudes and educational policy formation. Letter grade only (A-F).

677. Curriculum/Program Development and Evaluation (3)

Broad-based approach to classroom curriculum planning and curriculum design, and the technical process of curriculum and program planning. The role of the administrator as the leader of the learning community. Examine issues of: school democracy, developing a thinking curriculum, restructuring of public school curricula in urban and culturally diverse communities, and an integrated bi-literacy approach to learning. Examine ways to apply current instructional design models, and evaluate and assess their effective implementation. The California Curriculum Frameworks will be used to supplement and guide the development of a restructured curricula. Letter grade only (A-F).

692. Special Topics in Counseling (1-6)

Advanced study of special topics in the field of counseling. Continuing education and non-degree students may enroll for units subject to suitable changes in course content. Topics regarding continuing education for mental health providers are announced in the UCES *Schedule of Classes* or the University Fall, Spring, or Summer semester *Schedule of Classes*. May be repeated to a maximum of 12 units with different topics.

A. Special Topics in Counseling: Introduction to Psychodrama

An applied course which provides instruction and practice in the major theoretical approaches to psychodrama, a specialized group psychotherapy approach, with special attention to individual, child, adolescent, and family issues. Does not qualify for psychodrama certification.

B. Special Topics in Counseling: Advanced Psychodrama

Prerequisites: EDP 692A or consent of instructor. An applied course which provides instruction and practice in directing psychodrama as a counseling method.

693. Advanced Seminar in Professional Development in Counseling and Human Services (1-2)

Prerequisites: ED P 515, 538, 548, 593, and concurrently enrolled in 549. Students will explore the professional associations available for counselors and student affairs professionals, and will attend one on-campus professional development institute and one off-campus professional conference that is either regional or national in scope. Additionally, students will explore and demonstrate an integration of roles, philosophy, and theory for counseling and student development work. Finally students will develop a life long professional development plan. Letter grade only (A-F).

695C. Seminar in Professional Development in Counseling and Human Services (3)

Prerequisites: Advancement to candidacy and consent to enroll from College of Education Graduate Office. A seminar stressing integration of counselor roles and specializations. The student will demonstrate knowledge of the field along with selected skills in critical thinking and counseling methods. Letter grade only (A-F).

695S. Seminar in Special Education (3)

Prerequisites: Advancement to candidacy, and written application to Graduate Office. Application for enrollment must be made by March 1 for the summer session or fall semester, or by October 1 for the spring semester. Studies of problems and issues in special education. Relating research to practice in the several areas of exceptional individuals. For qualified candidates preparing for the comprehensive examination. (Not open to students with credit in ED P 650.) Letter grade only (A-F).

696. Thesis Study: Plan Development and Organizing Aspects (3)

Prerequisites: EDP 400 and 520 or 595; OR EDP 419, 420 and 520 or 595. Designed for students planning to write a thesis. A thesis committee must be formed and the thesis problem approved by the thesis committee by midterm in the course. A completed draft of the thesis plan will be accomplished by the end of the term/semester. CR/NC grading (letter grading [A-F] is an option only for those students whose master's programs require EDP 696).

697. Directed Research (1-3)

Prerequisites: Consent of instructor, department chair and associate dean. Individual research or intensive study under the guidance of a faculty member. A student may enroll for one-three units to a maximum of three units for certificate and degree purposes, subject to suitable change in course content. Application for enrollment must be made to the Office of Graduate Studies and Research by March 1 for the fall semester or by October 1 for the spring semester. Letter grade only (A-F).

698. Thesis (3)

Prerequisites: Advancement to candidacy, ED P 519 or 520 or 595 or 696, approval by director, department chair and associate dean. Planning, preparation and completion of a thesis under supervision of a faculty committee. Must be taken for six units. Application for enrollment must be made to the Graduate Studies Office by March 1 for the fall semester or October 1 for the spring semester. Letter grade only (A-F).

699. Project (3)

Prerequisites: Advancement to candidacy, approval of graduate advisor, and written application to the College of Education Graduate Office. Project application to be made to the College of Education Graduate Office by March 1 for the Summer or Fall semester or October 1 for the Spring semester. Information and discussion related to the development of master's degree projects in Educational Psychology, School Administration, Counseling and related fields. Letter grade only (A-F). May be repeated to a maximum of 6 units.

701. Organization and Administration of Education: Functions and Issues (1-3)

The diversity of the complex systems of higher education will be examined with an emphasis on how the various systems function organizationally and culturally. Students will explore issues related to governance, decision-making, leadership, and research related to the organization and administration of higher education. Letter grade only (A-F).

702. Introduction to the Community College (1-3)

Students will analyze the community college system, function, and purpose in the US higher educational system. Students will explore research and studies on governance, structure, programs, and leadership of community colleges. Letter grade only (A-F).

703. Policy Issues in Community Colleges (1-3)

Prerequisite: EDP 702. Students will engage in in-depth analysis of the community college system specific to 1) local, state, and federal governance policies; 2) local, state, and national economic policies; 3) social and political influences on policy. In addition, students will explore the impact of future trends on educational policy. Letter grade only (A-F).

704. Exploration of Campus Cultures: Impact and Influence (1-3)
Faculty, administrative, and student cultures will be examined in terms of values, behavioral norms, impacts, and influences. Using studies of these cultures students will apply research methods for the study of campus cultures. Discussion will address implications of these findings for higher education policies and practices. Letter grading only (A-F).

705. Finance in Education (1-3)
Students will examine how higher education is financed and the governmental influences (local, state, and federal) that shape this process. Through simulations, students will develop a working knowledge of finance, philosophies, vision, and processes for the design and implementation of resource planning in both two- and four-year institutions. Letter grade only (A-F).

706. Program and Student Assessment (1-3)
Assessment of students' learning and development and program assessment will serve as the focus of this research-oriented course. Students will design a holistic formative and summative program evaluation incorporating assessment and measurement of student outcomes. Letter grade only (A-F).

707. Student Learning and Development Theory in Higher Education (1-3)
This course will focus on student development and learning theories based on cognitive, psychosocial, typology, and person-environment perspectives. Students will analyze and critique theoretical tenets relevant to understanding the college experience. Letter grade only (A-F).

708. Leadership in Education (1-3)
This course will consider current research and theories on leadership and organizational change in higher education, including multicultural and organizational development theories, planning, change, and the effective strategies for becoming a catalyst for change. Students will explore case studies of organizational leadership for change and examine issues, barriers, supports for, and processes and outcomes of change. Letter grade only (A-F).

709. Collaborative Reforms: Designing and Implementing Responsive Curricula (1-3)
This course will discuss the role of faculty and others in the collaborative development and implementation of responsive curricula and will explore systems for curricular redesign and reform at 2- and 4-year institutions and processes for their implementation. Letter grade only (A-F).

711. Field Research Study in Education I (1-3)
This is the first in a series of faculty-led field research courses. Individually or in small groups, students are exposed to and participate in work related to an approved topic or to a faculty member's research and scholarship. Letter grade only (A-F).

712. Field Research Study in Education II (1-3)
Prerequisites: EDP 711. This is the second in a series of faculty-led field research courses. Building on the first field research experience, each student will assess research skills, consult with the instructor, and (with instructor approval) work individually or in small groups on a research topic or on a topic related to a faculty member's research and scholarship. Letter grade only (A-F).

790. Special Topics in Higher Education (1-3)
This course examines such issues as the CEO's roles and responsibilities, managing change, facilitating focus groups, data-based organizational change, applications of technology in higher education, responding to the needs of student populations, working with governing boards, staff development programs, and personnel assessment instruments. Letter grade only (A-F). May be repeated to a maximum of 24 units.

797. Directed Individual Study (1-3)
Prerequisites: Consent of instructor, department chair and associate dean. Individual research or intensive study under the guidance of a faculty member. Letter grade only (A-F). May be repeated to a maximum of 24 units.

798. Doctoral Dissertation (3)
Prerequisites: Approval of instructor/doctoral candidacy required. Specifically designed for students researching and writing their dissertations. Credit/No credit grading only. May be repeated to a maximum of 24 units.

Educational Technology Courses (ETEC)

Lower Division

110. Introduction to Computers as Tools (1)
Introduction to operations, terminology, and components of computing systems. Introduction to computer applications including word processing, databases, and spreadsheets. Introduction to University e-mail systems, and electronic searching. Letter grade only (A-F).

Upper Division

411. Assessment of Computer Technology Competency, Level I (1)
This assessment course serves as an alternative to ETEC 444 and is appropriate only for students who are already familiar with the material covered in that course. See course description for ETEC 444 for the topics covered. This course provides students seeking preliminary teaching credentials with an opportunity to meet the California Level I computer technology requirement by a performance assessment. At the first class meeting, students will be provided with guidelines and resources regarding the assessment (including electronic portfolios and hands-on demonstrations) that will be held approximately four to five weeks later. In addition, ten hours of online and out-of-class activities are required. Not open to (or needed by) those who have taken ETEC 444 or another approved Level I course, nor those who have passed the Commission-approved examination in educational technology. "C" grade or better is required to achieve Level I competency. Letter grade only (A-F).

***444. Computer Technology in Education, Level I (3)**
Prerequisites: Course design assumes familiarity with topics introduced in ETEC 110. (See the course web page on the College of Education website for more information and a self-assessment.) Introduction to educational computer technology: resources and tools for professional use; strategies for integrating computers into teaching; applications to diverse learners; and legal, ethical, and societal issues. This course satisfies the California Level I teaching credential computer technology standard. (Seminar 2 hours, laboratory 2 hours.)

***449. Technology Applications for Educators (1-3)**
Prerequisites: Consent of Instructor. Contemporary applications of technology for teaching, learning, and the management of instruction. Demonstration and hands-on experience with computer and media applications in education. Demonstration and hands-on experience with computer and media applications in educational settings. Topics are announced in the *Schedule of Classes*. May be repeated to a maximum of 12 units with different topics.

A. Internet Resources for Educators

This course introduces students to the growing number of Internet-based educational resources for educators. The course provides discussion, demonstrations, and hands-on experience in the use of computer communication tools, including e-mail, file transfer protocol (FTP), newsgroups, listservs, and the world wide web. May be taken for Graduate Credit.

B. Evaluation and Selection of Instructional Technology Resources

This course introduces students to a variety of evaluation instruments and techniques for evaluating and selecting instructional technology resources to support the California curriculum frameworks. They will become familiar with exemplary programs and learn to evaluate new programs in terms of these exemplars.

Graduate Division

523. Computer Technology in Education, Level II (3)
Prerequisites: ETEC 444 or equivalent experience satisfying the California Level I computer technology standard. (See the course web page on the College of Education website for more information and a self-assessment.) Advanced principles for integrating computer technology into learning environments to improve: planning, designing and implementing learning experiences; educational communication and collaboration; assessment and evaluation. This course satisfies the California Level II computer technology standard. (Seminar 2 hours, laboratory 2 hours.) Letter grade only (A-F).

Educational Technology Courses (ETEC)

525. Social and Cultural Implications of Educational Technology (3)

Critical examination of social and cultural implications of educational technologies, considering issues of cultural bias, equity, and questions of who benefits from particular technologies. International applications of computer technologies to promote learning about different cultures. Case studies of issues concerning computers and society.

530. Educational Technology Leadership (3)

Prerequisites: ETEC 523, or consent of the instructor. Examines the role of leadership as it relates to the implementation of educational technology in schools. Provides theory, knowledge, and skills necessary to use, evaluate, plan, and implement technologies effectively within a school system. Examines broader administrative issues, including security and ethics, associated with computers and other technologies.

551. Education and the Internet (3)

Prerequisites: ETEC 523. The course provides discussion, demonstrations, and hands-on experience related to educational applications of computer communications systems such as e-mail, file transfer protocol (ftp), computer bulletin boards, listservs, and the World Wide Web. Students complete a series of hands-on instructional assignments using technology-based tools to design and manage educational programs delivered via the Internet. (Seminar 2 hours, Laboratory 2 hours).

553. Instructional Design (3)

Prerequisites: ETEC 523 or equivalent experience satisfying the California Level II computer technology standard. An introduction to principles of instructional design with emphasis on designing effective teaching strategies with educational technology. Students will apply design theories and models to plan, create, and refine learner-centered educational activities. Students will complete a series of instructional design assignments involving educational technology. Letter grade only (A-F).

623. Developing Technology – Based Learning (3)

Prerequisites: ETEC 523, 553. Analysis and hands-on experience related to the use of modern techniques for developing technology-based learning. The course provides discussions, demonstration, and hands-on experience in the computer lab toward the development of technology-based interactive learning programs. The course introduces advanced concepts of technology-based instructional design that are of value to educators including educational psychologists, curriculum developers, school administrators, special education teachers, and school counselors. Students will complete a series of hands-on instructional design assignments using state of the art technology-based tools for the delivery of learning programs. Each student will apply these methods by designing a technology-based instructional program. Seminar 2 hours, laboratory 2 hours.

695. Seminar in Educational Technology (3)

Prerequisites: Successful completion of all required course work for the Master of Arts in education, option in educational technology. Application for enrollment must be made by March 1 for the summer session or fall semester, or by October 1 for the spring semester. Advanced studies in educational technology including reviews of the literature, critique of educational technology research, and systematic development and evaluation of areas of students' prior work. For qualified candidates preparing for the comprehensive examination. Letter grade only (A-F). May be repeated to a maximum of 6 units.

Library Media Courses (LI)

Upper Division

*497. Independent Study (1-3)

Prerequisites: Consent of instructor and department chair. Independent study undertaken under the supervision of a faculty member. May be repeated to a maximum of 6 units, with no more than three units applicable to credential or major requirement.

Graduate Level

500. Foundations of Information (3)

Exploration of the role of information and information technology in organizations (particularly in Western education) and society. Topics include societal needs and demands, sociology of knowledge and science, the exploration of diffusion of knowledge and technology, information seeking and use, information and culture, and technology and culture. Letter grade only (A-F).

510. Selection of Materials and Information Sources (3)

Criteria, tools, procedures and policies for evaluating and selecting instructional resources appropriate to use in school library media centers. Letter grade only (A-F).

520. Information Literacy and Reference Services (3)

Philosophy of reference service and information literacy; criteria for evaluation, selection, setup and use of selected basic reference sources, both print and electronic; selection of reference sources to reflect the cultural and linguistic diversity of students; instruction in the use of reference sources and information literacy processes. Letter grade only (A-F).

530A. Library Media Materials for Elementary Grades (K-5) (3)

Selection and use of fiction and non-fiction books, audiovisual and electronic media, and related materials of interest to children that reflect the cultural diversity of our state and support current curriculum frameworks; criteria and tools for selection and use; current issues. Letter grade only (A-F).

530B. Library Media Materials for Secondary Grades (6-12) (3)

Selection and use of fiction and non-fiction books, audiovisual and electronic media, and related materials of interest to young adults that reflect the cultural diversity of our state will support current curriculum frameworks; criteria and tools for selection and use; current issues. Letter grade only (A-F).

540. Organization of Information (3)

Rationale and use of card and online catalogs; principles and practice in classification and cataloging applied to school library media centers; processing/organization of information. Letter grade only (A-F).

550. Library Media Center Management (3)

Philosophy, principles and problems of planning, organizing, supervising and managing a school library media center program. Letter grade only (A-F).

570. Library Media Technologies (3)

Prerequisites: Beginning skill with word processing and database management programs required. Evaluation, selection, and curriculum applications of computer, video, videodisc, CD-ROM, audiovisual, and other technologies appropriate for use in school library media centers; analysis and management of available hardware and software. Letter grade only (A-F).

580. Field Experience in the School Library Media Center (4)

Prerequisites: Pass CBEST; possession of valid California teaching credential; and completion of the courses required for the credential or consent of program coordinator. Students will model effective practices in administering a library media program under the supervision of a credentialed library media teacher. Applications for spring and summer semester must be in the office of the program coordinator by October 1 and for fall semester by March 1. Letter grade only (A-F).

The College of Education (CED) prepares students for professional careers in the field of public and private education.

The College of Education's main purpose is to create and nurture a learning and teaching community committed to excellence in education. We fulfill our purpose by: preparing professionals to be socially responsible leaders; engaging in research and scholarly activity which informs and improves practice; valuing diversity as we work to achieve common

goals; serving and collaborating with schools, agencies, the community and each other; engaging in an inclusive process for planning, communicating, working, and assessing our progress toward our goals.

The College of Education provides undergraduate and graduate studies in education. It offers specific curricula focusing on the preparation of personnel for teaching and educational service in the pre-school, elementary, middle and high schools, community colleges, adult programs, and other educational agencies. In addition to three certificate programs and a variety of teaching and service credentials, the College offers a Bachelor of Arts in Liberal Studies, a Master of Arts in Education degree with various options, and two Master of Science degrees (special education and counseling). All graduate level courses (500/600) in the departments in the College of Education are assumed to be "Letter grade only (A-F)" unless stated otherwise. Descriptions that include prerequisites and requirements for each credential, certificate, and degree program are listed in this *Catalog* in the College of Education department that houses the particular program.

Degree Programs

Bachelor of Arts in Liberal Studies

Master of Arts in Education with Options in:

Educational Administration

Educational Psychology

Educational Technology

Elementary Education

Specialization in Curriculum and Instruction

Specialization in Early Childhood Education

Specialization in Reading and Language Arts

Specialization in Middle Level Education

(discontinuance under consideration)

School Librarianship

Secondary Education

Specialization in Curriculum and Instruction

Specialization in Reading and Language Arts

Social and Multicultural Foundations of Education

Specialization in International/Global Education

Specialization in Language, Literacy, and Culture

Specialization in Race, Class, and Gender Studies

Special Concentration

Master of Science in Special Education

Master of Science in Counseling with Options in:

Career Counseling

(discontinuance under consideration)

Marriage and Family Therapy (MFT)

School Counseling

Student Development in Higher Education

Vocational Rehabilitation Counseling

(discontinuance under consideration)

California Teaching and Service Credentials

Teaching Credentials

Elementary:

- 2042 Preliminary Multiple Subject Credential Program
- Bilingual Cross-cultural Language and Academic Development (BCLAD) Emphasis
- Multiple Subject Teaching Internship, with Cross-Cultural, Language and Academic Development (CLAD/BCLAD) Emphasis
- Integrated Teacher Education Program (ITEP)
(see the Liberal Studies section of this catalog)

Secondary:

- Single Subject Intern Credential
- Single Subject Credential
Art; English (Emphasis in Black Studies, Comparative Literature, Creative Writing, Journalism, Language & Linguistics, Literacy & Composition, Literature, Speech, Theatre Arts); Languages Other than English (French, German, Japanese, Spanish); Health Science; Home Economics; Life Science; Mathematics; Music; Physical Education (Adapted P.E., Elementary School, Secondary School); Physical Science (Chemistry, Earth Science, Physics); Social Science (covering Anthropology, Economics, Geography, History, Political Science, Psychology, Sociology)

Specialist Teaching Credentials

- Adapted Physical Education
(Kinesiology and Physical Education)
- Early Childhood Education
- Reading and Language Arts
- Education Specialist Credential: Mild/
Moderate Disabilities (plus Internship)
- Education Specialist Credential: Moderate/
Severe Disabilities (plus Internship)

Services Credentials

- Preliminary Administrative
- Professional Administrative
- Library Media Teacher
- Clinical Rehabilitative (Communicative Disorders)
- Health (Nursing)
- School Counseling
- School Counseling Internship
- School Psychology
- School Psychology Internship
- School Social Work and Child Welfare and Attendance
(Social Work)

Other Credentials and Authorizations

- Designated Subjects (Adult and Vocational Education, ROTC, Supervision and Coordination)

Graduate Certificates

- Career Guidance Specialist
(discontinuance under consideration)
- Community College

Scholarships

Scholarships are available to undergraduate teacher track, credential and master's students in the College of Education. Scholarship applications are available the first week in November in the Office of Graduate Studies and Research, ED1-07, and should be completed and submitted by the first Friday in February. Scholarship recipients are identified by April 30 and the scholarship funds are awarded in the beginning of the next academic year (i.e., all students applying February 2004 will receive the funding in the academic year beginning in August 2004).

Educational Psychology Clinic

The Educational Psychology Clinic is housed in the College of Education (ED2, Room 155, (562) 985-4991) and serves University and public school students. The primary purpose of the Clinic is to give practicum experience for CSULB students in the areas of school psychology, school counseling career counseling, special education (learning disabilities), elementary and secondary reading and mathematics instruction. The secondary purpose of the Clinic is to serve the wider community in Los Angeles and Orange Counties by providing services to K-12 students and their families in the above areas at a reduced rate. No client is refused who can meet the criteria for acceptance but lacks the finances. Parents also participate in the clinic program through parent education groups in order to become better informed about their children's problems.

Specific services available at the Clinic include: diagnostic testing, counseling, consultation outreach to community, remediation, parent education, and continuing education.

Educational Career Services (ECS)

Located in the College of Education, Educational Career Services assists students and alumni in their search for professional positions in the field of education. ECS serves teacher candidates and also provides services to students and alumni seeking positions as school administrators, school counselors, school psychologists, college instructors, school librarians, and others seeking employment in the schools.

Services offered by ECS include: posting written job vacancy notices, sponsoring jobfairs, conducting job search seminars, providing individual advisement, and providing information about professional educational opportunities. Appointments may be scheduled with an Educational Career counselor to obtain information about the current job market within the field of education or to receive assistance with resume writing or job interview skills. ECS is located in ED2, Room 168, phone (562) 985-5772.

Credential Center (CC)

The Credential Center assists CSU, Long Beach students in pursuit of their credential and educational goals. Staff of the Center serve as a campus liaison to the State of California Commission on Teacher Credentialing (CCTC), and coordinate the dissemination of credential information to University staff, faculty, students and the general public.

The Credential Center is responsible for the evaluation, verification, and recommendation of all initial elementary teaching, secondary teaching and specialist service credentials. Candidates completing requirements by the end of the summer or fall term of any year should register with the CC prior to March 1. Spring term candidates should file prior to October

1. Multiple Subject and Single Subject candidates complete this registration process as part of the student teaching application.

The Credential Center provides a University resource of credential requirements and regulations, which includes advisement and program admission for the Professional Clear Single Subject and Multiple Subject Credential Programs (Fifth-Year Programs), advisement for out-of-state and out-of-country credential applicants, and assistance to credentialed teachers seeking renewal information.

The Center is located in ED 1, Room 42, and is open for service Monday through Thursday, from 8:00 to 5:30 pm, and on Friday from 8:00 to Noon and 1:00 to 5:00 pm, unless otherwise posted. The telephone number is (562) 985-4109.

Master's Degree Programs

Master's degree programs are offered in two departments within the College. General procedures, policies, requirements, and applications for the Master of Arts in Education degree are available in each department and are listed following each option and specialization.

The Department of Educational Psychology, Administration, and Counseling offers two Master of Science degrees: MS in Counseling, with Options in: Marriage and Family Therapy; School Counseling; Student Development in Higher Education; Career Counseling; and MS in Special Education. Master of Arts in Education degree, offered with Options in: Educational Administration, Educational Psychology, Educational Technology, School Librarianship, and Social and Multicultural Foundations of Education.

The Department of Teacher Education offers two Options in the Master of Arts in Education: Elementary Education and Secondary Education. The Elementary Education Option offers four specializations: Curriculum and Instruction, Early Childhood Education, Reading and Language Arts and Middle Level. The Secondary Education Option has two specializations: Curriculum and Instruction and Reading and Language Arts. Please note, discontinuance is under consideration for the Master of Science, Option in Career Counseling and Master of Arts in Education, Specialization in Middle Level.

To be considered for admission to a master's degree program students must submit a program application, official transcripts, test scores (if applicable), and any additional program requirements to the College of Education, Office of Graduate Studies and Research. Program applications may vary; please check the individual program for additional requirements. Program Applications may be obtained from the Office of Graduate Studies and Research (ED1 - Rm. 7, 562-985-4547). The individual program application deadline date for School Counseling, Student Development in Higher Education, Marriage and Family Therapy and Special Education is March 1, to be considered for the fall semester. To be considered for the spring semester for Special Education, the individual application deadline date is October 1. Please note, not all programs admit students for the spring semester. For additional program information, please visit the College of Education website at www.ced.csulb.edu.

Students should consult with faculty in the various departments concerning particular programs and refer to the appropriate department's section of the *Catalog*.

All master's degree candidates in education are required either to complete a thesis or project or to take a comprehensive examination according to the requirements of the degree, degree option, or degree option specialization. Application for enrollment for thesis, project, or comprehensive examination must be made by October 1 for the spring semester or by March 1 for the fall semester.

University Graduate Admission to Master's Programs

Master of Arts in Education

Master of Science in Counseling

Master of Science in Special Education:

To be eligible for conditional admission to the respective College of Education master's degree programs, applicants must meet the following grade-point average (GPA) requirements:

Clear Conditional Admission — To be eligible for clear admission to a master's program in the College of Education, applicants must have a GPA of 2.85 or higher in the last 60 semester or 90 quarter units of course work taken. Lower division and/or extension courses taken after obtaining the bachelor's degree are excluded from this calculation.

Conditional Admission — Applicants who meet all requirements for clear conditional admission except one program requirement may qualify for clear conditional admission by earning a minimum of 3.00 on 12 units of approved course work planned by the student and advisor. Applicants who fail to meet more than one program admission requirement must be recommended by faculty as a promising candidate in order to be conditionally admitted.

NOTE: Individual programs retain the right to determine who is admitted to their programs. Meeting the University requirements for clear conditional or conditional admittance does not guarantee acceptance to the program.

Clear conditional admission to the CED is required for enrollment in 500 and 600 level courses.

Advancement to Candidacy

To be advanced to candidacy for a graduate degree, each student must:

1. Pass the Writing Proficiency Examination (WPE). By University regulation, all applicants must pass the WPE prior to advancement to candidacy;
2. Students must satisfy all general University requirements for advancement to candidacy, as well as the specific requirements for the degree option and specialization;
3. All prerequisites and testing must have been completed, an approved program of studies must have been filed with the College of Education Office of Graduate Studies and Research, and the student must be currently enrolled;
4. Resolution of all incomplete grades (to either "complete" or "default" grade).
5. The Graduate Record Examination (GRE) is required for the MA in Education, Options in Educational Psychology and Educational Technology.

Advisory and Development Council

The Department of Electrical Engineering is supported by an Advisory and Development Council consisting of outstanding engineers and executives from industry and government in southern California. Its function is to form a liaison between the University and industry and to keep the administration and faculty informed of modern engineering practices. This ensures that the curricula are kept up-to-date. It also advises on placement opportunities before and after graduation.

ABET Accreditation

The Bachelor of Science in Electrical Engineering Program and the Bachelor of Science in Electronics and Computer Engineering Technology Program are respectively accredited by the Engineering Accreditation Commission (EAC) and the Technology Accreditation Commission (TAC) of the ABET, Inc., 111 Market Place, Suite #1050, Baltimore, MD 21202, phone: 410-347-7700, website: <http://www.abet.org>). Students enrolling in this program are advised to get in touch with the undergraduate advisor for information regarding ABET requirements.

Bachelor of Science in Electrical Engineering (code EE__BS01) (133 units)

The objectives of the Bachelor of Science in Electrical Engineering Program are to give students:

1. a solid foundation in basic science, mathematics, and EE practices and major design skills to maintain high employability, adaptability to changing technology, and an ability to conceive new technology.
2. effective communication skills to be able to progress in their careers
3. an awareness of ethical and societal responsibilities
4. an ability to work effectively in a team environment

The degree in electrical engineering is designed to prepare graduates for responsible engineering positions in design, development, research, applications, and operation in the fields of communications, control systems, digital signal processing systems, electromagnetics, digital and analog electronic circuits, physical electronics, computer-aided design and power systems. The curriculum is built around a strong basic core of mathematics, physics and engineering science. This is followed by intermediate courses in electrical engineering topics and finally a senior elective sequence including a senior design seminar and terminating in a capstone design course.

By choice of senior elective sequence comprehensive coverage is provided in any one of the above fields.

Laboratory facilities are available in the engineering buildings allowing for basic as well as more advanced laboratory instruction in electronics, digital signal processing, control systems, micro-electronics, communications, power, and digital systems.

Requirements

Core: CECS 174; EE 200, 201; either EE 210 and 210L or PHYS 152; EE 211, 211L, ENGR 202; MATH 122, 123, 224; MATH 370A or equivalent; PHYS 151, 254; EE 310, 330. Each of the foregoing courses must be completed with a grade of "C" or better as well as all courses that are prerequisite or co-requisite to courses required for the major including ENGL 100 or equivalent. The interdisciplinary courses as well as the Communications Studies (COMM) courses required for general education must be taken for a letter grade. Other required courses are EE 346, 347, 350, 370, 370L, 380, 382, 386, 400D, 430, 430L, 462 or 464; CE 370 or MAE 330; plus an elective sequence with capstone senior design course as follows:

Analog and Digital Electronics Elective Sequence: either EE 301 and 301L or 435 and 435L; 320, 332, 447; plus additional electives* totaling at least 133 units approved by the department.

Communications Elective Sequence: EE 482, 486, 488A, 488B; plus additional electives* totaling at least 133 units approved by the department.

Controls Elective Sequence: EE 450, 470, 471; plus additional electives* totaling at least 133 units approved by the department.

Digital Signal Processing Sequence: EE 482, 486, 489; plus additional electives* approved by the department totaling at least 133 units.

Power Elective Sequence: EE 450, 452, 458; plus additional electives* totaling at least 133 units approved by the department.

* See undergraduate advisor for the list of approved electives and the number of elective units required.

Bachelor of Science in Engineering Option in Biomedical and Clinical Engineering (code EE__BS02) (135 units)

The Department of Electrical Engineering administers an option in Biomedical and Clinical Engineering that allows the student to acquire substantive competence in biomedical engineering and biology. The program builds upon a strong base of biology, mathematics, physics, chemistry, and engineering science to develop a clinically oriented biomedical engineer to serve medical and industrial needs. It includes a core of standard electrical engineering courses as well as courses and laboratories in biomedical engineering, anatomy, physiology and biology. Elective units are available in the senior year to explore individual areas of interest.

Students planning to attend medical, dental or other health professional or graduate schools in Biomedical Engineering may select courses in Chemistry and/or Biology with the approval of BME advisor.

Laboratory facilities in the field of biomedical engineering are available in the engineering buildings; and laboratory facilities for anatomy and physiology are available on campus. Computer systems are available to simulate biological systems and to collect, process and display physiological data.

Requirements

CECS 174; CHEM 111A; EE 200, 201, 211, 211L, 310, 330, ENGR 202, MATH 370A; MATH 122, 123, 224; PHYS 151, 152, 254. Each of the foregoing courses must be completed with a grade of "C" or better as well as all courses that are prerequisite or co-requisite to courses required for the major including ENGL 100 or equivalent. The interdisciplinary courses as well as the Communications Studies (COMM) courses required for general education must be taken for a letter grade. BIOL 207 (GE category B1a); EE 346, 347, 350, 370, 370L, 382, 406, 406L, either 407 or 408; 430; 460; MAE 330 or CE 370; plus additional approved biomedical electives, including approved senior design course, to at least 135 units.

Certificate in Energy Conversion and Power Systems Engineering (code MAE_CT04)

The 27-unit Certificate Program in Energy Conversion and Power Systems Engineering is an undergraduate program designed to prepare electrical and mechanical engineering students to become proficient in the analysis and design of power generating systems (such as direct conversion, coal burning, hydraulic, nuclear, solar, wind and various other types of power plants and systems, and industrial electric power systems design.

For certificate requirements see the Mechanical and Aerospace Engineering Department section of this catalog.

Master of Science in Electrical Engineering (code EE__MS01)

This program affords an opportunity for engineers and others to advance their competency in analysis and design to better meet the high technology needs of local industry. Each student selects three graduate courses in one area of emphasis, and the remaining courses must augment and support that area of emphasis. Some current examples of areas of emphasis are biomedical, communications, control systems and robotics, digital signal processing, digital systems, electromagnetics and optics, electronics, engineering mathematics, networks and filters, and power. Students may create other areas of emphasis with the approval of the graduate advisor. A limited number of laboratory and teaching assistantships are available to qualified graduate students.

Prerequisites

1. A bachelor's degree from an accredited program in electrical engineering or a bachelor's degree from an accredited engineering, natural science or other appropriate program with the requirement that essential undergraduate deficiencies in electrical engineering are removed prior to Advancement to Candidacy.
2. Graduate students must consult with the graduate advisor and obtain the MSEE Handbook which covers procedures and requirements. A tentative program must be approved by the graduate advisor. That program must exhibit an area of emphasis comprised of at least three related graduate courses (500 or 600 level).
3. The prospective graduate student must have attained a GPA of at least 2.5 for the last 60 semester units (90 quarter units) attempted prior to entry in the MSEE program. The student should apply directly to the University Admissions Office. There is no need to apply to the Department initially. International students should apply through the Center for International Education.

Advancement to Candidacy

1. Fully classified standing (if initially admitted as conditionally classified) by completing all deficiency requirements.
2. Currently enrolled in a regular session.
3. For classified students, removal of all undergraduate deficiencies as determined by the graduate advisor. The GPA must be at least 3.0 for all such courses attempted.
4. Demonstration of competence in technical writing by passing an appropriate writing course with a grade of "C" or better or by providing acceptable proof of technical writing ability. This requirement can be waived for thesis students upon recommendation of the graduate advisor and the thesis advisor.
5. Passing the Writing Proficiency Exam.
6. Completion of at least 9 units as a graduate student in residence while maintaining an overall GPA of at least 3.0 and a major GPA of at least 3.0. Students are advised strongly to seek advancement before completing 15 units of the program.

Requirements

EE core courses consist of the following: EE 501, 508, 509, and 511. Students must select at least 2 out of the above 4 courses appropriate to their area of emphasis and subject to the approval of the Graduate Advisor. Completion of a minimum of 31 units in 400-, 500-, or 600-level courses as approved in advance by the graduate advisor. Students must choose either the thesis or nonthesis alternatives. Successful completion of a thesis provides a unifying culmination to the program, and an enhanced resume for future industrial or academic endeavor.

Thesis Alternative: 500/600-level courses in EE including the above core requirement (15 units); EE 600 (1 unit); EE 697 (3 units); EE 698 (6 units); 400/500/600-level courses in EE (6 units); Comprehensive Oral Exam on Thesis.

Non-Thesis Alternative: 500/600-level courses in EE including the above core requirement (21 units); EE 600 (1 unit); EE 697 (3 units) on a capstone project; 400/500/600-courses in EE (6 units); Comprehensive Oral Exam on the capstone project.

Bachelor of Science in Electronics and Computer Engineering Technology

For requirements and courses, see description in the Engineering Technology Programs section of this catalog.

Courses (E E)

Lower Division

200. Trends in Electrical Engineering (1)

Electrical Engineering as a profession. Nature of professional and design activities. Advances in Electrical Engineering. Current designs, future trends and challenges in various fields of Electrical Engineering. (Lecture 1 hour.) Letter grade only (A-F).

201. Digital Logic Design (4)

Prerequisite: MATH 117 (or equivalent). Practical design of digital circuits. Basic topics in combinational and sequential switching circuits with applications to the design of digital devices. (Lecture-problems 4 hours.)

210. Fundamentals of Electric Circuits (3)

Prerequisites: MATH 123, PHYS 151. Corequisite: EE 210L. Electric fields. Magnetic fields. Ohm's law. Kirchoff's laws. Physics of inductance and capacitance. Conservation of energy. Introduction to RL, RC and RLC circuits. Introduction to phasors. Introduction to electric machinery, computer electronics, electromagnetic radiation, and communication. (Lecture-problems 3 hours) Letter grade only (A-F).

210L. Fundamentals of Electric Circuits Laboratory (1)

Corequisite: EE 210. Laboratory experiments demonstrating behavior of resistive circuits; capacitors and inductors; transient RL and RC circuits; sinusoidal (phasor) RL, RC and RLC circuits; motors, generators, and transformers. Letter grade only (A-F).

211. Electric and Electronic Circuits (3)

Prerequisites: EE 210 or PHYS 152, MATH 224. Linear circuit analysis techniques including circuit transformations, mesh and node analyses. Thevenin's, Norton's, Superposition, and Maximum Power Transfer theorems. Transient analysis of RL, RC and RLC circuits. Phasors. Power concepts. Nonlinear circuits including diodes. Circuit solution using PSpice. (Lecture-problems 3 hours) Letter grade only (A-F). (211, CAN ENGR 12; EE 211+211L, CAN ENGR 6)

211L. Electric Circuits Laboratory (1)

Corequisite: EE 210 or EE 211. Laboratory investigation of Ohm's Law, Kirchoff's Laws, voltage and current division, mesh and nodal analysis, Thevenin and Norton equivalents, superpositions, simple RL, RC, RLC circuits, phasors, power. Instrumentation using voltmeter, ammeters, ohmmeters and oscilloscopes. Power Measurements. Identification of unknown elements. (Laboratory 3 hours.) Letter grade only (A-F).

220. Materials Sciences for Electrical Engineers (3)

Prerequisites: MATH 224 and EE 210. Basic principles of optical and wave propagation. Introduction to quantum electronics. Fundamental aspects of photonics and materials sciences and their relevance to solid state electronic circuits. (Lecture-problems 3 hours). Letter grade only (A-F).

Upper Division

301. Sequential Circuit Design (3)

Prerequisite: EE 201. Synthesis of sequential circuits. Asynchronous sequential circuits, algorithmic state machines, hardware design languages, sequential circuit design using programmable logic devices. (Lecture-problems 3 hours) Letter grade only (A-F).

301L. Sequential Circuit Design Laboratory (1)

Prerequisite or Corequisite: EE 301. Design implementation and verification of digital systems using medium scale integrated and large scale integrated circuits. (Laboratory 3 hours) Letter grade only (A-F).

310. Signals and Systems (3)

Prerequisites: EE 210 or 211; and MATH 370A or equivalent. Fundamental concepts of signals and systems. Laplace Transforms. Fourier Series. Fourier Transforms. Two-port parameters. (Lecture-problems 3 hours). Letter grade only (A-F).

320. Solid State Electronic Devices (3)

Prerequisite: PHYS 254. Semiconductor crystal structure and growth. Carrier modeling, drift and diffusion currents. P-N junctions, diodes, solar cells and light-emitting diodes (LED). Bipolar junction transistor (BJT) biasing, linear and switched operation. Metal oxide semiconductor field effect transistor (MOSFET) operation. (Lecture-problems 3 hours). Letter grade only (A-F).

330. Analog Electronic Circuits I (4)

Prerequisite: EE 211. Analysis and design of diode, bipolar junction transistor, field-effect transistor (MOSFET and JFET), and CMOS circuits. Op-Amp linear and nonlinear circuit applications. Laboratory includes transistor and operational amplifier circuit design and CAD tools. (Lecture-problems 3 hours, laboratory 3 hours.) Letter grade only (A-F).

330L. Analog Electronics Laboratory I (1)

Prerequisite or Corequisite: EE 330. Transistor and operational amplifier circuit design laboratory. (Lab 3 hrs) Letter grade only (A-F).

331. Mixed Signal Electronics (3)

Prerequisites: CECS 201, EE 210, 210L. (Not open to EE majors) Analysis and design of digital electronic circuits. Operation of bipolar and MOS transistors. NMOS, CMOS and bipolar transistor inverters, NAND gates and NOR gate. Interfacing digital circuits with external devices. D/A and A/D converters. Mechatronics. (Lecture 2 hrs, laboratory 3 hrs) Letter grade only (A-F).

332. Digital Electronic Circuits (3)

Prerequisites: EE 201, 211, 320. Analysis and design of digital electronic circuits. Structure and operation of MOS transistors, including SPICE models. NMOS and CMOS inverters. Bipolar transistor inverters. Bipolar digital gate circuits (TTL & ECL). Regenerative logic circuits (flip-flop, Schmitt trigger, multivibrator). Semi-conductor memories. Basic IC design-Gate Array, Standard Cell, PLA. (Lecture-problems 3 hrs) Letter grade only (A-F).

346. Microprocessor Principles and Applications (3)

Prerequisites: CECS 174, EE 201. Study of microprocessor and microcomputer elements for applications of these devices to practical problems. Assembly language programming. Design of microprocessor based systems using 80X86 architecture. (Lecture-problems 2 hours, laboratory 3 hours.) Letter grade only (A-F).

347. Microprocessor Based System Design (3)

Prerequisite: EE 346. Design and construction of a microprocessor based system. Interfacing and control of external devices. (Lecture-problems 2 hours, laboratory 3 hours.) Letter grade only (A-F).

350. Energy Conversion Principles (3)

Prerequisites: EE 211 and 211L, or consent of instructor. Electromechanical energy conversion. Power transformers. DC, synchronous, and induction machines. Laboratory experiments on power electronics and rotating machinery. (Lecture-problems 2 hours, laboratory 3 hours.) Letter grade only (A-F).

350L. Energy Conversion Laboratory (1)

Prerequisite: EE 350. Testing and performance validation of electric, electronic, electrochemical and electromechanical components and apparatus. (Laboratory 3 hours.) Letter grade only (A-F).

370. Control Systems (3)

Prerequisites: EE 310. Control systems analysis; block diagrams, signal flow graphs, stability criteria, root locus, frequency domain analysis. Examples of classical control system design. (Lecture-problems 3 hours.) Letter grade only (A-F).

370L. Control Systems Laboratory (1)

Prerequisite: EE 370. Experiments which reinforce concepts learned in EE 370. Digital simulation modeling, analysis, and design. Real time applications. (Laboratory 3 hours). Letter grade only (A-F).

380. Engineering Probability and Statistics (3)

Prerequisites: EE 310. Introduction to probability, statistics, random variables and their application. Not open to students with credit in EE 480. (Lecture-problems, computer projects 3 hrs.) Letter grade only (A-F).

382. Communication Systems I (3)

Prerequisite: EE 310. Review of Fourier series and transforms. Introduction to passive, active, and digital filters. Basic elements of probability theory, statistics, concept of white noise, AM, DSB, SSB and vestigial modulation, narrowband and wideband FM. (Lecture-problems 2 hours, laboratory 3 hours). Letter grade only (A-F).

386. Digital Signal Processing (3)

Prerequisite: EE 310 or CECS 311 or CECS 325. Study of continuous-time signals and systems, and the corresponding discrete-time signals and systems. Z-transform analysis. Sampling theorem, analog-digital and digital-analog conversion approximation. Analysis and design of digital filters. Laboratory projects with Computer Aided Design (CAD) tools for implementing digital systems including Finite Impulse Response (FIR) and Infinite Impulse Response (IIR) filters. (Not open to students with credit in EE 485). (Lecture-problems 2 hours, laboratory 3 hours.) Letter grade only (A-F).

***400D. Electrical Engineering Design Seminar and Project (2)**

Prerequisites: EE 347, 370, and 382; or consent of instructor. Design terminologies, processes and issues. Simple design examples. Constraints imposed by factors such as performance, economics, reliability, safety, aesthetics, packaging, codes, standards and practices. Ethics and social and environmental impact. Case studies. Open-ended solution. Specification and schedule of design projects. Individual and group projects. Oral presentation required. (Lecture-problems 1 hour, laboratory 3 hours) Letter grade only (A-F).

***401. Mathematical Methods for Electrical Engineers (3)**

Prerequisite: MATH 370A. Analytic techniques relevant to electrical engineering. (Lecture-problems 3 hours.) Letter grade only (A-F).

***405. Special Topics in Electrical Engineering (3)**

Prerequisites: Senior standing in electrical engineering or consent of instructor. Selected topics from recent advances in electrical engineering. Course content will vary from year to year and may be repeated once for credit with consent of department undergraduate advisor. (Lecture-problems 3 hours) Letter grade only (A-F).

***406. Medical Instrumentation and Measurements (3)**

Prerequisite: EE 330 or consent of instructor. Design and analysis of medical instruments, electrodes and amplifiers for measurement of physiological signals. (Lecture-problems 3 hours) Letter grade only (A-F).

***406L. Biomedical Engineering Laboratory (1)**

Prerequisite or corequisite: EE 406. Laboratory study of medical instrumentation, transducers and computer data processing. (Laboratory 3 hours.) Letter grade only (A-F).

***407. Applications of Computers in Medicine (3)**

Prerequisites: EE 346 or consent of instructor. Principles of analysis and design of computers and data collection equipment for real-time on-line medical systems. (Lecture-problems, computer projects 3 hours) Letter grade only (A-F).

***408. Health Care Delivery Systems Engineering (3)**

Prerequisites: EE 406 or 407. Applications of engineering in health care delivery systems. Classroom and hospital studies of clinical engineering. Professional aspects of biomedical engineering including engineering support of medical care, employment practices and ethics. (Lecture-problems 3 hours.) Letter grade only (A-F).

***410. Analog Filter Design (3)**

Prerequisites: EE 310. Theory and design of active filters using operational amplifiers. Emphasis is placed on low-pass filters. (Lecture-problems 3 hours) Letter grade only (A-F).

411./511. Linear Systems Analysis (3)

Prerequisites: EE 370. Review of matrices and linear algebra. Z-transforms and difference equations. Continuous and discrete-time systems. Sampled-data systems. State-space linear system analysis. Stability, reachability, and observability. Minimal realization. State feedback and pole assignment. Asymptotic observers. Additional projects required for EE 511. (Lecture-problems 3 hours.) Letter grade only (A-F).

428./528. Speech Signal Processing (3)

Prerequisite or Corequisite: EE 486 or consent of instructor. Principles and engineering applications of speech signal processing. Speech synthesis, recognition, encoding, and compression. Applications of neural networks. Additional projects required for EE 528. (Lecture-problems 3 hours.) Letter grade only (A-F).

***430. Analog Electronic Circuits II (3)**

Prerequisites: EE 330, 370; Prerequisite or Corequisite: EE 330L. Differential pairs, current sources, output stages, and integrated operational amplifiers. Op-amp applications and practical issues. Frequency response. Computer-aided circuit analysis and design. Feedback amplifiers and stability. Oscillators. (Lecture-problems 3 hours.) Letter grade only (A-F).

***430L. Analog Electronics Laboratory II (1)**

Corequisite: EE 430. Advanced transistor, operational amplifier, and linear-integrated circuits and systems design laboratory. Not open to students with credit in EE 433L. (Laboratory 3 hours) Letter grade only (A-F).

***432. Design of Analog Circuits and Systems (3)**

Prerequisites: EE 400D, 430. Corequisite: EE 410. Extensive laboratory projects. Building blocks such as practical amplifiers, transducers, signal sources, nonlinear circuits, phase-locked loops, D/A and A/D converters, ASICs. Noise. Computer-aided system design. (Lecture-problems 2 hours, laboratory 3 hours.)

434./534. Mixed-Signal IC Design (3)

Prerequisites: EE 201 and EE 330, or 331, or consent of instructor. CMOS fabrication. Component layout. MOSFET modeling. Mixed-signal devices such as D/A and A/D converters and phase-locked loops. Substrate Noise coupling. System-on-chip considerations. Design using CAD tools. Additional projects required for EE 534. (Lecture-problems 2 hours, Laboratory 3 hours.) Letter grade only (A-F).

***435. Microelectronics (3)**

Prerequisites: EE 201, EE 330. Microelectronic fabrication processes and characterization of devices. Full custom design examples with small scale integration of bipolar, NMOS and CMOS devices, both analog and digital formats. (Lecture-problems 3 hours) Not open to students with credit in EE 420. Letter grade only (A-F).

***435L. Microelectronics Laboratory (1)**

Corequisite: EE 435. Laboratory evaluation of IC process steps. Wafer probe, packaging, and final test. Empirical device model formulation from test data. (Laboratory 3 hours.) Not open to students with credit in EE 420L. Letter grade only (A-F).

436./536. Microfabrication and Nanotechnology (3)

Prerequisites: EE 330 and (EE 320 or PHYS 254); or MAE 300. In this course the techniques and the technology of miniaturization of electrical, mechanical, optical, and opto-electronic devices in sizes from millimeters to nanometers are presented. Design examples of sensors, microlenses, cantilevers, and micromotors are covered and process fabrication using the latest technology will be demonstrated. Additional projects required for EE 536. (Lecture-problems 3 hours.) Letter grade only (A-F).

***445. Foundation of Computer Communication Networks (3)**

Prerequisite: EE 482 or consent of instructor. Computer communication network hardware and software. Protocols, networks, relational database technology. Examples of client/server and peer-to-peer computing applications. Tools and development environments. Groupware, middleware. A class project and class presentation will be required in addition to laboratory projects. (Lecture-problems 2 hours, laboratory 3 hours.) Letter grade only (A-F).

***446. Advanced Microprocessors and Embedded Controllers I (3)**

Prerequisite: EE 347 or consent of the instructor. Advanced microprocessors such as Pentium series, RISC, and CISC. Hardware features and new instructions. Support for virtual memory, paging, privilege levels, multitasking and internal cache. Floating point coprocessors. Embedded controllers, on-chip resources and applications. (Lecture-problems 2 hours, laboratory 3 hours.) Letter grade only (A-F).

448./548. Wireless and Mobile Networks and Security in Wireless Networks (3)

Prerequisite: EE 445 or consent of instructor. Wireless and Mobile Ad-hoc Networks and Security. Ad-hoc and geographic routing, resource discovery, medium access control, IP-mobility, mobility modelling, wired-wireless networks, security aspects. Lab will include: Wireless LAN set-up and measurements, Mobile-IP, ad-hoc routing, security tools. Also use of tools such as OPNET, Ethereal, Sniffer, Scanner, IDS, etc. Project required. Advanced project required for EE 548. (Lecture-problems 3 hours.) Letter grade only (A-F).

***447. Design of Electronic Systems (3)**

Prerequisites: EE 301 or 435, 346, 400D, 430. Extensive laboratory projects. Design of analog and digital systems. Computer-aided design including, for example, hardware descriptive language (HDL) and SPICE. (Lecture-problems 2 hours, laboratory 3 hours.) Letter grade only (A-F).

***450. Electronic Control of Motors (3)**

Prerequisites: EE 350, 370. Multidisciplinary coverage of motor control. Characteristics of semiconductor power switches. Modeling and application of control theory to various types of motors. Bidirectional and four-quadrant converter topologies for motion control. Selection of drives to control AC and DC motors. Transient and steady-state motor control. Uninterruptible power supplies and adjustable speed drives. (Lecture-problems 3 hours). Letter grade only (A-F).

***452. Computer Applications in Power Systems (3)**

Prerequisite: EE 350, or consent of instructor. Modeling of power generation, transmission, and distribution systems, load-flow analyses, short-circuit studies, voltage drop and power loss calculations, transient stability and optimal power flow analyses. Application of specialized computer software for power system design and analyses. (Lecture-problems 3 hours.) Letter grade only (A-F).

453./553. Protection of Power Systems (3)

Prerequisites: EE 310, 350. Protective relays, instrument transformers, low-voltage and high-voltage circuit breakers, protection of generators and motors, transformer protection and transmission line protection. Relay coordination and commercial power systems. Application of computer programs for protective device coordination. Additional projects required for EE 553. (Lecture-problems 3 hours). Letter grade only (A-F).

455./555. Space Electric Power Systems (3)

Prerequisites: EE 330, EE 350. A comprehensive treatment of characteristics of and requirements imposed by missions on spacecraft power systems, power sources, power conversion and control. Energy storage, electrical equipment, power converters and loads, power management. Effects of environment, future space missions and technological needs. Additional projects required for EE 555. (Lecture-problems 3 hours.) Letter grade only (A-F).

***458. Design of Power System Components (3)**

Prerequisites: EE 330, 400D, and either 450, 452, or 453. Design of electrical, electronic and electromechanical components required for power conversion, control, transmission, distribution, protection and measurements in terrestrial and space electric power systems. (Lecture-problems 2 hours, laboratory 3 hours.) Letter grade only (A-F).

***460. Electromagnetic Fields (3)**

Prerequisites: EE 310. Electric and magnetic field theory including propagation of planewaves in lossless and dissipative media. Maxwell's equations. Transmission lines. (Lecture-problems 3 hours) Letter grade only (A-F).

***462. Electromagnetics and Applications to Wireless Systems (3)**

Prerequisite: EE 310. Electromagnetic field theory including transmission lines, vector fields, electrostatics and magnetostatics. Maxwell's equations and plane wave propagation. Waveguides and microstrip-RF circuit principles and devices. Radiation and antenna design. Wireless communication systems including satellite and cell-phone technologies. Not open to students with credit in EE 460 or 464. (Lecture-problems 2 hours, laboratory 3 hours) Letter grade only (A-F).

***464. Electromagnetics and Applications to Electro-Optics (3)**

Prerequisite: EE 310. Electromagnetic field theory including transmission lines, vector fields, electrostatics and magnetostatics. Maxwell's equations and plane wave propagation. Electromagnetic formulation of geometric and Fourier optics. Semiconductor and gas laser applications to fiber-optic communication systems and electro-optic devices. Not open to students who have credit in EE 460 or 462. (Lecture-problems 2 hours, laboratory 3 hours) Letter grade only (A-F).

***470. Digital Control (3)**

Prerequisites: EE 370L, 386. Analysis and synthesis of digital control systems. General application of both the Z-transform and the state-space approach for discrete system design. (Lecture-problems 2 hours, laboratory 3 hours) Letter grade only (A-F).

***471. Design of Control Systems (3)**

Prerequisite: EE 400D. Corequisite: EE 470. Design of compensators using root-locus and Bode-plot methods. Design of state-space control systems and observers. Computer-aided design. (Lecture-problems 2 hours, laboratory 3 hours.) Letter grade only (A-F).

474./574. Robot Dynamics and Control (3)

Prerequisite: EE 511 or consent of instructor. Basic methodology for analysis and design of robotic manipulators. Classification of robots. Homogeneous transformations, kinematics, dynamics, trajectory planning and control of robots. Application of robots in flexible manufacturing. Additional projects required for EE 574. (Lecture-problems 3 hours.) Letter grade only (A-F).

476./576. Neural Networks and Fuzzy Logic (3)

Prerequisite or Corequisite: EE 486 or consent of instructor. Principles and application of artificial neural networks and fuzzy logic. Mechanisms of supervised and unsupervised neural networks. Fuzzy control systems. Applications in signal processing, communications, control, and other areas. Additional projects required for EE 576. Not open to students with credit in EE 589/689. (Lecture-problems 3 hours.) Letter grade only (A-F).

481./581. Satellite Communication Systems (3)

Prerequisite: EE 482. Basic orbital mechanics, link analysis, multiple access architectures and protocols, FDMA, TDMA, and CDMA systems. Synchronization techniques, modulation and coding techniques. Security and spread spectrum requirements. System design. Additional projects required for EE 581. (Lecture-problems 3 hours) Letter grade only (A-F).

***482. Communication Systems II (3)**

Prerequisites: EE 382. Information sources and communication systems. Orthogonal series representation of signals, pulse and digital modulation techniques, band-pass digital communication systems, special topics in communications. (Lecture-problems 3 hours) Letter grade only (A-F).

***483. Digital Image Processing (3)**

Prerequisites: MATH 370A. Image formation. Image detectors and their characteristics. Perception, image models. Sampling and quantization. Pixel relationships. Statistical characterization of discrete images - probability density models. Image fidelity criteria and image intelligibility. Image transforms. Image enhancement techniques. (Lecture-problems 3 hours) Letter grade only (A-F).

***486. Digital Signal Processing for Multimedia Communications (3)**

Prerequisite: EE 386. Digital signal processing and computation and analysis techniques. Discrete and fast Fourier transforms, discrete Hilbert transform, periodogram, spectrum and cepstrum analyses, and homomorphic deconvolution. Introduction to multi-rate signal processing. Projects with Computer Aided Design (CAD) tools for implementing DSP applications such as data compression, single sideband modulation, binary spread spectrum, and adaptive line enhancer. (Lecture-problems 2 hours, laboratory 3 hours.) Letter grade only (A-F).

***488A. Communication Systems Design I (3)**

Prerequisite or Corequisite: EE 400D, 430, 430L. Design of Communication systems/subsystems and their implementation in software and hardware. (Lecture-problems 2 hours, laboratory 3 hours.) Letter grade only (A-F).

***488B. Communication Systems Design II (3)**

Prerequisite: EE 488A. Design of Capstone Senior Project in the area of Communication systems. (Lecture-problems 1 hour, laboratory 2 hours) Letter grade only (A-F).

***489. Digital Signal Processing Design (3) S**

Prerequisite: EE 400D. Prerequisite or corequisite: EE 486 or consent of instructor. Design of digital filters, including Finite Impulse Response (FIR) and Infinite Impulse Response (IIR) filters. Design of digital signal processing systems and the implementation of digital filters with digital signal processors in real time. (Lecture-problems 2 hours, laboratory 3 hours.) Letter grade only (A-F).

***490. Special Problems (1-3)**

Prerequisites: Minimum G.P.A. of 2.5 and consent of instructor. Assigned topics in technical literature or laboratory projects and reports on them. May be repeated to a maximum of 6 units. Letter grade only (A-F).

492. Instrumentation and Data Acquisition for Engineering Applications (3)

Prerequisites: (EE 210 and 210L, or 211 and 211L), (CECS 174 or MAE 205), and (EE 370 or MAE 376), or consent of instructor. The course covers concepts of instrumentation, data acquisition and computer-based control of industrial systems. Topics include signal conditioning, software and hardware for data acquisition and computer-based control, graphical programming and virtual instrumentation. (Lecture-problems 2, laboratory 3 hours.) Letter grade only (A-F).

Graduate Level**505./605. Advanced Engineering Mathematics for Electrical Engineers (3)**

Prerequisites: EE 401 or equivalent or consent of instructor. (Master's students register in EE 505; Ph.D. students register in EE 605.) Boundary-value problems and generalized Fourier (or eigenfunction) expansions. Review of Fourier series. Fourier transforms (FT, FFT and STFT), wavelet transform and its computer implementation. The Z-transform. The Hilbert transform. Solutions of partial differential equations using the methods of separation of variables, Laplace, Fourier and wavelet transforms, conformal mapping, numerical (finite difference, finite element), and experimental techniques. Additional projects required for EE 605. (Lecture-problems 3 hours.) Letter grade only (A-F).

506./606. Theory and Practice of Biomedical Instrumentation (3)

Prerequisites: Graduate standing in engineering or natural sciences and either EE 406 or consent of instructor. (Master's students register in EE 506; Ph.D. students register in EE 606.) Advanced design concepts and practical utilization of biomedical instrumentation. Transduction of physiological parameters. Theory and practice. Additional projects required for EE 606. (Lecture-problems 3 hours.) Letter grade only (A-F).

507./607. Advanced Biomedical Systems (3)

Prerequisites: Graduate standing in engineering or natural sciences and either EE 406 or consent of instructor. (Master's students register in EE 507; Ph.D. students register in EE 607.) Novel trends in biotechnology, design and organization of modern hospital systems and utilization of advanced technologies. Modeling and simulation of physiological and medical systems. Additional projects required for EE 607. (Lecture-problems 3 hours) Letter grade only (A-F).

508. Probability Theory and Random Processes (3)

Prerequisites: EE 380. Probability spaces, random vectors and processes, convergence concepts, stationarity and ergodic properties, second-order moments and linear systems, correlation and spectral representations. Some applications of random processes. (Lecture-problems 3 hours) Letter grade only (A-F).

509. Network Theory (3)

Prerequisites: EE 386, 410 or 430. Network classifications and study of non-linear circuits. Analysis of linear networks using topological and state-space techniques. Characterization of networks using scattering and other parameters. Tellegen's theorem and its application. (Lecture-problems 3 hours.) Letter grade only (A-F).

510. Circuit Synthesis (3)

Corequisite: EE 509. Synthesis of passive lumped networks, cascade synthesis (link with filter synthesis), realization of commensurate distributed networks, discrete passive networks. (Lecture-problems 3 hours.) Letter grade only (A-F).

511./411. Linear Systems Analysis (3)

Prerequisite: EE 370. Review of matrices and linear algebra. Z-transforms and difference equations. Continuous and discrete-time systems. Sampled-data systems. State-space linear system analysis. Stability, reachability, and observability. Minimal realization.

State feedback and pole assignment. Asymptotic observers. (Lecture-problems 3 hours). Letter grade only (A-F).

514. Advanced Circuit Synthesis and Design (3)

Prerequisite: EE 510. Scattering synthesis in (s-z) domains, wave digital filters. Lossless bounded-real two-pair and orthogonal digital filters with an emphasis on structures suitable for VLSI implementation. (Lecture-problems 3 hours.) Letter grade only (A-F).

527. Digital Filter Design and Audio Processing (3)

Prerequisite: EE 486 or consent of instructor. Frequency and time domain analysis using FFT, FIR, and IIR filter design and implementation techniques. Principles of digital audio processing, compression/decompression. Applications of audio coding standards, such as MPEG audio and G.729. (Lecture-problems 3 hours.) Not open to students with credit in EE 513. Letter grade only (A-F).

528./428. Speech Signal Processing (3)

Prerequisite or Corequisite: EE 486 or consent of instructor. Principles and engineering applications of speech signal processing. Speech synthesis, recognition, encoding, and compression. Applications of neural networks. Additional projects required for EE 528. (Lecture-problems 3 hours.) Letter grade only (A-F).

531. CMOS Electronics (3)

Prerequisite: EE 430. Electronic design automation CAD tools, silicon compilers, CMOS design, BiCMOS design (technologies, modeling, device characterization and simulation), CMOS and BiCMOS subcircuits, amplifiers, op-amps and systems. (Lecture-problems 3 hours.) Letter grade only (A-F).

532./632. Analog Signal Processing (3)

Prerequisite: EE 430 or consent of instructor. (Master's students register in EE 532; Ph.D. students register in EE 632.) Basic CMOS circuit techniques. Low-voltage and current-mode signal processing. Switched-capacitor (SC) and switched-current (SI) circuits such as amplifiers, integrators, S/H circuits, filters, oscillators, comparators, D/A and A/D converters. Advanced techniques for corrections of nonideal behavior. Analysis and simulation projects. Additional projects required for EE 632. (Lecture-problems 3 hours.) Letter grade only (A-F).

533./633. Quantum and Optical Electronics (3)

Prerequisites: EE 430 and 460 or equivalent. (Master's students register in EE 533; Ph.D. students register in EE 633.) Modern quantum and optical concepts of relevance in lasers, fiber optics, optical technology and semiconductor solid state electronics. Basic theory and applications to state-of-the-art electronics engineering. Additional projects required for Ph.D. students. (Lecture-problems 3 hours) Letter grade only (A-F).

534./434. Mixed-Signal IC Design (3)

Prerequisites: EE 201 and EE 330, or 331, or consent of instructor. CMOS fabrication. Component layout. MOSFET modeling. Mixed-signal devices such as D/A and A/D converters and phase-locked loops. Substrate Noise coupling. System-on-chip considerations. Design using CAD tools. Additional projects required for EE 534. (Lecture-problems 2 hours, Laboratory 3 hours.) Letter grade only (A-F).

535. VLSI Design (3)

Prerequisite: EE 430. Techniques for designing Very Large Scale Integrated (VLSI) circuits using n-channel metal oxide semiconductors (n-MOS). (Lecture-problems 3 hours). Not open to students with credit in EE 520. Letter grade only (A-F).

536./436. Microfabrication and Nanotechnology (3)

Prerequisites: EE 330 and (EE 320 or PHYS 254); or MAE 300. In this course the techniques and the technology of miniaturization of electrical, mechanical, optical, and opto-electronic devices in sizes from millimeters to nanometers are presented. Design examples of sensors, microlenses, cantilevers, and micromotors are covered and process fabrication using the latest technology will be demonstrated. Additional projects required for EE 536. (Lecture-problems 3 hours.) Letter grade only (A-F).

540. Advanced Digital System and Computer Architecture (3)

Prerequisite: EE 446 or consent of instructor. High level computer architectures including studies of supercomputers, array proces-

sors, parallel processing, direct execution computers. (Lecture-problems 3 hours) Letter grade only (A-F).

545. Computer Communication Networks (3)

Prerequisite: EE 445 or consent of instructor. Design and analysis of computer communications networks including their topologies, architectures, protocols, and standards. LAN, WAN environments and access methods. Ethernet, ATM, bridges, routers, gateways and intelligent hubs. TCP/IP and other Networking protocols. Load balancing, traffic monitoring, use of simulation tools in designing networks, and implementing security. A materials fee may be charged. (Lecture-problems-computer projects 3 hours). Letter grade only (A-F).

546. Advanced Microprocessors and Embedded Controllers II (3)

Prerequisite: EE 446 or consent of the instructor. Advanced concepts for embedded controllers, mobile processors, network processors, embedded Internet, and embedded Internet devices. Parallelism, multithreading, pipelining, coherence protocols, interconnection networks, clustering. Simulation and analysis tools. Project required. (Lecture-problems 3 hours.) Letter grade only (A-F).

548./448. Wireless and Mobile Networks and Security in Wireless Networks (3)

Prerequisite: EE 445 or consent of instructor. Wireless and Mobile Ad-hoc Networks and Security. Ad-hoc and geographic routing, resource discovery, medium access control, IP-mobility, mobility modelling, wired-wireless networks, security aspects. Lab will include: Wireless LAN set-up and measurements, Mobile-IP, ad-hoc routing, security tools. Also use of tools such as OPNET, Ethereal, Sniffer, Scanner, IDS, etc. Project required. Advanced project required for EE 548. (Lecture-problems 3 hours.) Letter grade only (A-F).

550. Power Electronics and Applications (3)

Prerequisites: EE 350 and 430. Power converters: rectifiers, inverters, choppers and cycloconverters. PWM and PFM techniques. Harmonics and filters. Magnetics. Applications in motor controls in industrial systems, energy conversion, HVDC transmission, aircraft and spacecraft power systems. (Lecture-problems 3 hours.) Letter grade only (A-F).

551. Theory and Applications of DC/DC Converters (3)

Prerequisite: EE 550 or consent of instructor. Modeling, analysis, design and application of DC/DC switch-mode converters. (Lec-prob 3 hrs.) Letter grade only (A-F).

552. Electric Machines and Robotic Applications (3)

Prerequisites: EE 370, 452 or consent of instructor. Applications and design of small electric machines including stepper and brushless DC motors with emphasis on robotic control. Performance characteristics of electric machines interfacing with robotic systems. (Lecture-problems 3 hours). Letter grade only (A-F).

553./453. Protection of Power Systems (3)

Prerequisites: EE 310, 350. Protective relays, instrument transformers, low-voltage and high-voltage circuit breakers, protection of generators and motors, transformer protection and transmission line protection. Relay coordination and commercial power systems. Application of computer programs for protective device coordination. Additional projects required for EE 553. (Lecture-problems 3 hours). Letter grade only (A-F).

555./455. Space Electric Power Systems (3)

Prerequisites: EE 330, EE 350. A comprehensive treatment of characteristics of and requirements imposed by missions on spacecraft power systems, power sources, power conversion and control. Energy storage, electrical equipment, power converters and loads, power management. Effects of environment, future space missions and technological needs. Additional projects required for EE 555. (Lecture-problems 3 hours.) Letter grade only (A-F).

563. Microwave Engineering (3)

Prerequisite: EE 462. Propagation of guided waves in lossless and dissipative media. Radiation and antenna design. Waveguides, microstrip, microwave circuits. (Lecture-problems 3 hours). Letter grade only (A-F).

565. Photonics (3)

Prerequisite: EE 464. Maxwell's equations applied to electro-optic devices and systems. Electromagnetic formulation of geometrical and Fourier optics. Topics include optics in semiconductors, fiber optics and integrated optics, lasers and holography. (Lecture-problems 2 hours, laboratory 3 hours). Letter grade only (A-F).

568./668. Wavelet Theory and Applications (3)

Prerequisites: EE 505, and one of the following computer languages: MATLAB, C++, JAVA, or consent of instructor. (Master's students register in EE 568; Ph.D. students register in EE 668.) Justification of the need for wavelets. Continuous wavelet transforms (CWT), multiresolution analysis (MRA), and filter banks will be extensively discussed. Applications to: digital signal processing (including time-frequency analysis), image processing (including data compression), communications, biomedical engineering, and other fields will be presented. Computer implementation of various algorithms will be carried out in a computer laboratory environment. Additional projects required for EE 668. (Lecture-problems 2 hours, laboratory 3 hours.) Letter grade only (A-F).

569D./669D. Data Compression (3)

Prerequisite: One of the following computer languages: MATLAB, C++, JAVA, or consent of instructor. (Master's students register in EE 569D; Ph.D. students register in EE 669D.) Justification of the need for data compression. Lossy and Lossless compression and a comparison between the currently used compression methods with the new ones, such as wavelets, will be presented and discussed extensively. Transformation, quantization and coding methods will be the basis for this course. Computer data compression algorithms will be implemented in a computer laboratory environment. Additional projects required for EE 669D. Letter grade only (A-F). (Lecture-problems 2 hours, laboratory 3 hours.)

574./474. Robot Dynamics and Control (3)

Prerequisite: EE 511 or consent of instructor. Basic methodology for analysis and design of robotic manipulators. Classification of robots. Homogeneous transformations, kinematics, dynamics, trajectory planning and control of robots. Application of robots in flexible manufacturing. Additional projects required for EE 574. (Lecture-problems 3 hours.) Letter grade only (A-F).

576./476. Neural Networks and Fuzzy Logic (3)

Prerequisite or Corequisite: EE 486 or consent of instructor. Principles and application of artificial neural networks and fuzzy logic. Mechanisms of supervised and unsupervised neural networks. Fuzzy control systems. Applications in signal processing, communications, control, and other areas. Additional projects required for EE 576. Not open to students with credit in EE 589/689. (Lecture-problems 3 hours). Letter grade only (A-F).

580. Statistical Communication Theory (3)

Prerequisites: EE 482, 505 and 508 or consent of instructor. Power spectral density of analog and digital communication signals. Matched filters. Signal-to-noise-ratio performance analysis for analog and pulse modulation systems. Vector space representation of digital signals. Error rate analysis for various signaling formats. Optimum digital receivers. Fading channels. (Lecture-problems 3 hours.) Letter grade only (A-F).

581./481. Satellite Communication Systems (3)

Prerequisite: EE 482. Basic orbital mechanics, link analysis, multiple access architectures and protocols, FDMA, TDMA, and CDMA systems. Synchronization techniques, modulation and coding techniques. Security and spread spectrum requirements. System design. Additional projects required for EE 581. (Lecture-problems 3 hours.) Letter grade only (A-F).

582. Spread Spectrum Communication Systems (3)

Prerequisite: EE 580 or consent of instructor. Spread spectrum (SS) techniques. Direct sequence systems, frequency hopped systems. Generation and correlation properties of pseudo random sequences. Electronic jamming and interference. Processing gain against interference, carrier synchronization, code acquisition and tracking, information modulation and coding. Total SS system design considerations. Applications include rang-

ing, combating multipath effects, code division multiple accessing in mobile satellite and cellular communication systems. (Lecture-problems 3 hours.) Letter grade only (A-F).

583./683. Digital Image Processing (3)

Prerequisite: EE 505 or consent of instructor. (Masters students register in EE 583; Ph.D. students register in EE 683. Acquiring Images. Correcting Imaging defects. Image enhancement. Segmentation and thresholding. Processing Binary images. Tomography. Three dimensional Imaging. Some image data compression techniques. Additional projects required for EE 683. (Lecture-problems 3 hours). Letter grade only (A-F).

584. Information Theory and Coding (3)

Prerequisites: EE 482 and 508. Information measures, source coding, Shannon's first theorem, mutual information and channel capacity, Shannon's second theorem, coding techniques for reliable information transmission over noisy channels. (Lecture-problems 3 hours). Letter grade only (A-F).

585./685. Advanced Digital Signal Processing (3)

Prerequisite: EE 486 or consent of the instructor. (Master's students register in EE 585; Ph.D. students register in EE 685.) Advanced topics in digital signal processing and applications including adaptive filters, spectral estimation and multimedia standards: JPEG, MPEG. State space description of linear discrete time systems. Additional projects for EE 685. (Lecture-problems 3 hours). Letter grade only (A-F).

586. Real-Time Digital Signal Processing (3)

Prerequisite: EE 486, EE or CECS 440, or consent of instructor. Digital signal processors architecture and language. Real-time DSP considerations and limitations. Digital filter and signal processing system implementations. (Lecture-problems 3 hours). Letter grade only (A-F).

590. Special Topics in Electrical Engineering (3)

Prerequisites: Graduate standing in electrical engineering and consent of instructor. Selected topics from recent advances in electrical engineering. Course content will vary from year to year. Topics will be announced in the *Schedule of Classes*. May be repeated to a maximum of 6 units. (Lecture-problems 3 hours). Letter grade only (A-F).

591. Adaptive Systems (3)

Prerequisite: EE 508. Adaptive systems and their applications to communication, control, and signal processing systems. (Lecture - problems 3 hours). Letter grade only (A-F).

600. Graduate Seminar and Presentation (1)

Prerequisites: Graduate standing and advancement to candidacy. Lectures by faculty and guests on advanced topics. A report and presentation are required. (Seminar 1 hour) Letter grade only (A-F).

605./505. Advanced Engineering Mathematics for Electrical Engineers (3)

Prerequisites: EE 401 or equivalent or consent of instructor. (Master's students register in EE 505; Ph.D. students register in EE 605.) Boundary-value problems and generalized Fourier (or eigenfunction) expansions. Review of Fourier series. Fourier transforms (FT, FFT and STFT), wavelet transform and its computer implementation. The Z-transform. The Hilbert transform. Solutions of partial differential equations using the methods of separation of variables, Laplace, Fourier and wavelet transforms, conformal mapping, numerical (finite difference, finite element), and experimental techniques. Additional projects required for EE 605. (Lecture-problems, 3 hours.) Letter grade only (A-F).

606./506. Theory and Practice of Biomedical Instrumentation (3)

Prerequisites: Graduate standing in engineering or natural sciences and either EE 406 or consent of instructor. (Master's students register in EE 506; Ph.D. students register in EE 606.) Advanced design concepts and practical utilization of biomedical instrumentation. Transduction of physiological parameters. Theory and practice. Additional projects required for EE 606. (Lecture-problems 3 hours). Letter grade only (A-F).

607/507. Advanced Biomedical Systems (3)

Prerequisites: Graduate standing in engineering or natural sciences and either EE 406 or consent of instructor. (Master's students register in EE 507; Ph.D. students register in EE 607.) Novel trends in biotechnology, design and organization of modern hospital systems and utilization of advanced technologies. Modeling an simulation of physiological and medical systems. Additional projects required for EE 607. (Lecture-problems 3 hours). Letter grade only (A-F).

610. Seminar in Circuit Theory and Design (3)

Prerequisites: EE 509 and EE 510 or EE 527. Intensive study of current professional literature and recent techniques related to circuit theory. (Seminar 3 hours.) May be repeated to a maximum of 6 units with different topics. Letter grade only (A-F).

632./532. Analog Signal Processing (3)

Prerequisite: EE 430 or consent of instructor. (Master's students register in EE 532; Ph.D. students register in EE 632.) Basic CMOS circuit techniques. Low-voltage and current-mode signal processing. Switched-capacitor (SC) and switched-current (SI) circuits such as amplifiers, integrators, S/H circuits, filters, oscillators, comparators, D/A and A/D converters. Advanced techniques for corrections of nonideal behavior. Analysis and simulation projects. Additional projects required for EE 632. (Lecture-problems 3 hours.) Letter grade only (A-F).

633./533. Quantum and Optical Electronics (3)

Prerequisites: EE 430 and 460 or equivalent. (Master's students register in EE 533; Ph.D. students register in EE 633.) Modern quantum and optical concepts of relevance in lasers, fiber optics, optical technology and semiconductor solid state electronics. Basic theory and applications to state-of-the-art electronics engineering. Additional projects required for Ph.D. students. (Lecture-problems 3 hours.) Letter grade only (A-F).

668./568. Wavelet Theory and Applications (3)

Prerequisites: EE 505, and one of the following computer languages: MATLAB, C++, JAVA, or consent of instructor. (Master's students register in EE 568; Ph.D. students register in EE 668.) Justification of the need for wavelets. Continuous wavelet transforms (CWT), multiresolution analysis (MRA), and filter banks will be extensively discussed. Applications to: digital signal processing (including time-frequency analysis), image processing (including data compression), communications, biomedical engineering, and other fields will be presented. Computer implementation of various algorithms will be carried out in a computer laboratory environment. Additional projects required for EE 668. (Lecture-problems 2 hours, laboratory 3 hours.) Letter grade only (A-F).

669D./569D. Data Compression (3)

Prerequisite: One of the following computer languages: MATLAB, C++, JAVA, or consent of instructor. (Master's students register in EE 569D; Ph.D. students register in EE 669D.) Justification of the need for data compression. Lossy and Lossless compression and a comparison between the currently used compression methods with the new ones, such as wavelets, will be presented and discussed extensively. Transformation, quantization and coding methods will be the basis for this course. Computer data compression algorithms will be implemented in a computer laboratory environment. Additional projects required for EE 669D. (Lecture-problems 2 hours, laboratory 3 hours.) Letter grade only (A-F).

670. Seminar in Control Systems (3)

Study of selected topics in the areas of synthesis and design of optimum control systems. (Seminar 3 hours.) Letter grade only (A-F).

675./775. Non-Linear Control Systems (3)

Prerequisite: EE 511 or consent of instructor. (Master's students register in EE 675; Ph.D. students register in EE 775.) Methodologies and results dealing with stability and robust stabilization of nonlinear systems which can be applied to robotics, aerospace, artificial neural network, circuit theory etc. Phase plane analysis and limit cycles, Lyapunov stability theory and its extension. Positive real transfer matrix and passive systems, feedback linearization, feedback stabilization and tracking and robust control. Additional projects for EE 775 students. (Lecture-problems 3 hours.) Letter grade only (A-F).

683./583. Digital Image Processing (3)

Prerequisite: EE 505 or consent of instructor. (Masters students register in EE 583; Ph.D. students register in EE 683.) Acquiring Images. Correcting Imaging defects. Image enhancement. Segmentation and thresholding. Processing Binary images. Tomography. Three dimensional Imaging. Some image data compression techniques. Additional projects required for EE 683. (Lecture-problems 3 hours.) Letter grade only (A-F).

685./585. Advanced Digital Signal Processing (3)

Prerequisite: EE 486 or consent of the instructor. (Master's students register in EE 585; Ph.D. students register in EE 685.) Advanced topics in digital signal processing and applications including adaptive filters, spectral estimation and multimedia standards: JPEG, MPEG. State space description of linear discrete time systems. Additional projects for EE 685. (Lecture-problems 3 hours). Letter grade only (A-F).

697. Directed Research (1-3)

Prerequisites: Graduate Standing. Theoretical and experimental problems in electrical engineering requiring intensive analysis. Letter grade only (A-F).

698. Thesis or Industrial Project (3-6)

Prerequisite: Advancement to Candidacy. Planning, preparation and completion of a thesis (total 6 units), or industrial project (3 units), in electrical engineering. Letter grade only (A-F).

775./675. Non-Linear Control Systems (3)

Prerequisite: EE 511 or consent of instructor. (Master's students register in EE 675; Ph.D. students register in EE 775.) Methodologies and results dealing with stability and robust stabilization of nonlinear systems which can be applied to robotics, aerospace, artificial neural network, circuit theory etc. Phase plane analysis and limit cycles, Lyapunov stability theory and its extension. Positive real transfer matrix and passive systems, feedback linearization, feedback stabilization and tracking and robust control. Additional projects for EE 775 students. (Lecture-problems 3 hours.) Letter grade only (A-F).

For information about programs of study in the Department of English, the department office can refer students to one of the coordinating faculty advisors: Undergraduate, Graduate, MFA, English Education, Composition, Creative Writing, Literature, Technical and Professional Communication, and the American Language Program. Regular office hours for all English faculty are posted near the department office, and information sheets are available detailing which faculty members regularly advise for specific options. Students should establish a file folder in the department when they first appear for major advising. Unofficial transcripts from other institutions are needed to establish continuity, waive requirements, or substitute equivalent courses.

In the discipline of English, the department's teaching-learning emphasis is on developing and sustaining each student's own critical reasoning, imagination, and expressive skills, including clarity, coherence, and respect for truth and meaning. Just as literature broadens and deepens one's experience of life, the study and practice of language and writing sharpen and clarify one's thinking. Learning to see and to seek out expressive possibilities of language in fiction, drama, poetry, essays, and the mass media also adds dimension and meaning to the experiences of life.

The course of study for the undergraduate English major enlarges the literary background of students and prepares them for graduate study, teaching, or careers in business, law, and other professions.

In all options for the major, study of a foreign language is recommended. Ideally, acquaintance with a foreign language should begin before University study, but a student can also gain a great deal by beginning language study at the university level and continuing it through upper-division courses. Because most advanced degrees require knowledge of at least one foreign language, students aiming at such degrees should definitely include language study in their undergraduate programs.

Bachelor of Arts in English

While planning a program of courses for the major in English, a student should consider the opportunities and limitations of the different options detailed below. For each option, official Program Planners are available in the department office. They require faculty consultation and approval for a graduation audit, but students should also consult department faculty for advising when choosing a program in English and regularly after making that choice.

For all options, the major in English consists of at least 41 units. Because ENGL 100 satisfies a University general education requirement, it is not part of any English option. Some options permit or require courses from other departments; if approved by a faculty advisor, options may also include other courses outside English. Because some courses meet requirements in several options, many students can change options with no great loss of credit toward the required total.

In rare instances, a student may accelerate completion of the major in English by taking advantage of the department's credit by examination policy. Certain courses may also be waived or substituted for under certain circumstances. Consult a department advisor for the option concerned.

Option in Creative Writing (code ENGLBA02) (120 units)

The Creative Writing option is designed for students who wish to write, as well as study, fiction, poetry, plays, or media scripts. Exposure to traditional and recent literature is also of significant value for anyone seeking to master the forms and conventions of writing creatively for the literary marketplace. (Students seeking a Secondary Credential should complete the Creative Writing emphasis of the English Education Option).

This option consists of 41 units, 26 of which must be upper division, including the following:

Lower Division: ENGL 184; 204, 205 or 206; 250A,B.

Upper Division: nine units in creative writing chosen from ENGL 404, 405, 406, 407, 408, 499, FEA 404, 408, THEA 380, 480; three classes chosen from the following classes in recent literature, literary genres, and literary criticism: ENGL 384, 385, 386, 459, 467A,B, 469, 474, 475, 476, 477A,B, 478, 479; electives to make up a total of 41 units chosen from the classes listed above and/or any upper-division English courses.

FOUR YEAR PLAN TO COMPLETE THE B.A. DEGREE in ENGLISH Option in CREATIVE WRITING (ENGLBA02)

120 units required

Department of English

Semester 1		Semester 2	
University 100	1	Oral Comm or Composition	3
Composition or Oral Comm	3	GE Math or other GE Class	3-4

Elective Class	3	Elective Class	3
Elective Class	3	Elective Class	3
TOTAL UNITS	15	TOTAL UNITS	15

*GE Interdisciplinary Capstone classes may be able to count for major and GE - See catalog or advisor.

Major elective courses to make up the total 45 unit requirement can be chosen from any upper division English course

Option in English Education (code ENGLBA06) (120 units)

English Education emphases should not be confused with B.A. options or majors in English or other departments, which have significantly different requirements.

The English Education option is designed for prospective secondary English teachers and satisfies the state-mandated requirement in subject matter competence for the Single Subject Teaching credential. The option combines a 35-unit core with a specified emphasis in one of nine areas. Areas of emphasis vary in the number of breadth and perspective units required beyond the core as indicated below.

Students must complete the following core courses for all emphases: ENGL 184, 310, 327 (or LING 327), 363, 375, 410, 482, LING 339; ENGL 250A or 250B; ENGL 270A or 270B.

In addition to the English Education option, credential candidates must complete 33 units of professional preparation in the Single Subject Credential Program (see Single Subject Teacher Education). Students may begin the professional preparation course as early as the junior year. With careful planning, students may complete all English Education courses and professional preparation courses, other than student teaching, prior to graduation. Prospective majors should consult an English Education advisor early to plan their programs.

FOUR YEAR PLAN TO COMPLETE THE B. A. DEGREE in ENGLISH Option in ENGLISH EDUCATION (ENGLBA06)

120 units required

Department of English

Semester 1		Semester 2	
University 100	1	COMM 130 (GE A2)	3
Composition (GE A1)	3	GE Math or other GE Class	3-4

*GE Interdisciplinary Capstone Classes may be able to count in GE and in major.

NOTE: Students must complete the 39 required units in English Education, plus the 12 units of a chosen emphasis (see catalog or advisor for information). With careful planning, students can complete both the requirements for the baccalaureate and the additional 44 units for the Single Subject Credential Program(see advisor for Single Subject Teacher Education).

FAQ Concerning Road Maps for Completion of Undergraduate Degrees

For each undergraduate major, the on-line Catalog shows plans for scheduling all required courses to complete the degree in four, five, or six years.

While CSULB will make every effort to schedule classes at the times shown in the plans, we cannot guarantee that courses will be available in specific semesters. It is possible that shortage or budget or of personnel will make it impossible to offer as many classes as we would wish.

The plans are not substitutes for working with an advisor. You are strongly encouraged to see an advisor when planning your program each term.

I am a freshman. Do I have to choose now whether to follow the four, five, or six-year plan?

No. Most freshmen take 12-15 units. You need at least 12 units to receive full financial aid. With experience, you will be able to judge how heavy a load you find comfortable. This will depend on your outside obligations, such as a job, and on your personal circumstances. In theory, each unit requires three hours a week, including preparing for class, attending class, and completing assignments. Use these guidelines to budget your time and plan an appropriate schedule.

Must I take the courses in the semesters shown on the plan?

The plan shows one possible way of completing all requirements for the degree. Consult your advisor about whether it is essential to take a given course in the semester shown. There are some rules to keep in mind:

1) You can take the General Education Foundation courses (Composition, Oral Communication, Critical Thinking, Mathematics) in any semester in the first 36 units of baccalaureate-level course work completed at CSULB.

2) You cannot take upper division courses until you have completed at least 30 units. (Exceptions can be made for students who already have completed advanced study in the subject.) You cannot take General Education Capstone courses until you have completed at least 60 units.

3) For some majors it is essential to complete courses in the correct sequence. You cannot take a more advanced course until you have completed the prerequisite course(s).

4) You must complete all requirements for admission to impacted majors within the first 60 units.

I have been told that I must take one or more pre-baccalaureate courses. How can I plan my program?

Your advisor at SOAR can help you identify which courses must be postponed. You must still complete the minimum number of baccalaureate units required for the degree.

You may be able to catch up by taking additional courses in later semesters or by taking classes in summer or winter session, or you may choose to spend an additional semester completing the program. You cannot begin the sequence of required courses for some majors until you are ready for baccalaureate-level Mathematics. See your major advisor to develop a plan for scheduling the required courses.

I didn't complete the exact list of courses shown. Can I still graduate on time?

The answer depends on your major and on what courses you have completed. The plans are not rigid requirements; they are only intended to provide guidance in planning a program. There are many reasons for students to follow a different pattern, such as changing the major, choosing to take fewer classes in a given semester, choosing to complete a minor or a second major. See your advisor for help in planning a program that will work for you.

If I follow the plan, will I have all requirements for graduation completed?

The plans include the specific courses required for the major. For some majors, there are restrictions on the choice of major electives. It is important that you select General Education courses to meet the required distribution pattern. You may need to take an additional General Education course to complete the minimum number of units required for each category. This is likely to happen if you took three-unit courses in Category B, Physical Universe.

Black Studies Emphasis

Students are required to complete the core of thirty-five (35) units and eighteen (18) units to provide breadth and perspective.

Breadth and Perspective (18 units): B/ST 140, 343, 415, 499 (minimum of 3 units); select three units from B/ST 155, 201, 370; select three units from B/ST 180, 240, 340, 346.

Comparative World Literature Emphasis

Students are required to complete the core of thirty-five (35) units and eighteen (18) units to provide breadth and perspective.

Breadth and Perspective (18 units): select three units from CWL 101, 161; select three units from CWL 101, 330A, 330B; select three units from CWL 361, 461; select three units from CWL 250, 251, 410, 412I, 451; select three units from CWL 103, 104, 334, 336, 402, 403, 440; select three units from CWL 312I, 310I, CWL/HIST 414I, CLSC 421I, CWL/THEA 422I, 431, 432, 437, 438.

Creative Writing Emphasis

Students are required to complete the core of thirty-five (35) units and eighteen (18) units to provide breadth and perspective.

Breadth and Perspective (18 units): select nine units in creative writing from ENGL 404, 405, 406, 407, 408, 499; select nine units from ENGL 385, 386, 459, 463, 467A, 467B, 474, 475, 476, 477A, 477B, 478.

Journalism Emphasis

Students are required to complete the core of thirty-five (35) units and a minimum of twenty-one (21) units to provide breadth and perspective.

Breadth and Perspective (21 units minimum): JOUR 110, 120, 319A, 320, 331, 430; select a minimum of three units from JOUR 300, 312I, 319B, 370, 422, 431, 490, 499.

Language and Linguistics Emphasis

Students are required to complete the core of thirty-five (35) units and eighteen (18) units to provide breadth and perspective.

Breadth and Perspective (18 units): select six units from LING 420, 421; select six units from LING 485 (or ED P 485), 486; select three units from ANTH 421 or LING 472; select three units from ENGL 435, LING 460.

Rhetoric and Composition Emphasis

Students are required to complete the core of thirty-five (35) units and a minimum of fifteen (15) units to provide breadth and perspective.

Lower Division: ENGL 184, 250A, B, or 270 A,B.

Upper Division: ENGL 410, 436; one course in composition: either 309 or 310; two courses from ENGL 435, 496, 497, LING 329 or LING 339; two courses from ENGL 300, 317, 337, 405, 407, 417, 418, 419; electives to make up a total of 41 units. Recommended additional courses, ENGL 385, 390, 421, 423, 426, 482.

Literature Emphasis

Students are required to complete the core of thirty-five (35) units and a minimum of fifteen (15) units to provide breadth and perspective.

Breadth and Perspective (15 units minimum): ENGL 384; select three units from ENGL 451, 452, 453, 455, 456, 458, 459; select a minimum of three units from ENGL 474, 475, 476, 477A,B, 478, 479; select three units from ENGL 318I (or FEA 318I), 385, 386, 398; select three units from CWL 100 or any upper division English course.

Speech Communication Emphasis

Students are required to complete the core of thirty-five (35) units and twenty-one (21) units to provide breadth and perspective.

Breadth and Perspective (21 units): select six units from COMM 110, 130, 171; select six units from COMM 331, 333, 335; select nine units from COMM 306, 309, 330, 355, 410, 411.

Theatre Arts Emphasis

Students are required to complete the core of thirty-five (35) units and twenty-three (23) units to provide breadth and perspective.

Breadth and Perspective (23 units): THEA 101, 114A, 142, 148, 321, 374, 476; select one unit from THEA 310A or 340A.

Discontinued Emphases

Emphases in American Studies, Dance, and Radio/TV/Film were discontinued December 1997 in compliance with the Commission on Teacher Credentialing of the State of California.

Option in Language and Composition (code ENGLBA07)

The Language and Composition option has been discontinued. Students who officially declared this option as a degree objective prior to Fall 1996 may complete it with the required courses or approved substitutions. Students wishing to begin a comparable program should pursue an option in Language and Linguistics, Literacy and Composition, or Special Emphasis.

Option in Language and Linguistics (code ENGLBA03) (120 units)

The Language and Linguistics option is designed for students who desire a balanced program (language and literature, plus some focus on written communication) which emphasizes the linguistic needs of California students and teachers, particularly in a second language context. This option provides background for graduate study in linguistics and other fields, for Teaching English as a Second Language (TESL), for language minority education, and for fields involving intensive language acquisition and communication. (Students seeking a Secondary Credential should complete the Language and Linguistics emphasis of the English Education option.)

This option consists of 41 units total, 29 of which must be upper division, including the following:

Lower division: ENGL 184, 250A or 250B, 270A or 270B,

Upper division: LING 329; LING 327 (or ENGL 327) or 363I; three courses from ENGL 426 (or LING 426), LING 420, 421; two courses from LING 472, 485, 486; one course from ENGL 300, 310, LING 460; electives to complete 41 units from courses listed and/or ENGL 499, 481, 482.

Option in Rhetoric and Composition (code ENGLBA04) (120 units)

The Rhetoric and Composition option is designed for students who desire a balanced program of composition, literature, and language study with particular emphasis on the ways literacy is defined and promoted in our society. This option prepares students for graduate study in English, rhetoric and composition, and literacy studies, for teaching on virtually all levels, and for fields involving intensive writing and communication skills. (Students seeking a Secondary Credential should complete the Rhetoric and Composition emphasis of the English Education Option.)

This option consists of 41 units, 29 of which must be upper division, including the following:

Lower Division: ENGL 184, 250A, B.

Upper Division: ENGL 410, 436; one course in composition: either 309 or 310; two courses from ENGL 435, 496, 497, LING 329; two courses from ENGL 300, 317, 337, 405, 407, 417, 418, 419; electives to make up a total of 41 units. Recommended additional courses, ENGL 270A, 270B, 385, 390, 421, 423, 426, 482.

Major electives to make up a total of 45 units are required for this degree

Option in Literature (code ENGLBA01) (120 units)

The Literature option is designed for students who desire a thorough grounding in English and American literature, particularly those planning on graduate study in English. Students aiming at advanced degrees should take as many of the recommended electives as possible. (Students seeking a Secondary Credential should complete the Literature emphasis of the English Education Option.)

This option consists of 46 units, 26 of which must be upper division, including the following:

Lower Division: ENGL 184, 250A,B.

Upper Division: ENGL 384; three courses in English literature: 363 and either two courses from the 450 series or one course from the 450 series and one course from 462, 463, 467A,B, 468; three courses in American literature to include: 270A,B; one course from 472, 473, 474, 475, 476, 477A,B, 478; one senior seminar: 469 or 479; electives to make up a total of 41 units. Recommended: 431 (Classical Background); additional courses in the 450, 460, 470 series; 404; 405; 406; 407; 499; CWL 330A,B.

*GE Interdisciplinary Capstone classes may be able to meet requirements for GE and the major. Please check with advisor

Two courses must be taken from the 450 series or at least one course from 450 and one course from 460 series excluding ENGL 461 and 469.

FAQ Concerning Road Maps for Completion of Undergraduate Degrees

For each undergraduate major, the on-line Catalog shows plans for scheduling all required courses to complete the degree in four, five, or six years.

While CSULB will make every effort to schedule classes at the times shown in the plans, we cannot guarantee that courses will be available in specific semesters. It is possible that shortage or budget or of personnel will make it impossible to offer as many classes as we would wish.

The plans are not substitutes for working with an advisor. You are strongly encouraged to see an advisor when planning your program each term.

I am a freshman. Do I have to choose now whether to follow the four, five, or six-year plan?

No. Most freshmen take 12-15 units. You need at least 12 units to receive full financial aid. With experience, you will be able to judge how heavy a load you find comfortable. This will depend on your outside obligations, such as a job, and on your personal circumstances. In theory, each unit requires three hours a week, including preparing for class, attending class, and completing assignments. Use these guidelines to budget your time and plan an appropriate schedule.

Must I take the courses in the semesters shown on the plan?

The plan shows one possible way of completing all requirements for the degree. Consult your advisor about whether it is essential to take a given course in the semester shown. There are some rules to keep in mind:

1) You can take the General Education Foundation courses (Composition, Oral Communication, Critical Thinking, Mathematics) in any semester in the first 36 units of baccalaureate-level course work completed at CSULB.

2) You cannot take upper division courses until you have completed at least 30 units. (Exceptions can be made for students who already have completed advanced study in the subject.) You cannot take General Education Capstone courses until you have completed at least 60 units.

3) For some majors it is essential to complete courses in the correct sequence. You cannot take a more advanced course until you have completed the prerequisite course(s).

4) You must complete all requirements for admission to impacted majors within the first 60 units.

I have been told that I must take one or more pre-baccalaureate courses. How can I plan my program?

Your advisor at SOAR can help you identify which courses must be postponed. You must still complete the minimum number of baccalaureate units required for the degree.

You may be able to catch up by taking additional courses in later semesters or by taking classes in summer or winter session, or you may choose to spend an additional semester completing the program. You cannot begin the sequence of required courses for some majors until you are ready for baccalaureate-level Mathematics. See your major advisor to develop a plan for scheduling the required courses.

I didn't complete the exact list of courses shown. Can I still graduate on time?

The answer depends on your major and on what courses you have completed. The plans are not rigid requirements; they are only intended to provide guidance in planning a program. There are many reasons for students to follow a different pattern, such as changing the major, choosing to take fewer classes in a given semester, choosing to complete a minor or a second major. See your advisor for help in planning a program that will work for you.

If I follow the plan, will I have all requirements for graduation completed?

The plans include the specific courses required for the major. For some majors, there are restrictions on the choice of major electives. It is important that you select General Education courses to meet the required distribution pattern. You may need to take an additional General Education course to complete the minimum number of units required for each category. This is likely to happen if you took three-unit courses in Category B, Physical Universe.

Option with Special Emphasis (code ENGLBA05) (120 units)

Some students wishing to major in English have special interests or career objectives so different from those for which the other options are designed that another pattern of courses would better serve their personal educational needs. For those students, the Special Emphasis option offers an opportunity to pursue individually designed 41-unit programs of study. Student programs may center on technical writing, for example, or other writing goals; they may focus on American or English literature or literature in a particular genre, a particular historical period, or a particular theme.

A Special Emphasis program may include courses outside the Department of English closely related to a student's focus in English studies. At least 21 units must be earned in the Department of English and at least 21 units of the program must be upper division. For degrees with more than four courses in any single other department, students should consider a Special Major in the Interdisciplinary Studies Program.

Students wishing to take the Special Emphasis option should prepare a detailed program proposal early in their college careers. Such programs will be recognized only if planned in consultation with a faculty advisor in the Department of English, approved in writing by the advisor, given signed approval by the Department Chair, and carried out under the advisor's continuing supervision. Students must complete at least 15 upper-division units applicable to their Special Emphasis program after it has been officially approved.

The only specific course requirements and limitations are the following: ENGL 184, Composition and Literature (four units); ENGL 384, Principles of Literary Study (three units).

Electives in English and related fields are needed to make up a total of 41 units. These electives may not include ENGL 100 or 101.

Minor in English

Creative Writing (code ENGLUM01)

The minor in English (Creative Writing) requires a minimum of 21 units which must include the following: ENGL 184; three units from ENGL 204, 205 or 206, three units from ENGL 404, 405 or 406; three units from ENGL 385 or 386; and eight units of electives from ENGL 359, 404, 405, 406, 407, 432, 459, 466, 467A,B, 474, 475, 476, 477A,B, 499. (Note: ENGL 404, 405, 406 and 407 may be repeated for credit to a maximum of six units by consent of instructor.)

Language and Composition (code ENGLUM02)

The Language and Composition minor in English requires a minimum of 20 units and must include: ENGL 310, 497, LING 420, and 421. Also recommended are three units from ENGL (or LING) 423 or 426.

Literature (code ENGLUM03)

The Literature minor in English requires a minimum of 21 units and must include: ENGL 184; eight units from ENGL 250A,B, 270A,B and nine units of electives from ENGL 359, 363, 385, 386, 390, 398, 432, 498 and/or any courses from the 440, 450, 460, or 470 series.

Special Emphasis (code ENGLUM04)

The Special Emphasis minor in English requires a minimum of 21 units in a program developed, approved, and supervised in the same manner as the Special Emphasis Option. ENGL 184 is required of all students, with the rest of the program constructed in consultation with a faculty advisor. At least 9 upper division units must be taken after program approval, and at least 11 units must be earned in the Department of English.

Teaching Emphasis (code ENGLUM05)

This minor has been proposed for discontinuance. Effective Spring 2004 no additional students will be accepted into the minor.

The Teaching Emphasis minor in English requires a minimum of 22 units which must include the following: ENGL 184, 310, 482; eight units from ENGL 250A,B, 270A,B; three units from ENGL (or LING) 327, LING 329 or LING 339. This minor meets State of California requirements for a supplemental teaching area in the Single Subject Credential.

Certificate in Teaching English as a Second Language (code ENGLCT02)

The Certificate Program in Teaching English as a Second Language is conducted by the Linguistics Department faculty. Please refer to the Linguistics sections of this *Catalog*.

Certificate in Technical and Professional Communication (code ENGLCT01)

The Department of English offers a Certificate in Technical and Professional Communication to students interested in careers in writing and editing. Application forms and advising materials may be obtained from the department office.

Prerequisites

1. Formal consultation with a faculty advisor in the Technical and Professional Communication (TPC) Certificate program;
2. Submission of an application to enter the program, supported by transcripts;
3. Upper division or post-baccalaureate standing at CSULB with a grade point average of at least 2.75 overall;
4. Admission to a degree program in this university or possession of a degree from an accredited university;
5. Successful completion of ENGL 317, Technical Writing, with a letter grade of "C" or higher.

General Requirements

1. A baccalaureate degree, which may be taken concurrently with the Certificate in Technical and Professional Communication;

2. A minimum of 24 units in courses approved for the Certificate Program at this University, preferably completed within 10 years of the first credit granted toward the Certificate (consult an advisor concerning any transfer or extension credit that may be allowable);
3. A letter grade of "C" or higher in every course in the Certificate program (a grade of "CR" is acceptable in no more than one course);
4. Completion of a program of courses in Areas I through IV, developed in consultation with an advisor in the Technical and Professional Communication Certificate program, and approved by the Program Director and the Dean of the College of Liberal Arts (or the Dean's designee);
5. Demonstrations (in or outside the program of courses) of competence in the use of computers and graphic media;
6. Development of a portfolio of reports, written and edited by the student during enrollment in the Certificate program, for review and approval by faculty in the Technical and Professional Communication Certificate program (required for a grade in ENGL 492A/B, Area IV).

Course Requirements

For each of the following courses, TPC Certificate students have been granted enrollment rights equal to those of students majoring in the Department offering the course. Substitutions are possible, especially in more advanced courses, with approval by the Program Director.

Area I: Technical and Professional Writing (9 units): ENGL 417, 418, and one from the following courses: ART 307, 309; CRIM 302; ENGL 419; GEOL 420; IS 301.

Area II: Language Studies (4 units): ENGL 416, 320.

Area III: Electives chosen from the following (minimum 8 units):

Analytical Reading: COMM 301; ENGL 384, 423; GEOG 380; HIST 400/PHYS 400I; NSCI 375I; PHIL 381;

Business/Professional Skills: ACCT 201; COMM 334, 335, 344; FIN 220; JOUR 370; MKTG 300, 330;

Computer Applications: CECS 174; JOUR 331; MGMT 426; NSCI 200; SOC 200;

Creative Writing: ENGL 404, 405, 406, 407; FEA 304, 404; THEA 380;

Intercultural Communication: ANTH 412I, 413; COMM 330; MKTG 480;

Visual Communication: ET 170; GEOG 200; JOUR 305; MAE 172;

Area IV: Practical Writing (3 units): ENGL 491 (1 or more units), 492A or B (2 or more units). No grade in ENGL 492 will be assigned without an approved portfolio, as indicated in Paragraph 6, General Requirements.

GRADUATE PROGRAMS

The Department of English offers two graduate degrees, an M.A. in English and an MFA in Creative Writing. Teaching assistantships are available in both. Application information may be obtained from the Department office, (562) 985-4223.

Master of Arts in English (code ENGLMA01)

The Department of English offers graduate study leading to the Master of Arts degree. The candidate must satisfy the general requirements stated in this *Catalog* as well as the specific departmental requirements stated here and, more fully, in the Master of Arts brochure issued by the department (copies of which are available upon request). Applicants must submit to the University's Office of Admissions and Records a graduate application (available at that office or on-line). Applicants must also submit two sets of transcripts from all colleges and universities attended. One set must be submitted to the Office of Enrollment Services and another set must be sent directly to the Department of English. The deadline for submitting an application for Fall semester is May 1; the deadline to apply for Spring is October 15.

Prerequisites

An applicant may be admitted to the M.A. program in English only after satisfying University requirements for admission and the following prerequisites to this degree:

1. A Bachelor of Arts degree in English from an accredited institution or a bachelor's degree from an accredited institution with 24 units of upper division English courses that offer a broad coverage of English and American literature.

Any deficiencies will be determined by the Department Graduate Advisor in consultation with the Graduate Studies Committee. Courses used to remove course or unit deficiencies may not be included in the M.A. program.

2. A 3.2 GPA in upper division English courses.

After Admission to Program

Students must be formally admitted to the program before they can enroll in ENGL 696, which is pre-requisite or co-requisite to all other 600-level courses.

Advancement to Candidacy

1. The student must satisfy the general requirements of the University, including passing the Writing Proficiency Examination (WPE).
2. The student's M.A. program must be approved by a faculty graduate advisor, the Department Graduate Advisor, and the Department Chair before submission to the Associate Dean of Liberal Arts.
3. Advancement to candidacy may take place upon completion of six units in the M.A. program. Advancement to candidacy must take place no later than the semester preceding the awarding of the degree.

Requirements

1. A minimum of 30 units of approved upper division (indicated in the *Catalog* with an asterisk*) and graduate courses including 24 units in English;
2. A minimum of 20 units in the 600 series in English at this University, including ENGL 696, which is to be completed before or concurrently with other 600-series courses. (A student will not be granted credit for 600-series courses unless admitted to the M.A. program);
3. A minimum of one seminar in the 600 series in English literature before 1800;
4. A foreign language requirement, which may be fulfilled in one of the following ways:
 - a. completing college course work in a foreign language equivalent to sophomore proficiency (normally 201B at this University) with "C" or better;
 - b. completing college course work in a foreign language equivalent to freshman proficiency (normally 101B at this University) with "C" or better and completing either ENGL 550 or ENGL 551 with "B" or better;
 - c. passing a special examination or demonstrating native proficiency in any foreign language accepted by the Graduate Studies Committee;
5. Successful completion of a final comprehensive examination in a specified specialty area. (Students who fail the examination may retake it once only.) A thesis may be written in lieu of the examination;
6. Appropriate filing for Graduation Check and for Diploma. Teaching assistantships are available in the Department of English. In addition, the Department's tutoring program, the Writer's Resource Lab, employs a number of graduate and undergraduate students each semester. Application for both of these programs may be obtained from the Department office at (562) 985-4223.

Master of Fine Arts in Creative Writing (code ENGLMF01)

The Master of Fine Arts degree in Creative Writing is the recognized terminal degree which offers the minimum professional training deemed necessary by the major schools in the United States for university and college teaching and for positions in the publishing industry. It is also the degree most frequently held by professional writers. The Department of English at California State University, Long Beach is a fully accredited program that meets the standards of the State of California.

Criteria for admission to the program

1. Students applying for admission to the MFA degree program generally have completed a bachelor's or master's degree in English from an accredited institution with a 3.2 GPA in upper division English courses, meet university admission requirements, and submit evidence of creative ability in fiction or poetry (10 pages poetry, 20-30 pages fiction). For each annual cycle, applications are due by February 15, when review will begin.
2. When an undergraduate degree has been completed in a program having different requirements from those of CSULB or in some field other than English, additional preparation may be required before the student can be considered for classified status in the degree program.
3. At the time of the student's conditional classification into the program, an examining diagnostic committee consisting of at least two instructors in the student's field of specialization and at least one other faculty member must approve and evaluate the student's work no later than the end of his/her first full year in residence and judge whether the student should continue in the program.
4. In order to obtain a full classified status, the student must obtain satisfactory evaluation from his/her committee at the end of the first full year in residence. Both the student's coursework and the student's portfolio will be evaluated.

The appeals procedure for unfavorable portfolio evaluation is as follows:

If the student feels that his/her work has been unfairly evaluated, that student has recourse any time to discuss the matter informally with the MFA Coordinator in order to resolve the issue. If the issue cannot be resolved on that basis, the following procedure shall be followed:

- a. The student shall present a written appeal to the MFA Coordinator.
- b. Within ten (10) working days of receipt of a written appeal by a student, the MFA Coordinator shall refer the appeal to an ad hoc committee consisting of three tenured creative writing faculty not involved with the issue.
- c. The committee shall meet in formal sessions holding hearings at separate times for the student and for the faculty involved to gather information and evidence relevant to the issue.
- d. After deliberation, the committee shall present its findings to the MFA Coordinator within thirty (30) working days from the origination of the committee. (Working days do not include periods of time between semesters.)
- e. The MFA Coordinator shall inform the concerned student in writing of the committee's decision.

5. Advancement to candidacy
 - a. Attain fully classified status.
 - b. Remove all undergraduate deficiencies as determined by the graduate advisor, the department chair, and the dean of graduate studies.
 - c. Pass the Writing Proficiency Examination.
 - d. Submit a program of courses for approval by the student's faculty advisor.
6. Up to 24 units of credit from a Master of Arts program in Creative Writing may be acceptable after review and approval by the faculty evaluation committee.
7. Requirements for the Master of Fine Arts in Creative Writing
 - a. The MFA degree is a sixty-unit degree normally requiring full-time residency. Course requirements are arranged according to the following structure.
Core Courses: (39 units, to be chosen on the basis of consultation with a faculty advisor, to include): ENGL 505A,B or 506A,B; 590A,B; 605A,B or 606A,B; 584; 590; 598; 696; 698.
Elective Courses: (21 units, to be chosen on the basis of consultation with a faculty advisor, to include): ENGL 523, 526, 535, 537, 550, 551, 552, 553, 554, 555, 556, 558, 559, 562, 567A, 567B, 568, 574, 575, 576, 577A, 577B, 578, 583, 652, 653, 655, 656, 657, 659, 672, 673, 674, 681; FEA 404; *THEA 380, *480.
* may be counted for graduate credit
 - b. Both fiction and poetry specializations share a common core of courses which offer study in literary history, theory, and research. The remainder of the courses offer students the opportunity to develop additional skills in their particular area of related interest. The program culminates in a major creative project (novel, short story collection, or poetry collection) of publishable quality.

Courses (ENGL)

To encourage clarity and uniformity in the reporting of scholarship, students in all English courses are expected to learn and use standard methods of citation and documentation. For literary and critical study, the standard format is the documentation system prescribed by the Modern Language Association, detailed in the *MLA Handbook*, and simplified in many beginning textbooks in literary study. At the instructor's discretion, other methods may be used in courses in composition, technical writing, literacy studies, and other classes required for the English Education option.

Lower Division

Please check the section on "Application Procedures and Admissions Requirements" of this *Catalog* for CSU system-wide writing proficiency requirements.

1. Writing Skills (4)

Students who score 147 or below on the English Placement Test and who have not taken equivalent courses in another department, are eligible for enrollment in this course. A basic course in writing, offering intensive practice in every stage of the writing process from generating ideas to final proofreading. Reviews and teaches strategies for choosing appropriate words to developing sentences and paragraphs. Focuses on methods to develop and organize ideas in coherent essays. Teaches conventional mechanics, spelling, and the grammar of standard written English. Does not count toward graduation but does count toward course load. Credit/No Credit grading only.

100. Composition (3)

Prerequisite: A recorded total score of 151 or above on the English Placement test, or credit in ENGL (or its equivalent) and consent of the instructor. Writing non-fiction prose, with emphasis on exposition. Readings may be assigned. Satisfies the baccalaureate degree requirement for one course in English composition. Not open to students with credit in ENGL 100W. (CAN ENGL 2)

101. Composition (3)

Prerequisite: ENGL 100. Writing expository prose, with emphasis on the research paper.

102. Critical Reading and Writing (3)

Prerequisite: ENGL 100 with a minimum grade of "C." Analytical reading and persuasive writing with emphasis on logic and argumentation. (Not open to students with credit in ENGL 200.)

180. Appreciation of Literature (3)

Prerequisites/Corequisites: One Foundation course. Study of works representing the scope and variety of themes and types of imaginative literature. (Not applicable toward an English major. Not open to students with credit in ENGL 184.)

184. Composition and Literature (4)

Prerequisite: ENGL 100. Introduction to the major literary genres and to methods of critical expository writing, including methods of research and documentation. Required of all English majors. Open to non-majors with consent of instructor.

204. Introduction to Creative Writing: Creative Nonfiction (3)

Prerequisites: ENGL 100; Completion of GE Foundation requirements. Practice in the basic elements of creative nonfiction, including description, dialog, and framing.

205. Introduction to Creative Writing: Fiction (3)

Prerequisite: ENGL 100; completion of GE Foundation requirements. Practice in the basic elements of fiction writing: character sketch, plot development, description, dialog.

206. Introduction to Creative Writing: Poetry (3)

Prerequisite: ENGL 100; completion of GE Foundation requirements. Theory and techniques of poetry. Practice in creative work, with group discussions and individual conferences.

250A,B. Survey of English Literature (4,4)

Prerequisite: ENGL 100; completion of GE Foundation requirements. Representative selections from English writers to and since the late eighteenth century. (CAN ENGL 8, 250A; CAN ENGL 10, 250B)

270A,B. Survey of American Literature (4,4)

Prerequisites: ENGL 100; completion of GE Foundation requirements. Representative selections from American writers to and since about 1865.

283. Science Fiction (3)

The literature of science fiction, from *Frankenstein* and H.G. Wells to the present, emphasizing the relevance of science and technology to literary fantasy.

285. Detective Fiction and Film (3)

Prerequisites: ENGL 100. A course designed to acquaint students with the variety of short stories, novels, and films available in the genre of detective fiction. These works, both on paper and on film, will be discussed using traditional literary analyses.

Upper Division

General Education Category A must be completed prior to taking any upper division course except upper division language courses where students meet formal prerequisites and/or competency equivalent for advanced study. Therefore, ENGL 100 or its equivalent is a prerequisite for all upper division courses.

An asterisk (*) next to a course number means the course is acceptable for the M.A. degree. An "I" next to a course number means the course is acceptable for Interdisciplinary Credit in General Education.

300. Advanced Composition (3)

Prerequisites: ENGL 100 and upper division standing. Study and apply rhetorical strategies of invention, arrangement, and style to write expository, analytic, and argumentative prose; examine how evidence is produced and presented in genres from different academic disciplines, from civic and workplace literacy, and from popular media.

301B. English Proficiency (3)

Prerequisites: ENGL 100 or equivalent. An intermediate course in English usage with emphasis on building proficiency in oral and written language. Enrollment limited to students needing language development beyond skills acquired in ENGL 100, as assessed by scores on the Writing Proficiency Exam. May be repeated to a maximum of 6 units. Not applicable to credit in any degree program of the Department of English. Letter grade only (A-F).

301A. English Proficiency (3)

Prerequisites: ENGL 100 or equivalent. An intermediate course in English usage with emphasis on building proficiency in oral and written language. Enrollment limited to students needing language development beyond skills acquired in ENGL 100, as assessed by scores on the Writing Proficiency Exam. May be repeated to a maximum of 6 units. Not applicable to credit in any degree program of the Department of English. Letter grade only (A-F).

309. Applied Composition: Explorations in Children's Writing (4) F,S

An advanced composition course also incorporating the study of the evolution of written discourse and emergence of rhetorical structures in the writing of pre-adolescents. The course includes a 30-hour tutorial/research component. Discussion/Laboratory.

310. Applied Composition (4)

Prerequisite: ENGL 101 or 184 or 317 or a baccalaureate degree. Intensive practice in writing, correcting and evaluating compositions, with specific reference to contemporary classroom situations and problems. The course includes a 30-hour tutorial component in which students work as composition tutors. Required for all English credential candidates.

317. Technical Communication (3)

Prerequisites: Completion of the Foundation requirement and one Explorations course, upper division standing and a previous composition course, i.e., ENGL 100, 101, 102, 300 or equivalents. Expository writing on technical subjects dealt with in industry, science, government and the academy. Introduction to long and short forms including reports, proposals, manuals, and journal articles, emphasizing the longer formal paper or technical report.

318I. Theory of Fiction and Film (3)

Prerequisites: Completion of GE Foundation requirements, one or more Explorations courses, and upper-division standing. Examination of the narrative methods and conventions of American and British fiction and the methods and conventions of film; consideration of the relationships between the artistic structure of fiction and film; study of theoretical and practical approaches to fiction and film. Same course as FEA 318I.

320. English Grammar (4)

Advanced study in the principles of English Grammar.

327. Essentials of the English Language (3)

Prerequisites: ENGL 100 or its equivalent. Introduction to the essentials of English language study for credential candidates, including the history of the English language, key models of English grammar, and a variety of applied topics ranging from semantics and dialect study to current research in the teaching of English. Same course as LING 327.

337. Technology in the English Classroom (3)

Meets Title 5 computer-education requirements for the Single Subject, Clear Teaching Credential in English and the Multiple Subject, Clear Teaching Credential with English Concentration. Focuses on: (1) issues in the use of computer-based technologies in society; (2) basic components and operations of computer-based technology; (3) computer applications/programs and video tape/film for teaching problem-solving, critical thinking, writing, and literature. Applications include brainstorming, outlining, word processing, data processing, document checking, desktop publishing, data bases, telecommunications, networking, program development, drills, and instructional management.

359. Postcolonial Literature

Prerequisites: Upper division status. A survey of English-language Writers from former colonies of Great Britain who have made major contributions in all literary genres.

363. Shakespeare I (4)

Prerequisites: ENGL 100; completion of GE Foundation requirements. Principal plays of Shakespeare.

372I. Comedy in the United States (3)

Prerequisites: Completion of GE Foundation requirements, one or more Explorations courses, and upper-division standing. A study of the history of American humor from beginnings to the present. Most of the representative works studied will be from literature; however, considerable attention will be devoted to manifestations of American tradition of humor found on stage, in film, in song, and in signs. Theories of comedy will be included in discussion.

375. American Ethnic Writers (3)

Prerequisites: ENGL 100; completion of GE Foundation requirements. A survey of American writers of various non-European ethnic backgrounds who have made major contributions in all literary genres.

382. Women and Literature (3)

Prerequisites: ENGL 100; completion of GE Foundation requirements. Images of women in English literature; works in various genres that present the range and complexity of women's lives; feminist critical approaches and bibliographic resources. Same course as W/ST 382.

384. Principles of Literary Study (3)

Prerequisite: ENGL 184. Fundamental issues of literary study such as literary history; literary forms; themes and conventions; major critical approaches. Intense written practice in literary analysis.

385. The Short Story (3)

Prerequisites: ENGL 100; completion of GE Foundation requirements. The short story as a literary genre, with emphasis on analysis of individual stories.

386. Poetry (3)

Prerequisites: ENGL 100; completion of GE Foundation requirements. Poetry as a literary genre, with emphasis on analysis of individual poems.

***390. Studies in Contemporary Literature (3)**

Reading and analysis of literary works, British and American, written since 1945. Topics, themes, limitations for each section will be announced in the *Schedule of Classes*. May be repeated to a maximum of 6 units with different topics.

***398. Modern Drama (3)**

Continental, English, and American drama from Ibsen to the present.

***404. Creative Writing: Creative Nonfiction (3)**

Prerequisites: ENGL 204 or consent of instructor. Writing creative nonfiction with detailed studies of published models with an emphasis on the creative process. May be repeated to a maximum of 6 units.

***405. Creative Writing: Short Story (3)**

Prerequisite: ENGL 205 or consent of instructor. Writing short stories, with a detailed study of published models and with emphasis on the creative process. May be repeated to a maximum of 6 units.

***406. Creative Writing: Poetry (3)**

Prerequisite: ENGL 206 or consent of instructor. Writing poetry, with a detailed study of published models and with emphasis on the creative process. May be repeated to a maximum of 6 units.

***407. Creative Writing: Novel (3)**

Prerequisite: Consent of instructor. Writing long fiction, with a detailed study of published models and with emphasis on the creative process. May be repeated to a maximum of 6 units.

***408. Writing the Screen Adaptation (3)**

Prerequisite: FEA 303 or 304 with a 'B' or better, or ENGL 405 or 407 with a 'B' or better, or consent of the instructor. Writing script adaptations, with a study of adaptation theory and successful adaptation models. May be repeated to a maximum of 6 units. Same course as FEA 408.

410./510. Theories of Writing and Literacy (3)

Prerequisite: ENGL 309 or 310 or consent of instructor. Focuses on several cross-disciplinary theories of producing written discourse. Studies how writing is learned, taught, viewed by the public, and used in social and academic interchange.

411. Research Methods in Rhetoric and Composition (4)

This course introduces students in English studies to (inter)disciplinary research methods sanctioned by the field of Rhetoric and Composition. It particularly focuses on the methods that have been motivating research in this field since 1985. These methods include archival, case study, ethnographic, historiographic, and teacher research. This course also offers students intensive practice in the processes of conducting and writing research for (inter)disciplinary and/or public audiences.

416. Technical Editing (4)

Prerequisites: Completion of the Foundation requirement and one Explorations course. An introduction to the editing of written technical and business communication formats such as manuals, brochures, booklets, and newsletters. Students will demonstrate competence in the principles of sentence-level clarity and style, of factual accuracy, and of document design and production in professional settings.

417. Proposal Writing (3)

Prerequisites: Completion of the Foundation requirement and one Exploration course, upper division standing. Intensive writing of proposals in their various forms as letters, memos, grant applications, etc.

418. Manual Writing (3)

Prerequisites: Completion of Foundation requirement. Writing of original manuals of various types in technical and professional fields. Company publications will be studied as models.

419. Writing in Science and Technology (3)

Prerequisites: Completion of the Foundation requirement and one Exploration course, upper division standing. Intensive practice in writing on topics in science and literature. Contemporary examples will be studied as models.

423./523. Semantics (3)

Study of meaning in language. Same course as LING 423.

426./526. History of the English Language (3)

Development of the English language from its beginnings to the present day. Same course as LING 426.

***431. Classical Background of English Literature (3)**

Greek and Roman literature, in translation, in relation to English literature; the interrelations of classical literature with philosophy and art.

- 432. Arthurian Literature: Medieval to Modern (3)**
Examination of the genesis, development, and popularity of stories about King Arthur and his knights from the earliest medieval texts to modern treatments of the legend.
- 435. Teaching Composition (3)**
Prerequisite: Consent of instructor. Intensive examination and study of composition teaching practices, research and evaluation in public schools, including community colleges.
- 436. Theories and Practices of Reading (3)**
Intensive investigation of theories and practices of reading with attention to how experienced and inexperienced readers construct text.
- 441. Women Writers of the Harlem Renaissance (3)**
Prerequisites: ENGL 100 and upper division status or consent of instructor. Explores the literature and lives of women authors of the American Harlem Renaissance Period of the 1920s. Examines the critical reception, relative obscurity, and current re-discovery of these writers. Utilizes theoretical essays, biographical narratives, historical documents, and media images. Same course as W/ST 441.
- 442. Sexing Chicana Literature (3)**
Prerequisites: ENGL100 and upper division status or consent of instructor. Studies how Chicana authors explore intersecting issues of race, class and gender. Focuses on the use of sexuality in Chicana writing, particularly with regard to cultural and literary stereotypes vs. experience and aesthetic practice. Themes will include desire, identity, empowerment through "traditional" roles, violence and the body, and other issues framed by historic and symbolic representations in Chicana Literature. Same as WST 442.
- 451./554. Medieval Literature of the British Isles (3)**
Representative selections of Old and Middle English prose and poetry read for the most part in modern English including Beowulf, the romance, medieval drama, Chaucer, and the ballad.
- 452./552. Literature of the Renaissance (1500-1603) (3)**
Prose and poetry of Marlowe, Sidney, Raleigh, Spenser, and other predecessors and contemporaries of Shakespeare, noting the influence of Humanism and the emergence of literary identity.
- 453./553. Literature of the Late Renaissance (1603-1660) (3)**
Poetry and prose (chiefly non-dramatic) of Milton, Bacon, Jonson, Donne and the 'Metaphysicals,' and their contemporaries.
- 455./555. English Literature of the Enlightenment (1660-1798) (3)**
Prose and poetry (chiefly non-dramatic) of Swift, Dryden, Pope, Johnson, Boswell, and their contemporaries, with emphasis on major satires such as *Gulliver's Travels* and *The Rape of the Lock*.
- 456./556. English Literature of the Romantic Period (1798-1832) (3)**
Poetry and prose (chiefly non-dramatic) of Blake, Wordsworth, Coleridge, Byron, Shelley, Keats, and their contemporaries, emphasizing the modern Romantic spirit, theories of literary art, and the concept of the self.
- 458./558. English Poetry and Prose of the Victorian Age (1832-1900) (3)**
Poetry and prose of Tennyson, Browning, Arnold, Carlyle, Mill, and others, emphasizing literary, social and political issues, and religious controversies.
- 459./559. English Literature of the Twentieth Century (1900-Present) (3)**
Prose and poetry of Shaw, Conrad, Yeats, Lawrence, Joyce, Woolf, and others, emphasizing artistic experimentation and the development of modern value systems.
- *461. Essentials of Old/Middle English (3)**
The Old English and Middle English languages and dialects are studied through the exploration of representative literature.
- 462./562. Chaucer (3)**
Works of Geoffrey Chaucer in Middle English.
- *463. Shakespeare II (3)**
Prerequisite: ENGL 363. Advanced study of some of the plays of Shakespeare.
- 466./566. Irish Literature in English (3)**
Major Irish authors from the Celtic Revival to the present, including W.B. Yeats, James Joyce, Samuel Beckett, Seamus Heaney, Eavan Boland. The literature will be placed in its historical and political contexts, paying particular attention to the relationship between politics and literature, the status of women, and questions of national identity.
- 467A,B./567A,B. The English Novel (3,3)**
History and development of long prose fiction in the British Isles to and since 1832.
- 468./568. English Drama (3)**
Readings from the history of English drama, excluding Shakespeare, including Marlowe, Jonson, and Restoration comedy.
- *469. Critical Studies in Major English Writers (4)**
Prerequisites: At least senior standing, 12 units of upper-division English. Intensive study of one to three major English authors. May be repeated to a maximum of 8 units with different authors, but no more than 4 units may be used to satisfy the requirements for the English major. Topics to be announced in the *Schedule of Classes*.
- 470. American Ethnic Literatures (3)**
Prerequisites: ENGL 375 or consent of instructor. American Ethnic Literatures is an advanced course in the examination of issues in the field of American ethnic writing.
- 472. American Literature: 1820-1865 (3)**
An intensive examination of the major authors and works, along with newly recovered texts, from the period that is often called the "American Renaissance."
- 473. American Literature: 1865-1918 (3)**
An in-depth exploration of leading developments in poetry, the novel, the short story, and non-fictional prose in the United States between the Civil War and World War I.
- 474./574. Twentieth Century American Literature (3)**
American literature from about 1914 to the present.
- 475./575. The American Short Story (3)**
History and development of the short story and its criticism in the United States.
- 476./576. American Poetry (3)**
History and development of poetry and its criticism in the United States.
- 477A,B./577A,B. The American Novel (3,3)**
History and development of the novel and its criticism in the U. S. to and since the 1920's.
- 478./578. American Drama (3)**
History and development of drama and its criticism in the United States.
- *479. Critical Studies in Major American Writers (4)**
Prerequisites: At least senior standing, 12 units of upper-division English including ENGL 270A,B. Intensive study of one to three major American authors. May be repeated to a maximum of 8 units with different authors, but no more than 4 units may be used to satisfy the requirements for the English major. Topics to be announced in the *Schedule of Classes*.
- 481. Children's Literature (3)**
Survey of literature suitable for children.
- 482. Literature for Adolescents (3)**
Prerequisite: One college course in literature. Survey of literature suitable for adolescents.

483. Women in the Early Modern Era (3)

Prerequisites: Study of representations and realities of women's lives, 1500-1800, from international and interdisciplinary perspectives. Critical methodology of history and literature; analysis of literary and historical texts to explore women's experiences of law and economics; religion; education and culture; marriage, sex, and health; politics and revolution.

484./584. Contemporary Literary Theory (3)

Study of the principal theories of literature including structuralism, hermeneutics, theory of genre, and theory of criticism.

***488. Topics in Rhetoric and Writing Studies (3)**

Prerequisites: ENGL 100. Intensive study of a special topic in the field of rhetoric, composition, and writing studies. Topics to be announced in the *Schedule of Classes*.

491. Applied Technical Writing (1-3)

Prerequisite: Admission to Certificate Program in Technical and Professional Communication. Writing and editing technical reports and papers. Independent production of a report in a technical or scientific area under faculty supervision. May be repeated to a maximum of 4 units.

492A-B. Internship Technical - Professional Writing and Editing (1-3)

Prerequisite: Admission to Certificate Program in Technical and Professional Communication. At least 90 hours writing and editing with cooperating agencies and companies on- and off-campus under direction and with evaluation of faculty in consultation with supervisors of the participating agency or company. May be repeated to a maximum of 4 units.

***496. California Writing Project (1-4)**

Specifically designed for teachers, prospective teachers, school administrators, and writers. Focus is on successful classroom practices in teaching writing; writing and responding to others' writing; and on the theory and research behind successful literacy training. CSULB - South Basin Writing Project is an affiliate of both the California and National Writing Projects.

497. Directed Studies in Composition (3)

Prerequisite: One upper division writing course in English or consent of instructor. Theory and practice of writing and language instruction. Recommended for prospective K-12 and college-level teachers. On-site participation in an educational setting required as a basis for research project.

***498. Topics in English (3)**

Intensive exploration of topics in language and literature. May be repeated to a maximum of 12 units with different topics, but no more 6 units may be applied to the 41 units required for the English major. Topics to be announced in the *Schedule of Classes*.

A. American Novel/Film

C. Bible in American Literature

G. Hemingway on Film

K. Literature and Psychoanalysis

L. Poetry and the Self

O. Short Fiction/Film

499. Directed Studies (1-3)

Prerequisite: Consent of instructor. Independent study undertaken under the supervision of a faculty member. May be repeated to a maximum of 4 units. Not applicable toward the Master of Arts in English.

Graduate Level

See Comparative World Literature and Classics Department for course offerings applicable to the M.A. in English.

505A. Seminar in Fiction Writing (4)

Prerequisite: Admission to the MFA in Creative Writing. Discussion, criticism, and detailed evaluation of works in progress. Letter grade only (A-F).

505B. Seminar in Fiction Writing (4)

Prerequisites: Admission to the MFA in Creative Writing and ENGL 505A. Discussion, criticism, and detailed evaluation of works in progress. Letter grade only (A-F).

506A. Seminar in Poetry Writing (4)

Prerequisite: Admission to the MFA in Creative Writing. Discussion, criticism, and detailed evaluation of works in progress. Letter grade only (A-F).

506B. Seminar in Poetry Writing (4)

Prerequisites: Admission to the MFA in Creative Writing and ENGL 506A. Discussion, criticism, and detailed evaluation of works in progress. Letter grade only (A-F).

510./410. Theories of Writing and Literacy (3)

Prerequisite: ENGL 309 or 310 or consent of instructor. Focuses on several cross-disciplinary theories of producing written discourse. Studies how writing is learned, taught, viewed by the public, and used in social and academic interchange.

511. Research Methods in Rhetoric and Composition (4)

This course introduces students in English studies to (inter)disciplinary research methods sanctioned by the field of Rhetoric and Composition. It particularly focuses on the methods that have been motivating research in this field since 1985. These methods include archival, case study, ethnographic, historiographic, and teacher research. It also offers students intensive practice in the processes of conducting and writing research for (inter)disciplinary and/or public audiences.

523./423. Semantics (3)

Study of meaning in language. Letter grade only (A-F).

526./426. History of the English Language (3)

Development of the English language from its beginnings to the present day. Letter grade only (A-F).

535. Theories and Practices in Composition (3)

Prerequisite: ENGL 435 or consent of instructor. Focuses on the formation of composition studies in the latter half of the Twentieth Century. Studies relationships among theories, practices, and research concerned with the teaching of writing, particularly at the college level. Letter grade only (A-F).

537. Special Topics (3)

Designed for in-service teachers. Intensive studies and research in special, timely topics (as announced in the *Schedule of Classes*) related to the teaching of English. May be repeated to a maximum of 6 units with different topics.

550. Old English Language and Literature (4)

Prerequisite: ENGL 461 or consent of instructor. Beowulf and other representative selections from Anglo-Saxon literature in the original language. Letter grade only (A-F).

551. Middle English Language and Literature (4)

Prerequisite: ENGL 461 or consent of instructor. Chaucer and other representative selections from Middle English literature in the original language. Letter grade only (A-F).

552./452. Literature of the Renaissance (1500-1603) (3)

Prose and poetry of Marlowe, Sidney, Raleigh, Spenser and other predecessors and contemporaries of Shakespeare, noting the influence of Humanism and the emergence of literary identity. Letter grade only (A-F).

553./453. Literature of the Late Renaissance (1603-1660) (3)

Poetry and prose (chiefly non-dramatic) of Milton, Bacon, Jonson, Donne and the "Metaphysicals" and their contemporaries. Letter grade only (A-F).

554./451. Medieval Literature of the British Isles (3)

Representative selections of Old and Middle English prose and poetry read for the most part in modern English including Beowulf, the romance, medieval drama, Chaucer, and the ballad. Letter grade only (A-F).

555./455. English Literature of the Enlightenment (1660-1798) (3)

Prose and poetry (chiefly non-dramatic) of Swift, Dryden, Pope, Johnson, Boswell, and their contemporaries, with emphasis on major satires such as *Gulliver's Travels* and *The Rape of the Lock*. Letter grade only (A-F).

556./456. English Literature of the Romantic Period (1798-1832) (3)

Poetry and prose (chiefly non-dramatic) of Blake, Wordsworth, Coleridge, Byron, Shelley, Keats, and their contemporaries, emphasizing the modern Romantic spirit, theories of literary art, and the concept of the self. Letter grade only (A-F).

558./458. English Poetry and Prose of the Victorian Age (1832-1900) (3)

Poetry and prose of Tennyson, Browning, Arnold, Carlyle, Mill, and others, emphasizing literary, social and political issues, and religious controversies. Letter grade only (A-F).

559./459. English Literature of the Twentieth Century (1900-Present) (3)

Prose and poetry of Shaw, Conrad, Yeats, Lawrence, Joyce, Woolf, and others, emphasizing artistic experimentation and the development of modern value systems. Letter grade only (A-F).

562./462. Chaucer (3)

Works of Geoffrey Chaucer in Middle English. Letter grade only (A-F).

566./466. Irish Literature in English (3)

Prerequisites: Major Irish authors from the Celtic Revival to the present, including W.B. Yeats, James Joyce, Samuel Beckett, Seamus Heaney, Eavan Boland. The literature will be placed in its historical and political contexts, paying particular attention to the relationship between politics and literature, the status of women, and questions of national identity.

567A,B./467A,B. The English Novel (3,3)

History and development of long prose fiction in the British Isles to and since 1832. Letter grade only (A-F).

568./468. English Drama (3)

Readings from the history of English drama, excluding Shakespeare, including Marlowe, Jonson, and Restoration comedy. Letter grade only (A-F).

572. American Literature: 1820-1865 (3)

An intensive examination of the major authors and works, along with newly recovered texts, from the period that is often called the "American Renaissance."

573. American Literature: 1865-1918 (3)

An in-depth exploration of leading developments in poetry, the novel, the short story, and non-fictional prose in the United States between the Civil War and World War I.

574./474. Twentieth Century American Literature (3)

American literature from about 1914 to the present. Letter grade only (A-F).

575./475. The American Short Story (3)

History and development of the short story and its criticism in the United States. Letter grade only (A-F).

576./476. American Poetry (3)

History and development of poetry and its criticism in the United States.v

577A,B./477A,B. The American Novel (3,3)

History and development of the novel and its criticism in the United States to and since the 1920's. Letter grade only (A-F).

578./478. American Drama (3)

History and development of drama and its criticism in the United States. Letter grade only (A-F).

583. Special Topics in Literature (3)

Intensive studies in special topics in literary theory, techniques, types, genres, modes, themes, movements and in the relations of literature with other arts and disciplines, as announced in the *Schedule of Classes*. May be repeated to a maximum of 6 units with different topics.

B. Women Writers

E. Modes of Fantasy

584./484. Contemporary Literary Theory (3)

Study of the principal theories of literature including structuralism, hermeneutics, theory of genre, and theory of criticism. Letter grade only (A-F).

590. Directed Reading (3)

Students will be assigned a reading list developed with the assistance of faculty. There will be a series of conferences in which the works are discussed with the instructor. A comprehensive paper will be due at the end of the semester. Will be taken for two semesters during the student's second year of residency in the MFA program. Letter grade only (A-F). May be repeated to a maximum of 6 units.

598. Directed Studies (1-3)

Prerequisites: Baccalaureate degree, consent of instructor. Independent creative writing activity under the supervision of a creative writing faculty member. May be repeated to a maximum of 6 units. Letter grade only (A-F).

605A. Advanced Seminar in Fiction Writing (4)

Prerequisites: Admission to the MFA in Creative Writing, ENGL 505A, and 505B. Discussion, criticism, and detailed evaluation of works in progress. Letter grade only (A-F).

605B. Advanced Seminar in Fiction Writing (4)

Prerequisites: Admission to the MFA in Creative Writing, ENGL 505A, 505B, and 605A. Discussion, criticism, and detailed evaluation of works in progress. Letter grade only (A-F).

606A. Advanced Seminar in Poetry Writing (4)

Prerequisites: Admission to the MFA in Creative Writing, ENGL 506A, and 506B. Discussion, criticism, and detailed evaluation of works in progress. Letter grade only (A-F).

606B. Advanced Seminar in Poetry Writing (4)

Prerequisites: Admission to the MFA in Creative Writing, ENGL 506A, 506B, and 606A. Discussion, criticism, and detailed evaluation of works in progress. Letter grade only (A-F).

652. Seminar in the English Renaissance (4)

Prerequisite: ENGL 696 (may be taken concurrently). Intensive studies in the literature of the period, chiefly Elizabethan. Letter grade only (A-F).

653. Seminar in the Age of Milton (4)

Prerequisite: ENGL 696 (may be taken concurrently). Intensive studies in English literature of the Stuart and Commonwealth periods, including Milton. Letter grade only (A-F).

655. Seminar in Restoration and Eighteenth Century Literature (4)

Prerequisite: ENGL 696 (may be taken concurrently). Intensive studies in English literature of the Restoration and eighteenth century. Letter grade only (A-F).

656. Seminar in Romantic Literature (4)

Prerequisite: ENGL 696 (may be taken concurrently). Intensive studies in English literature of the Romantic period. Letter grade only (A-F).

657. Seminar in Victorian Literature (4)

Prerequisite: ENGL 696 (may be taken concurrently). Intensive studies in English literature of the Victorian period. Letter grade only (A-F).

659. Seminar in Twentieth Century English Literature (4)

Prerequisite: ENGL 696 (may be taken concurrently). Intensive studies in English literature from about 1900 to the present. Letter grade only (A-F).

672. Seminar in the Nineteenth Century American Renaissance (4)

Prerequisite: ENGL 696 (may be taken concurrently). Intensive studies in American literature from about 1820 to about 1865. Letter grade only (A-F).

673. Seminar in American Realism (4)

Prerequisite: ENGL 696 (may be taken concurrently). Intensive studies in the development of realism in American literature. Letter grade only (A-F).

674. Seminar in Twentieth Century American Literature (4)

Prerequisite: ENGL 696 (may be taken concurrently). Intensive studies of 20th Century American writers. Letter grade only (A-F).

681. Seminar in Major Authors (4)

Prerequisite/Corequisite: ENGL 696. Intensive studies in the works of one to three specific major authors. Not open to students with credit in ENGL 467 or 479 covering the same author. May be repeated to a maximum of 12 units with different authors. Topics to be announced in the *Schedule of Classes*. Letter grade only (A-F).

- A. Shakespeare
- B. Chaucer
- C. Yeats
- E. Joyce
- F. John Fowles

683. Seminar in Special Topics in English Studies (4)

Prerequisite: ENGL 696 (may be taken concurrently). Intensive explorations of topics in English Studies. May be repeated to a maximum of 8 units with different topics. Topics to be announced in the *Schedule of Classes*. Letter grade only (A-F).

- A. Feminism/Modernism
- B. Autobiography
- C. Postmodernism and the Novel
- D. Current Issues in Rhetoric and Composition
- E. Teaching Literacy
- F. The Irish Short Story
- G. Nineteenth Century American Women Writers, 1850-1900

685. Seminar in Rhetorical History and Theory (4)

Prerequisites: ENGL 100. Intensive study of rhetorical history and theory from ancient to contemporary time.

696. Seminar in Literary Criticism and Research (4)

Study of major critical approaches to literature and basic literary research methods. Introduction to the discipline of literary criticism, various critical methodologies, techniques of bibliography and research, important literary reference works. Writing of critical research papers. A student will not be allowed to take ENGL 696 unless admitted to the M.A. program. (An English M.A. candidate may not be enrolled in any other 600 course without completion of or concurrent enrollment in ENGL 696.) Letter grade only (A-F).

697. Directed Research (1-3)

Prerequisites: ENGL 696 and consent of instructor. Individual research or intensive study under the guidance of a faculty member. Letter grade only (A-F).

698. Thesis (1-6)

Prerequisites: ENGL 696 and consent of instructor. Planning, preparation, and completion of a thesis under supervision of a faculty committee. Must be advanced to candidacy. Must be taken for a total of 6 units.

Courses (ALP)

American Language Program (ALP) courses are for non-native speakers of English. ALI courses are recommended for international students (students on F1 visas). ALP courses are recommended for all other non-native speakers of English.

145. American Language Advanced I (3)

Prerequisite: Non-native speakers who score 137 or below on the English Placement Test, or 500 or below on the Exam in English as a Second Language, and who have not taken equivalent writing courses in another department, are eligible for enrollment in this course. Counts toward elective credit for undergraduates. Does not count toward graduation but does count toward course load credit for graduates. A basic course in writing, offering intensive practice in every stage of the writing process from generating ideas to final proofreading. Reviews and teaches organizational strategies and includes strategies for paragraph and sentence development and for making appropriate word choices. Teaches conventional mechanics, spelling and the grammar of standard edited written English.

150. American Language Advanced II (3)

Prerequisite: Non-native speakers who score between 138 through 150 on the English Placement Test, between 501 through 550 on the Exam in English as a Second Language, or successful completion of ALI/ALP 145 with a grade of "C" or better. Counts toward elective credit for undergraduates. Does not count toward graduation but does count toward course load credit for graduates. Includes critical/analytical reading and expository writing with emphasis on longer essays. Analysis and practice of standard rhetorical modes of essay development.

COLLEGE OF ENGINEERING

Dean

Michael K. Mahoney

Assistant to the Dean (562) 985-5123

Vickie Messina

Associate Dean for Instruction

Mihir K. Das

Associate Dean for Strategic Planning and Facilities

Tesfai Goitom

Associate Dean for Administration and Fiscal Operations

Linda Tiggs-Taylor

Assistant to the Associate Deans (562) 985-8032

Kim Truesdelle

Development (562) 985-5840

Lisa Van Ingen Pope, Director

Administrative Services (562) 985-8218

Website

<http://www.csulb.edu/coe>

View the CSU, Long Beach *Catalog* on-line at www.csulb.edu by clicking on "Academics" and then "CSULB Catalog."

The College of Engineering offers four-year curricula leading to Bachelor of Science degrees in the disciplines of engineering, computer science, and engineering technology as well as master's and Ph.D. degree programs. The B.S. programs provide broad education and training for entry to the professions and for continuing academic work toward advanced degrees. Master of Science degrees are offered in aerospace, civil, computer, electrical and mechanical engineering, and in computer science. The Master of Science in Engineering is also offered in interdisciplinary areas. The Ph.D. in Engineering and Industrial Applied Mathematics is offered jointly with The Claremont Graduate University. Undergraduate programs provide opportunities to specialize in the areas of aerospace, biomedical, chemical, civil, computer, electrical, industrial-management, manufacturing, materials and mechanical. The Bachelor's programs in engineering, computer science and engineering technology are accredited by the appropriate accreditation commission of the Accreditation Board for Engineering and Technology (ABET), 111 Market Place, Suite 1050, Baltimore, MD 21202 – telephone: 410/ 347-7700; website: <http://www.abet.org>. The aerospace, chemical, civil, computer, electrical and mechanical engineering programs are accredited by the Engineering Accreditation Commission (EAC) of ABET. The computer science program is accredited by the Computing Accreditation Commission (CAC) of ABET. The computer, electronics and manufacturing technology programs are accredited by the Technology Accreditation Commission (TAC) of ABET. (See detailed listing of the accredited programs on the next page). Several certificate programs are also offered. Evening sections of most of the regular courses are offered to help the working students.

Engineering Facilities

The engineering and engineering technology buildings house the College of Engineering in a complex of several adjacent buildings, including a modern six-story Engineering and Computer Science (ECS) building, providing modern laboratories and offices for faculty. The buildings feature advanced and comprehensive engineering, computer science, and technology facilities, totalling over 130,000 square feet of laboratory space.

Engineering Advisory and Development Councils

The College of Engineering has Advisory and Development Councils, one for the entire college, one for each of the six departments, and one for the MESA program. These councils consist of outstanding engineers and executives from industry and government in Southern California. Their function is to form a liaison between the University and industry and to keep the administration and faculty informed of modern engineering practices. This helps to ensure that the curricula are kept up-to-date. They also advise on placement opportunities before and after graduation.

Programs at a Glance

ABET Accreditation

The Bachelor of Science degrees followed by an asterisk (*) are accredited by EAC, CAC or TAC of the Accreditation Board for Engineering and Technology (ABET) as appropriate.

Baccalaureate Degrees

- B.S. in Aerospace Engineering*
- B.S. in Chemical Engineering *
- B.S. in Civil Engineering *
- B.S. in Computer Engineering*
- B.S. in Computer Science*
- B.S. in Construction Engineering Management
- B.S. in Electrical Engineering *
- B.S. in Mechanical Engineering *
- B.S. in Engineering
 - Option in Industrial-Management Engineering
 - Option in Materials Engineering
 - Option in Biomedical and Clinical Engineering
 - Option in Audio Engineering
 - Option in Theme Park Engineering
- B.S. in Engineering Technology
 - Option in Environmental Technology
 - Option in Manufacturing Technology*
 - Option in Technology and Engineering Education
 - Option in Quality Assurance Technology
- B.S. in Electronics and Computer Engineering Technology
 - Option in Electronics Technology*
 - Option in Computer Technology*

Minors

- Minor in Computer Science
- Minor in Computer Science Applications
- Minor in Environmental Engineering
- Minor in Web and Technology Literacy

Graduate Degrees

- M.S. in Aerospace Engineering
- M.S. in Civil Engineering
- M.S. in Computer Science
 - Option in Computer Engineering
 - Option in Computer Science
- M.S. in Electrical Engineering
- M.S. in Engineering (Interdisciplinary)
- M.S. in Engineering Management (on-line) Jointly with CSUDH
- M.S. in Mechanical Engineering
- Civil Engineer (professional degree)
- Ph.D. in Engineering and Industrial Applied Mathematics (jointly with The Claremont Graduate University)

For detailed descriptions, see listings for Chemical Engineering, Civil Engineering, Computer Engineering and Computer Science, Electrical Engineering, Engineering Technology Programs, and Mechanical and Aerospace Engineering.

Students should submit applications early in August for the following Spring Semester and November for the following Fall semester.

Certificate Programs

- Certificate in Heating, Ventilating and Air-Conditioning Engineering (MAE)
- Certificate in Waste Engineering and Management (CE)
- Certificate in Energy Conversion and Power Systems Engineering (MAE and EE)
- Certificate for Industrial Plastics Processing and Design (MAE and ChE)
- Certificate in Facilities Operations (Civil Engineering)
- Certificate in Safety Operations (Chemical Engineering)
- Certificate in Aerospace Manufacturing (MAE)
- Certificate in Systems Engineering (MAE)
- Certificate in Web and Technology Literacy (CECS)

Mathematics, Engineering, Science, Achievement (MESA) Center

The MESA Center is a program that serves low income and educationally disadvantaged students at the pre-college and college levels. The program is funded by the State of California and also receives program donations from private industry. The MESA Center is comprised of two distinct programs with operations based in the College of Engineering, the MESA Schools Program (MSP) and the MESA Engineering Program (MEP). The MESA Schools Program (MSP) partners with middle and high schools in the Los Angeles basin area to prepare students to attend college. MSP provides academic support services to over one thousand pre-college students with the primary objective of increasing future enrollment at the university level in the disciplines of mathematics, engineering and science. The MESA Engineering Program (MEP) provides non-remedial academic support services to matriculated college students. The major objectives of MEP are to support the recruitment, retention and graduation of a select campus student population. The MESA Engineering Advisory and Development Council (MEADC) includes a membership of industry representatives from local area businesses with an interest in promoting the educational experience of low income and underrepresented students.

Academic Standards

Preparation for Admission to the College of Engineering

The high school student planning to enter engineering, engineering technology, or computer science is advised to pursue a program with courses in biology, physics, chemistry, advanced algebra, and trigonometry. In addition, the general requirements for admission to the University must be satisfied. Deficiencies in some of the above areas may result in an extension of the time required to complete a program in engineering, technology, or computer science. Full-time students can complete any baccalaureate degree in engineering, engineering technology, or computer science in four years.

The curricula are also designed to accommodate students transferring from other colleges such as the community colleges and liberal arts colleges. Full-time students who complete two years at a community college can complete the B.S. degrees in two years. Transfer students should note and follow, where possible, the appropriate curriculum as outlined in later sections. None of study programs are impacted. Only general admission requirements of University apply and must be met.

General Academic Requirements

In addition to technical knowledge, skills and training, the College of Engineering values good communication skills. The University in its General Education courses provides the basic communication skills and measures them with the graduation requirement of the Writing Proficiency Examination. Students are advised that all College of Engineering courses and student course work require not only correct analysis, competent design and professional presentation but also clear and concise written and oral communication in English. While individual specific course requirements vary depending on the nature of the course, good communication skills, both in written and oral reports, are expected of all students and will normally constitute a portion of the student's grade.

A grade of "C" or better must be achieved in prerequisites for courses required of engineering majors. English 100 or equivalent is a prerequisite to upper division laboratory courses.

Admission to any one of the graduate degree programs in the College of Engineering normally requires a minimum GPA of 2.5 in the last 60 units taken.

A student must pass the Writing Proficiency Examination (WPE) before qualifying for any degree.

Letter Grade Policy

Letter grades ("C" or better) are required for prerequisites for required courses of Engineering, Computer Science, and Engineering Technology majors.

Required English, Speech, and Upper Division Interdisciplinary (IC) courses must be taken for a Letter Grade, not Credit/No Credit.

Concurrent and/or Summer Enrollment in Another College

Students who wish to take coursework in a community college or another college to meet curricular requirements while enrolled as an undergraduate in the College of Engineering must petition the appropriate department for prior approval to enroll in specific courses. This policy is for either concurrent enrollment or summer enrollment. University policy must also be complied with. (See "Concurrent Enrollment" and "Transfer of Undergraduate Credit" in this *Catalog*.) Courses not receiving prior approval may not be accepted for credit by the department.

Dual Degree Program

Students wishing to combine an engineering degree with one in business, education, fine arts, humanities or the sciences may enter the Dual Degree Program. The College of Engineering at CSULB has agreements with other Colleges within the University and with other institutions which allow students to do this. After three years at the first institution, students transfer to CSULB as juniors to complete the two final years of engineering study. At the end of the first year at CSULB, students who have completed all of the requirements for their first degree are awarded those degrees by the appropriate College or institution. At the end of their fifth year, students who have completed all engineering requirements receive their engineering degrees. As an option, students may choose to complete both degrees simultaneously.

Course Availability

Full-time students without deficiencies in the principal College of Engineering programs can comfortably complete their degree requirements in four years, or in two years after completing two years at a community college. Most of the required courses are offered in multiple sections every semester. In addition, many required courses are also offered during Summer Sessions.

Requirements for the ABET Accredited Degree Programs

Students working for an ABET accredited degree will meet with an academic advisor in their department as early as possible to make themselves fully aware of the ABET requirements, not only in General Education as outlined above, but also in other areas, such as math/science requirements. Requirements are subject to change and current requirements for all programs are posted at <http://www.abet.org>.

Bachelor of Science in Engineering

Option in Audio Engineering (code COE_BS02) (127 units)

This option is designed to train students for work in the audio engineering industry. The curriculum in the College of the Arts will show students in the program how the arts and entertainment industry uses modern technology in the recording, processing and creation of sound. The curriculum in the College of Engineering will teach students how to analyze and design the electronic and computer components used in the arts and entertainment industry.

As this option is not ABET accredited, students are urged to either take a second major in Computer Engineering (follow the Computer Engineering Track) or Electrical Engineering (follow the Electrical Engineering Track)

Requirements

Computer Engineering Track

Lower Division: BIOL 207, PHYS 151, MATH 122, 222, MUS 190, EE 210, 210L, CECS 174, 201, 228, 261, 274.

Upper Division: MATH 323, 370A, 380, FEA 307, ENGR 340, EE 386, 486, CECS 301, 311, 325, 346, 347, 360, 447, 460A, 497, two courses from: MUS 343, 370, THEA 449, EE 428; plus an approved technical elective to a total of 127 units.

FOUR YEAR PLAN TO COMPLETE THE B.S. in AUDIO ENGINEERING (COE_BS02) - Computer Engineering Track

FAQ Concerning Road Maps for Completion of Undergraduate Degrees

For each undergraduate major, the on-line Catalog shows plans for scheduling all required courses to complete the degree in four, five, or six years.

While CSULB will make every effort to schedule classes at the times shown in the plans, we cannot guarantee that courses will be available in specific semesters. It is possible that shortage or budget or of personnel will make it impossible to offer as many classes as we would wish.

The plans are not substitutes for working with an advisor. You are strongly encouraged to see an advisor when planning your program each term.

I am a freshman. Do I have to choose now whether to follow the four, five, or six-year plan?

No. Most freshmen take 12-15 units. You need at least 12 units to receive full financial aid. With experience, you will be able to judge how heavy a load you find comfortable. This will depend on your outside obligations, such as a job, and on your personal circumstances. In theory, each unit requires three hours a week, including preparing for class, attending class, and completing assignments. Use these guidelines to budget your time and plan an appropriate schedule.

Must I take the courses in the semesters shown on the plan?

The plan shows one possible way of completing all requirements for the degree. Consult your advisor about whether it is essential to take a given course in the semester shown. There are some rules to keep in mind:

1) You can take the General Education Foundation courses (Composition, Oral Communication, Critical Thinking, Mathematics) in any semester in the first 36 units of baccalaureate-level course work completed at CSULB.

2) You cannot take upper division courses until you have completed at least 30 units. (Exceptions can be made for students who already have completed advanced study in the subject.) You cannot take General Education Capstone courses until you have completed at least 60 units.

3) For some majors it is essential to complete courses in the correct sequence. You cannot take a more advanced course until you have completed the prerequisite course(s).

4) You must complete all requirements for admission to impacted majors within the first 60 units.

I have been told that I must take one or more pre-baccalaureate courses. How can I plan my program?

Your advisor at SOAR can help you identify which courses must be postponed. You must still complete the minimum number of baccalaureate units required for the degree.

You may be able to catch up by taking additional courses in later semesters or by taking classes in summer or winter session, or you may choose to spend an additional semester completing the program. You cannot begin the sequence of required courses for some majors until you are ready for baccalaureate-level Mathematics. See your major advisor to develop a plan for scheduling the required courses.

I didn't complete the exact list of courses shown. Can I still graduate on time?

The answer depends on your major and on what courses you have completed. The plans are not rigid requirements; they are only intended to provide guidance in planning a program. There are many reasons for students to follow a different pattern, such as changing the major, choosing to take fewer classes in a given semester, choosing to complete a minor or a second major. See your advisor for help in planning a program that will work for you.

If I follow the plan, will I have all requirements for graduation completed?

The plans include the specific courses required for the major. For some majors, there are restrictions on the choice of major electives. It is important that you select General Education courses to meet the required distribution pattern. You may need to take an additional General Education course to complete the minimum number of units required for each category. This is likely to happen if you took three-unit courses in Category B, Physical Universe.

Electrical Engineering Track

Lower Division: BIOL 207, PHYS 151, MATH 122, 123, 224, MUS 190, ENGR 202, CECS 174, EE 201, 211, 211L.

Upper Division: MATH 370A, FEA 307, ENGR 340, CE 370, EE 310, 330, 346, 347, 370, 370L, 382, 386, 430, 460, 486, 489 or 490, two courses from MUS 343, 370, THEA 449, EE 428; plus an approved technical elective to a total of 127 units.

Option in Theme Park Engineering (code COE_BS03) (132 units)

This option is designed to prepare students to work as engineers in theme parks or amusement facilities, and the industries that support them. The program of study includes courses primarily from Electrical Engineering, with additional training from the Civil and Mechanical Engineering Departments, and covers topics in electrical power, and electrical, mechanical, hydraulic, and pneumatic control.

As this option is not ABET accredited, students are urged to also obtain an ABET accredited second major in Electrical Engineering.

Requirements

BIOL 207, CHEM 111A, MATH 122, 123, 224, 370A, PHYS 151, CECS 174, ENGR 202, EE 201, 210, 210L, 211, 211L, 310, 330. Each of the foregoing courses must be passed with a grade of "C" or better. Other required courses are CE 335, 370, EE 346, 347, 350, 350L, 370, 370L, 450, 452, 453, 490, MAE 172, 330; MAE 438 or 490B or 490E; ET 365, 365L, plus an approved technical elective to a total of 132 units.

Minor in Environmental Engineering (code COE_UM01)

This interdisciplinary Minor in Environmental Engineering is designed for undergraduates from various engineering and science backgrounds who are interested in applying engineering approaches to environmental issues. Course-work in the minor focuses on engineering solutions to problems in preserving the quality of air, water, and soil by developing procedures and designing processes, consistent with current government regulation, to improve the environment and prevent pollution.

Requirements

A minimum of 6 units selected from the following core: CH E 475 or C E 364; CH E 455 or C E 469. Additional courses to complete the 18 unit minor may be selected from: CH E 415, 445, 465, 485; C E 466; MAE 490C.

Most of the courses in the minor require some background in engineering and/or chemistry. Upper division students majoring in Biology, Chemistry, Chemical Engineering, Civil Engineering, or Mechanical Engineering may have sufficient background to select from the above choices without needing additional prerequisites. Those majoring in other branches of science and engineering may need several additional courses in engineering and/or chemistry to meet prerequisite requirements of courses in this minor. All prerequisites to the courses in the minor must be completed with a grade of "C" or better.

GRADUATE PROGRAMS

Graduate Program Director

Mihir K. Das, Associate Dean for Instruction

Master of Science in Engineering (code COE_MS01)

The College of Engineering offers graduate study programs for the Master of Science in Engineering degree. Typical tasks and responsibilities undertaken by students in the curriculum would not fall within one of the traditional specialties in engineering, e.g. aerospace, chemical, civil, electrical and mechanical engineering, or computer science and engineering. The student may pursue an interdisciplinary program, approved by a Graduate Advisor, by selecting courses from the various departments of engineering. Additional information concerning the programs, special facilities, laboratories and research possibilities may be obtained from the College of Engineering.

Prerequisites

1. A bachelor's degree in an ABET accredited curriculum in engineering with a minimum GPA of 2.5; or
2. A bachelor's degree with a minimum GPA of 2.5 in engineering, mathematics, a natural science or other discipline with the requirement that essential undergraduate prerequisites in engineering be satisfied;
3. Graduate students must consult with a graduate advisor, with whom they will be working, for information concerning procedures and requirements for appropriate approval of their courses of study prior to enrolling in their graduate programs.

4. The Writing Proficiency Examination (WPE) must be passed during the first semester in residence unless taken and passed previously. Courses taken after the first semester without having passed the WPE will not be counted toward the graduate degree.

Advancement to Candidacy

1. Removal of all undergraduate deficiencies as determined by the Graduate Advisor;
2. Students may, at the discretion of the Graduate Advisor, be required to take examinations in some chosen areas;

Requirements

1. Completion of a minimum of 30 units beyond the bachelor's degree in upper division and approved graduate courses, including:
 - A. A minimum of 18 units of 500 and/or 600 level courses in engineering;
 - B. Six units of electives selected from approved upper division (400-level) or graduate courses from appropriate areas;
 - C. Completion of an acceptable thesis or project and/or comprehensive examination.

Note: Students are strongly advised to read and be familiar with the campus regulations described under "Graduate Programs" elsewhere in this *Catalog*.

Master of Science in Engineering Management (code COE_MS02)

Program Directors

Mihir K. Das, Associate Dean for Instruction, CSULB College of Engineering

Kenneth Poertner, Director of Graduate Programs, CSUDH School of Business and Public Administration

The Master of Science in Engineering Management (MSEM) is a Pilot Program effective from Fall 2002 to Fall 2007. It is jointly offered by the College of Engineering at California State University, Long Beach (CSULB) and the School of Business and Public Administration at California State University, Dominguez Hills (CSUDH). The MSEM degree program is offered entirely over the Internet.

The MSEM is an interdisciplinary degree designed to integrate the development of management and engineering skills focusing on problem solving in the synthesis of technical, financial, and organizational requirements for engineering projects in a rapidly changing environment. The College of Engineering at CSULB has the primary responsibility for the engineering component of the program, and similarly, the School of Business and Public Administration at CSUDH has the primary responsibility for the business and management component of the program.

Degree Designation

The degree is designated as the Master of Science in Engineering Management and is granted at California State University, Long Beach in the name of the two institutions in accordance with an agreement between both campuses of the California State University system. The diploma indicates the dual nature of the degree and specifies that it be granted only when requirements in both subject areas, as specified by the collaborating institutions, have been satisfied.

Program Supervision

Overall program supervision is the joint responsibility of the Associate Dean for Instruction, CSULB College of Engineering and the Director of Graduate Programs, CSUDH School of Business and Public Administration. The faculty guidance committees on both campuses will monitor the curriculum changes as needed. Students must be admitted to both institutions jointly.

Admission Requirements

1. A bachelor's degree in an ABET accredited curriculum in engineering or engineering related areas with a minimum GPA of 2.5 is required to enter the MSEM program. In exceptional cases, an applicant with a non-engineering degree with substantial technical experience may be admitted at the discretion of the Program Directors. Foreign students must meet equivalent standard.
2. A minimum of two (2) years of professional engineering experience and demonstration of sufficient background to perform graduate study in business.
3. The general Graduate Record Examination (GRE) is required. A minimum score of 450 on the Graduate Management Admissions Test (GMAT) may be substituted for this requirement.
4. Applicants whose first or native language is not English are required to have a minimum score of 550 in the Test of English as a Foreign Language (TOEFL). However, this requirement is waived for students with a bachelor's or master's degree from an accredited U.S. university.
5. The Writing Proficiency Examination (WPE) or its equivalent must be passed during the first session of enrollment unless taken and passed previously. Courses taken after the first session without having passed the WPE may not be counted toward the degree.

Advancement to Candidacy

1. Student must remove any deficiencies as determined by the Program Graduate Advisor.
2. At the direction of the Program Graduate Advisor, students may be required to take examinations in their chosen areas.
3. Students must have completed at least 18 units of core curriculum with a minimum grade-point average of 3.0.
4. Student must have passed the Writing Proficiency Examination or equivalent

Requirements

The MSEM program requires the completion of 33 semester units of coursework (core + capstone project) and any preparatory prerequisite coursework, as indicated below:

Prerequisite Coursework (subject credits only)

CSULB:

MSEM 406B Engineering Economy and Administration (3)

CSUDH:

MSEM 495D Special Topics in Financial Accounting/Business Finance (2)

MSEM 495D Special Topics in Business: Marketing Principles/Economics of the Firm (2)

Core Coursework

CSULB:

- MSEM 591B Engineers to Managers - A Transition (3)
- MSEM 570B Engineering Management Principles & Practices (3)
- MSEM 506B Management of Engineering Technology and Innovation (3)
- MSEM 507B Engineering Project Management (3)
- MSEM 511B Advanced Manufacturing Management Systems (3)

CSUDH:

- MSEM 502D Advanced Topics in Accounting (3)
- MSEM 500D Advanced Topics in Finance (3)
- MSEM 500D Human Behavior in Organizations (3)
- MSEM 500D Strategic Marketing: Cases and Current Issues (3)
- MSEM 595D Special Topics in Management: Team Management and Leadership (3)

Capstone Integrative Coursework – Culminating Experience

CSULB:

- MSEM 596B Special Projects in Engineering Management (3)

Notes -

1. The prerequisite coursework may be waived for students who have successfully completed undergraduate courses in the disciplines indicated.
2. Students are strongly advised to read and be familiar with the campus regulations described under "Graduate Programs" elsewhere in the CSULB and CSUDH Catalogs.

Electives

CSULB: MSEM 461B, 483B, 505B, 508B and 532B.

Graduate Certificate in Systems Engineering (code COE_CT01)

Director: Dr. Mihir K. Das, Associate Dean for Instruction

The 18-unit Post Baccalaureate Certificate Program in Systems Engineering (SE) is designed to provide interested students or practicing engineers with the very latest in SE capability and the ability to plan and execute complex SE projects. The Certificate Program is focused toward development and management of complex systems. Each such complex system requires a clear SE Master Plan, a set of SE Methodologies, appropriate tools, a rigorous requirements flow-down technique, and a comprehensive Project Management Plan to enable system design and project management for effective and efficient human interaction.

Requirement

1. Completion of an accredited baccalaureate degree in engineering or equivalent;
2. Satisfactory completion of 18 units listed below;
3. File a program application card with Admissions and Records, and file for the Certificate at least one semester prior to completion;
4. The Certificate may be awarded concurrently or subsequently to baccalaureate degree.

Required Courses

The Certificate Program requires a minimum of 18 semester units, as indicated below.

1. System Engineering Core Courses, 6 units of the following: ENGR 532 and MAE 508.
2. Elective Engineering Management Courses, 6 units from the following: CECS 521, MAE 506 and 507
3. Elective Manufacturing Courses, 3 units from the following: ENGR 574, 595 and MEA 574
4. Advanced Engineering Mathematics/Analysis, 3 units from the following: EE 505, 508, MAE 501 and 502

Ph.D. in Engineering and Industrial Applied Mathematics (code COE_PH01)

Program Director: Dr. Mihir K. Das, Associate Dean for Instruction

Ph.D. in Engineering and Industrial Applied Mathematics, offered jointly by the College of Engineering at California State University, Long Beach and The Claremont Graduate University, allows students to pursue doctoral programs in most areas of engineering and applied mathematics.

The College of Engineering at California State University, Long Beach (CSULB) has the primary responsibility for the engineering portion of the program, and the Department of Mathematics at The Claremont Graduate University (CGU) has the primary responsibility for the applied mathematics portion. The program of study for each Ph.D. candidate is carefully integrated to ensure the interdisciplinary nature of each student's research.

Degree Designation

The degree shall be designated as the Doctor of Philosophy in Engineering and Industrial Applied Mathematics and shall be granted at the Claremont Graduate University in the name of the two universities in accordance with an agreement between CGU and CSULB. The diploma shall indicate the dual nature of the degree and shall specify that it is being granted only when requirements have been satisfied in both subject areas as specified by the collaborating institutions.

Program Supervision

Overall program supervision will be the responsibility of a committee (The Program Committee) consisting of two faculty members from the Mathematics Department at CGU and two faculty members from the CSULB College of Engineering. The Dean at CGU and the Dean of Engineering at CSULB will serve as ex-officio members of the Program Committee. The Chair of this committee shall be elected each year and shall alternate between CGU and CSULB committee members. Students must be admitted to both institutions jointly.

Admission Requirements

Admission will be granted to a limited number of qualified students, and therefore application should be made as early as possible. Applications are encouraged from both men and women, and particularly from members of minority and handicapped groups. Completed applications are due preferably by February 20 for the Fall semester and by October 31 for the Spring semester, although later applications may be allowed at the discretion of the Program Committee. Students shall be jointly admitted to the two campuses. The Program Committee has the responsibility of deciding admissions, consistent with campus regulations. (See Application Procedure on p. 10 of this booklet.)

To be admitted to the Joint Ph.D. Program, an applicant must have received a bachelor's or a master's degree in science, engineering, or mathematics from an accredited institution. He or she must, moreover, have attained such a scholastic record and present such confidential recommendations as to indicate that he or she is well qualified to pursue, with distinction, advanced study and research. Admission sometimes may have to be refused solely on the basis of limited facilities in the option desired.

GRE General is a requirement before admission. Applicants, whose first or native language is not English, are required to have a minimum score of 550 in the Test of English as a Foreign Language (TOEFL). However, this requirement is waived for students with a bachelor's or master's degree from an accredited U.S. university.

Program Planning and Supervision

Within a semester of beginning study in the Joint Doctoral Program, the student arranges with the Program Committee for an advisor in Mathematics at CGU and an advisor in Engineering at CSULB. The student's program of study will be arranged individually by each student in collaboration with the advisors. However, the student's overall performance will be monitored by the Program Committee. The two advisors on the two campuses will confer periodically regarding the student's progress.

Plan of Study

After consultation with the advisors, the student must prepare and file with the Program Committee before the end of the first semester a Plan of Study for completing the course requirements for the degree. The purpose of the Plan is to ensure that the student is aware of the requirements for the degree. The Plan of Study must indicate the areas of study that the student will be taking in preparation for the preliminary examinations. In exceptional circumstances, a Plan of Study may be altered at a subsequent time by petition to the Program Committee.

A minimum of 72 units of course work, independent study, and research (including transfer credit) must be completed. Transfer credits of up to 24 units of related courses at the master's level is permissible on approval of the Program Committee; this course work must have been completed with at least a grade of "B" or its equivalent at an accredited institution and must be directly related to the joint program and to the student's Ph.D. goals. Of the 72 units, a minimum of 24 units must normally be completed in the graduate engineering program at CSULB and a minimum of 24 in the graduate mathematics program at CGU. Both sets of 24 units must conform to the area requirements of the relevant institution and must be approved by the Program Committee. All degree requirements must be completed within seven years (or six with the transfer of 24 units according to CGU regulations) from the time a student begins graduate study.

If a student withdraws from the program after completing a substantial portion of the course work, a master's degree at either or both institutions is still possible by satisfaction of the appropriate requirements. Both CGU and CSULB require 30 semester units of course work for master's degrees.

Preliminary Examinations

The student is required to pass written preliminary examinations. These examinations shall consist of four examination areas: two in engineering and two in mathematics. In each area there will be a three-hour examination. These examinations are usually taken after completion of the relevant course work at each institution. These examinations will be given two or three times a year at the discretion and under the control of the Program Committee. Should a student fail an exam, one retake will be allowed, after petition to the Program Committee.

Research Tools

A student in the Joint Ph.D. Program must demonstrate proficiency in problem-solving ability using computer programs. This demonstration may take different forms depending on the student's engineering sub-discipline, but it must include evidence that the student has used an appropriate computer language and an algorithmic method to solve a problem from an engineering discipline.

Doctoral Committee

During entry to the program and through the period of the main body of course work at CGU and CSULB, a student's progress will be monitored by the Program Committee. On successful completion of the preliminary examinations, the student may petition the Program Committee to constitute the Doctoral Committee. This committee is chosen by the student with advice from the faculty and with approval of the Program Committee, and must include at least two faculty members from each of CGU and CSULB and must provide both breadth and depth in mathematics and engineering in the faculty chosen. The Doctoral Committee supervises the student's progress through research preparation and Dissertation writing, and administers the qualifying and oral examinations for the degree. The Chair of the Doctoral Committee is the Dissertation supervisor.

Research Preparation

On completion of at least 48 units of course work (including transfer units) and completion of the preliminary examinations and research tool test, a student embarks on the research phase of the Joint Doctoral Program. In preparation for the research phase, the student is expected to spend at least a semester in advanced graduate courses, seminars, or directed reading courses, where exposure to research material is emphasized. From these and other sources the student gains the ability to understand the motivation for research in engineering and applied mathematics, and learns to apply research techniques.

Research Proposal and Qualifying Examination

With these advanced courses as background, and with the guidance of the Doctoral Committee, the student shall define an area of proposed research and prepare a written Dissertation Proposal containing an outline of the research to be undertaken and references to relevant source materials. The Dissertation Proposal is presented to the Doctoral Committee at least two weeks prior to the qualifying examination. The qualifying examination is an oral presentation to the Doctoral Committee by the student describing the research planned. The student shall be expected to present evidence both as to the mathematical content and to the engineering application of the proposed research, supporting such evidence with references to previous research work in both areas. The Doctoral Committee judges the fitness and quality of the Dissertation Proposal from this presentation and from the written proposal, and subsequently communicates its recommendations to the Program Committee; only upon a positive recommendation may the student embark on a Dissertation. In the event of failure, the qualifying examination may be retaken once, after petition to the Program Committee. (See CGU Math Department or the Registrar's Office at CGU for forms required to initiate these processes.)

Advancement to Candidacy

After successful completion of the Qualifying Examination and certification that all other requirements are fulfilled, the student is advanced to candidacy. This must occur at least six months before the Final Oral Defense. The form for this is available in the CGU Mathematics Department.

Dissertation and Final Oral Examination

On completion of the research, the student will prepare the Dissertation in accordance with CGU regulations. A final draft of the Dissertation will be presented to each member of the Doctoral Committee at least three weeks prior to the final oral examination. The oral defense will be held on the campus of the Dissertation supervisor.

Residency Requirements

Doctoral students must complete their programs in a period of seven years. (or six with the transfer of 24 units according to CGU regulations, see below. During this time, a minimum of 72 units of course work, independent study, and research, including transfer credit, must be completed. Normally no more than 12 units per semester or per summer session may be credited toward the degree.

All degree requirements must be completed within seven years from the time a student begins graduate study. Work for which transfer credit is granted will be counted as part of the seven years, e.g., if transfer credit of 24 units (one year) is granted, the time limit will be six years. The Program Committee will consider petitions for extensions.

The residency requirements for the Ph.D. degree may be met either by two semesters of full-time study in a 24-month period or by the completion of 48 units of course work within a 48-month period, including work in the Summer Session, on either or both campuses.

Students who receive transfer credit for 12 units or less may meet the residence requirement either by completing two full-time semesters of course work within a 24-month period or by completing 36 units within a 48-month period. Those receiving transfer credit for 13 to 24 units may meet the residence requirement by completing 24 units within a 36-month period. The seven-year maximum time period for the Ph.D. degree is reduced by six months for 12 units or less of transfer credit and by 12 months for 13 to 24 units of transfer credit.

Policies and Procedures

1. Throughout their entire program of study, unit-taking students must be registered at either CGU or CSULB. Students who intend not to take course units at either institution, including those who have finished their course units, must take the necessary steps to maintain continuous enrollment. This is achieved by registering for M499 Doctoral Study at Claremont Graduate University. Requests for leaves of absence must be submitted to each Registrar's Office and approved by both institutions according to the standards of each, and upon approval of leave should advise the Math Office at CGU and their department of study at CSULB. Contact each Registrar's Office for leave of absence policies.
2. International students registered for units at CSULB must provide the CGU International Student Advisor with proof of registration within two weeks of the beginning of the semester at CGU. Proof of full-time registration is required to maintain immigration status.
3. Students should arrange for advisors, one in math at CGU and one in engineering at CSULB, at the earliest opportunity. The program committee will help provide advisors.
4. After consultation with their advisors, students must submit a plan of study, including a petition for transfer of credits, if applicable, during their first year of study. The plan of study must be approved and transfer of units recommended to the Registrar by the program committee.
5. Students admitted to provisional status must provide the materials needed to complete their files before the end of their first semester of enrollment. Official scores for the GRE General Test are required of all students before admission to full graduate standing. An official score for the GRE engineering subject examination is recommended for applicants with an engineering B.S., and for the mathematics subject examination for applicants with a mathematics B.S. The joint faculty program committee will review completed files for change of status.

- The academic progress of students admitted to conditional status will be reviewed by the program committee prior to a decision about change of status.

Procedures for Student Admission

- Students must complete application forms for both CGU and CSULB. In addition they must supply transcripts, at least 3 letters of reference (preferably on the forms supplied in the CGU package), and pay fees for both applications. Current and official GRE scores (on Q,A and V) are required, but if the exam has not been taken at the time of admission it must be taken within the first semester of enrollment.
- Completed applications (and fees for both CGU and CSULB) are to be submitted to the CGU Admissions Office, 170 E. Tenth Street, Claremont, CA 91711-6163. (Do not send application materials to CSULB, as it will result in considerable delay.)
- A complete file is reviewed by the CGU members of the Joint Ph.D. Program Committee. In the event of a negative review, a rejection letter is issued by CGU.
- A positive review sets up the following steps. The LB application form and check, and copies of the transcripts and letters are sent to the CSULB Program Director, Dr. Mihir K. Das, Associate Dean for Instruction, College of Engineering, Phone 562-985-5257; FAX: 562/985-7561. (Email - mdas@csulb.edu) The LB members of the Joint Ph.D. Program Committee then review the application in consultation with professors in the appropriate discipline. Results of this review are transmitted to CGU Math. Upon a positive review the application and fee are sent to the CSULB Admissions Office to be processed. A negative review initiates a rejection letter from CGU.
- A positive review (now from both CGU and CSULB) generates an Admission letter from CGU. Signatures from both campuses are required on this, so the letter is signed in Claremont and forwarded to the CSULB Registrar at LB for signature, who relays it to the student, and sends copies to CGU Admissions and Dr. Reddy.

Notes:

- The CGU Admissions office, regularly and routinely, informs students of the status of their application by letter. Missing items are noted.
- Since only complete files are transmitted from CGU to LB, information on the status of a file is available only from CGU (Rosa Delia Rosas, Admissions Office, 909-621-8069 or Mary Solberg, Math Department, 909-621-8080, email - mary.solberg@cgu.edu).
- In case of rejection it may be worthwhile to note reasons in the files.
- For any CSULB information relating to the Joint Doctoral Program, please contact Kim Truesdelle at 562-985-8032.

Teaching Practicum

Students who have completed coursework equivalent to a master's degree and who intend to pursue a career in university education may enroll in a Teaching Practicum for three units of credit. The student will receive instruction in teaching techniques and, under the supervision of a senior faculty member, will teach an undergraduate class in engineering or mathematics. In addition, opportunities are available for qualified Ph.D. candidates to teach undergraduate courses as part-time lecturers.

Courses (ENGR)

Lower Division

90. Special Topics in Engineering (1)

Selected topics from recent advances of interest to beginning engineering students. May be repeated to a maximum of 3 units. (Lecture problems 1 hour).

101. Introduction to the Engineering Profession (1)

Freshman orientation seminar on careers in engineering. Speakers from various fields illustrate opportunities and challenges in the engineering profession. (Lecture-problems 1 hour.) Letter grade only (A-F).

202. Computer Methods in Engineering (3)

Prerequisite: CECS 174 and MATH 224. Introduction to MATLAB and numerical methods with applications to engineering. Programming in MATLAB. Introduction to SIMULINK and other MATLAB toolboxes. (Lecture 2 hours, laboratory 3 hours). Letter grade only (A-F).

203. Engineering Problems and Analysis (3)

Prerequisite: MATH 120; Corequisite: ENGR 203L. Formulation of engineering problems and methods for their analysis. Application of vectors, matrices, derivatives and integration into engineering problems. Computer aided analysis using MATLAB, MathCad, etc. (Lecture - Problems hours.) Letter grade only (A-F).

203L. Engineering Problems and Analysis Laboratory (1)

Prerequisite: MATH 120; Corequisite: ENGR 203. Computer-based exercises on fundamental concepts such as vectors, matrices, derivatives, integrals. Practical engineering problems are assigned and solved using MATLAB. (Laboratory 3 hours). Letter grade only (A-F).

205. Surfing the Information Superhighway – Internet Resources and Services (3)

Prerequisite: ENGL 100. Overview of Internet resources, services and networked information systems for nonspecialists. Instructional and learning methods include a combination of lecture, on-line demonstrations, class discussions, guest speakers, and computer lab exercises. (Lecture-problems 3 hours.) Letter grade only (A-F).

Upper Division

302I. Energy and Environment: A Global Perspective (3)

Prerequisites: Completion of the G.E. Foundation, one or more Explorations courses, and upper-division standing. Renewable and nonrenewable energy sources, including but not limited to fossil fuels, nuclear, solar, wind, wave, tides, geothermal, hydroelectric and biomass. Available world resources, market, trends, and technology. Energy conservation and energy balance. Practical energy alternatives and their social, cultural, and political impacts. Ecosystem and environment, human-induced climate changes. Environmental aspects of power generation, air pollution, acid rain, ozone depletion, and global warming. Recycling and blue print for a sustainable environment. (Lecture-Problem 3 hours) Letter grade only (A-F).

304. Engineering Problem Solving and Design (3)

Prerequisite: MATH 117 or three and one half years of high school mathematics, including algebra, geometry, intermediate algebra and one-half year of trigonometry. The problem solving process: Definition, Solution Alternative, and Implementation. Problem solving tools: Analytical, Graphical, and Computer-based. Procedures for creative problem solving. Nature of engineering design to meet a need. Design process overview. Critical thinking exercises using real-life examples. Team projects: Written reports and oral presentations required. (Lecture 2 hours, laboratory 3 hours.) Letter grade only (A-F).

310. Business Communications in Engineering Profession (3)

Prerequisites: ENGL 100, COMM 110. This course provides basic concepts for understanding and practice of communication in the changing world of business for managers and professionals. It examines the use of language and conversations in business settings and their role in coordinating actions, resolving breakdowns in work performance, and providing customer satisfaction. Course topics include: Practice in professional styles of business writing and formats, preparation of a formal report, development of competence in business conversation skills (written, electronic, and oral), and other selected topics. International, technical, and linguistic developments are integrated into various applications of business communication. (Lecture - Discussion 3 hours.) Letter grade only (A-F).

330. Manufacturing Processes (3)

Prerequisites: MAE 322. Primary manufacturing processes for metals, plastics, composites, and ceramics such as casting, metal-forming, injection molding, blow molding, and powder processing. Computer simulation. (Lecture-problems 2 hours, laboratory 3 hours.) Letter grade only (A-F).

340. Guitar Electronics: Engineering Sound (3)

Prerequisites: Upper division standing, completion of GE Foundation requirements, one course from G.E. category Blb. (Not open to students with credit in EE 333). Historical review of electromagnetic principles and their application to the reproduction, modification, and creation of sound. The electric guitar, its amplifiers, and special effects devices (analog and digital) will be used to gain practical experience. Electrical safety, physiology and physics of the ear. (Lecture 2 hours, laboratory 3 hours.) Letter grade only (A-F).

350. Computers, Ethics and Society (3)

Prerequisites: Three (3) units from GE Category A.1 (Writing) and 3 units from GE Category D (Social and Behavioral Science). An examination of the social impact of information technologies. Topics include a survey of the technology (software, hardware and key applications), ethical obligations of specialists, the computer in the workplace, shifts of power, privacy, and legal issues related to computing. (Lecture-problems 3 hrs.)

370I. Astronautics and Space (3)

Prerequisites: Completion of GE Foundation requirements, one or more Explorations courses, and upper-division standing. This course combines the disciplines of space engineering with economics, human physiology, satellite meteorology, earth resources and environmental science, astronautics and space exploration. Emphasis on oral and written communications, numeracy and use of computers. Extensive use of computer animation, videographics and the Internet. (Lecture-problems 3 hours.) Letter grade only (A-F).

375I. Total Quality and Continuous Improvement (3)

Prerequisites: Completion of GE Foundation requirements, one or more Explorations courses, and upper-division standing. The course examines the global competitiveness and the use of Total Quality approach to achieve Continuous Improvement. The topics include the following: History of quality movement, Quality gurus and Deming's philosophy on TQM, Strategic planning, Customer satisfaction, TQM tools, Effective visual representation of data, Worker empowerment and teamwork, Supply chain management, Statistical tools for controlling quality, ISO 9000 and its role in quality improvement, Malcolm Baldrige National Quality Award, Deming's Prize, Industrial practice and Case studies. The course fosters teamwork with Team project reports and oral presentations. (Lecture-problems 3 hours.) Letter grade only (A-F).

391. Engineering and Civilization (3)

Prerequisites: ENGL 100 and a Critical Thinking course (A3 category of GE) or consent of instructor. Study of the interaction between human beings, the environment, resources, engineering and science, including the impact of engineering on society. Readings and lectures providing perspective and insight into current problems at the interfaces between engineering and other disciplines, especially anthropology, art, ecology, economics, philosophy, psychology, science and the social sciences. (Lecture-Problems: 3 hours.)

***400E. Engineering for Teachers (3)**

Prerequisite: MATH 119A or three years of high school mathematics including algebra, geometry, and intermediate algebra. Learn how engineers solve problems for humanity. Explore the various engineering disciplines and learn how they relate to mathematics and science. Discover how things work. Build engineering projects. (Lecture 2 hours, laboratory 3 hours.) Letter grade only (A-F).

461. Manufacturing Resource Planning (3)

Prerequisites: Upper division standing. Basic principles of manufacturing resources planning, operations management, and control. Forecasting techniques, production planning and scheduling procedures, and analysis of manufacturing resources. Material inventory activities, facilities and physical plant layout, production process and equipment, and productivity and quality. Team projects using computer modeling software. (Lecture-problems 3 hours) Letter grade only (A-F).

483. Computer Integrated Manufacturing (3)

Prerequisite: ENGR 330. Principles and practices of the function of computers in controlling the manufacturing process, including hardware and software requirements for computer automation; computer architectures used in manufacturing; computer-aided design; manufacturing systems; computer controlled manufacturing equipment; simulation; quality assurance; programming the factory. (Lecture-problems 3 hours) Letter grade only (A-F.)

492B. Internship In Engineering (3)

Prerequisite: Upper division standing and permission of the instructor. A Co-Op field experience. Students who qualify can be placed in a major- or career-related, pre-professional experience as an employee in private industry or in public agencies. May be repeated to a maximum of 6 units. (Lecture-problems 3 hours.)

Graduate Level**511. Quality Assurance in Manufacturing (3)**

Prerequisites: CE 406 or consent of instructor, and graduate standing. In-depth studies of planning for quality, productivity and competitive positioning in manufacturing. Understanding the TQM process. Inspection and standardization and product reliability strategies. Case study projects. (Lecture-problems 3 hours.) Letter grade only (A-F).

532. Logistics Principles and Practice (3)

Prerequisite: Graduate standing or consent of instructor. Logistics concepts, history, industry and military practice, lessons learned, and the complete product life cycle. Logistics processes including maintainability, support resource identification and technical documentation and training. Engineering design influence on product maintenance and material and operational support. (Lecture-problems 3 hours.) Letter grade only (A-F).

574. Advanced Manufacturing Technology and Processes (3)

Prerequisites: Consent of instructor, and graduate standing. Build from manufacturing process into factory integration, study of advanced manufacturing processes including composites, electronics manufacturing, automated material handling, assembly, inspection, warehousing, factory and office of the future. Automation, robotic applications, flexible manufacturing systems, group technology and the economics of the automated systems. (Lecture and Computer Laboratory, 3 hours.) Letter grade only (A-F).

591. Engineers to Managers – A Transition (3)

Prerequisites: Consent of instructor and graduate standing. This course is designed to assist and equip engineers in making a successful transition into management. The subject areas include: Engineering mindset - its advantages and disadvantages; Traits of successful managers; Corporations as an intricate system of people, machines, and facilities; Management positions and their specific requirements; Management and inter-acting disciplines; Role of "people skills" in non-coercive supervision; Responsibilities of technical managers; Strategic planning and implementation; Managing changes and technology innovation; Total Quality Management (TQM) concepts; Team projects involving realistic scenarios and case studies. (Lecture-Problems 3 hours.) Letter grade only (A-F).

596. Special Projects in Engineering Management (3)

Prerequisites: Eligible for advancement to candidacy and consent of instructor. Under faculty supervision students will pursue synthesis work, as a culminating experience, on the topics learned for the interdisciplinary MSEM degree. In consultation with the Program Advisor, an Independent Study form must be completed. An acceptable project report must be submitted. Can be repeated for credit to a maximum of 6 units. Letter grade only (A-F).

790. Advanced Special Topics in Engineering (4)

Prerequisite: MS or equivalent and formally admitted to the Ph.D. program. Each offering is based on an area of Engineering in which recent advances have been made. Specific topics will be recorded on student's transcripts. Repeatable to a maximum of 8 units with different topics. Course Survey Form must be completed. Letter grade only (A-F).

795. Advanced Directed Studies (4)

Prerequisite: MS or Equivalent and formally admitted to the Ph.D. program. Explorations of theoretical and experimental (if applicable) Engineering problems in great depth with emphasis on mathematical modeling and analysis. Students must present the findings in a formal report and a seminar. May be repeated to a maximum of 8 units. Course Survey Form must be completed. Letter grade only (A-F).

798. Doctoral Dissertation (4-12)

Prerequisites: Enrollment is limited to students formally admitted to the Ph.D. program who have passed the preliminary examinations and research tool tests on completion of at least 48 units of course work. A written dissertation proposal containing an outline of the research to be undertaken and references to relevant source material must be submitted. Only upon a positive recommendation a student may embark on a dissertation. Minimum 4 units per semester. May be repeated until the work is completed; any work beyond the maximum of 12 units does not count toward the degree. Letter grade only (A-F).

Courses (MSEM)

406B. Engineering Economy and Administration (3)

Prerequisite or Corequisite: ECON 300 or consent of instructor. Engineering management principles and economic analysis: with time value of money, after-tax analysis for rate of return. Graduate students will be required to do an additional assignment. Letter grade only (A-F).

461B. Manufacturing Resource Planning (3)

Prerequisite: Upper division standing. Basic principles of manufacturing resources planning, operations management, and control. Forecasting techniques, production planning and scheduling procedures, and analysis of manufacturing resources. Material inventory activities, facilities and physical plant layout, production process and equipment, and productivity and quality. Team projects using computer modeling software. Letter grade only (A-F).

483B. Computer Integrated Manufacturing (3)

Prerequisite: ENGR 330. Principles and practices of the function of computers in controlling the manufacturing process, including hardware and software requirements for computer automation; computer architectures used in manufacturing; computer-aided design; manufacturing systems; computer controlled manufacturing equipment; simulation; quality assurance; programming the factory. Letter grade only (A-F).

505B. Quantitative Methods for Engineering Managers (3)

Prerequisites: MAE 501 or 502 or equivalents. Concepts and methods for using quantitative approaches in engineering management decision-making. Various computer-based tools that can be used in management decision-making to provide the basis for the decision or to help validate decisions made using subjective approaches. Probabilistic methods, forecasting, various forms of the linear program model, network analysis, dynamic programming, Monte Carlo simulation and queuing models. The course is application oriented with sufficient theoretical background provided to effectively use the computer-based tools and properly interpret their results. Methodologies for formulating the problem are emphasized, so that the applicable quantitative techniques can be implemented. Letter grade only (A-F).

506B. Management of Engineering Technology and Innovation (3)

Prerequisite: Graduate engineering standing. Analysis of the principles and theory of engineering administrative organizations, information systems, management functions, decision making tools, strategies and administrative policy formulations. Letter grade only (A-F).

507B. Engineering Project Management (3)

Prerequisite: Graduate engineering standing. Theory and philosophies of project management, principles of internal and industrial organization planning and control systems, motion in time study, industrial statistics, industrial research as aid to decision making. Letter grade only (A-F).

508B. Systems Engineering and Integration (3)

Prerequisite: Senior standing or consent of instructor. Introduction to the tools and methods employed by systems engineers in the aerospace industry. Development of system functions, requirements, verification and validation, and interfaces in the context of integrated product teams and the product life cycle. Trade studies and risk management. Projects are assigned and written reports and oral presentations are required. Letter grade only (A-F).

511B. Advanced Manufacturing Management Systems (3)

Prerequisite: Consent to instructor. Advanced management systems for Integrated Product Development (IPD) and Concurrent Engineering (CE); Quality, Productivity and Costs, with emphasis on Just-in-Time Manufacturing (JIT); Quality-Based Manufacturing Systems: TQM and ISO 9000; Customer Requirement and Quality Function Deployment (QFD); Design for Manufacturing and Assembly (DFMA) and other defect prevention systems, such as Poka-Yoke; Demand-Driven, "Pull" type manufacturing systems. "Lean Enterprise" concepts. Letter grade only (A-F).

532B. Logistics Principles and Practice (3)

Prerequisite: Graduate standing or consent of instructor. Logistics concepts, history, industry and military practice, lessons learned, and the complete product life cycle. Logistics processes including maintainability, support resource identification and technical documentation and training. Engineering design influence on product maintenance and material and operational support. Letter grade only (A-F).

570B. Engineering Management Principles and Applications (3)

Prerequisite: Graduate standing, or consent of instructor. Engineering management principles and their applications in contemporary technology-driven organizations. Interrelationships of the management functions with reference to modern products or service based companies. Analysis of typical technical organizational structures in global market place. Modern trends in engineering management, including reengineering, empowerment, concurrent engineering, and systemic thinking for high productivity and quality. Evolutionary theories of management affecting major types of organizations. Management functions such as strategic planning with goal setting, communication, resource distribution, co-ordination, life cycle analysis, risk mitigation, interaction, group dynamics, management control, and leadership theory, etc. Team projects involving case studies and other realistic scenarios. Letter grade only (A-F).

591B. Engineers to Managers - A Transition (3)

Prerequisites: Consent of instructor and graduate standing. This course is designed to assist and equip engineers in making a successful transition into management. The subject areas include: Engineering mindset - its advantages and disadvantages; Traits of successful managers; Corporations as an intricate system of people, machines, and facilities; Management positions and their specific functional requirements; Management and interacting disciplines; Role of "people skills" in non-coercive supervision; Responsibilities of technical managers; Managing technological changes; and Decision making tools, etc. Team projects involving realistic scenarios and case studies. Letter grade only (A-F).

596B. Special Projects in Engineering Management (3)

Prerequisites: Eligible for advancement to candidacy and consent of instructor. Under faculty supervision students will pursue synthesis work, as a culminating experience, on the topics learned for the interdisciplinary MSEM degree. In consultation with the Program Advisor, an Independent Study form must be completed. An acceptable project report must be submitted. May be repeated to a maximum of 6 units. Letter grade only (A-F).

CENTER FOR ENVIRONMENTAL STUDIES

College of Natural Sciences and Mathematics

Director

Roswitha B. Grannell

Location

Peterson Hall 3 (PH), Room 132

Telephone

(562) 985-4927 or (562) 985-4809

View the CSU, Long Beach *Catalog* on-line at www.csulb.edu by clicking on "Academics" and then "CSULB Catalog."

Certificate in Environmental Studies (code CNSMCT01)

The Center for Environmental Studies has as its objectives (1) creation of an awareness of the kind and scope of environmental problems, (2) preparation to analyze environmental problems and issues and (3) training in research in, and solution of, environmental problems.

The Center offers the Environmental Studies Certificate Program which is comparable to an academic minor. It has three components: natural environment prerequisites (or corequisites), core requirements, and elective courses distributed in human behavior, resources, and analysis and application.

The pattern of completion for the certificate is directed toward both the technically trained, research oriented student and the liberal arts, humanistically oriented student. Students in both areas must contact the Director, Center for Environmental Studies, for entry into the program. This contact should be made as early as possible in the student's academic career so that he or she may receive counseling in the most appropriate course work.

Requirements

1. A bachelor's degree (may be completed concurrently);
2. Consultation with the director of the program;
3. Overall GPA of 2.0 in all work attempted;

4. 33 units distributed as follows:

- A. Prerequisite or Corequisite Courses (nine units outside the major department selected from the three categories below; at least one laboratory course from categories A. or B. must be included, and a second is highly recommended);
 - 1) Life Sciences: At least three units from BIOL 200, 313, 324, 350, 351, 353, 427, 450, 453, 464; MICR 211;
 - 2) Physical Sciences: At least three units from CHEM 100, 111A, 111B, 202, 302; GEOL 102, 104, 105, 160, 163, 465; PHYS 100A, 100B, 151, 152;
 - 3) Geography: 140, 440, 442, 444;
- B. Core requirements (nine units; upon petition to the Director, three units of E/ST 499 may be substituted for E/ST 490 (2 units) - (1 unit), taken concurrently (only the sections entitled Environmental Field Studies may be used; the prerequisite for these courses is prior completion of six units of Section A, above, including the laboratory);
- C. Elective Requirements (15 units, distributed over the following three categories; nine of these units must be outside the major department, six units must be outside the College, and six units must be at upper division level);
 - 1) Human Behavior: At least three units outside the major department from MICR 303; POSC 442; PSY 351 or SOC 335; SOC 350;
 - 2) Man and Resources: At least three units outside the major department from BIOL 100; CH E 475; C E 364; GEOG 160, 304, 455, 460, 467; GEOL 190, 191; H SC 422; SOC 410;
 - 3) Analysis and Application: Three units from BIOL 260; ECON 380; GEOG 486; H SC 485; MATH 180; PSY 310. (Upon approval of the Director, one additional course from this category may be used to fulfill Section C, Elective Requirements in lieu of a course from A. or B. above).

Courses (E/ST)

Upper Division

490. Special Topics in Environmental Studies (1-3)

Prerequisite: Consent of instructor. Topics of current interest in environmental studies selected for intensive development. May be repeated to a maximum of 6 units with different topics. Topics will be announced in the *Schedule of Classes*. Upon approval of the director of the Center for Environmental Studies, this course is acceptable for credit in lieu of equivalent units in Section C, Elective Requirements. (Lecture 1-3 hrs.)

499. Directed Studies (1-3)

Prerequisite: Consent of instructor. Independent study under the supervision of a faculty member. Upon approval of the director of the Center for Environmental Studies this course is acceptable for credit toward the Environmental Studies Certificate in lieu of equivalent units in Sections B and C (Core Requirements and Elective Requirements).

The Environmental Science and Policy degree program is jointly housed in the College of Natural Sciences and Mathematics and the College of Liberal Arts, reflecting its inherent interdisciplinary nature.

Today's environmental problems call for people who are educated in more than one discipline, highly trained in technical skills, and aware of the political, economic, and social dimensions of environmental decisions. The degrees in Environmental Science and Policy provide solid training in basic physical, biological, and social sciences, and also address the human involvement in environmental issues. This curriculum prepares students for professional careers in Environmental Science and Policy and for subsequent graduate study in M.S., Ph.D., and law degree programs.

In the narrowest sense, environmental science is the study of the impact of human systems on physical and biological systems, and the dependence on natural resources by human systems. In a broader sense, environmental science is the study of the interaction and co-evolution of hu-

man, physical, and biological systems. Natural science is the study of physical and biological systems. Social science is the study of human systems – economic systems, political systems, human perceptions, and human interactions. Environmental science requires knowledge of both natural and social science. Environmental policy is concerned with the most effective means of intervening to alter the pathways among which natural and human systems co-evolve. Effective intervention considers benefits and costs, uncertainties and risks, limits of knowledge, and presupposes the purposes of intervention, and the values from which the purposes are derived. The purpose of environmental science and policy is to design, evaluate, and implement policies that alter the impact of human systems on physical and biological systems, and the pathways by which natural and human systems co-evolve.

Both Bachelor of Science and Bachelor of Arts degrees are offered. Most required courses are those offered in related disciplines in the College of Natural Sciences and Mathematics and the College of Liberal Arts. The curriculum fosters cross-disciplinary communication in the several required courses common to both degree programs and particularly in the Environmental Science and Policy courses (ES P 200, 300, 400).

The mix of required courses includes both natural and social sciences in both degree programs, while emphasizing natural sciences in the B.S. program and emphasizing social sciences in the B.A. program. Elective courses in the B.S. program enhance the students' knowledge in natural sciences and quantitative/computer skills in the social sciences. Elective courses in the B.A. program emphasize applications of social science to environmental issues and policy, while permitting students to further develop their knowledge of natural sciences. The curricula of the two degrees are designed to encourage and facilitate students pursuing double majors with departments in natural or social science.

Career Paths

The Directors together with the Faculty are responsible for advising majors in the Environmental Science and Policy degree program. Majors are assigned to appropriate advisors during their first semester in the program and are encouraged to consult with their advisor every semester. Students will be advised to select elective courses to develop areas of interest and to further their career objectives.

B.S. Degree: We advise majors to consider jointly majoring or minoring in ecology, microbiology, chemistry, geology, economics, or geography. The B.S. degree requires an advanced level of understanding of earth systems, living systems, and the role and effect of chemicals in natural systems. Graduates are trained for entry positions in industry and government that require a high degree of specialization in technical analyses in natural sciences, or quantitative and computer methods in social sciences. Graduates with the B.S. degree with a track in natural sciences will be qualified for graduate programs (M.S. and Ph.D.) in biological sciences, geology or chemistry, at most universities in the country. Graduates with the B.S. degree with a social science track are qualified to apply for the

M.S. program in Environmental Health Sciences at UCLA, and subsequently the interdepartmental doctoral program in Environmental Science and Engineering degree at UCLA; the Ph.D. program in economics and environmental science at UC Santa Barbara; the Ph.D. program in Social Ecology at UC Irvine; and the M.A. and Ph.D. program in Energy and Resources at UC Berkeley.

B.A. Degree: We advise majors to jointly major in either economics or geography, pursue the minor in journalism or the option in public relations in journalism, the political science major or minor, the minor in public administration in political science, the interdisciplinary minor in public policy, or the major or minor in international studies, depending on the student's career goals and interests. Graduates are especially well prepared for positions in state and local government, private consulting firms, energy companies, news organizations, environmental advocacy groups, consulting firms, and public relations firms. Graduates are prepared to directly enter Ph.D. programs in economics and geography, as well as M.B.A. programs in environmental science and management, M.A. programs in economics or geography, and law school.

Bachelor of Arts in Environmental Science and Policy (code ES_PBA01) (120 units)

The B.A. degree program emphasizes the social sciences, with a basic introduction to physical and biological sciences applied to natural systems. Required courses emphasize social sciences and include breadth in natural sciences. Elective courses include social sciences applied to environmental analysis and policy, and permit some additional coursework in natural sciences.

Lower Division: BIOL 200, 260; CHEM 202; ECON 100, 101; ES_P 200; GEOL 102, 104, 280; MATH 115 or 119A or 122.

Upper Division: BIOL 350; ECON 310; one course selected from ECON 462, 463, and 464; ES_P 300, 400; GEOG 481 or 485; one course selected from GEOG 442, 455, and 460; GEOL 300I; POSC 431.

Recommended Courses for General Education Requirements: Category D.1b: POSC 100; Category D.2: ECON 306I or GEOG 100 (or 100W):

Additional 21 units of course work selected from the following courses, 12 units of which must be upper division or approved by the advisor: BIOL 303; COMM 330; ECON 403, 410H, 434, 462, 463, 464, 481, 486, 490, 495; GEOG 140 or 150, 160, 400, 440, 442, 443, 444, 452, 455, 458, 460, 473, 474, 475A/575A, 475C, 482, 486, 487A, 488, 492; GEOL 190, 303, 339; HIST 481, 482; MICR 200, 303; PHYS 100A; POSC 329, 442; SOC 494; S W 491

Bachelor of Science in Environmental Science and Policy (code ES_PBS01) (123 units)

The B.S. degree program emphasizes the physical and biological sciences, with a basic introduction to social science methods applied to human systems. Required courses emphasize natural sciences and include breadth in social sciences. Elective courses include physical and biological sciences, and technical courses in social sciences.

Lower Division: BIOL 211A, 211B, 260; CHEM 111A, 111B; ES_P 200; GEOL 102, 104, 280; MATH 119A, 119B (or 122, 123).

Upper Division: BIOL 350; CHEM 327 (or 320A,B); ECON 300 (or 100 & 101), 310; one course selected from ECON 462, 463, and 464; ES_P 300, 400; GEOG 481 or 485; GEOL 300I.

Recommended Courses for General Education Requirements: Category D.1b: POSC 100; Category D.2: ECON 306I or GEOG 100 (or 100W):

Additional 20 units of course work selected from the following list, 8 units of which must be upper division or approved by the advisor. For those in Natural Science track, 12 units must be in Biology and Microbiology, Geology, Chemistry, and Chemical Engineering. PHYS 100A,B (or 151, 152) required for the Natural Science track. For those in Social Science track, 12 units must be in Economics or Geography. PHYS 100A,B or PHYS 151, 152; BIOL 303, 313, 324, 353, 427, 450, 451, 456, 457, 459, 464, 465, 467; CHEM 251, 320A,B, 377A,B, 441A, 451; CH E 475; ECON 403, 410H, 434, 462, 463, 464, 481, 486; GEOG 400, 440, 442, 443, 444, 452, 455, 458, 460, 473, 474, 475A/575A, 475C, 482, 486, 487A, 488; GEOL 190, 303, 339, 431, 460, 461, 477, 554, 556; MICR 2002, 211, 303; NSCI 492.

Environmental Science and Policy Courses (ES P)

Lower Division

200. California Environmental Issues (3)

Prerequisites or corequisites: GEOL 102, 104, BIOL 200 or 211A. Introduction to the history, nature, status, and future of a major environmental issue in California (the coastal environment, water resources, land use, or energy supplies). Biological, physical, and societal aspects will be examined and integrated with the goal of developing a plan to meet the challenges of the 21st Century. (Lecture 2 hrs., discussion 1 hr., and field trips.) Letter grade only (A-F).

Upper Division

300. Environmental Policy, Institutions, and Law (3)

Prerequisites: Completion GE Foundation Requirements; ECON 100 and 101 (or ECON 300), POSC 100, and upper division standing. Environmental policy and law focuses on political institutions, property rights, federal and state roles in decision-making, and challenges for environmental policy. Decision-making is examined in the context of the rights and limits of both private parties and the broad public interest. Emphasis is on use of science in decision-making, choices between regulations and incentives, and role of bureaucracy in resource policy. Examples of legal principles as applied to environmental regulation by federal and state governments. Case studies from air pollution, water pollution, land development, wetlands and coastal management. Letter grade only (A-F). (2 hrs lecture, 1 hr discussion).

400. Environmental Science and Policy Capstone Project (3)

Prerequisites: BIOL 350, ECON 462 (or 463 or 464), ES P 300, GEOG 485, GEOL 300I. Consists of an interdisciplinary evaluation of the physical, biological, social, economic, and legal dimensions of environmental policies. The instructor will select from the ecosystems that are part of the larger Southern California Bight – and policies with associated environmental impacts – for evaluation and analysis. Examples include policies to reduce, control, or treat surface water run-off, establishing or changing the management of marine protected areas, dredging in the harbors, and decisions to develop in or adjacent to wetlands. Students will transmit results to the public or appropriate legislative bodies, agencies, or courts for consideration and deliberation in legislative, policy, or judicial decisions. (2 hrs lecture, 1 hr discussion, and field trips). Letter grade only (A-F).

ENGINEERING TECHNOLOGY PROGRAMS

College of Engineering

View the CSU, Long Beach *Catalog* on-line at www.csulb.edu by clicking on "Academics" and then "CSULB Catalog."

Students desiring detailed information should contact one of the faculty advisors.

The Engineering Technology (ET) Programs at CSULB serve society by graduating well-prepared professionals, who are provided with an excellent education in the fundamentals of Engineering Technology through a combination of theory and laboratory practice, and who are able to apply their knowledge and transform their ideas into working systems. The goals of these ET programs are achieved through a number of educational objectives by the faculty participating in these programs:

1. Preparing students to commit to life-long learning, continuing self-development and the ethical practice of Engineering Technology.
2. Providing well-designed curricula, that meet the industry needs.
3. Providing students with a solid foundation on a broad range of engineering technology areas, that are required of a professional technologist entering the workforce.
4. Training students in analysis, applications and hands-on laboratory work.
5. Providing students with opportunities to enhance their communication skills by means of writing reports, oral presentations and teamwork.
6. Providing modern and well-equipped instructional laboratories.

In addition, an Engineering Technology Advisory and Development Council (ETADC), composed of leaders actively engaged in areas of relevant engineering technology continually provides information and guidance about industrial developments in methods, materials and techniques so that the programs reflect the best of current practices. The members examine various aspects of the programs and make recommendations for changes in curriculum content, methods and/or facilities. Present membership in the council is made up of representatives from the different sectors of the American industries or corporations.

The ET programs are administered by the following four departments in the College of Engineering: Chemical Engineering (CHE), Civil Engineering (CE), Electrical Engineering (EE), and Mechanical and Aerospace Engineering (MAE).

General Requirements

All students in either the BSET or BSECET options must receive a minimum grade of "C" in each of the prerequisite courses before enrolling in any Engineering Technology course. In addition to any other all-university requirements regarding grade point averages for graduation, student must achieve a minimum of 2.0 average in all Engineering Technology courses.

Students enrolled in the BSET Options must complete a minimum of 130 units whereas the BSECET Options must complete a minimum of 134 units. These courses cover the broad disciplines and functions of the specialized disciplines.

Bachelor of Science in Engineering Technology (BSET) Programs

Technology and Engineering Education Option

The Technology and Engineering Education Option is for students preparing to teach technology and programming courses at the middle or high school level. Thirty units of post-baccalaureate coursework are also required for the Clear Single Subject Teaching Credential in Technology Education. See the Single Subject Teacher Education Program in the Graduate School of Education (ED1-54) for more specific information about courses and other requirements. This option is not accredited.

Environmental Technology Option

The Environmental Technology Option program is to provide career educational opportunities to students whose technological interests and aptitudes are applications-oriented. The goal is to produce occupational-ready college graduates with practical skills and potential for growth to meet defined technical manpower needs, primarily for California's environmental industry. To achieve these goals, emphasis is placed on meeting students' needs through lecture and laboratory teaching, through the co-op program with local industry, and through other relevant learning experiences.

In addition to acquiring technical knowledge and skills, graduates will be able to communicate well. They will be prepared not only for immediate employment but for continuing development as citizens and responsible human beings as well. This will be accomplished by requiring appropriate courses in technical fields, communications, and in general education courses. Furthermore the ethical considerations of environmental issues will have a major role throughout the curriculum. Finally, every effort is made to help the students in proper job placement upon graduation. This option is not accredited.

Manufacturing Technology Option

The objective of the Manufacturing Technology Option, accredited by The TAC (Technology Accreditation Commission) of ABET (Accreditation Board for Engineering and Technology, Inc., 111 Market Place, Suite #1050, Baltimore, MD 21202, phone: 410-347-7710, website: <http://www.abet.org>), is to prepare graduates to pursue careers in the application of methods required by industry to manufacture products. Emphasis is placed on specific job skills required of entry-level professionals in manufacturing technology such as the evaluation and implementation of manufacturing processes and equipment, plant planning and layout, quality control systems, tool design, manufacturing standards and cost control, computer applications, safety, automation, and integrated product and process

development. Additional emphasis is placed on oral and written communication skills and manufacturing management and leadership principles.

Graduates of the program will be employed in the manufacturing engineering, production, production control, procurement and materials management departments of both large and small companies in all areas of the manufacturing industry. The major is designed to meet TAC of ABET criteria for accredited programs in engineering technology.

Quality Assurance Option

The objective of the Quality Assurance Technology Option program is to prepare graduates to pursue careers in the practical application of quality systems required to produce quality products in both the manufacturing and service industry. Emphasis is placed on specific job skills required of entry-level professionals in quality technology such as the evaluation and implementation of quality systems to support manufacturing processes, quality assurance, process improvement, quality inspection systems, measurement science, quality related computer hardware and software applications, product safety, reliability and maintainability, statistical process control and industrial designed experiments, and integrated process development. Also included are oral and written communication skills, and quality management and leadership principles. Graduates of the program will find jobs in quality engineering, quality assurance, product assurance, supplier assurance, configuration and data management, procurement, software quality assurance, production, operations, material management, and industrial engineering departments of both large and small companies in all areas of the manufacturing industry and service industry. This option is not accredited.

Prerequisites

Core Engineering Technology Courses for Environmental Technology, Manufacturing, and Quality Assurance:

Lower Division: CHEM 111A, MATH 120, ENGR 203, 203L, PHYS 100A&B, ET 101, 170, 202, 202L, 204, 205, 205L.

Upper Division: ECON 300, ET 301, 301L, 307, 309, 311, 312, 335, 335L, 410, 435, 435L.

Option in Environmental Technology (code ET__BS06) (134 units)

Faculty Advisor - Ashok Naimpally (Chemical Engineering)

CHE Department Office - VEC 136

Faculty Advisor's Office - EN2 106

Faculty Advisor's Telephone - (562) 985-1508

Prerequisite Core

Lower Division: CHEM 111A, MATH 120, ENGR 203, ENGR 203L, PHYS 100 A&B, ET 101, 170, 202, 202L, 204, 205, 205L.

Upper Division: ECON 300, ET 301, 301L, 307, 309 (or ENGR 310), 335, 335L, 410.

Requirements

Lower Division: ET 206, 209, 209L, 210, 213.

Upper Division: ET 303, 319, 329, 329L, 333, 333L, 400, 400L, 449, 449L.

Select at least 11 units of approved electives in consultation with an advisor from the following courses: ET 407, 409F, 476, 485, H/SC 422.

FAQ Concerning Road Maps for Completion of Undergraduate Degrees

For each undergraduate major, the on-line Catalog shows plans for scheduling all required courses to complete the degree in four, five, or six years.

While CSULB will make every effort to schedule classes at the times shown in the plans, we cannot guarantee that courses will be available in specific semesters. It is possible that shortage or budget or of personnel will make it impossible to offer as many classes as we would wish.

The plans are not substitutes for working with an advisor. You are strongly encouraged to see an advisor when planning your program each term.

I am a freshman. Do I have to choose now whether to follow the four, five, or six-year plan?

No. Most freshmen take 12-15 units. You need at least 12 units to receive full financial aid. With experience, you will be able to judge how heavy a load you find comfortable. This will depend on your outside obligations, such as a job, and on your personal circumstances. In theory, each unit requires three hours a week, including preparing for class, attending class, and completing assignments. Use these guidelines to budget your time and plan an appropriate schedule.

Must I take the courses in the semesters shown on the plan?

The plan shows one possible way of completing all requirements for the degree. Consult your advisor about whether it is essential to take a given course in the semester shown. There are some rules to keep in mind:

- 1) You can take the General Education Foundation courses (Composition, Oral Communication, Critical Thinking, Mathematics) in any semester in the first 36 units of baccalaureate-level course work completed at CSULB.
- 2) You cannot take upper division courses until you have completed at least 30 units. (Exceptions can be made for students who already have completed advanced study in the subject.) You cannot take General Education Capstone courses until you have completed at least 60 units.
- 3) For some majors it is essential to complete courses in the correct sequence. You cannot take a more advanced course until you have completed the prerequisite course(s).
- 4) You must complete all requirements for admission to impacted majors within the first 60 units.

I have been told that I must take one or more pre-baccalaureate courses. How can I plan my program?

Your advisor at SOAR can help you identify which courses must be postponed. You must still complete the minimum number of baccalaureate units required for the degree.

You may be able to catch up by taking additional courses in later semesters or by taking classes in summer or winter session, or you may choose to spend an additional semester completing the program. You cannot begin the sequence of required courses for some majors until you are ready for baccalaureate-level Mathematics. See your major advisor to develop a plan for scheduling the required courses.

I didn't complete the exact list of courses shown. Can I still graduate on time?

The answer depends on your major and on what courses you have completed. The plans are not rigid requirements; they are only intended to provide guidance in planning a program. There are many reasons for students to follow a different pattern, such as changing the major, choosing to take fewer classes in a given semester, choosing to complete a minor or a second major. See your advisor for help in planning a program that will work for you.

If I follow the plan, will I have all requirements for graduation completed?

The plans include the specific courses required for the major. For some majors, there are restrictions on the choice of major electives. It is important that you select General Education courses to meet the required distribution pattern. You may need to take an additional General Education course to complete the minimum number of units required for each category. This is likely to happen if you took three-unit courses in Category B, Physical Universe.

Option in Electronics Technology

The Electronics Option, accredited by TAC of ABET (Accreditation Board for Engineering and Technology Inc., 111 Market Place, Suite #1050, Baltimore, MD 21202, phone: 410-347-7710, website: <http://www.abet.org>), prepares the student for a position as a technologist, in such industries as aerospace, computers, communications, biomedical, chemical, power, etc. Students are offered a wide range of training in topics such as instrumentation, controls, microprocessors, microelectronics, biomedical electronics, communications, motors and generators, robotics, computer applications, programming and interfacing. Moreover the option emphasizes written and oral communications skills as well as modern methods of industrial administration and supervision. The option is designed to meet ABET criteria for accredited programs in engineering technology.

Option in Computer Technology

The primary objective of the Computer Option, accredited by TAC of ABET (Accreditation Board for Engineering and Technology Inc., 111 Market Place, Suite #1050, Baltimore, MD 21202, phone: 410-347-7710, website: <http://www.abet.org>), is to prepare graduates to pursue careers related to manufacturing, integration, and support of computer systems. Emphasis is placed on specific job skills required of entry level professionals in computer industry, including systems analysis and design, data administration, networking, data communications, data acquisition, oral and written communication, and management principles. The Computer Option is available to students interested in the manufacturing of computers and the applications and operations aspects of computer hardware and software. The option is designed to meet ABET criteria for accredited programs in engineering technology. The graduates of this program will find employment in industry and organizations where a combination of practical hardware and software background is important.

Core BSECET Courses

Lower Division: CHEM 111A; MATH 120; ENGR 203, 203L; PHYS 100 A&B; ET 101, 170, 202, 202L, 204, 205, 205L, 250, 250L, 252, 252L, 255, 255L, 260, 260L, 286, 286L.

Upper Division: ET 309, 311, 360, 360L, 386, 386L, 387, 387L, 388, 388L, 410, 442, 442L, 488, 488L.

Option in Electronics Technology (code ET__BS02) (138 units)

Upper Division: ET 341, 341L, 350, 350L, 441, 444, 447, 447L, 460, 460L.

Select at least 2 units from the following, in consultation with an advisor: ET 301, 301L, 409B, 445, 445L.

TOTAL UNITS	9	TOTAL UNITS	9

Additional requirement for graduation: Three Months full-time work experience: .

Engineering Technology students may waive 6 units of General Education (Categories D.2 and B1a or C or E)

FAQ Concerning Road Maps for Completion of Undergraduate Degrees

For each undergraduate major, the on-line Catalog shows plans for scheduling all required courses to complete the degree in four, five, or six years.

While CSULB will make every effort to schedule classes at the times shown in the plans, we cannot guarantee that courses will be available in specific semesters. It is possible that shortage or budget or of personnel will make it impossible to offer as many classes as we would wish.

The plans are not substitutes for working with an advisor. You are strongly encouraged to see an advisor when planning your program each term.

I am a freshman. Do I have to choose now whether to follow the four, five, or six-year plan?

No. Most freshmen take 12-15 units. You need at least 12 units to receive full financial aid. With experience, you will be able to judge how heavy a load you find comfortable. This will depend on your outside obligations, such as a job, and on your personal circumstances. In theory, each unit requires three hours a week, including preparing for class, attending class, and completing assignments. Use these guidelines to budget your time and plan an appropriate schedule.

Must I take the courses in the semesters shown on the plan?

The plan shows one possible way of completing all requirements for the degree. Consult your advisor about whether it is essential to take a given course in the semester shown. There are some rules to keep in mind:

- 1) You can take the General Education Foundation courses (Composition, Oral Communication, Critical Thinking, Mathematics) in any semester in the first 36 units of baccalaureate-level course work completed at CSULB.
- 2) You cannot take upper division courses until you have completed at least 30 units. (Exceptions can be made for students who already have completed advanced study in the subject.) You cannot take General Education Capstone courses until you have completed at least 60 units.
- 3) For some majors it is essential to complete courses in the correct sequence. You cannot take a more advanced course until you have completed the prerequisite course(s).
- 4) You must complete all requirements for admission to impacted majors within the first 60 units.

I have been told that I must take one or more pre-baccalaureate courses. How can I plan my program?

Your advisor at SOAR can help you identify which courses must be postponed. You must still complete the minimum number of baccalaureate units required for the degree.

You may be able to catch up by taking additional courses in later semesters or by taking classes in summer or winter session, or you may choose to spend an additional semester completing the program. You cannot begin the sequence of required courses for some majors until you are ready for baccalaureate-level Mathematics. See your major advisor to develop a plan for scheduling the required courses.

I didn't complete the exact list of courses shown. Can I still graduate on time?

The answer depends on your major and on what courses you have completed. The plans are not rigid requirements; they are only intended to provide guidance in planning a program. There are many reasons for students to follow a different pattern, such as changing the major, choosing to take fewer classes in a given semester, choosing to complete a minor or a second major. See your advisor for help in planning a program that will work for you.

If I follow the plan, will I have all requirements for graduation completed?

The plans include the specific courses required for the major. For some majors, there are restrictions on the choice of major electives. It is important that you select General Education courses to meet the required distribution pattern. You may need to take an additional General Education course to complete the minimum number of units required for each category. This is likely to happen if you took three-unit courses in Category B, Physical Universe.

Fieldwork Requirements

Fieldwork experience is required for the BS in Engineering Technology (all options) and the BS in Electronics and Computer Engineering Technology (all options), consisting of no less than three months full-time (or equivalent part-time) of employment in an approved industry or governmental agency. The student must hold a position equivalent to a technician or higher which affords the opportunity to exercise responsibility usually given to those who have completed two years of college. The fieldwork must be completed prior to graduation, be certified and approved by the faculty of the Department.

Minor in Web and Technology Literacy (code ET__UM01) (21 units)

Computer Engineering and Computer Science Department

Open to all majors except those seeking a B.S. Engineering Technology option in Technology and Engineering Education.

The minor in Web and Technology Literacy is designed to give students from many majors some valuable internet and web authoring skills and a broad understanding of technology. Digital devices and computers are ubiquitous in our lives, yet most people do not know how they were designed, how they work and how to use them. All CSULB baccalaureate degrees prepare students for the reading, writing, mathematical operations, speaking and critical thinking. This minor will provide the technical skills not included in non-technical degrees, but required for success in a highly technical world.
