# THE CALIFORNIA STATE UNIVERSITY

The individual California State Colleges were brought together as a system by the Donahoe Higher Education Act of 1960. In 1972 the system became the California State University and Colleges, and in 1982 the system became The California State University. Today the campuses of the CSU include comprehensive and polytechnic universities and, since July 1995, the California Maritime Academy, a specialized campus.

The oldest campus, San José State University, was founded in 1857 and became the first institution of public higher education in California. The most recently opened campus, California State University, Monterey Bay, began admitting students in the fall of 1995. The 23<sup>rd</sup> campus, CSU Channel Islands, will open in fall 2002, with freshmen arriving in fall 2003.

Responsibility for the California State University is vested in the Board of Trustees whose members are appointed by the Governor. The Trustees appoint the Chancellor, who is the chief executive officer of the system, and the Presidents, who are the chief executive officers of the respective campuses.

The Trustees, the Chancellor, and the Presidents develop systemwide policy, with actual implementation at the campus level taking place through broadly based consultative procedures. The Academic Senate of The California State University, made up of elected representatives of the faculty from each campus, recommends academic policy to the Board of Trustees through the Chancellor.

Academic excellence has been achieved by the California State University through a distinguished faculty, whose primary responsibility is superior teaching. While each campus in the system has its own unique geographic and curricular character, all campuses, as multipurpose institutions, offer undergraduate and graduate instruction for professional and occupational goals as well as broad liberal education. All of the campuses require for graduation a basic program of "General Education Requirements," regardless of the type of bachelor's degree or major field selected by the student.

The CSU offers more than 1,600 bachelor's and master's degree programs in some 240 subject areas. Many of these programs are offered so that students can complete all upper-division and graduate requirements by part-time late afternoon and evening study, or by distance learning from home or work via computer or television. In addition, a variety of teaching and school service credential programs are available. A number of doctoral degrees are offered jointly with the University of California and with private institutions in California.

Enrollments in fall 2000 totaled 368,252 students, who were taught by more than 21,225 faculty. The system awards more than half of the bachelor's degrees and 30 percent of the master's degrees granted in California. Some 1.94 million persons have been graduated from CSU campuses since 1960.

## Campuses

California State University, Bakersfield, 9001 Stockdale Hwy, Bakersfield, CA 93311-1099 (661) 664-2011 Dr. Tomás A. Arciniega, President

California State University, Channel Islands, One University Drive, Camarillo, CA 93012 (805) 437-8424 Dr. Richard Rush, President

California State University, Chico, 400 West First Street, Chico, CA 95929-0150 (916) 898-6116 Dr. Manuel A. Esteban, President

California State University, Dominguez Hills 1000 East Victoria Street, Carson, CA 90747-0005 (310) 243-3300 Dr. James E. Lyons, Sr., President

California State University, Fresno, 5241 North Maple Avenue, Fresno, CA 93740 (209) 278-4240 Dr. John D. Welty, President

California State University, Fullerton, 800 N. State College Boulevard, Fullerton, CA 92634-9480 (714) 278-2011 Dr. Milton A. Gordon, President

California State University, Hayward, 25800 Carlos Bee Boulevard, Hayward, CA 94542 (510) 881-3000 Dr. Norma S. Rees, President

Humboldt State University, Arcata, CA 95521-8299 (707) 826-3011 Dr. Alistair W. McCrone, President

California State University, Long Beach, 1250 Bellflower Boulevard Long Beach, CA 90840-0115, (562) 985-4111 Dr. Robert C. Maxson, President

California State University, Los Angeles 5151 State University Drive Los Angeles, CA 90032 (323) 343-3000 Dr. James M. Rosser, President

California Maritime Academy, 200 Maritime Academy Drive, Vallejo, CA 94590 (707) 654-1000 Dr. William B. Eisenhardt, President

California State University, Monterey Bay, 100 Campus Center Seaside, CA 93955-8001 (831) 582-3330 Dr. Peter P. Smith, President

California State University, Northridge, 18111 Nordhoff Street Northridge, CA 91330 (818) 885-1200 Dr. Jolene Koester, President

California State Polytechnic University, Pomona, 3801 West Temple Avenue, Pomona, CA 91768 (909) 869-7659 Dr. Bob Suzuki, President

California State University, Sacramento, 6000 J Street, Sacramento, CA 95819 (916) 278-6011 Dr. Donald R. Gerth, President

California State University, San Bernardino 5500 University Parkway, San Bernardino, CA 92407-2397 (909) 880-5000 Dr. Albert Karnig, President

San Diego State University, 5300 Campanile Drive, San Diego, CA 92182 (619) 594-5000 Dr. Stephen L. Weber, President

San Francisco State University, 1600 Holloway Avenue, San Francisco, CA 94132 (415) 338-1111 Dr. Robert A. Corrigan, President

San José State University, One Washington Square, San Jose, CA 95192-0001 (408) 924-1000 Dr. Robert L. Caret, President

California Polytechnic State University, San Luis Obispo, San Luis Obispo, CA 93407 (805) 756-1111 Dr. Warren J. Baker, President

California State University, San Marcos, 333 S. Twin Oaks Valley Rd, San Marcos, CA 92069-0001 (760) 750-4000 Dr. Alexander Gonzalez, President

Sonoma State University, 1801 East Cotati Avenue, Rohnert Park, CA 94928-3609 (707) 664-2880 Dr. Ruben Armiñana, President

California State University, Stanislaus, 801 West Monte Vista Avenue, Turlock, CA 95380 (209) 667-3122 Dr. Marvalene Hughes, President

## Office of the Chancellor

Chancellor – CSU System .....	Dr. Charles B. Reed
Executive Vice Chancellor and Chief Academic Officer .....	Dr. David S. Spence
Associate Vice Chancellor, Academic Affairs .....	Dr. Gary Hammerstrom
Vice Chancellor, Human Resources .....	Ms. Jackie McClain
Executive Vice Chancellor and Chief Business Officer .....	Mr. Richard P. West
Vice Chancellor, University Advancement .....	Mr. Louis Caldera
General Counsel .....	Ms. Christine Helwick

401 Golden Shore  
Long Beach, California, 90802-4210  
(562) 951-4000

## CSU, Long Beach Administration

President .....	Robert C. Maxson
-----------------	------------------

## Office of the President

Executive Assistant to the President .....	Armando Contreras
University Ombuds .....	Elizabeth Novak
Director, Equity and Diversity .....	Jan Reyes
Director, Sports, Athletics, and Recreation .....	William Shumard

## Division of Academic Affairs

Provost and Senior Vice President, Academic Affairs .....	Karl W.E. Anatol
Associate Vice President, Academic Affairs	
Instructional Programs .....	Keith I. Polakoff
Director, Center for Language Minority Education and Research .....	J. David Ramirez
Director, University Projects .....	Sharon Olson
Coordinator, Curriculum Office .....	Janice P. Jackson
Associate Vice President, Academic Affairs Academic Personnel, Planning and Assessment .....	Gary Reichard
Interim Director, Center for Faculty Development .....	Valerie McKay
Director, Employee Relations – Faculty .....	Leslie Nix-Baker
Acting Associate Vice President, Academic Information Technology and Facilities .....	Richard Outwater
Interim Director, Operations .....	Marianne Hata
Director, Academic Computing Services .....	Edwin McBride
Acting Associate Vice President, Graduate Studies and Research .....	Ron Vogel
Director, University Research .....	James Brett
Acting Dean, Undergraduate Studies .....	Dorothy M. Goldish
Director, Academic Advising Center .....	Marilee Samuelson
Director, Center for Athletes Advising Services .....	Gayle Fenton
Director, Center for International Education .....	Paul Lewis
Director, Community Service Learning .....	Patricia Rozee
Director, Interdisciplinary Studies .....	D. Margaret Costa
Director, Learning Assistance Center .....	Gen Ramirez
Director, Multicultural Center .....	James Saucedo
Director, University Honors Program .....	Albie Burke
Director, University 100 .....	Peter Lowentrou
Coordinator, Articulation Office .....	Cecilia Madrid
Coordinator, Intensive Learning Experience .....	Dana Hooten
Dean, College of the Arts .....	Don Para
Associate Dean .....	Holly Harbinger
Director, Carpenter Performing Arts Center .....	Peter Lesnik
Director, University Art Museum .....	Constance Glenn
Dean, College of Business Administration .....	Luis Ma R. Calingo
Associate Dean .....	Mohammed B. Kahn
Acting Associate Dean .....	Newton Margulies
Dean, College of Education .....	Jean Houck
Associate Dean .....	Kathleen Cohn
Associate Dean .....	Claude Goldenberg
Acting Associate Dean .....	Marquita Grenot-Scheyer
Interim Dean, College of Engineering .....	Michael Mahoney
Associate Dean .....	Mihir Das
Associate Dean .....	Tesfai Goitom
Associate Dean .....	Linda Tiggs-Taylor
Dean, College of Health and Human Services .....	Donald Lauda
Associate Dean .....	W. Andrew Sinclair
Dean, College of Liberal Arts .....	Dorothy Abrahamse

Associate Dean .....	David Dowell
Associate Dean .....	Frank Fata
Dean, College of Natural Sciences and Mathematics .....	Glenn M. Nagel
Associate Dean .....	Henry Fung
Associate Dean .....	Robert Loesch
Associate Dean .....	Beth Ambos
Dean, Library Services .....	Roman Kochan
Associate Dean .....	Henry DuBois
Interim Dean, University College and Extension Services .....	Marilyn Crego
Interim Associate Dean .....	Rod Jensen
Assistant Dean and Director, Programs .....	Jack Gregg
Senior Director, Advanced Technology .....	Mat Kaplan
Director, American Language Institute .....	Debra Jonas
WASC Accreditation Liaison .....	David Hood

## Division of Student Services

Vice President for Student Services .....	Douglas W. Robinson
Director, Administrative Services .....	Paula Gleason
Director, Budget and Human Resources .....	Doug Harris
Director, Development .....	Vacant
Director, Housing and Residential Life .....	Stan Olin
Director, Student Health Services .....	Renee Twigg
Chief of Medical Staff .....	Michael Carbute
Program Review Analyst .....	Ray DeLeon
Associate Vice President for Student Services .....	Alan Nishio
Director, Career Development Center .....	Ed Morton
Director, Disabled Student Services .....	David Sanfilippo
Executive Director, Educational Equity Services .....	Howard Wray
Associate Director, Educational Opportunity Program .....	Naomi Uyeda
Director, Educational Information Services / Talent Search .....	Loretta Enriquez-Najera
Director, College Assistance Migrant Program .....	Vivian Barrera
Director, Student Support Services .....	Cherryl Arnold
Director, Upward Bound .....	Willie Elston
Director, Testing and Evaluation Services .....	Susan Mulvaney
Director, University Counseling and Psychological Services .....	Clyde Crego
Director, University Outreach/School Relations .....	Valerie Bordeaux
Associate Vice President/Dean of Students .....	Mike Hostetler
Assistant Dean of Students .....	Stuart Farber
Director, Judicial Affairs .....	Steve Katz
Coordinator, Partners for Success Student/Faculty Mentoring Program .....	Kristen Kendrick
Director, Student Life and Development .....	Jeane Relleve Caveness
Director, Student Transition and Retention Services (STARS) .....	John Karras
Director, Women's Resource Center .....	Marcela Chavez
Associated Students Inc.	
President .....	Wayne Stickney-Smith
Vice President .....	Danny Vivian
Treasurer .....	Rosa Hernandez
ASI Administrator .....	Chris Dollar
Executive Director .....	Richard Haller
Director, Isabel Patterson Child Development Center .....	Rhonda Marikos
Director, University Student Union .....	Eugene Minter

## Division of Administration and Finance

Vice President for Administration and Finance .....	William H Griffith
Assistant Vice President, Administration and Finance .....	Carol Johnson
Assistant Vice President, Sponsored Programs .....	Elena Macias
Director, Common Management Systems Project .....	Janet Foster
Director, Internal Auditing .....	Kathleen Hext
Director, Property Development .....	Modris Tidemanis
Associate Vice President for Budget & Human Resources Management .....	Robyn Mack
Director, Budget and Human Resources Information Systems .....	Janet Parker
Director, Employee Relations – Staff .....	Leslie Nix-Baker
Director, Payroll and Benefit Services .....	Sandra Gunderson

Director, Safety and Risk Management .....	Maryann Rozanski
Director, Staff Personnel Services .....	Tom Angell
Associate Vice President for Financial Management .....	Joseph A Latter
Director, Procurement and Support Services .....	Charles Hughes
Controller .....	Shawn McCown
Bursar .....	Nancy Eckhous
Executive Director of Foundation .....	Robert Behm
Associate Vice President for Information Management and Analysis .....	Ronald A Lee
Director, Institutional Research .....	Van Novack
Assistant Vice President for Information Technology Services .....	Richard Timboe
Director, Administrative Computing Services .....	Michael Markoski
Director, Telecommunications/Resource Management .....	Char Hankey
Director, Network Services .....	Steve La
Assistant Vice President for Enrollment Services .....	Thomas Enders
Senior Director, Admission and Systems .....	Gloria Kapp
Associate Director, Admission .....	Fay Denny
Director, Academic Support and Student Relations .....	Helen Batchelor
Assistant Director, Student Relations .....	Vacant
Associate Director, Records and Evaluation .....	Susan Alvarez
Director, Financial Aid .....	Dean Kulju
Associate Director, Financial Aid – Systems .....	Janice Miller
Associate Director, Financial Aid – Student Relations .....	Tamie Nguyen
Associate Vice President for Physical Planning and Facilities Management .....	Scott Charmack
Senior Director, Parking and Access Services .....	Thomas Bass
Associate Director .....	Ignacio Carrillo
Field Services Operation Manager .....	Alan Moore
Director, Physical Planning .....	Susan Brown
Assistant Director – Space and Facilities .....	Jeanne O'Dell
Assistant Director – Planning and Design Services .....	Michael Kelly
University Architect .....	David Castro
University Construction Manager .....	Dale R Hartmann
University Construction Manager .....	Mike Jasminski
Director, Facilities Management .....	Robert Quirk
Assistant Director .....	Suzanne Wallace
Manager, Custodial Services .....	Richard Hernandez
Manager, Grounds/Landscape Services .....	Eric Johnson
Associate Director .....	Dewayne Wolfe
Associate Director .....	Tim Ball
Chief, University Police .....	Jack Pearson
Captain for Field Operations .....	Stan Skipworth

## Division of University Relations and Development

Vice President, University Relations and Development .....	Robert Bersi
Director, Division Operations .....	Oliver Bohlman
Assistant Vice President, Estate Planning and Endowment Development .....	David Harrison
Director, Prospect Management and Research .....	David Corey
Assistant Director, Prospect Research .....	Lori Evans
Senior Researcher .....	Barbara McClinton
Director, Alumni Records/Systems Manager .....	Brian Lawver
Assistant Director, Development Information Systems .....	Julie Wilson
Director, Special Projects .....	Gary Colboth
Associate Vice President, Development .....	Aristide Collins
Director, Development, College of the Arts .....	Ann Allen
Director, Development, College of the Arts .....	Cookie Braude
Director, Development, College of Business Administration .....	Leslie Patterson
Director, Development, College of Education .....	Barbara Holden
Director, Development, College of Engineering .....	Terri McDermot
Senior Director, Development, College of Health and Human Services .....	Nancy H. Roberts
Director, Development, College of Liberal Arts .....	Diana Walker
Director, Development, College of Natural Sciences and Mathematics .....	Patricia Maxwell
Director, Women and Philanthropy .....	Joy Phillips

General Manager, KLON .....	Judy Jankowski
Assistant Vice President for Alumni Relations/Annual Giving .....	Janice Hatanaka
Executive Director, Individual and Corporate Giving .....	Pong Devera
Director, Alumni Relations .....	Gay Arakawa
Director, Annual Fund .....	Tracy Mendoza
Director, Special Events .....	Sally Schliesmayer
Director, the Earl Burns Miller Japanese Garden .....	Jeanette Schelin
Special Events Coordinator, Japanese Garden .....	Lynette Gahafer
Assistant Vice President for Public Affairs/Publications .....	Toni Beron
Director, Media Relations .....	Rick Gloady
Senior Writer .....	Richard Manly
Senior Editor .....	Barbara Parks
Director, New Media Communications .....	Doug Cox
Public Information Specialist .....	Shayne Schroeder
External Communications Editor .....	Anne Ambrose
Photographer .....	David Nelson
Photographer .....	Victoria Sanchez

# ADMISSION TO THE UNIVERSITY

## Admissions Procedures and Policies

Requirements for admission to California State University, Long Beach are in accordance with Title 5, Chapter 1, Subchapter 3, of the California Code of Regulations. If you are not sure of these requirements you should consult a high school or community college counselor or CSU campus Admissions office.

Electronic versions of the CSU undergraduate and graduate applications are accessible on the World Wide Web at <http://www.csumentor.edu>. The CSUMentor system allows students to browse through general information about CSU's twenty-three campuses, view multimedia campus presentations, send and receive electronic responses to specific questions, and apply for admission and financial aid. Information on CSULB requirements and deadlines can be found at [www.csulb.edu](http://www.csulb.edu).

Applications may be obtained online or at any California high school or community college or from the Admissions Office at any of the campuses of the California State University.

## Importance of Filing Complete, Accurate, and Authentic Application Documents

CSU, Long Beach advises prospective students that they must supply complete and accurate information on the application for admission, residence questionnaire, and financial aid forms. Further, applicants must submit authentic and official transcripts of all previous academic work attempted. Failure to file complete, accurate, and authentic application documents may result in denial of admission, cancellation of academic credit, suspension, or expulsion (Section 41301 of Title 5, California Code of Regulations).

## Undergraduate Application Procedures

Prospective students applying for part-time or full-time undergraduate programs of study in day or evening classes must file a complete undergraduate application. The \$55 nonrefundable application fee should be in the form of a check or money order payable to "The California State University" and may not be transferred or used to apply to another term. An alternate campus and major may be indicated on the application, but applicants should list as an alternate campus only a CSU campus that also offers the major. Generally, an alternate major will be considered at the first choice campus before an application is redirected to an alternate choice campus.

## Readmission

Students who break attendance by not enrolling in classes each semester, and who have not filed for educational leave, must reapply for admission. Transcripts of work completed elsewhere during the absence must also be submitted. If the absence exceeds three years, all transcripts must be replaced with official copies. Students who left under academic disqualification must submit an Academic Appeals Petition with their completed applica-

tion prior to August 1 for Fall semester or December 1 for Spring semester.

## Impacted Programs

The CSU designates programs as impacted when more applications are received in the filing period (October and November for fall terms, August for spring terms) than can be accommodated. Some programs are impacted at every campus where they are offered; others are impacted only at some campuses. You must meet supplementary admission criteria if applying to an impacted program.

The CSU will announce during the fall filing period which programs are impacted and the supplementary criteria campuses will use. That announcement will be published in the *CSU Review*, and distributed to high school and college counselors, and available online at <http://www.calstate.edu/AR/csureview/>. Information about the supplementary criteria also is sent to program applicants.

You must file your application for admission to an impacted program during the initial filing period. If you wish to be considered for an impacted program at two or more campuses, you must file an application to each campus.

## Supplementary Admission Criteria

Each campus with impacted programs uses supplementary admission criteria in screening applicants. Supplementary criteria may include ranking on the freshman eligibility index, the overall transfer grade-point average, completion of specified prerequisite courses, and a combination of campus-developed criteria. If you are required to submit scores for either the SAT I or the ACT and are applying for fall admission, you should take the test as early as possible and no later than October of the preceding year if applying for fall admission.

The supplementary admission criteria used by the individual campuses to screen applicants appear periodically in the *CSU Review* and are sent by the campuses to all applicants seeking admission to an impacted program.

Unlike unaccommodated applicants to locally impacted programs who may be redirected to another campus in the same major, unaccommodated applicants to systemwide impacted programs may not be redirected in the same major but may choose an alternate major either at the first choice campus or another campus.

## Application Filing Periods

Terms in 2002 - 2003	Applications First Accepted	Initial Filing Period
Fall 2002	October 1, 2001	Oct 1 - Nov 30, 2001
Spring 2003	August 1, 2002	August 1-31, 2001

## Filing Period Duration

Each campus accepts applications until capacities are reached. Many campuses limit undergraduate admission in an enrollment category because of overall enrollment limits. If applying after the initial filing period, consult the campus admissions office for current information.

## Application Acknowledgment

You may expect to receive an acknowledgment from your first choice campus within two to four weeks of filing the application. The notice may also include a request that you submit records for the campus to evaluate your qualifications. An offer of admission not transferable to another term or to another campus.

## Undergraduate Requirement Deadlines

It is expected that all admission requirements — including subject requirements, unit minimums, and grade point averages — will be completed in a timely manner prior to matriculation. All requirements for a Fall semester admission must be completed by the previous Spring term. Courses taken in the Summer term prior to transfer are not used in a Fall admission decision. All requirements for a Spring semester admission must be completed by the previous Summer term. Courses taken during the Fall term prior to transfer are not used in a Spring admission decision. While not used in determining admission eligibility, applicable courses taken during the term prior to transfer may be credited towards the bachelor's degree.

## Preparation and Eligibility

### Undergraduate Admission Requirements — Freshmen

CSULB introduces competitive admissions for Fall 2002/ Spring 2003. First-time freshmen must:

- Apply on time, preferably on-line. Apply between October 1 and November 30, 2001.
- Take the SAT 1 or ACT during October but no later than December, 2001 and request scores be sent to CSULB.
- Complete the CSU required 15 unit course pattern prior to graduation.
- Perform well – earn the best grades you can (including your senior year).
- Pursue a back up plan should you not be offered admission to CSULB.

You will qualify for regular admission when the university verifies that you have a CSULB qualifiable eligibility index and will have completed the comprehensive pattern of college preparatory subjects and, if applying to an impacted program, meet supplementary criteria.

### Eligibility Index

The eligibility index is the combination of your high school grade-point average and your score on either the ACT or the SAT. Your grade-point average is based on grades earned during your final three years of high school (excluding physical education and military science) and bonus points for approved honors courses. Beginning with admission for Fall 2004, the high school grade-point average will be based solely on courses taken in the final three years of high school that satisfy the comprehensive pattern of college preparatory subject requirements.

Up to eight semesters of honors courses taken in the last two years of high school, including up to two approved courses taken in the tenth grade, can be accepted. Each unit of "A" in an honors course will receive a total of 5 points; "B," 4 points; and "C," 3 points.

You can calculate the index by multiplying your grade-point average by 800 and adding your total score on the SAT I. If you took the ACT, multiply your grade-point average by 200 and add ten times the ACT composite score (add 2 points to the ACT score you received if taken prior to October, 1989). If you are a California high school graduate (or a resident of California for tuition purposes), you need a minimum index of 2900 using the SAT I or 694 using the ACT to be considered for admission.

If you neither graduated from a California high school nor are a resident of California for tuition purposes, you need a minimum index of 3502 (SAT I) or 842 (ACT; add 2 points to your ACT score if taken prior to October, 1989). Graduates of secondary schools in foreign countries must be judged to have academic preparation and abilities equivalent to applicants eligible under this section.

California State University, Long Beach requires all applicants for freshman admission to submit test scores from the SAT I or ACT, regardless of your high school grade-point average. No freshman applicants will be admitted who have not submitted the required test scores.

Graduates of secondary schools in foreign countries must be judged to have academic preparation and abilities equivalent to applicants eligible under this section.

### Subject Requirements

The California State University requires that first-time freshman applicants complete, with grades of "C" or better, a comprehensive pattern of college preparatory study totaling 15 units. A "unit" is one year of study in high school. Within the 15 units completed, up to one unit (one year) in visual and performing arts or foreign language may be missing and offset by a college preparatory course(s) in other areas. The missing unit of visual and performing arts or foreign language must be completed either prior to, or by the end of the first year of, CSU enrollment. This provision is effective through the 2002-2003 academic year.

*English* – 4 years

*Mathematics* – 3 years: algebra, geometry, and intermediate algebra

*U.S. History or U.S. History and Government* - 1 year

*Science* – 1 year with laboratory: biology, chemistry, physics, or other acceptable laboratory science

*Foreign Language* – 2 years in the same language (subject to waiver for applicants demonstrating equivalent competence).

*Visual and Performing Arts* – 1 year: art, dance, drama/ theater, or music

*Electives* – 3 years: selected from English, advanced mathematics, social science, history, laboratory science, foreign language, visual and performing arts.

Applicants seeking admission as first-time freshmen for the fall 2003 or later terms will have the same preparatory course requirements for admission to either the California State University or the University of California. The preparatory course admission requirements will be the completion of following courses with a grade of "C" or better: four years of English, three years of mathematics (algebra, geometry, and advanced algebra), two years of social science including one year of U.S. history, two years of laboratory science

(must include one year of life science and one physical science), two years of foreign language, one year of visual or performing arts, and one year of electives chosen from one of the areas above.

### Foreign Language Waiver

The foreign language subject requirement may be satisfied by applicants who demonstrate competence in a language other than English equivalent to or higher than expected of students who complete two years of foreign language study. Consult with your school counselor or any CSU campus admission or relations with schools office for further information.

### Subject Requirement Substitution for Students with Disabilities

Applicants with disabilities are encouraged to complete college preparatory course requirements if at all possible. If an applicant is judged unable to fulfill a specific course requirement because of his or her disability, alternate college preparatory courses may be substituted for specific subject requirements. Substitutions may be authorized on an individual basis after review and recommendation by the applicant's academic advisor or guidance counselor in consultation with the director of a CSU disabled student services program. Although the distribution may be slightly different from the course pattern required of other students, students qualifying for substitutions will still be held for 15 units of college preparatory study. Students should be aware that course substitutions may limit later enrollment in certain majors, particularly those involving mathematics. For further information and substitution forms, please call the Director of Disabled Student Services at (562) 985-5401.

### Honors Courses

Grades, in up to eight semester courses designated as honors courses in approved subjects and taken in the last two years of high school, receive additional points in grade-point average calculations. Each unit of A in approved courses will receive a total of 5 points; B, 4 points; C, 3 points; D, 1 point; and none for F grades.

### High School Students — Young Scholars Program

Students still enrolled in high school will be considered for enrollment in certain special programs if recommended by the principal and the appropriate campus department chair and if preparation is equivalent to that required of eligible California high school graduates. Such admission is only for a given program and does not constitute the right to continued enrollment. Please contact the Office of University Outreach and School Relations for more information.

### Provisional Admission

California State University, Long Beach may provisionally admit first-time freshman applicants based on their academic preparation through the junior year of high school and planned for the senior year. The campus will monitor the senior year of study to ensure that those so admitted complete their senior year of studies satisfactorily, including the required college preparatory subjects, and graduate from high school.

California State University, Long Beach may provisionally admit transfer applicants based on their academic preparation and courses planned for completion. The campus will monitor the final terms to ensure that those admitted complete all required courses satisfactorily.

### Transfer Applicants

If you have completed college units after graduation from high school, you are considered a transfer student. Students who have completed 55 or fewer transferable semester college units (83 quarter units) by the established deadlines are considered lower-division transfer students. CSULB does not currently accept applicants at the lower-division level. Students who have completed 56 or more transferable semester college units (84 quarter units) by the established deadlines are considered upper division transfer students. (See Undergraduate Requirement Deadlines above.)

You will qualify for admission as an upper-division transfer student if you meet the following standards prior to transfer:

1. Have completed 56 or more transferable units (84 quarter units).
2. Have a college grade-point average of at least a 2.0 or better (2.4 for non-California residents) in all transferable college units attempted.
3. Are in good standing at the last college or university attended.
4. Have completed at least 30 semester units (45 quarter units) of courses equivalent to general education requirements with a grade of "C" or better. The 30 units must include all of the general education requirements in communication in the English language (English composition, oral communication, and critical thinking) and at least one course of at least 3 semester units (4 quarter units) of general education, college level mathematics.

### Lower-Division Transfer

California State University, Long Beach does not admit lower-division transfer students.

### Test Requirements

Freshman applicants must submit scores directly to CSULB from either the ACT or the SAT I of the College Board. You should take the test no later than October or November. Registration forms and the dates for the SAT I or ACT are available from high school or college counselors or from a CSU campus testing office. Or students may write to or call:

The College Board (SATI)	ACT Registration Unit
Registration Unit, Box 6200	P.O. Box 414
Princeton, NJ 08541-6200	Iowa City, Iowa 52243
(609) 771-7588	(319) 337-1270
www.collegeboard.org	www.act.org

### TOEFL Requirement

All undergraduate applicants, regardless of citizenship, who have not attended schools at the secondary level or above for at least three years full time where English is the principal language of instruction must present a score of a minimum of 500 on the Test of English as a Foreign Language (TOEFL) (applicants taking the Computer-Based Test of English as a Foreign Language must present a score of 173 or above), unless the applicant:

1. has proof of at least three years attendance at a secondary level educational institution in a country where English was the principal language of instruction.\* CSULB interprets "where English was the principal language of instruction" to mean that a school is located in a country where English is the native language (the daily medium of communication of the majority of residents is English), and that the students receive academic instruction in all subjects (except foreign language courses) at all levels of education in English, or
2. completed at least 56 transferable units from accredited U.S. community colleges and/or universities and earned a grade of A, B, or C in English 100 or its equivalent\*, or
3. successfully completed CSULB's American Language Institute's Intensive English Language Program.\*

Undergraduate applicants who are U.S. Citizens or Permanent Residents of the U.S. and who are subject to the above TOEFL requirement may submit results from the English Language Proficiency Test (ELPT) in lieu of TOEFL. A score of 954 on the ELPT is required of such applicants.

EXCEPTION: Applicants applying for Film and Electronic Arts, which requires a 550 TOEFL score, and Journalism, which requires a 600 TOEFL score, will not be waived from the TOEFL requirement.

\*For this exemption to remain valid, once having met the exemption, the student must not have left the U.S.A. for more than two years to reside or study in a country where English is not the predominant language of business, education and day-to-day societal functions.

### Special Consideration

A very limited number of applicants who do not meet regular admission requirements may be considered by the University through an alternate screening process. As part of this review, admission may be offered based on institutional interests, special talents, or special circumstances. The authority to grant special admission is delegated to the Assistant Vice President of Enrollment Services based on the recommendations of the appropriate campus committees.

### Systemwide Placement Test Requirements

The California State University requires each entering undergraduate, except those who qualify for an exemption, to take the CSU Entry Level Mathematics (ELM) examination and the CSU English Placement Test (EPT) prior to enrollment. These placement tests are not a condition for admission to the CSU, but they are a condition of enrollment. They are designed to identify entering students who may need additional support in acquiring basic English and mathematics skills necessary to succeed in CSU baccalaureate-level courses. Undergraduate students who do not demonstrate college-level skills both in English and in mathematics will be placed in appropriate remedial programs and activities during the first term of their enrollment. Students placed in remedial programs in either English or mathematics must complete all remediation in their first year of enrollment. Failure to complete remediation by the end of the first year may result in denial of enrollment for future terms.

Students register for the EPT and/or ELM at their local CSU campus. Questions about test dates and registration materials may be addressed to Testing and Evaluation Services, Brotman Hall (BH) - 216.

### English Placement Test (EPT)

The EPT is designed to assess the level of reading and writing skills of entering undergraduate students so that they can be placed in appropriate baccalaureate-level courses. The CSU EPT must be completed by all entering undergraduates, with the exception of those who present proof of one of the following:

- A score of 550 or above on the verbal section of the College Board SAT I Reasoning Test taken April 1995 or later.
- A score of 24 or above on the enhanced ACT English Test taken October 1989 or later.
- A score of 680 or above on the re-centered and adjusted College Board SAT II: Writing Test taken May 1998 or later.
- A score of 3, 4, or 5 on either the Language and Composition or the Composition and Literature examination of the College Board Scholastic Advanced Placement program.
- Completion and transfer of a course that satisfies the General Education-Breadth or Intersegmental General Education Transfer Curriculum (IGETC) written communication requirement, provided such course was completed with a grade of "C" or better.

To file for one of the above exemptions, you may obtain an Exemption Form from Testing and Evaluation Services (562) 985-4007. Information bulletins and registration materials for the EPT will be mailed to all students subject to the requirements. The materials may also be obtained from the Office of Enrollment Services or from Testing and Evaluation Services. EPT registration does not require a fee.

\*NOTE: The College Board SAT and Achievement Tests were replaced by SAT I and SAT II, respectively, beginning March 1994. Beginning April 1, 1995, the SAT I and SAT II exams have been scored on a new scale.

### Entry-Level Mathematics (ELM) Examination Placement

The ELM examination is designed to assess the skill levels of entering CSU students in the areas of mathematics typically covered in three years of rigorous college preparatory mathematics courses in high school (Algebra I, Algebra II, and Geometry). The CSU ELM must be completed by all entering undergraduates, with the exception of those who present proof of one of the following:

- A score of 550 or above on the mathematics section of the College Board SAT I Reasoning Test or on the College Board SAT II Mathematics Tests Level I, IC (Calculator), II, or IIC (Calculator).
- A score of 23 or above on the American College Testing Mathematics Test.
- A score of 3 or above on the College Board Advanced Placement mathematics examination (AB or BC) or Statistics examination.
- Completion and transfer of a course that satisfies the General Education-Breadth or Intersegmental General Education Transfer Curriculum (IGETC) quantitative reasoning requirement, provided such course was completed with a grade of "C" or better.

Information bulletins and registration materials for the EPT and ELM will be mailed to all students subject to the requirements. Required exams will be indicated in the Letter of

Admission. The materials may also be obtained from the Office of Enrollment Services or Testing and Evaluation Services. There is a \$16.00 registration fee for the ELM.

### Writing Proficiency Examination (WPE)

All candidates for degrees and certificates must demonstrate competency in writing skills as a requirement for graduation. At CSULB every student must pass the Writing Proficiency Examination (WPE) to be certified proficient in written composition in English.

The Writing Proficiency Examination is a junior-year requirement. The test must be taken by the end of the semester in which an undergraduate student earns 65 or more units. Transfer students with 65 or more units must take the WPE within the first semester of residency at CSULB.

Undergraduate students who do not attempt the test by the time they attain 65 units will have a hold placed on their Voice Response Registration. Registration for the test does not by itself release this hold. The VRR hold will not be released until two weeks after the test date. A request for deferment, for compelling reasons, can be filed at the Office of Testing and Evaluation Services, BH-216, (562) 985-4007. In certain circumstances, a contract can be submitted to release a VRR hold temporarily. Students must attempt the WPE prior to filing a Request to Graduate.

The responsibility for acquiring the skills necessary to pass the examination is the student's. Regular courses to improve writing skills are available in the University or through University College and Extension Services. Please see WPE Preparation and Review, in the section of the catalog called "Undergraduate Programs." Counseling and other assistance are available through the WPE Advising Center, located in the Learning Assistance Center, Library East-012.

The examination may be retaken as many times as necessary. However, students who have failed the WPE twice must seek advisement from the WPE Advisory Center and show evidence that they have followed advisor recommendations regarding coursework, tutoring, or other assistance with English language skills before they will be allowed to register for a third attempt. Two 3-hour workshops are offered just prior to each test administration. Information regarding the administration of this examination may be obtained from the Office of Testing and Evaluation Services, BH-216, (562) 985-4007. To cover the costs of administration and scoring, a fee will be charged each time the examination is taken.

### Graduate and Postbaccalaureate Application Procedures

All graduate and postbaccalaureate applicants (e.g., master's degree applicants, those seeking credentials, and those seeking certificates) must file a complete graduate application as described in the graduate and postbaccalaureate admission booklet. Applicants seeking a second bachelor's degree should submit the undergraduate application for admission. Postbaccalaureate students who wish to continue their education for personal enrichment but without seeking a degree, credential, or certificate may only enroll through University College and Extension Services. CSULB does not admit postbaccalaureate unclassified students. Applicants who completed undergraduate degree requirements and graduated the preceding term or graduate students seeking to change their degree program are also

required to complete and submit an application and the \$55 nonrefundable application fee. Since applicants for postbaccalaureate programs may be limited to the choice of a single campus on each application, redirection to alternate campuses or later changes of campus choice will be minimal. To be assured of initial consideration by more than one campus, it will be necessary to submit separate applications (including fees) to each. Applications may be obtained from the Admissions Office of any California State University campus in addition to the sources noted for undergraduate applications. An electronic version of the CSU graduate application is available on the World Wide Web at: <http://www.csumentor.edu>.

### Graduate and Postbaccalaureate Admission Requirements

Graduate and postbaccalaureate applicants may apply for a degree objective, a credential or certificate objective. Depending on the objective, the CSU will consider an application for admission as follows:

- General Requirements – The minimum requirements for admission to graduate and postbaccalaureate studies at CSULB are in accordance with university regulations as well as Title 5, chapter 1, subchapter 3 of the California Code of Regulations. Specifically, a student is to:
  1. have completed a four-year college course of study and hold an acceptable baccalaureate degree from an institution accredited by a regional accrediting association, or is to have completed equivalent academic preparation as determined by appropriate campus authorities;
  2. be in good academic standing at the last college or university attended;
  3. have attained a grade-point average of at least 2.5 (A = 4.0) in the last 60 semester (90 quarter) units attempted (excluding lower-division and extension coursework taken after the degree); and
  4. satisfactorily meet the professional, personal, scholastic, and other standards for graduate study, including qualifying examinations, as appropriate campus authorities may prescribe. In unusual circumstances, a campus may make exceptions to these criteria.

If you meet the minimum requirements for graduate and postbaccalaureate studies, you will be considered for admission in one of the three following categories:

- Postbaccalaureate Classified – If you wish to enroll in a credential or certificate program, you will be required to satisfy professional, personal, scholastic, and other standards, including qualifying examinations, prescribed by the campus; or
- Graduate Conditionally Classified – You may be admitted to a graduate degree program in this category if, in the opinion of appropriate campus authority, you can remedy deficiencies by additional preparation; or
- Graduate Classified – To pursue a graduate degree, you will be required to fulfill all of the professional, personal, scholastic, and other standards, including qualifying examinations, prescribed by the campus.

## Graduate and Postbaccalaureate TOEFL Requirement

All graduate and postbaccalaureate applicants, regardless of citizenship, whose preparatory education was principally in a language other than English must demonstrate competence in English. These students must receive a minimum score of 550 on the Test of English as a Foreign Language (TOEFL) (applicants taking the Computer-Based Test of English as a Foreign Language must present a score of 213 or above), unless the applicant:

1. Submits proof of having obtained a bachelor's degree from an accredited post-secondary institution where English was the principal language of instruction. CSULB interprets "where English is the principal language of instruction" to mean that a school is located in a country where English is the native language (the daily medium of communication of the majority of residents is English), and the applicant received academic instruction in all subjects (except foreign language courses) at all levels of education in English, or
2. Notification from CSULB's American Language Institute that the applicant has successfully completed levels 5 and 6 of the American Language Institute Program.

EXCEPTION: Applicants applying for Public Policy and Administration, which requires a 600 TOEFL, will not be waived from the TOEFL requirement. Also, for this exemption to remain valid for other students, once having met the exemption, the student must not have left the U.S.A. for more than two years to reside or study in a country where English is not the predominant language of business, education and day-to-day societal functions.

## Auditors

Persons who have not been accepted by the University for the semester they wish to attend may request permission to audit courses through University College and Extension Services.

Students who have been accepted by the University may audit courses. See the regulation under "Grades and Administrative Symbols." The deadline to declare an "audit" grade option is the end of the third week of instruction. Follow the instructions in the *Schedule of Classes* for requesting a course as an "audit" grading option. At the end of the semester the instructor will assign an "audit" grade to the official grade sheet which will be forwarded to the Office of Enrollment Services for recording. Courses taken for audit may be repeated in subsequent terms for credit.

Courses successfully audited are listed on the student's academic record but carry no credit or grade points.

## Adult Students

As an alternative to regular admission criteria, an applicant who is twenty-five years of age or older may be considered for admission as an adult student if he or she meets all the following conditions:

1. Possesses a high school diploma (or has established equivalence through either the Tests of General Educational Development or the California High School Proficiency Examination).
2. Has not been enrolled in college as a full-time student for more than one term during the past five years.
3. If there has been any college attendance in the last five years, has earned a "C" average or better in all college work attempted.

Consideration will be based upon a judgment as to whether the applicant is as likely to succeed as a regularly admitted freshman or transfer student and will include an assessment of basic skills in the English language and mathematical computation.

## Senior Citizen Education Program

California State University Long Beach, is pleased to continue the Senior Citizen Education Program on campus. This program enables eligible California residents who are 60 years of age or older to enroll as regular students at a cost of \$3.00 per semester. The program, which was founded at CSULB, has been in operation since 1975. Individuals are attending courses in a variety of subject areas and class levels from freshman through graduate standing.

Note: Regular admission standards apply for those individuals seeking a degree. Requests to waive the application filing fee must accompany the application. Once admitted to the University, registration information will be sent to the student advising them of the procedures for fee payment and the dates that they may register. Courses are available to program participants approximately three weeks before the beginning of each semester on a "space available" basis. Due to high enrollment and impacted programs some courses may not be available for participation by Senior Citizens.

Participants in the Senior Citizen Education Program are required to maintain good academic standing and are subject to all university policies, procedures, late fee payments and deadlines.

## Returning Students

Returning students must reapply to the university under the same conditions and deadlines as all other applicants.

Students who have not maintained continuous attendance status are subject to the General Education requirements in effect at the time of their re-entry to the University with the following exceptions:

Previous CSULB students who completed their entire lower-division general education package before returning to CSULB, will not be held for additional general education requirements except for the 9 upper-division capstone general education units.

Previous CSULB students who were under the pre-1981 general education requirements AND who before leaving the University completed 90 or more units, including 24 general education units in categories 1-5 (with at least one course in each area) will not be held to post-1981 general education requirements other than the requirement of 9 upper-division units. Such students may satisfy the general education mandate by completing the pre-1981 40-unit requirements appropriately and completing the 9 unit upper-division requirement (overlap is permitted).

California Community College transfer students who provide official full certification of general education requirements will not be held for additional general education requirements except for the 9 upper-division capstone general education units including the Human Diversity requirement.

## Insurance Requirement

Effective August 1, 1995, as a condition of receiving an I-20 or IAP-66 form, all F-1 and J-1 visa applicants must agree to obtain and maintain health insurance as a condition of registration and continued enrollment in the California State University. Such insurance must be in amounts as specified by the United States Information Agency (USIA) and NAFSA: Association of International Educators. The campus President or designee will determine which insurance policies meet these criteria. Further information may be obtained from the Center for International Education, Brozman Hall 201, (562) 985-4106.

## Hardship Petitions

The campus has established procedures for consideration of qualified applicants who would be faced with extreme hardship if not admitted. Petitioners should write the Admissions Office regarding specific policies governing hardship admission. (See Admissions Procedures and Policies at the beginning of this Section.)

## Concurrent Enrollment

All CSULB students wishing to enroll concurrently at CSULB and one of the other 23 California State University campuses must request permission to do so from Enrollment Services. Concurrent enrollment within The California State University system is limited to students who have completed a minimum of 12 units at CSULB, have a minimum 2.0 grade-point average, are in good academic standing and have paid fees at CSULB for 12 units or more. No additional fees may be collected after the last day to add classes. Concurrent Enrollment is subject to space availability and registration priority policies at the host campus.

Upper-division students wishing to have concurrent enrollment at CSULB and another institution outside of The California State University system must request permission from Enrollment Services.

No graduate student may register concurrently at this and any other collegiate institution without advance permission. Permission may be given for concurrent enrollment at CSULB and other institutions if recommended by the department graduate advisor and approved by the Dean of the appropriate college. Forms for concurrent enrollment may be obtained from the college office. When such permission is granted, the academic load at CSULB must be reduced accordingly.

## Visitor Enrollment Within the CSU

Students enrolled in any CSU campus may apply to transfer temporarily to another CSU campus in Visitor status, if they have (1) completed 12 units at the home campus, (2) have earned at least a 2.0 cumulative GPA at the home campus, (3) are in good academic standing at the home campus, and (4) are eligible to register under continuing status at the home campus. Approval for visitor enrollment is valid for one term only and is subject to the host campus policies including application deadlines, space availability, and registration priority. Details and Visitor Enrollment Applications are available at the Office of Enrollment Services. Students from other CSU campuses seeking visitor status at CSULB must also contact their home registration office for additional information.

## Other Applicants

Applicants not admissible at this time under any of the preceding provisions are advised to enroll in another institution, such as a community college, to prepare for admissibility at a future date.

Open University (Adjunct Enrollment) — Through Open University, students who are NOT matriculated in the University may take regular University classes for academic credit on a "seat available" basis with permission of the department chairperson and the course instructor. Open University enrollment does NOT constitute admission to CSULB. Students may apply up to 24 units of Open University Credit toward a baccalaureate degree. At the option of the appropriate college and department, up to 6 units of Open University Credit may be applied to a graduate degree. This limit may be increased to 9 units in some instances. For specifics, check with the department chair. For more information call University College and Extension Services at (562) 985-5561.

University College and Extension Services — University College and Extension Services (UCES) programs are designed to meet the personal and professional development learning needs of the community. Through its credit and non-credit classes, certificate programs, seminars and special programs, teleconferences, and customized work-site training, UCES brings the resources of CSULB to individuals and groups in formats convenient to their life/work situations. UCES' Integrated Distance Education for Adult Students (IDEAS) is currently developing courses for delivery on the World Wide Web. Unless they are offered in fulfillment of a degree program, Special Sessions courses do not require admission to CSULB. Visit the Web site at: <http://www.ideas.uces.csulb.edu/on-line>. UCES also administers the summer and winter session programs, in addition to a variety of credit courses throughout the academic year. For a free bulletin of current offerings, call (562) 985-5561 or stop by the UCES office, located at Foundation Education Center (FEC) - 104, 6300 State University Drive.

## Visitors

The University restricts attendance in class sessions to those who have been formally registered in the course and who maintain good standing as students. Please see "Audit" and "Visitors to Classes" under General Regulations.

## Summer Session and Winter Session Students

Summer and Winter Sessions enrollment is open to all CSULB students, prospective students, students from other colleges and universities, and interested individuals from the community. No application or admissions process is required for summer and winter registration.

Registration in Summer as an Open University student does not insure the privilege of enrolling in the fall or spring semester. To register for Summer and Winter Sessions courses, students should contact University College and Extension Services at (562) 985-5561.

## Student Orientation, Advising and Registration (SOAR)

If you are an incoming freshman or a transfer student, you are encouraged to participate in the Student Orientation, Advising, and Registration (SOAR) program. SOAR will assist you in planning your course schedule and in register-

ing for your classes. An invitation to SOAR will be mailed to you. There is a separate fee to participate which includes the cost of the mid-day meal, a copy of the *University Catalog*, the *Schedule of Classes*, and other materials.

### Registration Procedures

When admission or re-admission requirements have been satisfied, the student is eligible to register for classes at the University. Undergraduate students new to the University will receive information about the Student Orientation, Advising and Registration Program (SOAR) which is designed to help the new student with registration procedures. It should be noted that no new undergraduate student will be allowed to register for classes prior to SOAR. Registration for students not participating in SOAR will be conducted after all of the SOAR workshops are concluded.

Students returning to CSULB after an approved educational leave will receive registration information in the mail. Returning students should purchase the *Schedule of Classes* in the University Bookstore before registration. Registration dates, times and detailed instructions are included in the *Schedule of Classes* and at [www.csulb.edu/enrollment](http://www.csulb.edu/enrollment).

Students are not permitted to attend any class for which they have not officially registered. The deadline to register is the end of the third week of classes.

NOTE: Admission and readmission deadlines are much earlier.

### Adding Classes

Students may add classes by Voice Response Registration (VRR) for the first two weeks of the semester. During the third week of the semester written permission, on a Late Registration Request form, is required from the instructor and a stamp of approval is required from the department.

Students receiving permission to add classes by VRR or who have been added to an instructor's wait list or roster must complete the add procedures by the dates listed each semester in the *Schedule of Classes*. No request to add classes will be considered after the third week of the semester unless there is an approved technical error.

Note: Instructors, advisors and departments cannot add students into classes. The add procedures must be completed by the student.

### Advanced Placement

California State University, Long Beach grants credit toward its undergraduate degrees for successful completion of examinations of the Advanced Placement (AP) Program of the College Board. Students who present scores of three or better will be granted up to six semester units (nine quarter units) of college credit for each AP course.

Applicants to CSULB who wish to obtain lower division course credit for completed International Baccalaureate Higher Level courses must submit an official IB transcript. Course equivalency for Higher Level courses completed is determined by the faculty of the appropriate department subsequent to careful review of course syllabi.

For questions or information, please call Enrollment Services at (562) 985-5471 or consult your department.

### Credit by Examination

Students may challenge courses by taking examinations developed at the campus. Credit will be awarded to those who pass them successfully. The Petition to Establish Credit by Examination for Unit Credit is available in the department offering the course and in Enrollment Services. Approval by the department offering the examination is required prior to registering for the course. The examination must be conducted within the first three weeks of classes. If a student does not take the examination at the time offered or does not pass the examination, he or she may either continue in the course as a regular student or withdraw officially from the course, following the procedures for withdrawal pertaining to all courses. (See the current *Schedule of Classes*.) For a student passing the examination, a grade of CR will be recorded at the end of the semester. Please refer also to Unit Credit by Examination in the General Regulations section of this *Catalog*.

### Credit for Noncollegiate Instruction

The California State University grants undergraduate degree credit for successful completion of noncollegiate instruction, either military or civilian, appropriate to the baccalaureate degree, that has been recommended by the Commission on Educational Credit and Credentials of the American Council on Education. The number of units allowed are those recommended in the Guide to the Evaluation of Educational Experience in the Armed Services and the National Guide to Educational Credit for Training Programs.

### Immigration Requirements for Licensure

The Personal Responsibility and Work Opportunity Reconciliation Act of 1996. (P.L. 104-193), also known as the Welfare Reform Act, includes provisions to eliminate eligibility for federal and state public benefits for certain categories of lawful immigrants as well as benefits for all illegal immigrants.

Students who will require a professional or commercial license provided by a local, state, or federal government agency in order to engage in an occupation for which the CSU may be training them must meet the immigration requirements of the new Personal Responsibility and Work Opportunity Reconciliation Act to achieve licensure. Information concerning the regulation is available from Academic Affairs, (562) 985-4128.

### Intrasystem and Intersystem Enrollment Programs

Students enrolled at any CSU campus will have access to courses at other CSU campuses on a space available basis unless those campuses or programs are impacted. This access is offered without students being required to be admitted formally to the host campus and sometimes without paying additional fees. Although courses taken on any CSU campus will transfer to the student's home CSU campus as at least elective credit, students should consult their home campus academic advisors to determine how such courses may apply to their degree programs before enrolling at the host campus.

There are two programs for enrollment within the CSU and one for enrollment between CSU and the University of California or California community colleges. Additional information about these programs is available from Enrollment Services.

CSU Concurrent Enrollment – matriculated students in good standing may enroll at both their home CSU campus and a host CSU campus during the same term. Credit earned at the host campus is automatically reported to the home campus to be included on the student's transcript at the home campus.

CSU Visitor Enrollment – matriculated students in good standing enrolled at one CSU campus may enroll at another CSU campus for one term. Credit earned at the host campus is reported automatically to the home campus to be included on the student's transcript at the home campus.

Intersystem Cross Enrollment – matriculated CSU, UC, or community college students may enroll for one course per term at another CSU, UC, or community college and request that a transcript of record be sent to the home campus.

## Health Screening

All new and readmitted students born after January 1, 1957, will be notified of the requirement to present proof of measles and rubella immunizations. All students 18 years of age or younger shall be required to present proof of immunization against hepatitis B. Each incoming freshman who will be residing in on-campus housing will be required to return a form indicating that they have received information about meningococcal disease and the availability of the vaccine to prevent one from contracting the disease and whether or not he or she has chosen to receive the vaccination. These are not admission requirements, but shall be required of students as conditions of enrollment in CSU. Proof of measles and rubella immunizations shall also be required for certain groups of enrolled students who have increased exposure to these diseases.

The California State University has vaccination requirements for new students. Immunity must be shown for:

1. Measles and Rubella – Required of all new students *born 1957 or later* as ordered by the California State University. Required of all students, regardless of age, who reside in residence halls, students whose primary and secondary schooling were obtained outside the United States, students who are enrolled in dietetics, medical technology, nursing, physical therapy, and any practicum, student teaching, or field work involving preschool-age children or taking place in a hospital or health care setting.
2. Hepatitis B - Required of all new students *who are 18 or younger* on their first day of class, as mandated by California State Law and the California State University.

References: CSU Executive Order No. 730 Immunization Requirements / California Assembly Bill 1107.

Clearance is obtained by presenting to Student Health Services 1) a medical immunization record showing dates of shots given, or 2) a record of blood tests showing immunity, or 3) receiving immunization(s), or 4) making a request for medical or personal religious exemption. You may receive the immunizations from your health provider, HMO, or Public Health Department at low or no cost. You may receive the immunizations at Student Health Services: Hepatitis B is at Student Health Services cost for each injection (series of 3); Measles and Rubella is at no charge. Acceptable proof may be by records from high school, private health care providers, and local health departments. Failure to comply will result in a "hold" on future registration.

Measles and Rubella are childhood diseases with potentially serious effects on adult health. Hepatitis B is a viral infection that affects the liver with potentially serious life long health consequences. Vaccination has been shown to be safe and effective in providing protective immunity through a series of three shots given over a four to six month period. Vaccination is available on request at Student Health Services. More complete information is available by phone at (562) 985-4771, or on the Health Services web site at [www.csulb.edu/centers/shc](http://www.csulb.edu/centers/shc); for recorded information, call the Immunization Hotline at (562) 985-5411. Other useful vaccine information is available through the United States Centers for Disease Control National Immunization Program (web site [www.cdc.gov/nip/](http://www.cdc.gov/nip/).) Specific vaccine information statements may be found at [www.cdc.gov/nip/publications/VIS/default.htm](http://www.cdc.gov/nip/publications/VIS/default.htm).

## Reservation

The University reserves the right to select its students and deny admission to the University or any of its programs as the University, in its sole discretion, determines appropriate based on an applicant's suitability and the best interests of the University.

## Articulation/California Articulation Number (CAN) System

Lower division course-to-course articulation is a formal, written faculty-approved agreement that identifies courses (or sequences of courses) that are comparable to, or acceptable in lieu of, specific course requirements between the "sending" campus and the "receiving" campus. Course articulation is the "roadmap" that allows a smooth academic transition between the segments of higher education in California.

California State University, Long Beach participates in the CAN System. The CAN system is a cross-reference course identification system designed to identify lower-division, transferable courses commonly presented by transferring students. The CAN system not only simplifies the transfer process, but makes it easier for students, faculty, and counselors.

The development of a written faculty-approved bilateral articulation agreement for each course with four public four-year institutions provides the foundation of the CAN system. Articulation agreements for each course are periodically reviewed with each campus by the faculty and Department Chairs.

The CAN system is based on bilateral course articulation – courses considered to be comparable, not necessarily identical, and acceptable "in lieu of" each other. The system assures students that CAN courses on one participating campus will be accepted "in lieu of" the comparable CAN course on another participating campus. Example: CAN HEC 2 on one campus will be accepted for CAN HEC 2 on another participating campus. Each participating campus not only retains and uses its own course number, prefix, and title, but also adds the appropriate CAN designation parenthetically in its publications when it has qualified the course.

CSULB now articulates some pre-baccalaureate courses. For further information contact the University Articulation Office, (562) 985-8221 or 985-8223.

## Courses (ACCT)

### Lower Division

#### 201. Elementary Financial Accounting (3)

Introduction to financial accounting theory, practice. For business majors. Laboratory and/or class computer applications are a requirement of the course.

### Upper Division

#### 300A-B. Intermediate Accounting (4,4)

Prerequisites: 300A: ACCT 201 or equivalent with a grade of "C" or better; 300B: ACCT 300A with a grade of "C" or better. Accounting theory including recording, valuation, and statement presentation of assets, liabilities, capital, earnings; funds statements; financial analysis; compound interest theory and applications. Laboratory and/or class computer applications are a requirement of the course.

#### 310. Managerial Accounting (3)

Prerequisites: ACCT 201 or equivalent. Use and interpretation of financial statements; evaluation of accounting information systems; accounting for and analysis of costs; managerial use of accounting data for planning and decision making. Not open to accounting majors for course or unit credit. Lab and/or class computer applications are a requirement of the course.

#### 320. Cost Accounting (4)

Prerequisites: ACCT 201 or equivalent with a grade of "C" or better. Theory and practice of cost accounting. Managerial use of cost accounting data for planning, controlling and decision making. Emphasis on cost accumulation and management information systems. Laboratory and/or class computer applications are a requirement of the course.

#### 400. Advanced Accounting (4)

Prerequisites: ACCT 300B with grade of "C" or better. Specialized problems in partnership and corporate accounting, consolidations, foreign currency transactions and translations, fund accounting and selected topics. Laboratory and/or class computer applications are a requirement of the course.

#### 451. Federal Tax Law II (4)

Prerequisites: any upper division accountancy course with a grade of "C" or better. Federal income taxation of partnerships, corporations, s corporations, personal and family tax planning, and ethics. Laboratory and/or class computer applications are a requirement of the course.

#### 465. International Accounting (4)

Prerequisites: Any 300-level accounting course with grade of "C" or better. Contemporary accounting theory and practice from an international perspective. Comparative accounting systems in various countries based on prevailing practice in the United States. Analysis of international accounting and auditing standards. Laboratory and/or class computer applications are a requirement of the course.

#### 470. Auditing (4)

Prerequisites: ACCT 300A, 300B, 320 with grades of "C" or better. Problems of verification, valuation and presentation of financial information in reports covered by the opinion of an independent public accountant. Major concepts of operational auditing and its relationship to the independent audit. Responsibilities of the public accountant, internal auditor and rules of professional conduct. Laboratory and/or classroom computer applications are a requirement of the course.

**480. Accounting Systems and Data Processing (4)**

Prerequisites: IS 240, ACCT 300B and 320 with grades of "C" or better. Course is designed to familiarize students with the accounting information systems development process. Major topics include analysis, design, development and implementation of accounting information systems. Consideration will be given to the automation of accounting information systems through the use and application of computers. Laboratory and/or classroom computer applications are a requirement of the course.

**493. Accounting Internships (3)**

Prerequisite: Accounting 300B, Accounting GPA 3.0, Overall GPA 3.0. Students work in public accounting or accounting divisions of private industry or governmental agencies to gain accounting experience in real world situations. Class seminar analysis, evaluation of academic theory in terms of the real world environment

**495. Selected Topics (1-4)**

Consent of instructor. Topics of current interest in accounting selected for intensive study. Course may be repeated for a maximum of eight units. Topics will be announced in the *Schedule of Classes*.

**497. Directed Studies (1-4)**

Prerequisites: Consent of instructor and department Chair, on Dean's List and 3.0 GPA or higher in accounting. Individual projects, study and research of advanced nature in accounting.

**660. International Accounting (3)**

International accounting theory and practice. Comparison of United States GAAP and auditing standards with IAS and practice in other countries. Traditional grading only.

**670. Contemporary Problems in Financial Reporting (3)**

Examination of Generally Accepted Accounting Principles and literature dealing with financial accounting and reporting. Emphasis will be on current issues facing corporations and the accounting profession. Traditional grading only.

**680. Financial Statement Analysis (3)**

Understanding and use of financial reporting for making investing and lending decisions. Traditional grading only.

**695. Special Topics (1-3)**

Prerequisites: Consent of instructor. Topics to be announced in the *Schedule of Classes*. May be repeated once under a different topic. Traditional grading only.

**697. Directed Studies (1-3)**

Prerequisite: MBA standing and consent of instructor. Individual study under the direction of the faculty.

### Graduate Prerequisite Course

**500. Managerial and Financial Accounting (3)**

Prerequisite: MBA standing required. Evaluation of accounting systems, preparation of financial statements, computer information processes and analysis and interpretation of accounting information as an aid to business decisions. Laboratory and/or class computer applications are a requirement of the course.

### Graduate Division

**610. Advanced Cost Accounting, Budgeting and Control (3)**

Prerequisite: ACCT 500 or equivalent with a grade of "C" or better. Problems in planning, budgeting and cost control for decision making from a quantitative analysis approach with emphasis on evaluation of the accounting information system. Laboratory and/or class computer applications are a requirement of the course. Not open to students with credit in ACCT 510.

**620. Contemporary Problems in Management Accounting (3)**

Examination of the literature on profit planning, control, and decision making. Current problems in management accounting; behavioral implications of management information systems; quantitative approaches to managerial accounting. Traditional grading only.

**630. Accounting Information Systems (3)**

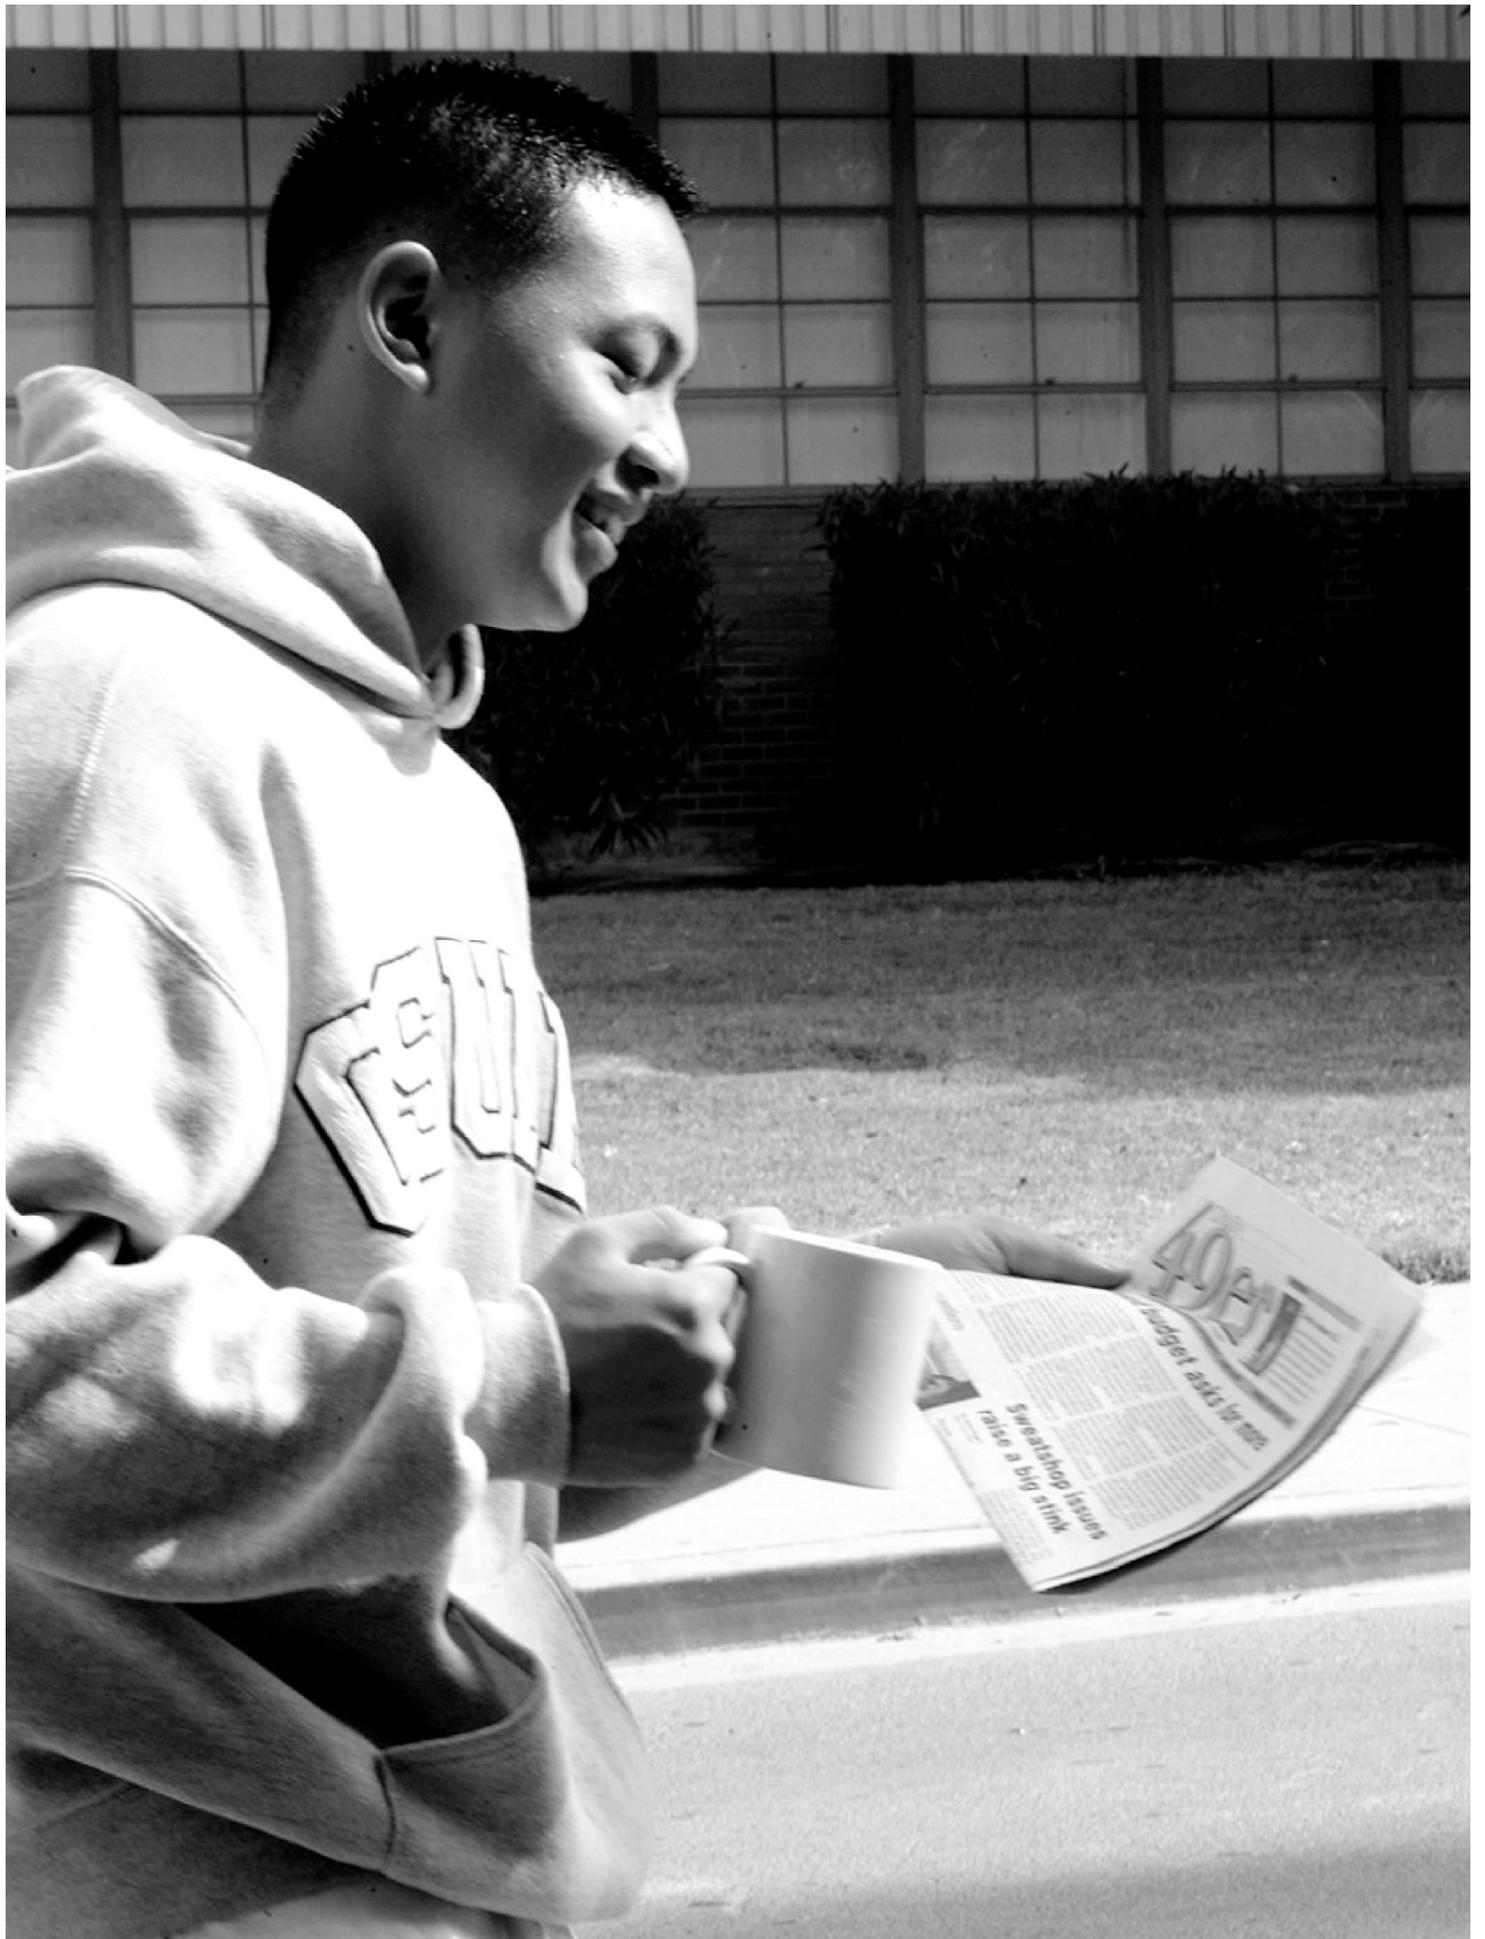

Information requirements and transaction processing procedures relevant to integrated accounting systems, including computer systems analysis, design, and controls. Traditional grading only.

**640. Tax Research and Planning (3)**

The study of the primary sources of income tax law; their uses and interrelationships in researching problems arising under the federal tax laws. Research techniques will be applied to compliance and tax planning problems of individuals, business organizations, and estates and trusts. Analysis of the organization of the Internal Revenue Service and the procedures relating to audits, tax collections, criminal prosecutions, and federal tax litigation. Traditional grading only.

**650. Accounting for Governmental and Not-for-Profit Organizations (3)**

Financial and managerial accounting concepts as they apply to organizations whose objectives are primarily to provide service rather than generate a profit. Traditional grading only.

# ACADEMIC ADVISING

University undergraduate academic advising services and academic departments are responsible for providing academic direction for new and continuing students. In addition, academic departments provide academic advising for graduate students.

Undergraduate advisors, both in advising service offices and in academic departments, assist students to develop educational plans that are compatible with students' interests, academic preparation and educational and career goals.

While advising offices mainly provide information and advise about general education, academic departments advise students about their major requirements and other important academic issues. Lists of faculty advisors, their locations and phone numbers appear each semester in the *Schedule of Classes*. Faculty advisors also provide academic advisement and information about minors, certificates, internships and masters programs. Students are advised to check with advisors often for current and relevant information.

The following listings are of advising services that are available to students. Some are involved in special programs. Some are major-specific such as Liberal Studies. The list also includes specific advising services such as the Academic Advising Center. All are anxious to assist students.

## Advisement Centers on Campus

### Academic Advising Center

The Academic Advising Center provides services to the general University student population as well as prospective CSULB students.

### Center Services

- Provide advisement workshops for prospective, transfer, and adult reentry students
- Provide academic information for prospective freshmen and their parents
- Provide small group workshops for entering students
- Provide a home-base to undeclared students
- Provide total academic program planning for entering and continuing students
- Provide unofficial Degree Audits for entering and continuing students
- Provide General Education advising for continuing students
- Provide information, advisement and special evaluation services to adult reentry students
- Provide mandatory freshman workshops for second-semester class registration
- Provide assistance and information with and for the academic appeals process
- Provide academic probation/disqualification intervention services to high-risk students (in the "Strategies for Academic Success" program and in one-on-one sessions)
- Provide special advisement services to undeclared and pre-majors
- Provide the parent orientation program (POP) to the parents of entering students each summer

The Academic Advising Center is located in Library East, Room 125. The telephone number is (562) 985-4837. The Center is open for advising Monday - Thursday from 9:00 a.m. - noon and 1:00 p.m. - 5:00 p.m. and Friday from 9:00 a.m. - noon. Call for evening appointment availability. Hours may vary during the holidays and summer.

### Center for Student Athlete Services

The Center for Student-Athlete Services (CSAS) provides support services for NCAA Division I student-athletes. The CSAS staff provide total advisement about academic program planning and appropriate course suggestions for meeting general education and major requirements; assistance in the identification and clarification of educational and vocational goals and in the interpretation of NCAA rules of eligibility; as well as advisement about the CSULB regulations and requirements leading toward graduation.

The CSAS also provides the opportunity both for freshmen and new transfer student-athletes to participate in transitional support programs designed to capitalize on the student-athletes' athletic skills, while learning to transfer those skills to classroom success. CSAS actively monitors SA academic performance, and provides referral to various resources available on campus to enhance student-athletes academic performances. The CSAS is open Mondays through Thursdays 8 a.m. - 5 p.m., Fridays 9 a.m. - noon. Appointments Monday - Thursday from 9 a.m. - 3 p.m. CSAS is located at Physical Education (PE) 1-63. Students should call (562) 985-4777 for more information.

### Educational Equity Services

Educational Equity Services has two advising components. They are as follows:

Educational Opportunity Program (EOP) is a state funded program that has developed special services to help students overcome the obstacles that may prevent them from furthering their education and reaching their potential. Students that are interested in being considered for EOP must declare their intentions on the University application at the time they apply to the University.

Student Support Services Program (SSSP) is a federally funded program designed to assist students in achieving their maximum potential in higher education. Students are referred to SSSP by faculty, staff and students of CSULB. Interested students apply directly to the program for participation. In addition to an academic need, one of the following must apply for a student to be eligible for SSSP services:

- Low income and first generation college student
- Physically disabled and/or learning disabled
- Low income only
- First generation only

Students should check with SSSP regarding their eligibility for program participation.

#### Educational Equity Services:

- Financial Aid Assistance
- Orientation to college-helping students adjust to the college environment
- Academic advising-guidance with graduation requirements, major and course selection
- Writing and college transition course (EOP 100)
- Individual counseling
- Peer advising
- Tutorial and supplemental instruction assistance covering a wide range of courses
- Career counseling
- Probation intervention
- Writing Proficiency Examination workshops
- Graduate placement information

Educational Equity Services is located in Liberal Arts (LA) 1-119. The telephone number is (562) 985-5637. Students are seen by appointment.

#### Intensive Learning Experience

The Intensive Learning Experience (ILE) provides advising as well as support to students in course placement and in developing the English and mathematics skills needed to prepare them for the required Freshmen-level English composition and/or mathematics courses. ILE does this by providing a combination of services.

**Placement** To receive information about placement into appropriate level courses and to maintain compliance with Executive Order 665, ILE monitors course placement by advising students into the following remedial and developmental courses: ENGL 001E, ASAM 001, B/ST 001, CHLS 001, ALP 145, ALP 150, MATH 001, and/or MATH 010. If placed in these courses, students must complete the remedial requirement within one year.

**Tracking** ILE monitors students' progress through the sequence of remedial and/or developmental English and math courses required for entrance into Freshmen-level English composition and/or mathematics courses. Our goal is to be sure that students are making progress and completing the ILE classes as stated in Executive Order 665.

**Intervention** If students have difficulty in any course while enrolled in the remedial/developmental English and/or math courses, ILE counselors can help students by recommending referrals as necessary such as tutoring, diagnostic testing, and learning skills strategies.

The Intensive Learning Experience Program is located in Library East 125. The office is open from 9:00 a.m.- noon and 1:00 p.m.- 5:00 p.m. Monday through Thursday and 9:00 a.m.- noon on Friday. The telephone number is (562) 985-7895.

#### Interdisciplinary Studies

Interdisciplinary Studies students can create an individualized program of study using courses from a variety of academic majors. Coastal protection, marine toxicology, biogeography, biomedical ethics and classical studies are among the many diverse areas of concentration recently pursued by students in the Interdisciplinary Studies Program.

The undergraduate degree is a closely correlated program of study (at least 40 units), in two or more departments devel-

oped in conference with faculty members from the respective departments who have the academic expertise necessary to support the course of study. The program also offers a Master of Arts and Master of Science degree in Interdisciplinary Studies.

The Interdisciplinary Studies Program is located in Library East 127. Call (562) 985-2396 for more information.

#### CSULB Learning Alliance

The Learning Alliance is a three-year program created for students who seek an active, personalized college experience. It was designed to help first-time freshmen make a positive transition to university life and to be academically successful. This learning community offers students a chance to take classes together, learn from challenging instructors and to establish closer ties to CSULB through campus involvement. Students qualify for the program based upon test scores (SAT, ACT, ELM or EPT) and their desire to become a participant in a community that enables them to make informed choices about majors and career/life goals.

The Learning Alliance accepts 200 first-time freshmen (any major) each year. New students will enroll in a set of "connected" general education classes in the fall (English Composition and a social science course) where faculty work together in pairs to integrate the subject matter. In the spring, students will enroll in additional connected Liberal Arts classes. During each semester of the sophomore and junior years, students take one class with the Alliance. By taking courses together in sequence, opportunities to make new friends, form study groups, and attend campus events are an added advantage for students who belong to the Learning Alliance.

Specific benefits include general education advisement, early registration, sequenced general education courses, academic and staff support, social activities, specially selected professors, and opportunities for campus and community involvement.

First-time freshmen students are invited to apply for space in the Learning Alliance. If you have less than 18 transferrable units with a cumulative GPA of 2.0 or better and no credits for classes we offer, and you have an SAT Verbal score of 490/higher or an EPT score of 151/higher (scores which place you in a college-level English composition course) you are eligible for the program. Space may also be available for students scoring at the ENGL 001 review class level. Applications are accepted on a first-come, first-served basis until all spaces have been filled. Call our office at (562) 985-7804 or stop by LA4-202 for an application or information.

#### Liberal Studies Program

Liberal Studies Program serves two distinct populations: 1) Those who are interested in becoming elementary teachers and 2) Those with more varied academic or career goals who would prefer a sound generalist program to one requiring early specialization. The General Education requirements for students majoring in Liberal Studies are unique. Liberal Studies is not only an approved major, but also an approved alternate general education program. In completing the Liberal Studies major, students concurrently satisfy general education.

The Liberal Studies Program seeks to provide timely and accurate academic advising to all Liberal Studies Majors. To meet that goal, students wishing to declare Liberal Studies as

their major must attend an open-file workshop in order to declare the major. Prior to attending this workshop, students must submit a complete set of transcripts of all college work completed (unofficial copies are fine), so that the Program can provide an official Summary of Credits for the major. After students attend the open-file workshop and are declared into the major, they may make appointments with well-trained student peer advisors, or if special circumstances are present, with the Program Director or Assistant Director. Walk-in advising hours are also available each week during the academic year.

The Liberal Studies Office is located in Library East 127. During the academic year, the office is open from 9:00 a.m. to 5:00 p.m. Monday through Thursday. Extended hours are available during the first and third week of each month, with the office open one night until 7:00 p.m. and from 9:00 a.m. to noon on Friday. Hours may vary during holiday and vacation periods. Students may call (562) 985-4228 for more information.

### The MESA Center

The MESA Center provides academic advisement and counseling services to the "historically" underrepresented minority students in all of the Engineering disciplines: Aerospace, Chemical, Civil, Computer Engineering and Computer Science, Electrical, Engineering Technology, and Mechanical Engineering. This includes the General Education and the upper-division requirements (also referred to as Interdisciplinary courses (IC)). The MESA Engineering staff members work directly with the engineering department undergraduate advisors to provide up-to-date information on all engineering course requirements and changes.

Academic advisement is available in the MESA Engineering Center by appointment and on a walk-in basis, as time permits. The Center is open Monday through Friday from 9:00 a.m. - 5:00 p.m. For additional information, call the MESA Center at (562) 985-8014 or stop by the office which is located in the Engineering 2, Room 300.

### Parents' Orientation Program (POP)

POP is designed to inform parents about baccalaureate requirements, the University library, safety, financial aid, housing and other important University issues so they may better assist their children to success at CSULB. POP is presented by the Academic Advising Center. The telephone number for POP information is (562) 985-5458.

### Strategies for Academic Success Program (Probation Intervention)

This is a university-wide program designed for undergraduate students who are on academic probation (either your CSULB or all college cumulative grade-point average is below 2.0). The program includes information about university policies and procedures, the reasons why students encounter academic problems, and, last but not least, how to receive the right help from campus services and offices to be a more successful student.

Any undergraduate or undeclared post-graduate student whose CSULB or overall cumulative grade-point average (GPA) is below 2.0. Declared graduate students and credential candidates who are on probation should contact their department for information and assistance.

Attendance in this program is not mandatory but it is highly recommended. Current university policy states that you may only remain on academic probation for two semesters. After that, you will be subject to academic disqualification if your GPA remains below 2.0. If you attend a Strategies for Academic Success program AND do one follow-up activity, you will be eligible for a third semester on academic probation if you need the extra time to bring your GPA to a 2.0 or above. Plus, you have the additional assistance, information and strategies needed to improve your academic performance.

If you would like more information or if you would like to sign up for a workshop please call us at (562) 985-7847 or stop by the Academic Advising Center, located in Library East, Room 125. Workshops are scheduled at a variety of times during each semester and during the winter and summer breaks.

### Student Access to Science (SAS)

Student Access to Science (SAS) encourages and supports undergraduate and graduate students as they prepare for careers in the sciences and/or mathematics. There are many programs that combine to make up SAS. Two programs in particular which relate to academic advising are Science Safari to Success and EONS (Enrollment Orientation to the Natural Sciences). EONS and Science Safari are orientation programs for all incoming freshmen and transfer students. These programs welcome students to the College of Natural Sciences and Mathematics by providing academic advising, overview of career opportunities and degree programs, peer mentoring, and access to appropriate courses for students majoring in the sciences and/or mathematics

For more information or assistance call (562) 985-4682, or come by the SAS Center located in Faculty Office Building 5, Room 109 (FO5-109).

### University Honors Program

Students with SAT scores of 1,100 or above and a high school GPA of 3.3 or above or with a college GPA of 3.2 or above who still need 21 units of General Education are urged to apply to the University Honors Program. Interested students are urged to apply for an interview with the Director of the program. Applicants who are accepted to the Program are given personal advisement and schedule planning for the following semester. The Program requires no extra classes and includes small discussion classes with students who share similar interests and abilities; scholarships for outstanding students; personalized academic advisement and guidance; opportunities for a distinguished undergraduate record as one of fewer than 250 students on campus; priority registration; professors' profiles of each student's individual performance placed in a file for job and graduate school applications; and the opportunity to do an undergraduate thesis project in the area of the student's major.

It is entirely possible to graduate in four years and to be recognized at graduation as having fulfilled all the requirements of the Honors Program. Students who are interested should telephone Director Dr. Albie Burke or Duan Jackson at (562) 985-4706 to request an informative brochure and an application which, when submitted, will be responded to with an invitation for a personal interview and individual program advisement. The program is located in the University Library, Room 213.

## Frequently Asked Questions

Students ask many of the following questions. Successful students know the answers to these frequently asked questions. Please read them carefully. Knowing these answers can help you avoid pitfalls during your first semesters on campus. For further information, contact the Academic Advising Center at (562) 985-4837.

1. *What are the deadlines for admission to CSULB?* The University begins to accept applications for Fall semester admission in November of the preceding year; Spring semester admission begins in August of the preceding year. However, only applications received in the months of November and August are given priority. Some departments have supplemental admissions requirements; contact your department for further information. All "impacted" programs and some departments accept applications only in the months of November and August respectively.
2. *Can freshmen/sophomore students take upper division (300-499) classes?* University policy prohibits lower division students (under 30 units) from taking upper division courses without permission of the instructor.
3. *Why is it important that I personally drop classes that I have registered for but am no longer attending?* Instructors do not have the responsibility to drop students. Students must drop classes they no longer want through the VRR system during the first two (2) weeks of the semester.  
Beginning the third week, students must use the official withdrawal form to change their schedule.  
Official withdrawal is indicated on the transcript with the symbol "W." This designation does not affect grade point average (GPA). However, students who fail to withdraw officially within the established deadline receive a "U" symbol.  
In the calculation of the GPA, a "U" is counted as an "F" grade.
4. *Can my General Education (GE) Courses be used for GE and for my major ("double counted")?* Usually courses in a student's major department may not be used to satisfy GE requirements. However, there are seven (7) exceptions to this rule. The exceptions are listed with the GE requirements in the Schedule of Classes along with the list of approved GE courses. In addition, majors sometimes require GE courses from other departments; these courses can be "double counted" for both GE and major requirements. Remember, you can only earn unit credit once for a course.
5. *How many units will transfer from a California Community College to CSULB?* All bachelor's level courses transfer, but only 70 units of transferable course work will apply to your bachelor's degree. Additional transferable course work will receive subject credit only.
6. *What does General Education (GE) Certification mean?* Certification means that you completed the required 39 unit lower division GE pattern at a California Community College. GE certification must be clearly indicated on your official community college transcript. For further information, contact your community college counselor.
7. *Does having an A.A. degree from a California Community College mean I am GE Certified?* Usually not. The minimum requirements for most A.A. degrees do not include the 39 unit lower division GE pattern required by CSULB. CSULB requires an additional nine (9) units of upper division GE courses.
8. *What is partial General Education (GE) Certification?* Partial Certification means that transfer students have completed subject and unit requirements in some GE categories, but not others.
9. *What can I do if I get a "D" or "F" or "U" in a course?* The University has a "repeat/delete" policy which allows you to repeat a course (with a D, F, or U) to receive a higher grade. This can be done only once per course. Both the first and the second grade will appear on your transcript; however, only a second grade of "C" or higher will be used to calculate your GPA. The first grade will be "deleted" from the GPA calculation.

# AEROSPACE STUDIES

*College of Health and Human Services*

## U. S. Air Force Reserve Officers Training Corps (AFROTC)

View the CSU, Long Beach *Catalog* on-line at [www.csulb.edu](http://www.csulb.edu) by clicking on "Academics" and then "CSULB Catalog."

Through arrangements with Loyola Marymount University (LMU) in west Los Angeles, students may participate in the Air Force Reserve Officer Training Corps (AFROTC) program. AFROTC offers a variety of two, three, and four year scholarships, many of which pay the full costs of tuition, books, and fees. Successful completion of as little as four semesters of AFROTC academic classes and leadership laboratories can lead to a commission as a second lieutenant in the United States Air Force.

Classes consist of one hour of academics and two hours of laboratory for freshmen and sophomores and three hours of academics and two hours of laboratory for juniors and seniors. The academic hours earned can normally be counted as elective credit toward graduation. All AFROTC classes and laboratories are held on Fridays to better accommodate students commuting from other colleges and universities. Currently, LMU does not charge for the courses and offers cross-town students free parking while attending AFROTC activities. Additionally, AFROTC cadets under scholarship and all juniors and seniors receive a monthly tax-free stipend.

For more information, contact the Loyola Marymount University Department of Aerospace Studies (AFROTC) at (310) 338-2770.

Students desiring information should contact the department office for referral to one of the faculty advisors. American Indian Studies is an interdisciplinary study of the American Indian. The American Indian Studies program options are designed to provide students with the various fields of knowledge of American Indian Studies with opportunities for emphasis on particular topical, cultural and geographical interests.

The courses in the program offer two distinct directions: (1) classes that contain course content solely directed toward American Indian culture in the North Western Hemisphere; and (2) courses that contain sections or units on American Indians that have content relevant to understanding the American Indian experience.

American Indian Studies is governed by a committee of faculty representing a variety of schools and departments throughout the University.

In addition to offering a broad liberal education focusing on American Indian culture, traditions, and social issues, the various program options offer a useful background for careers in such diverse fields as Law, Administration, American Indian Affairs, Counseling, Teaching, Social Work, Government, Museums and Public Service.

Students may pursue a program in American Indian Studies through a minor, a certificate, a concentration in American Indian Studies within the Liberal Studies Degree Program, or an individually-designed undergraduate special major program under the Special Programs Office. Advisement in American Indian Studies is available in Program Office, Faculty Office (FO) 3 room 300 by appointment.

## Certificate in American Indian Studies (code 1-8000)

Students pursuing any approved degree or credential program of the University may at the same time earn a Certificate in American Indian Studies. Courses taken to meet the requirements may also simultaneously be used, where applicable, to meet General Education requirements or the degree or credential requirements of cooperating departments. Certification of successful completion of requirements will be issued upon the recommendation of the Director of the American Indian Studies Program.

## Requirements

1. A Bachelor's degree with a major in a traditional discipline. (Certificate requirements may be completed prior to the completion of B.A. requirement).
2. Submission of all college/university transcripts to the academic advising coordinator, who will work with the student to develop a well-integrated program of studies. Interested students are strongly encouraged to meet with the academic advising coordinator after having completed the lower division core courses.
3. A minimum of 21 units, distributed as follows:

## Required Core Courses

Lower Division Core Courses (select 6 units from): AIS 105, 106, 200;

Upper Division Core Courses (9 units from): AIS 319, 320, 335, 340, 361, 485;

Upper Division AIS Electives (3 units from): AIS 420, 450, 490, 497, 499;

Upper Division Electives Courses (select 3 units from): AIS Upper Division Core Courses not selected above and from: ANTH 321, 322, 347, 349; ART 456/598S, 457/598T; EDSE 435; HIST 372, 471; HDEV 360; CHLS 380, 420.

## Minor in American Indian Studies (code 0-8420)

### Requirement

A minimum of 21 units, including 18 units in American Indian Studies, distributed as follows:

### Required Core Courses

Lower Division Core Courses: (select 6 units from): AIS 105, 106, 200;

Upper Division AIS Core Courses: (select 6 units from): AIS 319, 320, 335, 340, 361, 485;

Upper Division AIS Elective Courses: (select 6 units from): AIS 420, 450, 490, 497, 499; (select 3 units from): ANTH 321, 322, 347, 349; ART 456/598S, 457/598T; EDSE 435; HIST 372, 471; HDEV 360; CHLS 380, 420 or other AIS upper division offerings.

Upper Division Elective Courses: Course offerings in this section contain classes that either have content relevant to the American Indian experience or include a section or unit devoted to American Indians. Although some of these courses contain a minimum amount of Indian material, they have been included because of their relevance to American Indian Studies as well as offering the student a wider selection to meet individual programmatic needs and goals: (AIS Upper Division Core Courses not selected in Section II can be used to meet requirements in this section.)

## Courses (AIS)

### Lower Division

#### 105. American Indian History – Pre 1871 (3)

Prerequisite/Corequisite: One course from GE category A1. A survey of the histories and cultures of American Indian Peoples in North America from pre-contact to 1871 and an analysis of the political, cultural, legal and military relationships that developed between the American Indians and foreign nations. Not open to students with credit in AIS 100.

#### 106. American Indian History – Post 1871 (3)

Prerequisite/Corequisite: One course from GE category A1. A survey of the histories and cultures of American Indian Peoples in North America from 1871 to the present. Not open to students with credit in AIS 101.

#### 200. Contemporary Issues in American Indian Studies (3)

Analysis of the diverse contemporary issues that have impacted upon the American Indian in contemporary society. Overview of the major issues in American Indian affairs: politics, art, philosophy, music, education, reservation life, economics, government relations, Indian organizations, Indian-white relations, legal issues, land rights, media issues, Indian activist movements, community concerns and additional topics of interest of a contemporary nature.

#### 208. California Indian History (3)

This course in California Indian History is designed to provide students an opportunity to study the relationship between the Indian people of the state of California and the various European powers who influenced the settlement of this state. Areas to be explored include the indigenous people of the present day state of California prior to European contact; the Spanish invasion of 1769, the Mexican secularization in 1834, and the seizure of California in 1846 by the United States. These experiences and the resultant impact will be further studied as steps toward understanding contemporary issues involving California Indian people. Traditional grading only.

#### 215. U.S. Diversity and the Ethnic Experience (3)

Prerequisites: The course is open only to Integrated Teacher Education Program students. This course is a survey of four major ethnic groups (American Indians, African American, Latino American, and Asian American) in American society from the colonial era to the present. Special attention is given to the formation and transformation of each ethnic group and their individual and collective roles in the development of the United States. Same course as ASAM 215, B/ST 215, CHLS 215. The departments take turns offering the course in the Fall semester. Traditional grading only.

### Upper Division

General Education Category A must be completed prior to taking any upper division course except upper division language courses where students meet formal prerequisites and/or competency equivalent for advanced study.

#### 300. American Indians in Cinema (3)

This class will examine through the medium of film the creation of stereotypical and positive images of Americans in cinema. Beginning with cinema in the silent period through contemporary times these images will be observed, discussed, and identified, and examined to come to a comprehensive understanding of how the values of these images are created and maintained in American popular society. The class will also discuss those contemporary images created from the American Indian perspective that offer different images of American Indians in society. Class content will vary dependent on films available for instruction. Traditional grading only.

#### 319. The Ethnic Experience in the U.S. (3)

An examination of the dynamics of the development of our multicultural society, emphasizing study of the four distinct ethnic strands of American society (Asian American, Black American, Mexican American, and American Indian) and their role in the maintenance of cultural diversity in the United States. Same course as ASAM 319, B/ST 319, CHLS 319, WST 319. Lecture/Discussion.

#### 320. American Indian Art (3)

A survey of the arts of the North American Indian with special emphasis on the major art forms of the continental United States, Alaska, and Canada. Traditional and contemporary art and artists will be explored with attention to aesthetic, theoretical, historical, religious, and philosophical aspects as they relate to American Indian Culture.

#### 335. American Indian Philosophies (3)

Prerequisites: AIS 105, 106, 200, or permission of instructor. A detailed examination of Iroquois, Navajo, Lakotal/Dakota (and others) as tribal groups and their world views. Comparing and contrasting of these cultural groups with the Anglo-American and each other. Giving insight to the student into the traditional world views, their establishments and on-going practices in a contemporary setting, including the effect/affect of their contact with outside cultures and assimilation into the larger U.S. culture. Traditional grading only.

### 340. American Indian Literature (3)

An analysis of the written and oral literary traditions developed by American Indians. The range of works studied are: oral history, tales, myth, song, prayer, poetry, short story, and novel.

### 361. American Indian Education (3)

A study of the historical developments of American Indian Education and proposed solutions to selected problems of education in the various types of schools. Overview of the role of women in traditional Indian societies and in the modern world. Changes in Indian societies occasioned by contact with Europeans and how these changes have altered sexual role definitions will be examined. (Lecture-discussion 3 hours.)

### 420. American Indian Studio Art (3)

Prerequisites: AIS 320, or permission of instructor. Techniques, materials, concepts and processes in the creation of American Indian Traditional arts and crafts. Selected artistic projects in the creation of tribal arts. (Lecture-activity 6 hours.)

### 421. 20th Century American Indian Art (3)

The class will examine the arts of the North American Indian with special emphasis on the major art forms of the continental United States, Alaska, and Canada in the twentieth century. Relationships between tradition and contemporary art and artists will be explored with specific attention to aesthetic, theoretical, historical, religious, and philosophical aspects as they relate to American Indian culture. A comprehensive understanding of how the value of modern and contemporary images are created and maintained in American popular society through the medium of art will be discussed. Traditional grading only.

### 485. Federal Indian Law (3)

This course is designed to provide an in-depth study of the legal relationship between the United States and Indian people and Indian tribes as the field of Indian law was developed and has changed over the years. The legal development will begin with first contact between Indian people and English colonist and continue to the present time.

### \*450. Cross Cultural Issues for Service Provision to American Indians (3)

Prerequisite: Upper division status. This course is designed for those students entering a service career or profession such as therapists, counselors, teachers, physicians and other helping professionals. This course will help the service professional to have a better understanding of American Indian societies and cultures and the service issues which are unique to those communities. The course will deal with various theories and therapeutic techniques and their effective/or noneffectiveness with these ethnic groups. The course will address community organization as well as techniques for working with individuals, families, and groups of American Indians. This course is designed to explore these qualities in the context of cross-cultural efforts to be of assistance to the American Indian community. Juniors and Seniors Only. Traditional grading only.

### 490. Special Topics in American Indian Studies (1-3)

Prerequisite: Consent of instructor. Topics of current interest in American Indian studies selected for intensive development. May be repeated for a maximum of six units. Topics will be announced in the *Schedule of Classes*.

## C. American Indians in Cinema and Literature

### 497. Fieldwork in American Indian Studies (1-3)

Prerequisites: Upper division standing, consent of instructor. Supervised experiences relevant to specific aspects of the American Indian community in off-campus settings. The fieldwork project must be directly related to the student's major or certificate program. Regular meetings with faculty supervisor and written reports required. May be repeated for a maximum of six units.

### 499. Directed Studies (1-3)

Prerequisite: Consent of instructor. Directed Studies to permit individual students to pursue topics of special interest. May be repeated for a maximum of six units.

## Bachelor of Arts in American Studies (code 2-8004) (120 units)

Students desiring information should contact the department office for referral to a faculty advisor.

American Studies is an interdisciplinary study of American culture. The American Studies Program offers a major leading to the bachelor's degree, a minor, and a Liberal Studies concentration. The program also offers a variety of general education and interdisciplinary courses. Most students majoring or minoring in American Studies are interested in both

(1) studying American culture as a whole from several disciplinary perspectives and (2) studying in depth a problem or theme according to individual choice. Reflecting these two interests, the major consists of a 5-course core sequence and a 5-course elective pattern that centers on one theme or problem.

The American Studies Program is governed by a committee of faculty from various departments and schools who also serve as advisors. Students majoring in American Studies confer with advisors to plan their programs, which are recorded on official advising forms.

In addition to providing a broad liberal education focusing on American culture, traditions and institutions, the major in American Studies offers a useful background for careers in law, journalism, public service, government, business and teaching. The program also provides the foundation for graduate work in American Studies and related fields.

In preparation for the upper division major in American Studies, students are expected to have completed lower division courses appropriate as background to the study of American culture. Students planning to major in American Studies should consult the program director or one of the above-named faculty advisors early in their academic careers for general education and preparatory course recommendations and for teaching credential information.

## Requirements

A minimum of 33 units distributed as follows:

Five core courses: AMST 300; HIST 477A,B; ENGL 370A, B.

Elective pattern: The student chooses one of the following topics or themes and plans with an advisor (who will have an up-to-date master list of appropriate courses) an elective pattern of a five-course sequence with no more than two courses coming from any one academic department: (A) American Institutions; (B) American People; (C) Women in America; (D) American Environment; (E) Arts and Communication in America; (F) American Mind; (G) Student-Designed Pattern. In place of one of the above topics or themes, the American Studies major, with the approval of the advisor and the program director, may design a sequence of courses focusing on a topic, theme, or problem in which he or she is particularly interested.

## Minor in American Studies (code 0-8004)

A minimum of 18 units, including AMST 300 and HIST 477A,B and 9 or more units chosen in consultation with a faculty advisor.

## Courses (AMST)

Foundation Courses must be completed prior to taking any upper division course except upper division language courses where students meet formal prerequisites and/or competency equivalent for advanced study.

### 300. Introduction to American Studies (3)

Interdisciplinary approaches to the study of American civilization from the colonial period through the twentieth century. Significant issues and problems in American life will be examined from the perspectives of several disciplines.

**A**nthropology is the systematic study of our own species in our biological, social, and cultural aspects. Anthropologists study the full range of human experience in both the past and present. The breadth of anthropological studies gives students a unique perspective to understand other societies and their own. The programs offered by the Department of Anthropology are designed to enrich the personal and professional lives of our students.

The undergraduate major in Anthropology is designed to provide students with knowledge of the various fields of Anthropology and with opportunities for emphasis in particular topical and geographical interests. Students will find that Anthropology provides a useful perspective that has many applications in daily social interaction. The Anthropology major provides a strong liberal arts background that can contribute to success in many fields, such as teaching, public service, or business. Anthropology majors intending to pursue careers in these fields are urged to consider minoring in fields which provide appropriate entry-level skills, such as the Minor in Business Economics or in Public Policy. The major also prepares students for advanced studies in Anthropology. The undergraduate minor in Anthropology is recommended for students preparing for careers which will require practical knowledge of different cultural backgrounds. These include teaching, international business and engineering, foreign service, and public and social services within our own multicultural society.

The Department of Anthropology also offers a graduate program leading to the Master of Arts degree. The graduate program is designed to meet the needs of students who are: 1) seeking to expand their knowledge and increase their competence in Anthropology, 2) preparing for further advanced degrees, 3) preparing for a career in Applied anthropology. Graduate students are responsible for observing the general requirements for the M.A. degree as stated in this *Catalog*. It is also recommended that prospective students consult with the Graduate Advisor at their earliest opportunity.

## Bachelor of Arts (code 2-8505) (120 units)

Lower Division Requirements: ANTH 110, 120, 140, 170 and 202.

Upper Division Requirements: A total of 33 units. Required Core Courses (15 units): ANTH 313, 314, 401, 435 and 413 or 475.

In consultation with the Undergraduate Advisor, an additional 18 units will be selected from the courses listed below.

*Archaeology*: ANTH 321, 322, 323, 345, 347, 349, 450, 451

*Biological Anthropology*: ANTH 315, 318, 319, 363, 434, 436, 480A, 480B

*Cultural Anthropology*: ANTH 305I, 307I, 311I, 321, 322, 323, 324, 329, 332, 333, 335, 336, 345, 351, 353, 412I, 414, 415, 416, 417, 419, 420, 421, 436, 454.

*Linguistic Anthropology*: ANTH 413, 421, 475

Students may apply a maximum of 2 Anthropology Capstone courses to the major. Students may apply Anthropology Human Diversity classes to the major.

Students may take a total of 6 units of ANTH 490 and, with approval of the undergraduate advisor and sponsoring faculty members, up to 6 units of ANTH 499.

### Minor in Anthropology (code 0-8505)

A minimum of 21 units in a program approved by the major advisor, as follows:

Lower Division Required: ANTH 120, 140, 170 and 110.

Upper Division Electives: 9 units of anthropology courses selected in consultation with the major advisor to meet the specific needs of the student.

### Interdisciplinary Minor in Crosscultural Language and Academic Development Studies (code 0-9683)

The minor comprises courses that integrate studies of culture, language, learning and the academic environment, and human development. It is an interdisciplinary program designed to support career objectives related to public education in Crosscultural Language and Academic Development. The minor consists of a minimum of 18 units selected with an advisor. Courses in the department of the student's major may not be used.

1. One course from each of the following areas (12 units):  
*Culture:* ANTH 421/LING 425 or EDP 432/EDEL 430  
*Language:* EDP 454 or LING/CD 329  
*Schooling:* EDP/LING 485  
*Development:* EDP 301, EDP 302, HDEV 307I, or PSY 361
2. Six additional units, selected with an advisor, from the following:  
*Culture:* AIS 319, ASAM 319, B/ST 319, CHLS 319, W/ST 319, ANTH 329, ANTH 412I, ANTH/LING 413, ANTH 419, ANTH 421/LING 425, ANTH/WST 475, CHLS/ASAM 335I, EDP 432/EDEL 430  
*Language:* ANTH 170, CHLS 402, EDP 454, LING/CD 329, LING/ENGL 327, LING 363I, LING 435, LING 472, LING 486.  
*Schooling:* AIS 361, ASAM 310, B/ST 420, CHLS 340, EDP 305, EDP 350, EDP 476.  
*Development:* EDP 301, EDP 302, HDEV 307I, PSY 361.

### Master of Arts in Anthropology (code 5-8505)

The Department of Anthropology offers graduate work in archaeology and linguistic anthropology leading to a master's degree in anthropology. Students interested in sociocultural anthropology should refer to the option in applied anthropology below.

#### Prerequisites

1. A bachelor's degree in anthropology; or
2. A bachelor's degree with 24 units of upper division courses in anthropology, comparable to those required of anthropology majors at this University;
3. A B.A. degree in any field and other background appropriate to graduate study in anthropology. Students whose background in anthropology seems inadequate may be required to fulfill specific undergraduate deficiencies before admission to candidacy. Deficiencies will be determined by the departmental graduate advisor after consultation with the student and a review of the student's transcript records.

#### Advancement to Candidacy

1. Acceptance into the M.A. program by the department;
2. Satisfaction of the general University requirements for advancement to candidacy (including passing the WPE);
3. Approval of the candidate's graduate program by the departmental graduate advisor;
4. The candidate must have taken ANTH 501 (Development of Anthropological Theory), ANTH 510 (Proseminar) and either ANTH 560 (Ethnographic Research Methods) or ANTH 561 (Computer Research Applications in Anthropology), for a total of nine core units.

#### Requirements

1. A minimum of 33 units of 400-level upper division and graduate courses, of which 21 units must be at the 500-600 level in a program approved by the Graduate Advisor. These 33 units must include the following courses: ANTH 501, 510 and 560 or 561;
2. Up to six units of course work outside the Department of Anthropology may be included in the 33 unit total;
3. Competence in appropriate research skills. These may include: familiarity with computer languages and use of computers, or statistical training and facility, or a reading knowledge of a foreign language;
4. Either A) a Comprehensive Examination, or B) a M.A. Thesis.

### Option in Applied Anthropology (code 5-8506)

The Department of Anthropology offers graduate work in applied anthropology leading to a Master of Arts degree in Anthropology. Students with a B.A. in Anthropology, as well as those who can apply their previous training and experience to the practice of anthropology, are welcome to apply. In order to meet the growing demand in California and elsewhere for professionals capable of addressing the complex problems of multicultural urban and regional environments, the Applied Anthropology Program emphasizes specialized training concurrently with knowledge of anthropological theory. All graduate students participate in local research projects and internships. Within the general context of urban and regional development, the particular focus areas of the program include such concerns as multicultural education, medical/health care, and community. Regional emphasis is on southern California and the Southwest.

#### Prerequisites

1. A bachelor's degree in anthropology; or
2. A bachelor's degree with 24 units of upper division courses in anthropology, comparable to those required of anthropology majors at this University; or
3. A bachelor's degree in another field, either a social science, humanity, education, or medical science one, with fewer than 24 units of upper division course work in anthropology, showing evidence of strong potential skills in applied anthropology.

Students under category (3) should submit a petition together with whatever supporting materials as recommended by the Graduate Advisor. If the Graduate Student Committee considers an applicant to lack a basic understanding of anthropological theories and methods, such an applicant will be

accepted provisionally into the program (as an unclassified post-baccalaureate student), in which case he/she will be advised to enroll in courses during the first semester recommended by the Committee. Providing that the student performs satisfactorily in these courses, he/she will be admitted into the program the following semester, gaining classified status, and credit will be given for those courses completed the previous semester that are required for the Master of Arts degree.

### Advancement to Candidacy

1. Classified status;
2. Satisfaction of the general University requirements for advancement to candidacy (including passing the WPE);
3. Approval of the candidate's graduate program by the departmental graduate advisor.

### Requirements

The student must complete a minimum of 39 units of 400-level upper division and graduate courses in a program approved by the Graduate Advisor. Note: Students may substitute other courses for those normally required, but only with the approval of the Graduate Advisor.

1. ANTH 501, 505, 510, 517, 560, 561, 675, 698;
2. Three upper division/graduate elective courses related to the student's main research interest. At least one of the three electives must be taken outside the Department of Anthropology;
3. Satisfy the language requirement. Each student will be considered individually in relation to this requirement, which must be satisfied before he or she begins work on the thesis;
4. Undertake and satisfactorily complete, under the supervision of the committee, a Thesis.

## Courses (ANTH)

### Lower Division

#### 110. Introduction to Physical Anthropology (3)

Prerequisites/corequisites: Completion of any B.2 Foundation GE course. Physical nature of human beings; relation of humans to other animals; heredity and principles of biological evolution; human fossils; significance of physical variation in modern populations; the origin and adaptive value of cultural behavior. (CAN ANTH 2)

#### 120. Introduction to Cultural Anthropology (3)

Prerequisite/corequisite: Any G.E. Foundations course. Nature of culture; a comparative and historical approach to the religion, social organization, subsistence patterns and other aspects of the great variety of cultures around the world; the meanings of human nature, cultural universals and cultural differences. (CAN ANTH 4)

#### 140. Introduction to Archaeology (3)

Prerequisite/corequisite: Any G.E. Foundations course. Survey of methods used by archaeologists to understand the growth and development of human cultures; discoveries in world-wide prehistory from the Old Stone Age to the Iron Age. (CAN ANTH 6)

#### 150. Elements of Human Integration (3)

Prerequisite/corequisite: Any G.E. Foundations course. An integration of social, physiological and psychological factors which influence or determine our daily lives; taught from an anthropological perspective.

#### 170. Introduction to Linguistics (3)

Prerequisite/corequisite: Any G.E. Foundations course. Nature of language; its relation to culture; language structure and processes

of change; language universals, contrasts and relationships. Same course as LING 170.

#### 202. Quantitative Methods in Anthropology (4)

This course is designed to help students strengthen their quantitative skills. A broad range of topics will be covered with emphasis being placed on the analysis of large datasets, computer graphics, research design, and application of several statistical methods and software programs. Datasets used in this class have a multicultural base and are derived from a variety of fields including anthropology and history. The course experience will assist students in their efforts to develop research designs for independent research in upper division classes under their major.

### Upper Division

General Education Category A must be completed prior to taking any upper division course except upper division language courses where students meet formal prerequisites and/or competency equivalent for advanced study.

#### 305I. Radical Social Analysis (3)

Prerequisites: Completion of GE Foundation requirements, one or more Explorations courses, and upper-division standing. Radical analysis of society and culture, focusing on classic Marxian texts as well as current critical theory and analysis.

#### 307I. Modernization in Global Perspective (3)

Prerequisites: Completion of GE Foundation requirements, one or more Explorations courses, and upper-division standing. An exploration of the ways in which the current psychological and material problems in modern society (both western and Third World) can be traced to a process of accelerating change which began with the advance of technology, the rise of capitalism, the abandonment of "old values," the increasing complexity of bureaucracy, and a lowering of social barriers. Exploration of all facets of modernization utilizing films, discussions and readings (fiction and non-fiction). Same course as GEOG 307I and HIST 307I.

#### 311I. Human Adventure (3)

Prerequisites: Completion of GE Foundation requirements, one or more Explorations courses, and upper-division standing. A synthesis of Anthropology and Marxism; examination of the processes of evolution and revolution in the development of humanity, from earliest times to the present.

#### 313. Peoples of the World: Prehistory (3)

The origin of human beings and their cultures, the development of agriculture, the growth of city life, and the rise of civilization; a survey of world-wide prehistory from the Old Stone Age to the Iron Age.

#### 314. Peoples of the World: Ethnography (3)

Prerequisites: Completion of GE Foundation requirements. Recent and contemporary cultures around the world; a comparative survey of their ecological adaptations, social institutions, technology, subsistence strategies, degrees of complexity, and patterns of change.

#### 315. Human Variation (3)

Biological variation and differences in the two sexes of modern humans. The biological concepts of biospecies and subspecies are examined. Biological adaptations of human males and females to the various environments of the world are considered. Racism and genocide are discussed in relation to ethnic groups. The rise of the race concept in North America and the social meaning of this concept. An indepth look at the biology of several American ethnic groups. Traditional grading only.

#### 318. Human Genetics (3)

Prerequisites: ANTH 110 or equivalent BIOL course, a quantitative course. Genetic background for normal and abnormal development; population differences; human reproduction, pregnancy, prenatal diagnosis and birth defects; introduction to population and evolutionary genetics; application to social, moral, legal and ethical problems and to genetic counseling.

**319. Human Growth and Development (3)**

Prerequisites: BIOL 205 or 207. Analysis of the sequence of events in the development of people from conception to death; organ development; rapid and retarded growth patterns; the processes of aging and death from a broad ethnic and ecological perspective.

**321. North American Indians (3)**

Comparative study of traditional Native American societies, social organization, belief systems and religions, crafts and adaptation to varied environments; cultural changes in response to European contacts.

**322. California Indians (3)**

Survey of native Californian groups; discussion of the diversity of aboriginal culture prior to western contact as background for analysis of the impact of Europeans; problems of intercultural relations; and the current status of native Californians.

**323. Peoples of Mexico and Central America (3)**

Survey of present-day peoples of Mexico and Central America; indigenous and mestizo cultures and their heritage; examination of recent change.

**324. Peoples of South America (3)**

Survey of the present day peoples of South America; tribal Indians, peasant communities, village life, the emerging middle class, and other social groups; examination of the Indian, European, and African heritage and present day cultural and social changes.

**329. Cultural Diversity in California (3)**

An examination of the various dimensions of the current cultural diversity in California, including ethnicity, nationality, class, gender, religion, and region. Various relationships between these dimensions will be analyzed, a historical background for each dimension and relationship will be presented, and the impact of this diversity on public institutions will be covered. Traditional grading only.

**332. Chinese Culture and Society (3)**

Anthropological perspectives on revolution, socialism, and institutional change in China, ethnic diversity, family and kinship patterns, politics, economy, international relations, and religion in premodern and modern times.

**333. Cultures and Societies of Southeast Asia (3)**

Comparison of ecological, social, and symbolic systems of mainland and island Southeast Asia. Emphasis of traditional cultures of agricultural and small-scale societies. Effects of colonialism and modernization are also covered.

**335. Japanese Culture and Society (3)**

Cultural and social institutions; kinship, family structure, religion, law, politics and economy from traditional to modern times.

**336. African Societies and Cultures (3)**

Prerequisites: General Education Category A. An anthropological survey of Africa examining the social, cultural, and economic diversity of the continent over time. A foundation for appreciation of current issues in Africa including cultural debates, nationalism, and cultural change and preservation. Traditional grading only for Majors/Minors

**345. Ancient Civilizations of Mexico and Central America (3)**

Origin and growth of the Aztec, Maya and other civilizations of Mexico and Central America.

**347. Prehistoric Cultures of North America (3)**

Archaeological evidence of origin and growth of the native American cultures north of Mexico; regional cultures and broad continental patterns of development.

**349. The Prehistory of California and the Southwestern United States (3)**

Development of the native cultures of California and American Southwest from the earliest human occupation to the historic period.

**351. Sex Roles and Culture (3)**

Interaction of biological, cultural and historical factors on male/female roles and status in traditional and contemporary cultures and societies.

**353. Health and Healing (3)**

Cultural perspective of health and health care delivery; coverage of diverse cultures in the United States and abroad; emphasis on increasing personal awareness through exposure to diverse perceptions of illness and treatment.

**363. Natural History of Primates (3)**

Prerequisites: ANTH 110. Relationship of primates to other mammals; adaptation of arboreal mammals; functional and evolutionary aspects of primate anatomy and physiology; effects of size; primate ecology; survey of the Order Primates: Prosimii, Tarsioidea, New World and Old World Monkeys, Hominoids.

**401. Foundations of Anthropology (3) F**

Prerequisites: ANTH 313 and ANTH 314 with grade of "C" or better, or permission of instructor. Provides introduction to history of anthropological theory from inception to current approaches. Frames theories in the social context in which they emerged. Traditional grading only.

**412I. Culture and Communication (3)**

Prerequisites: Completion of GE Foundation requirements, one or more Explorations courses, and upper-division standing. Introduction to culture and its influence on the communication process. Emphasis on practical application to intercultural and multicultural situations. Attention to cultural patterns in America and abroad and their effect on verbal and nonverbal communicative behavior; cultural dimensions of ethnocentrism, stereotypes, and prejudices and their effect on communication; multicultural approaches to human interaction.

**\*413. Language and Culture (3)**

Relation of language patterns to social life; problems of meaning in cross-cultural communication and language translation; practical application to business, government and religious contacts. Not open to students with credit in ANTH 440. Same course as LING 413.

**414./514. Anthropology of Religion (3)**

Prerequisites: ANTH 120 and upper-division/graduate standing or permission of the instructor. An anthropological examination of religious behavior and beliefs, which will focus on these phenomena in their sociocultural and adaptive contexts. Using the cross-cultural and cultural evolutionary approach, hunter-gatherer religions through civilized ones will be covered.

**415./515. Economic Anthropology (3) S**

This course compares and contrasts the economies characteristic of hunter-gatherers, horticulturalists, and peasants; investigates the changing relations of tribal and peasant peoples to the developing global economy; and looks at a range of production and marketing strategies within local, regional, and urban settings. It is a balanced presentation of appropriate ethnographic materials, economic theory, and alternative modes of analysis.

**416./516. Urban Anthropology (3)**

Comparative analysis of development and role of urban centers in ancient and modern cultures; interrelationships of urban and rural populations; patterns of similarity and difference in urbanism of contrasting cultures; implications for a multi-national world.

**417./517. Applied Anthropology (3)**

Prerequisites: ANTH 120 and upper division standing or graduate standing or permission of the instructor. Brief orientation to applied anthropology, its history and ethics; policy and applied anthropology domains (needs assessment, program evaluation, social impact assessment, environmental, advocacy); applied research methods; student proposals for internship research. Traditional grading only.

**419./519. Concepts and Theories of Ethnic Identity (3)**

Prerequisites: ANTH 120 and upper-division/graduate standing or permission of the instructor. An examination of concepts and theories of ethnic identity and acculturation/assimilation, as well as the causes of ethnic conflict and the means of its resolution. Traditional grading only.

**420./520. Political Anthropology (3)**

Prerequisites: ANTH 120 and upper-division/graduate standing or permission of the instructor. Political behavior and thought will be examined through the anthropological perspective, which will view these phenomena in their sociocultural and adaptive contexts; in addition, it will compare and contrast various types of political systems across the world, from the simple to the complex.

**\*421. Education Across Cultures (3)**

Cross cultural perspectives on education in modern society; problems in education of non-western peoples by those from western cultural backgrounds. Same course as LING 425.

**434. Primate Evolution (3)**

Prerequisite: ANTH 110. Recommended: ANTH 363, upper division physical anthropology, biology, or anatomy/physiology course. This course will focus on primate evolutionary biology, minus the family hominidae. Particular emphasis will be placed on the fossil record and the analysis of fossils (through the use of fossil casts). Detailed cranial anatomy (particularly teeth) will be examined in the laboratory section. Literature on primate evolution will be surveyed.

**\*435. Human Evolution (3)**

Prerequisites: ANTH 110. Fossil evidence for human evolution with a consideration of the importance of cultural factors. Not open to students with credit in ANTH 430.

**\*436. Medical Anthropology (3)**

Prerequisites: ANTH 353 recommended. Interaction of cultural, biological and environmental elements in human response to disease; emphasis on an ecosystem approach with evolutionary and comparative perspectives.

**\*450. Archaeological Field Methods (4)**

Methods of recording field data including mapping, drawing and photography; practice in the use of field equipment; participation in local site surveys and excavations when feasible. May be offered on Saturdays.

**451./551. Laboratory Techniques in Archaeology (3)**

Prerequisites: ANTH 140 or consent of the instructor. ANTH 451/551 is designed to introduce students to the techniques used in processing collections in an archaeological laboratory and identifying attributes of artifacts relevant to the kinds of analysis current in archaeology today. Considerable emphasis will be placed on the kinds of behavioral inferences that can be derived from laboratory analysis of artifacts and other cultural items (animal bone, plant seeds, etc), as well as the context of laboratory operations in archaeological projects and in the construction of research designs. Traditional grading only.

**454. Culture and Aging (3)**

Cultural perspectives on aging and the aged in America and elsewhere. Attention to insider views from specific societies and to comparison of aging concerns in diverse settings.

**\*475. Language and Gender in Cross-Cultural Perspective (3)**

Analysis of men's and women's communication in its social and cultural context; role of gender in interpreting conversational interactions in the U.S. and elsewhere; acquisition of gender differences; cultural dimensions of perceptions and stereotypes and their effect on communication. Same course as LING 470, W/ST 475.

**\*480A. Osteology I (3)**

Introduction to skeletal anatomy, measurement and analysis of osteological collections, applied anthropometrics and morphometrics.

**\*480B. Osteology II (3)**

Prerequisites: ANTH 480A or consent of instructor. Osteological analysis of skeletal materials; detection of pathological conditions on archeological populations; methods of dietary analysis; faunal analysis from archeological sites.

**\*490. Special Topics in Anthropology (3)**

Topics of current interest in anthropology selected for intensive development. May be repeated for a maximum of six units. Topics will be announced in the *Schedule of Classes*.

**499. Guided Studies in Anthropology (1-3)**

Prerequisite: Consent of department. Selected topics in anthropology and preparation of a research report. May be repeated for a maximum of 6 units.

**Graduate Division**

**501. Current Trends in Anthropological Theory (3)**

Prerequisites: ANTH 401 or its equivalent, and graduate standing. Examination of current themes used by leading anthropologists in the areas of our graduate program, i.e.: Applied Anthropology (medical/health care, education, community/organizations), Linguistic Anthropology, and Archaeology. Investigation of how theories shape problems and analytic techniques, and what makes theory 'cutting edge'. Traditional grading only.

**503. The Anthropological Perspective (3)**

Prerequisite: Graduate standing or permission of the instructor. Through reading and discussion of ethnographies and reports of applied anthropological work, this course reviews the scientific understanding of the process of inquiry and action in the human sciences, leading to the identification of a common core perspective within anthropology. The course emphasizes how anthropology differs from other disciplines with its emphasis on ethnographic fieldwork, a holistic and cross-cultural approach, and culture as a key concept. The epistemology underlying anthropological approaches to contemporary, global, urban problems in health/medical care, education, communities and organizations are emphasized. Traditional grading only.

**505. Practicing Anthropology (3)**

Prerequisite: Graduate standing or permission of instructor. Review of practical contributions by anthropologists in non-academic settings. Attention to specific skills used by practicing anthropologists: business writing including resumes, contracts; oral presentations using audiovisual aides; internal and external contracting; time management; project management; working across disciplines; ethics. Traditional grading only.

**510. Proseminar (3) F**

Prerequisites: Six units of upper-division anthropology courses or permission of instructor. Development of proposal planning, budgeting, and writing skills, particularly in applied anthropology, linguistics, and archaeology. Both academic and contract/consulting types of proposals will be covered. Traditional grading only.

**514./414. Anthropology of Religion (3)**

Prerequisite: ANTH 120 and upper-division/graduate standing or permission of the instructor. An anthropological examination of religious behavior and beliefs, which will focus on these phenomena in their sociocultural and adaptive contexts. Using the cross-cultural and cultural evolutionary approach, hunter-gatherer religions through civilized ones will be covered.

**515./415. Economic Anthropology (3)**

This course compares and contrasts the economies characteristic of hunter-gatherers, horticulturalists, and peasants; investigates the changing relations of tribal and peasant peoples to the developing global economy; and looks at a range of production and marketing strategies within local, regional, and urban settings. It is a balanced presentation of appropriate ethnographic materials, economic theory, and alternative modes of analysis.

**516./416. Urban Anthropology (3)**

Comparative analysis of development and role of urban centers in ancient and modern cultures; interrelationships of urban and rural populations; patterns of similarity and difference in urbanism of contrasting cultures; implications for a multi-national world.

**517./417. Applied Anthropology (3)**

Prerequisites: ANTH 120 and upper division standing or graduate standing or permission of the instructor. Brief orientation to applied anthropology, its history and ethics; policy and applied anthropology domains (needs assessment, program evaluation, social impact assessment, environmental, advocacy); applied research methods; student proposals for internship research. Traditional grading only.

**519./419. Concepts and Theories of Ethnic Identity (3)**

Prerequisites: ANTH 120 and upper-division/graduate standing or permission of the instructor. An examination of concepts and theories of ethnic identity and acculturation/assimilation, as well as the causes of ethnic conflict and the means of its resolution. Traditional grading only.

**520./420. Political Anthropology (3)**

Prerequisites: ANTH 120 and upper-division/graduate standing or permission of the instructor. Political behavior and thought will be examined through the anthropological perspective, which will view these phenomena in their sociocultural and adaptive contexts; in addition, it will compare and contrast various types of political systems across the world, from the simple to the complex.

**530. Ethnography of Communication (3)**

Prerequisite: Graduate standing. Study of talk and other forms of communication from an ethnographic perspective. Emphasizes relevant methods and theories. Among the major topics presented from this perspective are language socialization, genres of speaking, intercultural communication, speech styles, strategic uses of language, and literacy. Traditional grading only. Same course as LING 533.

**551./451. Laboratory Techniques in Archaeology (3)**

Prerequisites: ANTH 140 or consent of the instructor. ANTH 551/451 is designed to introduce students to the techniques used in processing collections in an archaeological laboratory and identifying attributes of artifacts relevant to the kinds of analysis current in archaeology today. Considerable emphasis will be placed on the kinds of behavioral inferences that can be derived from laboratory analysis of artifacts and other cultural items (animal bone, plant seeds, etc), as well as the context of laboratory operations in archaeological projects and in the construction of research designs. Traditional grading only.

**560. Ethnographic Research Methods (3)**

Prerequisite: Graduate standing or consent of instructor. A practice-oriented seminar in ethnographic research methodology, emphasizing techniques, methods, and concepts of ethnographic research. The course examines several qualitative, in-depth methods used by anthropologists as well as research design and research ethics. Traditional grading only.

**561. Basic Computer Research Applications in Anthropology (3)**

Prerequisite: ANTH 560 or permission of instructor. The basics of both qualitative and quantitative computer methods, employing currently appropriate software and statistical techniques. The methods covered will be specifically related to research in archaeology and applied anthropology; and the presentation of results, as well as various research problems, will be addressed.

**570. Linguistic Field Methods (4)**

This course introduces the student to the practical study of unfamiliar languages. Through the help of a native speaker of a non-European language, the student will learn how to write down the sounds of the language and how to determine the structure of the language. Prerequisite: an introductory linguistics course. Same course as LING 580. (Lecture-activity 5 hours.)

**597. Directed Readings in Anthropology (1-3)**

Prerequisites: Senior or graduate standing and consent of instructor. Selected topics in anthropology will be studied in depth. A written report will be prepared.

**600. Seminar in Ethnology and Social Anthropology (3)**

Topics of substantive and theoretical importance and their application to research problems. May be repeated for a maximum of six units. Traditional grading only

**620. Seminar in Archaeology (3)**

Prerequisites: Six upper division units in archaeological courses or consent of instructor. Important recent discoveries; contemporary ideas, trends and problems. May be repeated for a maximum of six units.

**630. Seminar in Anthropological Linguistics (3)**

Prerequisite: Consent of instructor. Areas and methods of linguistic study and research; evaluation and intensive scrutiny. May be repeated for a maximum of six units.

**675. Applied Anthropology Internship Analysis (3-6)**

Prerequisites: ANTH 510, 417/517, 560. Guided review and discussion of internship in applied anthropology. A hands-on introduction to team analysis and other analytic methods drawing on research conducted during the internship. Credit/No Credit grading only.

**697. Directed Research (1-3)**

Prerequisite: Consent of department. Research in anthropology on an individual basis.

**698. Thesis (1-6)**

Prerequisite: Consent of department. Planning, preparation and completion of a thesis in anthropology. Traditional grading only.

View the CSU, Long Beach *Catalog* on-line at [www.csulb.edu](http://www.csulb.edu) by clicking on "Academics" and then "CSULB Catalog."

Students should contact the Department Student Services Office for referral to one of the faculty advisors: Art/Credential Advisor, B.A./B.F.A. Advisor, Graduate M.A./M.F.A. Advisor.

In recognition of the quality of its programs and the standards it maintains, the Art Department is an accredited institutional member of the National Association of Schools of Art and Design (National Association of Schools of Art and Design, 11250 Roger Bacon Drive, Suite 21, Reston, VA 20190, phone: 703-437-0700).

The Art Department at California State University, Long Beach, is one of several campuses in the California State University system authorized to offer the master of fine arts degree in art with a large number of specializations. The diversity of its programs, the quality of instruction, and the professional caliber of its faculty all combine to provide an exceptional opportunity and challenge to students seeking meaningful educational experiences and careers in the visual arts.

The Art Department has curricular programs leading to the following undergraduate degrees: (1) bachelor of arts (art); (2) bachelor of arts (art history); (3) bachelor of arts (art education); (4) bachelor of fine arts in eight specializations (photography, ceramics, drawing/painting, visual communication (graphic design), illustration, printmaking, sculpture, 3-D media-fiber/metal/wood).

At the graduate level the Art Department offers both the master of arts degree and the master of fine arts degree. As the terminal degree for studio artists, the master of fine arts degree requires a minimum of two years and provides 7 professional specializations as follows: ceramics, drawing/painting, illustration, photography, printmaking, sculpture, 3-D media-fiber/metal/wood.

The master of arts degree, designed as a one-year program, is offered by the Art Department in 10 specializations; in addition to the 7 studio areas listed above, the M.A. degree is granted in art history and art education (Graphic Design does not offer a graduate degree). The department also offers a graduate-level Certificate Program in Museum Studies and an interdisciplinary program leading to a Certificate in Biomedical Art.

As is customary in most schools, the Art Department may request projects completed by students for class credit for a short specified period for purposes of promotion and exhibition.

#### Admission to Baccalaureate Degree Programs in Art

Since requests for admission to Art Department programs may exceed the capacity to accommodate, all applicants are encouraged to apply during the first month of any initial filing period. When the initial application is received, an Art Department questionnaire will be sent to each applicant for designation of the specific degree and specialization desired. Applicants must return this form by the stated deadline directly to the Art Department or they will be considered only for the B.A. in Art. Applicants for admission to the B.A. degree programs (Art, Art Education or Art History) must meet all entrance requirements of the University.

## Admission to the Bachelor of Fine Arts Degree

Students seeking admission to the B.F.A. program must:

1. Meet entrance requirements of the University;
2. Provide the Art department with a transcript of all college level credits. This is in addition to any transcript submitted to the University Admissions Office;
3. Submit a portfolio of creative work to the Art Department.

Students who have not yet achieved sufficient specialization to prepare a portfolio or otherwise demonstrate their qualifications for the B.F.A. program are advised to seek admission to the B.A. program in art. Once in residence, the B.A. student may take more specialized work and apply at a later date to change to the B.F.A. program.

"Impacted status" has been declared for the Graphic Design Option in the Bachelor of Fine Arts program.

## Admission Procedures for Change of Major

Currently enrolled students who are undeclared or majors in other departments and who wish to apply for admission to degree programs in art must:

1. Submit a Change of Degree Objective form to the Art Department Student Services Office during the months of November or August;
2. Students applying for the B.F.A. degree programs in Art must also supply transcripts of college-level academic work attempted, and a portfolio of their creative work.

## Bachelor of Arts in Art (code 2-5850) (120 units)

This program is for students who seek a broad understanding and application in art. Total Art/Design units required: 23 lower division, 36 upper division.

### Requirements

Lower Division: AH115A, 115B, 115C; ART 010, 130, 131, 181, 184, 187, plus one course selected from: 151A, 151B, 161, 263.

Upper Division:

1. ART 320A or 320B;
2. 6 units of Art History only 3 of which may be AH 438 or 439;
3. One course from three of the following programs to total 9 units: Drawing and Painting, Printmaking, Illustration, Photography, Graphic Design (Visual Communication);
4. One course from three of the following programs to total 9 units: Ceramics, Fiber, Metal, Sculpture, or Wood;
5. Plus an additional 9 units upper division from one of the following programs: Art History, Ceramics, Drawing and Painting, Fiber, Graphic Design (Visual Communication), Illustration, Metal, Photography, Printmaking, Sculpture, Wood.

## Option in Art History (code 2-5857) (120 units)

This program is for students who wish to specialize in the study of the history of art.

Lower Division: AH 113A, 113B, 115A, 115B, 115C; ART 010, 130, 181; HIST 131, 132, plus one course selected from ART 131, 184, 187, or 263. Upper Division Art History: AH 307, AH 497, plus one course selected from AH 308, 309, concentration in "major" field (3 courses from one of the follow-

ing groups plus required AH 497), plus one course from each of the remaining five groups: I: AH 408, 409, 410; II: AH 423, 424, 425, 426, 427; III: AH 401, 436, 437, 438, 439; IV: AH 466, 467, 468, 469, 470, 471; V: AH 455, 456, 457; VI: AH 416, 417, 465.

Other: A score of 450 in either French or German on the Graduate School Foreign Language Test or complete two years of French or German with an average grade of "B" or better.

## Option in Art Education (code 2-5867) (120 units)

The bachelor of arts for teacher preparation degree is a four-year art major degree program required of those students seeking a single subject teaching credential in art (K-12) under the Teacher Preparation and Licensing Act of 1970 (Ryan Act).

## Art Education Credential (code 100)

Students are required to complete 30 units of core courses and an additional 36 units to provide breadth and perspective. Refer to the list of courses that follow. Consult the Art Education Credential Advisor for program information.

### Requirements

Lower Division: AH 115A, 115B, 115C; ART 010, 130 or 182, 131, 151A, 151B, 181, 184, 187.

Upper Division: ART 300, 301, 305, 407, 412, 415; Art History: one course selected from AH 455, 456, 457, 466, 467, 468, 469, 470; and AH 438 or 439; one course selected from ART 381, 383, 384, 385, 387; one course selected from ART 316, 340, 349, 370, 371A; one course selected from ART 316, 328A, 355A, 356, 357A, 357B, 358A, 359A, 362A, 363; and one course selected from ART 317, 341A, 341B, or 450A.

## Single Subject Credential

The Single Subject Credential in Art requires 30 units of upper division or graduate course work beyond the B.A. However, some or all of the professional education courses and student teaching may be taken in the B.A. program or within the fifth year. These courses are EDSS 300A (recommended for the junior year); H SC 411; EDSE435 and 436; EDSS 450A; EDSE 457; EDP 350; EDSS 472 A,B,C (Student Teaching in Art). Before student teaching in art, students must pass a portfolio review for the assessment of subject matter competency. A passing score on the CBEST is also required. For information concerning requirements for the B.A. program, teacher preparation, as well as the fifth year for the credential, consult the art education advisor.

As of July 1, 2002, all candidates for the Single Subject Preliminary Credential are required to demonstrate Level 1 computer proficiency. Proficiency in Art Education can be demonstrated by successful completion of ART 305 or ETEC 444 or by passing a California Commission on Teacher Credentialing-approved examination. This requirement must be met prior to advancement to student teaching.

## Bachelor of Fine Arts Degree

The bachelor of fine arts degree is offered for the student eventually seeking a master of fine arts degree, the position of a professional artist or designer, and for the student seeking a career of teaching studio art within a selected specialization. The B.F.A. degree program is demanding, requiring high quality performance in order to develop the professional competence of talented students toward successful entrance into the

professional art field. There are seven professionally-oriented specialized programs leading to the B.F.A. degree. Total art and support units required: 70 (30 lower division, 40 upper division). Total units for graduation: 132.

#### Requirements

Programs of Specialization:

#### Option in Art Photography (code 4-5865) (132 units)

Lower Division: AH 115A, 115B, 115C; ART 010, 130, 131, 141, 181, 187; select one from ART 161 or 184.

Upper Division: ART 320A or 320B, 340, 342A, 406A, 413, 444, 447, 473, 491C, 499V; select two courses from ART 342B, 406B, 414, 449; AH 411 and one from AH 438 or 439; and 6 units outside the specialization.

#### Option in Ceramics (code 4-5852) (132 units)

Lower Division: AH115A, 115B, 115C; ART 010, 130, 131, 151A, 151B, 161 or 184, 181, 187.

Upper Division: ART 320A, 341A, 341B, 343A, 343B, 352A, 451A, 451B, 491A; AH 364 and 6 additional units of Art History only 3 of which may be AH 438 or 439; and 9 units outside the specialization.

#### Option in Drawing and Painting (code 4-5858) (132 units)

Lower Division: AH115A, 115B, 115C; ART 010, 130 or 182, 131, 181, 184, 187, plus one course selected from: ART 151A, 151B, 161, 263.

Upper Division: ART 320A, 381, 383, 384, 387, 481, 483, 484, 487, 491G; 6 units of upper division Art History (AH); select 9 total units from the following courses: 492F, 492G, 492Z, 499D, 499K; and 6 units outside the specialization.

#### Option in Illustration (code 4-5855) (132 units)

Lower Division: AH115A, 115B, 115C; ART 010, 130, 131, 181, 184, 187, 223, 271.

Upper Division: ART 320B, 371A, 371B, 372, 471A, 471B. A minimum of 6 units from ART 373, 385, or 483; select one ART 374A or 499F; ART 382A, 382B, 383; 6 units of Art History only 3 of which may be AH 438 or 439; and 3 units outside the specialization.

#### Option in 3-D Media (Fiber, Metal, Wood) (code 4-5860) (132 units)

Specializations offered under this option are: Fiber, Metal, or Wood.

Lower Division: AH115A, 115B, 115C; ART 010, 130, 131, 151A or 151B, 161 or 184, 187, 263.

Upper Division: ART 320A, 381, 491B; select one of the following specializations:

*Fiber*: ART 316, 317, 328A, 428A, 432, 499N; select 3 units from ART 328B, 428B or 430; 6 units of Art History (AH) to include DESN 368; and 9 units outside the specialization.

*Metal*: ART 357A, 357B, 358A, 358B, 458A, 458B; select 3 units from: ART 355A, 356, 359A, 359B or 499J; 6 units of Art History (AH) to include DESN 368; and 9 units outside the specialization.

*Wood*: ART 354A, 354B, 454A, 454B, 499B for 9 units; 6 units of Art History (AH) to include DESN 368; and 9 units outside the specialization.

#### Option in Printmaking (code 4-5861) (132 units)

Lower Division: AH115A, 115B, 115C; ART 010, 130, 131, 141, 181, 184, 187.

Upper Division: ART 320A, 370, 376, 377, 378, 379, 381, 475, 480, 499R, 491P; AH365, 439, and 3 units elective upper division Art History (AH); plus 9 units outside the specialization.

#### Option in Sculpture (code 4-5862) (132 units)

Lower Division: AH115A, 115B, 115C; ART 010, 130, 131, 161, 181, 184, 187; 263.

Upper Division: ART 320A, 360A, 360B, 361, 362A, 362B, 363, 450A, 460A, 491F; 3 units of AH 439 and 3 additional units of Art History excluding AH 438; and 6 units outside the specialization.

#### Supplemental Screening Criteria for Admission to the BFA Degree in Graphic Design (Visual Communication) (code 4-5859)

Applications for the Graphic Design specialization exceed the spaces available; therefore, this program is considered impacted by The California State University.

Supplemental screening criteria will be used to determine which applicants will be admitted into Graphic Design. The criteria for admission to this program are listed below:

1. Return the Department questionnaire by the stated deadline;
2. Submit also by the stated deadline a complete set of transcripts for all college-level academic work attempted. These are in addition to the transcripts sent to the University Admissions Office;
3. Have earned a 3.0 GPA or better in at least 15 units of design/art, which must include or its equivalent: ART 181.
4. In addition, applicants for this BFA degree must submit a portfolio of their creative work by the stated deadline for a formal review by the faculty in this specialization.

#### Option in Graphic Design (Visual Communication) (code 4-5859) (132 units)

Lower Division: AH115A, 115B, 115C; ART 010, 130, 131, 181, 184, 187, 223.

Upper Division: ART 318, 322A, 322B, 323, 325, 326, 329, 331, 422A, 422B; select 6 units from the following: ART 420, 442, 499S; DESN 368 and 3 units of Art History (AH); and 6 units outside the specialization.

#### Certificate Program in Biomedical Art (code 1-5010)

The Certificate Program in Biomedical Art is an interdisciplinary program sponsored by the Art, Anatomy and Physiology, and Biological Sciences Departments.

Biomedical art is commissioned principally by (1) hospitals or individual researchers for publication, (2) by publishers and film and television producers serving the biomedical professions, (3) by producers of educational aids for biomedicine. Therefore, proficiency in commercial art and printing procedures including photography and typography is required.

Special permission is not required for a student to pursue the Certificate in Biomedical Art. The student may apply for certification upon completion of the following CSULB course work and conditions:

### Requirements

1. A major in art or biology;
2. A 2.75 overall GPA and 3.25 in the major;
3. 33 units as listed: ART 141 (2), 149 (3), 181 (3), 184 (3), 271 (3), 372 (2), 374A (3), 374B (3), 499F (3); and BIOL 200 (4), 208 (4); the BIOL 200 is waived for Biology majors.

Co-directors of the CSULB Biomedical Art program are in Art: Peter Mendez; and in Biological Sciences: Dr. Kenneth Gregory. Questions may be addressed to them during office hours which are listed in the respective departmental offices.

### Certificate Program in Museum Studies (code 1-5020)

The Certificate Program in Museum Studies is open to graduate students in museum related fields including the visual arts, science, history, but does not exclude other fields. The initial program is to be devoted primarily to art museum studies.

Admission to the program is by permission of the museum studies faculty within the Art Department. Interested students should apply to the Director, the Museum Studies Program.

### Requirements

A total of 30 units to include: ART 435, 545A-B taken consecutively beginning in the spring semester, 542 in museum internship; ART 307 and 15 additional units selected from ART 499Q, Art History, Anthropology, Business Administration, English, Instructional Media, Journalism or Public Policy and Administration, subject to approval of the director of the program at the time of admission to ART 545A.

### M.A. and M.F.A. Degrees in Art

The Department of Art offers the Master of Arts degree in the Art Education and Art History majors and the Master of Arts and Master of Fine Arts degrees in these Studio Art Specializations: Ceramics, Drawing & Painting, Illustration, Photography, Printmaking, Sculpture, and 3-D Media (Fiber, Metal or Wood) or Integrated 3-D Media (Fiber, Metal and Wood).

Admission to pursue a graduate degree at California State University, Long Beach involves acceptance by both the Department and the University into a specific degree program. Many applicants attempt the Departmental review before making a formal application to the University.

University Admission: Applicants must file a complete application as described in the CSU admissions booklet. Requirements include: a bachelor's degree from a regionally accredited institution; a grade point average of at least 2.5 in the last 60 semester units; and good standing at the last college attended.

Open filing periods (through the Admissions Office) begin November 1st for the following Fall semester and August 1st for the following Spring semester. There is a fee of \$55.00 for the University application process.

Acceptance to a Degree Program in Art: After submitting the Department of Art Application, those who pass the review and are also accepted by the University may be admitted to either Classified or Conditionally Classified status. A Classified Graduate has met all of the Art prerequisites, while a Conditionally Classified Graduate has outstanding prerequisite or portfolio requirements to complete.

The Departmental reviews are held the month of March for Fall admission and the month of October for Spring admission. Call the Art Student Services Office at (562) 985-4376 to obtain an application packet.

NOTE: The Department of Art requires a GPA of 3.0 in upper division (junior/senior level) art prerequisites for acceptance to the graduate program. All students must be accepted by the Department, which notifies the Admissions Office so that they may be officially accepted by the University. There is no fee for the departmental application process.

Foreign Students must be accepted in Classified or Conditionally Classified standing by the Department of Art and pass the TOEFL examination (minimum score of 550) before they can be admitted to the University.

Degree Outside Art: Students who have a baccalaureate or master's degree in another field need only complete the required Art and Art History (and Education for the Art Education major) prerequisites below to qualify for applying to the graduate program in Art.

### Master of Arts in Art (code 5-5850)

#### Prerequisites for all Majors

1. A bachelor's degree from an accredited institution.
2. A minimum of 24 units of upper division (300-400) art comparable to those required of a major in Art at this university. This must include at least 15 units of upper division work (junior and senior level classes taken as an undergraduate or post baccalaureate student) in the intended major or area of graduate specialization.
3. A minimum GPA of 3.0 in upper division Art and Art History units. A student who does not meet this requirement within the 24 units required as an undergraduate may count units taken as a post baccalaureate student to bring their GPA up to 3.0. This coursework may not be used in the master's program.

#### Art Education Prerequisites

1. Within specialization units, the total of 15 will consist of Art and Education courses approved by the Art Education faculty.
2. In addition to the 24 units in art and education, a minimum of 12 units of Art History, which may include no more than six lower division (100-200) units and must include at least six upper division (300-400) units.

#### Art History Prerequisites

1. Within the specialization, the total of 15 units must include the following courses or their equivalents: ART 307 and one of the following: ART 308, 309 or.
2. A minimum score of 450 in either French or German on the Graduate School Foreign Language Exam or the completion of two years (or a minimum of 12 units) of college-level French or German with an average grade of "B" or better. (With approval from the Art History faculty, another language may be substituted if appropriate.)

## Studio Art Prerequisites

In addition to the 24 units in art (with 15 units required in the studio specialization), 12 units of Art History, which may include no more than six lower division (100-200) units and must include at least six upper division (300-400) units.

## Master of Fine Arts in Art (code 7-5850)

### Studio Art

#### Prerequisites

1. A bachelor's degree from an accredited institution.
2. A minimum of 24 units of upper division art comparable to those required of a major in art at this university. This must include at least 18 units of upper division work (junior and senior level classes taken as an undergraduate or post baccalaureate student) in the intended area of studio specialization.
3. 12 units of Art History, which may include no more than six lower division (100-200) units and must include at least six upper division (300-400) units.

#### Departmental Review Requirements for the M.A. and M.F.A.

The Department of Art Application, transcripts and two letters of recommendation are required. Reviews are held by the faculty from each major or intended area of specialization. Applicants should schedule a meeting with the appropriate faculty representative and/or have application materials into the Graduate

Art Office the first week of the review month (October or March). While most areas review on an informal basis as applications are received, the Drawing and Painting Area has a formal group review day in the middle of the month (applicants will be notified of this date). If openings are not filled, some areas will consider applicants whose materials arrive after the departmental deadline of the end of the review month.

Call the Art Student Services Office at (562) 985-4376 to confirm if this is the case.

#### Art Education

Present to the Art Education faculty a portfolio of studio and written work, along with the required application, transcripts and letters.

#### Art History

If possible, arrange an interview with the Art History Graduate Representative to review prerequisites, as well as submit the required application, transcripts and letters.

#### Studio Art

Present to the faculty of the intended studio specialization a portfolio of studio work, along with the required application, transcripts and letters.

#### Faculty Contacts for Admission Reviews

Applicants must contact the Art Student Services Office for further information and referral to the appropriate faculty contact for their intended area of study.

## Transcripts

If you are also applying to the University, send the Department the required official (sealed) set of transcripts. If you plan to apply to the University later, we will accept temporary, "unofficial" photo-copies.

## Transfer Units

With faculty approval, up to six post-baccalaureate units may be accepted into the MA program, and up to 24 units (for example, from a previous MA degree) into the MFA program. In the case of an existing MA degree in the same specialization from CSULB, the total of 30 units will be eligible for acceptance into the MFA.

## Grading Policy

All art majors must take art, art history and design classes for a letter grade. Credit/No Credit grades will not be counted for degree credit.

## Degree Requirements for the M.A. in Art Education, Art History and Studio Art

Completion of all program requirements and courses as established by the student and their chosen three member faculty Graduate Committee, to include:

1. 30 units of approved graduate and upper division courses. The University requires that at least 60% of the total 30 units must be 500-600 level courses taken in residence at CSULB.
2. 18 units in the major or area of specialization, which must consist of a majority of 500/600 level courses and include 6 units of ART 698, Thesis/Project (For the written component of ART 698, see individual majors below.)
3. 12 units of electives must be graduate level or asterisked (\*) for graduate credit and may include: additional specialization classes; art outside the specialization; or classes outside art (optional but limited to 6 units).
4. Successful completion of the Writing Proficiency Exam (WPE) taken the first semester in residence at CSULB and required by the time of Advancement to Candidacy (below).
5. A minimum GPA of 3.0 in all program work, with no grade below a "C".

## Art Education Requirements

1. Within the specialization must be ART 601A and 601B, Seminars in Art Education, to total 6 units.
2. Six units of Art History electives beyond the 12 taken as prerequisites for a cumulative total of 18. (If more than 12 were taken as prerequisites, the number of units needed to equal 18 are required.)
3. In conjunction with ART 698, the final degree component is a written Thesis submitted to the department or an approved project, document the process, write a final report and take an on-campus comprehensive exam. Required of all candidates for the M.A. in art..

## Art History Requirements

1. Within the specialization must be AH 597, Seminar in Art History, for a minimum of 3 units.
2. In conjunction with ART 698, the final degree component is a written Thesis submitted to the Department of Art and approved by the student's faculty committee.

## Studio Art Requirements

1. Within the specialization must be ART 692, Public Exhibition, taken for 3 units in the final semester.
2. Six units of Art History electives beyond the 12 taken as prerequisites for a cumulative total of 18. (If more than 12 were taken as prerequisites, the number of units needed to equal 18 are required.)
3. In conjunction with ART 698, the final degree component is a written Project Report submitted to the Department of Art and approved by the student's faculty committee.

## Degree Requirements for the M.F.A. in Studio Art

Completion of all program requirements and courses as established by the student and their chosen three member faculty Graduate Committee, to include:

1. A total of 60 units of approved graduate and upper division courses. The University requires that at least 60% of the 60 units must be 500-600 level courses taken at CSULB.
2. 36 units in the area of specialization, which must include a majority of 500/600 level courses, including: Graduate Seminars (ART 690A and 690B) for 6 units (ART 690A should be taken the first fall semester in residence at CSULB.); ART 699, Thesis/Project for 6 units, and ART 692, Public Exhibition for 3 units.
3. 24 units of electives must be graduate level or asterisked (\*) for graduate credit and should include 6 additional units of Art History beyond the 12 taken as prerequisites for a cumulative total of 18. (If more than 12 were taken as prerequisites, the number of units needed to equal 18 are required.) Other elective choices are: additional specialization classes; art outside the specialization; classes outside art (optional but limited to 6 units).
4. Successful completion of the Writing Proficiency Exam (WPE), taken the first semester in residence at CSULB and required by the time of Advancement to Candidacy (below).
5. A minimum GPA of 3.0 in all program work, with no grade below a "C".
6. In conjunction with ART 699, the final degree component is a written Project Report submitted to the Department of Art and approved by the student's faculty committee.

## Advancement to Candidacy Review for the M.A. and M.F.A. Degrees

Advancement reviews occur after the completion of 15 M.A. or 30 M.F.A. program units and are the point at which the student's program is forwarded to the Records Office and they become an official candidate for graduation. The completed MA or MFA Program Form, along with written minutes of regular semester meetings with the three member faculty Graduate Committee, must be submitted. This is also the point at which proof of passing the Writing Proficiency Exam (WPE) must be presented.

## Art Education Requirements

1. The completion of a written exam which tests the student's knowledge of literature relative to Art Education and shows evidence of writing and research skills.
2. An oral defense presented to the student's faculty Graduate Committee.

## Art History Requirements

1. Faculty review of a qualifying paper demonstrating potential for success in thesis and research writing. This is documented on the Graduate Paper Evaluation form.
2. A minimum score of 600 in either French or German on the GSFL Exam or pass an Art History language competency test in reading French or German (or an approved substitution).

## Studio Art Requirements — M.A. and M.F.A.

1. Exhibition of selected studio work in group shows in the College of the Arts Galleries, including an Artist's Statement to accompany the installation.
2. An oral defense presented in the gallery to the student's faculty Graduate Committee.

Following Advancement, the student may submit a Request for Graduation Date ("Grad Check") at the Records Office, and enroll for the courses planned in their program or, if changes become necessary, file a Change of Program Form with the Graduate Art Advisor. Prior to registering for ART 698 or 699, the Project Statement form should be filled out and agreed to by the student's Graduate Committee, then signed and returned in to the Graduate Art Office.

## Final Degree Requirements

If all scheduled units for the MA or MFA degree programs have been completed but the final written requirements have not been approved and submitted, students must register for GS 700 (1 unit-no credit) through University Extension in order to maintain enrollment until the semester they graduate. Care should be taken not to exceed the University limit of seven years for all master's degrees.

Additional information may be found in the "Art Department Graduate Guidelines," given to each student accepted into a master's program.

---

## Foundation Art

---

The classes listed below are the foundation art classes that are required of all studio art majors. When foundation classes are chosen, be aware of the prerequisites; do not take the classes out of order.

- AH 115A,B,C. Foundation Art History I, II, III
- 130. Foundation Two-Dimensional
- 131. Foundation Three-Dimensional
- 181. Foundation Drawing
- 184. Foundation Life Drawing
- 187. Foundation Painting

---

## Art Courses (ART)

---

All courses are Traditional Grading Only unless otherwise stated.

### Lower Division

#### 010. Art Matrix (1)

Participation in art and design exhibitions, openings, lectures and special events. Required of art majors. Must be taken for 1 unit in 5 different semesters for a total of 5 units. Repeatable to 5 units. These units do not count toward graduation. Credit/No Credit grading.

#### 100. Perceptual Skills Through Drawing (3)

Prerequisite or corequisite: A General Education Foundation class. Basic theory and concepts of art learned through drawing, with emphasis on developing perceptual skills. (2 hrs. lec., 3 hrs. lab.)

### 110. Introduction to the Visual Arts (3)

Prerequisite or corequisite: A General Education Foundation class. Exploration of the meanings, purposes, and styles of art; introduction to the materials and forms of painting, printmaking, sculpture, and architecture. Orientation to the arts of Africa, Asia, the Americas, Europe, and the Islamic world. Development of an awareness and understanding of diverse cultures through examination and comparison of their arts and artifacts, past and present. Illustrated lectures, supplemented by individual field activities utilizing the abundant visual arts resources of greater Los Angeles.

### 130. Foundation Two-Dimensional (3)

Introduction to, and exploration of, the basic principles, components and terminology of two dimensional design. Students apply these in a series of problem solving exercises to develop a working vocabulary of those fundamental visual elements and relationships applicable to all forms of visually creative endeavor. (6 hrs. lab.)

### 131. Foundation Three Dimensional (3)

Investigation and problems in the organization of three-dimensional phenomena. (6 hrs. lab.)

### 141. Basic Photography (3)

A beginning course to familiarize students with the fundamentals of photography. Units pertaining to cameras, exposure meters, films, darkroom technique, lighting, portraiture and optics. (6 hrs. lab.)

### 149. Introduction to Computer Art (3)

Prerequisites: ART 130. An introduction to the basic operating characteristics of the computer and a project-based creative exploration of major art-related software programs such as Illustrator, Photoshop QuarkXpress, Painter, Dimensions, etc., with exposure to research and connectivity capabilities. Not open to students who have credit in ART 349A. (6 hrs. lab.)

### 151A. Beginning Ceramics: Handbuilding (3)

Prerequisites/Corequisites: ART 131. Introduction to ceramics as an art making material using handbuilding techniques such as slab, coil, and molding, including glazing and processes. (6 hrs. lab.) (CAN ART 6)

### 151B. Beginning Ceramics: Wheel Throwing (3)

Prerequisites/Corequisites: ART 131. Introduction to ceramics as an art making material emphasizing the use of the potters wheel to develop forms. Includes glazing and firing. (6 hrs. lab.)

### 161. Foundation Life Sculpture (3)

Prerequisites/Corequisites: ART 131,181, or permission of instructor. Modeling from the human figure with emphasis on composition. Traditional grading only for Majors/Minors. Course fee required. (6 hrs. lab.)

### 181. Foundation Drawing (3)

Introduction to drawing with emphasis on perspective, light, shadow, and volume in composition using a variety of media. (6 hrs. lab.) (CAN ART 8)

### 182. Color Theory and Composition (3)

An intensive study of the behaviors and traditions of color composition with an emphasis on fine arts application. Using theories of the major colorists as a structure, studio projects provide hands-on exploration of specific topics.

### 184. Foundation Life Drawing (3)

Prerequisites/Corequisites: ART 181 Introduction to drawing from the human figure. Course fee required. (6 hrs. lab.)

### 187. Foundation Painting (3)

Prerequisites: ART 130 or 182, 181. Introduction to painting problems using opaque media. (6 hrs. lab.) (CAN ART 10)

### 221. Shop Orientation (1)

Intended to give students a general familiarity with the student workshop facilities as well as specific instruction on safety procedures and methods in the use of workshop tools and equipment. Students shall attend safety lectures and technical demonstrations followed by hands-on experience in the use of shop facilities. Projects will familiarize students with commonly used machines in the shop and shall facilitate the acquisition of basic woodworking skills. Credit/No Credit grading only.

### 223. Lettering-Typography (3)

Prerequisite: ART 181, 130 or 182. Introduction to historic and contemporary letterforms, with emphasis on recognition, construction and representation. Students apply design fundamentals to the modification, combination and composition of existing typographic forms. Computers may be utilized. (6 hrs. lab.)

### 263. Beginning Sculpture (3)

Prerequisites/Corequisites: ART 131, 181, or permission of instructor. Principles of sculpture expressed through basic experiences in modeling, carving, construction and mold making. (6 hrs lab) (CAN ART 12)

### 271. Rendering (3)

Prerequisite: ART 181, 130 or 182. Graphic visualization for convincing representation. (6 hrs. lab.)

## Upper Division

The Art Department upper division courses fall into several curricular sub-groups, as follows:

---

### Art Education

---

(ART 407 and 499P are acceptable for the M.A. with a specialization in Art Education.)

- 300. Art, Adolescence, and the Child
- \*301. Cross-Cultural Perspectives in Art Education
- 305. Art Disciplines and New Technology
- \*407. Art Practicum
- 412./512. Aesthetic Theories and Art Education
- 415. On-Site Studies in Art Education
- \*499P. Special Studies in Art Education

---

### Art History

---

- AH \*307. Historiography in Art
- AH \*308. Art Theory
- AH \*309. Art Criticism
- AH \*364. History of Ceramics
- AH \*365. History of Prints and Drawings
- AH 401./501. American Art
- AH 408./508. Early Christian and Byzantine Art
- AH 409./509. Romanesque Art
- AH 410./510. Gothic Art
- AH 411./511. History and Criticism of Photography
- AH 416./516. Greek Art
- AH 417./517. Roman Art
- AH 423./523. Early Renaissance Art in Italy
- AH 424./524. High Renaissance Art in Italy
- AH 425./525. Northern Renaissance Painting
- AH 426./526. Baroque and Rococo Trends in Art
- AH 427./527. Baroque Art: Court and Middle Class
- AH 436./536. Neo-Classicism to Romanticism, 1789-1850
- AH 437./537. Impressionism to Post-Impressionism, 1850-1900
- AH 438./538. Twentieth Century Art to 1945
- AH 439./539. Twentieth Century Art from 1945
- AH 440. Art and Society
- AH 455./555. Traditional Art of Africa: A Thematic Approach
- AH 456./556. American Indian Art: Western Perspectives
- AH 457./557. Pre-Columbian Mexican Art
- AH 465./565. Ancient Art of the Near East
- AH 466./566. Buddhist Art of India and S.E. Asia
- AH 467./567. Hindu and Islamic Art of India
- AH 468./568. Early Chinese Art
- AH 469./569. Later Chinese Art
- AH 470./570. Japanese Art
- AH 496. Special Studies in Art History
- 497. Special Studies in Art History

---

## Ceramics

---

- \*341A. Intermediate Ceramics: Handbuilding
- \*341B. Intermediate Ceramics: Wheel Throwing
- \*343A. Ceramics Sculpture
- \*343B. Advanced Wheel Throwing
- \*352A. Ceramics: Glaze Technology
- \*352B. Ceramics Plaster Shop
- \*451A-B. Advanced Ceramics
- 453. Seminar in Ceramic Arts
- 491A. Ceramics: Senior Project
- \*499A. Special Studies in Ceramics

---

## Drawing and Painting

---

- 381. Intermediate Drawing
- 383. Life Painting
- 384. Intermediate Life Drawing
- \*385. Watercolor Painting
- \*387. Painting
- \*389. Materials and Craft of Drawing and Painting
- \*481. Advanced Drawing
- \*483. Advanced Life Painting
- \*484. Advanced Life Drawing
- \*487. Advanced Painting
- \*492F. Concentrated Studies in Life Drawing
- \*492G. Concentrated Studies in Abstract Painting
- \*492Z. Concentrated Studies in Life Painting
- \*499D. Special Studies in Drawing
- \*499K. Special Studies in Painting

---

## Fiber

---

- \*316. Surface Design
- \*317. Surface Design
- \*328A. Fiber: Sculpture
- \*328B. Fiber: Sculpture
- \*428A-B. Weaving
- \*430. Fiber: Papermaking and Artist Books
- 432 Fiber: Advanced
- 491B. 3-D Media Fiber/Metal/Wood and Integrated Media: Senior Project
- \*499N. Special Studies in Fiber

---

## Graphic Design (Visual Communications)

---

- 318. Typographic Design
- \*322A-B. Visual Communication Design
- \*323. Visual Communication Design/Production
- \*325. Packaging Design
- 326. Computer Graphics
- 329. Advertising Design
- \*331. Visual Communications Design/Comping Skills
- 389. New Media Design
- \*420. Visual Communication Design Workshop
- \*422A-B. Advanced Visual Communications Design
- \*442. Internship in Visual Communications
- \*499S. Special Studies in Visual Communications Design

---

## Illustration and Biomedical Art

---

- \*371A-B. Illustration
- \*372. Anatomy for Artists
- \*373. Costumed Figure Drawing
- \*374A-B. Biomedical Rendering
- \*471A-B. Advanced Illustration
- \*499F. Special Studies in Illustration

---

## Metal

---

- 355A. Enameling
- \*356. Jewelry Casting
- \*357A-B. Beginning Metals and Jewelry
- \*358A-B. Metalsmithing
- 359A. Architectural Metalwork and Blacksmithing
- 359B. Sculptural Metalwork
- 458A,B. Advanced Metalsmithing/Jewelry and Enameling
- 491B. Senior Project
- \*499J. Special Studies in Metalsmithing and Jewelry

---

## Museum Studies

---

- \*435. Introduction to Museums
- \*499Q. Special Studies in Museum Studies

---

## Photography

---

- \*340. Intermediate Photography
- \*342A. Color Photography
- 342B. Advanced Color Photograph
- 406A. Digital Imagery for the Arts
- 406B. Advanced Digital Imagery for the Arts
- \*413. Photo Marketing/Portfolio
- 414./514. Documentary Photography
- \*444. Fine Print Photography
- \*447. Photography Studio Specialties
- \*449. Experimental Photography
- 491C. Photography – Senior Project
- \*499V. Special Studies in Art Photography

---

## Printmaking

---

- 370. Printmaking
- \*376. Printmaking: Relief Printing
- \*377. Printmaking: Silkscreen
- \*378. Printmaking: Etching
- \*379. Printmaking: Lithography
- \*475. Printmaking: Photo Processes
- \*480. Printmaking: Monotype/Monoprint
- 491P. Printmaking: Senior Project
- \*499R. Special Studies in Printmaking

---

## Sculpture

---

- 360A. Intermediate Sculpture
- 360B. Intermediate Sculpture
- \*361. Life Sculpture
- \*362A. Sculpture Foundry: Investment Casting
- \*362B. Sculpture: Molding and Reproduction
- \*363. Sculpture: Carving and Fabrication
- 450A,B. Intermedia
- 460A. Advanced Sculpture
- 460B. Advanced Sculpture
- \*461. Advanced Life Sculpture
- \*491F. Sculpture Senior Project

---

## Wood

---

- \*354A-B Wood
- \*454A-B. Handcrafted Furniture
- 491B. 3-D Media Fiber/Metal/Wood and Integrated Media: Senior Project
- \*499B. Special Studies in Wood

---

## Art Courses (ART)

---

All courses are traditional grading only unless otherwise stated.

### Upper Division

#### 300. Art, Adolescence, and the Child (3)

Experiences in visual art appropriate to developing creative self-expression according to guidelines found in the California Visual and Performing Arts Framework; introduction to children's artistic and aesthetic development. In addition, students will develop aesthetic perception; learn skills of analysis, interpretation, and judgment for application to visual art; and gain an understanding of the historical and cultural contexts of visual art. (6 hrs. lab.) Course fee required.

#### \*301. Cross Cultural Perspectives in Art Education (3)

Prerequisites: Completion of 12 units of Art Foundation. A study of the diversity of theory and practice in art and art education as understood in and across cultures. Application of the California Visual and Performing Arts Framework for art education to the integration of content from art history, art production, theory and criticism, and aesthetic viewpoints reflecting a variety of racial, ethnic, linguistic, gender, sexual, cultural and cross-cultural perspectives. This course will also address issues of culturally appropriate practice for understanding art across cultures. (6 hrs. lab.)

#### 305. Art Disciplines and New Technology (3)

Prerequisites: Completion of 12 units of Art Foundation. Development of skills in making and talking about art through interrelating art production with art criticism, cultural-historical connections, and philosophical aesthetics. Emphasis will be placed on the newer art forms and technology including video and computer which help provide additional approaches for the artist and art educator. Course fee required. (6 hrs. lab.)

#### \*316. Fiber: Pattern Design and Printing (3)

Prerequisites: ART 130 or 182, 131, 181, 187; six units from AH 115A, 115B, 115C. Variety of design concepts for both hand and commercial application of pattern to textiles and other surfaces. To include pattern system design, stamping, and silkscreen printing. (6 hrs. lab)

#### \*317. Fiber: Textile Dyeing (3)

Prerequisites: ART 130 or 182, 131, 181, 187; six units from AH 115A, 115B, 115C. Variety of design concepts and processes to include chemical and natural dye technology with discharge, shibori, batik, and direct painting techniques. Not open to students with credit for ART 327B. (6 hrs. lab.)

#### 318. Typographic Design (3)

Prerequisites: ART 130 or 182, 181, 184, 223; six units from AH 115A, 115B, 115C; or permission of instructor. More complex design experiences with type families, exploration of combinations of display and text; development of logotypes and design of new typographic forms. Computers may be utilized. (6 hrs. lab.)

#### 320A. Practical and Theoretical Issues in the Visual Arts (3)

Comparative examination, discussion, and study of major theoretical and practical issues in the visual arts with special emphasis on issues that face the artist in contemporary society.

#### 320B. Practical and Theoretical Issues in the Visual Arts (3)

Exploration of significant issues for artists involved with visual communication (illustrators, graphic designers and photographers): societal roles, quality and trends, artistic integrity, ethics, professionalism, creative collaboration, technological change, globalization, and cultural diversity. Discussion of business practices for the self-employed and staff artist, including self-promotion, portfolio preparation, pricing and legal issues. Recommended for the final year of study.

#### \*322A-B. Visual Communication Design (3-3)

Prerequisites: For ART 322A: ART 130 or 182, 131, 181, 184, 187, 223 and 6 units from AH 115A, 115B, 115C. For ART 322B: ART 322A, 323. Introductory and intermediate experiences in conceptualization, design and finalization of projects appropriate to the visual communication profession. Computers may be utilized. (6 hrs. lab.)

#### \*323. Visual Communication Design/Production (3)

Prerequisites: ART 322A or consent of instructor; majors only. Computer-based introduction to design and production techniques for major printing processes from concept to digital finished art. Field trips, lectures, critiques. (6 hrs. lab.)

#### \*325. Packaging Design (3)

Prerequisite: Visual Communications major or consent of instructor. Materials, processes and the design of packaging. (6 hrs. lab.)

#### 326. Computer Graphics (3)

Prerequisite: ART 322A and 331 or consent of instructor. Entry level introduction to the graphics-oriented computer, emphasizing its potential as a visual communication design tool. Includes "hands on" exploration of the major software applications as related to layout, typography and illustration. (6 hrs. lab.)

#### \*328A. Fiber: Sculpture (3)

Prerequisites: ART 130 or 182, 131, 181, 187; six units from AH 115A, 115B, 115C. In this introductory course the student will explore concepts and materials using non-loom textile techniques. Development from the 2-D relief surface to full 3-D form will take place. The basic fiber structures of stitching, wrapping, feltmaking, papermaking, and coiling will be introduced. (6 hrs. lab)

#### \*328B. Fiber: Sculpture (3)

Prerequisites: ART 328A. Designed to strengthen a working understanding on non-loom fiber structures. There will be an emphasis on the development of personal expression within the media. (6 hrs. lab)

#### 329. Advertising Design (3)

Prerequisites: ART 322A, 331, majors only. This course will explore small space advertising, television, and outdoor billboards from the conceptual stage through comprehensive layouts. (6 hrs. lab.)

#### 331. Visual Communications Design/Comping Skills (3)

Prerequisites: ART 130 or 182, 181, 184, 187, 318, 322A, 6 units from AH 115A, 115B, 115C. Development of concepts and representational skills in all applications from thumbnail sketches to tight comprehensives. Emphasis on rendering of various materials, surfaces and typographic forms. Computers may be utilized. (6 hrs. lab.)

#### \*340. Intermediate Photography (3)

Prerequisite: ART 130 or 182, 141, 181, 184, 187; six units from AH 115A, 115B, 115C. Course designed to further increase photographic knowledge in camera, darkroom and lighting. An emphasis is placed on reaching a higher level of print quality. (6 hrs. lab.)

#### \*341A. Intermediate Ceramics: Handbuilding (3)

Prerequisites: ART 130 or 182, 131, 151 A, 181; six units from AH 115A, 115B, 115C. Design problems with handbuilt ceramic forms with emphasis on surface. (6 hrs. lab.)

#### \*341B. Intermediate Ceramics: Wheel Throwing (3)

Prerequisites: ART 130 or 182, 131, 151 B, 181; six units from AH 115A, 115B, 115C. Design problems with wheel-thrown ceramic forms with emphasis on surface. (6 hrs. lab.)

#### \*342A. Color Photography (3)

Prerequisite: ART 340. Survey of current color materials and processes with emphasis on exposing, developing and printing. Contemporary approach to color photography will be stressed. (6 hrs. lab.)

#### \*342B. Advanced Color Photography (3) F,S

Prerequisite: ART 342A. A continuing course in color photography to familiarize students with the options available for use in color photography. Units pertaining to hand manipulation, chormes, films, and other contemporary approaches. (6 hrs. lab.)

#### \*343A. Ceramics Sculpture (3)

Prerequisites: ART 341A. Advanced studies in ceramic sculpture. (6 hrs. lab.)

#### \*343B. Advanced Wheel Throwing (3)

Prerequisites: ART 341B. Advanced studies in ceramic form employing the potters wheel. (6 hrs. lab.)

**349. Computer Art (3)**

Prerequisites: ART 149, AH 115A, 115C. Basic theory and hands-on use of microcomputers employing graphics in "Paint Programs" with color hardcopy output and animation production on video tape. Emphasis on computer graphic applications in students' individual studio art disciplines. Not open to students who have credit for ART 349B. (6 hrs. lab.)

**\*352A. Ceramics: Glaze Technology (3)**

Prerequisite: ART 130 or 182,131,151A or 151B,181; six units from AH 115A, 115B, 115C. Nature of raw materials as they relate to the development of clay bodies and ceramic glazes. (6 hrs. lab.)

**\*352B. Ceramics Plaster Shop (3)**

Prerequisites: ART 130 or 182,151A or 151B,181; six units from AH 115A, 115B, 115C. The use of plaster molds for making ceramic art including press molds, slip casting, and jiggering. (6 hrs. lab.)

**\*354A-B. Wood (3-3)**

Prerequisites: For ART 354A: ART 130 or 182,131,181; six units from AH 115A, 115B, 115C. For ART 354B: ART 354A. Woodworking processes techniques and concepts in the design and making of utilitarian art objects. (6 hrs. lab.)

**\*355A. Enameling (3)**

Prerequisite: ART 130 or 182,131,181; six units from AH 115A, 115B, 115C. Techniques, materials and concepts of enameling on metals. Introduction to tools and metalworking techniques associated with making enameled metal objects. Emphasis on the exploration of characteristics of enamels and metals, stressing individual advancement of interest and expression. Course fee required. May be repeated once for credit. (6 hrs. lab.)

**\*356. Jewelry Casting (3)**

Prerequisite: ART 130 or 182,131,181; six units from AH 115A, 115B, 115C; or consent of instructor. The design and creation of jewelry through lost-wax casting techniques and processes. Course fee required. May be repeated once for credit. (6 hrs. lab.)

**\*357A-B. Beginning Metals and Jewelry (3-3)**

Prerequisites: For ART 357A: ART 130 or 182,131,181, 187; six units from: AH 115A, 115B, 115C. For ART 357B: ART 357A. The design and creation of jewelry. Course fee required. (6 hrs. lab.)

**\*358A. Metalsmithing (3)**

Prerequisites: ART 357A. The design and creation of flatware and hollowware. Course fee required. (6 hrs. lab.)

**\*358B. Metalsmithing (3)**

Prerequisites: ART 357A, DESN 252. The design and creation of flatware and hollowware. Course fee required. (6 hrs. lab.)

**\*359A. Architectural Metalwork and Blacksmithing (3)**

Prerequisite: ART 130 or 182,131,181; six units from AH 115A, 115B, 115C. Techniques, materials and concepts of the metal craft for developing art forms in larger scale and in an architectural context. Hot forging and fabricating with ferrous metals. Basic techniques of cutting, forming, joining welding and surface design of metals. Making of tools. May be repeated for a maximum of 6 units. Course fee required. (6 hrs. lab.)

**\*359B. Sculptural Metalwork (3)**

Prerequisite: ART 130 or 182,131,181; six units from AH 115A, 115B, 115C. Introduction to metalforming and construction techniques in the design and creation of sculptural form and composition in metal on an architectural scale. May be repeated for a maximum of 6 units. Course fee required. (6 hrs. lab.)

**360A. Intermediate Sculpture (3)**

Prerequisites: ART 130 or 182, 131, 161, 181, 263; 6 units from AH 115A, 115B, 115C or consent of instructor. Exploration and refinement in wide range of sculptural techniques and strategies. Introduction to installations and public work. Some work will be with time-based kinetic art. Course will include introduction to 3-D art theory. (6 hrs. lab.)

**360B. Intermediate Sculpture (3)**

Prerequisites: Art 360A or consent of instructor. Exploration and refinement in a wide range of sculptural techniques and strategies. Introduction to installations and public work. Some work will be with time based kinetic art. Course will include introduction to 3-D art theory. (6 hrs. lab.)

**\*361. Life Sculpture (3)**

Prerequisite: ART 130 or 182,131,161,181; six units from AH 115A, 115B, 115C. Intensive study of the figure through individual student concepts. Mold and casting techniques and direct plaster parging. Course fee required. (6 hrs. lab.)

**\*362A. Sculpture Foundry: Investment Casting (3)**

Prerequisites: ART 130 or 182,131,161,181; six units from AH 115A, 115B, 115C. The traditional lost wax techniques of casting non-ferrous metal. Wax formation and manipulation, gating theory and practice. Investment procedures, foundry management, metal casting, patination and tool making. (6 hrs. lab.)

**\*362B. Sculpture: Molding and Reproduction (3)**

Prerequisites: ART 130 or 182,131,161,181; six units from AH 115A, 115B, 115C. Construction and use of flexible and plaster molds. (6 hrs. lab.)

**\*363. Sculpture: Fabrication and Carving (3)**

Prerequisites: ART 130 OR 182, 131, 161, 181, 263; six units from AH 115A, 115B, 115C, or consent of instructor. Exploration of fabrication using a number of materials, such as metal, wood, fabric, and objects, along with carving techniques in both traditional and non-traditional materials. Emphasis will be on techniques, personal content, and form. (6 hrs. lab.)

**\*370. Printmaking (3)**

Prerequisites: ART 130 or 182, 131,181,187; six units from AH 115A, 115B, 115C. A studio course exploring a range of printmaking techniques and imagery, selected from the areas of etching, lithography, silkscreen, relief and monoprinting. (6 hrs. lab.)

**\*371A-B. Illustration (3-3)**

Prerequisites: For ART 371A: ART 130 or 182, 131,181,184,187; six units from AH 115A, 115B, 115C. For ART 371B: ART 223, 271, 371A. Editorial and advertising drawing; professional media, skills and techniques survey. (6 hrs. lab.)

**\*372. Anatomy for Artists (3)**

Prerequisites: ART 130 or 182, 131,181, 184; six units from AH 115A, 115B, 115C. Skeletal and muscle structure emphasizing the development of skill in depicting the human figure. Course fee required. (6 hrs. lab.)

**\*373. Costumed Figure Drawing (3)**

Prerequisites: ART 371A, 372; six units from AH 115A, 115B, 115C. Drawing and painting from costumed models with props and controlled lighting. Emphasis is on the development of a sense of "staging." The manipulation of composition, light, shadow, value, color, proportion, and scale are explored to achieve mood, gesture, drama, and attitudes related to human reactions, situations and character. (6 hrs. lab.) Course fee required.

**\*374A-B. Biomedical Rendering (3-3)**

Prerequisite: ART 130 or 182,184,187; six units from AH 115A, 115B, 115C; or consent of instructor. Introduction to and practice in techniques of descriptive drawing and press reproduction of drawing. Emphasis on skill. (6 hrs. lab.)

**\*376. Printmaking: Relief Printing (3)**

Prerequisites: ART 130 or 182,181,184,187; six units from AH 115A, 115B, 115C. Instruction in relief printing techniques and image development, including woodcut, wood engraving, linocut, collagraphs and alternative print surfaces. In black and white and color. (6 hrs. lab.)

**\*377. Printmaking: Silkscreen (3)**

Prerequisites: ART 130 or 182,181,184; six units from AH 115A, 115B, 115C. Instruction in fine art screen printing techniques and image development, including resist, paper, film, emulsion and alternative stencil methods. (6 hrs. lab.)

**\*378. Printmaking: Etching (3)**

Prerequisites: ART 130 or 182, 181, 184, 187; six units from AH 115A, 115B, 115C. Instruction in intaglio printing techniques and image development, including etching, engraving, dry-point, aquatint and alternative platemaking methods. In black and white and color. (6 hrs. lab.)

**\*379. Printmaking: Lithography (3)**

Prerequisites: ART 130 or 182,181,184, 187; six units from AH 115A, 115B, 115C. Instruction in stone lithography techniques and image development, including crayon drawing, flats, washes, transfers and alternative drawing methods. In black and white and color. (6 hrs. lab.)

---

## Art Courses (ART)

---

### 381. Intermediate Drawing (3)

Prerequisites: ART 130 or 182,181,184; six units from AH 115A, 115B, 115C. Problems and concepts in drawing using a variety of media. (6 hrs. lab.)

### \*382A-B. Production for Fine Art (3-3)

Prerequisites: ART 149, 371B, 372, or consent of instructor. A: Exploration of printing and reproduction process related to the needs of the artist, illustrator and museum professional, and an introduction to the skills and vocabulary necessary for the preparations of art for print and electronic media. Emphasis is on direct interaction with the various commercial production professionals. B: Implementation of processes learned in 382A, but within the context of sequential esthetics, (i.e., students produce limited edition books). (6 hrs. lab.)

### \*383. Life Painting (3)

Prerequisites: ART 130 or 182, 181,184, 187; six units from AH 115A, 115B, 115C. Painting from the human figure with emphasis on representing form in space, structure, color, value, and composition. Course fee required. (6 hrs. lab.)

### \*384. Intermediate Life Drawing (3)

Prerequisites: ART 130 or 182,181,184; six units from AH 115A, 115B, 115C. Continued study in drawing from the human figure from direct observation. Course fee required. (6 hrs. lab.)

### \*385. Watercolor Painting (3)

Prerequisites: ART 130 or 182,181, 184, 187; six units from AH 115A, 115B, 115C. Nature and use of the watercolor media. (6 hrs. lab.)

### \*386A. New Media Design (3)

Prerequisites: ART 326. Basic theory and use of multimedia software with emphasis on concept and aesthetics as it relates to interactive design. Hands-on approach to major motion graphic, web-based and interactive software applications with focus on layout, typography, color, movement, and animation. (6hrs. lab.) Not open to students who have credit for ART 386.

### 386B. Advanced New Media (3)

Prerequisite: 386A or consent of Instructor. Advanced application and design within new media environments. Emphasis on advanced knowledge of software with attention being paid to concept and aesthetics as it related to interactive design. A hands-on/research-based approach to the exploration of major motion graphic, web-based and interactive software applications with focus on layout, typography, color, timing, movement, animation, and interactivity.

### \*387. Painting (3)

Prerequisites: ART 130 or 182,181,184, 187; six units from AH 115A, 115B, 115C. Problems and concepts in space, form, structure, color and content in studio painting. (6 hrs. lab.)

### \*389. Materials and Techniques of Drawing and Painting (3)

Prerequisites: ART 130 or 182,181,184, 187; six units from AH 115A, 115B, 115C. Theory and practice in the craft of drawing and painting. Limited to 3 units in one semester and a total of 6 units. Course fee required. (6 hrs. lab.)

### 406A./506A. Digital Imagery for the Arts (3)

Prerequisites: ART 149, 340, or consent of instructor. This course is a thorough examination of digital imaging through Adobe Photoshop software. Emphasis is placed on the relationship of digital imaging to photography. A variety of exercises will sharpen skills and reveal new thinking strategies necessary for fluency in digital media. Concentration on the theory of media and representation as well as individual projects. (6 hrs lab.)

### 406B./506B. Advanced Digital Imagery for the Arts (3)

Prerequisites: ART 406A or 506A, 444. Exploration of theory and practice of digital imaging and advanced techniques. Emphasis on multimedia and individual projects. (6 hrs. lab.)

### \*407. Art Practicum (3)

Prerequisite: Completion of 12 units of Art Foundation. Development of attitudes and skills required for the production, evaluation, and appreciation of the visual arts. Consideration of the value of the

art process and product to the individual in an ethnically diverse society. Methods of inquiry used by artists, art critics, art historians and aestheticians will be examined in relationship to learning about art. The Art Education Bound Portfolio is begun in the course and a preliminary portfolio review is held for assessment of student competency in art. Course fee required. (6 hrs lab)

### 412. Aesthetic Theories and Art Education (3)

Prerequisites: Completion of 12 units of Art Foundation. Past and current philosophical writings of aestheticians, critics, artists, and art educators will be investigated with theoretical, practical, and cross-cultural implications for the arts educator.

### \*413. Photo Marketing/Portfolio (3)

Prerequisites: ART 141, 340, 444, 447. Professional practices and procedures for the development of an engaging photographic portfolio. Emphasis placed on photo-illustration, art direction, creative problem solving, and the development of a unique visual/conceptual style.

### 414./514. Documentary Photography (3)

Prerequisites: ART 340, 444, or consent of instructor. History, theory, practice, and production of still documentary photographic works with emphasis on the photograph as an instrument for social influence and change. (6 hrs. lab.)

### 415. On-Site Studies in Art Education (3)

Prerequisites: Completion of 12 units of Art Foundation. Theory is both generated and put into practice during study and participation at approved sites including The Art Workshop for Youth and Art to the Schools Program. Considerations are given to the various art and educational components found in state and national documents involving multifaceted, cross-cultural, and interdisciplinary experiences with art. (6 hrs lab)

### \*420. Visual Communication Design Workshop (3)

Prerequisite: Consent of instructor and portfolio review; majors only. On-campus design studio experience oriented toward development of printed portfolio-quality design work. Professional designer/art director environment with involvement in actual projects with clients, budgets and deadlines. Students are responsible for all project phases from design to production, print supervision and completion. Course may be repeated to a maximum of 9 units. (6 hrs. lab.)

### \*422A-B. Advanced Visual Communications Design (3-3)

Prerequisites: For ART 422A: ART 322B, 323, 325. For ART 422B: ART 422A. ART 422A involves advanced projects in computer-based design, typography, photographic modification and grid layout systems development. ART 422B emphasizes advanced advertising design, art direction and campaign development for the advertising agency environment. (6 hrs. lab.)

### \*428A-B. Fiber: Woven Structures (3-3)

Prerequisites: For ART 428A: ART 130 or 182, 131, 181, 187; six units from AH 115A, 115B, 115C. For ART 428B: ART 428A. Techniques and materials of woven structural textile design with emphasis on personal expression with the contemporary idiom. To include loom and off-loom processes. (6 hrs lab.)

### \*430. Fiber: Papermaking and Artist Books (3)

Prerequisite: ART 328A. Basic materials and techniques of papermaking and handmade artist books with an emphasis on concept and form development. May be repeated to a maximum of 6 units. (6 hrs. lab)

### \*432. Fiber: Advanced (3)

Prerequisites: ART 130, 131, 181, 187 and 6 units chosen from ART 327, 328, 317, and 428A or 430). This course is designed for the advanced Fiber students. Students will work on conceptual assignments using materials and media from a wide range of fiber processes of their choice. there will be some reading and group discussion assignments as well. May be repeated to a maximum of 6 units. (6 hrs. lab)

### \*435. Introduction to Museums (3)

Designed for students interested in pursuing the Museum Studies Certificate: also open to art majors and students from other disciplines. Study of current museums, their functions, services, audience and ethics. Field trips to local museums are included.

**\*442. Internship in Visual Communications (3)**

Prerequisite: Visual Communications major or consent of instructor. Student internship experience in selected studios, advertising agencies and in-house creative departments. Opportunity to work under supervision of professionals in the field for six hrs. per week. May be repeated for a maximum of 6 units, limited to 3 units in one semester. (6 hrs. lab.)

**\*444. Fine Print Photography (3)**

Prerequisites: ART 340. Presentation of advanced printing techniques and mastery of darkroom skills. Includes exposure/development, processing chemistry, film and paper types, toners and archival processing. (6 hrs. lab)

**\*447. Photography Studio Specialties (3)**

Prerequisites: ART 340, 444. A course designed to give exploration of camera and laboratory techniques as applied to studio work in photography. (6 hrs. lab)

**\*449. Experimental/Alternative Practices in Photography (3)**

Prerequisites: ART 340. Course work to generate experimental solutions to conceptual problems. Emphasis placed on Alternative Processes, non-traditional photographic processes, exploration of new ideas and procedures for the development of art work and meaning significant to each individual student. (6 hrs. lab)

**\*450A. Intermedia (3)**

Prerequisites/Corequisites: ART 360A or permission of instructor. Course will allow exploration of a number of media and strategies new to the sculpture vocabulary, such as performance, installation, video, electronic media, other time-based media and mass media, in conjunction with other sculptural techniques. Reading material will provide insight into art theory and strategies pertaining to contemporary art practices. (6 hrs. lab)

**\*450B. Intermedia (3)**

Prerequisites/Corequisites: ART 360A, 450A or permission of instructor. Course, which is a continuation of ART 450A, will allow the ongoing exploration of a number of media and strategies new to the sculpture vocabulary, such as performance, installation, video, electronic media, other time-based media and mass media, in conjunction with other sculptural techniques. Reading material will strengthen insight into art theory and strategies pertaining to contemporary art practices. (6 hrs. lab)

**\*451A-B. Advanced Ceramics (3-3)**

Prerequisite: A: ART 343A or 343B. Individual problems in ceramics. (6 hrs. lab.) B: Prerequisites: ART 451A. Individual problems in ceramics. (6 hrs. lab.)

**\*453. Seminar in Ceramic Arts (3)**

Prerequisite: Senior Ceramics major or consent of instructor. Critical analysis of work of historical and contemporary ceramic artists; the changing role of ceramic art as it becomes part of the contemporary art mainstream. May be repeated for credit with study of different artists each semester up to a maximum of 6 units.

**\*454A-B. Handcrafted Furniture (3-3)**

Prerequisites: ART 354A and B. Concepts and skills necessary for the production of handcrafted furniture. Emphasis on the use of hand techniques as a means of understanding the philosophy and aesthetics of handcrafted furniture. (6 hrs. lab.)

**\*458A,B. Advanced Metalsmithing/ Jewelry and Enameling (3)**

Prerequisites: ART 357B, 358B or consent of instructor. Individual problems in metalsmithing, jewelry, enameling and architectural metalwork and blacksmithing. Course fee required. (6 hrs. lab.)

**\*460A. Advanced Sculpture (3)**

Prerequisites: ART 130 or 182, 131, 149 or 349, 161; six units from AH 115A, 115B, 115C, or consent of instructor. Within a set of problem-solving assignments, students work with media and content of their choice, exploring some material new to themselves. Course will further utilize strategies such as installations, site work, and time-based art. Course will include some theory and discussions on art-related issues. (6 hrs. lab)

**\*460B. Advanced Sculpture (3)**

Prerequisites: ART 460A or consent of instructor. Within a set of problem-solving assignments, students work with media and content of their choice, exploring some material new to themselves.

Course will further utilize strategies such as installations, site work, and time-based art. Course will include some theory and discussions on art-related issues. (6 hrs. lab)

**\*461. Advanced Life Sculpture (3)**

Prerequisites: ART 361, 362A and B. Large-scale sculpture from the model emphasizing expressive content. Work in clay and plaster, armature and stand construction, oil-clay formulation and advanced moldmaking techniques. Course fee required. (6 hrs. lab.)

**\*471A-B. Advanced Illustration (3-3)**

Prerequisites: For ART 471A: ART 371B; For ART 471B: ART 471A. Illustration in part from live models. Open only to students in the Illustration option. Course fee required for 471B. (6 hrs. lab.)

**473./573. Seminar in Photo-Based Art (3)**

Prerequisite: Advanced standing in Photography or consent of instructor. Critical analysis of work by contemporary photo-based artists: the changing role of photo-based art as it becomes a central component of contemporary art. May be repeated for credit with study of different artists each semester up to a maximum of 6 units. (6 hrs. lab.)

**\*475. Printmaking: Photo Processes (3)**

Prerequisites: ART 130,141,181,184; six units from AH 115A, 115B, 115C. Instruction in the photo printmaking processes for lithography, etching and silkscreen using copy camera and experimental techniques to explore photographic and non-photographic imagery. (6 hrs. lab.)

**480./580. Printmaking: Monotype (3)**

Prerequisites: ART 130, 181,184, 187; six units from AH 115A, 115B, 115C. Instruction in all the aspects of the monotype and monoprint form of printmaking as an expansive medium capable of diverse applications and linkages with other procedures and disciplines. Emphasis will be on the extension and refinement of individual expression. In black and white and color. (6 hrs. lab.)

**\*481. Advanced Drawing (3)**

Prerequisite: ART 381. Advanced problems and concepts in drawing designed to explore modes of representation and issues pertaining to contemporary drawing. (6 hrs. lab.)

**\*483. Advanced Life Painting (3)**

Prerequisite: ART 383. Continued study in painting from the human figure with emphasis on pictorial structure, color and individual expression. Course fee required. (6 hrs. lab.)

**\*484. Advanced Life Drawing (3)**

Prerequisite: ART 384. Continued study in drawing the human figure from observation with emphasis on structure, form and composition, as well as individual expression. Course fee required. (6 hrs. lab.)

**\*487. Advanced Painting (3)**

Prerequisite: ART 387. Continued study in studio painting, exploring advanced modes of pictorial structure with emphasis on individual expression. (6 hrs. lab.)

**\*489. Special Topics in Visual Art (1-3)**

Prerequisite: Consent of instructor. Topics of current interest in the visual arts will be selected for intensive study. May be repeated with different topics to a maximum of 12 units. Topics will be announced in the *Schedule of Classes*.

**491A. Ceramics: Senior Project (1)**

Prerequisite: ART 451A or 451B or consent of instructor. Planning, preparation, completion, and photographic slide documentation of a creative exhibition and written thesis as approved by faculty. Should be taken in last semester before graduation. Required of all BFA ceramics majors. Credit/No Credit grading only. Course may be repeated for a maximum of 2 units.

**491B. 3-D Media Fiber/Metal/Wood and Integrated Media: Senior Project (1)**

Prerequisite: 3-D Media major or consent of instructor. Organizing, completing, and photographing (35mm slides) a creative exhibition of their work. The exhibition will culminate with a written thesis with faculty approval. This class should be taken in the last semester before graduation. Required of all 3-D Fiber, Wood, Metal and Integrated Media majors. May be repeated for a maximum of 2 units.

---

## Art Courses (ART)

---

### 491C. Photography – Senior Project (1) F,S

Planning, preparation, completion, and photographic slide documentation of a creative exhibition and written thesis as approved by faculty. This class should be taken in the last semester before graduation. Required of all Photography majors. Credit/No Credit grading only. Course may be repeated for a maximum of 2 units.

### 491F. Sculpture Senior Project (1)

Prerequisites: Senior Sculpture major; consent of instructor. Required by all Sculpture majors; class should be taken in the final semester of a student's BFA program. Students will complete their work, organize an exhibition and write an Artist's Statement. Credit/No Credit grading only.

### 491G. Drawing and Painting: Senior Project (1)

The exhibition of a cohesive body of work evidencing advanced study in Drawing and Painting. Planning, preparation, completion and photographic slide documentation of creative exhibition. Written project report and artist statement as approved by faculty. This class should be taken in the last semester before graduation. Required of all Drawing and Painting majors. Credit/No Credit grading only. Course may be repeated to a maximum of 2 units.

### 491P. Printmaking: Senior Project (1)

Planning, preparation, completion, and photographic slide documentation of a creative exhibition and a written expanded artist's statement as approved by faculty. This class should be taken in the last semester before graduation. Required of all Printmaking majors. Credit/No Credit grading only. Course may be repeated to a maximum of 2 units.

### \*492F. Concentrated Studies in Life Drawing (3)

Prerequisites/Corequisites: ART 384 or consent of instructor. Opportunity for extensive work with faculty supervision on individual problems in life drawing. Limited to 6 units in one semester and a total of 9 units. Course fee required. (6 hrs. lab.)

### \*492G. Concentrated Studies in Abstract Painting (3)

Prerequisites/Corequisites: ART 387 or consent of instructor. Opportunity for extensive work with faculty supervision on individual problems in abstract and nonobjective painting and drawing. Limited to 3 units in one semester. May be repeated for a maximum of 9 units. (6 hrs. lab.)

### 492Z./592Z. Concentrated Studies in Life Painting (3)

Prerequisites/Corequisites: ART 383 or consent of instructor. Opportunity for extensive work with faculty supervision on individual problems in painting the human figure. A more open relationship in attitudes and processes of working from the figure in class and total self-direction on work done outside the class. Limited to 3 units in one semester. May be repeated to a maximum of 9 units. (6 hrs. lab.)

### \*495. Field Studies in Art (1-6)

Independent work with an instructor of student's choice, usually outside area of specialization. Department Chair or Undergraduate Advisor/Graduate Advisor approval, restricted to undergraduate and graduate art majors. Course may be repeated to a maximum of 6 units. (2-12 hrs. lab.)

### \*499A. Special Studies in Ceramics (3)

Prerequisite: Ceramics major or consent of instructor. Opportunity for extensive work with faculty supervision on individual problems in ceramics. Limited to 6 units in one semester and a total of 9 units. (6 hrs. lab.)

### \*499B. Special Studies in Wood (3)

Prerequisite: ART 354B or consent of instructor. Opportunity for extensive work with faculty supervision on individual problems using wood as the media. Limited to 6 units in one semester and a total of 9 units. (6 hrs. lab.)

### \*499D. Special Studies in Drawing (3)

Prerequisite: ART 381; Drawing and Painting Major or consent of instructor. Opportunity for extensive work with faculty supervision on individual problems in drawing. Limited to 6 units in one semester and a total of 9 units. (6 hrs. lab.)

### \*499F. Special Studies in Illustration (3)

Prerequisite: Illustration major or consent of instructor. Opportunity for extensive work with faculty supervision on individual problems in illustration or biomedical art. Limited to 6 units in one semester and a total of 9 units. (6 hrs. lab.)

### \*499J. Special Studies in Metalsmithing and Jewelry (3)

Prerequisite: ART 458A or consent of instructor. Opportunity for extensive work with faculty supervision on individual problems in metalsmithing and jewelry. Course fee required. Limited to 6 units in one semester and a total of 9 units. (6 hrs. lab.)

### \*499K. Special Studies in Painting (3)

Prerequisite: ART 387; Drawing and Painting Major or consent of instructor. Opportunity for extensive work with faculty supervision on individual problems in painting. Limited to 6 units in one semester and a total of 9 units. (6 hrs. lab.)

### \*499M. Special Studies in Sculpture (3)

Prerequisite: Sculpture major or consent of instructor. Opportunity for extensive work with faculty supervision on individual problems in sculpture. Limited to 6 units in one semester and a total of 9 units. (6 hrs. lab.)

### \*499N. Special Studies in Fiber (3)

Prerequisite: 3-D Media major or consent of instructor. Opportunity for extensive work with faculty supervision on individual problems in textile design. Limited to 6 units in one semester and a total of 9 units. (6 hrs. lab.)

### \*499P. Special Studies in Art Education (3)

Prerequisite: Art Education major or consent of instructor. Opportunity for extensive work with faculty supervision on individual problems in art education. Limited to 6 units in one semester and a total of 9 units. (6 hrs. lab.)

### \*499Q. Special Studies in Museum Studies (3)

Prerequisites: ART 435, 445A or consent of instructor. Opportunity for extensive individual work with faculty supervision on problems in museum studies, including utilizing the resources of The Center for Southern California Studies in the Visual Arts. Limited to 6 units in one semester and a total of 9 units. (6 hrs. lab.)

### \*499R. Special Studies in Printmaking (3)

Prerequisite: Printmaking major or consent of instructor. Opportunity for extensive work with faculty supervision on individual problems in printmaking. Limited to 6 units in one semester and a total of 9 units. (6 hrs. lab.)

### \*499S. Special Studies in Visual Communications Design (3)

Prerequisite: Visual Communications major or consent of instructor. Opportunity for extensive contract work with faculty supervision on problems in visual communications design. Limited to 6 units in one semester and a total of 9 units. (6 hrs. lab.)

### \*499V. Special Studies in Art Photography (3)

Prerequisite: Photography major or consent of instructor. Opportunity for extensive work, with faculty supervision, on individual problems in photography as an art form. Limited to 6 units in one semester and a total of 9 units. (6 hrs. lab.)

## Graduate Division

### 506A./406A. Digital Imagery for the Arts (3)

Prerequisites: ART 149, 340, or consent of instructor. This course is a thorough examination of digital imaging through Adobe Photoshop software. Emphasis is placed on the relationship of digital imaging to photography. A variety of exercises will sharpen skills and reveal new thinking strategies necessary for fluency in digital media. Concentration on theory of media and representation as well as individual projects. (6 hrs. lab.)

### 506B./406B. Advanced Digital Imagery for the Arts (3)

Prerequisites: ART 406A, 444, or consent of instructor. Exploration of theory and practice of digital imaging and advanced techniques. Emphasis on multimedia and individual projects. (6 hrs. lab.)

### 509A-B. Research in Art Education (2-2)

Prerequisite: Art Education major or consent of instructor. Advanced individual graduate problems in art education with projects related to specific learning situations.

**512./412. Aesthetic Theories and Art Education (3)**

Past and current philosophical writings of aestheticians, critics, artists, and art educators will be investigated with theoretical, practical, and cross-cultural implications for the arts educator.

**513./413. Photo Marketing Portfolio (3)**

Prerequisite: ART 340. Professional practices and procedures for the development of an engaging photographic portfolio. Emphasis placed on photo-illustration, art direction, creative problem solving, and the development of a unique visual / conceptual style. (6 hrs. lab.)

**514./414. Documentary Photography (3)**

Prerequisites: ART 340, 444, or consent of instructor. History, theory, practice, and production of still documentary photographic works with emphasis on the photograph as an instrument for social influence and change. (6 hrs. lab.)

**542. Internship in Museum Studies (3)**

Prerequisites: ART 435 or consent of instructor. Student internship experience in selected museums, college and community art centers appropriate to the student's particular academic interest. Opportunity to work under supervision of museum professionals in the field to expand student understanding of the complexities, discipline and challenges in the profession. Limited to 6 units in one semester and a total of 9 units. (6 hrs. lab.)

**544./444. Fine Print Photography (3)**

Prerequisite: ART 340. Presentation of advanced printing techniques and mastery of darkroom skills. Includes exposure, development, processing chemistry, film and paper types, toners and archival processing (lab fee required). (6 hrs. lab.)

**545A-B. Museum-Gallery Practices (3-3)**

Prerequisites: ART 435 or consent of instructor. Pre-professional training in museum-gallery techniques: administration, exhibition, budget planning, curatorial problems, public relations, insurance, packing and shipping. The University Gallery will be the lab for practical experience; students will assist in conceiving and realizing exhibitions.

**547./447. Photo Studio Specialties (3)**

Prerequisite: ART 340. A course designed to give exploration of camera and laboratory techniques as applied to studio work in photography. Related photo assignments of studio and location problems will be given (laboratory included). (6 hrs. lab.)

**549./449. Experimental/Alternative Practices in Photography (3)**

Prerequisite: ART 340. Course work to generate experimental solutions to conceptual problems. Emphasis placed on Alternative Processes, non-traditional photographic processes, exploration of new ideas and procedures for the development of art work and meaning significant to each individual student. (6 hrs. lab.)

**550. Intermedia (3)**

Graduate course that will allow further exploration of a number of media and strategies new to the sculpture vocabulary, such as performance, installation, video, electronic media, other time-based media and mass media, in conjunction with other sculptural techniques. Reading material will strengthen insight into art theory and strategies pertaining to contemporary art practices. (6 hrs. lab.)

**551A. Advanced Ceramics – Graduate (3)**

Prerequisite: ART 451B. Opportunity for beginning graduate students to do research employing various ceramics materials, processes and visual solutions in preparation for a more narrow and concentrated study. (6 hrs. lab.)

**551B. Advanced Ceramics – Graduate (3)**

Prerequisite: ART 551A. Selection of a specific area of concentration in ceramics, limiting the materials and processes to develop a project which will reflect a predetermined statement. (6 hrs. lab.)

**554A-B. Handcrafted Furniture (3-3)**

Prerequisite: ART 454B or consent of instructor. Advanced concepts and skills necessary for the production of handcrafted furniture. Emphasis on the use of hand techniques as a means of

understanding the philosophy and aesthetics of handcrafted furniture. (6 hrs. lab.)

**558A. Metalsmithing, Jewelry and Enameling (3)**

Prerequisite: 3-D Media major or consent of instructor. Individual graduate level studio projects involving investigation of materials, processes and visual solutions in preparation for more concentrated study in metalsmithing, jewelry, enameling, or architectural metalwork and blacksmithing. Course fee required. May be repeated for a maximum of 6 units. (6 hrs. lab.)

**558B. Metalsmithing, Jewelry and Enameling (3)**

Prerequisite: 3-D Media major or consent of instructor. Selection of a specific area of concentration in metalsmithing and jewelry, enameling, or architectural metalwork and blacksmithing; focus on creative objectives based on a projected theme. Course fee required. Course may be repeated for a maximum of 6 units. (6 hrs. lab.)

**564A-B. Advanced Wood Studio (3-3)**

Prerequisite: ART 354B and consent of instructor. Advanced craft processes, techniques, and concepts used to make utilitarian objects. In conjunction with object making, research will be required in various aspects of the crafts field. (6 hrs. lab.)

**573./473. Seminar in Photo-Based Art (3)**

Prerequisite: Advanced standing in Photography or consent of instructor. Critical analysis or work by contemporary photo-based artists; the changing role of photo-based art as it becomes a central component of contemporary art. May be repeated for credit with study of different artists each semester up to a maximum of 6 units.

**575. Printmaking: Advanced Photo Processes (3)**

Prerequisite: Graduate Print student or consent of instructor. Graduate level work in one or more of the photo printmaking processes, with emphasis on photographic or non-photographic imagery. May be repeated for a maximum of 6 units in different topics. (6 hrs. lab.)

**580./480. Printmaking: Monotype/Monoprint (3)**

Prerequisites: ART 115B, 115C, 181, 187. Instruction in all the aspects of the monotype and monoprint form of printmaking as an expansive medium capable of diverse applications and linkages with other procedures and disciplines. Emphasis will be on the extension and refinement of individual expression. In black and white and color. (6 hrs. lab.)

**583. Advanced Life Graduate Painting (3)**

An intensive studio course in painting from the model for graduate students. (6 hrs. lab.)

**590. Special Problems in Studio Art (1-3)**

Prerequisites: Consent of instructor. Special topics of current interest in studio art will be selected for intensive study. May be repeated with different topics to a maximum of 12 units. Topics will be announced in the *Schedule of Classes* (2-9 hrs. lab.) Course fee required.

**A. Visiting Artists**

**592Z./492Z. Graduate Concentrated Studies in Life Painting (3)**

Opportunity for extensive work with faculty supervision on individual problems in painting the human figure. A more open relationship in attitudes and processes of working from the figure in class and total self-direction on work done outside class. Limited to 3 units in one semester. May be repeated to a maximum of 9 units. (6 hrs. lab.)

**599. Studio Problems in Art (3)**

Prerequisite: Consent of Art Department. Advanced individual graduate projects, with faculty supervision, in an area of art specialization. Limited to 6 units one semester and a total of 12 units in any one area. Areas will be designated by letter at the time of registration: (a) ceramics, (b) wood, (d) drawing, (f) illustration, (j) metal (Course fee required), (k) painting, (l) life drawing (Course fee required), (m) sculpture, (n) fiber, (q) museum studies, (r) printmaking, (t) intermedia, (v) photography. Intermedia units will apply to the drawing and painting specialization. (6 hrs. lab.)

---

## Art Courses (ART)

---

### 601A-B. Seminar in Art Education (3-3)

Prerequisite: Graduate student in Art Education or consent of instructor. Special studies, research and evaluation of the role of the art teacher. 601A is required for the M.A. in Art Education; 601B may be required by the student's M.A. committee.

### 651. Seminar in Ceramic Art (3)

Prerequisite: Graduate student in Ceramics or consent of instructor. Critical analysis of work of historical and contemporary ceramic artists; the changing role of ceramic art as it becomes part of the contemporary art mainstream. May be repeated for credit with study of different artists each semester up to a max. of 12 units.

### 690A. Graduate Seminar in Studio Art (Critical Studies) (3)

Prerequisite: Graduate M.F.A. student or consent of instructor. Selected reading and writing concerning topics relevant to student's specific disciplines in the visual arts with an opportunity for interdisciplinary discussion.

### 690B. Graduate Seminar in Studio Art (Professional Practices) (3)

Prerequisite: Graduate M.F.A. student or consent of instructor. Professional preparation for studio artists stressing practical concerns as well as current trends in art practices, theory and criticism.

### 692. Public Exhibition (2-3)

Prerequisites: Must be advanced to candidacy. Open only to M.A. and M.F.A. candidates with project statement approval, consent of their graduate committee, and who have been assigned an exhibition date the previous semester. Planning, preparation and administration of a public exhibition of 698 or 699 creative work. Two-unit designation for all M.A. candidates. Three-unit designation for all M.F.A. candidates. The course work will result in a public exhibition by each M.A. and M.F.A. candidate. (4-6 hrs. lab.)

### 694. Directed Studies Studio (1-3)

Independent studies in creative studio. Department Chair or Graduate Advisor approval, restricted to graduate art majors. Course may be repeated to a maximum of 3 units. (2-6 hrs. lab.)

### 695. Field Problems in Art (1-6)

Opportunity to study artistic monuments, objects, theories, techniques or literature at appropriate off campus locations. Department Chair or Graduate Advisor approval, restricted to graduate art majors. Course may be repeated to a maximum of 6 units. (2-12 hrs. lab.)

### 697. Directed Studies (1-3)

Independent studies in technical and/or historical aspects of art. Department Chair or Graduate Advisor approval, restricted to graduate art majors. Course may be repeated to a maximum of 3 units. (2-6 hrs. lab.)

### 698. Thesis or Project (1-6)

Prerequisite: Thesis or project-thesis statement approval by and consent of students graduate committee. Planning, preparation and completion of a thesis or a project and studio-thesis. Open only to students who have been advanced to M.A. candidacy. Studio majors are required to exhibit project work and write a studio-thesis. Required of all candidates for the M.A. in art.

### 699. Thesis or Project (1-6)

Prerequisite: Approval of students project-thesis statement and consent of students graduate committee. Planning, preparation and completion of a creative exhibition and a studio-thesis. Open only to students who have been advanced to M.F.A. candidacy or second M.A. candidacy in art. Required of all M.F.A. candidates and all candidates seeking a second M.A. in art. (9 hrs. lab.)

---

## Art History Courses (AH)

---

All courses are traditional grading only unless otherwise stated.

### Lower Division

#### 113A. Survey of Eastern Art (3)

Prerequisite or corequisite: A General Education Foundation class. Survey of art as an integral part of Eastern culture: India and South-east Asia. Not open to students who have credit in ART113A.

#### 113B. Survey of Eastern Art (3)

Prerequisite or corequisite: A General Education Foundation class. Survey of art as an integral part of Eastern culture: China, Japan and Korea. Not open to students who have credit in ART113 B.

#### 115A. Foundation Art History I (3)

Basic theoretical considerations about art and its relation to society in both Western and non-Western cultures. Not open to students who have credit in ART115A. Traditional grading only for Majors/Minors.

#### 115B. Foundation Art History II (3)

Prerequisite or corequisite: A General Education Foundation class. Chronological survey of art as an integral part of Western culture, from Prehistory through the Middle Ages. Not open to students who have credit in ART115B. Traditional Grading only for majors and minors. (CAN ART 2)

#### 115C. Foundation Art History III (3)

Prerequisite/corequisite: A General Education Foundation class. Chronological survey of art as an integral part of Western culture, from Proto-Renaissance to contemporary. Not open to students who have credit in ART115C. Traditional Grading only for majors and minors. (CAN ART 4).

### Upper Division

#### \*307. Historiography in Art (3)

Prerequisite: AH 115A, three units from AH 115B, 115C, or consent of instructor. Consideration of standard research techniques and resources as well as composition and documentation of written reports specifically related to the study of art. Not open to students who have credit in ART 307.

#### \*308. Art Theory (3)

Prerequisites: AH 115A, three units from AH 115B, 115C, or consent of instructor. Consideration of historic and contemporary theories and aesthetic frames of reference whereby what has been, or is, identified as art is so identified. Not open to students who have credit in ART 308.

#### \*309. Art Criticism (3)

Prerequisites: AH 115A, three units from AH 115B, 115C, or consent of instructor. An examination of a variety of critical approaches to modern art. Discussions will be based upon the writings of 19th and 20th century art theorists and professional art critics. Not open to students who have credit in ART 309.

#### 330I. Cross Cultural Visual Literacy (3)

Prerequisites: Completion of GE Foundation requirements, one or more Explorations courses, and upper-division standing. Cross-cultural Visual Literacy is an exploration of how and what traditional art communicates about the culture from which it issues. Based on the premise that Art is an aesthetic counterpart of a culture's ethos, a method of inquiry has been designed to integrate: a) exposure to the basic technical aspects of art-making, together with b) a discussion of core concepts in two different culture- clusters, the Euro-American, and Pan-Asian. The significance of the concept of cultural relativity applied to the study of art cross-culturally will be emphasized. Not open to students with credit in ART 330I.

#### 364. History of Ceramics (3)

Materials and techniques as they relate to the historical development of pottery styles and forms. Not open to students who have credit in ART 364.

#### \*365. History of Prints and Drawings (3)

Prerequisites: AH 115A, three units from AH 115B, 115C, or consent of instructor. Historical survey of prints and drawings, with em-

phasis on technical and stylistic developments and on the role played by these media in relation to other arts through the 20th century. Not open to students who have credit in ART 365.

**401./501. American Art (3)**

Prerequisites: AH 115A,115C, or consent of instructor. A survey of American art from 1760 to 1945. Emphasis will be given to painting from Colonial portraiture to 20th century Abstract Expressionism. Not open to students who have credit in ART 401 or 598A.

**408./508. Early Christian and Byzantine Art (3)**

Prerequisites: AH 115A,115B, or consent of instructor. Architecture, mosaics and sculpture of Rome, Ravenna and Constantinople from the decline of the Roman Empire to the end of the Byzantine era. Not open to students who have credit in ART 408 or 598B.

**409./509. Romanesque Art (3)**

Prerequisites: AH 115A,115B, or consent of instructor. Arts of Northern Europe from Merovingian through the Romanesque periods. Not open to students who have credit in ART 409 or 598C.

**410./510. Gothic Art (3)**

Prerequisites: AH 115A,115B, or consent of instructor. Stylistic analyses in the historical content of the architecture, sculpture and stained glass of the great cathedrals of Europe. Not open to students who have credit in ART 410 or 598D.

**411./511. History and Criticism of Photography (3)**

Prerequisites: AH 115A,115C, or consent of instructor. History of photography from its origins to contemporary developments in the twentieth century. Critical and philosophical approaches to the photographic medium. Not open to students who have credit in ART 411 or 511.

**416./516. Greek Art (3)**

Prerequisites: AH 115A,115B, or consent of instructor. This survey will trace Greek Art from its first beginnings in the Aegean period and survey its development on through the late Hellenistic period. The key monuments of architecture, sculpture, painting, vase-painting, and the so-called minor arts will be discussed against the background of contemporary theories, criticism, and history. Of particular concern are the techniques and materials of the various arts. Not open to students who have credit in ART 416 or 598E.

**417./517. Roman Art (3)**

Prerequisites: AH 115A, 115B, or consent of instructor. This survey will begin with an overview of the arts of Italy before the Romans including both the indigenous art of the Italic peoples as well as the better known art of the Etruscans. The survey of Roman Art itself will begin with the early Republic and end with the Age of Constantine. The major art forms of architecture, painting, sculpture and the so-called minor arts will be discussed. Contemporary criticism, theory, and history will be part of the sub-text of the course. Not open to students who have credit in ART 417 or 598L.

**423./523. Early Renaissance Art in Italy (3)**

Prerequisites: AH 115A, 115C, or consent of instructor. Painting, sculpture, and architecture in Italy from the 13th through the 15th centuries, especially in Florence and Siena. The course examines stylistic and technical aspects of the works, along with the interaction of cultural, social, and religious developments with the visual arts. Special attention paid to issues such as the importance of patrons, the rise of mendicant orders, and the revival of classicism. Not open to students who have credit in ART 412 or 598F.

**424./524. High Renaissance Art in Italy (3)**

Prerequisites: AH 115A, 115C, or consent of instructor. Painting, sculpture, and architecture in Italy from the 16th century especially in Florence, Venice, and Rome. Provides an historical, cultural, religious, and theoretical framework within which the meaning and function of the works can be better understood. Works by a handful of major artists (Leonardo da Vinci, Michelangelo, Raphael, Titian, and the Mannerists) will receive special attention. Not open to students who have credit in ART 424 or 598G.

**425./525. Northern Renaissance Painting (3)**

Prerequisites: AH 115A, 115C, or consent of instructor. Covers artistic developments in Northern Europe, particularly Flanders, France, and Germany, from the 14th century through 16th century. The course provides a historical, cultural, and religious framework

within which the style, meaning, and function of the works can be better understood. Special attention to issues such as iconography, and the changing role of the artist in society. Not open to students who have credit in ART 425 or 598H.

**426./526. Baroque Art in Spain, the Netherlands, and England (3)**

Prerequisites: AH 115A,115C, or consent of instructor. Examines the closely intertwined political and artistic situations in the Netherlands (Flanders and Holland), England and Spain during the 17th and early 18th centuries. Emphasis on the relationship between Rubens and Velasquez, and the contrast between Rubens and Rembrandt; also Flemish influence in England, due especially to Anthony van Dyck. Not open to students who have credit in ART 426 or 598J.

**427./527. Baroque Art in Italy, France, and Germany (3)**

Prerequisites: AH 115A, 115C, or consent of instructor. Explores the birth of the Baroque in Rome, and the role of the Counter-Reformation in shaping artistic genres in Italy and France in the early 17th century. Also covers the influence of the Versailles court of the "Sun King," Louis XIV, in the late 17th and early 18th centuries, especially in the independent Teutonic states. Not open to students who have credit in ART 427 or 598K.

**436./536. Neo-Classicism to Romanticism, 1789-1850 (3)**

Prerequisites: AH 115A, 115C, or consent of instructor. Examination of Neo-Classicism, Realism, Romanticism, photography and the academic tradition in art and culture of Europe from 1789-1850. Not open to students who have credit in ART 436 or 598M.

**437./537. Impressionism to Post-Impressionism, 1850-1900 (3)**

Prerequisites: AH 115A, 115C, or consent of instructor. Analysis of the development of Impressionism and Post-Impressionism in France from 1850 to 1900. Not open to students who have credit in ART 437 or 598N.

**438./538. Twentieth-Century Art to 1945 (3)**

Prerequisites: AH 115A, 115C, or consent of instructor. Examination of Abstraction, Non-Objective art, Expressionism, Dada, and Surrealism. Not open to students who have credit in ART 438 or 598P.

**439./539. Twentieth-Century Art from 1945 (3)**

Prerequisites: AH 115A, 115C, or consent of instructor. Examination of Pop Art, Happenings, Minimal Art, Art and Technology, Environmental, Concept, Performance and Video Art. Not open to students who have credit in ART 439 or 598Q.

**440. Art and Society (3)**

This course will consider the nature of art in Western culture from several disciplinary perspectives including art theory, social and political theory, history, philosophy and economics. It seeks to demonstrate that art is a construct based on human intellect and belief. Not open to students who have credit in ART 440.

**455./555. Traditional Art of Africa: A Thematic Approach (3)**

Prerequisites: AH 115A or consent of instructor. Exploration from a Western perspective of the conceptual, expressive, and aesthetic aspects of traditional African art as related to its cultural context and to Western concepts of art. Focus on West Africa. Not open to students who have credit in ART 455 or 598R.

**456./556. American Indian Art: Western Perspectives (3)**

Prerequisites: AH 115A, or consent of instructor. Exploration from a Western perspective of the historically various and changing frames of reference surrounding perception, interpretation, and consideration of Native American art through focus on selected traditions. Not open to students who have credit in ART 456 or 598S.

**457./557. Pre-Columbian Mexican Art (3)**

Prerequisites: AH 115A, or consent of instructor. A survey from the Olmec to the Aztec of the art and architecture of Mexico and adjacent areas prior to the Spanish conquest. Not open to students who have credit in ART 457 or 598T.

**465./565. Ancient Art of the Near East (3)**

Prerequisite: AH 115A, 115B, or consent of instructor. Prehistoric, Near Eastern, Egyptian and Aegean art. Not open to students who have credit in ART 465 or 598U.

---

## Art History Courses (AH)

---

- 466./566. Buddhist Art of India and S.E. Asia (3)**  
Prerequisite: AH 115A., or consent of instructor. The formation and development of Buddhist art in India and its subsequent metamorphoses in Cambodia, Thailand and Indonesia will be examined. Not open to students who have credit in ART 466 or 598V.
- 467./567. Hindu and Islamic Art of India (3)**  
Prerequisite: AH 115A. or consent of instructor. The formation and development of Hindu art in India and the genesis, as well as transformation, of Islamic art of India compared to pan-Islamic characteristics will be examined. Not open to students with credit in ART 467 or 598W.
- 468./568. Early Chinese Art (3)**  
Prerequisite: AH 115A. or consent of instructor. The formation and development of Chinese art from the third millennium to the 10<sup>th</sup> century A.D. Not open to students who have credit in ART 468 or 598X.
- 469./569. Later Chinese Art (3)**  
Prerequisite: AH 115A. or consent of instructor. Development of Chinese art from the 11<sup>th</sup> century A.D. through the culmination of the tradition and its transformation in the 20th century will be explored. Not open to students who have credit in ART 469 or 598Y.
- 470./570. Early Japanese Art (3)**  
Prerequisite: One of the following: AH113A, 113B, 115A, 115B, 115C, A/ST 393, 451, or consent of the instructor. Japanese art and architecture from 10,000 B.C. to 1868 examined in regard to foreign and domestic styles, Shinto, Buddhism, Confucianism, and social status. Not open to students who have credit in ART 470 or 598Z.
- 471./571. Later Japanese Art (3)**  
Prerequisite: One of the following: AH 113A, 113B, 115A, 115B, 115C, A/ST 393, 451, or consent of instructor. Major themes in Japanese art and culture from 1868 to 1945, stressing themes of cultural and national identity regarding adaptation, rejection or synthesis of western subjects and styles.
- 495. Independent Study in Art History (1-6)**  
This course is used for independent, in-depth research projects to be conducted by students under the supervision of a faculty member. As per university policy on independent studies courses, each student enrolled in this course must have an agreement, or "contract" on file in the department office. The agreement is to be made between the student and the instructor at the beginning of the course, and must include: a description of the work to be accomplished, specific information on the tasks required; the nature of the final report, and the basis for determining the final grade. The agreement must be signed by both the instructor and the student. Course may be repeated to a maximum of 6 units.
- 496. Special Studies in Art History (3)**  
Prerequisite: AH 307 or consent of instructor. Opportunity for extensive work with faculty supervision on individual problems in art history. May be repeated for a maximum of 6 units. Not open to students who have credit in ART 496.
- 497./597. Seminar in Art History (3)**  
Prerequisite: AH 307 or consent of instructor. Directed individual research and group discussion concerning a topic in art history. Limited to six units in one semester; may be repeated for a maximum of 9 units. Not open to students who have credit in ART 497 or 611 beyond combined maximum units.
- 498. Special Topics in Art History (3)**  
Prerequisite: AH 307 or consent of instructor. Description: This course is used for Variable Topic courses – courses that would be given on a on-time basis, either by lecturers who might be offering a course that is not part of the usual curriculum, or by permanent faculty who might wish to try out a new course before it appears in the catalog. Such a course must be approved by the head of the Art History program in conjunction with the Art Department chair. Variable courses from selected areas of Art History. Course content may vary each semester. Topics will be announced in the *Schedule of Classes*.

## Graduate Courses

All graduate-level courses must be taken as traditional grading only.

- 501./401. American Art (3)**  
Prerequisites: AH 115A, 115C, or consent of instructor. A survey of American art from 1760 to 1945. Emphasis will be given to painting from Colonial portraiture to 20th century Abstract Expressionism. Not open to students who have credit in ART 401 or 598A.
- 508./408. Early Christian and Byzantine Art (3)**  
Prerequisites: AH 115A, 115B, or consent of instructor. Architecture, mosaics and sculpture of Rome, Ravenna and Constantinople from the decline of the Roman Empire to the end of the Byzantine era. Not open to students who have credit in ART 408 or 598B.
- 509./409. Romanesque Art (3)**  
Prerequisites: AH 115A, 115B, or consent of instructor. Arts of Northern Europe from Merovingian through the Romanesque periods. Not open to students who have credit in ART 409 or 598C.
- 510./410. Gothic Art (3)**  
Prerequisites: AH 115A, 115B, or consent of instructor. Stylistic analyses in the historical content of the architecture, sculpture and stained glass of the great cathedrals of Europe. Not open to students who have credit in ART 410 or 598D.
- 511./411. History and Criticism of Photography (3)**  
Prerequisites: AH 115A, 115C, or consent of instructor. History of photography from its origins to contemporary developments in the twentieth century. Critical and philosophical approaches to the photographic medium. Not open to students who have credit in ART 411 or 511.
- 516./416. Greek Art (3)**  
Prerequisites: AH 115A, 115B, or consent of instructor. This survey will trace Greek Art from its first beginnings in the Aegean period and survey its development on through the late Hellenistic period. The key monuments of architecture, sculpture, painting, vase-painting, and the so-called minor arts will be discussed against the background of contemporary theories, criticism, and history. Of particular concern are the techniques and materials of the various arts. Not open to students who have credit in ART 416 or 598E.
- 517./417. Roman Art (3)**  
Prerequisites: AH 115A, 115B, or consent of instructor. This survey will begin with an overview of the arts of Italy before the Romans including both the indigenous art of the Italic peoples as well as the better known art of the Etruscans. The survey of Roman Art itself will begin with the early Republic and end with the Age of Constantine. The major art forms of architecture, painting, sculpture and the so-called minor arts will be discussed. Contemporary criticism, theory, and history will be part of the sub-text of the course. Not open to students who have credit in ART 417 or 598L.
- 523./423. Early Renaissance Art in Italy (3)**  
Prerequisites: AH 115A, 115C, or consent of instructor. Painting, sculpture, and architecture in Italy from the 13th through the 15th centuries, especially in Florence and Siena. The course examines stylistic and technical aspects of the works, along with the interaction of cultural, social, and religious developments with the visual arts. Special attention paid to issues such as the importance of patrons, the rise of mendicant orders, and the revival of classicism. Not open to students who have credit in ART 412 or 598F.
- 524./424. High Renaissance Art in Italy (3)**  
Prerequisites: AH 115A, 115C, or consent of instructor. Painting, sculpture, and architecture in Italy from the 16th century especially in Florence, Venice, and Rome. Provides an historical, cultural, religious, and theoretical framework within which the meaning and function of the works can be better understood. Works by a handful of major artists (Leonardo da Vinci, Michelangelo, Raphael, Titian, and the Mannerists) will receive special attention. Not open to students who have credit in ART 424 or 598G.

**525./425. Northern Renaissance Painting (3)**

Prerequisites: AH 115A, 115C, or consent of instructor. Covers artistic developments in Northern Europe, particularly Flanders, France, and Germany, from the 14th century through 16th century. The course provides an historical, cultural, and religious framework within which the style, meaning, and function of the works can be better understood. Special attention to issues such as iconography, and the changing role of the artist in society. Not open to students who have credit in ART 425 or 598H.

**526./426. Baroque Art in Spain, the Netherlands, and England (3)**

Prerequisites: AH 115A, 115C, or consent of instructor. Examines the closely intertwined political and artistic situations in the Netherlands (Flanders and Holland), England and Spain during the 17th and early 18th centuries. Emphasis on the relationship between Rubens and Velasquez, and the contrast between Rubens and Rembrandt; also Flemish influence in England, due especially to Anthony van Dyck. Not open to students who have credit in ART 426 or 598J.

**527./427. Baroque Art in Italy, France, and Germany (3)**

Prerequisites: AH 115A, 115C, or consent of instructor. Explores the birth of the Baroque in Rome, and the role of the Counter-Reformation in shaping artistic genres in Italy and France in the early 17th century. Also covers the influence of the Versailles court of the "Sun King," Louis XIV, in the late 17th and early 18th centuries, especially in the independent Teutonic states. Not open to students who have credit in ART 427 or 598K.

**536./436. Neo-Classicism to Romanticism, 1789-1850 (3)**

Prerequisites: AH 115A, 115C, or consent of instructor. Examination of Neo-Classicism, Realism, Romanticism, photography and the academic tradition in art and culture of Europe from 1789-1850. Not open to students who have credit in ART 436 or 598M.

**537./437. Impressionism to Post-Impressionism, 1850-1900 (3)**

Prerequisites: AH 115A, 115C, or consent of instructor. Analysis of the development of Impressionism and Post-Impressionism in France from 1850 to 1900. Not open to students who have credit in ART 437 or 598N.

**538./438. Twentieth Century Art to 1945 (3)**

Prerequisites: AH 115A, 115C or consent of instructor. Examination of Abstraction, Non-Objective art, Expressionism, Dada, and Surrealism. Not open to students who have credit in ART 438 or 598P.

**539./439. Twentieth Century Art from 1945 (3)**

Prerequisites: AH 115A, 115C, or consent of instructor. Examination of Pop Art, Happenings, Minimal Art, Art and Technology, Environmental, Concept, Performance and Video Art. Not open to students who have credit in ART 439 or 598Q.

**555./455. Traditional Art of Africa: A Thematic Approach (3)**

Prerequisites: AH 115A, or consent of instructor. Exploration from a Western perspective of the conceptual, expressive, and aesthetic aspects of traditional African art as related to its cultural context and to Western concepts of art. Focus on West Africa. Not open to students who have credit in ART 455 or 598R.

**556./456. American Indian Art: Western Perspectives (3)**

Prerequisites: AH 115A, or consent of instructor. Exploration from a Western perspective of the historically various and changing frames of reference surrounding perception, interpretation, and consideration of Native American art through focus on selected traditions. Not open to students who have credit in ART 456 or 598S.

**557./457. Pre-Columbian Mexican Art (3)**

Prerequisites: AH 115A, or consent of instructor. A survey from the Olmec to the Aztec of the art and architecture of Mexico and adjacent areas prior to the Spanish conquest. Not open to students who have credit in ART 457 or 598T.

**565./465. Ancient Art of the Near East (3)**

Prerequisite: AH 115A, 115B, or consent of instructor. Prehistoric, Near Eastern, Egyptian and Aegean art. Not open to students who have credit in ART 465 or 598U.

**566./466. Buddhist Art of India and S.E. Asia (3)**

Prerequisite: AH 115A., or consent of instructor. The formation and development of Buddhist art in India and its subsequent metamorphoses in Cambodia, Thailand and Indonesia will be examined. Not open to students who have credit in ART 466 or 598V.

**567./467. Hindu and Islamic Art of India (3)**

Prerequisite: AH 115A. or consent of instructor. The formation and development of Hindu art in India and the genesis, as well as transformation, of Islamic art of India compared to pan-Islamic characteristics will be examined. Not open to students with credit in ART 467 or 598W.

**568./468. Early Chinese Art (3)**

Prerequisite: AH 115A. or consent of instructor. The formation and development of Chinese art from the third millennium to the 10<sup>th</sup> century A.D. Not open to students who have credit in ART 468 or 598X.

**569./469. Later Chinese Art (3)**

Prerequisite: AH 115A. or consent of instructor. Development of Chinese art from the 11<sup>th</sup> century A.D. through the culmination of the tradition and its transformation in the 20th century will be explored. Not open to students who have credit in ART 469 or 598Y.

**570./470. Early Japanese Art (3)**

Prerequisite: One of the following: AH 113A, 113B, 115A, 115B, 115C, A/ST 393, 451, or consent of the instructor. Japanese art and architecture from 10,000 B.C. to 1868 examined in regard to foreign and domestic styles, Shinto, Buddhism, Confucianism, and social status. Not open to students who have credit in ART 470 or 598Z.

**571./471. Later Japanese Art (3)**

Prerequisite: One of the following: AH 113A, 113B, 115A, 115B, 115C, A/ST 393, 451, or consent of instructor. Major themes in Japanese art and culture from 1868 to 1945, stressing themes of cultural and national identity regarding adaptation, rejection or synthesis of western subjects and styles.

**595. Independent Study In Art History (1-3)**

This course is used for independent, in-depth research projects to be conducted by students under the supervision of a faculty member. As per university policy on independent studies courses, each student enrolled in this course must have an agreement, or "contract" on file in the department office. The agreement is to be made between the student and the instructor at the beginning of the course, and must include: a description of the work to be accomplished, specific information on the tasks required; the nature of the final report, and the basis for determining the final grade. The agreement must be signed by both the instructor and the student. Course may be repeated to a maximum of 3 units.

**596. Special Studies in Art History (1-3)**

Graduate level variable directed study projects providing a way for students to independently pursue special research topics in art history under instructor supervision. Course may be repeated to a maximum of 3 units.

**597./497. Seminar in Art History (3)**

Prerequisite: AH 307 or consent of instructor. Directed individual research and group discussion concerning a topic in art history. Limited to six units in one semester; may be repeated for a maximum of 9 units. Not open to students who have credit in ART 497 or 611 beyond combined maximum units

**598. Special Topics in Art History (3)**

Prerequisite: AH 307 or consent of instructor. Description: This course is used for Variable Topic courses – courses that would be given on a on-time basis, either by lecturers who might be offering a course that is not part of the usual curriculum, or by permanent faculty who might wish to try out a new course before it appears in the catalog. Such a course must be approved by the head of the Art History program in conjunction with the Art Department chair. Variable courses from selected areas of Art History. Course content may vary each semester. Topics will be announced in the *Schedule of Classes*.

View the CSU, Long Beach *Catalog* on-line at [www.csulb.edu](http://www.csulb.edu) by clicking on "Academics" and then "CSULB Catalog."

The College of the Arts at California State University, Long Beach is one of the largest and most respected state supported arts schools in the country. With nearly 3,000 students studying in six departments, the College of the Arts (COTA) offers nationally recognized, fully accredited degree programs in Art, Dance, Design, Film and Electronic Arts, Music, and Theatre Arts. The COTA is located in close proximity to the Los Angeles/Hollywood area and has many ties to the arts and entertainment industries. The curriculum focuses on professional development in the applied or performance fields of study; the goal of most students is professional employment as artists, designers, or performers in their chosen disciplines.

The learning opportunities within the College of the Arts reflect its commitment to the arts in all forms. For performers, artists, and scholars, the COTA provides an environment designed for individual achievement. It offers programs to meet the needs of students who wish to:

- Pursue professional careers in art, dance, design, music, electronic media, film, or theatre arts
- Teach one or more of the arts
- Explore the creative uses of technology in the arts
- Follow a degree program that provides a broad education with a focus in the arts
- Learn about the history and nature of the arts in Western and non-Western cultures.
- Develop appreciation of art forms and their lasting value to the quality of life

The College of the Arts offers a comprehensive variety of professional degree programs, meeting the highest standards of excellence, including the Bachelor of Fine Arts Degree in Art, Dance, and Design; the Bachelor of Science Degree in Industrial Design; the Bachelor of Music Degree; the Master of Fine Arts Degree in Art, Dance, Design, and Theatre Arts; and the Master of Music Degree.

Students wishing to earn a degree or certification in arts education may choose from the Bachelor of Arts Degree in Art Education or the Bachelor of Music Degree in Instrumental or Choral/Vocal Music. Single Subject certification for the state of California is offered jointly between the COTA and the College of Education. Finally, the College offers Masters of Arts Degrees in Art Education, Dance Education, and Music Education.

For those students who wish to obtain a liberal education with the arts as a focus, the departments of Art, Dance, Music, Film and Electronic Arts, and Theatre Arts offer appropriate Bachelor of Arts degree options. The Departments of Art, Design, Music, and Theatre Arts also offer the Master of Arts Degree. Other special programs include certificates in Biomedical Illustration and Museum Studies.

Each department in the College is an accredited institutional member of the major accrediting agency for that discipline: The National Association of Schools of Art and Design, The

National Association of Schools of Dance, The National Association of Schools of Music and the National Association of Schools of Theatre. The faculty of the College of the Arts are themselves accomplished artists, performers, and scholars who bring their expertise and professional experience in the competitive Southern California arts market to their teaching assignments.

The COTA is also home to the University Art Museum (a nationally accredited art museum which presents exhibitions of professional stature focusing primarily on contemporary artists) as well as the California Repertoire Theatre and the California Institute for the Preservation of Jazz. California Repertory Company, the theatre Arts Department's graduate and professional theatre program, is the only company of its kind in the CSU system.

Major performance and exhibition facilities include the University Art Museum, the Art Department Galleries, the University Theatre, The Studio Theatre, the Edison Theatre, the Gerald R. Daniel Recital Hall, the Martha Knoebel Dance Theatre, and the Richard and Karen Carpenter Performing Arts Center. The extensive performance calendar generated from the wide-ranging curricula includes over 300 student and faculty concerts, film showcases, theatre productions, dance performances, art, and design exhibitions. The COTA is a highly visible part of the campus community, as well as an important cultural and economic resource in the Long Beach/Los Angeles and Orange County areas.

### University Art Museum

The University Art Museum, which recently celebrated its 25<sup>th</sup> anniversary, is ranked among the top 10% of the nation's 7,000-plus museums. The only accredited museum in the CSU system, it has achieved worldwide acclaim for its exhibitions, publications, and collections of contemporary artworks. In 1999, the museum was the recipient of the Hampton Collection, a \$3.2 million gift featuring 85 stunning mid-century abstractions by 42 artists.

### The Richard and Karen Carpenter Performing Arts Center

The Carpenter Performing Arts Center opened in 1994. Designed by local architect Donald Gibbs, the elegant performance hall has enriched the surrounding community with hundreds of music, dance, film, and theatre events. The Carpenter Center, which seats 1,065 patrons, can accommodate large or small performing ensembles, film screenings, concerts, conferences and other special events.

### The California Institute for the Preservation of Jazz

The Jazz Institute is a state agency housed in the College of the Arts. The institute's mission is to provide jazz education, outreach, performance and preservation services for the western region of the United States. The Jazz Institute, housed in the University Library, has acquired more than 50,000 records, 7,500 compact discs, 5,000 tapes and thousands of books, periodicals, photos and memorabilia, as well as a collection of broadcast transcriptions and hundreds of hours of filmed and video taped performances.

## Courses (COTA)

### Upper Division

#### 450. Arts of the 20th Century (3)

Course involves all six departments of the College of the Arts and is designed to familiarize COTA students with art forms outside their major. Students will examine the role and function of the arts in society in terms of both philosophy and ideology. Traditional grading only.

#### 488. Summer Arts (1-6)

Special topics of current interest in the visual and performing arts will be selected for intensive summer study. Audition or portfolio review and/or special course fees may be required. Topics listed in the summer *Schedule of Classes*. Traditional grading only. Course may be repeated to a maximum of 9 units with different topics.

### Graduate Division

#### 688. Summer Arts (1-6)

Special topics of current interest in the visual and performing arts will be selected for intensive summer study. Audition or portfolio review and/or special course fees may be required. Topics listed in the summer *Schedule of Classes*. Traditional grading only. Course may be repeated to a maximum of 9 units with different topics.

Students desiring information should contact the department office for referral to one of the faculty advisors. The Department of Asian and Asian American Studies (AAAS), through its multiple offerings and those in related departments, fosters multi-ethnic and cross-cultural understanding within a global, multi-disciplinary perspective; facilitates a greater understanding of Asians in America to enhance multi-cultural education and appreciation of ethnic diversity in California and the United States; and pursues an active language education program to promote cross-cultural awareness and intercultural understanding.

In the broad context, the department's major responsibilities revolve around international/area studies, ethnic studies and language studies. Asian Studies enables students to explore Asian civilizations from an interdisciplinary perspective; Asian American Studies investigate the nature of Asian immigration and Asian American experiences in the United States; Chinese Studies provides students with cultural, literary, and linguistic preparations; and Japanese language studies provide linguistic and cultural training in Japanese language and language related areas. Asian language courses are also appropriate electives to support several of the majors offered by the University.

Students in all programs are encouraged to integrate the study of Asian cultures and societies across the Pacific with that of Asian American communities in the United States and to support the study of culture and society with appropriate language training.

The department curricula provide students with knowledge and training necessary for (1) various occupations and careers including teaching, school administration, social work, public service, urban planning, communications and the media, foreign business and trade, (2) professional work in the Asian American community, (3) exploring an educational dimension by emphasizing and focusing on ethnic minorities.

Through courses of its own and those of cooperating departments, the Department of Asian and Asian American Studies offers the B.A. and M.A. in Asian Studies; the B.A. in Chinese Studies; a Single Subject Teaching Credential in Japanese, the B.A. in Japanese, a Minor in Asian American Studies, a Certificate in Asian Studies, a Certificate in Asian American Studies, and a Certificate in Japanese. The department also offers a Concentration in Japanese and a Concentration in Asian American Studies under Track II of the Bachelor of Arts in Liberal Studies. (See University Programs in this *Catalog*.) Additional information and advice relative to the programs are available through the department office, FO3-340.

## Bachelor of Arts in Asian Studies (code 2-8508) (120 units)

Students choosing an Asian Studies major select one of two tracks for the degree. The student may choose an area of study, concentrating on one or more specific Asian societies, such as China, Japan, India, or Southeast Asia. Or, the student may choose to focus on Asian American Studies and combine the study of Asian Americans as ethnic minorities with supporting investigation of the countries of their historical origin.

## Requirements

Required of all students:

1. ASAM 200 or 220;
2. A/ST 300I, 301I and 492;
3. Three semesters (or the equivalent) of a single Asian language, chosen from courses in Chinese, Japanese, or an Asian language approved by the undergraduate advisor.

Upper Division: A minimum of 21 units; students should select one of the following two emphases:

### I. Area Studies Track

21 units of upper division work, including A/ST 492 (Proseminar in Asian Studies), and additional courses selected from the list of approved electives with the following provisions: (1) no more than nine units shall be counted in a single discipline such as art or history, (2) no more than 9 units shall be credited that concentrate upon any one area of Asia, chosen from among the following: China, India, Japan, or Southeast Asia. No more than 6 units of courses on the Americas can be applied toward this requirement (N.B. In the case of seminar, thematic, or variable topic courses, the assignment of a disciplinary and/or geographic category will be made by the undergraduate advisor in consultation with the appropriate faculty member).

### II. Asian American Studies Track:

21 units of upper division work, selected from the list of approved electives with the following provisions: (1) A/ST 492 (Proseminar in Asian Studies [3 units]); (2) 12 units of upper division Asian American Studies including ASAM 310 and 345; (3) the remaining upper division units focusing on one geographical area of Asia, chosen from among the following: China, India, Japan, or Southeast Asia.

## Minor in Asian American Studies (code 0-8430)

### Requirements

The Minor in Asian American Studies is available to all majors.

A minimum of 22 units which must include: (a) Asian American Studies 200 or 319, 220, 260 or 310, and 345, and (b) nine units selected from among the following: ASAM 330, 331, 332, 333, 334, 335I, 340, 346, 347, 352, 360, 370, 381, 490, 495, 499.

## Certificate in Asian Studies (code 1-8508)

A student may earn a Certificate in Asian Studies with a concentration on China, Japan, India, or Southeast Asia. Where applicable, courses used to meet the certificate requirements also may be used to satisfy the General Education requirement and the major and teaching minor requirements of the cooperating departments.

### Requirements

1. A bachelor's degree, with a major in a discipline other than Asian Studies. May be completed concurrently;
2. A minimum of two semesters or its equivalent of an approved Asian language which is to be selected in accordance with the area of concentration;

3. A/ST 300I, 301I and 12 units of upper division work divided among two or more disciplines. These are to be selected in accordance with the area of concentration and in consultation with the student's advisor. No more than 6 units in any one discipline shall apply towards the Certificate.

## Certificate in Asian American Studies (code 1-8010)

Students pursuing any approved degree or credential program of the University may at the same time earn a Certificate in Asian American Studies. Courses taken to meet the requirements may simultaneously be used, where applicable, to meet General Education requirements or the degree or credential requirements of cooperating departments. Certification of successful completion of requirements will be issued upon the recommendation of the department chair.

### Requirements

1. A bachelor's degree with a major other than Asian Studies. May be completed concurrently;
2. A minimum of 30 units distributed as follows:
  - a. ASAM 200 or 319, 220, 260 or 310, 345, 370 (required), plus;
  - b. additional courses selected from: ASAM 330, 331, 332, 333, 334, 335I, 340, 346, 347, 352, 360, 380, 381, 490, 495, 499.

(See approved list of courses below.)

Interested students should apply to the department office.

## Bachelor of Arts in Chinese Studies (code 2-8440) (120 units)

The Bachelor of Arts program in Chinese Studies at CSULB is designed to provide students with linguistic and cultural preparation, supported by international perspectives and understanding of humanities for personal, socio-political, and literary-intellectual development, as well as for economic self-sufficiency in the ever-intertwining world of a global economy. The degree program is a major intended to educate and produce graduates who will have communicative proficiency, critical thinking skills, socio-cultural understanding, and literary sensibility for intercultural communication. The degree program will also provide students with an opportunity and preparation to pursue a career involving the Pacific Rim nations, and to go on to graduate and professional programs in fields such as Art, International Affairs, Business Administration, History, Literature, Law, Journalism, Public Administration, or Education.

### Residence Requirement for the Majors

At least four upper division courses required for the major must be completed successfully at CSULB. Students are encouraged, however, to complete up to a year of their language study in approved programs of study abroad.

### Requirements

A minimum of 38 units is required, including at least 15 units earned in residence at CSULB. CHIN 101 and 102 are prerequisite to the major and may be satisfied by appropriate high school preparation or by examination. Required courses include a 3-unit lower division course, 20 units of core courses, and 15 units of electives from the following two groups: 1. Chinese and Chinese language-, literature-, or culture-related courses (9 units); and 2. China-related courses (9 units).

Lower Division Required Courses (11 units):

- A. 3 units required course: CHIN 250 or CHIN 260
- B. 8 units core courses: CHIN 201, 202

Upper Division Required Courses (31 units)

- A. 12 units core courses: CHIN 301, 370, 451, 492.
- B. 15 units electives selected from the following two groups:
  - 1. 9 units selected from CHIN 302, 321, 350, 360, 380, 390, 410, 430A, 430B, 430C, 490, 499; A/ST 490A, 490B.
  - 2. 6 Units selected from ANTH 332, AH 468, 469, ASAM 331, A/ST 300I, 301I, 320, 406A, 495I, ECON 365, 370, HIST 382A, 382B, 406A, 488, JOUR 312I, PHIL 306, POSC 362, 455, R/ST 341I, 343, W/ST 406A.

## Bachelor of Arts in Japanese (code 2-8507) (120 units)

The Bachelor of Arts program in Japanese at CSULB is designed to provide students with linguistic and cultural preparation supported by international perspectives and understanding of humanities for personal, social, intellectual and cognitive development as well as development of skills for economic self-sufficiency in the ever-intertwining world of global economy. The degree is intended to produce graduates who will have the communicative proficiency, critical thinking skills, and a sociocultural understanding for effective intercultural communication. The program will provide students with an opportunity and preparation to pursue a career involving the Pacific Rim nations, to go on to post-baccalaureate programs in the fields such as international affairs, business, law, journalism, public administration, or education, and/or to obtain a single subject teaching credential in Japanese.

The program is different from a traditional literature-oriented language program. It emphasizes pragmatic language studies aiming for acquisition of communication skills through communication based instruction, and providing knowledge of language and culture to develop appropriate understanding and attitudes for intercultural communication. The program will be supported by a variety of discipline-specific courses as well as interdisciplinary courses in Anthropology, Art, Asian Studies, Asian American Studies, Business, Comparative Literature, Economics, Education, Geography, History, International Studies, Linguistics, Philosophy, Political Sciences, Religious Studies, Speech Communication, and other programs offering Japan-related topics.

### Planning a Program of Study

The student and undergraduate advisor should plan a coherent program that both fulfills the requirements of the major and covers the student's areas of interest in allied fields outside the Japanese language.

Students are placed in Japanese courses according to a placement test administered by the department. In general, one year of high school Japanese taken in the United States is equated with one semester of CSULB work. Thus, students with one, two, three, and four years of high school work will most often enroll in JAPN 102, 201, 202, and 301 respectively.

Students with background in Japanese gained through primary or secondary school work taken in a country where Japanese is spoken must consult with faculty to determine proper

placement level. Those who have gained substantial knowledge of Japanese either through secondary school work or through college-level language courses may not repeat those courses for credit.

Students are encouraged to study in Japan, either through the CSU Study Abroad Program or independently, after completing at least two years of study (or its equivalent) of Japanese at CSULB.

### Residence Requirement for the Majors

At least five upper division courses required for the major must be completed successfully at CSULB. Students are encouraged, however, to complete up to a year of their language study in approved programs of study abroad.

### Requirements

A minimum of 44 units is required, including at least 15 units earned in residence at CSULB. JAPN 101 and 102 are prerequisite to the major and may be satisfied by appropriate high school preparation or by examination. Required courses include 23 units core courses and 21 units electives from the following three areas: 1. language and language-related courses (12 units), 2. Japanese civilization courses (6 units), and 3. Japan-related or intercultural communication courses (3 units).

Lower Division Required Courses:

8 units Core Courses: JAPN 201, 202

Upper Division Required Courses (36 units)

1. Core Courses (23 units): JAPN 201, 202, 301, 302, 311, 312, 451 (in Japanese);
2. Electives (21 units):
  - A. Language and Language Related Courses - 12 units selected from: JAPN 350, 370, 421, 422, 461, 462, 471, 481, 490, 492, 497;
  - B. Japanese Civilization (taught in English): 6 units selected from: ANTH 335, A/ST 393I, AH 470, HIST 383A, 383B, 384, 405, 406B, 407I, 409, POSC 363, R/ST 344;
  - C. Japan-Related or Intercultural Communication Courses - 3 units selected from: ANTH 307I, 412I, 413, 490\*, ASAM 330, 345, A/ST 300I, 301I, 310, 320, 490\*, 492, 495I, C/LT 403, COMM 309, 330, ECON 370, 372, EDSS 450F, GEOG 307I, H SC 420I, HIST 307I, 382B, 406A, 478, 495\*, I/ST 317I, 318I, 319I, I/ST 478, JOUR 312, PHIL 306, POSC 362, 363, 371, 378, 469\*, 485\*, 489, 497\*, PSY 439, R/ST 341I, SOC 350, W/ST 401I, 406A.

\*Special topics courses in departments which regularly offer topical courses pertinent to the program.

### Certificate in Japanese (code 1-8080)

The Certificate Program in Japanese offers students an opportunity to develop spoken and written competency in modern Japanese, and to acquire a broad introduction to various aspects of traditional and modern Japan.

The program is designed for students who intend to pursue a career in the private or public sectors, for which knowledge of Japan and the command of the language is useful or necessary, and also for students who intend to pursue a graduate program in which such knowledge and competency are required.

## Requirements

1. A bachelor's degree (may be earned concurrently with the certificate);
2. 15 units of upper division level Japanese language courses;
3. 12 units of Japan-related upper division work from at least two disciplines. These units must be selected with the approval by a member of the advisory committee.

## Approved Courses

For Major in Asian Studies, Minor in Asian American Studies, Certificate in Asian Studies and Certificate in Asian American Studies:

A/ST 190, 290, 299, 300I, 301I, 310, 320, 393I, 406AB, 441, 442, 443, 444, 490, 492, 495I, 499; ANTH 332, 333, 335, \*416, \*417, \*419, \*490; AH 113A-B, 330I, 466, 467, 468, 469, 470, 471, \*497, 498; ASAM 200, 220, 260, 290, 299, 310, 319, 330, 331, 332, 333, 334, 335I, 340, 345, 346, 347, 352, 360, 370, 380, 381, 490, 495, 499; C/LT 234, 235, 236, 403, 415I, 416, \*448, \*499; CHIN 101, 102, 201, 202, 250, 301, 302, 321, 350, 360, 370, 380, 390, 410, 430ABC, 451, 490, 499; ECON 365, 370, 472, \*490; ENGL 375; GEOG 120, 314I, \*326, \*494, \*497; HIST 381, 382A-B, 383A-B, 384, 385, 386, 401I, 405, 406AB, 407I, 409, 488, \*495, \*498; I/ST \*317I, \*318I, \*319I; JAPN 101, 102, 201, 202, 311, 312, 350, 370, 421, 422, 451, 461, 462, 471, 481, 490, 492, 497; PHIL 306, 307, \*499; POSC 362, 363, 364, 366, 455, 469\*, 485\*, \*489, \*497, \*499; R/ST 103, 331I, 341I, 343, 344, 351, 352, 353I, \*490, \*499; W/ST 318I, 319, 381, 401I, 406AB, \*490, \*499.

(\* ) on an approved Asia-related topic.

## Single Subject Credential in Japanese

The Japanese subject matter credential program at CSU Long Beach is designed to provide students with linguistic and cultural preparation and understanding of humanities for personal, social, intellectual and cognitive development as well as development of skills for economic self-sufficiency in the ever-intertwining world of global economy. It is intended to produce educators prepared in teaching Japanese with the communication proficiency, critical thinking skills, and sociocultural understanding essential for effective intercultural communication as well as pedagogical knowledge and training in teaching Japanese to diverse populations in our society.

The program requires a minimum of 30 semester units of upper division courses in Japanese as listed below under the four subject categories: Language, Linguistics, Culture, and Literature. Students should take 21 units of core courses and 9 units of electives. All upper division courses are conducted in the target language and require completion or equivalent of the four semesters of lower division Japanese language courses.

All upper division language courses are designed to develop competency in four skills and content. However, JAPN 311 and 312 emphasize spoken Japanese at advanced level, while JAPN 301 and 302 emphasize reading and writing at advanced level. The content courses represent three areas of study - Japanese culture, linguistics, and literature. The culture courses provide an overview of Japanese history from the prehistoric times to contemporary Japan, and an insight into Japanese culture and society. The linguistics

courses introduce the sound, meaning, syntactic and discourse structure of language, and offer a comparison of Japanese and English as well as other languages. The literature course introduces selected major literary works, which will provide sources to cultivate literary appreciation and to develop cultural understanding of Japan.

A grade of "C" or better is required in all courses accepted for the Japanese program. The exit requirement is "Advanced" level Japanese language proficiency.

## Core Requirements

24 upper division units selected from the following four areas:

1. Language: JAPN 301, 302, 311, 312;
2. Linguistics: JAPN 461;
3. Literature: JAPN 471 plus 421 or JAPN 370;
4. Culture: JAPN 451.

Electives: a total of 6 units selected from at least two different areas in consultation with a program advisor based on the student's background, interest, and teaching plans.

Language: JAPN 421, 422;

Linguistics: JAPN 462, 481;

Literature: JAPN 370;

Culture: JAPN 350; 492;

Variable Subjects: JAPN 490; 497.

## Master of Arts in Asian Studies (code 5-8508)

The master of arts degree in Asian Studies is an interdisciplinary degree offered by the Asian Studies faculty of its cooperating departments. It is especially aimed at those intending to go into teaching, foreign service, or foreign trade. Students applying for the M.A. Program in Asian Studies must apply for admission to the University and simultaneously provide official transcripts and two letters of recommendation to the graduate advisor of the department.

## Prerequisites

1. A Bachelor's degree with a major in Asian Studies; or
2. A Certificate in Asian Studies, awarded at CSULB, or its equivalent as evaluated by the graduate advisor of the department of Asian and Asian American Studies. Equivalency will, normally, be granted for work in Asia-related studies at CSULB and/or at other academic institutions, including a minimum of 18 units in no more than four disciplines with a minimum of six units in each of two disciplines of concentration plus two semesters of an approved Asian language. Only courses with a substantive Asia-related content are acceptable; or
3. A bachelor's degree in one of the fields in social science, humanities, or fine arts with 24 units of upper division Asia-related courses. These courses must be comparable to those required of a major in Asian Studies at this University. Deficiencies will be determined by the graduate advisor after consultation with the student and after study of transcript records. Students whose undergraduate prerequisites are inadequate will be required to fulfill these deficiencies before advancement to candidacy and will receive unclassified graduate status until all deficiencies are removed.

## Advancement to Candidacy

1. Satisfaction of the general University requirements for advancement to candidacy;
2. Completion of 6 or more of the required units (not including language) with a minimum 3.0 overall GPA;
3. Approval of proposed program of study;
4. Satisfactory completion of the Writing Proficiency Examination.

## Requirements

1. A minimum of 30 units of approved upper division and graduate courses including A/ST 592 and A/ST 610. At least 18 units must be in the 500-600 series composed of units earned at this University in graduate courses, graduate seminars, Directed Studies/Research or Thesis. All seminars and independent study courses may be repeated for a total of six (6) units, provided the topic is different. Directed Studies, Readings and Research, in any combination, may not exceed a total of six (6) units: A/ST 698 (thesis) must be taken for a minimum of four and a maximum of six units for those taking the thesis option.
2. A minimum of three upper division units in each of two disciplines of concentration must be taken preparatory to seminar work. Students should take at least six units of 500/600 level work in each of the two disciplines or concentrations;  
(N.B. Determination of the disciplinary status of any Asian Studies or any other courses taken at CSULB or other academic institutions shall be at the discretion of the Graduate Advisor in consultation with faculty, review of syllabi and reading lists, assessment of transcripts, etc.)
3. Comprehensive written examination in each of the two disciplines of concentration or a thesis. Students must have received permission of the Graduate Advisor, faculty advisor and prospective committee members before being allowed to file for the thesis option. Once selected, a student may not change his/her option.
4. Six units (beyond the B.A. level) in Chinese or Japanese or an Asian language approved by the Graduate Advisor. Waiver of this requirement, either by transfer of credits from another institution or by assessment of proficiency by resident faculty, is at the discretion of the graduate advisor of the department of Asian and Asian American Studies.

## Upper Division Courses Acceptable:

A/ST 320, 406AB, 490, 492, 499; ANTH 332, 333, 335, \*416, \*417, \*419, \*490; AH 466, 467, 468, 469, 470, 471, \*497, \*498; C/LT 403, \*448, \*499; CHIN 390, 430ABC, 451, 490, 492, 499; ECON \*472; GEOG 326, \*494, \*497; HIST 384, 385, 386, 405, 406A, 406B, 409, 488, \*495, \*498; JAPN 350, 451, 471, 490, 497; \*PHIL 499; POSC 362, 363, 364, 366, 455, 469\*, 485\*, \*489, \*497, \*499; R/ST \*490, \*499; \*W/ST 406, 406A, 490, \*499

\* course must be an approved Asia-related topic.

---

## Asian Studies (A/ST)

---

### Lower Division

#### 190. The Tao Primer of Basic Reasoning (3)

Prerequisites/Corequisite: ENGL 100 or its equivalent. A course about clear, critical and creative thinking, exploring both Western and Eastern paradigms about the nature, methods and principles of reasoning, as well as their common failings, limitations and applications in both formal and informal settings. Special emphasis will be placed on the ways in which Taoist principles complement and enhance traditional Western concepts.

#### 290. Special Topics in Asian Studies (1-3)

Prerequisite: Consent of instructor. Topics of special interest in Asian Studies selected for intensive study. Topics will be announced in the *Schedule of Classes*. Courses may be repeated for a maximum of six units with different topics.

#### 299. Directed Studies (1-3)

Prerequisite: Consent of instructor. Directed studies to permit individual students to pursue topics of special research interest. May be repeated for a maximum of six units. Traditional grading only.

### Upper Division

General Education Category A must be completed prior to taking any upper division course except upper division language courses where students meet formal prerequisites and/or competency equivalent for advanced study.

#### 300I. Traditional Asia (3)

Prerequisites: Completion of GE Foundation requirements, one or more Explorations courses, and upper-division standing. Introduction to traditional civilizations of China and India with some reference to Japan and Southeast Asia. Cultural aspects will be emphasized to illustrate the richness and diversity of Asia.

#### 301I. Modern Asia (3)

Prerequisites: Completion of GE Foundation requirements, one or more Explorations courses, and upper-division standing. Emphasis on the development of Asia since the 18th century and its role in the modern world, with some attention to the experience of Asians in the U.S. Continuity and change, reform and revolution in culture, politics and the economy will be included.

#### 310. United States and Asia (3)

Designed to answer the basic question: How is Asia important to the United States and vice versa? Focusing on the post-1945 period and addressing the question of dependence vs. interdependence, four main areas will be examined: (1) key religious, social and political patterns in Asia; (2) cross-cultural images of Asia and America; (3) Asian-U.S. global economic relations; (4) Asian-U.S. strategic and political relationships in both the regional and global context.

#### 320. Asia in Fiction and Film (3)

This course focuses on Asian-Western interactions and particularly on Asian-Western perspectives of this interaction as manifested in film and works of fiction. The focus will be on China, Japan and/or India; consideration will also be given to the Asian experience in America.

#### 393I. Japan's Heritage (3)

Prerequisites: Completion of GE Foundation requirements, one or more Explorations courses, and upper-division standing. Cultural heritage of Japanese civilization emphasizing history, philosophy, religion, literature and fine arts from prehistory to the present. Traditional grading only.

#### 406A. Asian Women: East and Northeast Asia (3)

Prerequisite: Upper division status. In this course, we will explore the diverse experiences of women in China, Japan, and Korea. By studying different kinds of sources, including memoirs, biographies, literature, film, as well as scholarly works by or about North and Northeast Asian women, we will examine how gender was historically constructed and discuss about women's various forms of resistance in this area. This course will proceed both chronologically

and thematically. Major issues to be addressed include the discrepancy between gender norms and reality, women's agency in social change, women and the state, and the complex relationship between feminism and nationalism. Asian American women's experiences will also be discussed at relevant places throughout the course. At the end of the course, students are encouraged to critically reflect on some theoretical issues that have been discussed in the scholarship on women's history in general and North and Northeast Asian women's history in particular. Same courses as HIST 406A and W/ST 406A.

**406B. Asian Women: South and Southeast Asia (3)**

An introductory course on the experiences of women in two of the most ethnically, culturally, and politically diverse regions of the world: South and Southeast Asia. This course explores the diversity of women's experience in these two regions during the colonial and post-colonial periods. Using different kinds of sources, including memoirs, biography, literature, and film, as well as monographs by or about South and Southeast Asian women, we will examine how gender is historically constructed in the two regions, and how women have exercised agency throughout history. This course will proceed both chronologically and thematically. Major issues to be discussed include women's agency in social change; gender as a contentious site of political discourse; the impact of colonization on women, and women's various forms of resistance. Same courses as HIST 406B and W/ST 406B. Traditional grading only.

**441. Khmer Literacy for Khmer Speakers: Introduction (3)**

Prerequisite: Fluent oral skills in Khmer. First of a 4 course sequence. Introduction to Khmer writing system. Practice in reading, decipherment, vowels, consonants and syllable combinations. Oral practice, honorifics, culturally appropriate interaction. Traditional grading only. Same course as LING 441.

**442. Khmer Literacy for Khmer Speakers: Intermediate A (3)**

Prerequisite: A/ST 441 or consent of instructor. Second of a 4 course sequence. Continued practice in Khmer writing system. Vocabulary development, reading and writing long sentences and simple text. Appropriate social and educational discourse. Traditional grading only. Same course as LING 442.

**443. Khmer Literacy for Khmer Speakers: Intermediate B (3)**

Prerequisite: A/ST 442 or consent of instructor. Third of a 4 course sequence. Contextual reading for comprehension, culture and grammatical knowledge. Development of oral skills, through discussion of content, role play and verbal critique. Traditional grading only. Same course as LING 443.

**444. Khmer Literacy for Khmer Speakers: Advanced (3)**

Prerequisite: A/ST 443 or consent of instructor. Fourth of a 4 course sequence. Composition and written translation. Preparation for BCLAD tests 5 & 6: Culture and Language of Emphasis. Reading authentic texts. Traditional grading only. Same course as LING 444.

**\*490. Special Topics in Asian Studies (1-3)**

Topics of special interest in Asian Studies selected for intensive study. Topics will be announced in the *Schedule of Classes*. May be repeated with different topics to a maximum of six units.

A. Modern Chinese Literature

B. China in Transition

C. Modern Vietnam

D. Filipino Language, Literature and Culture

**492./592. Proseminar in Asian Studies (3)**

Prerequisites: Consent of the instructor. Introduction to research methods; intensive study of selected conceptual and theoretical issues in Asian or Asian American Studies. Area and discipline of emphasis will vary from year to year. May be repeated for a maximum of six units.

**495I. China Heritage (3)**

Prerequisites: Completion of GE Foundation requirements, one or more Explorations courses, and upper-division standing. Cultural heritage explored through history, philosophy, religion and science, side by side with the fine arts; seen as the totality of a people's humanistic experience. (Lecture, discussion and film.)

**499. Directed Studies (1-3)**

Prerequisite: Consent of Instructor. Directed studies to permit individual students to pursue topics of special research interest. May be repeated for a maximum of six units. Traditional grading only.

**Graduate Division**

Graduate course descriptions are found in the departmental listings in which they are offered. Graduate courses applicable for the degree (only when the focus is on Asia) are: AH 566, 567, 568, 569, 570, 571, \*596, \*597; A/ST 543, 544, 551, 592, 610, 695, 697, 698; ANTH 516, 517, 519, 597, 697; ART 611; ASAM 595; C/LT 503, 522, 548, 550; ECON 572, 690; GEOG 650, 697; HIST 505, 509, 510(G), 682, 695, 697; JAPN 551, 581, 592, 695, 697; PHIL 697; POSC 590, 599, 600, 610, 670, 697; R/ST 646, \*690, \*697.

**543. Religions of China (3)**

Ancient Chinese religious thought; penetration of Indian Buddhism and Ch'an (Zen); popular religion and the religion of the scholar-official. Emphasis will be on original texts in translations. Not open to students with credit in R/ST 343.

**544. Religions of Japan (3)**

The transmission of continental civilization to Japan; Shinto, Buddhism and Tokugawa Neo-Confucianism; Genroku culture; and the New Religions. Emphasis on original texts in translations. Not open to students with credit in R/ST 344.

**551. Hinduism (3)**

Survey of ancient, classical and medieval Hinduism. Emphasis on analysis of Upanishads, Bhagavad Gita and the various paths of Yoga. Not open to students with credit in R/ST 351.

**592./492. Proseminar in Asian Studies (3)**

Prerequisites: Consent of the instructor. Introduction to research methods; intensive study of selected conceptual and theoretical problems in Asian or Asian American Studies. Area and discipline of emphasis will vary from year to year. May be repeated for a maximum of six units.

**610. Seminar in Asian Studies (3)**

Selected topics in Asian studies. Area and discipline of emphasis will vary from year to year. Open to graduate students of Asian studies. Graduate students in other disciplines may enroll with consent of instructor. May be repeated for a maximum of six units.

**695. Directed Readings (1-3)**

Prerequisites: Consent of Graduate Advisor. Readings in Asian Studies on an individual basis.

**697. Directed Research (1-3)**

Prerequisites: Consent of Graduate Advisor. Research in Asian Studies on an individual basis.

**698. Thesis (2-6)**

Prerequisite: Consent of the Graduate Advisor. Planning, preparation, and completion of a thesis in Asian studies.

---

**Asian American Studies (ASAM)**

---

**Lower Division**

**001. Language Skills (3)**

Focuses on intensive development of grammatical skills and expository writing. Primarily for Asian American students. Credit/no credit only. Counts as part of student course load but does not carry graduation credit.

**100. Language Skills (3)**

Prerequisite: A recorded total score of 151 or above on the English Placement Test, or credit in ASAM 001 (or its equivalent) and consent of the instructor. Focuses on organizational methods and techniques for writing compositional and expository prose, advanced grammar, and some critical reading techniques for term papers. Primarily for Asian American students.

**200. Asian American Inter-Ethnic Relations (3)**

Prerequisites: Completion of GE Foundation requirements. Intercultural and inter-ethnic behavior and orientation of Asian Americans; emphasis on the nature of their relations and their patterns of interaction with other diverse groups as well as the majority culture. Not open to students with credit in AIS 319, ASAM 319, B/ST 319, CHLS 319, C/LA 319, and W/ST 319. Traditional grading only.

**215. U.S. Diversity and the Ethnic Experience (3)**

Prerequisite: The course is open only to Integrated Teacher Education Program students. This course is a survey of four major ethnic groups (American Indians, African Americans, Latinos, and Asian Americans) in American society from the colonial era to the present. Special attention is given to the formation and transformation of each ethnic group and their individual and collective roles in the development of the United States. Same course as AIS 215, B/ST 215, CHLS 215. The departments take turns offering the course in the Fall semester. Traditional grading only.

**220. Asian American History (3)**

Prerequisite: Completion of GE Foundation requirements. Examines the history of Asian immigration to, and the Asian Pacific experience in, the United States from 1850 to the present.

**260. Introduction to Asian American Literature (3)**

Prerequisites: Completion of GE Foundation requirements. A general survey course that includes critical readings of representative works in English by Chinese, Hawaiian, Japanese, Korean, and Filipino American authors, and any other writers of Asian descent who have made the United States their home. Emphasis will be placed on how they interpret their Asian American experiences in the various literary genres represented. Traditional grading only.

**290. Special Topics in Asian American Studies (1-3)**

Prerequisite: Consent of instructor. Topics of current interest in Asian American Studies selected for intensive development. Topics will be announced in the Schedule of Classes. Course may be repeated for a maximum of six units with different topics.

**299. Directed Studies (1-3)**

Prerequisite: Consent of instructor. Directed studies to permit individual students to pursue topics of special research interest. May be repeated for a maximum of six units. Traditional grading only.

## Upper Division

General Education Category A must be completed prior to taking any upper division course except upper division language courses where students meet formal prerequisites and/or competency equivalent for advanced study.

**305. Theories and Methods in Asian American Studies (3)**

Prerequisites: Upper-division standing or consent of instructor, ASAM 220 and completion of General Education category "A" requirement. This interdisciplinary course explores the various approaches and theoretical underpinnings which have been employed to examine Asian American experiences. It is intended to survey some of the best of both traditional and cutting edge contributions to the field, examining the ways in which scholars connect texts to social and historical contexts, calling into question the arguments made, the sources of evidence, methodological practices, and the application of theories. Students will have the opportunity to conduct research on Asian American topics of their interest.

**310. Asian Americans and Education**

Examining problems and potentials of a multi-racial classroom for the understanding of, and relating to students of, diverse cultural backgrounds, with an emphasis on the Asian American. Small group interaction and counseling of individual students.

**319. The Ethnic Experience in the U.S. (3)**

An examination of the dynamics of the development of our multi-cultural society, emphasizing study of the four distinct ethnic strands of American society (Asian American, Black American, Mexican American, and American Indian) and their role in the maintenance of cultural diversity in the United States. Same course as AIS 319, B/ST 319, CHLS 319, W/ST 319. (Lecture/Discussion.)

**330. Japanese American Experience (3)**

A study of the culture, history, and literature of Japanese in America; emphasizing immigrant experience, agricultural contributions, World War II, generational issues, women in transition and family.

**331. Chinese American Experience (3)**

A study of the culture, history, and literature of Chinese in America, emphasizing immigrant experience, generational issues, women in transition and family.

**332. Korean American Experience (3)**

A study of the culture, history, and literature of Koreans in America, emphasizing immigrant experience, generational issues, women in transition and family.

**333. Vietnamese American Experience (3)**

A study of the culture, history, and literature of Vietnamese in America, emphasizing immigrant experience, generational issues, women in transition and family.

**334. Cambodian American Experience (3)**

A study of the culture, history, and literature of C in America, emphasizing immigrant experience, generational issues, women in transition and family.

**335I. Asian and Latino Immigration Since World War II (3)**

Prerequisites: Completion of GE Foundation requirements, one or more Explorations courses, and upper-division standing. Analyzes the causes of a dramatic post-World War II shift in immigration from Europe to Asia and Latin America, immigrants' settlement and adaptation patterns, and the Asian and Latino communities' social, racial, political and economic impact on American society. Same course as CHLS 335I. (Lecture and discussion, 3 hours)

**340. Asian American Family (3)**

Study of the Asian American family as a social institution; emphasis on the influence and consequences of the traditional Asian values and the impact of Western culture in the formation of a distinct family life style.

**345. Asian American Community Analysis (4)**

Socioeconomic, political and cultural profile of Asian American communities; role and function of community organizations. Training in community surveys and service. (Lecture, activity)

**346. Asian Americans and the Law (3)**

Examines how laws have been used to restrict Asian Americans' social, political, educational, and economic activities, as well as how this ethnic group has utilized the legal system to fight discrimination and seek justice.

**347. Asian Americans and Public Policy Issues (3)**

The Asian Americans are the fastest growing ethnic population in the United States. This seminar will examine a range of public policy issues impacting Asian Americans. These will include issues affecting all Americans, such as adequate health care, attention to the elderly, and the education of our youth. Other issues to be addressed will focus on the particular situation of Asian Americans and other minority groups, including access to employment opportunities, political, cultural and media representation, and the increase in racial bias and violations of civil rights. An examination of these issues, and the development of policy perspectives, will serve as the basis for this seminar. (Lecture 3 hours.)

**352. Filipino/a American Experience (3)**

Focusing on the social, economic, political, and cultural dimensions of Filipino/a experiences in the United States, this course examines major issues, including legacies of imperialism, transnational patterns of capital and labor, colonial and post-colonial identities, resistance to oppression, and literary expressions in Filipino/a American communities.

**360. Studies in Asian American Literature (3)**

Key literary texts will be discussed in light of their contributions to an understanding of the lived experience of Asian Americans, especially as such creative work interethnic, class, gender, and generational conflict. Contemporary research in cultural studies, literary theory, and Asian American studies will provide the theoretical foundation for the analysis of Asian American literature.

### 370. Gender and Sexuality in Asian America (3)

Employing interdisciplinary approaches toward the study of issues associated with gender and sexuality in Asian America, this course explores the diverse historical and contemporary experiences of Asian Americans with respect to gender roles and relationships, family, expressions of desire, as well as the relationships among gender, sexuality, and racial/ethnic identity.

### 380. Asian Philosophies and Religions in America (3)

Influence of and changes in Asian philosophies and religions in the American environment. Emphasis on Confucianism, Taoism, Hinduism, Buddhism and Shintoism in relation to individual and social values in America.

### 381. Asian American Women (3)

Will explore the largely unwritten history of Asian American women. Using an interdisciplinary perspective, will look at not only secondary sources but also autobiographical, literary, and journalistic writings: oral histories, diaries, anthropological studies, psychological/clinical reports, and film to reconstruct the lives of Asian American women. Will examine how having been burdened by the triple oppression of gender, race, and class, Asian American women have been actively pursuing equality and dignity. Same course as HIST 381 and W/ST 381. Lecture.

### 490. Special Topics in Asian American Studies (1-3)

Prerequisite: Consent of instructor. Topics of current interest in Asian American Studies selected for intensive development. May be repeated for a maximum of six units. Topics will be announced in the *Schedule of Classes*.

### 495/595. Seminar in Asian American Studies (3)

Selected topics in Asian American Studies. Area and topics of emphasis will vary from year to year. Traditional grading only. Course may be repeated to a maximum of 6 units.

### 499. Directed Studies (1-3)

Prerequisite: Consent of Instructor. Directed studies to permit individual students to pursue topics of special research interest. May be repeated to a maximum of six units.

## Graduate Division

### 595/495. Seminar in Asian American Studies (3)

Selected topics in Asian American Studies. Area and topics of emphasis will vary from year to year. Traditional grading only. Course may be repeated to a maximum of 6 units.

---

## Chinese Studies (CHIN)

---

### Lower Division

#### 101. Fundamentals of Chinese (4)

Prerequisites: One GE Foundation course which may be taken concurrently, or formal prerequisites and/or competency equivalent for CHIN 101. Introduction to pronunciation, reading, writing, conversation, and grammar. Students with previous training or native speakers of Chinese may not enroll.

#### 102. Fundamentals of Chinese (4)

Prerequisites: One GE Foundation course which may be taken concurrently, or formal prerequisites and/or competency equivalent for advanced study in Chinese. Introduction to pronunciation, reading, writing, conversation, and grammar. Students with previous training or native speakers of Chinese may not enroll.

#### 201. Intermediate Chinese (4)

Prerequisites: Completion of GE Foundation requirements, or formal prerequisites and/or competency equivalent for advanced study in Chinese. Continuation of first year Chinese. Further development of syntax, grammar and sentence patterns, reading, writing and conversation. Students with previous training or native speakers of Chinese may not enroll.

#### 202. Intermediate Chinese (4)

Prerequisites: Completion of GE Foundation requirements, or formal prerequisites and/or competency equivalent for advanced study in Chinese. Continuation of first year Chinese. Further devel-

opment of syntax, grammar and sentence patterns, reading, writing and conversation. Students with previous training or native speakers of Chinese may not enroll.

#### 250. Introduction to the *I-ching* (3)

Prerequisites: Completion of GE Foundation requirements. This course will focus on the central position of the *I-ching* in Chinese philosophical and spiritual life and provide a system of knowledge whereby a person can critically analyze and logically reason the pattern of changes governed by the immutable Law of Change. (Lecture in English, no knowledge of Chinese required.) Traditional grading only.

#### 260. Introduction to Chinese Civilization (3)

A thematic survey of various aspects of Chinese civilization from its ancient beginning to the present. The emphasis of the course is not only on understanding China's history in general chronological terms, but also on understanding the cultural qualities that have made China a great and distinctive country.

## Upper Division

General Education Category A must be completed prior to taking any upper division course except upper division language courses where students meet formal prerequisites and/or competency equivalent for advanced study.

#### 301. Advanced Chinese (3)

Prerequisites: CHIN 202 or its equivalent, or consent of the instructor. Study of modern spoken and written Chinese involving advanced patterns and expressions. Emphasis on reading, comprehension, vocabulary building and idiomatic usage.

#### 302. Advanced Chinese (3)

Prerequisites: CHIN 301 or its equivalent, or consent of the instructor. Study of modern spoken and written Chinese involving advanced patterns and expressions. Emphasis on reading, comprehension, vocabulary building and idiomatic usage.

#### 321. Chinese Calligraphy (3)

Prerequisites: Consent of instructor. Completion of first-year Chinese or Japanese language or equivalent preferred. Focuses on the history, development, artistry, and appreciation of Chinese calligraphy. Equal emphasis placed on hands-on practice in and outside of the classroom. With the assistance of the instructor, students will be required to produce a minimum of two properly mounted and framed calligraphic pieces by the end of the semester for a campus-wide exhibition and competition.

#### 350. Business Chinese for Bilinguals (3)

Prerequisites: Native/near native proficiency in the Chinese language or consent of instructor. Prepares students to use Chinese for business purposes. Introduces a variety of written business forms in Chinese, examines business culture, practice, and etiquette. Students must be able to read and write Chinese for general purposes, e.g., read and write letters to family members, read advertisements, news and/or some articles in Chinese newspapers.

#### 360. Classical Chinese (3)

Prerequisites: CHIN 202 or equivalent Chinese reading proficiency or bilingual students. Prepares students to read and understand classical Chinese, to gain basic knowledge of its vocabulary, grammatical structure and style that is different from modern Chinese. Introduction to various genres of classical literature: prose, poetry and other literary forms.

#### 370. Chinese Literature in English Translation (3)

Readings in translation of representative works of the major literary genres in China covering both the classical and the modern period. Previous knowledge of the language is highly desirable, but not necessary.

#### 380. Topics in Chinese Linguistics (3)

Prerequisites: CHIN 102 or equivalent. The Chinese language viewed in its linguistic context, synchronically and diachronically. Introduction to descriptive grammar of modern standard Chinese, classical Chinese, the rise of written vernacular, dialect variations and sociolinguistic issues. Lecture/discussion.

### 382A. Imperial China (3)

Complete of the GE Foundation. Introduction to the classical civilization stressing the evolution of imperial institutions, the Chinese world order and China's traditional cultural heritage. Same course as HIST 382A.

### CHIN 382B. Modern China (3)

Prerequisite: Completion of the GE Foundation. Chinese society from the 17th century to 1949. Impact of imperialism, reform and revolutionary movements, the background of Chinese communism. Not open to students with credit in HIST 482B. Same Course as HIST 382B.

### 390. Topics in Chinese Cultural Studies (3)

Prerequisites: Upper-division standing or consent of instructor. Study of characteristic features of Chinese culture through selected topics and themes in Chinese ethics, history, literature, philosophy, political science, and sociology. Topics vary from year to year based on specialty of the instructor. Course may be repeated to a maximum of 6 units on different topics.

### 410. Chinese Information Processing. (3) F, S

Prerequisites: CHIN 202 or equivalent. May be waived with instructor's consent. Introduction to the tools used in Chinese web design, including Chinese word processing, HTML, web site layout, and user interaction. Knowledge of the language is desirable. Fundamental pedagogical issues in web design with emphasis on the value of interactivity. Course may be repeated to a maximum of 6 units with different topics.

### 430A. Classical Chinese Fiction (3)

Prerequisites: Upper-division standing or consent of instructor. An in-depth study and examination of traditional Chinese fiction, ranging from major works of fiction from the Six Dynasties (317-588) through the Qing Dynasty (1644-1911). Special attention given to the stylistic and vernacular characteristics of the representative works such as *Sanguo yanyi*, *Jin Ping Mei*, *Shuihu zhuan*, *Xiyou ji*, *Hongloumeng*, and *Rulin waishi*.

### 430B. Classical Chinese Drama (3)

Prerequisites: Upper-division standing or consent of instructor. An in-depth study and examination of Yuan (1279-1368) and Ming (1368-1644) drama, ranging from the major works of Northern Drama (*Zaju*), Southern Drama (*Nanxi*), to Peking Opera (*Jingxi*).

### 430C. Classical Chinese Poetry (3)

Prerequisites: Upper-division standing or consent of instructor. An in-depth study and examination of traditional Chinese poetry, ranging from major works of poetry from antiquity to the Qing Dynasty (1644-1911). Special attention will be given to the textual analysis and literary interpretation of this large poetic body.

### 451. Chinese Culture and Tradition (3)

Prerequisites: One China-related course in Asian Studies or History and CHIN 302 (Advanced Chinese) or equivalent proficiency. Designed primarily as an advanced language class, but its subject emphasis is the study and discussion of various aspects of Chinese culture and tradition. Encompasses historical, philosophical, linguistic, literary, artistic, and scientific perspectives. The instruction of this class is conducted in Mandarin.

### 488. The Chinese Revolution (3)

Prerequisite: CHIN 382B or consent of instructor. Theory and practice of revolutionary socialism in the People's Republic of China, historical and ideological background of the Chinese revolution, Mao and Maoism, politics, culture and society in China. Same course as HIST 488.

### 490. Special Topics in Chinese (1-3)

Prerequisite: consent of instructor. Independent study under supervision of a faculty member. May be repeated for a maximum of 6 units with different topics.

### 492. Senior Seminar (3)

Prerequisites: One China-related course in Asian Studies or History and CHIN 302 (Advanced Chinese) or equivalent proficiency. Introduction to research methods and the current status of the field. Comprehensive survey of recent scholarly publications in the area of Chinese Studies, covering a wide range of topics of academic import including society, philosophy, literature, religion,

art, economy, politics, science, and medicine. It involves an intensive study of some of the paramount conceptual and theoretical problems that confront students of Chinese history and culture. Thematic focus will vary from year to year, depending on the instructor's disciplinary emphasis.

### 499. Directed Studies in Chinese (1-3)

Prerequisite: Consent of instructor. Independent study under supervision of a faculty member. May be repeated for a maximum of 6 units with different topics.

---

## Japanese (JAPN)

---

### Lower Division

#### 101. Fundamentals of Japanese (4)

Prerequisites: One GE Foundation course which may be taken concurrently, or formal prerequisites and/or competency equivalent for JAPN 101. Introduction to pronunciation, reading, writing, conversation, and structure of the language. Native speakers of Japanese may not enroll.

#### 102. Fundamentals of Japanese (4)

Prerequisites: One GE Foundation course which may be taken concurrently, or formal prerequisites and/or competency equivalent for advanced study in Japanese. Introduction to pronunciation, reading, writing, conversation, and structure of the language. Native speakers of Japanese may not enroll.

#### 201. Intermediate Japanese (4)

Prerequisites: Completion of GE Foundation requirements, or formal prerequisites and/or competency equivalent for advanced study in Japanese. Continuation of first year Japanese. Further development of listening, speaking, reading, writing, communication, and structure of the language. Continuation of first year Japanese. Progressive drill on syntax and grammar and sentence patterns: reading, translation and composition. Native speakers of Japanese may not enroll.

#### 202. Intermediate Japanese (4)

Prerequisites: Completion of GE Foundation requirements, or formal prerequisites and/or competency equivalent for advanced study in Japanese. Continuation of first year Japanese. Further development of listening, speaking, reading, writing, communication, and structure of the language. Continuation of first year Japanese. Progressive drill on syntax and grammar and sentence patterns: reading, translation and composition. Native speakers of Japanese may not enroll.

### Upper Division

General Education Category A must be completed prior to taking any upper division course except upper division language courses where students meet formal prerequisites and/or competency equivalent for advanced study.

#### 301. Advanced Japanese (3)

Prerequisites: JAPN 202 or its equivalent as determined by the instructor. Study of modern spoken and written Japanese involving advanced patterns and expressions. Emphasis on reading comprehension, vocabulary building and idiomatic usage.

#### 302. Advanced Japanese (3)

Prerequisites: JAPN 301 or its equivalent as determined by the instructor. Study of modern spoken and written Japanese involving advanced patterns and expressions. Emphasis on reading comprehension, vocabulary building and idiomatic usage.

#### 311. Advanced Spoken Japanese (3)

Prerequisites: JAPN 202 or its equivalent as determined by the instructor. Advanced study in modern spoken Japanese and Japanese communication.

#### 312. Advanced Spoken Japanese (3)

Prerequisites: JAPN 311 or its equivalent as determined by the instructor. Advanced study in modern spoken Japanese and Japanese communication.

**350. Japanese Language, Culture, and Communication (3)**  
Study of Japanese language and culture through sociolinguistic perspectives. Exploration of the interrelationship between the language and culture by focusing on verbal and nonverbal communicative behaviors. Traditional grading only.

**370. Japanese Literature in English Translation (3)**  
Readings in translation of representative works of the major literary genres in Japan covering both the classical and modern period. Previous knowledge of the language is highly desirable, but not necessary. (Lecture-discussion 3 hours.)

**421./521. Selected Readings/ Writing in Japanese (3)**  
Prerequisites: JAPN 302 or consent of instructor. Undergraduates register in JAPN 421; graduates register in JAPN 521. Lecture. Readings from a selection of contemporary written materials including literary works, poetry, magazines, newspapers, reports, instructional and technical explanatory materials. May be repeated under different topics to a total of 9 units.

**422./522. Technical Japanese (3)**  
Prerequisites: JAPN 421 or equivalent. Undergraduates register in JAPN 422; graduates register in JAPN 522. Lecture. Development of receptive and productive skills using a variety of authentic materials drawn from business, humanities, sciences, and others. The course materials will be selected according to particular areas of students' interest. Traditional grading only.

**451./551. Japanese Civilization (3)**  
Prerequisites: JAPN 302 or equivalent. Undergraduates register in JAPN 451; graduates register in JAPN 551. Lecture. Introduction and exploration of characteristic features of Japanese civilization and culture through studying selected topics and themes in fields such as arts, humanities, sciences, and social sciences.

**461./561. The Structure of the Japanese Language (3)**  
Prerequisites: JAPN 302 or equivalent. Undergraduates register in JAPN 461; graduates register in JAPN 561. Lecture. Introduction to phonology, morphology, syntax, semantics and discourse of modern Japanese. Traditional grading only.

**462./562. Contrastive Analysis of English and Japanese (3)**  
Prerequisites: JAPN 302 or equivalent. Undergraduates register in JAPN 462; graduates register in JAPN 562. Lecture. Contrastive analysis of phonological, morphological, syntactic and discourse aspects of English and Japanese. Traditional grading only.

**471. Readings in Modern and Contemporary Japanese Literature (3)**  
Prerequisites: JAPN 302 or equivalent. Readings of representative works of modern and contemporary Japanese literature including short stories, novellas, diaries, memoirs, poetry, and excerpts from novels and plays. (Lecture) Traditional grading only.

**481./581. Principles and Practice of Teaching Japanese (3)**  
Prerequisites: JAPN 302, 312, 350, and at least one 400 level course, or equivalents. The course will introduce Japanese language teaching and learning in the U.S., focusing on application of principles of second language acquisition and exploration of linguistic, pedagogical, sociocultural issues relevant to teaching Japanese. Traditional grading only. Undergraduates register in JAPN 481; graduates register in JAPN 581.490.

**490. Special Topics in Japanese (1-3)**  
Prerequisite: Consent of instructor. Select topics related to advanced Japanese study.

**492./592. Japanese Internship (3-6)**  
Prerequisites: Consent of instructor; completion of a minimum of 15 upper division units required for the major in Japanese. Undergraduates register in JAPN 492; graduates register in JAPN 592. Internship with community agencies, business firms, nonprofit organizations, and government agencies which utilize communication skills in Japanese. Work done under joint direction of activity sponsor and faculty. Project report and internship conferences required. Credit/No Credit grading only.

**497. Directed Studies (1-6)**  
Prerequisite: Consent of instructor. Independent study under supervision of a faculty member.

## Graduate Division

**521./421. Selected Readings/ Writing in Japanese (3)**  
Prerequisites: JAPN 302 or consent of instructor. Undergraduates register in JAPN 421; graduates register in JAPN 521. Lecture. Readings from a selection of contemporary written materials including literary works, poetry, magazines, newspapers, reports, instructional and technical explanatory materials. May be repeated under different topics to a total of 9 units.

**522./422. Technical Japanese (3)**  
Prerequisites: JAPN 421 or equivalent. Undergraduates register in JAPN 422; graduates register in JAPN 522. Lecture. Development of receptive and productive skills using a variety of authentic materials drawn from business, humanities, sciences, and others. The course materials will be selected according to particular areas of students' interest. Traditional grading only.

**551./451. Japanese Civilization (3)**  
Prerequisites: JAPN 302 or equivalent. Undergraduates register in JAPN 451; graduates register in JAPN 551. Lecture. Introduction and exploration of characteristic features of Japanese civilization and culture through studying selected topics and themes in fields such as arts, humanities, sciences, and social sciences.

**561./461. The Structure of the Japanese Language (3)**  
Prerequisites: JAPN 302 or equivalent. Undergraduates register in JAPN 461; graduates register in JAPN 561. Lecture. Introduction to phonology, morphology, syntax, semantics and discourse of modern Japanese. Traditional grading only.

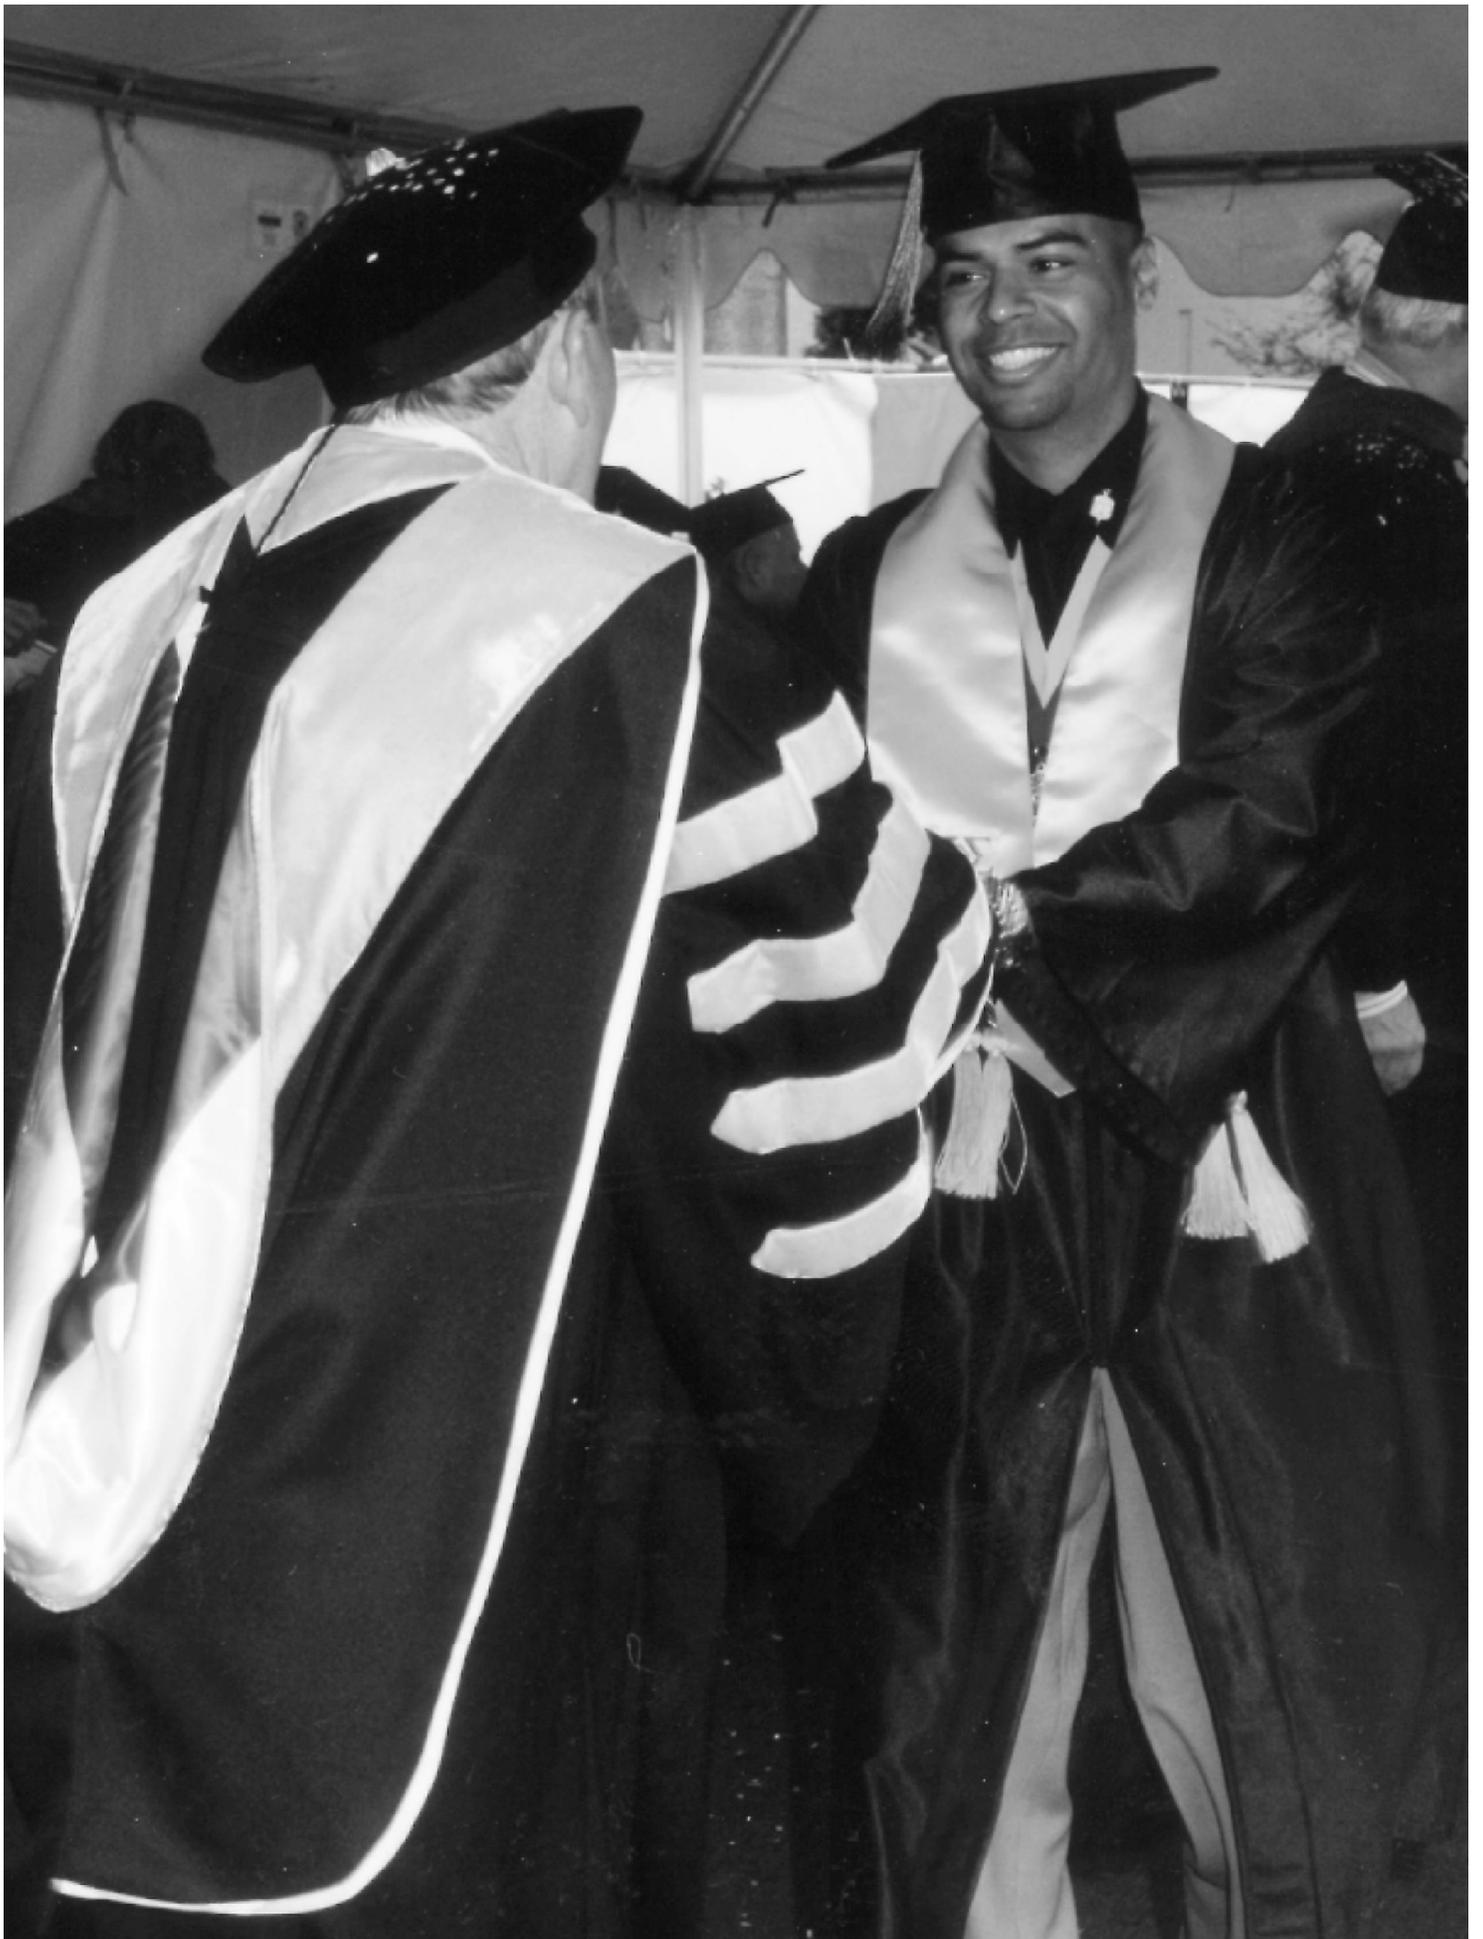

**562./462. Contrastive Analysis of English and Japanese (3)**  
Prerequisites: JAPN 302 or equivalent. Undergraduates register in JAPN 462; graduates register in JAPN 562. Lecture. Contrastive analysis of phonological, morphological, syntactic and discourse aspects of English and Japanese. Traditional grading only.

**581./481. Principles and Practice of Teaching Japanese (3)**  
Prerequisites: JAPN 302, 312, 350, and at least one 400 level course, or equivalents. The course will introduce Japanese language teaching and learning in the U.S., focusing on application of principles of second language acquisition and exploration of linguistic, pedagogical, sociocultural issues relevant to teaching Japanese. Traditional grading only. Undergraduates register in JAPN 481; graduates register in JAPN 581.

**592./492. Japanese Internship (3-6)**  
Prerequisites: Consent of instructor; completion of a minimum of 15 upper division units required for the major in Japanese. Undergraduates register in JAPN 492; graduates register in JAPN 592. Credit/No Credit grading only.

**695. Directed Readings (1-3)**  
Prerequisites: Consent of Graduate Advisor. Readings in Japanese on an individual basis. Traditional grading only.

**697. Directed Research (1-3)**  
Prerequisites: Consent of Graduate Advisor. Research in Japanese on an individual basis. Traditional grading only.

# BACCALAUREATE DEGREES AND OTHER UNDERGRADUATE PROGRAMS

## Degrees

The Bachelor of Arts and the Bachelor of Science degree programs are constructed of three interrelated areas: the breadth component, called the General Education Program, which provides the basis for the baccalaureate degree because it offers training in general skills, methodologies, and habits of thought; the depth component, or major, which establishes an understanding of the breadth of a body of knowledge, competence in the fundamental skills and methodologies of the discipline, and understanding and skill at an appropriate depth in one or more facets of the discipline; and the elective component that provides the possibility for personal enhancement and development that can complement the rest of the degree program.

California State University, Long Beach offers the following Baccalaureate Degree Programs:

### Bachelor of Arts Degree in:

- American Studies
- Anthropology
- Art
- Asian Studies
- Black Studies
- Business Economics
- Chemistry
- Chicano and Latino Studies
- Chinese Studies
- Classics
- Communicative Disorders
- Comparative Literature
- Dance
- Economics
- English
- Family and Consumer Sciences
- Film and Electronic Arts
- French
- Geography
- German
- History
- Human Development
- Interdisciplinary Studies
- International Studies
- Japanese
- Journalism
- Kinesiology
- Liberal Studies
- Music
- Philosophy
- Physics
- Political Science

- Psychology
- Recreation
- Religious Studies
- Social Work
- Sociology
- Spanish
- Speech Communication
- Theatre Arts
- Translation and Interpretation Studies
- Women's Studies

### Bachelor of Fine Arts Degree in:

- Art
- Dance

### Bachelor of Music Degree

### Bachelor of Science Degree in:

- Audiology
- Aerospace Engineering
- Biochemistry
- Biology
- Business Administration
- Chemical Engineering
- Chemistry
- Civil Engineering
- Computer Engineering
- Computer Science
- Construction Engineering Management
- Criminal Justice
- Dietetics and Food Administration
- Earth Science
- Electrical Engineering
- Electronics and Computer Engineering Technology
- Engineering
- Engineering Technology
- Geology
- Health Care Administration
- Health Science
- Industrial Design
- Interdisciplinary Studies
- Kinesiology
- Manufacturing Engineering
- Marine Biology
- Mathematics
- Mechanical Engineering
- Microbiology
- Nursing
- Occupational Studies
- Physics

Refer to specific departments in the section on Courses of Study for detailed descriptions of each program.

### Double Major

You may complete two baccalaureate programs concurrently. Only one degree will be conferred and only one diploma issued. Therefore, you must designate which baccalaureate program is your primary major. Your degree will then take on the designation, i.e., Bachelor of Arts or Bachelor of Science, associated with that primary major. The fact that the requirements of two majors have been completed will be noted on both the diploma and the transcript. A course, or courses, may be used to satisfy the individual requirements of both majors, without limit, as long as the required pattern of coursework is completed for each major.

### Additional Baccalaureate Degree

A graduated student who wishes to pursue an additional baccalaureate degree and maintain undergraduate status may do so by completing a minimum of 30 units after graduation, of which 24 units must be upper-division courses and 12 units must be in the major.

A senior, with advance approval of the Academic Appeals Committee, may earn a maximum of twelve units toward the additional degree while in residence for the first degree. Any courses to be applied to the additional degree must be specified and taken in addition to those needed to satisfy the requirements of the first degree.

Students applying for and accepted to a second baccalaureate degree program who have received their first baccalaureate degree or equivalent from an institution outside of the U.S. will be required to complete any deficiencies in the General Education pattern and will be evaluated for General Education on the same basis as undergraduates.

### Certificate Programs

California State University, Long Beach offers 40 baccalaureate-level programs leading to the award of a Certificate. Certificate programs must require at least 18 units of course work, of which at least 15 units must be at the upper-division level. Many certificates require 24 to 27 units. Certificate programs differ from baccalaureate majors and minors in their emphasis on practical and applied uses of knowledge in a specific area of human enterprise. Certificates may only be earned concurrently with or following the award of the baccalaureate degree. Courses taken to fulfill the requirements for the baccalaureate may also be applied to certificate requirements. A maximum of two 500-level courses, taken by eligible students in their senior year, may be applied to a baccalaureate certificate program. Extension and/or transfer credit may comprise no more than one-fourth of the course work used to meet baccalaureate certificate requirements. A grade-point average of at least 2.0 must be maintained in the certificate program's course work.

If you wish to pursue a baccalaureate certificate program, you should review the course requirements given in the department course listings of this catalog. The department responsible for each certificate is shown in parentheses. You should notify the relevant department of your intention to pursue a certificate program as early as possible so as to receive early advisement on the program. Students wishing to receive a certificate must file a Request to Graduate form with enrollment Services.

### Certificates

Administration of Campus Recreation and Student Service Programs (Recreation and Leisure Studies)  
Administration of Outdoor Recreation Resources (Recreation and Leisure Studies)  
Administration of Travel and Tourism (Recreation and Leisure Studies)  
Administration of Volunteer Services (Recreation and Leisure Studies)  
Aerospace Manufacturing (Aerospace Engineering)  
American Indian Studies (American Indian Studies)  
Asian American Studies (Asian and Asian American Studies)  
Asian Studies (Asian and Asian American Studies)  
Biomedical Art (Art)  
Biotechnology (Biological Sciences)  
Black Studies (Black Studies)  
Cartography and Geographic Information Systems (Geography)  
Chicano and Latino Studies (Chicano and Latino Studies)  
Child Development (Family and Consumer Sciences)  
Community Physical Fitness (Kinesiology and Physical Education)  
Energy Conversion and Power Systems Engineering (Electrical Engineering, Mechanical Engineering)  
Environmental Studies (Environmental Studies)  
Facilities Operations (Engineering Technology)  
Foodservice Systems Administration (Family and Consumer Sciences)  
Gerontology (Gerontology)  
Heating, Ventilating, and Air-Conditioning Engineering (Mechanical Engineering)  
Honors in Business (Marketing)  
International Business (International Business)  
Japanese (Asian and Asian American Studies)  
Kinesiotherapy (Kinesiology and Physical Education)  
Latin American Studies (Latin American Studies)  
Legal Studies in the Liberal Arts (Legal Studies)  
Medieval and Renaissance Studies (Comparative Literature and Classics)  
Nurse Practitioner (Nursing)  
Peace Studies (Peace Studies)  
Pre-Athletic Training (Kinesiology and Physical Education)  
Religious Studies (Religious Studies)  
Russian and East European Studies (Russian and East European Studies)  
Safety Operations (Engineering Technology)  
Technical and Professional Writing (English)  
Therapeutic Recreation (Recreation and Leisure Studies)  
Transportation (Marketing)  
Urban and Regional Studies (Geography)  
Waste Engineering and Management (Civil Engineering)  
Wilderness Studies (Kinesiology and Physical Education)

## Minors

A minor consists of a minimum of 18 units, as specified by the department or program, at least nine of which must be upper-division. The minor may be in a single subject or interdisciplinary. Students may not declare or receive a minor in the same subject as the major, and the major and minor may not have the same title. The description of each minor shall have a statement listing all majors, if any, that may not be combined with that particular minor. The minimum overall GPA in courses toward the minor is 2.0. A minimum of six units of coursework toward the minor must be taken at CSULB.

Students should refer to the requirements of the department and college of their major, to see whether a minor is required for that major. Even if a minor is not required, students may elect to complete one or more minors from those available and have that so noted on their transcripts. Unlike certificates, minors are awarded only as part of a baccalaureate degree. Students may not finish a minor after they have graduated, except in conjunction with a second baccalaureate degree.

## Minors

American Indian Studies  
American Studies  
Anthropology  
Applied Mathematics  
Asian American Studies  
Biology  
Black Studies  
Business Economics

## Credential Programs for Public School Service

Candidates for public school service credentials at the University are advised to familiarize themselves with the requirements for these programs. Descriptions of credential programs appear in a separate section of this *Catalog*. Specific information and applications to individual programs are available in program offices of the College of Education and departmental offices through which they are offered. Applications for student teaching and for field work in credential programs must be filed by October 1 for spring semester and March 1 for summer session and fall semester.

## Requirements for the Baccalaureate Degree

1. Completion of a minimum of 120 units for the Bachelor of Arts. Completion of the minimum number of units (120-136) required by the major program for the Bachelor of Science degree. See the description of the requirements for your major for the specific number of units required.
2. Completion of at least 40 upper-division units (courses numbered 300-499).
3. Completion of at least 30 units in residence at CSULB, of which at least 24 must be upper-division and at least 12 must be in the major. Units earned in Extended Education cannot be counted toward fulfillment of the residence requirement.

4. Completion of the General Education program, as described in a separate section of this *Catalog*, including at least 9 units in upper-division courses completed at CSULB.
5. For students who entered with less than 56 units, completion of University 100.
6. For timely completion of graduation requirements, all students should declare a major before completing 60 units. Students who have completed 75 or more units will not be permitted to register for classes until they have officially declared a major. Entering transfer students who have completed 75 or more transferable units will have one semester in residence to declare a major.
7. Completion of the specific course and unit requirements for your academic major, as shown in the alphabetic listing for the major department. If the requirements are changed during your continuous attendance at CSULB, you have the right to meet either the requirements in effect when you entered the major or the requirements in effect at the time you graduate.  
Effective 1996, all upper-division courses required for a major must be completed within the ten-year period preceding award of the baccalaureate degree. Courses completed prior to this ten-year period can be revalidated by such demonstrations of competence or knowledge of the subject as may be prescribed by the department offering the course.
8. Satisfactory performance on the Writing Proficiency Examination (see the Admissions section and later in this section of the *Catalog*).
9. Achievement of a minimum 2.0 ("C") grade-point average in each of the following:
  - A. The entire college record.
  - B. All units attempted at CSULB.
  - C. All courses in the major.
  - D. All upper-division courses in the major completed at CSULB.
10. Formal approval by the faculty of the university.

#### Procedural Information

- Request to graduate — You must file a Request to Graduate form with the Office of Enrollment Services prior to the announced deadline, which will be at least one semester prior to the expected graduation date.
- If you change your degree or major or expected graduation date, you must file a new request to graduate, and will be subject to a re-filing fee.
- If you have received an Incomplete grade, you must complete the course prior to the expected graduation date, or no later than the deadline for completion of the course which is normally within one calendar year immediately following the end of the term during which it was assigned, whether or not the student maintained continuous enrollment, whichever comes first. Any Incomplete remaining on your record as of the graduation date will be counted as if it were an "F," with units attempted but no grade points earned, unless the instructor has specified on the Incomplete form that some other grade be recorded. You cannot make up an Incomplete after you have graduated.

## Policy on International Baccalaureate

Students with scores of 5 or higher in International Baccalaureate Higher Level courses will be awarded baccalaureate credit of 4 to 10 units, depending on course equivalency. Departments will be responsible for determining which, if any, courses within their own programs are equivalent to International Baccalaureate courses, as well as the number of units to be awarded. Departments shall be provided with information about the program and with syllabi for IB courses, to be used in making this determination.

## Student Grievance

The California State University, Long Beach Student Grievance Procedure is designed to give the campus community a grievance structure in those instances where no other policy or procedure exists. (This policy does not cover grade appeals, prohibited discrimination, etc. where there are existing policies).

The Office of the Vice President for Student Services has staff to help students understand the details of the Grievance Procedure and may be called on for assistance.

### What are Student Grievance Procedures?

Student Grievance Procedures at California State University, Long Beach are intended to provide a formal, standardized means for students to seek redress concerning actions of the faculty, administrators, or staff of the University. Further, the purpose is to establish standardized procedures and safeguards which shall be followed by the University in the adjudication of grievances.

### What is a Grievance?

A grievance is a formal complaint by a student arising out of an alleged action of the faculty, administrators, or staff of the University. The person or entity against whom the complaint is made is referred to in this document as the "respondent." Such action is alleged by the student to be an unauthorized or unjustified action which adversely affects the status, rights, or privileges of the student.

Students are reminded that the Grievance Procedure is not designed to replace the open communication and understanding that are vital to the academic process. The student may withdraw the grievance at any stage and the process will immediately terminate. During all stages of the grievance, the burden of proof will be on the student.

### What is a Statement of Grievance?

The statement of grievance is a clear, simple statement according to the student's understanding of what happened. It should provide enough information to give the committee a complete understanding of the situation and the nature of the remedy sought from the student's perspective. The following steps are designed to assist in the preparation of a Grievance Statement.

### How does one Grieve?

#### Informal Procedure

##### Step 1:

Informal discussion between the concerned parties is always the place to start. If attempts to resolve the problem at this level fail, or if the person alleged to have aggrieved

the student cannot be reached by reasonable effort, or if the nature of the grievance is such that an informal communication with the respondent is not feasible, the student must meet informally with the employee's department Chair, or the program's Director.

Note: In the event that the respondent is at the level of a Dean or higher, the complaint should be directed to the responsible person at the next administrative level. For non-academic matters, throughout these procedures, the term "Dean" refers to the responsible individual of comparable level, e.g., typically an Associate Vice President, or Vice President.

#### Step 2:

If after ten instructional days beyond the informal meeting a satisfactory solution is not found, the department Chair or program Director will meet with the student.

Within 15 instructional days of the receipt by the Chair or program Director of the student's complaint, the Chair or program Director will investigate the allegations and reach a conclusion. The Chair or program Director shall promptly communicate the decision to the student and the respondent. If either the student or the respondent disagrees with the chair's or program director's findings, recommendations, or decision, that person may appeal under step three.

#### Step 3:

If the student or respondent is not satisfied with the results of step two, or if the grievance is against the Chair of a department or Director of a program, the student may consult with the appropriate college Dean (academic) or responsible person at the next administrative level (non-academic).

### Formal Procedure

#### Step 1:

In the event the informal process does not bring satisfactory resolution to the complaining student or the respondent, then either party may initiate the formal procedures by writing a letter of complaint and submitting it to the appropriate department Chair or program Director. The Chair or Director then submits a copy of the letter of complaint to the dean<sup>1</sup> and the responding party. The responding party will reply in writing, normally within 10 instructional days, to the Chair or Director. The Chair or Director submits a copy of the reply to the other party and the Dean.

#### Step 2:

The Dean may then: (1) Normally within 10 instructional days after reviewing the letter of complaint and the response, the Dean may seek additional information from the parties or witnesses, and (2) review the matter and render a decision or (3) form a hearing committee which will make a recommendation to the Dean as follows:

A. The hearing committee in academic matters will consist of two faculty members, two student members and one staff member. The two students and the two faculty shall both be within the college, with one student and one faculty within the department and one student and one faculty outside the department of the respondent. The staff member shall be from within the college.

B. The hearing shall normally be held within 10 instructional days after the hearing committee is formed unless the letter of complaint is withdrawn or there occurs an earlier

settlement of the matter. Internal hearing procedures regarding the conduct of the hearing shall be developed by each college and be made available to both parties. Each party may have one representative at the hearing who may be anyone other than legal counsel.

C. In matters outside an academic department in which no other policy or procedures apply, the responsible person one level above the employee's supervisor shall have the option of establishing an all-University hearing committee consisting of three other employees, two of whom must be from outside the respondent's program, and two students selected in consultation with the A.S.I. President.

D. The charge of the committee will be to investigate, and recommend a proposed resolution to the Dean. After receiving the recommendation, the Dean shall notify both parties of the decision. In the absence of an appeal, the decision of the Dean is final.

#### Step 3:

If either party wishes to appeal the decision of the Dean, the appeal, in writing, may be made to the Provost (academic) or appropriate Vice President (non-academic). The appeal must be made within 10 instructional days of the decision (Step 2). The Provost or Vice President will notify both parties of the appeal, review all written documentation and may investigate further or refer back to the Dean for further findings. The Provost or Vice President will then notify both parties of her/his decision.

## Systemwide Tests Required of Most New Students

The CSU requires new students to be tested in English and mathematics as soon as possible after they are admitted and before enrollment. These are not admission tests, but a way to determine whether you are prepared for college work and, if not, to counsel you how to strengthen your preparation. You might be exempted from one or both of the tests if you have scored well on other specified tests or completed appropriate courses.

### English Placement Test (EPT)

The CSU English Placement Test must be completed by all non-exempt undergraduates prior to placement in appropriate university English coursework. Exemptions from the test are given only to those who present proof of one of the following:

- a score of 550 or above on the Verbal section of the College Board SAT I\* Reasoning Test taken on or after April 1, 1995;
- a score of 470 or above on the Verbal section of the College Board SAT I\* Reasoning Test taken between March 1994 and March 1995. A score of 470 or above on the Verbal section of the College Board Scholastic Aptitude Test (SAT) taken prior to March 1994;
- a score of 24 or above on the enhanced ACT English Test taken October 1989 or later;
- a score of 22 or above on the American College Testing (ACT) English Usage Test taken prior to October 1989;
- a score of 680 or above on the re-centered and adjusted College Board SAT II: Writing Test taken May, 1998 or after;

- a score of 660 or above on the College Board SAT II\* in English Composition with essay taken prior to January 1994;
- a score of 3, 4, or 5 on either the Language and Composition or the Composition and Literature examination of the College Board Scholastic Advanced Placement Program;
- a score on the CSU English Equivalency Examination that qualifies the student for "Pass for Credit" or "Exemption;"
- Completion and transfer of a course that satisfies the General Education-Breadth or Intersegmental General Education Transfer Curriculum (IGETC) written communication requirement, provided such course was completed with a grade of "C" or better.

To file for one of the above exemptions, you may obtain an Exemption Form from the Office of Testing and Evaluation Services (562) 985-4007. Information bulletins and registration materials for the EPT will be mailed to all students subject to the requirements. The materials may also be obtained from the Office of Enrollment Services or from Testing and Evaluation Services. EPT registration does not require a fee.

\*NOTE: The College Board SAT and Achievement Tests were replaced by SAT I and SAT II, respectively, beginning March 1994. Beginning April 1, 1995, the SAT I and SAT II exams have been scored on a new scale.

### Entry-Level Mathematics (ELM) Exam

The ELM examination tests for entry-level mathematics skills acquired through three years of rigorous college preparatory mathematics coursework (normally Algebra I, Algebra II, and Geometry). All undergraduate students must take the test or be exempted from it prior to enrollment in classes. Specific policies regarding retesting and placement will be determined by the campus. Exemptions from the test are given only to those students who can present proof of one of the following:

- a score of 550 or above on the mathematics section of the College Board SAT I Reasoning Test or on the College Board SAT II Mathematics Tests Level I, IC (Calculator), II, or IIC (Calculator);
- a score of 23 or above on the American College Testing Mathematics Test;
- a score of 3 or above on the College Board Advanced Placement mathematics examination (AB or BC);
- a score of 3 or above on the College Board Advanced Placement Statistics examination;
- Completion and transfer of a course that satisfies the General Education-Breadth or Intersegmental General Education Transfer Curriculum (IGETC) quantitative reasoning requirement, provided such course was completed with a grade of "C" or better.

These tests should be taken at the next opportunity after admission or as soon as possible thereafter. Information bulletins and registration materials for the EPT and ELM will be mailed to all students subject to the requirements. Required exams will be indicated in the Letter of Admission. The materials may also be obtained from the Office of Enrollment Services or Testing and Evaluation Services. There is a \$16.00 registration fee for the ELM.

### Writing Proficiency Examination (WPE)

All candidates for degrees and certificates must demonstrate competency in writing skills as a requirement for graduation. Every student under the 1977-78 or subsequent catalog must pass the Writing Proficiency Examination (WPE) to be certified proficient in written composition in English. Students under catalog regulations earlier than 1977-78 are exempt from this requirement if they have maintained continuous attendance.

The Writing Proficiency Examination is a junior-year requirement. The test must be taken by the end of the semester in which an undergraduate student earns 65 or more units. Transfer students with 65 or more units must take the WPE within the first semester of residency at CSULB.

Undergraduate students who do not attempt the test by the time they attain 65 units will have a hold placed on their Voice Response Registration. Registration for the test does not by itself release this hold. The VRR hold will not be released until two weeks after the test date. A request for deferment, for compelling reasons, can be filed at the Office of Testing and Evaluation Services, Brotman Hall (BH) - 216, (562) 985-4007. In certain circumstances, a contract can be submitted to release a VRR hold temporarily. Students must attempt the WPE prior to filing a Request to Graduate.

The responsibility for acquiring the skills necessary to pass the examination is the student's. Regular courses to improve writing skills are available in the University or through University College and Extension Services. Please see WPE Preparation and Review, in the section of the catalog called "Undergraduate Programs." Counseling and other assistance are available through the WPE Advising Center, located in the Learning Assistance Center, Library East - 012.

The examination may be retaken as many times as necessary. However, students who have failed the WPE twice must seek advisement from the WPE Advisory Center and show evidence that they have followed advisor recommendations regarding coursework, tutoring, or other assistance with English language skills before they will be allowed to register for a third attempt. Two 3-hour workshops are offered just prior to each test administration. Information regarding the administration of this examination may be obtained from the Office of Testing and Evaluation Services, BH-216, (562) 985-4007. To cover the costs of administration and scoring, a fee will be charged each time the examination is taken.

### WPE Preparation and Review

The University offers instruction for students who have experienced difficulty with the Writing Proficiency Examination or with certain courses which require intensive writing as a part of the course requirements.

#### WPE 010. Preparation for the WPE (1)

Non-baccalaureate-level course designed to prepare students for the Writing Proficiency Examination (WPE) for which a passing score is 11. Recommended for students who have not yet attempted the WPE or who have previously failed the test with a score of 8 or below. Credit/No Credit grading only. Course is repeatable until the WPE is successfully passed. (Activity)

### WPE 020. Preparation for the WPE (1)

Non-baccalaureate-level course designed to prepare students for the Writing Proficiency Examination (WPE) for which a passing score is 11. Recommended for students who have previously failed the WPE with a score of 9 or 10. Credit/No Credit grading only. Course is repeatable until the WPE is successfully passed. (Activity)

### ENGL 301E. English Proficiency (3)

Prerequisite: ENGL 100 or equivalent. An intermediate course in English usage with emphasis on building proficiency in oral and written language. Enrollment limited to students needing language development beyond skills acquired in ENGL 100, as assessed by scores on the Writing Proficiency Exam. Course may be repeated to a maximum of 6 units. Traditional grading only.

## Educational Opportunity Program (EOP)

The Educational Opportunity Program assists historically low income, first generation college students seeking a four-year college degree. Applicants are guided through the admissions and financial aid process during the application cycle and if admitted, are provided registration assistance, orientation to the college environment, academic and personal support, study skills instruction, tutoring and career advisement to insure the maximum opportunity for success at the University. Students must be admitted to EOP during their initial application to the University. All first-time freshmen EOP participants are required to enroll in EOP 100 during their first semester of enrollment.

### EOP 100. EOP Orientation (2)

An introduction and orientation to college life for EOP students. A review of campus and community resources available to support students participating in the Educational Opportunity Program. Instruction in various academic survival skills that are necessary for college success. Areas of review include: time management, research methodology and term paper development, test-taking strategies, and decision-making. Traditional grading only.

## Special Course Requirement

### University (UNIV) 100. The University and Your Future (1)

All undergraduate students who enter this university with fewer than 56 transferable semester units shall complete a one-unit (15 hour) course which includes instruction on the following topic: (A) History and Mission of the University. This course must be completed during the first or second semester on campus. Credit/No Credit grading only.

University 100 includes an introduction to university traditions; to current issues in higher education (e.g., the role of general education, global interconnectedness, ethics); to academic freedom, tenure, and students' rights and responsibilities; and to services available at the university throughout the student's academic career (e.g., Career Development Center, Learning Assistance Center). It also includes a self-instructed component on the use of the University Library and campus information technologies.

University 100 is offered during the week before each regular semester or during the first five weeks of the semester. Please consult the *Schedule of Classes* under "University 100" for information on class scheduling.

Students who do not complete the requirement in their first two semesters of enrollment on campus may be disenrolled from the university for their third regular semester.

## University Courses (UNIV)

### UNIV 300I. Odyssey (3) F

Prerequisites: General Education A requirements in composition, speech, and critical thinking. Upper-division status. Drawing upon departments from across the University, this course will investigate topics of great importance to our lives. The topics, or themes, will vary year by year. Students will learn how the methodologies of different disciplines approach a common problem. Course may be repeated for a maximum of 6 units.

### UNIV 301I. Odyssey (3) S

Prerequisites: General Education A requirements in composition, speech, and critical thinking. Upper-division status. Drawing upon departments from across the University, this course will investigate topics of great importance to our lives. The topics, or themes, will vary year by year. Students will learn how the methodologies of different disciplines approach a common problem. Course may be repeated for a maximum of 6 units.

### UNIV 400. The University in Your Future Student Leadership (1)

Prerequisites: Selected by University 100 Director. Students assist University 100 faculty in presentation of course. May be repeated for a maximum of 3 units. Credit/No Credit grading only.

View the CSU, Long Beach *Catalog* on-line at [www.csulb.edu](http://www.csulb.edu) by clicking on "Academics" and then "CSULB Catalog."

The Biological Sciences include all of the areas of scientific endeavor centered around the general question of the nature of life. Such diverse areas as biochemistry, ecology, paleontology, and animal behavior are all part of the biological sciences. On this campus the biological sciences are distributed among three separate Departments in the College of Natural Sciences and Mathematics. The discipline of biochemistry is located in Chemistry and Biochemistry and the disciplines of invertebrate and plant paleontology are located in Geological Sciences. For information about the programs in these disciplines, consult the appropriate section of this *Catalog*. The remaining disciplines of the biological sciences represented in the College of Natural Sciences and Mathematics are located in the Department of Biological Sciences, which offers five degrees: a Bachelor of Science in Biology, a Bachelor of Science in Marine Biology, a Bachelor of Science in Microbiology, a Master of Science in Biology, and a Master of Science in Microbiology. The B.S. in Biology has, in addition to a general option, six specialized options in Biology Education, Botany, Cell and Molecular Biology, Ecology and Environmental Biology, Physiology, and Zoology. See below for the specific requirements for each of these degrees and options.

The Department occupies facilities in four science buildings. Courses and student research in organismal biology and ecology are enhanced by a marine biology laboratory with an extensive seawater system, greenhouses, and research and teaching collections of algae, vascular plants, invertebrates (including insects), and vertebrates. Because the campus is near the ocean, mountains, and deserts, the Department is able to offer a number of field and laboratory courses in botany, ecology, entomology, marine biology, and vertebrate zoology. Courses and student research opportunities are available in biotechnology, experimental biology, and clinical laboratory science (medical technology). State-of-the-art facilities are available for graduate and undergraduate research in the W. M. Keck Cellular and Molecular Biology Laboratory and electron microscope facility.

The Department of Biological Sciences also participates in the Desert Studies Consortium and the Ocean Studies Institute. Information on the latter program is listed in this *Catalog* under University Programs.

### ***The Richard B. Loomis Research Award***

This annual departmental award provides supply and travel support for thesis research projects. Graduate students submit research proposals to the Department's Graduate Studies Committee, which grants funding to the more meritorious proposals.

### ***Linda Warren Graham Medical Technology Scholarship***

The Linda Warren Graham Medical Technology Scholarship is available to senior microbiology majors who have been accepted into a Clinical Laboratory Scientist (or a Medical Technology) Internship program. Scholarship applications can be obtained from the Biological Sciences Department Office during the month of March prior to graduation.

### ***Financial Support, Assistantships***

The Department of Biological Sciences offers a limited number of teaching associate and graduate assistant appointments. Forms requesting consideration for these appointments are available in the Department Graduate Office. Duties consist of approximately 20 hours per week devoted to preparation and/or instruction in general undergraduate laboratory classes. These appointments are limited to a maximum of six semesters per individual.

The Department also has a limited number of technical assistant positions as well as some hourly employment. Several members of the faculty have grants which provide for research assistantships. A number of scholarships are available through the University.

### ***Graduate and Health Professional Preparation***

In addition to preparing students for careers in teaching, industry, and government, the undergraduate programs in this Department provide preparation for advanced study at the graduate level and for entry into various health professional schools. Students should consider the degree requirements listed in the *Catalog* as minimal; some graduate schools, professional schools, or careers may require additional coursework in mathematics, physics, chemistry, or biological sciences.

Students desiring entrance into a graduate school to obtain a master's or doctoral degree in some area of the biological sciences should determine the entrance requirements for the school(s) of interest early in their undergraduate years. Specifically, students contemplating graduate work in mathematically oriented areas of the biological sciences should consider taking more calculus (MATH 122, 123, 224, and 364A or 370A will substitute for MATH 119A and 119B) and those contemplating graduate work in chemically oriented areas should consider taking additional chemistry (CHEM 251; 320A,B; 377A,B; 441A,B).

Students desiring entrance into one of the various health-related professional schools including chiropractic, dentistry, medicine, optometry, osteopathy, pharmacy, podiatry, and veterinary, or to a graduate program in physical therapy, should consult with the Health Professions Office of the College of Natural Sciences and Mathematics (FO5-109) for

more information. Most of these schools do not require students to major in any particular discipline and many do not even require a bachelor's degree; rather, they want students who have done well in their major and who also took the prerequisite courses required by that particular school.

### ***Facilitated Enrollment into Classes***

All entering students who declare a major in a degree program offered by this Department should participate in the College of Natural Sciences and Mathematics' Science Safari to Success (for first time freshmen) or EONS (Enrollment and Orientation in the Natural Sciences and Mathematics for transfer students) Program. These programs are held in June-July for those starting in the Fall Semester and in January for those starting in the Spring Semester. Department advisors will be available to provide an overview of the students' chosen baccalaureate degree program, to assist with academic advisement, to provide information on the many career opportunities available, and to aid students in enrolling in classes. Contact the Student Access to Science Center (FO5-109) or Department Office for additional information.

## **Bachelor of Science in Biology**

This degree includes a general option in biology and six additional options for those desiring a more specialized program.

### **Biology (code 3-7621) (124-130 units)**

This degree major is designed for students pursuing careers that involve the study of life; it is especially appropriate for those contemplating graduate work in the biological sciences. This option gives the student a broad background involving coursework in most of the major areas of biology, without requiring specialization in any one particular field. Students in this option have more elective courses in their major than in the other, more specialized, options, which enables them to partially concentrate their studies in a particular area if they so choose. This option requires approximately 79-83 units in the major, of which 37-41 are in lower division and 42 are in upper division.

Lower Division: BIOL 211A,B, 260; CHEM 111A,B; MATH 119A or 122, 119B or 123; PHYS 100A, 100B.

Upper Division: CHEM 320A,B; at least 34 units in biological science including BIOL 340, 345, 345L, 350, 370; one of BIOL 313, 316, 324; one of BIOL 427, 439; and 12-13 additional units selected from upper division courses in the Department of Biological Sciences. At least two of the courses selected to fulfill these additional units must have numbers between 410-499. Either CHEM 441A,B or 448 will count but BIOL 303I, 304, 306, 309I, 401; MICR 300I, 303; NSCI 492 will not count toward these additional 12-13 units. Up to six of these additional units may be substituted from courses in other departments in the College of Natural Sciences and Mathematics upon approval by the undergraduate advisor. Students contemplating graduate work should consider taking 1-3 units of BIOL 496.

CSULB requires a "C" average in all upper division courses in the major taken at CSULB. For students who do not meet this requirement, the Department of Biological Sciences will allow graduation if they earn at least a "C" the last time they complete each upper division course in their major at CSULB.

### Option in Biology Education (code 3-7620) (124 units)

This option is designed solely for students pursuing the Single Subject Teaching Credential in Science, Biological Sciences Concentration. Although designed to provide the required coursework in science to enter this credential program, students should keep themselves informed about any changes in the credential by referring to the section in this Catalog under Single Subject Teacher Education Program and contacting the Science Education Department. This option requires approximately 77-89 units in the major, of which 48-52 are in lower division and 29-37 are in upper division.

Lower Division: ASTR 100; BIOL 211A, B, 260; CHEM 111A, B; GEOL 102, 104, 160; MATH 119A or 122; MICR 200 or 211; and PHYS 100A,B.

Upper Division: CHEM 327 or both 320A and B; and eight additional courses totaling 26-29 units in the biological sciences including BIOL 312, 340, 345, 350, 370; one of these three plant biology courses: BIOL 328, 439, 447; one of these three animal biology courses: BIOL 313, 324, 332. The remaining biological sciences course should be chosen in consultation with an advisor; BIOL 495/MICR 495 is highly recommended. Either CHEM 441A, B or 448 will count but BIOL 303I, 305, 306, 308I, 401; MICR 300I, 303; NSCI 492 will not count toward these two additional required courses.

Although PHYS 400I, EDSS 300C, SCED 403, and BIOL 303I or MICR 300I or are not required in the major, the credential does require these courses. Students may want to take some or all of them prior to graduation.

CSULB requires a "C" average in all upper division courses in the major taken at CSULB. For students who do not meet this requirement, the Department of Biological Sciences will allow graduation if they earn at least a "C" the last time they complete each upper division course in their major at CSULB.

### Option in Botany (code 3-7622) (124-130 units)

This option is designed primarily for those interested in careers involving the biology of plants and is particularly appropriate for those contemplating graduate work in this field. This option requires approximately 81-85 units in the major, of which 37-41 are in lower division and 44 are in upper division.

Lower Division: BIOL 211A,B, 260; CHEM 111A,B; MATH 119A or 122, 119B or 123; PHYS 100A,B.

Upper Division: 44 units including CHEM 320A,B, 441A,B; BIOL 340, 350, 370, 427, 439, 447, 450. Remaining six units selected in consultation with appropriate faculty advisor. BIOL 303I, 304, 306, 309I, 401; MICR 300I, 303; NSCI 492 are not acceptable toward these six units. Students contemplating graduate work should consider taking 1-3 units of BIOL 496.

CSULB requires a "C" average in all upper division courses in the major taken at CSULB. For students who do not meet this requirement, the Department of Biological Sciences will allow graduation if they earn at least a "C" the last time they complete each upper division course in their major at CSULB.

### Option in Ecology and Environmental Biology (code 3-7623) (124-130 units)

This option is designed for students interested in careers involving the study of organisms in relation to their environment, either in private industry or government service, as well as

those students contemplating graduate work in this field. This option requires approximately 88-97 units in the major, of which 41-45 are in lower division and 47-52 are in upper division.

Lower Division: BIOL 211A,B, 260; CHEM 111A,B; GEOL 102, 104 or 105; MATH 119A or 122, 119B or 123; PHYS 100A,B.

Upper Division: CHEM 320A, B; BIOL 312, 340, 345, 345L, 350, 370, 427; one of BIOL 313, 316, or 324; five additional courses including one of these 11 in organic diversity: BIOL 313, 316, 324, 413, 417, 419, 421, 423, 424, 425, 439; two of these 12 in ecology and environmental science: BIOL 414, 450, 451, 453, 454, 455, 457, 458, 464, GEOG 440, 442; one of these four in quantitative biology: BIOL 456, 463, 465, 467; and another course from any of the preceding three lists or BIOL 351 or 353. With permission of the appropriate faculty advisor, three units of BIOL 496 is acceptable as this fifth additional course.

CSULB requires a "C" average in all upper division courses in the major taken at CSULB. For students who do not meet this requirement, the Department of Biological Sciences will allow graduation if they earn at least a "C" the last time they complete each upper division course in their major at CSULB.

### Option in Physiology (code 3-7624) (124-130 units)

This option is designed primarily for those interested in careers involving the study of function in animals, especially humans, and is particularly appropriate for those contemplating graduate work in this field or entering one of the health professions, such as medicine and physical therapy. This option requires approximately 78-82 units in the major, of which 37-41 are in lower division and 41 are in upper division.

Lower Division: BIOL 211A, B, 260; CHEM 111A, B; MATH 119A or 122, 119B or 123; PHYS 100A,B.

Upper Division: CHEM 320A, B, 441A, B; BIOL 340, 350, 370, one course in morphology and development from BIOL 332 or 433, either BIOL 345 & 345L or 341 or 342 & 342L, nine additional units selected from BIOL 342, 342L, 345, 345L, 441, 442, 443, 445, 446, 448, 473, MICR 430. Students contemplating graduate school should consider taking an additional 1-3 units of BIOL 496.

CSULB requires a "C" average in all upper division courses in the major taken at CSULB. For students who do not meet this requirement, the Department of Biological Sciences will allow graduation if they earn at least a "C" the last time they complete each upper division course in their major at CSULB.

### Option in Zoology (code 3-7625) (124-130 units)

This option is designed primarily for those interested in careers that involve the biology of animals and is particularly appropriate for those contemplating graduate work in this field. This option requires approximately 82-89 units in the major, of which 41-46 are in lower division and 41-43 are in upper division.

Lower Division: BIOL 211A,B, 260; CHEM 111A,B; GEOL 102 and 104 or 105, or MICR 211; MATH 119A or 122, 119B or 123; PHYS 100A,B.

Upper Division: CHEM 320A,B; BIOL 312, 340, 345, 345L, 350, 370, 313 or 316, 324 or 332; at least one course selected from BIOL 419, 421, 423, 424; and at least two additional courses

es in biological science totaling at least six units chosen in consultation with a faculty advisor. Either CHEM 441A,B or 448 will count but BIOL 303I, 304, 306, 309I, 401; MICR 300I, 303; NSCI 492 will not count toward these six units. Students contemplating graduate work should consider taking 1-3 units of BIOL 496.

CSULB requires a "C" average in all upper division courses in the major taken at CSULB. For students who do not meet this requirement, the Department of Biological Sciences will allow graduation if they earn at least a "C" the last time they complete each upper division course in their major at CSULB.

### **Option in Cell and Molecular Biology (code 3-7628) (124-130 units)**

This option is designed primarily for those interested in careers that involve biology at the cell and molecular levels and is particularly appropriate for those contemplating graduate work in these fields. This option requires 81-84 units in the major, of which 42-46 are in lower division and 39-40 are in upper division. Students in this option might also want to pursue the Certificate in Biotechnology described elsewhere in this catalog.

Lower Division: BIOL 211A,B, 260; CHEM 111A,B; MATH 119A or 122, 119B or 123; MICR 211; PHYS 100A,B.

Upper Division: CHEM 320A,B, 441A,B; BIOL 340, 340L, 350, 370, 433; three courses selected from BIOL 440, 443, 445, 447, 464, 465 or 467, 473, 477, CHEM 547, MICR 430, 452. STUDENTS WHO CONTEMPLATE GRADUATE WORK ARE STRONGLY ENCOURAGED TO TAKE, IN ADDITION, AT LEAST 2 UNITS OF BIOL 496.

CSULB requires a "C" average in all upper division courses in the major taken at CSULB. For students who do not meet this requirement, the Department of Biological Sciences will allow graduation if they earn at least a "C" the last time they complete each upper division course in their major at CSULB.

### **Bachelor of Science in Marine Biology (code 3-7626) (124-130 units)**

Rocky shores, sandy beaches, tidal wetlands, kelp forests, and the open ocean coupled with the anthropogenic activities of a major urban area provide the seascape for our Bachelor of Science in Marine Biology. This degree is designed for students seeking positions in private industry and governmental agencies and is also appropriate for those considering graduate work in marine biology and ecology. The program takes ready advantage of the region's diverse habitats with a strong field orientation, supported by the R.V. Yellowfin, an 80' teaching and research vessel. Coincidental with this, environmental problems in the Southern California Bight provide another area for student interests.

This degree requires approximately 85-95 units in the major, of which 40-44 are in lower division and 45-51 are in upper division. The number of units and particular blend of science and mathematics makes this a very challenging learning experience. However, the depth and strength of this degree provides a strong and flexible base to pursue a variety of careers. Obtaining a minor in another discipline, such as chemistry, microbiology, engineering, business, or computer science, may enhance one's marketability.

Lower Division: BIOL 153, 211A,B, 260; CHEM 111A,B; MATH 119A or 122, 119B or 123; PHYS 100A,B.

Upper Division: CHEM 320A,B; BIOL 345, 345L, BIOL 313 or 413, 340, 350, 353, 370, 419, 425, GEOL 465 and 466; two courses selected from the following twelve in marine science: BIOL 313, 413, 414, 420, 428, 451, 454, 455, 458, 464, and, with permission of marine biology advisor, BIOL 490; select one course, or course series, from the following six in methodology and techniques: BIOL 457, 463, 465, 467, and, with permission of marine biology advisor, BIOL 496, or GEOL 364 and 364L.

CSULB requires a "C" average in all upper division courses in the major taken at CSULB. For students who do not meet this requirement, the Department of Biological Sciences will allow graduation if they earn at least a "C" the last time they complete each upper division course in their major at CSULB.

### **Bachelor of Science in Microbiology (code 3-7654) (124-130 units)**

Microbiology is the study of microorganisms and their interactions with people and the environment. This degree, with the inclusion of appropriate classes, may be utilized by pre-professional students who are preparing for medical, dental, pharmacy, and veterinary school. A major in microbiology prepares students for a wide range of employment opportunities in clinical and public health fields, genetic engineering, environmentally related fields, and industries concerning food, pharmaceuticals, and medical equipment and supplies. There is a core of courses for each of these varied educational and employment opportunities and specific programs can be arranged by counseling with microbiology advisors in the Department. This undergraduate major is recognized by the American Society for Microbiology as meeting their core curriculum for the baccalaureate degree program in microbiology, if students use MICR 471 as an elective. This major requires 91-94 units, of which 43-46 are in the lower division and 48 are in upper division.

Lower Division: BIOL 211A, B, 260; CHEM 111A, B, 251; MATH 119A or 122; MICR 211; PHYS 100A,B.

Upper Division: CHEM 320A, B, 441A, B; BIOL 340; MICR 320, 322, 430, 430L, 452, either both 450 and 451 or BIOL 370, and 9 additional elective units chosen from: BIOL 473, 477; MICR 323, 429, 432, 471, 473, 480, 490, 495, 496. MICR 323, 429 and 432 are particularly useful for Clinical Laboratory Science (Medical Technology) and other health related careers. The following courses are not acceptable toward the 9 units: MICR 300I, 303.

CSULB requires a "C" average in all upper division courses in the major taken at CSULB. For students who do not meet this requirement, the Department of Biological Sciences will allow graduation if they earn at least a "C" the last time they complete each upper division course in their major at CSULB.

### **Bachelor of Science Degree with Honors in Biology, Marine Biology, or Microbiology**

Students majoring in the B. S. in Biology (all options), B. S. in Marine Biology, or B. S. in Microbiology who would like an enriched academic program, including an intensive research experience, may be eligible to graduate with Honors in the Major through the University Honors Program. Students may also complete General Honors through the University Honors Program, in which case the General Honors thesis requirement is met through Honors in the Major (see University Honors in this *Catalog*).

Students interested in graduating with Honors in the Major should participate in a series of courses designed to introduce central concepts in biology (BIOL 110H), develop critical thinking and communication skills (special section of UHP 100), and introduce the newly emerging field of bioinformatics (BIOL 220H). In addition, they may join a learning community of students with similar interests and benefit from mentoring by faculty members.

This Honors in the Major program was created with the support of a grant from the Howard Hughes Medical Institute. Students admitted to Honors in the Major may be eligible to receive monetary support from a variety of sources for completion of their honors research and thesis.

Students who have successfully completed the lower division Honors in the Major curriculum will receive priority for research fellowship support to the extent that it is available.

Additional details about this program, including availability of fellowship support, are available from the Honors in the Major Program Advisor.

#### Requirements for Admission to the Honors in the Major

1. Junior or senior standing with at least one year remaining before graduation.
2. Declared major of B. S. in Biology, B. S. in Marine Biology, or B. S. in Microbiology.
3. Completion of BIOL 211A,B, CHEM 251, 320A,B at time of entry with grades of at least "C" in each course. Students may apply during the semester in which they expect to complete these courses.
4. GPAs of at least 3.000 in all courses in the major and in all upper division courses in the major at the time of application.
5. Submission of an application describing the student's academic background, reasons for applying (including a description of any previous research experience), and willingness to commit to a year-long research experience.
6. Letter of recommendation from a CSULB faculty member familiar with the student's work and abilities.

#### Requirements for Graduation with Honors in the Major

1. GPA of at least 3.300 in all upper division courses in the major and in Honors courses.
2. Completion of all requirements for the chosen degree in the Biological Sciences.
3. Completion of either BIOL 220H or 477.
4. Completion of BIOL 466H, Research Design and Methods - Honors (3 units).
5. Completion of 3 units of BIOL 496, Undergraduate Directed Research.
6. Completion of 3 units of BIOL 498H, Thesis - Honors.
7. Presentation of research results in a public forum. This requirement may be met by presentation at a scientific conference or at a local venue; consult the Program Director for additional information

Substitutions to this program must be approved by the Honors in the Major Program Advisor.

#### Minor in Biology (code 0-7621)

This minor may be combined with any major at CSULB except the B.S. in Biology (all options), B.S. in Microbiology, and B.S. in Marine Biology.

A minimum of 19 units is required for the minor.

Lower Division: BIOL 211A, B. (211A requires CHEM 111A; 211B requires CHEM 111B.)

Upper Division: A minimum of nine units selected from upper division biology courses with at least one course selected from the 400 series. The following courses are not acceptable toward these nine units: BIOL 303I, 304, 306, 309I, 401; MICR 300I, 303, 429.

#### Minor in Microbiology (code 0-7654)

This minor may be combined with any major at CSULB except the B.S. in Microbiology.

A minimum of 21 units which must include:

Lower Division: MICR 211.

Upper Division: MICR 320, 430, and 452; plus a minimum of five units from the following: MICR 322, 450, 471, and 473.

#### Minor in Physiology (code 0-7624)

This minor may be combined with any major at CSULB except the B.S. in Biology, Option in Physiology.

A minimum of 18 upper division units. Twelve of these 18 units must be selected from the following courses: BIOL 341, 342, 342L, 345, 345L, 442, 443, 445, 446, 448, 490. The other six of these eighteen units must be selected from other courses in the above list or from BIOL 473; CHEM 441A,B, 443, or 448. At least one of the upper division courses taken for this minor must have a laboratory. Most of these upper division courses require CHEM 111A, B and BIOL 211A, B as prerequisites; some have other prerequisites in addition.

#### Certificate Program in Biomedical Art (code 1-5010)

The Certificate Program in Biomedical Art is an interdisciplinary program sponsored by the Art and Biological Sciences Departments. Requirements for the certificate are listed in the Art section of this *Catalog*. Co-directors of the CSULB biomedical art program are in Art, Mr. Peter Mendez; and in Biological Sciences, Dr. Kenneth Gregory. Questions may be addressed to them during office hours, which are listed in the respective departmental offices.

#### Certificate in Biotechnology (code 1-7060)

Biotechnology is a rapidly growing field which encompasses many domains of science. Specifically, biotechnology refers to a process which ultimately yields a product. The products can be loosely subdivided into five categories; biological organisms with novel traits, DNAs, RNAs, proteins, and compounds. The Undergraduate Certificate in Biotechnology is the integrated use of specific offerings of the College of Natural Sciences and Mathematics, including the departments of Biological Sciences and Chemistry and Biochemistry. Laboratory facilities and selected courses will serve to provide a fundamental background in the theory and techniques of biotechnology. The certificate may be earned in conjunction with or subsequent to a baccalaureate degree. Courses offered for the certificate may be used to satisfy, as appropriate, major or minor requirements.

## Prerequisites for Admission

1. Completion of the following courses with a grade of "C" or better (or permission of the biotechnology certificate program director): CHEM 111A, B; CHEM 320A, B; CHEM 441A, B; BIOL 340; BIOL 370; MICR 211.

## Requirements

1. A baccalaureate degree (can be concurrent);
2. Completion of the program's prerequisite course requirements;
3. Approval by the program director;
4. Completion of the Core Curriculum: BIOL 477/577 (3); NSCI 492 (3); BIOL 473/573 (3); MICR 480/580 (1); Additional 3 units to be selected in consultation with the program director;
5. Completion of 3 units consisting of an approved research project in biotechnology to be taken from one or more of the following: BIOL 496; CHEM 496; or MICR 496 (undergraduate students); BIOL 697; CHEM 697; or MICR 697 (graduate students);
6. Total Units Required for Certificate: 16-17 units

## Concurrent and/or Summer Enrollment in Another College

Students who wish to take course work in a community or another college to meet curricular requirements while enrolled as undergraduates in the College of Natural Sciences and Mathematics must petition the appropriate department for prior approval to enroll in specific courses. This policy applies to concurrent enrollment or summer enrollment. University policy must also be met. See 'Concurrent Enrollment' and 'Transfer of Undergraduate Credit' in this *Catalog*. Courses not receiving prior approval will not be accepted for credit by the department.

## Master of Science in Biology (code 6-7621)

The available programs in this degree cover a wide spectrum of biology and include both laboratory and field study. This degree requires a thesis based on original scientific research; a list of research areas with the names of faculty specializing in these areas can be obtained from the Department's Graduate Office.

## Admission to the Department

### Prerequisites

In addition to the prerequisites for entrance into CSULB as a graduate student stated previously in this Catalog under Graduate Degrees and Post Baccalaureate Studies, the Department of Biological Sciences requires:

1. A bachelor's degree in the biological or related sciences with minimum course work similar to the lower division requirements of a degree program in the Department of Biological Sciences, CSULB, including cell biology and statistics, ecology, and genetics (other undergraduate degrees will be considered by the Graduate Studies Committee);
2. An undergraduate grade point average in all completed science and mathematics courses of at least 2.70, or a grade point average of at least 3.00 in the last 40 semester (60 quarter) units of science and mathematics courses completed; and

3. The Graduate Record Examination Subject Test in Biology or the Subject Test in Biochemistry, Cell, and Molecular Biology, which must have been taken prior to applying to the Department. Most students who apply with a score less than the 50th percentile on this test will be denied admittance to the Department. The GRE Subject Test must have been taken within five years prior to the intended admission date.

A student who does not meet these minimum entrance prerequisites must obtain a faculty sponsor in order to be considered for admittance.

## Application

Prospective graduate students in M.S. in Biology, including CSULB graduates, must formally apply for admission to CSULB as described previously in this Catalog and must also apply directly to the Department of Biological Sciences. All applicants must submit the following documents directly to the Department no later than 15 March for the fall semester or 15 October for the spring semester to receive consideration for admission:

1. Departmental Application Form, available from the Department's Graduate Office;
2. Official transcripts of all college level academic work including that done at CSULB (these are in addition to those transcripts required for general graduate admission to CSULB);
3. Three letters of recommendation from persons familiar with the applicant's academic performance and research potential (if applying for a teaching associate position, the letters must refer to the applicant's potential to teach laboratory sections in the biological sciences); and
4. Official report of scores on the Graduate Record Examination Subject Test in Biology or the Subject Test in Biochemistry, Cell, and Molecular Biology. The applicant should have taken this examination well prior to applying to the Department, because the official score must reach the Department by the deadlines above.

These materials must be submitted to the Department's Graduate Office.

## Review by the Graduate Studies Committee

The Graduate Studies Committee will review all folders completed by the deadlines and either accept the applicant as a Classified or Conditionally Classified graduate student or deny admission. Acceptance is competitive and the GPA, the GRE Subject Test score, and the letters of recommendation will be weighed in the decision to accept or reject an applicant. All accepted students must contact the Departmental Graduate Advisor prior to their initial semester for counsel and orientation.

## Admission to the Department of Biological Sciences as a Classified Graduate Student (7621-052)

The Department of Biological Sciences may admit as a Classified graduate student any applicant who:

1. has met all prerequisites,
2. has a complete folder of all required documents, and
3. has obtained acceptance by a faculty member as the Chair of the student's Thesis Committee. The student should then set up a program (see "The Program of Study", below).

## Admission to the Department of Biological Sciences as a Conditionally Classified Graduate Student (7621-051)

An applicant who fails to meet the criteria above for Classified admission to the Department and who falls into one of the following four categories may be considered by the Graduate Studies Committee for admission as Conditionally Classified graduate student:

1. An applicant with course and/or unit deficiencies. The Graduate Studies Committee will determine what deficiencies each applicant has and indicate on the back of the Department Application Form which course(s) the applicant must take to make up those deficiencies. These courses are in addition to the minimum 30 units on the student's Program of Study (see below). The applicant must make up all such deficiencies before attaining Classified status;
2. An applicant with GPA deficiencies. An applicant with an undergraduate GPA in science and math courses between 2.50 and 2.75 and a GPA in the last 40 semester (60 quarter) units of science and math courses between 2.75 and 3.00 may secure admission as a Conditionally Classified graduate student. The applicant must first obtain sponsorship from a Department of Biological Sciences faculty member; this faculty member must indicate in writing to the Graduate Studies Committee willingness to serve as the Chair of the applicant's thesis committee and the reasons why the Graduate Studies Committee should admit the applicant. Thus, an applicant with low GPA must contact potential thesis advisors before the Graduate Studies Committee can consider the application. In addition, an applicant receiving the Conditionally Classified status must complete, with a grade of "A" or "B", three approved courses totaling at least nine units acceptable to the Graduate Studies Committee and the Department Chair before attaining Classified status. These approved courses may appear on the student's Graduate Program of Study. If the applicant receives less than a "B" in any of the three courses, the applicant will be dropped from the M.S. in Biology program. An applicant who fails to meet the GPA criteria for normal, Classified admission, and has an undergraduate GPA in science and mathematics courses of less than 2.50 and a GPA in the last 40 semester (60 quarter) units of science and mathematics courses of less than 2.75 is not eligible for admission to the M.S. in Biology degree program;
3. An applicant who has scored below the 50th percentile on the GRE Subject Test; and
4. An applicant who meets all prerequisites but who does not yet have a Chair for the Thesis Committee. It is the responsibility of the student to obtain a Chair and set up a graduate program by the end of the second semester in residence following admission to the Master of Science program or they will be dropped from the program.

### The Program of Study

After admission to the Department as a Classified or Conditionally Classified graduate student, the student in consultation with the Thesis Chair, must establish a Program of Study that includes a program of classes and a thesis proposal. The student and Thesis Committee Chair will select at least two additional members to serve on the student's Thesis Commit-

tee. The Departmental Graduate Advisor serves as an ex-officio member of all thesis committees. Each student must prepare a written thesis proposal for approval by the student's Thesis Committee. The Thesis Committee will meet with the student to determine what courses the student must take and indicate them on the M.S. in Biology Graduate Program Form.

The program of classes must include six units of Thesis (BIOL 698), one to three units of Directed Research (BIOL 697), one unit of Seminar (MICRO 580 or BIOL 580), and two units from: BIOL 661, 662, 663, 664, 665, 666, CHEM 595A; these may be repeated if the topic covered is different. Of the minimum 30 units, no more than three may come from BIOL 661-666, and CHEM 595A; no more than six may come from transfer credit; and no more than one 300-level course may be included.

The Program of Study must be established before the end of the second semester after admission to the Department; in addition, the University Writing Proficiency Examination must be passed and a score at, or above, the 50th percentile on the Graduate Record Examination Subject Test in Biology or in Biochemistry, Cell, and Molecular Biology must be achieved by this time. Failure to meet these requirements will result in dismissal from the Department's M.S. in Biology program.

### Advancement to Candidacy

In addition to the general University requirements stated previously under Post-Baccalaureate and Graduate Degrees in this *Catalog*, the student must complete the following steps before receiving Candidate status (7621-053) in the Department of Biological Sciences:

1. Admission to the Department of Biological Sciences Master's Degree program as a Classified graduate student (see above);
2. Achievement of a score at, or above, the 50th percentile on the Graduate Record Examination Subject Test in Biology or the Subject Test in Biochemistry, Cell, and Molecular Biology. This requirement must be met by the end of the second semester in residence. Normally, students not meeting this requirement will be dropped from the program. Only in cases where English is not the student's native language or if a disability impedes the student's performance, may an alternative be petitioned. In these cases, the Chair of her/his Thesis Committee must petition, in writing, the Graduate Studies Committee to provide an alternate method for meeting this requirement. This petition must provide full documentation of the student's progress to date, professional promise, and a schedule for meeting all degree requirements. If granted, the alternate method will consist of an exam, oral and/or written, in which the student must demonstrate extensive knowledge of the major areas of biology. The exam committee will consist of the Department Graduate Advisor and three faculty members selected by the Graduate Studies Committee. No member of the student's Thesis Committee may serve on this committee; and
3. Establishment of a Thesis Committee and Program of Study (see above). Upon evidence of satisfactory academic progress and passing of the University Writing Proficiency Examination, the Thesis Committee will recommend the student for advancement to candidacy by forwarding its recommendation to the Department Graduate

Advisor. This should occur at least one year before graduation. Upon approval by the Associate Dean, the student will attain the status of Classified graduate standing.

## Requirements for the Master of Science in Biology (code 6-7621)

In addition to the general University requirements stated previously in this Catalog, the student must meet the following requirements before receiving the degree of Master of Science in Biology. The requirements are:

1. Advancement to candidacy (see above);
2. Maintenance of a 3.00 ("B" average), or better, overall graduate grade-point average (includes all upper-division and graduate level courses taken since admission to this University and after completion of the baccalaureate degree) and graduate program GPA. If either GPA falls below 3.00, it must be elevated to a 3.00 at the end of the following semester or the student will be dropped from the M.S. in Biology program;
3. Completion of a written thesis and an oral defense of this thesis, followed by a public presentation of the thesis research. The members of the candidate's Thesis Committee must have approved the thesis and the defense before a student may schedule the public presentation. The student may not defend the thesis or give a public presentation during the summer session; and
4. Serve as a teaching associate or graduate assistant. Under some circumstances, this requirement may be waived.

Requests to graduate must be received by Enrollment Services approximately 6 months in advance of the expected graduation date (Check the Schedule of Classes for the date).

These requirements must be completed within 6 years from when the first course on the Program of Study was completed, including academic leaves, or the student's degree program will be terminated.

## Master of Science in Microbiology (code 6-7654)

This degree is available to qualified students preparing for professional careers in industry and government and for further studies at the doctoral level. In addition, a Master's degree in Microbiology, combined with appropriate courses in education, can be utilized for a community college teaching credential.

### Admission to the Department

#### Prerequisites

In addition to the prerequisites for entrance into CSULB as a graduate student stated previously in this Catalog under Graduate Degrees and Post Baccalaureate Studies, the Department of Biological Sciences requires:

1. A bachelor's degree with a major in microbiology or related fields from an accredited institution that includes the following courses (or their equivalents):  
General Microbiology (with laboratory)\*, Statistics, Cell or Molecular Biology\*, Biochemistry (1 year)\*, and two upper division Microbiology Laboratory courses equivalent to courses in the Department of Biological Sciences, CSULB.

The previous courses marked with \* must be completed with a grade of "A" or "B". Applicants shall have completed 24 semester units or their equivalent of upper division courses appropriate for a baccalaureate degree in microbiology or related fields.

2. An undergraduate grade point average in all completed science and mathematics courses of at least 2.70, or a grade point average of at least 3.00 in the last 40 semester (60 quarter) units of science and mathematics courses completed; and
3. The Graduate Record Examination Subject Test in Biology or the Subject Test in Biochemistry, Cell, and Molecular Biology, which must have been taken prior to applying to the department. Most students who apply with a score less than the 50th percentile on this test will be denied admittance to the Department. The GRE Subject Test must have been taken within 5 years prior to the intended admission date.

A student who does not meet these minimum entrance prerequisites must obtain a faculty sponsor in order to be considered for admittance.

#### Application

Prospective graduate students in M.S. in Microbiology, including CSULB graduates, must formally apply for admission to CSULB as described previously in this Catalog and must also apply directly to the Department of Biological Sciences. All applicants must submit the following documents directly to the Department no later than 15 March for the fall semester or 15 October for the spring semester to receive consideration for admission:

1. Departmental Application Form, available from the Department's Graduate Office;
2. Official transcripts of all college level academic work including that done at CSULB; these are in addition to those transcripts required for general graduate admission to CSULB;
3. Three letters of recommendation from persons familiar with the applicant's academic performance and research potential (if applying for a teaching associate position, the letters must refer to the applicant's potential to teach laboratory sections in the biological sciences); and
4. Official report of scores on the Graduate Record Examination Subject Test in Biology or the Subject Test in Biochemistry, Cell, and Molecular Biology. The applicant should have taken this examination well prior to applying to the Department, because the official score must reach the Department by the deadlines above.

These materials must be submitted to the Department's Graduate Office.

#### Review by the Graduate Studies Committee

The Graduate Studies Committee will review all folders completed by the deadlines and either accept the applicant as a Classified or Conditionally Classified graduate student or deny admission. Acceptance is competitive and the GPA, the GRE Subject Test score, and the letters of recommendation will be weighed in the decision to accept or reject an applicant. All accepted students must contact the Graduate Advisor prior to their initial semester for counsel and orientation.

### Admission to the Department of Biological Sciences as a Classified Graduate Student (7654-052)

The Department of Biological Sciences will admit as a Classified graduate student any applicant who:

1. has met all prerequisites;
2. has a complete folder of all required documents; and
3. has obtained acceptance by a faculty member as the Chair of the student's Thesis Committee. The student should then set up a program (see "The Program of Study", below).

### Admission to the Department of Biological Sciences as a Conditionally Classified Graduate Student (7654-051)

An applicant who fails to meet the criteria above for Classified admission to the Department and who falls into one of the following three categories may be considered by the Graduate Studies Committee for admission as Conditionally Classified graduate student:

1. An applicant with course and/or unit deficiencies. The Graduate Studies Committee will determine what deficiencies each applicant has and indicate on the back of the Department Application Form which course(s) the applicant must take to make up those deficiencies. These courses are in addition to the minimum 30 units on the student's Program of Study (see below). The applicant must make up all such deficiencies before attaining Classified status;
2. An applicant with GPA deficiencies. An applicant with an undergraduate GPA in science and mathematics courses between 2.50 and 2.75 and a GPA in the last 40 semester (60 quarter) units of science and mathematics courses between 2.75 and 3.00 may secure admission as a Conditionally Classified graduate student. The applicant must first obtain sponsorship from a Department of Biological Sciences faculty member; this faculty member must indicate in writing to the Graduate Studies Committee willingness to serve as the Chair of the applicant's thesis committee and the reasons why the Graduate Studies Committee should admit the applicant. Thus, applicants with a low GPA must contact potential thesis advisors before the Graduate Studies Committee can consider the application. In addition, an applicant receiving the Conditionally Classified status must complete, with a grade of "A" or "B", three approved courses totaling at least nine units acceptable to the Graduate Studies Committee and the Department Chair before attaining Classified status. These approved courses may appear on the student's Graduate Program of Study. If the applicant receives less than a "B" in any of the three courses, the applicant will be dropped from the M.S. in Microbiology program. An applicant who fails to meet the GPA criteria for normal, Classified admission and has either an undergraduate GPA in science and mathematics courses of less than 2.50 or a GPA in the last 40 semester (60 quarter) units of science and mathematics courses of less than 2.75 is not eligible for admission to the M.S. in Microbiology degree program.
3. An applicant who has scored below the 50th percentile on the GRE Subject Test; and
4. An applicant who meets all prerequisites but who does not yet have a Chair for the Thesis Committee. It is the responsibility of the student to obtain a Chair and set up a

graduate program by the end of the second semester in residence following admission to the Master of Science program or they will be dropped from the program.

### The Program of Study

After admission to the Department as a Classified or Conditionally Classified graduate student, the student, in consultation with the Thesis Chair, must establish a Program of Study that includes the program of classes and a thesis proposal. The student and Thesis Committee Chair will select at least two additional members to serve on the student's Thesis Committee. The Departmental Graduate Advisor serves as an ex-officio member of all thesis committees. Each student must prepare a written thesis proposal for approval by the student's Thesis Committee. The Thesis Committee will meet with the student to determine what courses the student must take and indicate them on the M.S. in Microbiology Graduate Program Form.

The program of classes will include the completion of a minimum of 30 semester units. At least 20 of these units must be in the 500-600 level courses of which a minimum of 18 units must be in the Microbiology 500-600 series including 2 courses in the MICR 550 series. Required courses, if not taken previously, include: MICR 450 or an upper division/graduate course in genetics; MICR 471 or an upper division/graduate course in cell physiology; MICR 550A-F courses (minimum: any two of the MICR 550 courses); MICR 695 (minimum of one and a maximum of two enrollments in different topic areas); MICR 697 (maximum of 3 units); and MICR 698 (maximum of 6 units). Other elective units included in the graduate program must be 400-600 level courses acceptable to the University and microbiology degree program. No 300-level courses may be included.

The Program of Study must be established before the end of the second semester after admission to the Department; in addition, the University Writing Proficiency Examination must be passed and a score at, or above, the 50th percentile on the Graduate Record Examination Subject Test in Biology or in Biochemistry, Cell, and Molecular Biology must be achieved by this time. Failure to meet these requirements will result in dismissal from the Department's M.S. in Microbiology program.

### Advancement to Candidacy

In addition to the general University requirements stated previously under Post-Baccalaureate and Graduate Degrees in this Catalog, the student must complete the following steps before receiving Candidate status (7654-053) in the Department of Biological Sciences:

1. Admission to the Department of Biological Sciences Master's Degree program as a Classified graduate student (see above);
2. Achievement of a score at, or above, the 50th percentile on the Graduate Record Examination Subject Test in Biology or the Subject Test in Biochemistry, Cell, and Molecular Biology. This requirement must be met by the end of the second semester in residence. Normally, students not meeting this requirement will be dropped from the program. Only in cases where English is not the student's native language or if a disability impedes the student's performance may an alternative be petitioned. In these

cases, the Chair of her/his Thesis Committee must petition, in writing, the Graduate Studies Committee to provide an alternate method for meeting this requirement. This petition must provide full documentation of the student's progress to date, professional promise, and a schedule for meeting all degree requirements. If granted, the alternate method will consist of an exam, oral and/or written, in which the student must demonstrate extensive knowledge of the subject areas covered in the appropriate GRE Subject Test. The exam committee will consist of the Department Graduate Advisor and three faculty members selected by the Graduate Studies Committee. No member of the student's Thesis Committee may serve on this committee; and

3. Establishment of a Thesis Committee and Program of Study (see above). Upon evidence of satisfactory progress and passing of the University Writing Proficiency Examination, the Thesis Committee may recommend the student for advancement to candidacy by forwarding its recommendation to the Department Graduate Advisor, Department Chair, and Associate Dean for Graduate Accountability in the College of Natural Sciences and Mathematics. This should occur at least one year before graduation. Upon approval by the Associate Dean, the student will attain the status of Classified graduate standing.

#### Requirements for the Master of Science in Microbiology (code 6-7654)

In addition to the general University requirements stated previously in this Catalog, the student must meet the following requirements before receiving the degree of Master of Science in Microbiology. The requirements are:

1. Advancement to candidacy (see above);
2. Maintenance of a 3.00 ("B" average), or better, overall graduate grade point average (includes all upper-division and graduate level courses taken since admission to this University and after completion of the baccalaureate degree) and graduate program GPA. If either GPA falls below 3.00, it must be elevated to a 3.00 at the end of the following semester or the student will be dropped from the M.S. in Microbiology program;
3. Completion of a written thesis and an oral defense of this thesis, followed by a public presentation of the thesis research. The members of the candidate's Thesis Committee must have approved the thesis and the defense before a student may schedule the public presentation. The student may not defend the thesis or give a public presentation during the summer session; and
4. Serve as a teaching associate or graduate assistant. Under some circumstances, this requirement may be waived.

Requests to graduate must be received by Enrollment Services approximately 6 months in advance of the expected graduation date (Check the Schedule of Classes for the date).

These requirements must be completed within 6 years from when the first course on the Program of Study was completed, including academic leaves, or the student's degree program will be terminated.

---

#### Biology Courses (sBIOL)

---

Students pursuing a major and/or a minor in this Department may receive unit credit for courses marked with the symbol "##" as a general elective but may not apply the units toward the specific or elective requirements for any degree or option in this Department. Majors in this department may, however, take, for general education purposes, interdisciplinary courses offered by this Department. All other courses in this Department are open to majors and minors but by traditional grading only. Courses with an asterisk may be used in graduate programs.

#### Lower Division

##### 100.## Biology of the Human Environment (3) F,S

Prerequisites: Completion of or concurrent enrollment in a course that fulfills one of the Foundation requirements in GE. Biological perspective on the interaction between humans and their environment. Specifically designed for non-science majors. (Lecture 3 hrs.)

##### 110H. Ideas in the Biological Sciences – Honors (1)

Prerequisites: Consent of instructor. An examination of the historical roots of the biological and biochemical sciences. Through readings and discussions, participants will become acquainted with the people and discoveries that have advanced the state of biological sciences. Historical context, importance, and the scientific and social consequences of these discoveries will be examined. Introduction to research faculty in the Departments of Biological Sciences and Chemistry/Biochemistry. (Discussion 1 hr.) Traditional grading only.

##### 153. Introduction to Marine Biology (3) F,S

Prerequisites: Completion of or concurrent enrollment in courses that fulfill the A.1 and B.2 GE requirements. Scientific approach to the study of marine organisms and their relationships to the environment. Emphasis on human interaction with marine ecosystems. (Lecture 2 hrs., laboratory and field 3 hrs.) Field trips may be required outside of scheduled class time. Not open to students with a "C" or better in BIOL 201. A course fee may be required.

##### 200.## General Biology (4) F,S

Prerequisite: Completion of GE Foundation requirements. A brief survey of the major areas of biology including cell biology, genetics, evolution, phylogeny, plant and animal anatomy and physiology, ecology, and behavior. Specifically designed for non-science majors. (Lecture 3 hrs., laboratory 3 hrs.) Course fee may be required.

##### 200L.## General Biology Laboratory (1) F,S

Prerequisites: Completion at another institution of coursework deemed equivalent to the lecture component only of BIOL 200. BIOL 200L is identical to the laboratory component of BIOL 200. Students enrolled in BIOL 200L will take it in the same room and at the same time as students enrolled in BIOL 200. Not open for enrollment to students with credit for BIOL 200. (Laboratory 3 hrs.) A course fee may be required.

##### 204.## Essentials of Pharmacology (2) F,S

Prerequisites: BIOL 207. A systematic study of drugs, their classification, methods and routes of administration, therapeutic and toxic effects with emphasis on nursing implications. Not designed for majors in the College of Natural Sciences and Mathematics. Not open to students with a "C" or better in A/P 206. (Lecture 2 hrs.)

##### 205.## Human Biology (4) F,S

Prerequisites: Completion of GE Foundation requirements. A brief survey of human biology focusing on anatomy, physiology, and development of cells, tissues, organs, and organ systems; including molecular biology, genetics, ecology, evolution, and diversity. Specifically designed for non-science majors. Not open to students with a "C" or better in A/P 107 or 205. (Lecture 3 hrs., laboratory 3 hrs.) A course fee may be required.

---

## Biology Courses (BIOL)

---

### 207.## Human Physiology (4) F,S

Prerequisites: Completion of GE Foundation requirements. General introduction to the functional integration of human body systems. Designed for majors in biomedical engineering, physical education, and the allied health fields. Not open to students with a "C" or better in A/P 207 or 209. (Lecture 3 hrs., laboratory 3 hrs.) A course fee may be required.

### 208.## Human Anatomy (4) F,S

Prerequisites: Four years of high school English (or ENGL 001); three years of high school mathematics including algebra, geometry, and intermediate algebra (or MATH 010). The gross anatomy, histology, and neuroanatomy of the human body. Designed for majors in physical education and the allied health fields. Not open to students with a "C" or better in A/P 208 or 202. (Lecture 3 hrs., laboratory 3 hrs.) A course fee may be required.

### 211A. Biological Sciences I (5) F,S

Prerequisite: CHEM 111A with a grade of "C" or better and completion of GE Foundation requirements. Prerequisite or corequisite: CHEM 111B. An introduction to cellular and molecular principles common to all life forms including biological macromolecules, cell structure, metabolism, genetics, and molecular biology. Also includes microbiology of prokaryotes and the origin of life. (Lecture 3 hrs., laboratory 6 hrs.) Traditional grading only. Course fee may be required. (BIOL 211A+211B, CAN BIOL SEQ A.)

### 211B. Biological Sciences II (5) F,S

Prerequisites: BIOL 211A, CHEM 111B with a grade of "C" or better. The second of a two-semester introductory sequence designed for biological science majors. An introduction to organismal biology, including the diversity, structure, and function of protists, fungi, plants, and animals. Also includes the principles of evolution, ecology, and animal behavior. (Lecture 3 hrs, laboratory 6 hrs.) Course fee may be required. Traditional grading only. (BIOL 211A+211B, CAN BIOL SEQ A)

### 211C. Biological Sciences Laboratory I (2) F,S

Prerequisites: Completion at another accredited institution of coursework equivalent to the lecture component only of BIOL 211A. BIOL 211C is identical to the laboratory component of BIOL 211A. Students enrolled in BIOL 211C will take it in the same room and at the same time as students enrolled in BIOL 211A. Not open for enrollment for students with credit for BIOL 211A. (Laboratory 6 hrs.) A course fee may be required. Traditional grading only.

### 211D. Biological Sciences Laboratory II (2) F,S

Prerequisites: Completion at another accredited institution of coursework equivalent to the lecture component only of BIOL 211B. BIOL 211D is identical to the laboratory component of BIOL 211B. Students enrolled in BIOL 211D will take it in the same room and at the same time as students enrolled in BIOL 211B. Not open for enrollment for students with credit for BIOL 211B. (Laboratory 6 hrs.) A course fee may be required. Traditional grading only.

### 220H. Fundamentals of Bioinformatics – Honors (2)

Prerequisites: BIOL 211A and consent of instructor. Introduction to the scope and use of biological information databases including protein and nucleotide sequences and molecular structure databases as well as literature databases. Basic methods of comparison of DNA and protein sequences including sequence alignment, analysis of 3-D structures, and phylogenetic analysis. Fundamentals of DNA sequencing and genetic survey techniques including genotyping of nuclear and mitochondrial DNA variation. (Lecture 1 hr., laboratory 3 hrs.) Course fee may be required. Traditional grading only.

### 260. Biostatistics (3)

Prerequisites: BIOL 211A or BIOL 207 or MICR 200; MATH 112 or 117 or 119A or 122. Use of probability and statistics in the description and analysis of biological data. (Lecture 2 hrs., laboratory 3 hrs.) Course fee may be required.

## Upper Division

### 303I.## Coastal Systems and Human Impacts (3)

Prerequisites: Completion of GE Foundation requirements, one or more Explorations courses, and upper-division standing; BIOL 153 or 200 or 211B; GEOL 102 or 160. Defines and describes natural processes impacting human activities in the coastal zone and how human practices influence natural processes. Topics include global warming, sea level rise, El Nino, port development, ocean outfalls and water quality, fisheries, and coastal erosion. Same course as GEOL 303I. Traditional grading only. (Lecture 3 hrs.)

### 304.## Pathophysiology (3) F,S

Prerequisites: BIOL 207, 208; CHEM 302; MICR 200. Pathogenesis and pathophysiology of common disorders of human nervous, musculoskeletal, endocrine, cardiovascular, respiratory, excretory, digestive, and reproductive systems with emphasis on the physiological basis of the disease process and clinical correlations. Not designed for majors in the College of Natural Sciences and Mathematics. Not open to students with a "C" or better in A/P 305. (Lecture 3 hrs.)

### 306.## Human Prosection (3) F, odd years

Prerequisites: BIOL 208 or 332 and consent of instructor. Detailed regional dissection of the human body with emphasis on dissection techniques. Not open to students with a "C" or better in A/P 306 or 336. Traditional grading only. (Lecture 1 hr., laboratory 6 hrs.) A course fee may be required.

### 309I.## Human Body and Mind (3) F,S

Prerequisites: Completion of GE Foundation requirements, one or more Explorations courses, and upper-division standing. A course designed to facilitate understanding of the human being as an integrated physiological and psychological entity. It presents clear and simple explanations of various aspects of the human body's function, development and care, and explores the interaction between body and mind in physiological, medical and psychological terms. Not open to students with a "C" or better in A/P 308I. (Lecture 3 hrs.)

### \*312. Evolutionary Biology (3)

Prerequisites: BIOL 211A,B with a grade of "C" or better, 260. A general survey of the various areas of evolutionary biology including but not limited to population genetics, speciation, origin of life, and phylogenetic analysis. Main emphasis is on evolutionary mechanisms and methods of analysis with some emphasis on specific details of the evolutionary history of life. Traditional grading only. (Lecture 3 hrs.)

### \*313. Invertebrate Zoology (4) F,S

Prerequisite: BIOL 211A,B with grade of "C" or better. Basic taxonomy, morphology, ecology, and distribution of the invertebrates. Protozoa through Arthropoda, excluding Insecta, but including Protochordates; emphasis on local marine forms. (Lecture 2 hrs., laboratory and field 6 hrs.) Course fee may be required.

### \*314. Biology of the Protozoa (4)

Prerequisites: BIOL 211A,B with grade of "C" or better. A comparative study of certain morphological, physiological and life history features of representative protozoan species. Emphasis in the laboratory on optical, cytochemical, nutritional and other experimental techniques. (Lecture 2 hrs., laboratory 6 hrs.)

### \*316. General Entomology (4) S

Prerequisites: BIOL 211A,B with grade of "C" or better. Characteristics, structure, habits, and life cycles of insects; the importance of insects to humans and other organisms. (Lecture 2 hrs., laboratory 6 hrs.) Course fee may be required.

### \*324. Vertebrate Zoology (4) F,S

Prerequisite: BIOL 211A,B with grade of "C" or better. An evolutionary and systematic survey of the living vertebrates. Emphasis on the phylogenetic origin and the morphological and physiological adaptations of the major groups. Not open for major credit if more than one of the following courses has been previously taken; BIOL 419, 421 or 423. (Lecture 2 hrs., laboratory 6 hrs.) Course fee may be required.

**328. Plants and Human Affairs (3)**

Prerequisites: BIOL 211A,B with grade of "C" or better. Economic and social role of plants and plant products in our civilization from a botanical perspective. Emphasis on the origins, methods of processing and uses of plants. (Lecture 3 hrs.)

**\*332. Comparative Vertebrate Morphology (4) S**

Prerequisites: BIOL 211A, B with grade of "C" or better. Evolutionary history of vertebrate structure. Lecture emphasizes primarily gross adult structure and secondarily embryonic origin and microanatomy. Laboratory focuses on comparative anatomy of shark, salamander, and mammal. (Lecture 2 hrs., laboratory 6 hrs.) Course fee may be required.

**\*340. Molecular Cell Biology (3) F,S**

Prerequisites: BIOL 211A,B with a grade of "C" or better; CHEM 320A or 327. Detailed study of the organization and functioning of cells and cellular organelles at the molecular level; emphasis on experimental approaches and structural/functional relationships. Individual research paper on a current aspect of cellular/molecular biology required. (Lecture 3 hrs.)

**340L. Molecular Cell Biology Laboratory (3) F**

Prerequisites: BIOL 340, 370, both with a grade of "C" or better. (Preference given to students in the Bachelor of Science in Biology, Option in Cell and Molecular Biology.) An intensive course of modern laboratory techniques used in both cell and molecular biology. Topics include genomics, subcellular structure and transport, and purification and functional characterization of recombinant proteins. This class will provide extensive laboratory experience for students. (Lecture 1 hr., laboratory 6 hrs.) Course fee may be required.

**\*341. Physiology for Therapists I (4) F,S**

Prerequisites: BIOL 211A, B; CHEM 111A, B; PHYS 100A, 100B; 100 hours of documented exposure to the practice of physical therapy in a variety of settings; and permission of instructor. Mechanisms of action and interaction of the physiological body systems with emphasis on the nervous and endocrine systems and skeletal and smooth muscle. Pathological and clinical considerations will also be presented. Not open to students with a "C" or better in A/P 341 or 307. Traditional grading only. (Lecture 3 hrs., laboratory 3 hrs.) A course fee may be required.

**\*342. Mammalian Physiology (3) F,S**

Prerequisites: BIOL 211A,B with a grade of "C" or better. Recommended: PHYS 100A-B. A course dealing with the function of the various mammalian body systems, especially of humans. Emphasis will be placed on the integration of homeostatic mechanisms of the nervous, muscular, endocrine, cardiovascular, respiratory, renal, digestive, and reproductive systems. Not open to students with a "C" or better in A/P 342. Traditional grading only. (Lecture 3 hrs.)

**\*342L. Laboratory in Physiology (1) F,S**

Prerequisites: BIOL 342 (may be taken concurrently.) Experiments and exercises designed to provide laboratory experience in, and illustration of, physiological principles and mechanisms of interaction among the various body systems. Not open to students with a "C" or better in A/P 342L. Traditional grading only. (Laboratory 3 hrs.) A course fee may be required.

**\*345. Comparative Animal Physiology (3) F,S**

Prerequisites: BIOL 211A,B with a grade of "C" or better. Comparison of the fundamental physiological processes of the major animal phyla. Not open to students with a "C" or better in A/P 340. Traditional grading only. (Lecture 3 hrs.)

**\*345L. Laboratory in Comparative Animal Physiology (1) F,S**

Prerequisites: BIOL 345 (may be taken concurrently.) Laboratory course designed to acquaint students with direct observation and measurement of physiological processes in various animal groups, both invertebrate and vertebrate. Not open to students with a "C" or better in A/P 340L. Traditional grading only. (Laboratory 3 hrs.) A course fee may be required.

**\*350. General Ecology (3) F,S**

Prerequisite: BIOL 211A,B with grade of "C" or better, 260; MATH 112 or 117 or 119A or 122. Chemistry and physics recommended. Relationships of plants and animals to their physical and biological environment; structure and function of populations, communities and ecosystems. (Lecture 3 hrs., and two required Saturday field trips.) Traditional grading only.

**\*351. Animal Behavior (4) S**

Prerequisites: BIOL 211A,B, 260, all with grade of "C" or better. Introduction to vertebrate and invertebrate ethology; innate and learned behavior, sensory adaptation and communication, activity rhythms, navigation and migration, predator-prey interactions, and social behaviors including aggression, courtship, and mating. Emphasis on ecological and evolutionary aspects. (Lecture 3 hrs., laboratory 3 hrs.) Course fee may be required. Traditional grading only.

**\*353. Marine Biology (3) F**

Prerequisites: BIOL 153, both 211A,B with grade of "C" or better, and 260. Study of pelagic and benthic marine ecosystems, including topics of food resources, mariculture, and pollution. Weekend field trips may be required. (Lecture 2 hrs., laboratory and field 3 hrs.) Course fee may be required.

**370. General Genetics (4) F,S**

Prerequisites: BIOL 211A,B with grades of "C" or better and either BIOL 260 or CHEM 441B. Detailed study of classical transmission genetics and an introduction to modern molecular genetics. Included will be current observations and concepts of the nature, organization, function and regulation of the expression of genetic material. (Lecture 3 hrs., laboratory 3 hrs.) Course fee may be required. Traditional grading only.

**401.## Biology of Human Aging (3)**

Prerequisites: BIOL 200 or 205 or 207. Biological processes associated with aging in humans. Emphasis on both cellular and organ aging. Not designed for majors in the College of Natural Sciences and Mathematics. Not open to students with a "C" or better in A/P 401. (Lecture 3 hrs.)

**413./513. Marine Zooplankton (4) S, even years**

Prerequisites: BIOL 353. (Undergraduates register in BIOL 413; graduates register in BIOL 513.) Diversity, natural history, taxonomy, and identification of marine zooplankton, including ichthyoplankton. Emphasis on fauna of the California coast. (Lecture 2 hrs., laboratory and field 6 hrs.)

**414./514. Marine Ornithology (3) F**

Prerequisites: BIOL 153, either BIOL 350 or 353. (Undergraduates enroll in BIOL 414; graduates enroll in BIOL 514.) Designed to familiarize marine biology students with the role of birds in the marine environment. Topics include ecology, distribution, behavior, and identification of marine birds. Library report, independent field project, and attendance on field trips required. (Lecture 1 hr., laboratory and field 6 hrs.) Course fee may be required.

**417./517. Biology of Marine Benthic Invertebrates (3) S, odd years**

Prerequisites: BIOL 353. (Undergraduates register in BIOL 417; graduates register in BIOL 517.) Topics include benthic community structure and function, benthic-pelagic coupling, animal sediment relationships, animal interactions, and marine pollution ecology. Laboratory emphasis will be on identification of local forms. (Lecture 2 hrs., laboratory and field 3 hrs.)

**\*419. Ichthyology (3)**

Prerequisites: BIOL 211A, B, 260, and at least six additional units of upper division biological science, all with a grade of "C" or better. Recommended: BIOL 350, 353, and 370. Systematics, morphology, genetics, and ecology of fishes. Emphasis on local marine forms. (Lecture 2 hrs., laboratory 3 hrs., weekend field trips may be required.) A course fee may be required. Traditional grading only.

**420./520. Advanced Ichthyology (3) S**

Prerequisites: BIOL 260, 350, 370, and 419. (Undergraduates enroll in BIOL 420; graduates enroll in BIOL 520.) Advanced aspects of distribution, systematics, physiology, adaptation, and life history of fishes; emphasis on state-of-art field/laboratory techniques and contemporary concepts. (Lecture 2 hrs., laboratory and field 3 hrs.; weekend field trips may be required.) A course fee may be required.

**\*421. Herpetology (3) S, odd years**

Prerequisites: BIOL 211A, B, 260, with grades of "C" or better, and eight units of upper division biology. Taxonomy, natural history, ecology and distribution of amphibians and reptiles, emphasis on local forms. Weekend field trip required. (Lecture 2 hrs., laboratory and field 3 hrs.)

---

## Biology Courses (BIOL)

---

### \*423. Mammalogy (3) F, even years

Prerequisites: BIOL 211A, B, 260, all with grade of "C" or better, and at least six units of upper division course work in biological sciences; BIOL 324 or 332 highly recommended. Phylogenetic survey of the living mammals of the world. Lecture emphasizes the radiation of the orders and families and their morphology, physiology, and behavior; laboratory emphasizes external and skeletal morphology of these same taxa and identification of California species. (Lecture 2 hrs., laboratory 3 hrs.)

### \*424. Ornithology (3) S, even years

Prerequisites: BIOL 211A,B with grade of "C" or better and eight units of upper division biology. Morphology, physiology, taxonomy, ecology and behavior of birds; emphasis on laboratory and field study of adaptations of local forms. (Lecture 2 hrs., laboratory and field 3 hrs.) Course fee may be required.

### \*425. Phycology (3) F

Prerequisites: BIOL 153, 211A, B with a grade of "C" or better. Taxonomy, phylogeny, and physiology of algae, including the physiological ecology of marine macroalgae; emphasis on local marine forms. (Lecture 2 hrs., laboratory and field 3 hrs.) Course fee may be required.

### \*427. Taxonomy of Vascular Plants (4) S

Prerequisite: BIOL 211A,B with grade of "C" or better. Principles and methods of vascular plant systematics, including history, nomenclature and phylogeny; emphasis in the laboratory is on the identification and classification of native and introduced plants of Southern California. (Lecture 2 hrs., laboratory and field 6 hrs.)

### 428./528. Biology of the Giant Kelp (3) S

Prerequisites: BIOL 353, 425, or 439 with a grade of "C" or better. (Undergraduates register in BIOL 428; graduates register in BIOL 528.) A study of the physiology, reproductive biology, anatomy, taxonomy, and ecology of the ecologically and economically important kelp genus *Macrocystis*. (Lecture 3 hrs.)

### 433./533. Developmental Biology (3)

Prerequisites: BIOL 370; CHEM 320A,B. (Undergraduates register in BIOL 433; graduates register in BIOL 533.) Presentation of current topics and experimental approaches in cell differentiation and development with emphasis on examination of these processes at the molecular level. Topics include gametogenesis, fertilization, differential gene expression, and role of oncogenes in development. (Lecture/discussion 3 hrs.)

### \*439. Plant Morphology (4) F

Prerequisite: BIOL 211A,B with grade of "C" or better. Comparative structure, life history and phylogenetic relationships of plants. (Lecture 2 hrs., laboratory 6 hrs.) Course fee may be required.

### 440./540. Advanced Molecular Cell Biology (3) F

Prerequisites: BIOL 340 and either BIOL 370 or CHEM 441B, each with a grade of "C" or better. (Undergraduates register in BIOL 440; graduates register in BIOL 540.) In depth discussion of cellular processes and their regulation. Topics may include intracellular targeting and transport of macromolecules, cell cycle control, and oncogenesis. The course includes critical discussion of primary journal articles on pertinent topics. Traditional grading only for majors/minors. (Lecture 3 hrs.)

### \*441. Physiology for Therapists II (3) F,S

Prerequisites: BIOL 341 and permission of instructor. Mechanisms of action and interaction of the physiological body systems with emphasis on the cardiovascular, renal, and respiratory systems. Pathological and clinical considerations will also be presented. Not open to students with a "C" or better in A/P 441. Traditional grading only. (Lecture 3 hrs.)

### 442./542. Neurophysiology (3) F

Prerequisites: PHYS 100A,B; BIOL 342, 345. (Undergraduates register in BIOL 442; graduates register in BIOL 542.) Study of the mechanisms by which excitable cells function and of the sensory, motor, and integrative systems in which they participate. Representative examples will be selected from vertebrate and invertebrate phyla. Not open to students with a "C" or better in A/P 442/542. Traditional grading only. (Lecture 3 hrs.)

### 443./543. Endocrinology (3) S

Prerequisites: BIOL 340 or CHEM 441B; CHEM 320A or 327; and one of BIOL 341, 342, 345, 445, 448, 545, 548, CHEM 441A, or 448. (Undergraduates enroll in BIOL 443; graduates enroll in BIOL 543.) Role of the endocrines in vertebrate and invertebrate adjustment to changes in the internal and external environment. (Lecture 3 hrs.)

### 445./545. Metabolic Regulation (3) F

Prerequisites: CHEM 441B or BIOL 443/543. (Undergraduates register in BIOL 445; graduates register in BIOL 545.) Study of molecular mechanisms by which intermediary metabolism is regulated in various mammalian tissues with emphasis on mechanisms of hormone action and their role in the regulation of some key enzymes of carbohydrate, fat, and protein metabolism. Not open to students with a "C" or better in A/P 445/545. Traditional grading only. (Lecture 3 hrs.)

### 446./546. Respiratory and Renal Physiology (3) F

Prerequisites: BIOL 342 or 345; PHYS 100A,B. (Undergraduates register in BIOL 446; graduates register in BIOL 546.) Functions of and interactions between the respiratory and renal systems of mammals. Not open to students with a "C" or better in A/P 446/546. Traditional grading only. (Lecture 3 hrs.)

### 447./547. Molecular Plant Physiology (3) S

Prerequisites: BIOL 340, 370, both with grade of "C" or better. (Undergraduates enroll in BIOL 447; graduates enroll in BIOL 547.) Current molecular approaches to classical topics including plant hormones, photosynthesis, resistance to plant pathogens, adaptation of plants to environmental stress, and development of plants. (Lecture 3 hrs.)

### 448./548. Cell and Molecular Neurobiology (3) S

Prerequisites: BIOL 340 or CHEM 441B and one of BIOL 341, 342, or 345. (Undergraduates enroll in BIOL 448; graduates enroll in BIOL 548.) Study of the molecular, cellular, and developmental principles that underlie the functioning of the nervous system in the control of physiological and behavioral processes. Focus on mechanisms of electrical signaling and principles of synaptic biochemistry, development, and plasticity. (Lecture 3 hrs.)

### 450./550. Plant Ecology (3) S

Prerequisites: BIOL 260, 350. Recommended: BIOL 427, 447. (Undergraduates register in BIOL 450; graduates register in BIOL 549.) Relationship of plants to their environment and principles of plant distribution. (Lecture 2 hrs., laboratory and field 3 hrs.) A course fee may be required. Traditional grading only.

### 451./551. Wetlands and Mangrove Ecology (3) S, even years

Prerequisites: BIOL 260, 350. (Undergraduates register in BIOL 451; graduates register in BIOL 551.) Concepts of wetlands and mangrove ecology in relation to the general ecological processes that shape different types of wetland ecosystems. Physical and biogeochemical conditions, biological characteristics, specific players, and their interactions. Descriptions of specific coastal and inland wetland ecosystems: geomorphology, geochemistry, ecosystem structure, and function, and models. Included will be wetland management goals and concepts, and current approaches and practices in the U.S. and the world. Lecture time may be used for field trips, two of which will extend beyond standard lecture time. (Lecture 3 hrs.)

### 452./552. Behavioral Ecology (3) S

Prerequisites: BIOL 312 or 350 or 351. Undergraduates register in BIOL 452; graduates register in BIOL 552.) Detailed study of how behavior contributes to reproductive success and survival. Emphasis given to theoretical background, ecological setting, and evolutionary consequences of behavior, including both empirical and experimental studies. (Lecture/discussion 3 hrs.)

### \*453. Insect Ecology (3) F, even years

Prerequisites: BIOL 316, 350 with grades of "C" or better. Field and experimental studies of abundance dispersal, distribution, and behavior. (Lecture 2 hrs., laboratory and field 3 hrs.) Course fee may be required.

### 454./554. Research in Tropical Marine Ecology (2) S, even years

Prerequisites: BIOL 260, either 350 or 353, and 313 or 413 or 419 or 425. (Undergraduates register in BIOL 454; graduates register in BIOL 554.) Field and laboratory studies, lectures, and individual

research on tropical marine biological problems. Designed to engage students in experimental research, including: recognizing a problem, designing and carrying out a project, statistical data analysis, and oral and written report presentation. An eight-day field trip to Hawaii will be required during the spring recess at student expense. Enrollment is limited. (Lecture 1 hr., 8 day field trip.)

#### 455./555. Ecology of Marine Communities (3) F

Prerequisites: BIOL 260, 350, 353. (Undergraduates register in BIOL 455; graduates register in BIOL 555.) Discussion of field studies on ecological principles related to marine communities. Includes an individual field research project and two class projects. (Lecture 2 hrs., field 3 hrs.)

#### 456./556. Population Ecology (3)

Prerequisites: BIOL 350, MATH 119B or 123. (Undergraduates register in BIOL 456; graduates in BIOL 556.) Analysis of characteristics of animal and plant populations including population growth and regulation, competition, predation, parasitism, and other intraspecific and interspecific interactions; population fluctuations; spatial patterns. (Lecture 3 hrs.)

#### 457./557. Field Methods in Ecology (3) S, odd years

Prerequisites: BIOL 260, 350. (Undergraduates register in BIOL 457; graduates in BIOL 557.) Design of field research projects, collection and analysis of data, writing and presentation of reports. Emphasis on field sampling techniques. Five weekend field trips required. (Lecture 2 hrs., laboratory and field 3 hrs.)

#### 458./558. Ecology of Marine Plankton (4) S, odd years

Prerequisites: BIOL 260, 353; CHEM 327 or 320A,B; MATH 119A or 122. (Undergraduates register in BIOL 458; graduates in BIOL 558.) Physiological ecology of marine phytoplankton and zooplankton as a basis for study of structure, dynamics, and modeling of plankton communities. (Lecture 3 hrs., laboratory and field 3 hrs.) Course fee may be required.

#### 463./563. Computer Modelling in Biology (4) F

Prerequisites: BIOL 260, 350. (Undergraduates register in BIOL 463; graduates register in BIOL 563.) History, modelling theory, different modelling approaches, theoretical, empirical, and quantitative modelling. Laboratory will use modelling software and focus on model construction and quantitative simulation, possibly of student's own research project. Applicable to ecology, microbiology, physiology, environmental sciences, etc. (Lecture 3 hrs., laboratory 3 hrs.) Course fee may be required.

#### \*464. Aquatic Toxicology (3) S

Prerequisites: BIOL 211A,B, 340; CHEM 320A or 327, all with grade of "C" or better. BIOL 353 and CHEM 448 or 441A,B recommended. An in depth study of the interactions between anthropogenic chemicals and aquatic ecosystems. Topics include the origin, fate, chemical and biological detection, and quantification of pollutants and their impact at the molecular, biochemical, cellular, physiological, organismal, and community levels of organization. Individual research project required. (Lecture 3 hrs.)

#### 465./565. Experimental Design and Regression Analysis (4) F, even years

Prerequisites: BIOL 260; MATH 119B or 123; six units of upper division biological science or consent of instructor. (Undergraduates register in BIOL 465; graduates register in BIOL 565.) Techniques in experimental design and data analysis applied to problems in biology. Topics include analysis of variance and covariance, bivariate and multiple regression, experimental design, bootstrapping and randomization tests, and nonparametric statistics. Laboratory experience in analyzing biological data with computerized statistical packages. Traditional grading only. (Lecture 3 hrs., laboratory 3 hrs.)

#### 466H. Research Design and Methods – Honors (3) S

Prerequisites: BIOL 211A, B, either BIOL 260 or CHEM 251, CHEM 320A, B, all with a grade of "C" or better, completion of the GE Foundation, and consent of instructor. A rigorous introduction to the following: i) hypothesis testing, experimental design, and regression modeling of biological data; ii) methodological and technical procedures for experimentation; and iii) techniques for written and oral presentation of research results to prepare stu-

dents for undergraduate research. Research paper and oral presentation required. Same course as CHEM 466H. Traditional grading only. (Lecture 3 hours).

#### 467./567. Multivariate Data Analysis (4) F, odd years

Prerequisites: BIOL 260; MATH 119B or 123; six units of upper division biological science or consent of instructor. (Undergraduates register in BIOL 467; graduates register in BIOL 567.) Multivariate data analysis techniques applied to biological data. Applied matrix algebra as needed for analyzing and understanding multivariate analysis methods. Topics covered include principal components analysis, factor analysis, discriminant analysis, cluster analysis as well as modern phylogenetic analysis techniques. Laboratory experience in analyzing multivariate biological data with computerized statistical packages. (Lecture 3 hrs., laboratory 3 hrs.) Traditional grading only for majors and minors.

#### 473./573. Molecular Genetics (3) S

Prerequisite: BIOL 370. CHEM 327 or 320A,B. (Undergraduates register in BIOL 473; graduates register in BIOL 573.) Nature, replication, regulation and mode of action of the genetic material. (Lecture 3 hrs.)

#### 477./577. Biotechnology: Applications of Molecular Techniques and Bioinformatics (3)

Prerequisites: BIOL 370; CHEM 441A, B; (all with a "C" or better); consent of instructor. (Undergraduates register in BIOL 477; graduates register in BIOL 577.) Intensive study of the theory and techniques involved in the isolation, amplification, and analysis of genes, genomes, transcripts, and proteins. Includes identification and isolation of genes by hybridization or complementation, analysis of gene expression, and detailed study of how DNAs, RNAs, and proteins are characterized. Data-mining (generating hypotheses concerning the structure or function of a gene or protein by identifying similar sequences in better characterized model organisms), the use of homologs for experimental design and/or function analysis, the use of computers in experimental design, the current use of microarrays, and the future use of nanotechnology are also explored. (Lecture 3 hrs.) Traditional grading only

#### 480./580. Seminars (1) F,S

Prerequisites: BIOL 211A,B with grade of "C" or better, consent of instructor. (Undergraduates register in BIOL 480; graduates register in BIOL 580.) Weekly meetings at which professional biologists present the results of their research. Requires participation in the organization and the critical evaluation of these presentations. May not be repeated for credit towards any single degree. (Seminar 1 hr.)

#### 490./590. Special Topics in Biology (1-3)

Prerequisites: BIOL 211A, B, with grade of "C" or better, consent of instructor. (Undergraduates register in BIOL 490; graduates register in BIOL 590.) Topics from selected areas of biology. Course content will vary from section to section. May be repeated for a maximum of six units with different topics. Topics may be announced in the *Schedule of Classes*. Traditional grading only. (Lecture 1-3 hrs.)

#### 490L./590L. Special Topics Laboratory in Biology (1-2)

Prerequisites: BIOL 211A, B, with grade of "C" or better, consent of instructor. (Undergraduates register in BIOL 490L; graduates register in BIOL 590L.) Topics from selected areas of biology. Course content will vary from section to section. May be repeated for a maximum of four units with different topics. Topics may be announced in the *Schedule of Classes*. Traditional grading only. (Laboratory 3 or 6 hrs.) A course fee may be required.

#### 495. Instruction in Laboratory Teaching (1-2) F,S

Prerequisites: Consent of lecture instructor, a "B" or better in the course in which the student elects to do BIOL 495 (another course with laboratory may be substituted with consent of instructor), and an overall GPA of at least 2.75. Individual instruction in the organization and techniques of teaching a biology laboratory. May be repeated for a letter grade and degree credit to a maximum of two units for any single degree or option. Any units beyond the two taken for a letter grade in BIOL 495 or MICR 495 or any combination of the two will be taken credit/no credit. (Conference 1 hr., laboratory 3 hrs. per unit.) Same course as MICR 495. Course may be repeated to a maximum of 2 units.

---

## Biology Courses (BIOL)

---

### 496. Undergraduate Directed Research (1-3) F,S

Prerequisites: BIOL 211A, B, with grade of "C" or better; consent of instructor. Research in a specific topic in the biological sciences to be approved and directed by a faculty member in the Department of Biological Sciences. May be repeated for a letter grade and degree credit to a maximum of three units for any single degree or option. Any units beyond the three taken for a letter grade in BIOL 496 or MICR 496, or any combination of the two, will be taken credit/no credit. Not available to graduate students. (Conference 1 hr., laboratory 3 hrs. per unit.) Same course as MICR 496.

### 498H. Senior Thesis – Honors (3)

Prerequisites: At least one unit of BIOL 496 and consent of instructor. Planning, preparation, completion, and oral presentation of a written thesis based on a research project in the biological sciences begun in BIOL/MICR 496. Not available to graduate students. Traditional grading only.

## Graduate Division

### 513./413. Marine Zooplankton (4) S, even years

Prerequisites: BIOL 353. (Undergraduates register in BIOL 413; graduates register in BIOL 513.) Diversity, natural history, taxonomy, and identification of marine zooplankton, including ichthyoplankton. Emphasis on fauna of the California coast. (Lecture 2 hrs., laboratory and field 6 hrs.)

### 514./414. Marine Ornithology (3) F

Prerequisites: BIOL 153, either BIOL 350 or 353. (Undergraduates enroll in BIOL 414; graduates enroll in BIOL 514.) Designed to familiarize marine biology students with the role of birds in the marine environment. Topics include ecology, distribution, behavior, and identification of marine birds. Library report, independent field project, and attendance on field trips required. (Lecture 1 hr., laboratory and field 6 hrs.) Course fee may be required.

### 517./417. Biology of Marine Benthic Invertebrates (3) S, odd years

Prerequisites: BIOL 353. (Undergraduates register in BIOL 417; graduates register in BIOL 517.) Topics include benthic community structure and function, benthic-pelagic coupling, animal sediment relationships, animal interactions, and marine pollution ecology. Laboratory emphasis will be on identification of local forms. (Lecture 2 hrs., laboratory and field 3 hrs.)

### 520./420. Advanced Ichthyology (3) S

Prerequisites: BIOL 260, 350, 370, and 419. (Undergraduates enroll in BIOL 420; graduates enroll in BIOL 520.) Advanced aspects of distribution, systematics, physiology, adaptation, and life history of fishes; emphasis on state-of-art field/laboratory techniques and contemporary concepts. (Lecture 2 hrs., laboratory and field 3 hrs.; weekend field trips may be required.) A course fee may be required.

### 528./428. Biology of the Giant Kelp (3) S

Prerequisites: BIOL 353, 425, or 439 with a grade of "C" or better. (Undergraduates register in BIOL 428; graduates register in BIOL 528.) A study of the physiology, reproductive biology, anatomy, taxonomy, and ecology of the ecologically and economically important kelp genus *Macrocystis*. Traditional grading only for Majors/Minors. (Lecture 3 hrs.)

### 533./433. Developmental Biology (3)

Prerequisites: BIOL 370; CHEM 320A,B. (Undergraduates register in BIOL 433; graduates register in BIOL 533.) Presentation of current topics and experimental approaches in cell differentiation and development with emphasis on examination of these processes at the molecular level. Topics include gametogenesis, fertilization, differential gene expression, and role of oncogenes in development. (Lecture/discussion 3 hrs.)

### 540./440. Advanced Molecular Cell Biology (3) F

Prerequisites: BIOL 340 and either BIOL 370 or CHEM 441B, each with a grade of "C" or better. (Undergraduates register in BIOL 440; graduates register in BIOL 540.) In depth discussion of cellu-

lar processes and their regulation. Topics may include intracellular targeting and transport of macromolecules, cell cycle control, and oncogenesis. The course includes critical discussion of primary journal articles on pertinent topics. Traditional grading only for majors/minors. (Lecture 3 hrs.)

### 542./442. Neurophysiology (3) F

Prerequisites: PHYS 100A,B; BIOL 342, 345. (Undergraduates register in BIOL 442; graduates register in BIOL 542.) Study of the mechanisms by which excitable cells function and of the sensory, motor, and integrative systems in which they participate. Representative examples will be selected from vertebrate and invertebrate phyla. Not open to students with a "C" or better in A/P 442/542. Traditional grading only. (Lecture 3 hrs.)

### 543./443. Endocrinology (3) S

Prerequisites: BIOL 340 or CHEM 441B; CHEM 320A or 327; and one of BIOL 341, 342, 345, 445, 448, 545, 548, CHEM 441A, or 448. (Undergraduates enroll in BIOL 443; graduates enroll in BIOL 543.) Role of the endocrines in vertebrate and invertebrate adjustment to changes in the internal and external environment. (Lecture 3 hrs.)

### 545./445. Metabolic Regulation (3) F

Prerequisites: CHEM 441B or BIOL 443/543. (Undergraduates register in BIOL 445; graduates register in BIOL 545.) Study of molecular mechanisms by which intermediary metabolism is regulated in various mammalian tissues with emphasis on mechanisms of hormone action and their role in the regulation of some key enzymes of carbohydrate, fat, and protein metabolism. Not open to students with a "C" or better in A/P 445/545. Traditional grading only. (Lecture 3 hrs.)

### 546./446. Respiratory and Renal Physiology (3) F

Prerequisites: BIOL 342 or 345; PHYS 100A,B. (Undergraduates register in BIOL 446; graduates register in BIOL 546.) Functions of and interactions between the respiratory and renal systems of mammals. Not open to students with a "C" or better in A/P 446/546. Traditional grading only. (Lecture 3 hrs.)

### 547./447. Molecular Plant Physiology (3) S

Prerequisites: BIOL 340, 370, both with grade of "C" or better. (Undergraduates enroll in BIOL 447; graduates enroll in BIOL 547.) Current molecular approaches to classical topics including plant hormones, photosynthesis, resistance to plant pathogens, adaptation of plants to environmental stress, and development of plants. (Lecture 3 hrs.)

### 548./448. Cell and Molecular Neurobiology (3) S

Prerequisites: BIOL 340 or CHEM 441B and one of BIOL 341, 342, or 345. (Undergraduates enroll in BIOL 448; graduates enroll in BIOL 548.) Study of the molecular, cellular, and developmental principles that underlie the functioning of the nervous system in the control of physiological and behavioral processes. Focus on mechanisms of electrical signaling and principles of synaptic biochemistry, development, and plasticity. (Lecture 3 hrs.)

### 550./450. Plant Ecology (3)

Prerequisites: BIOL 260, 350. Recommended: BIOL 427, 447. (Undergraduates register in BIOL 450; graduates register in BIOL 549.) Relationship of plants to their environment and principles of plant distribution. (Lecture 2 hrs., laboratory and field 3 hrs.) A course fee may be required. Traditional grading only.

### 551./451. Wetlands and Mangrove Ecology (3) S, even years

Prerequisites: BIOL 260, 350. (Undergraduates register in BIOL 451; graduates register in BIOL 551.) Concepts of wetlands and mangrove ecology in relation to the general ecological processes that shape different types of wetland ecosystems. Physical and biogeochemical conditions, biological characteristics, specific players, and their interactions. Descriptions of specific coastal and inland wetland ecosystems: geomorphology, geochemistry, ecosystem structure, and function, and models. Included will be wetland management goals and concepts, and current approaches and practices in the US and the world. Lecture time may be used for field trips, two of which will extend beyond standard lecture time. (Lecture 3 hrs.)

### 552./452. Behavioral Ecology (3) S

Prerequisites: BIOL 312 or 350 or 351. Undergraduates register in BIOL 452; graduates register in BIOL 552.) Detailed study of how

behavior contributes to reproductive success and survival. Emphasis given to theoretical background, ecological setting, and evolutionary consequences of behavior, including both empirical and experimental studies. (Lecture/discussion 3 hrs.)

**554./454. Research in Tropical Marine Ecology (2) S, even years**

Prerequisites: BIOL 260, either 350 or 353, and 313 or 413 or 419 or 425. (Undergraduates register in BIOL 454; graduates register in BIOL 554.) Field and laboratory studies, lectures, and individual research on tropical marine biological problems. Designed to engage students in experimental research, including: recognizing a problem, designing and carrying out a project, statistical data analysis, and oral and written report presentation. An eight-day field trip to Hawaii will be required during the spring recess at student expense. Enrollment is limited. (Lecture 1 hr., 8 day field trip.)

**555./455. Ecology of Marine Communities (3) F**

Prerequisites: BIOL 260, 350, 353. (Undergraduates register in BIOL 455; graduates register in BIOL 555.) Discussion of field studies on ecological principles related to marine communities. Includes an individual field research project and two class projects. (Lecture 2 hrs., field 3 hrs.)

**556./456. Population Ecology (3)**

Prerequisites: BIOL 350, MATH 119B or 123. (Undergraduates register in BIOL 456; graduates register in BIOL 556.) Analysis of characteristics of animal and plant populations including population growth and regulation, competition, predation, parasitism, and other intraspecific and interspecific interactions; population fluctuations; spatial patterns. (Lecture 3 hrs.)

**557./457. Field Methods in Ecology (3) S, odd years**

Prerequisites: BIOL 260, 350. (Undergraduates register in BIOL 457; graduates register in BIOL 557.) Design of field research projects, collection and analysis of data, writing and presentation of reports. Emphasis on field sampling techniques. Five weekend field trips required. (Lecture 2 hrs., laboratory and field 3 hrs.)

**558./458. Ecology of Marine Plankton (4) S, odd years**

Prerequisites: BIOL 260, 353; CHEM 327 or 320A,B; MATH 119A or 122. (Undergraduates register in BIOL 458; graduates register in BIOL 558.) Physiological ecology of marine phytoplankton and zooplankton as a basis for study of structure, dynamics, and modeling of plankton communities. (Lecture 3 hrs., laboratory and field 3 hrs.) Course fee may be required.

**563./463. Computer Modelling in Biology (4) F**

Prerequisites: BIOL 260, 350. (Undergraduates register in BIOL 463; graduates register in BIOL 563.) History, modelling theory, different modelling approaches, theoretical, empirical, and quantitative modelling. Laboratory will use modelling software and focus on model construction and quantitative simulation, possibly of student's own research project. Applicable to ecology, microbiology, physiology, environmental sciences, etc. (Lecture 3 hrs., laboratory 3 hrs.) Course fee may be required.

**565./465. Experimental Design and Regression Analysis (4) F, even years**

Prerequisites: BIOL 260; MATH 119B or 123; six units of upper division biological science or consent of instructor. (Undergraduates register in BIOL 465; graduates register in BIOL 565.) Techniques in experimental design and data analysis applied to problems in biology. Topics include analysis of variance and covariance, bivariate and multiple regression, experimental design, bootstrapping and randomization tests, and nonparametric statistics. Laboratory experience in analyzing biological data with computerized statistical packages. Traditional grading only. (Lecture 3 hrs., laboratory 3 hrs.)

**567./467. Multivariate Data Analysis (4) F, odd years**

Prerequisites: BIOL 260; MATH 119B or 123; six units of upper division biological science or consent of instructor. (Undergraduates register in BIOL 467; graduates register in BIOL 567.) Multivariate data analysis techniques applied to biological data. Applied matrix algebra as needed for analyzing and understanding multivariate analysis methods. Topics covered include principal components analysis, factor analysis, discriminant analysis,

cluster analysis as well as modern phylogenetic analysis techniques. Laboratory experience in analyzing multivariate biological data with computerized statistical packages. (Lecture 3 hrs., laboratory 3 hrs.) Traditional grading only for majors and minors.

**573./473. Molecular Genetics (3) S**

Prerequisites: BIOL 370. CHEM 327 or 320A,B. (Undergraduates register in BIOL 473; graduates register in BIOL 573.) Nature, replication, regulation and mode of action of the genetic material. (Lecture 3 hrs.)

**577./477. Biotechnology: Applications of Molecular Techniques and Bioinformatics (3)**

Prerequisites: BIOL 370; CHEM 441A, B; (all with a "C" or better); consent of instructor. (Undergraduates register in BIOL 477; graduates register in BIOL 577.) Intensive study of the theory and techniques involved in the isolation, amplification, and analysis of genes, genomes, transcripts, and proteins. Includes identification and isolation of genes by hybridization or complementation, analysis of gene expression, and detailed study of how DNAs, RNAs, and proteins are characterized. Data-mining (generating hypotheses concerning the structure or function of a gene or protein by identifying similar sequences in better characterized model organisms), the use of homologs for experimental design and/or function analysis, the use of computers in experimental design, the current use of microarrays, and the future use of nanotechnology are also explored. (Lecture 3 hrs.) Traditional grading only.

**580./480. Seminars (1) F,S**

Prerequisites: Consent of instructor. (Undergraduates register in BIOL 480; graduates register in BIOL 580.) Weekly meetings at which professional biologists present the results of their research. Requires participation in the organization and the critical evaluation of these presentations. May not be repeated for credit towards any single degree. (Seminar 1 hr.)

**590./490. Special Topics in Biology (1-3)**

Prerequisites: BIOL 211A, B, with grade of "C" or better, consent of instructor. (Undergraduates register in BIOL 490; graduates register in BIOL 590.) Topics from selected areas of biology. Course content will vary from section to section. May be repeated for a maximum of six units with different topics. Topics may be announced in the *Schedule of Classes*. Traditional grading only. (Lecture 1-3 hrs.)

**590L./490L. Special Topics Laboratory in Biology (1-2)**

Prerequisites: BIOL 211A, B, with grade of "C" or better, consent of instructor. (Undergraduates register in BIOL 490L; graduates register in BIOL 590L.) Topics from selected areas of biology. Course content will vary from section to section. May be repeated for a maximum of four units with different topics. Topics may be announced in the *Schedule of Classes*. Traditional grading only. (Laboratory 3 or 6 hrs.)

**661. Seminar in Biology (1)**

Critical evaluation of the primary literature of this field, including oral and/or written presentation of critiques. Course may be repeated to a maximum of 3 units with different topics. (Seminar 1 hr.)

**663. Seminar in Genetics and Development (1)**

Critical evaluation of the primary literature of this field, including oral and/or written presentation of critiques. Course may be repeated to a maximum of 3 units with different topics. (Seminar 1 hr.)

**664. Seminar in Marine Biology (1)**

Critical evaluation of the primary literature of this field, including oral and/or written presentation of critiques. Course may be repeated to a maximum of 3 units with different topics. (Seminar 1 hr.)

**665. Seminar in Terrestrial Zoology (1)**

Critical evaluation of the primary literature of this field, including oral and/or written presentation of critiques. Course may be repeated to a maximum of 3 units with different topics. (Seminar 1 hr.)

**666. Seminar in Physiology (1)**

Critical evaluation of the primary literature of this field, including oral and/or written presentation of critiques. May be repeated for credit, with different topics, for a maximum of three units towards any single degree. (Seminar 1 hr.)

---

## Biology Courses (BIOL)

---

### 696. Research Methods (3) F

Prerequisites: Approved thesis proposal and graduate program on file in the departmental graduate office, and permission of instructor. Development of the ancillary skills related to biological research, from initiation to presentation and publication. Topics include experimental design, computer-aided information retrieval, technical writing, data presentation, computer design of graphics, preparation of figures and slides, photography. The course culminates with formal oral, poster, and written presentations of research in progress. (Lecture 2 hrs., laboratory 3 hrs.) Course fee may be required.

### 697. Directed Research (1-3) F,S

Prerequisite: Consent of instructor. Research on a specific topic to be approved and directed by a faculty member in the biological sciences. A written report will be required. May be repeated for a letter grade and degree credit to a maximum of three units. Any units beyond the three taken for a letter grade in BIOL 697 or MICR 697 or any combination of the two must be taken credit/no credit.

### 698. Thesis (1-6) F,S

Prerequisites: Advancement to Candidacy for the Master of Science in Biology, consent of the chair of the thesis committee and the departmental graduate advisor. Planning, preparation, writing, defense, oral presentation, and completion of a research thesis in the biological sciences.

---

## Microbiology Courses (MICR)

---

Students pursuing a major and/or a minor in this Department may receive unit credit for courses marked with the symbol '##' as a general elective but may not apply the units toward the specific or elective requirements for any degree or option in this Department. Majors in this Department may, however, take, for general education purposes, interdisciplinary courses offered by this department. All other courses in this Department are open to majors and minors but by traditional grading only. Courses with an asterisk may be used in graduate programs.

### Lower Division

#### 101. ## Introduction to Human Disease (3) F,S

Prerequisites: Completion of or concurrent enrollment in a course that fulfills the A.1 GE requirement. Introduction to the study of human disease including moral/ethical and economic issues. (Lecture 3 hrs.)

#### 200. General Microbiology for Health Professionals (4) F,S

Prerequisites: CHEM 100 or 111A or 202 and completion of GE Foundation requirements. General microbiology for those planning careers in nursing, health care and education, and foods and nutrition. Introduction to the microorganisms, including structure, function, metabolism, growth, genetics, diversity and applied aspects, with special emphasis on their roles in human health. Not open for majors in the biological sciences. (Lecture 2 hrs., laboratory 6 hrs.) Course fee may be required.

#### 211. General Microbiology (5) F,S

Prerequisites: BIOL 211A with a grade of "C" or better, CHEM 111B. Introduction to the biology of the microorganisms, including structure, function, metabolism, growth, genetics, diversity, host-parasite relationships and applied aspects. (Lecture 3 hrs., laboratory 6 hrs.) Course fee may be required. Traditional grading only.

### Upper Division

#### 300I. ## Human Immunology: In Self-Defense (3)

Prerequisites: Completion of GE Foundation requirements, one or more Explorations courses, and upper-division standing; one laboratory course in a life science. Introductory psychology and a laboratory course in a physical science recommended. Introduction to

the mechanisms and cells responsible for protecting the human body from disease. Normal functions of the immune system, diseases involving the immune system, and psychological, endocrine and age factors affecting the immune system will be included. Impact of immunology on organ transplantation, immunotherapy and biotechnology will be discussed. Not applicable for credit towards the major in Microbiology. Traditional grading only. (Lecture 3 hrs.)

#### 303.## Public Health and Pollution (3)

Survey of public health and ecological problems in the community, control of communicable diseases; air, water and soil contamination. Recommended for non-majors interested in ecology and pollution control. Traditional grading only. (Lecture 3 hrs.)

#### 320. Bacterial Pathogenesis (5) F,S

Prerequisites: MICR 211; CHEM 327 or 320A (may be taken concurrently). The first of a two-semester sequence (MICR 320/322) in medical microbiology designed for microbiology majors. Pathogenic bacteria of humans and animals; emphasis on bacterial ultra-structure, epidemiology, mechanisms of pathogenesis, host defense mechanisms, and antibiotic therapy; isolation and identification of microorganisms by morphological and cultural characteristics. Traditional grading only. (Lecture 3 hrs., laboratory 6 hrs.) A course fee may be required.

#### 322. Mycology/Parasitology (5) F,S

Prerequisites: BIOL 211B; MICR 320. The second of a two-semester sequence (MICR 320/322) in medical microbiology designed for microbiology majors. Survey of parasitic protozoa, helminths, and fungi of humans; emphasis on identification of fresh and preserved specimens, pathogenesis, host-parasite interactions, epidemiology, prevention, and control. Traditional grading only. (Lecture 3 hrs., laboratory 6 hrs.) A course fee may be required.

#### 323. Hematology (4) F

Prerequisites: MICR 211; BIOL 211B. Physiology and pathology of blood; preparation of blood for counts, hemoglobin determination, and related procedures. (Lecture 3 hrs., laboratory 3 hrs.) Course fee may be required.

#### \*429 Epidemiology of Infectious Diseases (3)

Prerequisites: BIOL 260; MICR 320, 322. Principles of epidemiology and their application to health; fundamentals of biomedical statistics; basic factors in classic epidemiological studies and the prevention and control of infectious diseases. (Lecture 3 hrs.)

#### \*430. Immunology (3) F,S

Prerequisites: BIOL 340 and either CHEM 320B or 327. Microbiology majors must enroll concurrently in MICR 430L. Introduction to cellular and molecular components of the immune system and normal functions of these components. Physical, chemical, and biological properties of antigens and antibodies and the role of the immune system in immune deficiencies, tolerance, transplantation, tumors, autoimmunity, and hypersensitivities. (Lecture 3 hrs.) Not open to students with a "C" or better in MICR 330.

#### \*430L. Immunology Laboratory (2) F,S

Prerequisite: BIOL 340; MICR 320. Corequisite: MICR 430. Qualitative and quantitative *in vitro* and *in vivo* analyses of cellular and humoral immunity including selected clinically diagnostic immunoassays. Not available for credit to students completing MICR 330 prior to Spring, 1996. Not open to students with a "C" or better in MICR 331. (Laboratory 6 hrs.) Course fee may be required.

#### 432./532. Immunohematology (2)

Prerequisites: A final grade of "B" or better in MICR 323 and 430 or consent of instructor required. (Undergraduates register in MICR 432; graduate students register in MICR 532.) Physical and biochemical characteristics of human erythrocytes. Detailed study of isoantigens and isoantibodies associated with human red blood cells; their detection, mechanisms of cellular destruction and relationship to hematopoietic disease. (Lecture 2 hrs.) MICR 432 will be accepted toward fulfillment of the 6 units of upper division microbiology electives.

#### \*450. Microbial Genetics (2) F,S

Prerequisites: MICR 211; CHEM 441B. Biochemical and cytological bases of microbial genetics; nature, replication, modification and transfer of genetic material. (Lecture 2 hrs.)

**\*451. Microbial Genetics Laboratory (2) F**

Prerequisites: MICR 450 (may be taken concurrently), consent of instructor. Laboratory study of microbial genetics. Genetic engineering techniques. (Laboratory 6 hrs.) Course fee may be required.

**\*452. Virology (3) F,S**

Prerequisites: CHEM 441A, B and either MICR 320 or BIOL 340. Virology at a molecular level including virus replication and the molecular basis for viral pathogenesis; a survey of human and animal viral diseases. Current trends for prevention and treatment of viral diseases. (Lecture 3 hrs.)

**\*471. Bacterial Physiology (3) S**

Prerequisites: MICR 320, CHEM 441A, consent of instructor. Cellular physiology at the molecular level as related to bacterial growth, reproduction, nutrition, metabolism and ecology. (Lecture 3 hrs.)

**\*473. Food and Industrial Microbiology (3) F**

Prerequisites: MICR 200 OR 211; CHEM 441A OR 448. Role of microorganisms in food and other industrial processes; emphasis on bacteria, yeasts and molds. (Lecture 2 hrs., laboratory 3 hrs.) Course fee may be required.

**480./580. Seminars in Molecular and Cellular Biology and Microbiology (1)**

Prerequisites: BIOL 211A, B, with a grade of "C" or better, consent of instructor. (Undergraduates register in MICR 480; graduates register in MICR 580.) Weekly meetings at which professional biologists present the results of their research. Requires participation in the organization and critical evaluation of these presentations. May not be repeated for credit towards any single degree. (Seminar 1 hr.)

**490./590. Special Topics in Microbiology (1-3)**

Prerequisites: MICR 211 with grade of "C" or better, consent of instructor. (Undergraduates register in MICR 490; graduates register in MICR 590.) Topics from selected areas of microbiology. Course content will vary from section to section. Course may be repeated for a maximum of 6 units with different topics. Topics may be announced in the *Schedule of Classes*. Traditional grading only. (Lecture 1-3 hrs.)

**490L./590L. Special Topics Laboratory in Microbiology (1-2)**

Prerequisites: MICR 211 with grade of "C" or better, consent of instructor. (Undergraduates register in MICR 490L; graduates register in MICR 590L.) Topics from selected areas of microbiology. Course content will vary from section to section. Course may be repeated for a maximum of 4 units with different topics. Topics may be announced in the *Schedule of Classes*. Traditional grading only. (Laboratory 3 or 6 hrs.) A course fee may be required.

**495. Instruction in Laboratory Teaching (1-2) F,S**

Prerequisites: Consent of lecture instructor, a "B" or better in the course in which the student elects to do MICR 495 (another course with laboratory may be substituted with consent of instructor), and an overall GPA of at least 2.75. Individual instruction in the organization and techniques of teaching a microbiology laboratory. May be repeated for a letter grade and degree credit to a maximum of two units for any single degree or option. Any units beyond the two taken for a letter grade in BIOL 495 or MICR 495 or any combination of the two will be taken credit/no credit. (Conference 1 hr., laboratory 3 hrs. per unit.) Same course as BIOL 495. Course may be repeated to a maximum of 2 units.

**496. Undergraduate Directed Research (1-3) F,S**

Prerequisites: BIOL 211A, B, MICR 211, all with grade of "C" or better; consent of instructor. Research in a specific topic in the biological sciences to be approved and directed by a faculty member in the Department of Biological Sciences. May be repeated for a letter grade and degree credit to a maximum of three units for any single degree or option. Any units beyond the three taken for a letter grade in BIOL 496 or MICR 496, or any combination of the two, will be taken credit/no credit. Not available to graduate students. (Conference 1 hr., laboratory 3 hrs. per unit.) Same course as BIOL 496.

## Graduate Division

**532./432. Immunohematology (2)**

Prerequisites: A final grade of "B" or better in MICR 323 and 430 or consent of instructor required. (Undergraduates register in MICR 432; graduate students register in MICR 532.) Physical and biochemical characteristics of human erythrocytes. Detailed study of isoantigens and isoantibodies associated with human red blood cells; their detection, mechanisms of cellular destruction and relationship to hematopoietic disease. (Lecture 2 hrs.) MICR 432 will be accepted toward fulfillment of the 6 units of upper division microbiology electives.

**550. Experimental Microbiology (3)**

Detailed study of selected topics in microbiology, with emphasis on laboratory approaches to the problem.

**B. Immunochemistry (3) S**

Prerequisites: CHEM 441B, MICR 430, and consent of instructor. The chemical bases of the immune response as well as the use of precise, sensitive and specific immunochemical methods for the characterization and study of various biology processes and materials. A course fee may be required. Traditional grading only.

**580./480. Seminars in Molecular and Cellular Biology and Microbiology (1)**

Prerequisites: BIOL 211A,B, with a grade of "C" or better, consent of instructor. (Undergraduates register in MICR 480; graduates register in MICR 580.) Weekly meetings at which professional biologists present the results of their research. Requires participation in the organization and critical evaluation of these presentations. May not be repeated for credit towards any single degree. (Seminar 1 hr.)

**590./490. Special Topics in Microbiology (1-3)**

Prerequisites: MICR 211 with grade of "C" or better, consent of instructor. (Undergraduates register in MICR 490; graduates register in MICR 590.) Topics from selected areas of microbiology. Course content will vary from section to section. Course may be repeated for a maximum of 6 units with different topics. Topics may be announced in the *Schedule of Classes*. Traditional grading only. (Lecture 1-3 hrs.)

**590L./490L. Special Topics Laboratory in Microbiology (1-2)**

Prerequisites: MICR 211 with grade of "C" or better, consent of instructor. (Undergraduates register in MICR 490L; graduates register in MICR 590L.) Topics from selected areas of microbiology. Course content will vary from section to section. Course may be repeated for a maximum of 4 units with different topics. Topics may be announced in the *Schedule of Classes*. Traditional grading only. (Laboratory 3 or 6 hrs.) A course fee may be required.

**695. Seminar on Selected Topics in Microbiology (2)**

Prerequisites: Consent of instructor. Course may be repeated once in a different topic area. (Seminar 2 hrs.) Traditional grading only.

**A. Cellular and Molecular Mechanisms**

**B. Food Microbiology**

**C. Immunology**

**F. Medical Microbiology**

**G. Microbial Ecology**

**J. Microbial Genetics**

**K. Microbial Physiology**

**N. Parasitology**

**P. Virology**

**697. Directed Research (1-3) F,S**

Prerequisite: Consent of instructor. Research on a specific topic to be approved and directed by a faculty member in the biological sciences. A written report will be required. May be repeated for a letter grade and degree credit to a maximum of three units. Any units beyond the three taken for a letter grade in BIOL 697 or MICR 697 or any combination of the two must be taken credit/no credit.

**698. Thesis (1-6) F,S**

Prerequisites: Advancement to Candidacy for the Master of Science in Microbiology, consent of the chair of the thesis committee and the departmental graduate advisor. Planning, preparation, writing, defense, oral presentation, and completion of a research thesis in the biological sciences.

Students desiring information should contact the department office for referral or the faculty advisor. The Black curriculum is designed to provide general knowledge of Black culture and history and to offer training for professional work in the Black community. It offers programs to serve (1) business; (2) those entering a variety of occupations including government, teaching, school administration, foreign service, law, urban planning, communications, journalism, psychology, recreation, speech and linguistics; (3) majors in other fields, such as history, literature, creative writing, anthropology, who wish to include additional dimensions to their course of study.

## Bachelor of Arts in Black Studies (code 2-8425) (120 units)

### Requirements

A minimum of 45 units is required in the major in Black Studies.

Lower Division: B/ST 110 and 9 additional units selected one course from each of the following:

Group A) B/ST 120, 121, 200

Group B) B/ST 140, 155, 160

Group C) B/ST 170A, 170B, 210

Upper Division: B/ST 330, 332, 335, 495, plus 15 units with one or more courses selected from each of the following:

Group A) B/ST 310, 325, 331, 337, 410

Group B) 340, 343, 346, 353, 363

Group C) 304, 345, 380, 475

Social Science Requirement: Six upper division units from American Indian Studies, American Studies, Anthropology, Asian and Asian American Studies, Chicano and Latino Studies, Computer Studies, Economics, Geography, History, Human Development, Political Science, Psychology, Social Work, Sociology, Women's Studies. These units are in addition to those used to fulfill the requirements of any General Education category.

## Certificate in Black Studies (code 1-8425)

Students majoring in other departments of the University but interested in Black Studies may at the same time pursue a program leading to a Certificate in Black Studies. Courses used to meet the certificate requirement may, where applicable, also be used simultaneously to meet General Education requirements or the major and minor requirements of cooperating departments.

### Requirements

1. A bachelor's degree with a major in a traditional discipline. (Certificate can be completed prior to or simultaneously with completion of the B.A. requirement.)
2. A minimum of 24 units of which at least 12 must be in upper-division courses, with two or more courses selected from each of the following:

Group A: B/ST 110, 210, 325, 330, 332, 335, 370, 420

Group B: B/ST 160, 340, 343, 346, 363, 450

Group C: B/ST 120, 121, 200, 201, 304, 337, 400, 410

## Minor in Black Studies (code 0-8425)

### Requirements

A minimum of 24 units of which at least 12 units must be in upper-division courses, with two or more courses selected from each of the following:

Group A: B/ST 110, 210, 325, 330, 332, 335, 370, 420

Group B: B/ST 160, 340, 343, 346, 363, 450

Group C: B/ST 120, 121, 200, 201, 304, 337, 400, 410

The Minor in Black Studies is open to any non-Black Studies majors.

## Courses (B/ST)

### Lower Division

#### 001. Language Skills (3)

Not open to students with credit in Language Skills 170A. Focuses on intensive development of grammatical skills and expository writing. Primarily for Black students. Credit/no credit only. Counts as part of student's course load but does not carry graduation credit.

#### 100. Language Skills (3)

Prerequisite: A recorded total of 151 above on the English Placement test (EPT), or credit in B/ST 001 or its equivalent. The course focuses on organizational methods and techniques for writing compositional and expository prose, advanced grammar and some critical reading techniques for term papers. It is designed for first year students, especially Bidialectal and ESL students.

#### 110. Introduction to Black Studies (3)

Prerequisite/corequisite: One GE Foundation course. Survey of major themes, issues and concepts of Black Studies. Emphasis given to major schools of thought, research materials and sources, and major scholars of the discipline. Special attention will also be given to the historical evolution and academic rationale for Black Studies.

#### 115. Introduction to African Politics (3)

A review of recent developments or changes in the government, parties, political ideologies, politics, leadership and political processes in selected African countries.

#### 120. Afro-American History to 1865 (3)

Prerequisite/corequisite: One GE Foundation course. Survey course which presents a description and analysis of African civilizations shortly before the coming of the European. It will also focus on the impact, significance and role played by the African from the colonial period through the American Revolution, to the Civil War.

#### 121. Afro-American History 1865-Present (3)

Prerequisites/corequisite: One GE Foundation course. Impact of social, economic and political change on Blacks in America after the Reconstruction period. Black migration, education, cultural development and business enterprises will be examined.

#### 140. Introduction to African-American Literature (3)

Prerequisite/corequisite: One GE Foundation course. A study of selected or representative literature of the African-American writer. Special attention will be given to style, content, methodology and thematic approach.

#### 150. Critical Thinking and the Minority Experience (3)

Provides analytical tools for applying critical thinking to the development of academic skills and to the analysis of social issues. Includes instruction in inductive and deductive reasoning; analyzing types of meaning (denotative vs. connotative) and their relevance to social issues, e.g., racism, sexism, elitism; distinguishing fact from opinion.

#### 155. Afro-American Music (3)

Prerequisite or corequisite: One GE Foundation course. Nontechnical survey of African-American music. Some attention given to the impact of social movements on the musician and the music produced. Gospel, jazz and well-known derivatives will be highlighted.

#### 160. Introduction to Black Arts (3)

Prerequisite or corequisite: One GE Foundation course. A presentation of prevailing themes, methodology, concepts and meaning in African art. Equal time is given to contemporary art and art of recent history. The work of some African artists highlighted as appropriate.

#### 167. Exploitation of the Black Athlete (3)

Study of the socio-dynamics of amateur, professional and collegiate sports activity in the United States as it relates to the African-American community. Case studies of well-known Black athletes will also be presented.

#### 170A. Elementary Swahili (4)

Prerequisites/Corequisite: Any Foundation Course. For those who are just beginning the study of Swahili. Introduction to grammar, syntax comprehension, reading, writing and conversation in the language. Traditional grading only.

#### 170B. Elementary Swahili (4)

Prerequisites: B/ST 170A or equivalent competency. This course is a continuation of B/ST 170A. Advanced grammar, syntax, comprehension, reading, writing and conversation in the language. Traditional grading only.

#### 180. Black Language in America (3)

Historical, phonological, and sociological aspects of the language of Black Americans; traces Ebonics from early use in trading off west coast of Africa; linguistic development from lingua franca to pidgin and creole; linguistic symbols, terms, and analysis applied to Black English; difference versus deficit theories of learning.

#### 190. Racism in the American Military (3)

Concise review of alternate policies of exclusion, restriction, segregation and conscription of the African-American in armed services.

#### 200. Ancient African Civilizations (3)

Prerequisite: Completion of GE Foundation requirements. A study of ancient African empires and kingdoms. Topics include migration, education, family structure, political institutions, cultural transmission and commercial trade.

#### 201. History of Slavery (3)

Prerequisite: Completion of GE Foundation requirements. Historical examination of the trans-Atlantic slave trade and its impact on Africa and the Western Hemisphere, with major emphasis on the nature of slavery in Africa, Greece, Italy, the Caribbean, the Middle East, South America, and the United States. Slavery's aftermath on social integration in America and other countries.

#### 205. Modern Black South African Literature (3)

Prerequisite: Completion of GE Foundation requirements. The course studies South African literature written in English by Africans since the mid-1800's to present. "Black" is used broadly to include South Africans of mixed parentage whom the racial laws and policies of the white minority government had isolated from other Africans, classifying them as "Coloreds." Traditional grading only.

#### 210. African American Community (3)

Will examine the social structure and changes in the community life of African-Americans as compared to other ethnic groups. It will also explore and analyze how institutional and stratification patterns, demographic changes, social movements, and community organizational programs affect Blacks. Several case studies will be presented to underscore the strength and resiliency of the Black community.

#### 215. U.S. Diversity and the Ethnic Experience (3)

Prerequisites: The course is open only to Integrated Teacher Education Program students. This course is a survey of four major ethnic groups (American Indians, African American, Latino American, and Asian American) in American society from the colonial era to the present. Special attention is given to the formation and transformation of each ethnic group and their individual and collective roles in the development of the United States. Same course as AIS 215, ASAM 215, CHLS 215. The departments take turns offering the course in the Fall semester. Traditional grading only.

**240. African and African American Folklore and Culture (3)**  
An examination and presentation of material on folklore, folk tales, and folk heroes in the Black community. Some attention also given to Black mythology.

### Upper Division

General Education Category A must be completed prior to taking any upper division course except upper division language courses where students meet formal prerequisites and/or competency equivalent for advanced study.

**304. The African Colonial Experience (3)**

A critical examination of colonialism as a world phenomenon focusing on colonialism in Africa as the paradigm and point of departure for a specific and comparative understanding.

**310. Black Male and Female Relationships (3)**

A comprehensive study of male/female patterns of interaction in the Black community. Some attention given to institutional impact, role changes and projected images of relationships.

**319. The Ethnic Experience in the U.S. (3)**

An examination of the dynamics of the development of our multicultural society, emphasizing study of the four distinct ethnic strands of American society (Asian American, Black American, Mexican American, and American Indian) and their role in the maintenance of cultural diversity in the United States. Same course as AIS 319, ASAM 319, CHLS 319, W/ST 319. (Lecture/Discussion.)

**325. Psychology of Minorities (3)**

Prerequisite: B/ST 110 or PSY 100. This course develops the concept of a minority psychology. Using comparative techniques and guest lecturers, this course introduces the student to common psychological consequences in the experience of being a minority person.

**330. Politics of the Black Community (3)**

Prerequisite: B/ST 210. Study of the perspectives, styles, problems and dynamics of political activity in the Black community.

**331. Black Juvenile (3)**

Prerequisite: B/ST 210 or consent of instructor. Critical approach to the problem of juvenile justice in the black community.

**332. Civil Rights and the Law (3)**

Designed to provide the student with a basic understanding of the interaction between the American legal system and civil rights of Blacks, other minorities, women, and the general citizenry.

**335. Economic Development in the Black Community (3)**

Prerequisite: B/ST 121. Development of business and banking institutions in the Black community. Some attention given to the impact of external factors on development.

**337. Cultures of the Pan-African Peoples (3)**

Prerequisite: B/ST 200 or consent of instructor. Presentation of a cultural map of African people emphasizing geography, migration and cultural similarities.

**340. Research Topics in African- American Literature (3)**

Prerequisite: B/ST 140. In-depth presentation and analysis of selected issues and dominant personalities in African-American literature; personality and issue to be matched.

**343. African and Caribbean Literature (3)**

General survey of contemporary African, Caribbean, and Afro-American literature within the context of the political, social, economic, and cultural movements. Comparison of Pan-African literature and Western Literature.

**345. Politics of Black Power (3)**

Systematic analysis of the Black Power movement of the 1960's, including contributions and contradictions of major organizations, leadership, and ideologies.

**346. Black Theatre (3)**

Introductory survey course of Black Theatre as an historic medium, profoundly revealing in its humanistic, literary, social and cultural heritage as it relates to Africa, America and the Caribbean.

**353. Black Religion (3)**

The nature and use of religion in Africa and their manifestations in historical and contemporary African-American communities.

**363. History of African Art (3)**

Survey of African art from antiquity to the present, with principal focus on sub-Saharan art.

**370. Black Images in the Mass Media (3)**

Prerequisite: B/ST 121. Examination of the portrayal of Black people in the mass media, past and present. Primary emphasis on newspapers, radio, films and television.

**380. African Political Theory (3)**

Prerequisite: B/ST 115. Examination of theorists and theories which shape African political philosophy. Special attention given to the concepts of Pan-Africanism, African socialism, Negritude and revolution.

**381. Blacks and Party Politics (3)**

An analysis of Black participation in the U.S. political party process. Special features will include information on Black participation in the Republican, Democratic and third-party organizations. Material and discussion on independent Black political party efforts will also be included.

**400. Afro-American Social Thought (3)**

Survey of African-American intellectual history, with emphasis on social theories and opposing schools of intellectual thought.

**404. Contemporary Issues of the Third World Nations (3)**

Study of the shifting power and international status of the Black world. Geo-politics and the diplomatic policies of selected countries will be highlighted.

**410. The Black Family (3)**

Prerequisite: B/ST 325 or consent of instructor. A systematic study and a social historical analysis of the structure and function of the Black family in the United States. There will also be a sociological/theoretical analysis and review of the models of family units, roles and interpersonal relations in society. The theoretical perspective will provide a framework to compare and contrast the Black family and other family units in America.

**415. International Black Children's Literature (3)**

International Black Children's Literature: A survey of Literature suitable for Black children by authors from Africa, the United States, and the Caribbean.

**420. Black Children in Public Schools (3)**

Theories, concepts and principles relating to the intellectual growth, development and learning of Black children.

**423. Problems in Psychological Assessment of African Americans (3)**

Prerequisites: candidates must have a working knowledge of statistical concepts, upper-division standing in Black Studies or permission of instructor. Examination of issues, problems, and practices in the assessment of African American children.

**424. Advocacy for Black Child Mental Health (3)**

Prerequisites: Upper-division standing or consent of instructor. Examination of the essential mental health needs of Afro-American children, their legal and educational rights as well as preventive and remedial measures. Throughout the course, emphasis will be placed on many faces of advocacy the building of a system of delivery of human services at neighborhood levels for vital preventive and remedial needs.

**430. African Political Leadership in the Twentieth Century (3)**

The course is a critical examination of Africa's search in the 20th century for national liberation and cohesion, collectively built institutions, movement/parties, and ideological self-definition. A comparative study of traditional African leadership concepts and/or styles, and modern forms that have evolved since contact with the Europeans, will be undertaken. Focus will be on selected countries and major African leaders in Lusophone, Francophone, and Anglophone Africa. The content of the leaders' ideas will be analyzed; socio-politico-economic forces giving rise to those ideas will be studied.

**432. Advanced Studies in Afro-American Music (3)**

Prerequisite: B/ST 155. Study of the development, evolution and essence of Afro-American music in the 20th century from perspectives of Afro-American social and cultural history.

**450. Black Writers Workshop (3)**

Prerequisite: ENGL 100, B/ST 100, or equivalent. This course requires extensive writing in four major areas: poetry, drama, fiction and documentaries. It assumes that technical or grammatical problems of writing have been taken care of and focuses on themes which are Afro-centric.

**452. Ecology of Black Crime (3)**

Prerequisite: B/ST 210 or 332. Study of the interrelationships between the black criminal, the minority community and the criminal justice system.

**460. African Thought (3)**

Prerequisite: Background knowledge of Africa from history, political science, anthropology or sociology is highly recommended. Analysis of philosophical and religious systems of Africa from antiquity to present.

**475. Racism and Sexism: An Analytical Approach (3)**

Prerequisite: B/ST 332. An examination of institutions and a study of legislation which has been written and implemented in consequence of racism and sexism in American society. Social theories used to support concepts of racism and sexism will also be presented.

**490. Special Topics in Black Studies (3)**

Prerequisite: Consent of instructor. Topics of current interest in black studies selected for intensive development. May be repeated for a maximum of six units. Topics will be announced in the *Schedule of Classes*.

**495. Research Methods in Black Studies (3)**

Prerequisites: B/ST 110, SOC 255 or equivalent statistics course, and six units upper-division work in Black Studies. This course is for the Department major. It will present information on the use of scientific methods in Black Studies, research theory, research design, sampling, measurement and science techniques. It will also focus on instrument construction as well as test reliability and validity.

**498. Ancient Egyptian Ethical Thought (3)**

A critical study of ancient Egyptian ethical thought with due attention to the theological, literary and social-historical context in which it was developed and evolved. This will include a systematic examination of the major ethical texts of ancient Egypt: a) the Sebait (The Instructions); b) the Ikeru (The Declarations of Virtue); c) the Book of Khun-Anup; and d) the Declarations of Innocence in the Pert-em-Heru (The Book of Coming Forth By Day). Also, appropriate comparisons will be made between the theological, and general religious parallels of the ancient Egyptian tradition and the Jewish, Christian and Islamic traditions.

**499. Directed Studies (1-3)**

Prerequisite: Consent of instructor. Permits individual students to pursue topics of special research interest. May be repeated to a maximum of six units.

The College of Business Administration seeks to prepare its students for entry into successful careers in business. As each graduate pursues a successful career, it is anticipated that personal responsibility will be accepted for maintaining and enhancing the quality of the society in which business and the individual operate.

## *The College*

The College of Business Administration has five departments: Accountancy; Finance, Real Estate and Law; Human Resources Management and Management; Information Systems and Marketing. Each is responsible for administering one or more of the degree options.

## *Overview of Programs*

### Accreditation

The College of Business Administration offers undergraduate and graduate programs of study. Both programs are nationally accredited by the Association to Advance Collegiate Schools of Business - International (AACSB), 600 Emerson Road, Suite 300, St. Louis, MO 63141-6762, phone: (314) 872-8481, and may lead to completion of the following:

### Bachelor of Science in Business Administration

Specialization may be made in a choice of the following areas, hereafter referred to in this *Catalog* as Options:

Accountancy; Finance, Real Estate and Law; Human Resources Management; International Business; Management; Management Information Systems; Marketing; Operations Management. (See following pages for more information.)

Students who complete and formally declare two options may be regarded as having completed a double major, and appropriate notation can be made on the transcript.

### Minors in Business Administration

The College of Business Administration has developed minors available to any non-business student. Significant preparation for business employment may be developed through completion of an organized program from one of the following areas: Management Information Systems, Human Resources Management, Marketing, Entrepreneurship. (Refer to the section on Minors for more information.)

### Master of Business Administration

Specialization may be made in one of the following areas: Business Finance, Human Resources Management, Information Systems, Management, Marketing, Engineering Systems. (Refer to the following pages for more information.)

## *Student Services*

### Admission and Advising Information

The College of Business Administration maintains an advising and admissions office in CBA Room 105 for undergraduate students. There is an office for graduate students in CBA 363. Advisors are available in these offices throughout the semester to assist students with admission, registration, and degree requirement information. An undergraduate handbook is available in the campus copy center.

### ***The Mentoring Business Program (MBP)***

MBP is a support program within the College of Business Administration. Our focus is to assist students with their transition into college and into the business industry. Each student is paired with a mentor at each stage of their academic and professional development. Freshmen and sophomore students are mentored by upper division business students or faculty as they begin their educational journey at CSULB. Junior and senior students are connected with corporate professionals in business industry. This relationship assists our students with networking and internship opportunities as they prepare for their transition into their professional careers. The Mentoring Business Program also encourages students to become involved with a business student organization to assist them in meeting students and expanding their opportunities. We also provide business workshops, corporate tours and scholarships. For details regarding our application process, please call The Mentoring Business Program at (562) 985-2265.

### ***Financial Assistance***

Financial assistance is provided to business students through the University Financial Aid Office. That office administers funds made available through the federal and state governments and through certain private sources. Awards are made to students who demonstrate a need for assistance with educational expenses.

Selected scholarships and fellowships within the College of Business Administration are publicized. Consult the Director of Student Life and Development for information, CBA 210, (562) 985-8600.

### ***Achievement Awards***

Beta Gamma Sigma "Outstanding Student in Business" Applications are usually due April 1. The award is presented in early May at the annual Beta Gamma Sigma Installation and Banquet.

Outstanding Graduating Senior Applications are usually due March 1. The award is presented at the May commencement ceremony, and the recipient is also honored at an Alumni Association banquet in June.

The Wall Street Journal Award (Based on GPA) Applications from graduating seniors are usually due March 1. The award is presented at the May commencement ceremony.

### ***Student Organizations***

Numerous organizations are available for business students. They include: American Marketing Association, Beta Alpha Psi/Accounting Society, Human Resources Management Association (HRMA), Information Systems Students Association, The Society for the Advancement of Management, Beta Gamma Sigma, Black Business Students Association, Delta Sigma Pi, Hispanic Students Business Association, Long Beach Entrepreneur Society, Professional Women in Business, International Association of Students in Economics and Commerce (AIESEC), Financial Management Association, Operations Management Association and Pacific Rim.

The Associated Business Students Organization Council (ABSOC) is a facilitating and coordinating organization for business student organizations. ABSOC is composed of elected officers from each organization. Through these student organizations each year business students are provided opportunity to meet representatives of business and industry. Prominent executives are, in addition, invited to the campus for dialogue

with business students. ABSOC and the Associated Students co-sponsor the annual "Meet the Industries Night," a spring job fair which draws over 60 companies and several hundred students.

Beta Gamma Sigma: Beta Gamma Sigma, founded at the University of Wisconsin in 1907 as a business honor society, is the only honor society recognized by the AACSB - International. Membership is available to business students at California State University, Long Beach only because the College of Business Administration is accredited by AACSB.

Election to membership in Beta Gamma Sigma is the highest scholastic honor that a student in business administration can attain. To be eligible for membership at CSULB students must rank in the upper three percent of their junior class or the upper seven percent of their senior class, or rank in the upper ten percent of those receiving masters degrees in business administration.

The MBA Association is established to provide a mechanism to promote contact between members, potential employers and business people in the community through guest lecturers and other functions, to promote the flow of communication between individuals pursuing an MBA, and to establish a forum for discussion of issues affecting MBA students at CSULB. Every MBA student is eligible for membership and is encouraged to take an active role to enhance personal and association growth.

### ***Computer and Information Technology***

Students in the degree program develop basic understandings and competencies relating to information processing, the application of computers in business and government, management information systems concepts, and computer programming. A computer laboratory facility is maintained within the College to provide computer access for business students.

### ***General Policies and Regulations***

Specific University and College requirements are detailed in various sections of this *Catalog*. Every student must develop complete familiarity and understanding of the regulations and requirements by which successful completion of a program will be determined. (Also see pertinent section regarding University General Regulations and Procedures).

### ***Competitive Admissions***

Effective Fall 2002, the Chancellor has designated the undergraduate Business program "impacted." A student admitted to the University in or after this term must meet the following requirements for "Competitive Admissions" before he/she can take upper-division (300/400) CBA courses:

- Apply during the first month of the filing period (November 2001 for Fall 2002 and August 2002 for Spring 2003)
- Completion of 56 units of baccalaureate credit (84 quarter units of baccalaureate credit)
- 3.0 or better cumulative grade-point average (Students with an overall grade-point average of 2.4 - 2.9 will be admitted on a "space available basis.")
- Computer Proficiency as defined on the following pages of this catalog.

### ***Special Enrollment Status***

Enrollment through Open University (University College and Extension Services) is allowed only on a space available basis. Space availability is not based on the number of unoccupied chairs in a classroom. Instead, it is determined by the type of

course and teaching method. The student must otherwise be qualified.

Disqualified students are not permitted to enroll in any course in the College of Business Administration.

### **Concurrent Enrollment/Transfer of Credit**

Undergraduate students who wish to take course work in a community college or other university or college to meet CSULB College of Business Administration or General Education requirements must carefully observe University and College requirements. As noted below under Requirements for the Bachelor of Science in Business Administration, some courses must be taken at CSULB and cannot be transferred from another school. Business courses taken at other schools may be transferred for credit at CSULB if a grade of "C" or better was earned. No upper division credit will be given for lower division courses. For this purpose there are two categories of schools. Courses taken at a business school which is AACSB accredited are generally acceptable for major transfer credit at CSULB. Courses taken at non-accredited schools must have prior approval by the dean's designee.

### **Grading Policy**

Business majors and minors may not exercise a Credit/No-Credit grading option for courses required by the College of Business Administration in their program. No course taken for Credit/No-Credit grading will be accepted to fulfill a Business requirement. Enrollment in a business course as an auditor is not permitted.

## **UNDERGRADUATE PROGRAMS**

### **Bachelor of Science in Business Administration**

#### **Requirements**

In order to graduate with a business degree from CSULB, a student must complete a minimum of 30 units here. At least 24 of these units must be upper division. Twelve of the upper division units must be in business.

A minimum of 124 units will be required for all options in business with the exception of Accountancy, which requires a minimum of 128 units. At least 12 upper division units in business, including MGMT 425 must be completed at CSULB. At least 50% of all units applied toward the degree must be taken outside of the College of Business Administration. Included in this 50% are statistics and economics courses.

#### **1. Lower Division Courses:**

ACCT 201; ECON 100, 101; FIN 220; MATH 114, 115, and PHIL 160 or 170 (Accountancy majors must take PHIL 160. MIS majors must take PHIL 170.

#### **2. All business and pre-business majors shall demonstrate computer literacy and competency prior to taking junior and senior level courses. This requires:**

A. A passing score (70%) on the Computer Proficiency Examination (CPE)

B. Completion with Credit (Cr) in I S 233 or "C" or better grade" in a transfer equivalent course OR

C. Completion of I S 240 or "C" or better grade" in a transfer equivalent course.

#### **3. Upper Division Courses (33-34 units):**

A. CBA 300, ACCT 310 (Accountancy majors must take ACCT 320 instead of ACCT 310), ECON 333; FIN 300, 320;

IS 300, 301, 310; HRM 360; MGMT 300; MKTG 300.

B. The capstone course, MGMT 425. This course must be taken at CSULB as a senior and after the upper division prerequisite core courses have been completed (ACCT 310 or 320, FIN 300; MGMT 300; MKTG 300).

C. Completion of at least one option (15-24 units); select from the options listed below.

4. Elective units to make up the total 124 units required for the degree (128 for Accountancy majors). Each student is encouraged to select electives for expansion of knowledge and intellectual interests as well as for preparation for business employment.

## **ACCOUNTANCY DEPARTMENT**

### **Option in Accountancy (code 3-2705) (128 units)**

The Accountancy curriculum is designed to meet the general education goals of those entering the accounting profession. It satisfies the requirements established by the American Institute of Certified Public Accountants and may be used to meet educational requirements for the California CPA Certificate. The accounting program develops an understanding of an organization's management information system on a broad base of general education and business administration courses. The program is carefully planned and rigorous, building the conceptual, analytical, and communication skills necessary to succeed in the accounting profession. It prepares students for careers in all areas of accounting, including the necessary qualifications for professional examinations such as the C.P.A., C.M.A., C.I.A.

#### **Requirements**

ACCT 300A-B, 400, 451, 470, 480, and one course from ANTH, PSY, or SOC.

## **INFORMATION SYSTEMS DEPARTMENT**

The Information Systems Department administers an option in Management Information Systems.

### **Option in Management Information Systems (code 3-2725) (124 units)**

This option prepares students for careers in Management Information Systems in business, education, and government. Emphasis is on systems management, information process and analysis, and new uses of information technology. Fundamentals of business information systems, computer hardware, system and application software, telecommunications, electronic business, and decision support systems are included to provide the student a solid foundation in this rapidly changing field. The curriculum is based on both the DPMA and ACM models.

Students in the Management Information Systems Option may choose one of the following three tracks within the Option: Applications Development, Business Telecommunications, or Electronic Commerce.

#### **Applications Development Track**

#### **Requirements**

A minimum of 18 units, of which 15 must include: IS 340, 355, 380, 385, 485; and one course to be selected from: IS 320, IS 464, IS 470, IS 480.

## Business Telecommunications Track

### Requirements

A minimum of 18 units, of which 15 units must include: IS 340, 355, 380, 455, 485; and one course to be selected from: IS 320, 456, 464, 470.

## Electronic Commerce Track

### Requirements

A minimum of 18 units, of which 15 must include: IS 343, 355, 380, 445, 484; and one course to be selected from: IS 320, 446, 456, 483, MKTG 437.

## FINANCE, REAL ESTATE AND LAW DEPARTMENT

### Option in Finance, Real Estate, and Law (code 3-2710) (124 units)

The objective of the finance curricula is to prepare students for a successful career in business with an understanding of the financial decision making process and its impact within the overall framework of the business enterprise. The finance curricula offers education in the management techniques and regulations applicable to financial management and investments. The curriculum draws on fundamental knowledge of statistics, computer logic and economics to develop advanced financial concepts. It explores the historical and current roles of various financial institutions and regulatory authorities; details the basic principles and techniques for valuing financial instruments on the basis of fundamentals and/or historical pricing trends; explores the methods of managing risk; and examines financial principles that govern international trade. The finance major may direct the concentration toward financial management or investments.

The financial management concentration provides an opportunity for the student to gain an understanding of the role of finance in the corporate environment. An understanding of investments at both the corporate and personal level is the objective of the investments concentration. Within these concentrations students are provided with an opportunity to gain an understanding of the role of the various aspects of law in a business context, including the development of a comprehension of business ethics.

#### Financial Management Concentration Requirements

FIN 330 or 340, 350, 400 and 6 units to be chosen from: FIN 360, 425, 450, 490.

#### Investments Concentration Requirements

FIN 330 or 340, 350, 400 and 6 units to be chosen from: FIN 424, 450, 480, 490, 499A and 499B.

FIN 499A and FIN 499B (Applied Portfolio Management) can satisfy the six units specific for the Investments Concentration. These courses must be taken in two consecutive semesters. Due to the limited number of available openings, applicants will be chosen according to their GPA, interest level, and personal interviews. Contact the Finance, Real Estate and Law department for further qualification requirements.

### Option in International Business (code 3-2703) (124 units)

For requirements please see the International Business section of this catalog.

## MANAGEMENT AND HUMAN RESOURCES MANAGEMENT DEPARTMENT

The Management/Human Resources Management Department offers options in Human Resources Management, Management and Operations Management.

### Option in Management (code 3-2745) (124 units)

The objective of the management curricula is to prepare students for a successful career in management of the business enterprise. Attention is given to the need to create and maintain a desirable internal environment. Interface of that environment with the external environment in relation to success of the enterprise is considered. Philosophical basis for the practice of management, ethical considerations and human values are stressed. The student's exposure to theory and concepts leads to the acquiring of knowledge and skills to assume first professional positions and progress through middle and upper management careers.

#### Requirements

MGMT 426 and 12 units selected from MGMT 326, 405, 410, 411, 412, 413, 414, 421, 430, 454, 455.

### Option in Operations Management (code 3-2758) (124 units)

The objective of the operations management curriculum is to prepare and stimulate student competence in the conceptual, systematic and analytical tools prerequisite for entry level and advanced positions in goods-producing and service-oriented industries. Emphasis is placed on the systems approach which stresses the concepts, techniques and policies essential for the economical and effective design, operations and control of manpower, facilities, materials, capital and informational inputs of organizations. Students are introduced to productivity tools such as Total Quality Control, Manufacturing Resource Planning, Just-In-Time Techniques. Simulation and Animation of Production Operations, Optimized Production Techniques, Kanban Systems, Japanese Productivity Techniques. Decision Support Systems.

#### Requirements

15 units to be taken as follows:

1. 6 units from MGMT 410, 411
2. 3 to 9 units from MGMT 412, 413, 414
3. Up to 6 units from MGMT 426, 430, 454, 455.

### Option in Human Resources Management (code 3-2740) (124 units)

The Human Resources Management Option is designed not only for those who have an interest in working in the functional areas of HRM, but also for everyone who wants to become a member of management at any level in either the private or the public sector of the economy. The faculty integrate the theoretical with the practical to produce graduates with highly marketable skills. The major objectives of this option are (1) to provide students with theoretical foundations for understanding how employees are motivated to accomplish organizational goals, (2) to develop the practical skills necessary for employment in positions designed to attract, encourage, develop and retain human resources, (3) to develop an understanding of the theoretical and practical approaches to

human resources management, (4) to develop aspiring leaders with a strong sense of ethics and social responsibility and an awareness of how societal changes necessitate organizational change. The curriculum emphasizes critical thinking, creative problem solving, and personal development to enhance managers' performance in a dynamic, changing, culturally diverse and globally expanding work environment.

#### Requirements

1. HRM 361
2. 12 units selected from HRM 440, 445, 446, 458, 460, 462, 463, 465

## MARKETING DEPARTMENT

### Option in Marketing (code 3-2750) (124 units)

The discipline of Marketing, which is fundamental to all business enterprises, is largely a social process. The justification of any enterprise, be it involved in service or in the production or delivery of goods, is that it meets the needs of individuals or segments of society. The function of marketing is to determine those needs, to provide the most effective means of informing actual and potential customers of the availability of the services and goods they require, and to deliver such services and goods.

#### Requirements

1. Nine units selected from MKTG 310, 330, 410, 420, 430, 437, 465, 480, 492
2. MKTG 470
3. MKTG 490
4. MKTG 494

## CERTIFICATES IN BUSINESS

### Certificate of Honors in Business (code 1-2005)

California State University, Long Beach, offers the opportunity for a selected group of outstanding students to earn an Honors in Business Certificate.

This enriched, more demanding program gives students an opportunity to participate in discussions with noted individuals in the community. In addition, students carry out a research project and prepare a research thesis. It is thus intended to be intellectually rewarding, and to provide valuable experience that can enhance the students' future careers.

#### Admission

Admission to the program is limited to 40 students a year. Applicants will be selected for their promise as interesting, creative students, not simply on the basis of grades.

#### Requirements for Admission

1. A minimum 3.5 cumulative GPA in all college and university courses and a minimum of 3.5 GPA in the major. Students with a GPA of 3.0-3.49 may be admitted if they are nominated by two tenured faculty members of the College of Business Administration. A maximum of 10% of the students in the program will be admitted by nomination.
2. A one-page essay describing applicant and his/her goals.

Applications should be addressed to the Marketing Department, College of Business Administration, CSULB, 1250 Bellflower Blvd., Long Beach, CA 90840.

Applications are due no later than May 10 for the Fall semester, or December 10 for the Spring semester. Essays will be judged by a committee of professors. Applicants will be notified of admission decisions within 10 days.

#### Requirements

1. Completion of the requirements for the major, with a minimum overall GPA of 3.5 and a minimum GPA in the major of 3.5.
2. Completion of the Honors in Business Colloquium.

This class normally meets TTH 1100-1230, and requires participation and an original paper rather than formal examinations. The colloquium brings together scholars and addresses some broad field of study, usually led by a different lecturer at each meeting. Each semester, one or more distinguished guest lecturer is invited to the University to participate.

3. Completion of 3 units of Independent Study, leading to the required Honors Thesis; and completion of an Honors Thesis (3 units).
4. Completion of an additional 6 units of Business courses for which Honors credit has been designated, including Management 425, the capstone course for the major.
5. Completion of the 3-unit capstone colloquium USP 499, Synthesis, as partial fulfillment of the University's requirement of 6 upper-division interdisciplinary units.
6. Students who have failed to enroll in courses for Honors credit for two consecutive semesters will normally be withdrawn from the program.

### Certificate in Transportation (code 1-2030)

#### Requirements

1. A bachelor of science degree in Business Administration which may be completed concurrently with the certificate requirements;
2. A minimum of 15 units of transportation and transportation-related course work at California State University, Long Beach to be selected with the approval of the Program Director.
3. A grade of "C" or higher will be required for every course;
4. The certificate program does not permit the use of the Credit/No Credit option.

## MINORS IN BUSINESS

The College of Business Administration offers several minors for non-Business majors.

### Minor in Human Resources Management (code 0-2740)

1. HRM 360, 361, and
2. 12 units selected from HRM 440, 445, 446, 458, 460, 462, 463, 465.

### Minor in Entrepreneurship (code 0-2746)

The Minor in Entrepreneurship provides students with the opportunity to learn how to start businesses and other kinds of organizations.

For example, in engineering and the natural sciences, many students ultimately gain access to technologies that serve as the basis for technology-intensive new ventures. Students in

the arts (industrial design, dance, theater, film, art, creative writing, etc.) may find that existing outlets for their work are insufficient, and they choose to establish new and innovative ones (community theaters, dance companies, alternative forms of art galleries, etc.). Students in health and human services frequently have the opportunity to start new organizations that deliver various kinds of services, many of them not-for-profit. Graduates of several of the social science programs routinely establish their own practices.

The Minor in Entrepreneurship is designed to reduce systematic startup risk and increase the rates of success for those who choose to start new businesses and other kinds of organizations.

### Requirements

The program consists of eighteen units including: MGMT 300, 421.

And four courses from the following: ACCT 201; CBA 300; FIN 220, 300, 340, 495; HRM 360; IS 240, 355, 380, 445, 455, 483, 484; MKTG 300, 330, 492, 310, 410, 430, 465, 480, 490, 495, MGMT495 (two topics).

### Minor in Management Information Systems (code 0-2725)

Eighteen units including:

1. IS 300
2. 15 units chosen from IS 320, 340, 343, 355, 380, 385, 445, 446, 455, 456, 464, 470, 480, 483, 484, and 485.

### Minor in Marketing (code 0-2750)

Eighteen units including: MKTG 300: 15 units selected from MKTG 310, 330, 420, 430, 437, 465, 470, 480, 490, 492, 495 or CBA 300 as approved by the Marketing Department. It is the student's responsibility to adhere to all prerequisite requirements listed below:

1. IS 310 prerequisite for MKTG 470;
2. MKTG 480 is a prerequisite for MKTG 481;
3. MKTG 300 is a prerequisite for MKTG 420, 430, 465, 470, 480, 481, 490 and 492.

## GRADUATE PROGRAMS

The College of Business Administration offers graduate study leading to the Master of Business Administration (MBA). The degree offered by the College of Business Administration is accredited by the AACSB - International.

The MBA is designed to serve the community by providing graduate business education to persons who show promise of leadership and success in business or related fields. For this reason, the faculty of the College of Business Administration has established rigorous standards of admission and completion for the program.

### Admission to Graduate Study

In addition to admission by the University Office of Admissions and Records, an applicant for graduate study in business must apply to and be admitted by the College of Business Administration. It is the responsibility of the student to purchase a current *CSULB Catalog* which sets forth the policies of the University and the College of Business Administration graduate program.

### Admission Procedures

1. Students interested in applying to the MBA program at CSULB should request a University application and an MBA Application Packet from the MBA office. Students must complete and submit both applications in order to be considered for admission into the graduate program in business. Students should submit Part A and B of the University Common Admissions form to the University Admissions Office. Students applying for the MBA should mark "other masters" as the degree objective, and 05011 as the major code. Students should submit the MBA application with two letters of recommendation directly to the MBA office.
2. Two complete sets of official transcripts of all college work attempted are required. One set must be sent to:  
California State University, Long Beach, Office of Admissions and Records, 1250 Bellflower Blvd., Long Beach, CA 90840  
The other set of official transcripts must be sent directly to the MBA Office at the following address:  
California State University, Long Beach, College of Business Administration, MBA Office, 1250 Bellflower Blvd., Long Beach, CA 90840
3. Graduate Management Admission Test (GMAT) scores must be forwarded directly from the Educational Testing Service to the College of Business Administration MBA Office. Test scores over 5 years old will not be considered.
4. Foreign students should first contact the Center for International Education on campus for special deadlines. Foreign students are required to take the TOEFL test and achieve a score of 570, in addition to the steps above required of all applicants to the MBA program.

Deadlines for International applications are:

November for Fall Semester

August for Spring Semester

All transcripts, the MBA Application Packet, GMAT score and TOEFL score (if applicable), must be filed in the MBA Office by:

October 30 for Spring Semester

May 30 for Fall Semester (except for GMAT scores which must be received by June 15)

Because of high demand for admission to the MBA program, it is advisable that students make their application to the program early. No action can be taken on applications until all required documents are received. Application materials submitted after these dates will be reviewed and students will be admitted as time and space permits.

### Criteria

Admission will be granted to students showing high promise of success in post-baccalaureate business study. Each applicant's potential for graduate management education is evaluated on the basis of six major criteria:

1. Past Academic Record, as reflected in undergraduate GPA.
2. Graduate Management Admission Test (GMAT)
3. Managerial Experience: demonstration of increasing levels of responsibility.
4. Communication: ability to clearly identify the applicant's leadership potential, educational goals and academic strengths.

5. Two Letters of Recommendation

6. Essays

Upon completion of evaluation by the College of Business Administration MBA office, the student is notified by mail of acceptance or rejection. If accepted, the letter includes an evaluation listing prerequisites met by the student in previous course work and those still requiring completion. Course work over ten years old at the time of acceptance will not be considered for satisfaction of the First Year Core.

### **Enrollment**

Admission to the University as a graduate student does not constitute admission to graduate study in the College of Business Administration. MBA programs require additional admissions criteria.

### **Admission to Graduate Courses**

Only students who have been admitted to the MBA program may take graduate courses in Business Administration. The only exception is that students who have been admitted to other Master's programs at CSULB may take select graduate courses in Business Administration to meet the requirements for their programs, with the permission of their major advisor and the MBA office.

Enrollment in graduate courses through the Open University will normally be permitted only for students in an AACSB accredited graduate program elsewhere with a letter of permission from the Associate Dean/Dean of the student's home university.

### **Continuous Enrollment**

Once a student is accepted and enrolled in the MBA Program, he/she is expected to attend classes both semesters of the academic year. (Fall and Spring semesters are considered the regular semesters of the academic year; Summer attendance is optional.) Registration and completion of at least one course each semester satisfies the Continuous Enrollment requirement.

If a student is unable to satisfy the Continuous Enrollment requirement, he/she must complete the Educational Leave of Absence procedures detailed below. Continuous Enrollment status will only be preserved if the student's absence from a regular semester has been processed and approved through the Educational Leave of Absence procedures.

Students failing to maintain Continuous Enrollment status will be administratively removed from the MBA Program. Registration privileges will be revoked. Students planning to continue in the MBA Program who have been administratively removed due to the violation of the Continuous Enrollment condition will be required to re-apply to the MBA Program.

### **Leave of Absence**

Any MBA student in good academic standing may request an Educational Leave. Students requesting an Educational Leave must complete an Educational Leave Form, in advance, including an explanation of their reasons for seeking the leave and a statement of when they intend to resume academic work. The completed form is to be submitted for approval to the MBA Office and the University Admission & Records Office in accordance with University Policy.

The minimum initial leave will be one full semester; the maximum will be one calendar year. A student may request, in writing, in advance, an extension of leave. Under no

circumstances will the total number of approved educational leaves exceed two, nor will the duration of approved educational leaves extend beyond two calendar years.

Students returning from an approved one semester educational leave are not required to submit an application form. Students on leave longer than one semester must apply for re-admission to the university. Students returning from an absence for which an educational leave was appropriate but not approved in advance must complete the entire MBA admission process.

An Educational Leave of Absence, if properly requested and processed, allows a student to satisfy the Continuous Enrollment requirement and therefore does not affect their good standing status. Students on an approved education leave of absence will continue to receive registration information and access to the VRR system until the authorized leave time expires.

Graduate students who plan to enroll for credit at another institution of higher education during the leave period must obtain prior approval for the transfer of course credit to the student's program for the department chair in question and the MBA Director.

The period of an educational leave is counted in the calculation of elapsed time under the regulations governing the seven year maximum period for completion of the MBA degree requirements.

For the period of an educational leave the student's rights under the "Election of Regulation" rule are preserved, maintaining the right of the student to elect regulations as if he or she had maintained continuous attendance. See the *CSULB Catalog*, General Rules and Procedures section, for a complete explanation of the Election of Regulation - "Catalog Rights".

An educational leave presupposes no expenditure of University resources or faculty and staff time in behalf of the student during the period of the leave. In addition, no computer facilities, no library privileges, and no student services are available to a student on educational leave.

### **Transfer Credit**

Assuming the Continuous Enrollment requirement has been satisfied, a maximum of six credits that closely complement the student's degree objectives may be applied toward the requirements for the MBA degree beyond the First Year Core under the following conditions:

1. the credits under consideration must be graduate credits
2. the course work must be taken at an AACSB accredited graduate program.
3. prior approval must be obtained from the MBA Director
4. prior approval must be obtained from the department chair of the course work being transferred.

The remaining units must be completed in courses at CSULB reserved exclusively for graduate students.

### **Scholastic Standards/Probation/Disqualification**

A student who fails to maintain a cumulative GPA of 3.0 or higher in all work completed as a graduate student at this University or in all transferred work applied to the program will be placed on academic probation. The semester in which the student's GPA falls below 3.0 is the First Probationary Semester.

A student on probation, who at the end of the Second Probationary Semester (or summer, if classes are taken) fails to

obtain a cumulative GPA of 3.0 or higher on all units attempted in post-baccalaureate work at CSULB, will be disqualified and removed from the graduate program. The student should note that the cumulative GPA is calculated by the University Admissions and Records Office and includes all upper division and graduate courses taken while enrolled in the graduate program.

A grade of "C" or better is required in any course taken to satisfy first or second year Core requirements. A grade of "B" or better is required in GBA 699. If either of these requirements is not met, a student must take the course a second time or withdraw from the program. A second failure to achieve the requirement grade will result in involuntary separation from the program. This requirement operates independently of the requirement for a cumulative GPA of 3.0 or better.

## Master of Business Administration Degree (code 7-2701)

The Master of Business Administration program develops competencies essential to functioning professionally in a complex and competitive business environment. The program prepares students for responsible administrative positions and provides the background essential for advancement in professional management careers. The Master of Business Administration degree encompasses a program of breadth which builds a wide range of competencies required for effective management while permitting students to specialize in a functional area.

The Master of Business Administration is normally a 48-unit program for the graduate without an undergraduate degree in Business.

### Requirements

The Master of Business Administration program requires completion of a minimum of 36 units of graduate course work as established and approved by the College of Business Administration MBA office. The MBA program must include:

I. First Year Core	0-12
II. Second Year Core	21
III. Advanced Study	9
IV. Capstone Course	3
V. Integrative	<u>4</u>
Total units	36-48

Students who have not had an economics course prior to entering the MBA program must complete an economics course as a condition to obtaining an MBA degree.

### I. First Year Core: Common Body of Knowledge

The masters degree presupposes mastery of a common body of knowledge. Students with a bachelor's degree in business from this University or from other AACSB accredited business schools within the last 10 years will have met much of the First Year Core requirements. Individual business Administration courses taken as an undergraduate student at another AACSB institution may also meet specific First Year Core requirements. Upon acceptance to the program, a student's transcripts are reviewed for completion of the necessary course work for mastery of the common body of knowledge. A grade of "C" or better is required to meet the criteria.

Waivers of First Year Core are based upon previous educational background at either a graduate or undergraduate level. Information on waivers may be obtained from the College of Business Administration, MBA Office. Students who have not met the entire common body of knowledge requirements prior to admission to the MBA Program will be required to enroll in the appropriate First Year Core courses. This core must be completed before enrollment in the Second Year Core: ACCT 500, FIN 520, MGMT 500, MKTG 500.

### II. Advancement to Candidacy

Students admitted with all First Year Core requirements completed must file an application for Advancement to Candidacy for the degree after completion of their first 6 units. Other students must file the application during the semester in which the First Year Core requirements are to be completed. Prior to advancement to candidacy, a student must:

1. Be accepted into the MBA Program.
2. Maintain an overall minimum 3.0 cumulative GPA, including work transferred from other institutions, and a minimum 3.0 GPA in all work completed at this University.
3. Complete all First Year Core Requirements, with no grade lower than "C".
4. Pass the Writing Proficiency Examination. (See next section)
5. Prepare an official student program in consultation with the MBA Office. This program must include the Second-Year Core in effect at the time of Advancement to Candidacy, the 9 unit program for the area of Advanced Study and the Capstone Course, GBA 699, for a total of 37 units.
6. File the application for Advancement to Candidacy with the MBA office for approval by the MBA Director.

### III. Second Year Core

Upon completion of the First Year Core, either by waiver or graduate course work, students move directly into the Second Year Core. (See section on Advancement to Candidacy). This core consists of seven courses (21 units) which provide the breadth requirements for the MBA degree at the advanced level: ACCT 610, FIN 600, HRM 652, IS 601, IS 602, MGMT 647, MKTG 661.

### IV. Advanced Study

#### General MBA

The General MBA is designed for students with an undergraduate business degree or any other student desiring a more broad-based MBA curriculum. The General MBA normally requires 9 units of graduate course work in three different areas within the College of Business Administration subject to approval by the MBA Office.

#### Specialization

The specializations require 9 units of graduate course work in one area, one second year course and three electives. Each specialization should be planned in consultation with the MBA Office. Specializations are available in the following areas:

#### Accountancy

Requirements: nine elective units to be selected from ACCT 620, 630, 640, 650, 660, 670, 680, 695, 697.

## Engineering Systems

The engineering systems specialization allows students with a strong engineering background to specialize within the MBA program in an area that may more closely match their career objectives. This specialization consists of graduate courses within the College of Engineering, subject to approval by the MBA Director.

### Finance

Requirements: Nine elective units to be selected from FIN 524, 525, 620, 630, 650, 690.

### Health Care Management

Requirements: HCA 502 and any two of the following: HCA 536, 537, 538, 550, 552.

### Human Resources Management

Requirements: Nine elective units to be selected from HRM 650, 654, 655, 657, 658, 697.

### Information Systems

Requirements: Nine elective units to be selected from IS 550, 564, 580, 584, 685.

### Management

Requirements: Nine elective units to be selected from MGMT 542, 543, 645, 646, 647, 697.

### Marketing

Requirements: Nine elective units to be selected from MKTG 610, 663, 665, 666, 668, 669, 695, 697.

Students may count 3 units of Directed Studies (697) toward the Advanced Study requirements. Elective courses designed to fulfill specialization requirements must be approved by the MBA Office through the completion and acceptance of the student's Advancement to Candidacy form.

## V. Capstone Course: GBA 699 Integrated Analysis

Integrated Analysis, GBA 699 is taken as the last or capstone course in the program. Students must plan to complete the Second Year Core before enrolling in GBA 699. This critical course is given during the Fall and Spring semesters. In this comprehensive analysis, the student will integrate the knowledge obtained in the functional areas. This capstone course serves in place of either comprehensive examination or thesis as the required evaluation of candidate competency. In lieu to completion of the required GBA 699, an MBA candidate may elect to complete a thesis for a minimum of four units credit.

Students must obtain a grade of "B" or better in GBA 699 in order to receive an MBA degree.

Application for acceptance into GBA 699 must be filed in the MBA Office before the end of the fourth week of instruction in the semester preceding enrollment in the course. Application forms and advisement relating to this important requirement are available in the MBA Office.

## VI. Time Limitation

All courses on the official student program must be completed within seven years of the commencement of the first class toward fulfillment of the Second Year Core requirement.

## VII. Writing Proficiency Examination

The Writing Proficiency Examination (WPE) is a unique requirement of this University. Satisfactory completion of the WPE is required before a student may Advance to Candidacy. Therefore, graduate students should register for the WPE in person when they first arrive on campus. CSULB will accept certain Graduation Writing Assessment Requirement (GWAR) Tests offered at other CSU campuses. The test must have been taken prior to initial enrollment at CSULB. The staff in Admissions and Records (BH 101) can clarify documentation required from each campus. Graduates must present the requirement documentation to the MBA Office as part of their application for Advancement to Candidacy. There are no exemptions to the requirement of an approved form of writing proficiency exam.

## Courses

### Undergraduate (CBA)

#### 130. Current Concepts of Business (3)

An overview of CBA options, including professional preparation and employment opportunities. Orientation to current CBA programs and requirements. Development of an understanding of contemporary business issues, including an introduction to major business functions. Strongly recommended for students interested in business careers.

### Graduate

#### 300. International Business (3)

An introduction to the nature, dimensions, and environment of international business. Emphasis on business functions, practices, and decisions as they are influenced by cultural, political, economic, social, and institutional factors in various parts of the world. Diffusion of information technology. Traditional grading only.

#### 493. Business Internship (1-3)

Prerequisites: Classified business major and Instructor consent. Qualifying students will be placed in career-related paid assignments in private or public agencies or businesses. An organized plan utilizing a series of seminars and learning agreements is required along with selected reading and writing assignments. A minimum of 120 hours paid experience per semester is required. (May be repeated for a maximum of six units.)

### Graduate (GBA)

#### 698. Thesis (2-4)

Prerequisite: GBA 601. Planning, preparation, and completion of a thesis in business administration.

#### 699. Integrated Analysis (3)

Prerequisites: Student shall have completed all 2nd year core classes. Classified MBA status in the last semester or within six units of completion of the 33-unit minimum graduate program and advanced to candidacy. A comprehensive course which serves as the required terminal examination for College of Business Administration graduate candidates. A project is required. A study of a wide range of business problems and formulation of solutions to them. The object of this course is to assess student skills in integrating knowledge from all functional areas of business and applying them to complex business problems arising out of changing technology, competitive market conditions, social changes and governmental actions. The methodology may include cases, business simulation, and team teaching. A grade of "B" or better is required for successful completion. Students must file application for entry into GBA 699 no later than the fourth week of instruction in the semester preceding the one in which GBA 699 will be taken. Application forms are available in the MBA Office.

View the CSU, Long Beach *Catalog* on-line at [www.csulb.edu](http://www.csulb.edu) by clicking on "Academics" and then "CSULB Catalog."

The Chemistry and Biochemistry Department Advisory Council, including persons prominent in the community, fosters communication between academic and industrial chemistry. It advises the department concerning the instructional program and informs the department of opportunities for interaction with the community.

### *Degree Programs*

The program in chemistry at the bachelor's degree level is planned to develop background in a specific science, to serve as preparation for graduate work in chemistry or biochemistry, and to provide a foundation for those students seeking careers in the chemical sciences, teaching, law, medicine, dentistry, pharmacy and other health-related professions, and in industrial and governmental scientific occupations. The B.S. degree in chemistry is certified by the American Chemical Society (American Chemical Society, Committee on Professional Training, 1155 Sixteenth St., NW, Washington, DC 20036, phone: 202-872-4589).

**Transfer Students:** A student who transfers to the University must take at least 16 units of upper division chemistry courses here. To receive credit towards the major for courses taken elsewhere in place of CHEM 320A,B and/or 371A,B and/or 377A,B, consent of the department chair is required. Satisfactory performance on appropriate proficiency examinations may also be required.

The Department of Chemistry and Biochemistry offers graduate study leading to research-based master of science degrees in chemistry and biochemistry. The candidate is urged to observe the general requirements stated in this *Catalog* as well as the specific departmental requirements stated here and, more fully, in the Graduate Studies Brochure of the department which is available upon request.

A limited number of teaching associate and graduate and research assistantships are available. Usually, these involve half-time work in the instructional program at the freshman and sophomore level or work in the laboratory. Application forms for these positions are available from the Graduate Advisors, Department of Chemistry and Biochemistry.

### *Facilitated Enrollment into Classes*

All entering students who declare a major in a degree program offered by this Department should participate in the College of Natural Sciences and Mathematics' Science Safari to Success (for first-time freshmen) or EONS (Enrollment and Orientation in the Natural Sciences and Mathematics for transfer students) Program. These programs are held in June and July for those starting in the fall semester and in January for those starting in the spring semester. Department advisors will be available to provide an overview of the students' chosen baccalaureate degree program, to assist with academic advisement, to provide information on the many career opportunities available, and to aid students in enrolling in classes. Contact the Student Access to Science Center (Faculty Office 5-109) or Department Office for additional information.

## Bachelor of Science in Chemistry (code 3-7661) (124 units)

The bachelor of science degree program is intended to provide a thorough background in chemistry for those planning to pursue careers as professional chemists or to do graduate study in chemistry or biochemistry. This program, when supplemented with study in other appropriate areas, can serve as preparation for admission to the health professional schools (medicine, dentistry, pharmacy, etc.). Each student should consult with a faculty advisor to plan his or her individual program.

Chemistry majors must achieve a grade of "C" or better in each chemistry course required for the major.

### Requirements

Lower Division: CHEM 111A, B, 251; courses to support the major to include PHYS 151, 152, 154, 155; MATH 122, 123, 224; and BIOL 211A.

Upper Division: CHEM 320A, B, 371A, B, 373, 420, 431, 451; ENGL 317; and an additional six units of upper division chemistry which must include at least one unit of CHEM 496. A maximum of three units from CHEM 495, 496, and 499 and CH E 330, 425, 430, or 475 may be used to fulfill this six unit requirement. One additional course in computer programming must be taken from CH E 210 or CECS 174.

B.S. candidates are encouraged to acquire competence in reading scientific German, French, Russian, Chinese or Japanese. Students are also advised to take one or more additional courses in mathematics, such as MATH 247, 364A, 370A, 380.

## Bachelor of Arts in Chemistry (code 2-7662) (120 units)

The bachelor of arts degree program in chemistry is intended to provide a background in chemistry, but not in the depth required for a bachelor of science degree. This program, when complemented with study in other areas, will serve as preparation for a career in chemical and related industries or secondary science education. The bachelor of arts program is also an appropriate preparation for medical, dental, law, and pharmacy schools. In order to take full advantage of the bachelor of arts program for various career objectives, adequate counseling by chemistry advisors is indispensable. Each student must confer with an advisor to set up his/her individually tailored program in chemistry and one or more complementary areas prior to beginning the course of study.

Chemistry majors must achieve a grade of "C" or better in each chemistry course required for the major.

### Requirements

Lower Division: CHEM 111A,B, 251; courses to support the major to include PHYS 100A,B or 151, 152; and MATH 122, 123.

Upper Division: CHEM 320A,B, 371A,B or 377A,B, 420, 451; ENGL 300 or 317. A minimum of 3 additional units to be chosen in consultation with an advisor must be taken from CHEM 373, 421, 431, 441A,B, 471, 496. Two additional units involving computer programming must be taken from NSCI 200. Other computer courses may be substituted for the above with the approval of the chemistry department chair.

Students must consult an advisor to select additional courses to meet the student's individual goals and interests.

## Bachelor of Science in Biochemistry (code 3-7658) (124 units)

The Bachelor of Science degree in biochemistry is intended to provide a rigorous background in chemistry and biochemistry for those planning for graduate study in biochemistry or other life sciences, or for careers in biochemical and related industries. This program is also an appropriate preparation for medicine, dentistry, pharmacy and clinical chemistry at the graduate level. Students must confer with an advisor to set up an appropriate program for their goals.

Biochemistry majors must achieve a grade of "C" or better in each chemistry and biochemistry course required for the major.

### Requirements

Lower Division: CHEM 111A, B, 251; courses to support the major to include BIOL 211A,B; MATH 122, 123; and PHYS 100A,B or 151, 152.

Upper Division: CHEM 320A,B, 371A or 377A, 371B or 377B (371A,B is recommended as preparation for graduate studies in biochemistry), 420, 441A,B, 443, BIOL 342 and 342L, BIOL 370 or MICR 450 and 451, ENGL 317, and 3 units of elective from CHEM 373, 421, 431, 451, BIOL 340, 445, 448, 473, MICR 452, 473. Computer programming requirement: NSCI 200. Other computer courses may be substituted for the above with the approval of the chemistry department chair.

## Degree Programs with Honors in Biochemistry or Chemistry

Students majoring in the B. S. in Biochemistry, B. S. in Chemistry, or B. A. in Chemistry who would like an enriched academic program including an intensive research experience may be eligible to graduate with Honors in the Major through the University Honors Program. Students may complete General Honors through the University Honors Program as well; in such cases the General Honors thesis requirement is met through Honors in the Major (see University Honors in this *Catalog*).

Chemistry majors should be aware that this program is designed for students with career goals in life science areas, and, as such, chemistry majors who wish to participate must take additional coursework in biology beyond the minimum required for a chemistry degree.

The requirements for Honors in the Major will also satisfy the requirements of a college-wide program, Honors in Biological Sciences, created with the support of a grant from the Howard Hughes Medical Institute. This grant provides opportunities for monetary support to students for completion of their research and thesis. While Honors in the Major requires junior or senior standing, the college-wide program offers an enriched curriculum beginning in the freshman year, including a freshman seminar (BIOL 110H), a critical thinking course designed for science majors, and an introduction to bioinformatics (BIOL 220H). Interested students should contact the Honors in Biological Sciences program director or the Student Access to Science Center.

### Requirements for Admission to Honors in the Major

1. Junior or senior standing with at least one year remaining before graduation.
2. Declared major of B. S. in Biochemistry, B. S. in Chemistry, or B. A. in Chemistry.
3. Submission of an application detailing interest in the program and willingness to commit to a year-long research experience.
4. Letter of recommendation from a CSULB faculty member familiar with the student's work.
5. Completion of BIOL 211A, B; CHEM 251, 320A, B at time of entry with grades of at least "C" in each course. Students may apply during the semester in which they expect to complete these courses.
6. GPA of at least 3.00 in all courses in the major and in all upper division courses in the major.

### Requirements for Graduation with Honors in the Major

1. GPA of at least 3.30 in all upper division courses in the major and in Honors courses.
2. Completion of all requirements for the B. S. in Biochemistry, B. S. in Chemistry, or B. A. in Chemistry.
3. Completion of BIOL/CHEM 466H, Research Design and Methods - Honors (3 units).
4. Completion of 3 units CHEM 496, Undergraduate Directed Research.
5. Completion of 3 units of CHEM 498H, Senior Thesis - Honors.
6. Presentation of research results in a public forum. This requirement may be met by presentation at a scientific conference or at a local venue; consult the Honors in the Major advisor for additional information

Substitutions to this program must be approved by the Honors in the Major Advisor.

### Minor in Chemistry (code 0-7661)

The Minor in Chemistry is available to any non-Chemistry or Biochemistry major.

A minimum of 20 units of chemistry which must include CHEM 111A,B. A minimum of nine units must be taken from upper division chemistry courses. The following courses are not acceptable toward the minor: CHEM 100, 101, 202, 302.

### Concurrent and/or Summer Enrollment in Another College

Students who wish to take course work in a community or other college to meet curricular requirements while enrolled as undergraduates in the College of Natural Sciences and Mathematics must petition the appropriate department for prior approval to enroll in specific courses. This policy applies to concurrent enrollment or summer enrollment. University policy must also be complied with. See "Concurrent Enrollment" and "Transfer of Undergraduate Credit" in this *Catalog*. Courses not receiving prior approval will not be accepted for credit by the department.

### Graduate Credit Earned as an Undergraduate Chemistry or Biochemistry Major

Graduate credit usually may not be earned in advance of the baccalaureate degree. However, based upon the recommendation of the Department Chairman and the Chairman of

the Department Graduate Studies Committee, academic performance (a grade point average of 3.00 overall and 3.00 in the major), and promise of academic achievement in postgraduate study, a student in his/her senior year may be granted approval to earn a maximum of 12 units of course work in the 400 and 500 level taken at this University toward his/her prospective graduate program, subject to the following conditions:

1. The course work must be in addition to that required by the department for the B.A. or B.S. degree in chemistry or the B.S. degree in biochemistry.
2. The undergraduate student must have a "Petition to Earn Credit in the Senior Year" approved by the appropriate department graduate advisor, the Associate Dean for Graduate Accountability in the College of Natural Sciences and Mathematics, and the Dean of Graduate Studies.

### Master of Science in Chemistry (code 6-7661)

#### Prerequisites

1. Acceptance as a graduate student by the Chemistry and Biochemistry Department;
2. A bachelor's degree with a major in chemistry; or
3. A bachelor's degree with undergraduate preparation in chemistry, physics and mathematics equivalent to that required for the bachelor of science degree with a major in chemistry at this University;
4. Entering graduate students are required to take placement examinations in analytical, inorganic, organic and physical chemistry. Any student failing to take and pass a placement examination in any of these subjects is required to enroll in an appropriate course as recommended by the Graduate Studies Committee. Usually the recommended courses are: CHEM 451 if the subject is analytical chemistry; CHEM 431 if the subject is inorganic chemistry; CHEM 320A and/or 320B if the subject is organic chemistry; CHEM 371A and/or 371B if the subject is physical chemistry.
5. The placement examinations are usually given on Monday and Tuesday of the week preceding the first day of instruction. The Graduate Studies Committee evaluates the examinations and recommends appropriate courses to correct for any deficiencies in chemistry. The chemistry graduate advisor meets with the student at this time to prepare a tentative degree program.

#### Advancement to Candidacy

The department recommends advancement to candidacy after the graduate student has:

1. Either passed the placement examinations in analytical, inorganic, organic and physical chemistry or passed the courses as recommended by the Graduate Studies Committee for correcting deficiencies;
2. Earned an average of at least 3.0 (B) in all work completed at this University as a graduate student;
3. Passed the Writing Proficiency Examination;
4. Obtained approval of a graduate degree program by the chemistry graduate advisor, the department chairman (in consultation with the Graduate Studies Committee), Associate Dean for Graduate Accountability in the College of Natural Sciences and Mathematics, and the Dean of Graduate Studies.

The student is expected to be advanced to candidacy by the beginning of the third semester of graduate work. Upon advancement to candidacy, a Thesis Committee will be selected in consultation with the Graduate Studies Committee.

### Requirements

1. Advancement to candidacy at least one semester before the graduation date;
2. The completion of a minimum of 30 units to be distributed in the following way:
  - A. Minimum of nine units in chemistry lecture courses in the 500 series (excluding CHEM 595). These courses must be selected from at least two of the following fields: analytical, inorganic, organic, physical and biological chemistry;
  - B. Two units of CHEM 595;
  - C. One unit of CHEM 660, a maximum of 3 units of CHEM 697 and/or 695 and 4 to 6 units of CHEM 698;
  - D. Nine to 12 units from 400 and 500 series courses (excluding CHEM 595). The exact number of units depends on the number of 600-level courses taken. Changes in the above pattern of course requirements may be made only at the discretion of the Graduate Studies Committee and the graduate advisor.
3. Completion of an acceptable thesis.

## Master of Science in Biochemistry (code 6-7658)

### Prerequisites

1. Acceptance as a graduate student by the Chemistry and Biochemistry Department;
2. A bachelor's degree with a major in chemistry or one of the biological sciences. Prerequisite courses include CHEM 251, 320A,B, 377A,B, 441A,B, MATH 122,123, or their equivalents, and courses in general biology and cell/molecular biology. A student deficient in any of these courses must complete the course as a graduate student;
3. Entering graduate students are required to take placement examinations in analytical, biological, organic and physical chemistry. Any student failing to take and pass a placement examination in any of these subjects is required to enroll in an appropriate course. The courses usually designated are: CHEM 451 if the subject is analytical chemistry; CHEM 441A and/or 441B if the subject is biochemistry; CHEM 320A and/or 320B if the subject is organic chemistry; CHEM 371A and/or 371B; or 377A and/or 377B if the subject is physical chemistry.
4. The placement examinations are usually given on Monday and Tuesday of the week preceding the first day of instruction. Entering students should correspond with the biochemistry graduate advisor before arrival to arrange to take these examinations. The Graduate Studies Committee evaluates the examinations and recommends appropriate courses to correct any deficiencies in chemistry or biochemistry. The biochemistry graduate advisor will meet with the student at this time to prepare a tentative degree program.

### Advancement to Candidacy

The department recommends advancement to candidacy after the graduate student has:

1. Either passed the placement examinations in analytical, biological, organic and physical chemistry or passed courses recommended by the Graduate Studies Committee for correcting the deficiencies;
2. Earned at least a 3.0 ("B") average in all graduate work completed at this University;
3. Passed the Writing Proficiency Examination;
4. Obtained approval of a graduate degree program by the graduate advisor, the department chairman (in consultation with the Graduate Studies Committee), Associate Dean for Graduate Accountability in the College of Natural Sciences and Mathematics, and the Dean of Graduate Studies.

The criteria above should be met by the beginning of the third semester of graduate study. Deficient students may continue at the discretion of the department Graduate Studies Committee.

### Requirements

1. Advancement to candidacy;
2. The completion of a minimum of 30 units with:
  - A. A minimum of nine units in chemistry lecture courses in the 500 series (excluding CHEM 595);
  - B. Three units of CHEM 595;
  - C. One unit of CHEM 660, a maximum of 3 units of CHEM 697, and 4 to 6 units of CHEM 698;
  - D. The following courses taken either prior to or during the course of this program: (1) CHEM 377A or 371A and CHEM 377B or 371B; (2) CHEM 443 and either CHEM 420 or 451; (3) at least one senior or graduate level course in cell/molecular biology or a related area. Credit earned in these courses may be included in the student's official program at the discretion of the graduate advisor.
  - E. Additional 400 and 500 level science courses (excluding CHEM 595) approved by the graduate advisor.
3. Completion of an acceptable thesis.

Changes in the above pattern of course requirements may be made only at the discretion of the Graduate Studies Committee and the graduate advisor.

## Courses (CHEM)

### Lower Division

#### 100. Chemistry and Today's World (4)

Prerequisites: One course from the Foundation (GE categories A1, A2, A3, and B2). Introduction to the basic principles of chemistry and a consideration of the benefits and problems arising from applications of chemistry. Discussions of foods and food additives, drugs, plastics and other materials of everyday life, fuel sources, the atmosphere, and fresh water. Suitable for general education credit. Not open for credit to chemistry or biochemistry majors or students with credit in CHEM 111A or 201A or CHEM 202. (Lecture 3 hrs., laboratory 3 hrs.) Course fee required.

#### 101. Introduction to General Chemistry (4)

Prerequisite: Two years of high school algebra. (This course is a prerequisite to CHEM 111A for students who have not achieved a

satisfactory score on the Chemistry Placement Examination.) Basic principles and concepts including atomic structure, nomenclature and chemical calculations with emphasis on problem solving. Does not count for General Education. (Lecture 3 hrs., lab-problem session 3 hrs.) Course fee required. Traditional grading only.

#### 105. Chemistry Explorations (1)

Prerequisites: A general education math class, which may be taken concurrently. Central concepts of chemistry, including states of matter, atomic structure, periodic properties, chemical compounds and reaction energy, and equilibrium, illustrated with a series of experiments. Intended for students in the Integrated Teacher Education Program (ITEP). (Laboratory 3 hours).

#### 111A. General Chemistry (5)

(Recommended for students who intend to pursue careers in science or engineering.) Prerequisite: A passing score on the Chemistry Placement Examination or credit in CHEM 101 within the preceding year; MATH 112 or higher (may be taken concurrently). One year of high school chemistry is strongly recommended. The first semester of a two semester sequence (CHEM 111A and 111B). Introduction to the principles of chemistry including chemical bonding, solution properties and chemical equilibrium and kinetics. (Lecture 3 hrs., laboratory and problem session 6 hrs.) Course fee required. (CAN CHEM 2)

#### 111B. General Chemistry (5)

Prerequisite: CHEM 111A with a grade of "C" or better. The second semester of a two-semester sequence (CHEM 111A and 111B). Continuation of the study of chemical principles with application to inorganic systems. Includes application of modern bonding theories to inorganic molecules and study of trends and reactivities of the elements and their compounds. Qualitative inorganic analysis and extensive solving of aqueous equilibrium problems are emphasized in laboratory and problem solving sessions. (Lecture 3 hrs., lab and problem solving sessions 6 hrs.) Course fee required. (CAN CHEM 4)

#### 202. Survey of General and Organic Chemistry (3)

Prerequisites: High school chemistry or equivalent. Three years of high school mathematics including intermediate algebra (or MATH 010) or the equivalent. The first semester of a two-semester sequence (CHEM 202 and 302) covering general and organic chemistry and biochemistry. CHEM 202 deals with general chemistry and organic chemistry. Not open for credit to students with credit in CHEM 111A or CHEM 201A. (Lecture 3 hrs.)

#### 251. Quantitative Analysis (4)

Prerequisite: CHEM 111B with a grade of "C" or better. Introduction to the techniques and theory of gravimetric and volumetric analysis, spectrophotometry, potentiometry and chromatography. This course meets the requirements of most medical and dental schools. (Lecture 2 hrs., laboratory 6 hrs.) Course fee required.

### Upper Division

#### 302. Survey of Biochemistry (3)

Prerequisites: CHEM 202 with a grade of C or better and completion of GE Foundation requirements (GE categories A1, A2, A3, and B2). The second semester of a two-semester sequence (CHEM 202, 302). Study of the chemistry, structures, metabolic reactions and functions of the major classes of biochemical compounds. Does not meet the requirements of medical or dental schools. Not open to students with credit in CHEM 201B. (Lecture 2 hrs., laboratory 3 hrs.) Course fee required.

#### 320A. Organic Chemistry (3)

Prerequisites: CHEM 111B with a grade of "C" or better. CHEM 251 is recommended. The first semester of a two-semester sequence (CHEM 320A and 320B). This sequence meets the requirements for medical and dental schools. Emphasis is upon the application of modern principles of structure, reactivity, methods of synthesis, physical properties and spectroscopy. Not open to students with credit in CHEM 321A. (Lecture 3 hrs., discussion 1 hr.)

#### 320B. Organic Chemistry (5)

Prerequisites: CHEM 320A with a grade of "C" or better. The second semester of a two-semester sequence (CHEM 320A and 320B). A continuation of the study of organic chemistry including

the chemistry of compounds containing more than one functional group, bioorganic molecules and special topics. Not open to students with credit in CHEM 321B or 322. (Lecture 3 hrs., laboratory 6 hrs.) Course fee required.

#### 327. Organic Chemistry (3)

Prerequisites: CHEM 111A with a grade of "C" or better; CHEM 111B is recommended. CHEM 201A or CHEM 202 may not substitute for CHEM 111A. Lecture course in the chemistry of the carbon compounds. Not applicable to a degree in chemistry. (Lecture 3 hrs.)

#### 371A. Physical Chemistry (3) F

Prerequisite: CHEM 111B and 251 with a grade of "C" or better, MATH 224 (may be taken concurrently), PHYS 152. The first semester of a two-semester sequence (CHEM 371A and CHEM 371B). Principles and applications of classical thermodynamics. Introduction to statistical thermodynamics. (Lecture 3 hrs.)

#### 371B. Physical Chemistry (3) S

Prerequisite: CHEM 371A with a grade of "C" or better. The second semester of a two-semester sequence (CHEM 371A and 371B) in physical chemistry. Introduction to quantum chemistry, spectroscopy and chemical kinetics. (Lecture 3 hrs.)

#### 373. Physical Chemistry Laboratory (3) S

Prerequisites: CHEM 251, 371A,B, or 377A,B (CHEM 371B or 377B may be taken concurrently), all with a grade of "C" or better. Introduction to basic apparatus and techniques of physico-chemical experimentation and research and application of the principles discussed in CHEM 371A,B and 377A,B. Reference to chemical literature is required. (Lecture 1 hr., laboratory 6 hrs.) A course fee may be required.

#### 377A. Fundamentals of Physical Chemistry (3)

Prerequisites: CHEM 111B with a grade of "C" or better; MATH 123 (may be taken concurrently); PHYS 100B or 152. The first semester of a two-semester sequence. Principles of physical chemistry with emphasis on thermodynamics and chemical kinetics. Examples from biological and environmental sciences will be used to illustrate principles. (Lecture 3 hrs.)

#### 377B. Fundamentals of Physical Chemistry (3)

Prerequisite: CHEM 377A or 371A, each with a grade of "C" or better. The second semester of a two-semester sequence. Principles of physical chemistry with emphasis on molecular structure and spectroscopy. (Lecture 3 hrs.)

#### \*420. Advanced Organic Chemistry Laboratory (3)

Prerequisites: CHEM 251 and CHEM 320B both with a grade of "C" or better. The synthesis and characterization of organic compounds. Analysis of organic structures through the interpretation of spectral data. Emphasis on the use of high field NMR, mass spectrometry, IR, and UV. Applications of modern separation techniques. In addition to regularly scheduled lectures, students are expected during the semester to attend three hours of lecture on use of the chemical literature. (Lecture 1 hr., laboratory 6 hrs.) Course fee required.

#### 421./521. Physical Organic Chemistry (3) F

Prerequisites: CHEM 320B with a grade of "C" or better or pass the organic entrance exam; CHEM 371B or 377B (may be taken concurrently). (Undergraduates register in CHEM 421; graduates register in CHEM 521.) Theoretical interpretation of the chemical and physical properties of organic compounds including the following: mathematical derivations of rate equations from experimental results, calculations of reaction rate constants from experimental data, quantitative comparison of the reactivities of organic compounds, mathematical correlations of structure and properties. Practice in solving problems relating reaction mechanisms to the factors derived above. (Lecture 3 hrs.)

#### \*431. Advanced Inorganic Chemistry (3) F

Prerequisites: CHEM 371B with a grade of "C" or better. Detailed quantitative study of chemical bonding in inorganic molecules with emphasis on molecular orbital theory. Extensive coverage of transition metal chemistry including coordination chemistry, ligand field theory, application of spectroscopy to structural analysis of inorganic molecules and a review of properties and reactivities of the elements and their compounds. (Lecture 3 hrs.)

**\*441A. Biological Chemistry (3)**

Prerequisites: CHEM 111B and either CHEM 320B or 327, each with a grade of "C" or better; a biology or microbiology course is recommended. The first semester of a two-semester sequence (CHEM 441A and 441B) in biochemistry. A chemical and mathematical treatment of the energetics and kinetics of reactions in living systems, including the chemistry and metabolism of carbohydrates and the chemistry of proteins. (Lecture 3 hrs.)

**\*441B. Biological Chemistry (3)**

Prerequisite: CHEM 441A with a grade of "C" or better. The second semester of a two-semester sequence (CHEM 441A and 441B) in biochemistry. Metabolism of lipids, proteins and nucleic acids and other advanced topics in metabolism. (Lecture 3 hrs.)

**\*443. Biological Chemistry Laboratory (4)**

Prerequisites: CHEM 251 and 441B, both with a grade of "C" or better. Theory and practice of laboratory techniques used in biochemical research. (Lecture 1 hr., laboratory 9 hours.) Course fee required.

**447. Clinical Chemistry (3)**

Prerequisites: CHEM 251, 441A and 441B, all with grades of "C" or better (CHEM 441B may be taken concurrently). Methods of analysis and chemical properties of blood, urine, and other biological materials. (Lecture 1 hr., laboratory 6 hrs.) Course fee required.

**448. Fundamentals of Biological Chemistry (3)**

Prerequisites: CHEM 111A and 327, both with a grade of "C" or better. CHEM 201A or CHEM 202 may not substitute for CHEM 111A, and CHEM 201A-B or CHEM 202/302 may not substitute for CHEM 327. Major principles of biochemistry including metabolic processes, biological control and regulatory processes, nutrition and chemical energetics and kinetics of animals, plants and microorganisms. Emphasis on major concepts and problem solving. Not open to chemistry majors. (Lecture 3 hrs.)

**449. Nutritional Biochemistry Laboratory (3)**

Prerequisite: CHEM 448 with a grade of "C" or better. Analytical and biochemical analyses of foodstuffs and other compounds of biochemical interest. (Lecture 1 hr., laboratory 6 hrs.) Course fee required.

**\*451. Instrumental Methods of Analysis (4)**

Prerequisites: CHEM 251 and 371A or 377A, all with a grade of "C" or better, or consent of instructor. Theory and application of instrumental methods to chemical problems. Techniques covered include the following: atomic and molecular absorption and emission, electroanalytical chemistry, techniques of separations, mass spectroscopy, magnetic resonance and other modern methods of analysis. (Lecture 2 hrs., laboratory 6 hrs.)

**466H. Research Design and Methods – Honors (3)**

Prerequisites: BIOL 211A,B, either BIOL 260 or CHEM 251, CHEM 320A,B, all with a grade of "C" or better, and completion of the GE Foundation. A rigorous introduction to the following: i) hypothesis testing, experimental design, and regression modeling of biological data; ii) methodological and technical procedures for experimentation; and iii) techniques for written and oral presentation of research results to prepare students for undergraduate research. Research paper and oral presentation required. Same course as BIOL 466H. Traditional grading only. (Lecture 3 hours)

**\*471. Chemical Thermodynamics (3)**

Prerequisites: CHEM 371A with a grade of "C" or better and consent of instructor. Mathematical derivation and quantitative application of thermodynamic relationships of particular importance in all fields of chemistry with extensive problem solving to show the application of these relationships. (Lecture 3 hrs.)

**495. Colloquium in Chemistry (1)**

Prerequisites: One semester of organic chemistry. Presentation of reports by students on original research or current literature. May be repeated for credit to a maximum of three units; only one unit may be counted toward the major requirement of the chemistry degree. An oral report is required. Traditional grading only.

**496. Special Problems in Chemistry (1-3)**

Prerequisite: Consent of instructor. Problems selected for considered and mature analysis. A written report will be required. May be repeated to a maximum of six units (Independent Study).

**498H. Senior Thesis – Honors (1-3)**

Prerequisites: One unit of CHEM 496 and permission of instructor. Planning, preparation, and completion of a thesis based on a research project in chemistry or biochemistry. May be repeated for credit to a maximum of 3 units. Traditional grading only. Not available to graduate students.

**499. Directed Reading (1)**

Thorough survey of the chemical literature on some topic of current interest under the supervision of a faculty member. Preparation of a written report based on this reading. Not open to graduate students.

**Graduate Division****521./421. Physical Organic Chemistry (3) F**

Prerequisites: CHEM 320B with a grade of "C" or better or pass the organic entrance exam; CHEM 371B or 377B (may be taken concurrently). (Undergraduates register in CHEM 421; graduates register in CHEM 521.) Theoretical interpretation of the chemical and physical properties of organic compounds including the following: mathematical derivations of rate equations from experimental results, calculations of reaction rate constants from experimental data, quantitative comparison of the reactivities of organic compounds, mathematical correlations of structure and properties. Practice in solving problems relating reaction mechanisms to the factors derived above. (Lec 3 hrs)

**522. Special Topics in Organic Chemistry (3)**

Prerequisite: CHEM 421 or 521 or consent of instructor. Areas of current interest in organic chemistry. Normally two of the following topics are treated. May be repeated with different topics to a maximum of 6 units. (Lecture 3 hrs.)

**Natural Products:**

Structure, biological activity, biogenesis and synthesis of selected naturally occurring compounds.

**Organic Synthesis:**

Modern synthetic reactions as demonstrated in recent syntheses of molecules of biological or theoretical interest.

**Organophosphorus Chemistry:**

Nomenclature, synthesis and reactivity of phosphorus-containing organic compounds. Emphasis is placed upon mechanisms of reactions of such compounds. Some discussion of the biochemistry of organophosphorus compounds will be given.

**Photochemistry:**

The effects of light absorption by organic compounds. Involves a study of the types and mechanisms of reactions, energy transfer, fluorescence and phosphorescence.

**Kinetics and Mechanism:**

A survey of methods of elucidation of reaction mechanisms. Theory and application of kinetics, isotope effects, acidity functions. Catalysis and linear free energy relationships may be included as related to molecular rearrangements, hydrolyses, hydration reactions and intra-molecular catalysis.

**Bioorganic Mechanisms:**

The application of mechanistic organic chemistry to the mechanism of action of biological compounds. Emphasis may center on drug action or enzyme catalysis.

**Stereochemistry:**

Molecular configurations, conformations and stereochemical effects in the organic reactions of carbon and heteroatom compounds.

**Reactive Intermediates:**

Organic chemistry of reactive intermediates such as carbenes, nitrenes and free radicals.

### 531. Advances in Inorganic Chemistry (3)

Prerequisite: CHEM 431 or consent of instructor. Current topics and advances in inorganic chemistry. May be repeated with different topics to a maximum of six units. (Lecture 3 hrs.)

#### Metallo-organic Chemistry:

Complexes of transition metals in low oxidation states, emphasizing structure of complexes and bonding, reaction types and homogeneous catalysis.

#### Physical Methods of Inorganic Chemistry:

A brief survey of the basic theoretical principles of the quantum mechanics of bonding, followed by an intensive discussion of modern physical techniques. Application of most physical methods to selected inorganic compounds will be discussed.

#### Mechanisms of Inorganic Reactions:

Inorganic reactions in aqueous solution, emphasizing the substitution mechanisms of octahedral complexes, types of electron-transfer reactions of complexes, application of Marcus-Hush theory and catalysis by transition metal complexes.

#### Bioinorganic Chemistry:

The role of inorganic chemistry in biology, emphasizing the chemistry of dioxygen and related species, metalloproteins (including superoxide dismutase, catalase, peroxidase, and cytochrome P450), Vitamin B-12, and inorganic models of their activity.

### 542. Special Topics in Biochemistry (3)

Prerequisites: CHEM 441B or consent of instructor. A detailed intensive discussion of a limited aspect of biochemistry with reference to current literature. Course content will vary from year to year. May be repeated for credit with consent of graduate advisor to a maximum of six units. (Lecture 3 hrs.)

### 544. Physical Biochemistry (3)

Prerequisites: Either CHEM 371B or 377B, or consent of instructor and CHEM 441B. Physical chemical aspects of protein and nucleic acid chemistry and related analytical methods. (Lecture 3 hrs.)

### 545. Enzymology (3)

Prerequisites: CHEM 371A or 377A and 441B, or consent of instructor. Detailed study of the mechanisms and kinetics of enzyme-catalyzed reactions and mechanisms of enzyme regulation. (Lecture 3 hrs.)

### 547. Biochemistry of Nucleic Acids (3)

Prerequisites: CHEM 441A and 441B or consent of instructor. A detailed treatment of gene expression with emphasis on regulatory mechanisms. Analytical techniques for isolation, purification, and characterization of nucleic acids. (Lecture 3 hrs.)

### 548. Cell Membranes (3)

Prerequisites: CHEM 441A, BIOL 370 and BIOL 340. An in-depth examination of modern membrane biochemistry geared toward the graduate student and qualified senior undergraduate. Topics may include membrane structure, phospholipid biosynthesis and transport, organelle biogenesis, membrane protein and phospholipid sorting, membrane transport, vesicular transport, membrane coat protein structure and function, and membrane-dependent signal transduction. Traditional grading only. (Lecture 3 hrs.)

### 552. Special Topics in Analytical Chemistry (3)

Prerequisite: CHEM 451 or consent of instructor. Selected topics including electrochemical measurements, chromatographic techniques, spectroscopic techniques (molecular and atomic absorption and emission), radiochemical analysis and basic electronic components of instrumentation. Emphasis will be placed on an in-depth understanding of the chemical principles involved, along with the utility and limitations of each method. Other topics include trace analysis by electrochemical methods and instrumental analysis of water and air pollution control. May be repeated with different topics to a maximum of six units. (Lecture 3 hrs.)

### 571. Advanced Thermodynamics (3)

Prerequisite: CHEM 371A. Continuation of CHEM 371A to include statistical and solution thermodynamics. (Lecture 3 hrs.)

### 572. Advanced Physical Chemistry (3)

Prerequisite: CHEM 371B or consent of instructor. Special topics in physical chemistry. May be repeated with different topics to a maximum of six units. (Lecture 3 hrs.)

#### Group Theory:

Group theory and its application in chemistry. Topics covered will include hybridization, molecular orbital theory, crystal and ligand field theories and molecular vibrations.

#### Spectroscopy and Molecular Structure:

The use of spectroscopic methods to elucidate molecular structure. Topics covered will include microwave, infrared, visible, ultraviolet, Raman, nuclear magnetic resonance, electron spin resonance, nuclear quadrupole and Mossbauer spectroscopy.

#### Dynamics of Chemical Reactions:

Review of phenomenological kinetics equations; methods of elucidating complex photochemical and thermal gas phase reaction mechanisms; theoretical approaches to physico-chemical reactions including the RRKM method and quantum mechanical scattering; applications of kinetics to the various fields of chemistry.

### 595A. Colloquium in Biochemistry (1)

### 595B. Colloquium in Organic Chemistry (1)

### 595C. Colloquium in Analytical, Physical and Inorganic Chemistry (1)

Prerequisite: Graduate standing or consent of instructor. Discussion of advances in chemistry as reported in recent literature. Designed to give experience in library use, organization and presentation and critical evaluation of the chemical literature. May be repeated for credit, but not more than a total of three units may be earned in any combination of CHEM 595 courses. (Seminar 1 hr.)

### 660. Seminar in Chemistry (1)

Weekly meetings for presentation and discussion of advanced work in special fields including original research by faculty and graduate students. (Seminar 1 hr.) Credit/No Credit grading only. Course may be repeated to a maximum of 2 units.

### 695. Directed Reading (1)

Survey of the information in chemical literature on a current research topic, under the direction of a faculty member. Preparation of a written report based on this reading.

### 697. Directed Research (1-3)

Prerequisite: Arrangement with instructor. Laboratory work supervised on an individual basis. A written report will be required. May be repeated for credit.

### 698. Research and Thesis (1-6)

Prerequisites: Arrangement with instructor. Planning, preparation and completion of a thesis in chemistry or biochemistry.

Chemical engineers apply their knowledge of chemistry and engineering to make useful products that improve the quality of our lives. Industries employing our graduates include fuels, chemicals, polymers, microelectronics, biotechnology, environmental, aerospace, food, consumer products, design and construction. The chemical engineering curriculum provides a thorough background in chemical and physical science, mathematics, and engineering for application to the solution of technical problems encountered in the development, operation, design, and support of a diverse variety of industries.

### Educational Mission and Objectives

The Chemical Engineering Department at California State University, Long Beach is a practice-oriented program that aims to develop well-trained professionals who will be successful in their careers and prepared for further advanced studies.

In order to achieve this the program strives to:

- Provide students the technical foundations to become competent, practicing chemical engineers. Students learn to apply their knowledge of scientific principles to problem identification and solution, to conduct and analyze experi-

mental work, and to design processes and systems to meet specified objectives using modern tools and technologies.

- Prepare students to be successful in their future work-place relationships. Students develop effective communication skills, gain abilities to function productively in teams, and obtain the foundation to support lifelong learning to promote personal and professional growth.
- Instill in students an understanding of their professional and ethical responsibilities and create awareness of the societal impact that their professional activities may have.
- Continuously improve the academic program in partnership with industry, alumni, and government.

### Chemical Engineering Professional Advisory Council

The Department of Chemical Engineering Advisory and Development Council, consisting of outstanding engineers and executives from industry and government in Southern California, provides guidance to our program. Its mission is to advise and assist in developing the Department and to support its efforts to serve students, the community, and industry. This liaison between the University and industry ensures that industry concerns are addressed in our curricula and provides career guidance for our graduates.

### ABET Accreditation

The Bachelor of Science in Chemical Engineering is accredited by the EAC (Engineering Accreditation Commission) of ABET (Accreditation Board for Engineering and Technology, 111 Market Place, Suite 1050, Baltimore, MD 21202, website: [www.abet.org](http://www.abet.org)). Students enrolling in our program must see an undergraduate advisor as early as possible to ensure conformity with ABET requirements.

### Other Related Programs

Students interested in obtaining a Minor in Environmental Engineering should refer to the College of Engineering section of this *Catalog*.

Students wishing to pursue advanced study may be interested in the College of Engineering's Master of Science in Engineering (MSE) degree. Graduate study leading to the MSE can be tailored to the goals of a student with a background in chemical engineering by taking advanced course work in the interfacing areas of chemistry, civil engineering (environmental area), electrical engineering (control area), computer engineering (microelectronic device area), mechanical engineering (thermal, fluids, and materials areas) and mathematics in addition to chemical engineering. Thesis work may be supervised by chemical engineering faculty. Detailed requirements for the MSE are specified in the College of Engineering section of this *Catalog*.

### Grade Requirements

In addition to other University requirements, all students must obtain a grade of "C" or better in each prerequisite for any chemical engineering course. Also, required Written English (GE A1), Speech (GE A2), and Interdisciplinary (IC) courses must be taken for a letter grade, not Credit/No Credit.

## Bachelor of Science In Chemical Engineering (code 3-4320) (130 units)

### Requirements

Lower Division: CH E 200, 210, 220; CHEM 111A, 111B; one course from CHEM 251, BIOL 211A, or MICR 200; EE 211; CE 205; MATH 122, 123, 224; PHYS 151,152; ENGR 101.

Upper Division: CH E 320, 330, 410, 420, 430, 440, 450, 460, 470; CHEM 377B, 320A, B; MATH 370A; six units from CH E 300, 335, 385, 405, 415, 425, 435, 436, 437, 445, 455, 465, 475, 480, 485, 490; three units of approved engineering electives or pass the FE Exam; a course in economics.

A minimum of 130 units is required.

### Courses (CH E)

#### Lower Division

##### 200. Chemical Engineering Fundamentals (3)

Prerequisites: CHEM 111A, MATH 123, PHYS 151. Dimensional analysis of units, steady and transient balances of mass, momentum and energy, the mathematical solution of chemical engineering problems. (Lecture-problems 3 hrs.)

##### 210. Computer Methods in Chemical Engineering (3) F

Prerequisites: CHEM 111A, MATH 122, PHYS 151. Beginning programming and techniques of numerical analysis applied to typical problems in chemical engineering. (Lecture-problems 2 hours, laboratory 3 hours.)

##### 220. Chemical Engineering Thermodynamics I (3)

Prerequisite: CH E 200. Applications of the first and second laws of thermodynamics to chemical processes. Concepts of heat, work, and energy. Energy balances in batch and flow processes, with and without chemical reaction. Gas behavior, phase change, vapor pressure, humidity. (Lecture-problems 3 hours.)

#### Upper Division

##### 300. The Chemical Industry (3)

Prerequisites: CH E 200, CHEM 320A or consent of instructor. Survey of industrial chemical processing techniques and the activities of engineers in this area, illustrated by field trips, speakers, professional society meetings, films, readings, etc. (Lecture-problems 2 hr, lab 3 hrs.)

##### 320. Fluids (3) S

Prerequisites: CH E 200, C E 205. Study of the deformation and flow of fluids, both liquids and gases, with applications to chemical engineering. (Lecture-problems 3 hours.)

##### 330. Separation Processes (4) F

Prerequisites: CH E 210, 220. Computation methods for predicting the separation of materials by distillation, absorption, extraction and other methods. (Lecture-problems 3 hours, lab 3 hrs.)

##### \*335. Materials for Electronics Manufacturing (3)

Prerequisites: CHEM 111A, PHYS 152. Properties of advanced semiconductor and opto electronic materials including polymers for electronic application, packaging and storage materials, and effects on product design. (Lecture-problems 3 hrs) Traditional grading only.

##### \*385. Manufacture of Microelectronic Devices (3)

Prerequisites: CHEM 111A, PHYS 152, and ENGR 223 or consent of instructor. Application of diffusion, oxidation, reaction rate, heat transfer and surface science to semiconductor and secondary processing. Processes include film growth, chemical vapor deposition, ion implantation and surface alloying, microlithography, etching, metalization, coating and adhesion. Numerically- controlled machining and computer modeling. (Lecture-problems 2 hours, laboratory 3 hours.) Traditional grading only.

##### 405. Safety in the Chemical Process Industries (3)

Prerequisite: CH E 220, 320. Industrial safety, hygiene and toxicology. Source models for flow of fluids from equipment. Toxic release and dispersion models. Fires and explosions. Relief valves. Haz-

ards identification and risk assessment. Accident investigations and case histories. Extra requirement for graduate students: term papers or projects. (Lecture-problems 3 hours.)

##### 410. Chemical Engineering Thermodynamics II (3)

Prerequisites: CH E 210, 220. Analysis and design of process equipment and systems using thermodynamics. Turbines, compressors, power plants, refrigeration cycles. Phase equilibria and nonideal solution behavior. Chemical reaction equilibria and heat effects. (Lecture-problems 3 hours.)

##### 415./515. Occupational and Environmental Safety Engineering and Management (3)

Prerequisite: CHEM 327 or consent of instructor. Safety engineering and management, legislation, regulations and standards; toxicology and personal protective equipment; fire hazards; noise control; electrical safety; system safety analysis; container and spill management; use of computer systems and statistical methods. Extra requirements for graduate students: term papers or projects. (Lecture-problems 3 hours.)

##### 420. Heat and Mass Transport (3) F

Prerequisite: CH E 210, 320; CHEM 377B. Heat exchange by conduction, convection and radiation. Diffusion in fluids and solids. Simultaneous heat and mass transport. (Lecture-problems 2 hours, laboratory 3 hours.)

##### \*425. Polymer Synthesis and Characterization (3) S

Prerequisite: CHEM 320A or consent of instructor. Physical and chemical concepts in the production of polymers. Relation of the chemical structure to bulk properties of plastics. Laboratory synthesis of polymers and their mechanical, thermal and molecular characterization. (Lecture-problems 2 hours, laboratory 3 hours.)

##### 430. Chemical Reactor Kinetics (3) F

Prerequisites: CHEM 377B. Homogeneous and heterogeneous reactions and application to reactor design, catalysts. (Lecture-problems 2 hours, laboratory 3 hours.) Traditional grading only.

##### \*435. Chemical and Electrochemical Manufacturing Processes (3)

Prerequisites: ME 322, 330; or CHEM 371A or consent of instructor. Theory of electrochemical processing. Electroplating and electrodeless plating solutions, processes and equipment. Anodizing and other surface treatments. Carburizing, nitriding atmospheres and equipment. Diffusion in solids. The effect of surface treatments on mechanical properties. Same course as ME 425. (Lecture-problems 3 hours.) Traditional grading only.

##### \*436. Corrosion Engineering (3)

Prerequisites: ME 322 or CHEM 371A or consent of instructor. Principles of oxide film growth and electrochemical corrosion, corrosion testing, environmental and metallurgical effects on corrosion, environmental stress cracking, corrosion control and prevention. (Lecture-problems 3 hours.) Traditional grading only.

##### 437./537. Materials Purification Processes (3)

Prerequisite: CH E 330, 420, or consent of instructor. Rate-controlled separation processes such as membrane separations, pressure swing adsorption, molecular sieve separation, supercritical fluid extraction, reverse osmosis, and spray drying. Additional projects required for CH E 537. (Lecture-problems 3 hours.) Traditional grading only.

##### \*440. Chemical Engineering Laboratory I (2) F

Prerequisites: CH E 220, 320, 330, pass Writing Proficiency Exam. Laboratory study of fluid mechanics, separation processes and thermodynamics. Experimental design and analysis and preparation of engineering reports. (Laboratory 6 hours.)

##### 445./545. Pollution Prevention (3)

Prerequisite: CH E 330. Overview of pollution prevention strategies in chemical industry and related industries. Hierarchical approach of minimizing industrial wastes and pollutants. Discussions of life cycle analyses of wastes, identifying and prioritizing pollutants from industrial sites, selecting environmentally compatible materials, design of unit operations for minimizing waste, economics of pollution prevention, and computer-aided process flowsheeting for minimizing waste. Extra requirement for graduate students: term papers or projects. (Lecture-problems 3 hours.) Traditional grading only.

**\*450. Chemical Engineering Laboratory II (2) S**  
Prerequisites: CH E 410, 420, 430, 440; prerequisite or corequisite: CH E 460. Laboratory study of heat and mass transport, chemical kinetics and control theory. Experimental design and analysis and preparation of engineering reports. (Lab 6 hours.)

**455./555. Environmental Compliance (3)**  
Prerequisite: CHEM 327 or consent of instructor. Physical and chemical properties of hazardous materials and wastes. Environmental hazards. An examination of environmental laws, regulations and standards dealing with storage, transportation, treatment and disposal of hazardous wastes. Emergency planning and preparedness. Extra requirement for graduate students: term papers or projects. (Lecture-problems 3 hours.)

**\*460. Chemical Process Control (3) S**  
Prerequisites: CH E 420; MATH 370 A. Control theory and practice, instrumentation, system responses, transfer functions, feed-back control, and stability as applied to chemical engineering processes. (Lecture-problems 2 hours, laboratory 3 hours.)

**465./565. Biochemical Engineering (3)**  
Prerequisite: CH E 200, 330, 430, and life science course(s) with instructor's approval. Microbial physiology and genetics. Chemicals of life. Metabolic stoichiometry and energetics. Kinetics of enzyme-catalyzed reactions. Kinetics of substrate utilization, product formation and biomass production. Design and analysis of bioreactors. Product recovery operations. Bioprocess economics. Applications to natural systems wastewater treatment, and biohydrometallurgy. Extra requirements for graduate students: term papers and laboratory projects on biomass production, microbial enhanced oil recovery or metal recovery. (Lecture-problems 3 hrs)

**\*470. Chemical Engineering Design (4)**  
Prerequisites: CH E 220, 330, 420, 430; CHEM 320A. Design based upon economics and chemical engineering design and analysis. (Lecture-problems 3 hours, problem-design session 3 hrs.)

**\*475. Environmental Pollution (3)**  
Prerequisites: CHEM 111A-B. Recommended: Chemistry 320A, 371A. Application of chemistry to the problems of pollution. (Lecture-problems 3 hours.)

**480./580. Theoretical Methods in Chemical Engineering (3)**  
Prerequisites: CH E 420, 430. Simulation and optimization of chemical engineering processes by mathematical formulation and computer modeling. Extra requirements for graduate students: term papers or projects. (Lecture-problems 3 hours.)

**485./585. Air Pollution (3)**  
Prerequisites: CH E 475 or CE 364 or consent of instructor. Air pollution chemistry; control strategies; origin of pollutants; meteorology; vapor dispersion models; control principles for particulates, sulfur dioxide, and nitrogen oxides. Extra requirement for graduate students: term papers or projects. (Lecture-problems 3 hours)

**490. Special Problems (1-3)**  
Prerequisite: Consent of instructor. Assigned topics in technical literature or laboratory projects and reports on same.

## Graduate Courses

**510. Multiphase Flow and Interfacial Phenomena (3)**  
Prerequisites: CH E 320 or consent of instructor. Equation of motion in multiphase systems such as slurries and fluidized beds involving bubbles, drops, and particles. Effects of interfacial tension, particle-surface and interparticulate interactions. (Lecture-Problems 3 hours) Traditional grading only.

**515./415. Occupational and Environmental Safety Engineering and Management (3)**  
Prerequisite: CHEM 327 or consent of instructor. Safety engineering and management, legislation, regulations and standards; toxicology and personal protective equipment; fire hazards; noise control; electrical safety; system safety analysis;

container and spill management; use of computer systems and statistical methods. Extra requirements for graduate students: term papers or projects. (Lecture-problems 3 hours.)

**520. Advanced Transport Phenomena (3)**  
Prerequisites: CH E 320, 420, 430. Application of differential and integral mass, momentum and energy balances to chemical engineering processes. Analysis of fluid flow, heat transfer, diffusion and chemical reaction in various unit operations. (Lecture-Problems 3 hours) Traditional grading only.

**530. Advanced Reactor Kinetics (3)**  
Prerequisites: CH E 430. Modeling of chemical reactors; effects of multiple phases, mixing, adsorption, diffusion and catalysts on reactor performance. (Lecture-Problems 3 hrs) Traditional grading only.

**537./437. Materials Purification Processes (3)**  
Prerequisites: CH E 330, 420, or consent of instructor. Rate-controlled separation processes such as membrane separations, pressure swing adsorption, molecular sieve separation, supercritical fluid extraction, reverse osmosis, and spray drying. Additional projects required for CH E 537. (Lecture-problems 3 hours.) Traditional grading only.

**545./445. Pollution Prevention (3)**  
Prerequisite: CH E 330. Overview of pollution prevention strategies in chemical industry and related industries. Hierarchical approach of minimizing industrial wastes and pollutants. Discussions of life cycle analyses of wastes, identifying and prioritizing pollutants from industrial sites, selecting environmentally compatible materials, design of unit operations for minimizing waste, economics of pollution prevention, and computer-aided process flowsheeting for minimizing waste. Extra requirement for graduate students: term papers or projects. (Lecture-problems 3 hours.) Traditional grading only.

**555./455. Environmental Compliance (3)**  
Prerequisite: CHEM 327 or consent of instructor. Physical and chemical properties of hazardous materials and wastes. Environmental hazards. An examination of environmental laws, regulations and standards dealing with storage, transportation, treatment and disposal of hazardous wastes. Emergency planning and preparedness. Extra requirement for graduate students: term papers or projects. (Lecture-problems 3 hours.)

**565./465. Biochemical Engineering (3)**  
Prerequisite: CH E 200, 330, 430, and life science course(s) with instructor's approval. Microbial physiology and genetics. Chemicals of life. Metabolic stoichiometry and energetics. Kinetics of enzyme-catalyzed reactions. Kinetics of substrate utilization, product formation and biomass production. Design and analysis of bioreactors. Product recovery operations. Bioprocess economics. Applications to natural systems wastewater treatment, and biohydrometallurgy. Extra requirements for graduate students: term papers and laboratory projects on biomass production, microbial enhanced oil recovery or metal recovery. (Lecture-problems 3 hrs.)

**580./480. Theoretical Methods in Chemical Engineering (3)**  
Prerequisites: CH E 420, 430. Simulation and optimization of chemical engineering processes by mathematical formulation and computer modeling. Extra requirements for graduate students: term papers or projects. (Lecture-problems 3 hours.)

**585./485. Air Pollution (3)**  
Prerequisites: CH E 475 or CE 364 or consent of instructor. Air pollution chemistry; control strategies; origin of pollutants; meteorology; vapor dispersion models; control principles for particulates, sulfur dioxide, and nitrogen oxides. Extra requirement for graduate students: term papers or projects. (Lecture-problems 3 hrs)

**697. Directed Research (1-3)**  
Prerequisites: Graduate standing. Individual research or intensive study under the guidance of a faculty member on theoretical or experimental problems in chemical engineering. (Independent Study) Traditional grading only.

**698. Thesis or Industrial Project (2-6)**  
Prerequisite: Advancement to Candidacy. Preparation and completion of a thesis or industrial project in chemical engineering. May be repeated to a total of 6 units.

View the CSU, Long Beach *Catalog* on-line at [www.csulb.edu](http://www.csulb.edu) by clicking on "Academics" and then "CSULB Catalog."

Chicano and Latino Studies courses are designed to train students to work effectively in multicultural settings, to enhance their analytical and technological skills, and to provide them a profound understanding of the Chicano and Latino experiences in the United States. The department offers programs to serve the interests and goals of (1) those entering a variety of occupations including urban studies, government, journalism, social work, school administration, business, criminology, law, foreign service and other related areas; (2) teachers, counselors, administrators; (3) majors in other fields such as history, sociology, psychology, economics, literature, anthropology, who wish to include additional scope to their field of study.

## Bachelor of Arts in Chicano and Latino Studies (code 2-8817) (120 units)

### Requirements

Lower Division: (15 units) Core Courses: CHLS 100, 101, 105, 150, 230.

Upper Division: (24 Units) Core Courses (12 units required): CHLS 300, 310, 350, 498.

Upper Division (continued): 12 units of electives from Cultural Studies courses: CHLS 390I, 395, 420, 490, 499; and Social Inquiry courses: CHLS 319, 340, 352, 362, 415, 421, 470I, 490, 499.

Departmental Requirement: Two years of college Spanish. If student is proficient in Spanish, the two years' requirement may be met by successful completion of proficiency examination.

### Special Track

In addition to the general major in Chicano and Latino Studies, the department also offers a program for students who wish to complete a Special Track major in Chicano and Latino Studies. Within the Special Track, students may receive up to a maximum of 12 units of credit for upper division Chicano and Latino Studies related course work taken from other disciplines. Students wishing to pursue the Special Track major must develop an approved program of study in consultation with the Chicano and Latino Studies Department academic advisor.

The Special Track consists of 39 units total, 24 of which must be upper division, including the following:

Lower-division: CHLS 100, 101, 105, 150, 230.

Upper-division: CHLS 300, 310, 350, 498.

Special Track: A maximum of 12 units of upper division course work from related fields, selected with the approval of the Chicano and Latino Studies Department advisor.

Language Requirement: Two years of college Spanish. If student is proficient in Spanish, the two years' requirement may be met by successful completion of proficiency examination.

## Minor in Chicano and Latino Studies (code 0-8817)

A prerequisite to taking this minor is the successful completion of two Spanish courses recommended by the Chicano and Latino Studies Department advisor or the successful completion of an intermediate Spanish proficiency examination.

### Requirements

Upper Division: a minimum of 24 units distributed as follows: 12 units of core requirements: CHLS 300, 310, 350, 498; 12 units selected from Cultural Studies courses: 390I, 395, 420, 490, 498, 499; and Social Inquiry courses: 300, 310, 319, 340, 350, 352, 362, 415, 421, 470I, 490, 498, 499.

## Certificate in Chicano and Latino Studies (code 1-8817)

The Chicano and Latino Studies Department has established a program which offers students interested in this field the opportunity to pursue courses leading to a certificate in Chicano and Latino Studies. Courses used to meet this certificate requirement may be counted also, where applicable, toward the General Education requirements and the degree or credential requirements of the cooperating departments.

### Requirements

1. A bachelor's degree with a major in another discipline;
2. A minimum of 24 units distributed as follows: 12 units of core requirements: CHLS 300, 310, 350, 498; 12 units selected from Cultural Studies courses: 390I, 395, 420, 490, 498, 499; and Social Inquiry courses: 300, 310, 319, 340, 350, 352, 362, 415, 421, 470I, 490, 498, 499.

## Courses (CHLS)

### Lower Division

#### 001. Bilingual Communication Skills-English (3)

Basic fundamentals of English communication for students of bilingual background. Credit/no credit only. Counts as part of student's course load but does not carry graduation credit.

#### 100. Introduction to Chicano Studies (3)

This is an introductory-level course designed with two goals in mind. The first is to acquaint students with the most important social, political, economic and historic aspects of the Chicano experience in the United States. The second goal is to discuss these aspects in relationship to their historic relevance to contemporary and future Chicano society. Traditional grading only.

#### 101. Introduction to Chicano Life (3)

Prerequisite or Corequisite: One course from GE category A1. This course is designed to introduce students to the study of Chicano culture and society in the Southwest U.S. from 1540 to the 1980. The course will emphasize three topics: 1) The cultural formation and transformation of Chicano communities; 2) The relationship between culture and identity; 3) The dynamic role of women in shaping Chicano culture. Traditional grading only.

#### 104. Bilingual Communication Skills-English (3)

Prerequisite: A recorded total score of 151 or above on the English Placement Test, or credit in CHLS 001 (or its equivalent) and consent of the instructor. Advanced fundamentals of English communication for students of bilingual background. Traditional grading only. (Fulfills ENGL 100 requirements.)

#### 105. Identity and Assimilation in Chicano Life (3)

Prerequisite or Corequisite: One course from GE category A2. An interdisciplinary introduction to the study of cultural and historical issues that have influenced formation of Chicano communities from pre-Columbian times to the present. Evolution of Chicano

identity examined through survey of Mexican American regional cultures and development of societal divisions based on gender, race, and class categories. Traditional grading only.

#### 150. Introduction to Chicano Literary Studies (3)

Prerequisite or Corequisite: One course from GE category A1. Introductory survey course in Chicano and Latino literature covering traditional and contemporary literary styles and forms from selected translated Chicano and Latino readings. Traditional grading only. Not open to students with credit in CHLS 205.

#### 215. U.S. Diversity and the Ethnic Experience (3)

Prerequisites: The course is open only to Integrated Teacher Education Program students. This course is a survey of four major ethnic groups (American Indians, African American, Latino American, and Asian American) in American society from the colonial era to the present. Special attention is given to the formation and transformation of each ethnic group and their individual and collective roles in the development of the United States. Same course as AIS 215, ASAM 215, B/ST 215. The departments take turns offering the course in the Fall semester. Traditional grading only.

#### 230. Chicano Community Organization (3)

Analysis of Chicano community groups; emphasis on development of community organizational techniques.

### Upper Division

General Education Category A must be completed prior to taking any upper division course except upper division language courses where students meet formal prerequisites and/or competency equivalent for advanced study.

#### 300. Chicano History (3)

Chicanos in the settlement and development of the Southwest and in contemporary U.S. society; Chicano experience as a U.S. minority group; emerging civil rights movement of La Raza. Traditional grading only. Same course as HIST 370.

#### 310. Chicano Thought (3)

Study of the ideas, philosophies and events affecting Chicano life; identification and examination of the Chicano world view, of a Chicano reality.

#### 319. The Ethnic Experience in the U.S. (3)

An examination of the dynamics of the development of our multi-cultural society, emphasizing study of the four distinct ethnic strands of American society (Asian American, Black American, Mexican American, and American Indian) and their role in the maintenance of cultural diversity in the United States. Same course as AIS 319, ASAM 319, B/ST 319, W/ST 319. (Lecture/Discussion.)

#### 335I. Asian and Latino Immigration since World War II (3)

Prerequisites: Completion of GE Foundation requirements, one or more Explorations courses, and upper-division standing. Analyzes the causes of a dramatic post-World War II shift in immigration from Europe to Asia and Latin America, immigrants' settlement and adaptation patterns, and the Asian and Latino communities' social, racial, political and economic impact on American society. Same course as ASAM 335I. (Lecture and discussion, 3 hours)

#### 340. Latino Education in the U.S. (3)

A theoretical and empirical examination of Latino educational issues in the United States. Special emphasis is placed on disentangling the effects of ethnicity, gender, class and immigrant status on educational attainment and achievement. A critical understanding of how historical, social, political, and economic forces impact on Latinos/as with regard to their experience in the educational system. Traditional grading only.

#### 350. The Latino Population in the United States (3)

Survey of the most recent socio-economic information on "Hispanics," issues of immigration and settlement patterns, employment and income, family, language and culture will be examined. Particular attention will be paid to the changing points at which racism has intersected with factors of class and gender. This is a comparative course designed to highlight heterogeneity of the larger Latino aggregate population. Traditional grading only. Same course as SOC 340.

**352. Central American and Caribbean Peoples in California (3)**

Survey of the socioeconomic conditions and cultural life of the Central American and Spanish-speaking Caribbean communities of California: Salvadorans, Guatemalans, Puerto Ricans, Cubans, etc. Not all groups will necessarily be dealt with each time the course is offered. Similarities with and differences from the Mexican American community will be examined. Same course as SOC 341.

**362. Chicanos and the Law (3)**

Analysis of the relationship of the Chicano to the U.S. legal and judicial system. Topics include traditional sociological and criminological theories of Chicano criminality, the Pachuco image, and Chicano experiences with the police and correctional institutions. Traditional grading only.

**390I. The "Hispanic" Southwest: Historical and Literary Images (3)**

Prerequisites: Completion of GE Foundation requirements, one or more Explorations courses, and upper-division standing. Critical, interdisciplinary examination of the portrayals of Latinos in selected historical and literary texts by Euro-American authors.

**395. Latino Cultural Images in Film (3)**

Critical, interdisciplinary examination of selected Latino cultural traits and values as these are depicted in motion pictures, documentaries, and other types of film.

**415. Latina Women in the United States (3)**

Prerequisite: Junior standing or permission of the instructor. This course will examine the cultural, political, economic, and sexual forces that mold Latina women. The first section of the course will focus on cultural stereotypes and responses to these stereotypes by Latina women scholars. The second section of the course will focus on Latina class differences and the politics of race. This will provide an overview of the contemporary public policy issues affecting Latinas and the broader Latino community. The contradictions that are identified in this course segment will be juxtaposed against selected African American perspectives to identify areas of symmetry as well as areas of divergence in the domain of political strategizing for political reform and Latina empowerment. The last section of the course will address issues of gender identity and sexuality that challenge, undermine, and strengthen the position of Latina women in the greater society. Same course as W/ST 320.

**420. Chicano Heritage in the Arts of Mexico and the Southwest (3)**

Historical and philosophical analysis of Indian Mestizo and Chicano plastic arts, music and dances with a view to understanding the Chicano heritage.

**421. Street Gangs in Comparative Perspective (3)**

This course addresses the contemporary issue of street gangs within the Chicano/Latino community. It analyzes the relationships across the United States of the Chicano gangs with African American gangs, the South East Asian gangs and the White (PUNKERS, Heavy Metalists and Skinheads)-- street gangs. Structural forces of the urban societies, such as proletariat socialization, patriarchy traditions and problems revolving around gender identity are examined. Through theory and a historical analysis, the basis for addressing this contemporary subject is set. This course is a comparative study of youth behavior using both a public health model and a criminal justice model. Traditional grading only.

**450I. Consequences of the Encounter: The Americas, Europe, and Africa (3)**

Prerequisites: Completion of the G.E. Foundation requirement, completion of one or more Exploration courses, and upper-division status. The study of the consequences of the encounter between Africa, Europe, and the Americas from the voyages of Columbus to contemporary times through several disciplines: Art, Literature, Social Sciences. The course examines the complex results of the encounter in respect to the obliteration, suppression and creation of culture among the peoples of both the Old and New Worlds. Same course as RGR 450I.

**470I. Latinas/Latinos: Health Status and Health Care Access (3)**

Prerequisites: Completion of GE Foundation requirements, one or more Explorations courses, and upper-division standing. This course is a critical interdisciplinary examination of the health status and health care access of Latinas/os in the United States. The primary objective of the course is to provide an overview of the policies, epidemiologic, and cultural factors that influence the etiologies of diseases within Latina/Latino subpopulations. This cross disciplinary approach will also be used to analyze the health care access problems faced by Latina/Latino subpopulations that constrain efficient management of services and equitable delivery of health care. Traditional grading only. Same course as HCA 470I.

**490. Special Topics in Chicano Studies (1-3)**

Prerequisite: Consent of instructor. Topics of current interest in Chicano and Latino Studies selected for intensive development. May be repeated for a maximum of six units. Topics will be announced in the *Schedule of Classes*.

**D. Academic Conferences**

**498. Senior Colloquium (3)**

Prerequisite: Consent of the instructor. Analysis of issues and problems in Chicano and Latino studies. Designed as a seminar in research and methodology. The material discussed will center about a general theme selected by the instructor. May be repeated with different topics to a maximum of six units, but no more than three units may be used to satisfy the requirements for the majors. Traditional grading only. Course may be repeated for a maximum of 6 units.

**499. Directed Studies (1-3)**

Prerequisite: Consent of instructor. Preparation of research reports on selected topics relating to the Mexican-American. May be repeated for a maximum of six units.

# CIVIL ENGINEERING

## *College of Engineering*

### Department Chair

Joseph M. Plecnik

### Department Office

Vivian Engineering Center (VEC) 104

### Telephone

(562) 985-5118

### Website

<http://www.csulb.edu/colleges/coe/ce>

### Faculty

#### Professors

Hsiao-Ling Chu

Peter A. Cowan

Ali Eshett (Emeritus, 1998)

Richard P. Nguyen

Joseph M. Plecnik

Chan-Feng (Steve) Tsai

William H. Ying (Emeritus, 1998)

#### Assistant Professor

Emelinda M. Parentela

#### Undergraduate Advisor

William H. Ying

#### Graduate Advisor

Peter A. Cowan

#### General Education Advisor

William H. Ying

#### Administrative Support Coordinator

Students desiring detailed information should contact the department office for referral to one of the faculty advisors. The Department of Civil Engineering provides students with a broad educational background essential to modern civil engineering practice and research. The program is built around a basic core of mathematics, natural and engineering sciences common to accredited professional engineering programs. It is planned to give a selection of basic engineering-science and design education to enable the graduate to begin a career in any of the various fields of practice in civil engineering or to prepare for graduate study in related engineering majors. It makes possible a systematic and integrated foundation in the principles of structural analysis and design, transportation systems, environmental systems, geotechnical engineering, water resources engineering, materials, construction engineering management, and information technology. Opportunity to explore a particular area of interest is offered in the wide selection of civil engineering design electives to permit students a sequence of courses related to the area of their choice.

The four engineering buildings house laboratory facilities in fluid mechanics and hydraulics, materials of construction, geotechnical engineering, earthquake engineering and structures, engineering mechanics, surveying, urban and environmental engineering. The Department of Civil Engineering offers graduate study programs leading to the degrees of master of science in civil engineering (M.S.C.E.) and the advanced degree of civil engineer (C.E.). These programs provide opportunities for graduate students to develop as civil engineers capable of competent research, design, and application through integrated curricula of engineering and science while permitting a concentration in the student's area of interest. Areas of specialization include: construction engineering management, environmental engineering, water resources engineering, geotechnical engineering, structural engineering, and transportation engineering.

Additional information concerning the programs, special facilities, laboratories and research possibilities is contained in the Civil Engineering Department brochures. The department actively participates in MSE programs of interdisciplinary nature with course offerings and theses/directed studies in management engineering, safety engineering systems, and structural mechanics.

Some graduate laboratory, teaching and research assistantships are available to qualified graduate students. Applications should be sent to the department chair.

### *Advisory and Development Council*

The Department of Civil Engineering is supported by an Advisory and Development Council consisting of outstanding engineers and executives from industry and government in Southern California. Its function is to form a liaison between the University and industry and to keep the administration and faculty informed of modern engineering practices. This ensures that the curricula are kept up-to-date. It also advises on placement opportunities before and after graduation.

### *ABET Accreditation*

The Bachelor of Science in Civil Engineering is accredited by the EAC (Engineering Association Commission) of the Accreditation Board for Engineering and Technology (ABET) (Accreditation Board for Engineering and Technology, Inc., 111 Market Place, Suite #1050, Baltimore, MD 21202, phone: 410-347-7710, website: <http://www.abet.org>). Students enrolling in this program are strongly advised to get in touch with an undergraduate advisor as early as possible to know the details of the ABET requirements in math/sciences, humanities and social sciences areas and engineering sciences and design.

## Bachelor of Science in Civil Engineering (code 3-4325) (134 units)

### Mission

To educate and prepare students to succeed in the civil engineering profession by providing them with essential technical tools and skills which will enable them to perform current and future civil engineering tasks and to promote the need for life long learning.

## Objectives

1. Graduates will have the necessary analytical and experimental skills to perform in the civil engineering profession.
2. Graduates will be prepared to apply the theory and experimental tools to the solution of practical design problems.
3. Graduates will be provided with the knowledge to understand the role of civil engineers in the global and societal contexts and to recognize the need for life long learning.
4. Graduates will be educated in the potential ethical and social implications in civil engineering practice and foster communication and interaction skills with other professionals and community at large.

## Requirements

A grade of "C" or better must be achieved in all prerequisites for all Civil Engineering courses.

Lower Division: BIOL 200 or MICR 200; CHEM 111A; CE 205, 206, 225; EE 210 (or 211); MATH 122, 123, 224; ME 172; PHYS 151, 152.

Upper Division: GEOL 370; CE 300, 335, 345, 346, 359, 364, 406, 407, 426, 437, 459, 481, 490; ECON 300; MATH 370A; ME 330, 371, 373; six units of technical design electives from: CE 427, 438, 445, 455, 456, 457, 466, 495; two laboratories from: CE 336, 491, MAE 331, ME 374; three units of technical electives from: CE 429, 435, 446, 458.

## Master of Science in Civil Engineering (code 6-4325)

### Prerequisites

1. A bachelor's degree in an accredited curriculum in civil engineering; or
2. A bachelor's degree in engineering, a natural science or other appropriate discipline with the requirement that essential undergraduate prerequisites in civil engineering be satisfied with a minimum GPA of 2.7 in the last 60 semester units attempted;
3. Graduate students must consult with the graduate advisor for information concerning procedures and requirements for appropriate approval of their courses of study prior to enrolling in their graduate programs.

### Advancement to Candidacy

1. Removal of all undergraduate deficiencies as determined by the Department Graduate Studies Committee;
2. Completed at least 12 graduate units at CSULB; minimum GPA of 3.0; currently enrolled;
3. Passing the Writing Proficiency Examination.

### Requirements

Completion of a minimum of 30 units beyond the bachelor's degree and graduate coursework as follows:

1. A minimum of 24 units in engineering, probability and statistics and mathematics courses with 18 units of 500-/600-level courses in Civil Engineering. Within these 18 units a student may include six units of CE 698 or three units of CE 697; Students are required to complete successfully either CE 697 or CE 698;
2. Six units of electives selected from approved upper-division or graduate courses in appropriate subjects;

3. Fulfill one of the following alternatives:

I - Write and present orally a thesis to be approved by the thesis committee;

II - Pass a written comprehensive examination on coursework in the student's program.

## Civil Engineer Degree (C.E.) (code 7-4324)

The program leading to the Civil Engineer degree offers the qualified student professionally oriented courses with greater concentration in civil engineering than is required by the master of science in civil engineering. This program encourages appropriate advanced studies in other disciplines of the University.

### Prerequisites

1. A master of science degree in civil engineering from an accredited institution with a minimum GPA of 3.5; or
2. A bachelor of science degree in civil engineering from an accredited institution with a minimum GPA of 3.0; or
3. A bachelor of science degree in engineering, mathematics, physical sciences or other appropriate disciplines from an accredited institution with a minimum GPA of 3.0 with the requirement that essential undergraduate prerequisites in civil engineering will be satisfied prior to commencing the student's civil engineering degree program;
4. The graduate student must consult with the graduate advisor and Civil Engineering Department graduate brochure for information concerning departmental procedures and requirements and for appropriate approvals of the course of study prior to enrolling in courses in the student's graduate program.

Exceptional cases not meeting the above minimum GPA may be considered by the Department Graduate Studies Committee.

### Advancement to Candidacy

1. A Department Graduate Studies Committee, consisting of the graduate student's advisor and at least two other faculty members, will be responsible for the formulation and supervision of each individual graduate student's program;
2. The committee shall determine candidacy admission, and requirements as to removal of undergraduate and/or graduate prerequisite deficiencies;
3. Prior to determining advancement requirements the committee may, at its discretion, require the student to take an examination in the chosen area.

### Requirements

1. Completion of a minimum of 60 units beyond the bachelor's degree and graduate courses, approved by the student's Department Graduate Studies Committee including:
  - a. A minimum of 36 units of 500- and 600-level civil engineering courses including a thesis of nine units to be written and presented orally;
  - b. Twenty-four units of 400-, 500- and 600-level approved electives.
2. No more than 30 units completed before advancement to candidacy may be used in completing the requirements for the CE degree.

## Certificate in Waste Engineering and Management (code 1-4050)

The 24-unit Certificate Program in Waste Management is designed to provide the interested student or qualified practitioner with the very latest in education and training in the field of management of waste as well as related resource and energy recovery.

The program is conducted in cooperation with local engineering consulting firms and government agencies and could accommodate an internship of three units through directed study (CE 697).

The 24-unit certificate program may be taken (1) by a graduate as a matriculated student, (2) admitted to a CSULB graduate degree program, or admitted as an unclassified graduate student.

Regardless of how the program is taken, a grade of "C" or better must be obtained in all courses applied to the certificate, with an overall G.P.A. of 3.0. Courses taken on Credit/No Credit or Audit basis will not apply to the certificate. Graduate students taking courses in this program are reminded that grades received will be included in calculations of the M.S. requirement.

### Requirements

1. Completion of an accredited baccalaureate degree in engineering or a related scientific discipline, with appropriate prerequisites to be met.
2. Satisfactory completion of 24 units which must include 15 units selected from C E 531, 543, 565; Public Policy and Administration 590 (Waste Management and Policy Regulation); a minimum of nine units (electives) selected from the following: C E 504, 549, 561, 562, 563, 564, 566, 567, 569; CH E 555, 585; and ME 695. At least one course should normally be from non-Civil Engineering offerings.
3. Passing score in GWPE.
4. File a program application card with Admissions and Records, and file for the Certificate at least one semester prior to completion.

## Courses (C E)

### Lower Division

#### 205. Analytical Mechanics I (Statics) (3)

Prerequisite: PHYS 151. Prerequisite or corequisite: MATH 123. Application of the mechanics of equilibrium to force systems using analytical and graphical solutions of problems involving structures and machines. (Lecture-Problems 3 hours.) (CAN ENGR 8)

#### 206. Computer Programming and Civil Engineering Applications I (2)

Prerequisites: MATH 122, PHYS 151. Introduction to Fortran programming and application of computers to elementary civil engineering problems. (Lecture-Problems 1 hour, Laboratory 3 hours.)

#### 225. Surveying and Mapping (2)

Prerequisites: ME 172. Theory and practice of plane surveying, including the use of instruments, measurements and keeping field notes of distances, angles, elevations, traversing and plane tabling. Plotting of surveying data as related to profiling contours and topography. Study and interpretation of maps relating to civil engineering. (Lecture-Problems 1 hour, Fieldwork 3 hours.) (CAN ENGR 10)

### Upper Division

#### 300. Materials for Civil Engineering (2)

Prerequisites: CHEM 111A, PHYS 151. Prerequisite or corequisite: CE 205. Basic properties of materials in civil engineering, including concrete, masonry, steel, wood, asphalt and composites. (Lecture 1 hour, Laboratory 3 hours.) Traditional grading only.

#### 306. Computer Programming and Civil Engineering Applications II (2)

Prerequisite: CE 206. Application of numerical methods and computer programming to the solution of civil engineering problems. (Lecture-Problems 1 hour, Laboratory 3 hours.)

#### 335. Fluid Mechanics (3)

Prerequisites: MATH 224, C E 205 or consent of instructor. Properties of fluids, fluid statics, fluid dynamics, dynamic similitude, flow of compressible and incompressible fluids in closed conduits, uniform flow in prismatic open channels. (Lecture-Problems 3 hours.)

#### 336. Fluid Mechanics Laboratory (1)

Prerequisite: ENGL 100 or equivalent. Prerequisite or corequisite: C E 335. Experiments in and study of the phenomena of fluid flow. (Laboratory 3 hours.)

#### 345. Geotechnical Engineering I (3)

Corequisites: ME 373; GEOL 370. Soil mechanics applied to engineering structures. Soil exploration, identification, classification, drainage, stability and bearing capacity. (Lecture-Problems 3 hours.)

#### 346. Geotechnical Engineering Laboratory (1)

Prerequisite: ENGL 100 or equivalent. Corequisite: CE 345. Laboratory investigation and experiments in the phenomena of soil mechanics. (Laboratory 3 hours)

#### 359. Structural Analysis I (3)

Prerequisite: ME 373. Analysis of structures including trusses, beams, and frames, conjugate beam, virtual work, energy methods, approximate methods, and influence lines. (Lecture-Problems 3 hours.)

#### 364. Environmental Engineering (3)

Prerequisite or corequisite: CE 335; Prerequisite: ENGL 100 or equivalent. Study, simulations and design of the environmental elements of a community. Special emphasis is made in the field of water quality. Introduction to land and air pollution abatement and environmental health engineering. Standard laboratory methods of water and wastewater analysis. (Lecture 2 hours, Laboratory 3 hours)

#### 370. Analytical Mechanics (3)

Prerequisites: PHYS 151; Prerequisite or corequisite: MATH 123. Fundamental principles of statics, kinematics and kinetics, with application to idealized structures and systems. Intended for Electrical Engineering majors. Not open to Civil or Mechanical Engineering majors. (Lecture-Problems 3 hours.)

#### 404. Laboratory Techniques (1)

Prerequisites: ENGL 100 or equivalent, senior standing in civil engineering and consent of instructor. Study in the techniques of organizing and directing of the civil engineering laboratory. May be repeated for maximum credit of 3 units. (Conference 1 hour, Laboratory 3 hours.)

#### 405. Special Topics in Civil Engineering (3)

Prerequisite: Senior standing in civil engineering or consent of instructor. Selected topics from recent advances in civil engineering. Course content will vary from year to year. (Maximum credit 6 units. Lecture-Problems 3 hours.)

#### 406./514. Engineering Economy and Administration (3)

Prerequisite or Corequisite: ECON 300 or consent of instructor. Engineering management principles and economic analysis: with time value of money, after-tax analysis for rate of return. Graduate students will be required to do an additional assignment. (Lecture-Problems 3 hours.) Traditional grading only.

#### 407. Probability and Statistics in Civil Engineering (2)

Prerequisites: Math 370A and senior standing. Analysis of uncertainties, and applications of the basic theories of probability and statistics in civil engineering areas of geotechnical, environmental, water resources, structural and transportation engineering. Traditional grading only. (Lecture-problems 1 hour, Laboratory 3 hrs.)

**408. Special Problems (1-3)**

Prerequisite: Senior standing in civil engineering. Assigned topics in technical literature or laboratory projects and report on same.

**410. Concrete Materials and Construction Engineering (3)**

Prerequisite: CE 300 or consent of instructor. Advances in materials for making concretes, mixed design using computers. Modern applications of concrete construction including buildings, transportation structures, rehabilitation of infrastructures. Polymer concretes. Quality control, durability and economics. Graduate students will be required to do additional readings from journals, research reports and advanced texts, and write a research term paper to deal with Problems of current interest on concrete materials and advanced concrete construction engineering methods. (Lecture-Problems 2 hours, Laboratory 3 hours).

**411. Computer Aided Design and Analysis for Civil Engineers (3)**

Prerequisite: CE 206 and senior standing. Techniques for utilizing selected computer models currently recognized by the civil engineering profession. Case studies, capabilities and limitations of these models. Application of selected models in the planning, analysis and design of civil engineering projects. (Lecture-Problems 3 hours.) Traditional grading only.

**426. Transportation Engineering (3)**

Prerequisites: CE 345, CE 406 and Senior standing, or consent of the instructor. Theory, Design and operation of various modes of transportation. (Lecture-Problems 3 hours).

**427. Highway Design (3)**

Prerequisite: C E 345. Design problems in highway engineering. Design project. (Lecture-Problems 3 hours.)

**429./529. Traffic Engineering (3)**

Prerequisite: CE 426 or consent of instructor. Traffic Engineering as related to studies, planning, operation and administration. Graduate students will be required to do extra work, including assigned readings and a term paper in order to understand the planning and design of complex highway projects involving the relationship of traffic data and interpretation for design and applications. (Lecture-Problems 2 hours, Laboratory 3 hours.)

**435. Hydrology and Water Resources Engineering (3)**

Prerequisite: C E 335. Fundamental surface and ground water hydrology concepts and quantitative methods. Selected topics and procedures of the hydrological cycle. Planning, development and management of water resource surface systems. (Lecture-Problems 3 hours.)

**437. Engineering Hydraulics (3)**

Prerequisites: C E 335, MATH 370 A. Theory and analysis of steady uniform and non-uniform flow in open conduits. Energy and momentum principles, critical flow computations and applications, design of channels, computations of gradually varied, spatially varied and rapidly varied flows. (Lecture-Problems 3 hours.)

**438. Hydraulic Engineering Design I (3)**

Prerequisite: CE 335. Application of hydraulic principles to the design of dams, water courses, water systems and their related structures and devices. (Lecture-Problems 2 hours, Laboratory 3 hours.)

**445. Geotechnical Engineering II (3)**

Prerequisites: CE 345, 346. Methods of design and construction of various geotechnical engineering projects utilizing theory of soil mechanics. (Lecture-Problems 3 hours.) Traditional grading only.

**446./542. Geotechnical Projects (3)**

Prerequisite: CE 345. Design and problem solving oriented geotechnical projects using soil mechanics theory and experimental methods according to the current state-of-the-art practice. Emphasis is placed on the fields of slope stability, pile foundation, seepage and soil dynamics. Graduate students will be required to do additional readings from journals, research reports and advanced texts, and write a research term paper to deal with current topics in geotechnical engineering, including soil remediation for waste treatment and landfill, and soil dynamics problems in foundations and earthquake engineering. (Lecture-Problems 2 hours, Laboratory 3 hours).

**455. Structural Steel Design (3)**

Prerequisite: C E 458. Detailed design of components with typical codes and specifications. (Lecture-Problems 3 hours.)

**456./516. Timber Design (3)**

Prerequisite: CE 359. Corequisite: CE 458. Design of stressed skin panels, supporting members, frames and their connections. Applications to timber structures and concrete framework. Graduate students will be required to do required readings and term paper linking material and structural behavior to design codes, applications. (Lecture-Problems 2 hours, Laboratory 3 hours). Traditional grading only.

**457./517. Reinforced Masonry Design (3)**

Prerequisite: CE 359. Corequisite: CE 458. Theory, design and application of reinforced masonry (brick and block) in compliance with the Uniform Building Code. Earthquake provisions. Construction and specifications. Design of high rise buildings, industrial buildings, retaining walls. Advanced students will be required to do a design project using a response spectrum of a two-story building; assigned readings from journals and a research term paper linking behavior of reinforced masonry systems to design codes and design applications for wind and seismic effects. (Lecture-Problems 2 hours, Laboratory 3 hours). Traditional grading only.

**458. Structural Analysis II (3)**

Prerequisite: C E 359. Solution of indeterminate truss and frame structures using moment distribution and slope deflection methods. Introduction to matrix methods. Computer solutions. Energy theorems and virtual work principles. (Lecture-Problems 3 hours.)

**459. Reinforced Concrete Design I (3)**

Prerequisite: C E 300 and C E 359. Theory and design of structural elements of reinforced concrete, analysis by working stress and ultimate strength design theories. (Lecture-Problems 3 hours.)

**466. Environmental Systems Design (3)**

Prerequisites: CE 364 or consent of instructor. Principles of environmental systems design. Design and planning of systems for water distribution, wastewater collection and storm water management. (Lecture-Problems 3 hours)

**469./569. Hazardous and Toxic Waste Engineering Management (3)**

Prerequisite: Consent of instructor. Engineering analysis of hazardous and toxic waste problems of contemporary interest. Current technical specifications at federal, state and local level. Engineering planning, design and management considerations. Detailed engineering, chemical, biological and risk-cost effectiveness and effect on public health. Current literature. Case studies. Term project for graduate students. (Research paper/design project.) (Lecture-Problems 3 hours.) Traditional grading only.

**481. Professional Practice In Civil Engineering (1)**

Prerequisite: Senior standing. Topics related to practice of civil engineering profession. Professional society meetings and readings. (Lecture-Problems 1 hour.)

**490. Senior Design Project (3)**

Prerequisites: WPE, completion of all 300-level engineering courses for the civil engineering major and consent of department undergraduate advisor. Normally taken in the last year of the undergraduate program. A supervised design laboratory, with a required group project incorporating all aspects from concept to completed design and oral presentations. In addition to technical and design issues, social, environmental, and economic issues are discussed relative to each project. Ethical concepts relating to Civil Engineering profession are also discussed within each group, as well as by guest lecturers consisting of professional Civil Engineers. Traditional grading only. (Lecture-Problems 2 hours, Design laboratory 3 hours).

**491. Structures Laboratory (1)**

Prerequisite: C E 359 and ENGL 100 or equivalent. Prerequisites or corequisites C E 455, C E 459; Laboratory examination of structural concepts. (Laboratory 3 hours.)

**494. Finite Element Methods I (3)**

Prerequisite: C E 458 or consent of instructor. Introduction to finite element methods for structural and stress analysis and design.

Applications using computer program SAP and various elements are emphasized. (Lecture-Problems 3 hours.)

#### 495. Seismic Design I (3)

Prerequisites: CE 455, 459. Elements of lateral-force design in steel, concrete, masonry, and timber structures. Application of current building codes. (Lecture 3 hours.)

#### 497. Senior Problem Directed Studies (2)

Prerequisite or corequisite: CE 406, 481, 490. Directed study on assigned topics or lab/field studies practicum and report on same.

### Graduate Division

#### 500. Engineering Analysis I (3)

Prerequisites: MATH 370A. Application of analytical methods to engineering problems. Differential equations and series solutions, Bessel functions and Legendre polynomials, boundary value and eigenvalue problems, Fourier series, partial differential equations, vector analysis. (Lecture-Problems 3 hours) Traditional grading only.

#### 501. Engineering Analysis II (3)

Prerequisites: MATH 370A. Analysis of engineering mechanics by matrix theory and complex variables; introduction to numerical techniques. (Lecture-Problems 3 hours.) Traditional grading only.

#### 502. Finite Element Methods II (3)

Prerequisite: C E 494 or consent of instructor. Theory of finite element methods. Discretization of continuum, element stiffness matrices and direct stiffness formulation. Application to frame, plane stress and strain, plate and shell problems using SAP. (Lecture-Problems 3 hours.) Traditional grading only.

#### 503. Selected Topics in Civil Engineering (3)

Prerequisites: Graduate standing and consent of instructor. Selected topics, with laboratory work required, from the most recent developments in civil engineering. Course content will vary from year to year and the specific topic will be recorded on the student's transcript. May be repeated once for credit. No more than six units of CE 503 or CE 504 may be counted for the Master's Degree. (Lecture-Problems 2 hours, Laboratory 3 hrs) Traditional grading only.

#### 504. Advanced Topics in Civil Engineering (3)

Prerequisites: Graduate standing or consent of instructor. Selected topics from recent developments in civil engineering. Course content will vary from year to year. May be repeated once for credit. No more than six units of CE 503 and/or CE 504 may be counted for the master's degree. (Lecture-Problems 3 hrs) Traditional grading only.

#### 508. Probabilistic and Statistical Methods in Engineering Applications (3)

Prerequisites: Graduate standing or consent of instructor. Civil Engineering applications of nondeterministic models and decision theory. Applications of proven statistical computer programs. (Lecture-Problems 3 hours). Traditional grading only.

#### 509. Computational Methods in Civil Engineering (3)

Prerequisites: Graduate standing or consent of instructor. Numerical analysis and computer methods applied to various branches, including special problem-oriented languages. Application of proven computer programs. (Lecture-problems 2 hours, Laboratory 3 hours) Traditional grading only.

#### 514./406. Engineering Economy and Administration (3)

Prerequisite or Corequisite: ECON 300 or consent of instructor. Engineering management principles and economic analysis: with time value of money, after-tax analysis for rate of return. Graduate students will be required to do an additional assignment. (Lecture-Problems 3 hours.) Traditional grading only.

#### 516./456. Timber Design (3)

Prerequisite: CE 359. Corequisite: CE 458. Design of stressed skin panels, supporting members, frames and their connections. Applications to timber structures and concrete formwork. Graduate students will be required to do required readings and term paper linking material and structural behavior to design codes, applications. (Lecture-Problems 2 hours, Laboratory 3 hours). Traditional grading only.

#### 517./457. Reinforced Masonry Design (3)

Prerequisite: CE 359. Corequisite: CE 458. Theory, design and application of reinforced masonry (brick and block) in compliance with the Uniform Building Code. Earthquake provisions. Construction and specifications. Design of high rise buildings, industrial buildings, retaining walls. Advanced students will be required to do a design project using a response spectrum of a two-story building; assigned readings from journals and a research term paper linking behavior of reinforced masonry systems to design codes and design applications for wind and seismic effects. (Lecture-Problems 2 hours, Laboratory 3 hours). Traditional grading only.

#### 520. Seaport Planning and Design (3)

Prerequisite: CE 426 or consent of instructor. Planning and design of seaports and facilities as access systems. Support transportation, use analysis and ocean transport crafts. Site selection and comprehensive planning. (Lecture-Problems 3 hours.) Traditional grading only.

#### 522. Transportation Planning (3)

Prerequisite: C E 426 or consent of instructor. Planning of fixed facilities for various modes of transportation in urban areas. Engineering administration and integration of transportation systems. (Lecture-Problems 3 hours) Traditional grading only.

#### 526. Pavement Engineering (3)

Corequisite: C E 427 or consent of instructor. Aggregate, binder systems. Theory and design of pavement structures. (Lecture-Problems 3 hours.) Traditional grading only.

#### 529./429. Traffic Engineering (3)

Prerequisite: CE 426 or consent of instructor. Traffic Engineering as related to studies, planning, operation and administration. Graduate students will be required to do extra work, including assigned readings and a term paper in order to understand the planning and design of complex highway projects involving the relationship of traffic data and interpretation for design and applications. (Lecture- Problems 2 hours. Laboratory 3 hours.) Traditional grading only.

#### 531. Groundwater and Seepage (3)

Prerequisites: C E 335, 345 or consent of instructor. Theory and application of ground-water flow and seepage through earth structures. (Lecture-Problems 3 hours.) Traditional grading only.

#### 532. Sediment Transportation (3)

Prerequisite: C E 437. Phenomena of sediment transportation related to streams and marine environments. (Lecture-Problems 3 hours.) Traditional grading only.

#### 535. Advanced Hydrology (3)

Prerequisites: Graduate standing or consent of instructor. Theory and application of surface hydrology. Hydrologic statistics, dynamic wave routing, frequency analysis and risk analysis. Simulation of design flows, flood forecasting, flood plain analysis and hydrologic design. Mathematical models, numerical methods in analysis and evaluation. (Lecture-Problems 3 hours). Traditional grading only.

#### 536. Urban Surface Water Management (3)

Prerequisite: CE 437 or consent of instructor. Planning and design of facilities to control flooding, erosion, sedimentation, and non-point source pollution for urban storm water runoff management. Presentation of analysis and design methodologies, structural and non-structural measures for management, and master planning principles. (Lecture-Problems 3 hours.) Traditional grading only.

#### 538. Hydraulic Engineering Design II (3)

Prerequisites: C E 437, 438 or consent of instructor. Design of water supply networks, hydraulic transitions, controls and structures. Hydraulic power conversion. River engineering. Water resources systems. (Lecture-Problems 3 hours.) Traditional grading only.

#### 539. Coastal Engineering (3)

Prerequisite: consent of instructor. Wave mechanics, tides, surge, wave refraction, diffraction and reflection, application to design of coastal and off shore structures and to the study of beach erosion problems. (Lecture-Problems 3 hours.) Traditional grading only.

**542./446. Geotechnical Projects (3)**

Prerequisite: CE 345. Design and problem solving oriented geotechnical projects using soil mechanics theory and experimental methods according to the current state-of-the-art practice. Emphasis is placed on the fields of slope stability, pile foundation, seepage and soil dynamics. Graduate students will be required to do additional readings from journals, research reports and advanced texts, and write a research term paper to deal with current topics in geotechnical engineering, including soil remediation for waste treatment and landfill, and soil dynamics problems in foundations and earthquake engineering. (Lecture-Problems 2 hours, Laboratory 3 hours). Traditional grading only.

**543. Waste Management and Landfill Engineering (3)**

Prerequisites: Graduate standing or consent of instructor. Advanced principles and practices of landfill engineering for waste management and subsurface flow problems. Presentation of research and case studies in geotechnical aspects of waste management and landfill engineering. (Lecture-Problems 3 hours) Traditional grading only.

**545. Rock Mechanics in Engineering Practice (3)**

Prerequisites: CE 345, 346, or consent of instructor. Principles of rock mechanics with emphasis on engineering practices for problems of slopes, foundations and tunnels. Same course as GEOL 545. (Lecture-Problems 3 hours) Traditional grading only.

**546. Theory and Design of Foundation Structures (3)**

Prerequisites: CE 345 or consent of instructor. Foundation, explorations, stress and deformation relationships and design of various footings, piles, piers and caissons. Analysis of lateral loads and design of retaining structures, machinery foundations and foundation dewatering. (Lecture-Problems 3 hours) Traditional grading only.

**547. Soil Dynamics (3)**

Prerequisites: CE 345 or consent of instructor. Theories and field behaviors of dynamically loaded foundation systems and soil responses with emphasis on engineering applications. (Lecture-Problems 3 hours) Traditional grading only.

**548. Geotechnical Engineering III (3)**

Prerequisite: C E 345 or consent of instructor. Stress-strain time relationship of soils. Theory and methods of analysis with special emphasis on the applications and limitations in soil engineering. (Lecture-Problems 3 hours.) Traditional grading only.

**549. Advanced Soil Mechanics Techniques (3)**

Prerequisite: CE 345 or consent of instructor. Current theories on soil mechanics topics and advanced testing techniques. (Lecture-Problems 2 hours, Laboratory 3 hours) Traditional grading only.

**550. Behavior and Design of Concrete Structures (3)**

Prerequisite: C E 459. Behavior of plain, and partially prestressed concrete members and structures, theories of composite action, structural safety, code provisions and applications to advanced design of concrete structures. (Lecture-Problems 3 hours.) Traditional grading only.

**551. Prestressed Concrete (3)**

Prerequisite: C E 459. Principles of prestressed concrete. materials used, applications to structural design, review of existing specifications. (Lecture-Problems 3 hours.) Traditional grading only.

**552. Theory of Plates and Shells (3)**

Prerequisite: Completion of C E Graduate MATH Requirement. Review of theory of elasticity; formulation of general equation of bending of thin elastic plates; methods of obtaining exact and approximate solutions; membrane and bending theories of shells with emphasis on cylindrical shells and shells of revolution. (Lecture-Problems 3 hours.) Traditional grading only.

**553. Behavior and Design of Steel Structures (3)**

Prerequisite: C E 455. Study of torsion, unsymmetrical bending, stability. Plastic design, code provisions and commentary. Design of complete structural systems in steel. (Lecture-Problems 3 hours.) Traditional grading only.

**555. Seismic Design II (3)**

Prerequisite: C E 495 or consent of instructor. Characteristics of earthquakes and seismicity response spectra, modal methods of analysis, practical examples of elastic and inelastic response of structures to earthquake motions. New development in codes, computer applications. (Lecture-Problems 3 hrs) Traditional grading only.

**557. Advanced Structural Analysis (3)**

Prerequisite: C E 458 or consent of instructor. Virtual forces and displacements, strain energy and complementary energy. Force and displacement matrix methods. Computer applications to planar and space frames, trusses, floor beams and shear wall systems. (Lecture-Problems 3 hours.) Traditional grading only.

**558. Dynamics of Structures (3)**

Prerequisite: CE 458 or consent of instructor. Response of structures and structural components having one or more degrees of freedom. Damping and inelastic action; earthquake and nuclear blasts, dynamic resistance of structural elements and structures, elastic and inelastic response of structures. (Lecture-Problems 3 hours) Traditional grading only.

**561. Waste Minimization and Resources Recovery (3)**

Prerequisite: CE 364, or consent of instructor. Management practices, technology, regulations, characteristics of waste disposal options, resource recovery systems, recycling, hazardous wastes and waste reduction as related to municipal solid waste and hazardous waste reduction strategies. (Lecture-Problems 3 hours) Traditional grading only.

**562. Water and Wastewater Treatment Design I (3)**

Prerequisite: C E 364 or consent of instructor. Design of physical and chemical processes for water and wastewater treatment, with emphasis on water treatment plants. (Lecture-Problems 3 hours.) Traditional grading only.

**563. Water and Wastewater Treatment Design II (3)**

Prerequisite: C E 562 or consent of instructor. Design of chemical and biological processes for water and wastewater treatment with emphasis on wastewater treatment. (Lecture-Problems 3 hours.) Traditional grading only.

**564. Environmental Health Engineering (3)**

Prerequisites: CE 364 or consent of instructor. Health and safety aspects of environmental quality and related engineering systems. Regulatory aspects. Projects and case studies. (Lecture-Problems 3 hours) Traditional grading only.

**565. Environmental Waste Engineering (3)**

Prerequisites: CE 364 or consent of instructor. Generation, treatment, resource recovery and disposal of industrial wastes, solid wastes and hazardous materials. (Lecture-Problems 3 hrs) Traditional grading only.

**566. Unit Operations in Environmental Engineering (3)**

Prerequisites: CE 364 or consent of instructor. Civil engineering applications of the fundamentals of chemical reactions, kinetics of biochemical systems, gas transfer operations, liquid/solid separations, solubility equilibria, adsorption, ion exchange and membrane processes. (Lecture-Problems 3 hours) Traditional grading only.

**567. Liquid and Solid Waste Project Planning and Management (3)**

Prerequisites: CE 364 or consent of instructor. The presentation of research and case studies of liquid and solid waste project planning and management. (Lecture-Problems 3 hours) Traditional grading only.

**569./469. Hazardous and Toxic Waste Engineering Management (3)**

Prerequisite: Consent of instructor. Engineering analysis of hazardous and toxic waste problems of contemporary interest. Current technical specifications at federal, state and local level. Engineering planning, design and management considerations. Detailed engineering, chemical, biological and risk-cost effectiveness and effect on public health. Current literature. Case studies. Term project for graduate students (Research paper/design project.) (Lecture-Problems 3 hours.) Traditional grading only.

**570. Engineering Management Principles and Practices (3)**

Prerequisites: CE 406, graduate standing or consent of instructor. Transition of engineers into management. Analysis of technical manager's functions at lower and middle levels as support to corporate management. Principles of engineering management and applications to private and public sector organizations. Case studies of practices in different technical organizations. (Lecture 3 hours.) Traditional grading only.

**571. Construction Planning and Cost Control (3)**

Prerequisites: Graduate standing or consent of instructor. Planning, scheduling and resource allocation for a complex construction project. Topics include traditional critical path method, advanced computer expert systems and optimization techniques for construction planning and cost control. (Lecture-Problems 3 hours). Traditional grading only.

**572. Modeling of Engineering Project Management Principles and Practices (3)**

Prerequisites: Graduate standing or consent of instructor. Mathematical modeling techniques applied to engineering project management decisions. Application of proven computer programs. (Lecture-Problems 2 hours, Laboratory 3 hours) Traditional grading only.

**573. Engineering Specifications, Law and Contracts (3)**

Prerequisite: Graduate standing or consent of instructor. Application of law of contracts to construction contracts. Legal matters of concern to engineers. (Lecture-Problems 3 hours) Traditional grading only.

**574. Methods, Analysis and Design of Construction Operations (3)**

Prerequisite: CE 571 or consent of instructor. Equipment, methods, analysis and design of a construction operation, from site work improvement and data acquisition to modeling and design. Particular attention will be paid to interfacing between design and construction activities and work method development, productivity and safety. (Lecture-Problems 3 hours.) Traditional grading only.

**576. Construction Organization and Management (3)**

Prerequisites: Graduate standing or consent of instructor. An introduction to construction organization, control concepts and labor, emphasizing the business aspects of construction engineering management. Topics include legal framework, finance in construction management, labor, accounting and other decision making in the construction business. (Lecture-Problems 3 hours) Traditional grading only.

**577. Business Aspects & Finance of Construction Projects (3)**

Prerequisite: CE 406 or consent of instructor. Economics and business aspects in construction, financing structure, methodology, and project financial evaluation. Emphasis is on financial aspects in property acquisition, development, construction, and project management. (Lecture-Problems 3 hours.) Traditional grading only.

**578. Management of Advanced Technologies in Construction (3)**

Prerequisite: Consent of instructor. New development of advanced technology as applied to construction industry. Productivity and competitiveness in construction on the basis of new technology. Comparison of construction innovation in the U.S., Japan, and other countries. (Lecture-problems 3 hours) Traditional grading only.

**582. Management of Productivity and Quality (3)**

Prerequisite: CE 570 or consent of instructor. System approaches to quality and productivity in construction. Total Quality Management (TQM) in construction engineering and management. Investigation of methods and strategies for improving competitiveness at the company level. Domestic and international competitiveness in the construction business. (Lecture-Problems 3 hours.) Traditional grading only.

**629./729. Traffic Operations (3)**

Prerequisite: CE 429 or CE 529, or consent of instructor. Principles of traffic flow, signal timing optimization, signal coordination, and traffic. Graduates enroll in CE 629; post graduates enroll in CE 729. Post-graduate students will be required to do additional work (Lecture-Problems 3 hours). Traditional grading only.

**630./730. Mathematical Modeling in Hydraulic Engineering (3)**

Prerequisite: CE 437 or consent of instructor. Numerical techniques for solving hydraulic problems in water supply, waste water disposal and storm drainage systems. Prediction of important parameters by mathematical modeling on problems encountered in artificial channels, rivers, estuaries and marine environments. M.S. students register in CE 630; Ph.D. students register in CE 730. Ph.D. students will be required to complete a more rigorous computer project. (Lecture-Problems 3 hours.) Traditional grading only.

**640./740. Mathematical Modeling in Geotechnical Engineering (3)**

Prerequisite: Graduate standing or consent of instructor. Mathematical modeling techniques used in geotechnical engineering. Application of proven computer programs. M.S. students register in CE 640; Ph.D. students register in CE 740. Ph.D. students will be required to complete a more rigorous computer project. (Lecture-Problems 3 hours.) Traditional grading only.

**696. Research Methods (1)**

Prerequisite: Candidacy or consent of instructor. Bibliographical and library techniques and resources. Preparation and presentation of theses and directed studies technical papers. Traditional grading only.

**697. Directed Studies (1-3)**

Prerequisite: Graduate standing. Corequisite: CE 696 or written consent of directed studies advisor. MSCE and MSE degree candidates in Civil Engineering and Interdisciplinary Areas need to have either CE 697 or CE 698 as their program requirement. Theoretical and experimental problems in civil engineering requiring intensive analysis. Traditional grading only.

**698. Thesis (2-6)**

Prerequisite: Admission to candidacy for degree of master of science in civil engineering. Corequisite: CE 696 or written consent of faculty advisor. Planning, preparation and completion of a thesis and/or project in the field of civil engineering. May be repeated to a total of 6 units.

**699. Thesis (3-9)**

Prerequisite: Admission to candidacy for degree of Civil Engineer. Corequisite: CE 696 or written consent of faculty advisor. Planning, preparation and completion of a thesis in the field of civil engineering practice. May be repeated to a total of 9 units.

**729./629. Traffic Operations (3)**

Prerequisite: CE 429 or CE 529, or consent of instructor. Principles of traffic flow, signal timing optimization, signal coordination, and traffic. Graduates enroll in CE 629; post graduates enroll in CE 729. Post-graduate students will be required to do additional work (Lecture-Problems 3 hours). Traditional grading only.

**730./630. Mathematical Modeling in Hydraulic Engineering (3)**

Prerequisite: CE 437 or consent of instructor. Numerical techniques for solving hydraulic problems in water supply, waste water disposal and storm drainage systems. Prediction of important parameters by mathematical modeling on problems encountered in artificial channels, rivers, estuaries and marine environments. M.S. students register in CE 630; Ph.D. students register in CE 730. Ph.D. students will be required to complete a more rigorous computer project. (Lecture-Problems 3 hours). Traditional grading only.

**740./640. Mathematical Modeling in Geotechnical Engineering (3)**

Prerequisite: Graduate standing or consent of instructor. Mathematical modeling techniques used in geotechnical engineering. Application of proven computer programs. M.S. students register in CE 640; Ph.D. students register in CE 740. Ph.D. students will be required to complete a more rigorous computer project. (Lecture-Problems 3 hours.) Traditional grading only.

The College of Liberal Arts provides courses in the Humanities and Social Sciences for all university students, as well as for majors in its disciplines. The College is also responsible for much of the General Education required of all students and provides professional training in Journalism. Through the Liberal Arts, students acquire a fundamental understanding of social and individual behavior and of cultures and belief systems in the past and present. Communication, verbal and written, in English and other languages, and across cultures, is a fundamental emphasis throughout the curriculum. Liberal Arts disciplines also emphasize the acquisition and analysis of information and its use to understand and to help resolve complex social problems. The College of Liberal Arts is the center of the university's commitment to developing greater knowledge and understanding of international and multicultural issues in the contemporary world.

## *Degree programs offered*

Bachelor of Arts:

Anthropology, Asian Studies, Black Studies, Business Economics Chicano and Latino Studies, Chinese Studies, Classics, Comparative Literature, Economics, English, Geography, French, German, History, Human Development, International Studies, Japanese, Journalism, Philosophy, Political Science, Psychology, Religious Studies, Sociology, Spanish, Speech Communication, and Women's Studies.

Master of Arts:

Anthropology, Asian Studies, Economics, English, French, Geography, German, History, Linguistics, Philosophy, Political Science, Psychology (with options in general research and in industrial and organizational psychology), Religious Studies, Spanish, and Speech Communication.

Master of Fine Arts:

English

Master of Science:

Psychology

Certificate Programs:

American Indian Studies, Asian Studies, Asian American Studies, Black Studies, Japanese, Latin American Studies, Legal Studies in the Liberal Arts, Medieval and Renaissance Studies, Russian-East European Studies, Teaching English as a Second Language, Technical and Professional Writing, and Urban Studies

Minor Programs:

American Indian Studies, Anthropology, Asian Studies, Asian American Studies, Black Studies, Chicano and Latino Studies, Comparative Literature, Classical Studies, English (Literature, Language and Composition, Creative Writing, Teaching, or Special Option), French, Geography, German, Greek, History, International Economics, Italian, Jewish Studies, Latin, Latin American Studies, Linguistics, Medieval and Renaissance Studies, Middle Eastern Stud-

ies, Philosophy, Political Science, Public Administration, Psychology, Religious Studies, Russian, Sociology, Spanish, Speech Communication, and Women's Studies.

#### Language Courses:

Chinese (Mandarin), Cambodian (Khmer), French, German, Greek, Hebrew, Italian, Japanese, Latin, Russian, Spanish, and Swahili.

#### *Special Facilities*

The College operates special facilities including archeology, geography, language, psychology, writing, and general computer laboratories.

#### *Student Activities*

Most of the departments in the College of Liberal Arts have either a student association or honor organization which provides students with a program of activities. Students should contact the department of their major to inquire about the kinds of organizations available to them or contact the College Coordinator for Student Life and Development, Anna Nazarian (985-4181).

The College and Associated Students promote the College Student Council with its representation from each department acting as liaison between the College administration, faculty, and members of the College's student body. The Student Council provides a forum for the development of student leadership skills.

#### *Internships*

The College of Liberal Arts offers internships with on- and off-campus cooperating organizations designed to provide students with practice in the field under supervision. Many individual departments also offer discipline-based internships for advanced students.

#### *Credential Programs*

Single subject credential programs are offered in English, French, German, Spanish, Japanese, and Social Science. Students who plan to teach these subjects in the secondary schools are strongly advised to consult the Single Subject Advisor as early as possible in their studies, so that they fulfill subject matter preparation requirements while completing an undergraduate major.

#### Credential Advisors

Japanese - Dr. Hsin-Sheng C. Kao (985-7530)

Social Science - Dr. Donald Schwartz (985-5090)

English - Dr. Dianne Vipond (985-4402)

English - Dr. Joe Potts (985-7929)

French, German, Spanish - Dr. Griselda Sasayama (985-4319)

## Courses (C/LA)

### Lower Division

#### 190. Special Topics (1-3)

Topics of special interest in the liberal arts for study. Topics will be announced in the *Schedule of Classes* each semester. Course may be repeated to a maximum of 3 units.

#### 195. Introduction to the Learning Community-Transition to College Success (1)

Prerequisite: Acceptance into the Learning Alliance Program.

This course will provide members of the Learning Alliance with an introduction to the learning community in the College of Liberal Arts. The course will address scholarly and academic research skill development, literacy in basic computer skills including e-mail and the Internet, methods to integrate the two disciplines featured in the paired courses, and how to develop a personal academic and life plan. Students will be able to initiate their community volunteer and service learning requirement for the program. Traditional grading only.

#### 250. Elementary Statistics (4)

Prerequisites: Knowledge of mathematical procedures usually covered in elementary high school algebra. Introduction to descriptive and inferential statistics and their applications in social and behavioral science research; performance of statistical exercises by interactive computer. Emphasis upon knowledge of which statistical tests to use and how to interpret their results. Not open to students with credit in ANTH 302, MATH 180 or PSY 110. (Discussion 3 hours, laboratory 2 hours.) Same course as HDEV 250.

### Upper Division

General Education Category A must be completed prior to taking any upper division course except upper division language courses where students meet formal prerequisites and/or competency equivalent for advanced study.

#### 305. British Life and Culture (3)

This series of lectures with follow-up discussion and written responses is a required part of the London Semester Program. The lectures are designed to offer in-depth information on a wide range of social, artistic, and intellectual issues relevant to contemporary England. Although the course is specifically geared to students participating in the London Semester Program, the materials covered are closely related to many topics covered in classes offered during the rest of the students' work on campus. Credit/No credit grading only.

#### 314I. Introduction to Contemporary Europe (3)

Prerequisites: Completion of GE Foundation requirements, one or more Explorations courses, and upper-division standing. An interdisciplinary introduction to contemporary European cultures and related issues through a combination of travel and study. Students will be introduced to some principles and methods useful for analyzing cultures and their own interactions with them. Traditional grading only.

#### 315I. Contemporary European Society (3)

Prerequisites: Completion of GE Foundation requirements, one or more Explorations courses, and upper-division standing. An interdisciplinary approach to understanding cultural and political developments in contemporary European societies. Although the study of history serves as the foundation of the course, the perspectives and methodologies of several other social science disciplines are an important component of the course. Traditional grading only.

#### 400. Evaluating Literacy (3)

Prerequisites: Limited to students in the Liberal Studies major, Track I, who have completed all AREA I Core requirements with a "C" or better grade and passed the WPE, or consent of Program Director. Study of contemporary literacy theory and practice with focus on language, culture, literature, and development of literacy. Students will gain greater, more precise understanding of literacy assessment and its implications, determinations and effects as they are themselves assessed for language competencies. Traditional grading only.

#### 403. Civic Issues and Values (3)

Prerequisites: Limited to students in the Liberal Studies major, Track I, who have completed all Area IV Core requirements with a "C" or better grade. Provides subject opportunities and experiential activities for students to learn to confront controversial issues, solve problems cooperatively, examine issues from multiple and dialogical points of view, and practice listening with understanding and empathy. Student literacy in the social sciences and ability to recognize and deal with the dynamics of a multicultural, multiethnic community will be assessed.

#### 471. History/Social Science Content and Standards for Elementary Classrooms (2)

Prerequisites: Limited to Liberal Studies majors in the Integrated Teacher Education Program (ITEP), who have completed all Area IV Core requirements with a "C" or better grade. Corequisites: EDEL 471 and EDEL 473A. This course will provide a review, analysis and assessment of the content of the California State Social Science Curriculum for grades K through 8. The content of the California History-Social Science Framework will be examined in depth and aligned with the teaching methods and pedagogy taught concurrently in EDEL 471 and EDEL 473A. This is a capstone course and students will be asked to explicitly demonstrate the breadth and depth of their subject-matter content mastery in the social sciences pursuant to the California State qualifications for a Multiple Subject Teaching Credential. Assessment and inquiry will focus upon student literacy in the social sciences, integrating geographical perspectives with historical analysis, and facilitating student depth of knowledge and global perspective in California, Early American, and Pre-Modern World history. Traditional grading only.

#### 485. Oral History Methods (1)

Through a series of workshops and through field experience, skills in oral history will be developed which will enable students to use oral history either for their own personal use in family history or for class projects. Credit/No Credit grading only. Same course as HIST 402.

#### 490. Special Topics (1-3)

Topics of special interest in the liberal arts for intensive study. Topics will be announced in the *Schedule of Classes* each semester. Course may be repeated for a maximum of 9 units with different topics.

#### 491. Special Topics (2)

Topics of special interest in the liberal arts for intensive study. Topics will be announced in the *Schedule of Classes* each semester.

#### 495. Social Science for Teachers (3)

Prerequisites: Students must have completed all coursework in the Social Science Subject Matter Program. A capstone course for students in the Social Science Subject Matter Program, to be offered just prior to student teaching. Examination of issues in social science education in accord with topics highlighted in the California History/Social Science Framework. A grade of "B" or better is required for advancement to student teaching. Traditional grading only.

#### 498. Directed Studies in Oral History (1-6)

Permission of faculty required. Directed study on a research topic using the methodology of oral history. May be repeated for a maximum of 6 units. Same course as HIST 498O.

In a world where science plays an increasingly important role and where an understanding of the sciences is essential for a participating and informed citizenry, the College of Natural Sciences and Mathematics provides quality educational opportunities in the life, physical sciences, and mathematics. Students are provided a broad-based, fundamental education in the natural sciences and mathematics, and are challenged to think critically, analytically, and creatively. Alumni of the College demonstrate that science and mathematics graduates are well-prepared to enter graduate and professional schools or to assume responsible positions in industry or government. Employment opportunities for students with backgrounds in science and mathematics are traditionally excellent.

The College is dedicated to the concept that a university has a special responsibility toward academic excellence and the advancement of knowledge. The faculty and staff of the Departments of Biological Sciences (including the former departments of Anatomy and Physiology, Biology, and Microbiology), Chemistry/Biochemistry, Geological Sciences, Mathematics, Physics/Astronomy, and Science Education are committed to providing an outstanding educational experience for all students.

The College takes its responsibilities in teacher preparation in the sciences and mathematics very seriously. It has recently embarked on several new projects that will provide a stronger, more rigorous, and more engaging set of teacher preparation programs at CSULB. With funding from the National Science Foundation, NASA, and the Knight Foundation, and in collaboration with Colleges of Education and Liberal Arts, Long Beach Unified School District, and Long Beach City College, science and mathematics faculty are working to enrich and align teacher preparation coursework and internship opportunities.

## *Degrees Offered*

Five departments within the College of Natural Sciences and Mathematics offer both the Bachelor of Science and Master of Science degrees. The Departments of Chemistry/Biochemistry, and Physics/Astronomy also offer the Bachelor of Arts degree. Each degree has unique requirements and students should refer to a departmental section of this *Catalog* to determine specific requirements. Ideally, all students participate in the Science Safari to Success (for first time freshmen) or EONS (Enrollment and Orientation in Natural Sciences and Mathematics for transfer students) Programs offered each June-July (for those entering in August) and January (for those entering in January). A department advisor will be available to assist in developing an appropriate academic plan consistent with career goals. During the semester, students may obtain academic advising by contacting the appropriate adviser(s) in the department offering the chosen degree program.

### *Student Research Opportunities*

Faculty in the College involve more than 200 students annually, both undergraduate and graduate, in a wide variety of research activities. Many of these students are supported by research grants, especially during the summer months. Each year many of these students present the results of their research at scientific conferences. It is not unusual for a student to co-author an article appearing in a major scientific journal.

The faculty's commitment to these students is based on the knowledge that involvement in scientific research makes the study of science more real and provides strong motivation for the student to pursue a career in science. Since the anticipated need for scientists far exceeds the enrollment of science majors, we are committed to meeting the short-fall by making the study of science at CSULB as "real world" as possible.

### *Student Access to Science and Mathematics (SAS) and Programs Offered*

A student center (FO5-109) adjacent to the Dean's office is dedicated to promoting success for students who pursue majors in the College and those who take courses in its departments. The Center also facilitates several externally funded programs including The National Institutes of Health (MARC, MSD, and Bridges to the Baccalaureate), and National Science Foundation (CRUI, AMP, LBESTEP). The center provides space for studying, tutoring, mentoring, and meeting rooms for student-centered activities. The Center also serves as the resource center for health profession advising, graduate school opportunities, summer research opportunities and fellowships.

SAS coordinates and assures effective integration of all of our mentoring, enrichment, and outreach programs — including those based on undergraduate research. SAS is dependent on external funding for its success.

There are a host of activities and programs that strive to involve students and promote their success in science and mathematics. Several federally funded programs focus on underrepresented students and address the diversity of our campus. In addition to fostering involvement of students in science and mathematics, they feature an ethnic identity that provides a unique encouragement for 250 of our science majors.

MARC/MSD Programs. The College hosts both programs funded by The National Institutes of General Medical Sciences: Minority Access to Research Careers (MARC) and Minority Student Development (MSD). Both programs have the goal of increasing the number and quality of students from historically underrepresented ethnic groups who pursue careers in scientific research. The 30 students supported by these programs carry out state-of-the-art biomedical research projects in conjunction with a member of the faculty. Virtually all of these students continue study toward advanced degrees in science. The MARC program is an honors program (GPA 3.0) for upper division students, while the MSD program can support students as early as the freshman year and can also support graduate students. As a result of their research activities, most students present papers at scientific conferences and often co-author publications appearing in leading scientific journals. In addition to their research involvement, MARC/MSD students are active in various outreach and mentoring activities.

Bridges to the Baccalaureate Program. This program is funded by the National Institutes of General Medical Sciences and its goal is to provide historically underrepresented com-

munity college students with research opportunities in the biomedical sciences and to facilitate their seamless transition into baccalaureate granting institutions.

G-DEP Program. The Geoscience Diversity Enhancement Program (G-DEP) is an innovative, collaborative partnership between CSULB Departments of Geological Sciences, Geography, and Anthropology, and several community colleges and local high schools to improve the research and educational experiences of underrepresented students in geoscience (geologic, physical geographic, archaeological and environmental sciences disciplines). The goals of G-DEP are to (1) increase the number of underrepresented students who have a broad educational and research experience in the geosciences; (2) enhance the quantity and quality of Geoscience research and teaching by faculty members from the University, community colleges and high schools; (3) increase the awareness by community college and high school students of the field of geoscience, and related research careers and educational requirements; (4) create a seamless transition of underrepresented students from community colleges to study geosciences at the undergraduate level; and (5) increase the number of geoscience majors who are retained in their disciplines.

AMP Program. The College hosts the National Science Foundation's Alliance for Minority Participation (AMP) program. Its goal is to improve the mathematics and science preparation for historically underrepresented students majoring in the sciences, mathematics, and engineering.

UPP. The University Preparatory Program (UPP) provides an enriched curriculum in mathematics and sciences for underrepresented high school students and introduces, presents, and facilitates their entrance into the university.

Science Enrichment and Peer Mentor Programs. This program is designed to provide first time freshmen in the College of Natural Sciences and Mathematics with the guidance and personal support that are vitally important to their success at CSULB. This program allows students to enroll in classes appropriate for their major and background, provides them with enriched learning experiences, and peer role models during their first academic year. The Science Enrichment Program begins the week prior to the start of the fall semester. In order to be part of the program, students must be declared science or math majors and be enrolled in the presemester University 100 course.

HHMI. The Honors in Biological Sciences program is sponsored by a grant from the Howard Hughes Medical Institute. Open to students with majors or career goals in the life sciences or related fields, it features an honors curriculum including courses in bioinformatics and research design as well as undergraduate research leading to a senior honors thesis. Participating students will be eligible for financial support for their research experience as well as for travel to scientific conferences. For more information, please contact Dr. Margaret Merzlyfield, Department of Chemistry and Biochemistry, (562)-985-4937.

Health Professions Advising Office (HPAO). The Health Professions Advising Office (HPAO) provides a wide range of advising and support services designed to meet the needs of CSULB students as they navigate through the often-complex process of preparation and application to professional school. The HPAO offers individual counseling, academic planning,

application assistance, and many other resources designed specially for students interested in medicine, dentistry, veterinary, pharmacy, optometry, podiatry, chiropractic, physician assistant, physical therapy, and graduate nursing.

### ***The Electron Microscopy Facility***

The study of the natural sciences requires observation of the macroscopic, microscopic, and sub-microscopic character of our universe. With this in mind, the College has established a modern Electron Microscope (EM) Facility which is used by several undergraduate courses in addition to undergraduate and graduate research projects. The pride of the EM Facility is the Joel-1200EXII transmission electron microscope (TEM), obtained through a National Science Foundation instrumentation grant. The Joel-1200EXII has a resolution of 0.14 nm and a magnification range of from 50 to 1,000,000 times. The EM Facility also houses additional TEMs and an AMR 1000 scanning electron microscope. The latter will be upgraded to include analytical capabilities.

### ***Student Organizations***

The College of Natural Sciences and Mathematics Student Council sponsors annual events including: a fall open house and spring picnic, Science Career Days, and the Nobel Laureate Speaker series. Six departmental associations plan various social and academic-related programs that offer peer support, as well as opportunities for students and faculty to interact outside of the classroom.

Four other student-led groups offer activities for students who are planning careers in one of the health professions (medicine, dentistry, etc.). The Organization of PreProfessional Students (T.O.P.P.S.) has a speaker series with representatives from professional schools; the group also holds social functions and provides a peer advising network. Chicanos/Latinos for Community Medicine (CCM) sponsors community outreach activities, an annual workshop on interviewing techniques, and an annual conference on applying to medical/professional schools.

### ***Health Professions Advising Office***

Please see [Health Professions Advising Office](#) under *Student Access to Science and Mathematics (SAS) and Programs Offered* for assistance and services available for preparation and application to health profession schools.

### ***Southern California Marine Institute (SCMI)***

The Institute operates a number of research vessels, and provides the mechanism whereby students from CSU Ocean Studies Consortium campuses at Dominguez Hills, Fullerton, Long Beach, Los Angeles, Northridge, Pomona, San Diego, and San Marcos, as well as Occidental College and the University of Southern California can share courses and degree programs. In addition, Institute staff conduct research and facilitate the research of CSU faculty. The major focus is on harbors and coastal areas, with emphasis on environmental issues.

### ***California Desert Studies Consortium***

CSULB participates in the California Desert Studies Consortium, which has a Desert Studies Center in the heart of the Mojave Desert at Soda Springs near the town of Baker. The surrounding area consists of typical Mojave Desert with dry lakes, sand dunes, and mountain ranges; it is the gateway to Death Valley and the Kelso Dunes. The Center has excellent

facilities for teaching field classes and for research. California State Universities at Dominguez Hills, Fullerton, Long Beach, Los Angeles, Northridge, Pomona, and San Bernardino are the Consortia members.

## **Courses (NSCI)**

### **Lower Division**

#### **200. Introduction to Computer Methods in Science (2)**

Prerequisites: Major in the College of Natural Sciences and Mathematics; and MATH 119A or MATH 122 or consent of instructor. Introduction to computer methods used in collecting, analyzing, and presenting scientific data. Will introduce word processing, spreadsheet analysis, and elementary programming. Credit/No Credit grading only. Course fee required. (Lecture 1 hr., discussion 1 hr.)

### **Upper Division**

#### **308. Community and Careers in the Health Professions (3) S**

Prerequisites: Completion of Foundation Courses, one or more Explorations Courses, upper division status, and 3 units of Natural Sciences coursework. This course is an upper division, service-learning, capstone course designed to develop students' abilities to critically think and analyze issues concerning health care in communities and the roles of professionals involved in the delivery of that care. Topics concerning biomedical ethics will also be included. Students will have the opportunity to volunteer in a community agency providing health care. In class, students will hear guest speakers, participate in discussions, analyze and reflect upon their volunteer experiences and how these experiences relate to in-class topics. This course will enhance oral and written communication skills, better define career goals, understand community needs and foster greater civic responsibility. Traditional grading only. (Lecture 2 hrs., laboratory 3 hrs.)

#### **309I. Women in Science (3) F,S**

Prerequisites: Completion of the G.E. Foundation, one or more Explorations courses, and upper-division standing; six units of general education science courses; and permission of instructor. The purpose of this course is to increase awareness of the accomplishments of women in natural science, engineering, and mathematics in their socio-historical context; and the obstacles that have precluded easy access to careers for women in these areas. Specific topics include historical roles of women in science, contributions of celebrated women scientists who made significant contributions but were ignored or devalued by their scientific peers. Other key issues include stereotypes and images of women in science; cultural, societal, and institutional obstacles to the entry and success of women in science; and ways of overcoming these obstacles. Cannot be used for credit towards any major requirements in biological sciences. Traditional grading only. Same course as W/ST 309I. (Lecture 3 hrs.)

#### **333. Natural Science Field Studies (2)**

Prerequisites: All with a grade of "C" or better: GEOL 106 or 102 and either 104 or 105; CHEM 100 or 105 or 111A; PHSC 112; BIOL 200; and upper-division standing. The purpose of this course is to provide students with field experience in observation, interpretation and recognition of natural processes and features in the varied natural environments of southern California. The course will be team-taught by a geologist and a biologist. In-class lectures and discussions will provide students with pertinent theoretical and practical knowledge prior to each field trip. Topics of discussion and study will focus on the geological and biological aspects of selected field sites, and on the underlying physical and chemical relationships involved at each site. Specific topics include the following: origin and recognition of faults; earthquake generation and hazards; geologic history of California; effect of mountain-building on climate, nearshore ocean processes, biology of nearshore, marine, estuarine and wetlands habitats; coastal, desert and mountain ecosystems; influence of rock/sediment on plant growth and diversity; geology and biology of lakes; and ground water and surface water flow, storage and contamination. Traditional grading only. Course fee required. (Lecture 1 hr., laboratory and required field trips, 3 hrs.)

### 375I. Science and Society (3)

Prerequisites: Completion of GE Foundation requirements, one or more Explorations courses, and upper-division standing; 3 units of general education natural science courses. The purpose of this course is to learn about the nature of science by studying major discoveries in the life and physical sciences that currently have an impact on our lives. In addition to the basic science that contributed to these technological advances, the historical, political, philosophical, and economic contexts of these events will be examined. Included will be discussions of what is science, how is it done, and is it beneficial or destructive? Traditional views of science will be challenged and the social/cultural aspects will be explored. Recent discoveries and the underlying basic science also will be critically evaluated. A special focus will be the demands placed on society by rapidly advancing technology. Traditional grading only. (Lecture 3 hrs)

### 377I. Blood Research: A Study In Landmark Discoveries (3)

Prerequisites: Completion of GE Foundation requirements, one or more Explorations courses, and upper-division standing; BIOL 200 or 211A, CHEM 100 or a more advanced course. A study of landmark discoveries in blood research that emphasizes the interplay between biology, chemistry and physics. (Discussion 3 hrs.)

### 490. Special Topics in the Natural Sciences (1-3)

Prerequisites: At least upper division standing in the College of Natural Sciences and Mathematics and consent of instructor. Faculty and student discussions and analysis of a current topic in the natural sciences. This course may be repeated once for credit with different discussions and topics. (Lecture 1-3 hrs.)  
Course may be repeated to a maximum of 6 units with different topics.

### 491. Special Topics Laboratory in Natural Science (1-2)

Prerequisites: Senior standing in the College of Natural Sciences and Mathematics and consent of instructor. Topics from selected areas of the natural sciences. Course content will vary from section to section. May be repeated for credit for a maximum of two units toward any single degree. Traditional grading only. (Laboratory 3-6 hrs.)

### 492. Internships In Natural Science (3)

Prerequisites: Major in the College of Natural Sciences and Mathematics, completion of 9 units of upper division science coursework, a 2.5 GPA overall or 2.75 GPA in the student's major, and consent of the instructor prior to registration. Students who qualify will be placed in a major or career-related assignment in private industry or at a public agency. Students may be placed in either a volunteer or paid work assignment. Teacher aide positions may be used for students interested in pursuing a career in science education in K-12 schools. Learning assignments will be arranged through the Career Development Center and the instructor. A final written report is required. Class attendance and internships to be arranged by the instructor. A minimum of 120 hours of field experience is required. May not be repeated for credit. Credit/No credit grading only.

### 496. Investigations in Natural Sciences and Mathematics (1-3)

Prerequisites: Consent of instructor. Supervised study of current topics in the natural sciences or mathematics by a faculty member in the College of Natural Sciences and Mathematics. May be repeated for a maximum of 3 units.

The Communicative Disorders Department provides specialized course work for students planning careers in speech-language pathology or audiology. Departmental majors may complete work leading to bachelor of science, bachelor of arts and/or master of arts degrees, as well as Certificates of Clinical Competence in either audiology or speech-language pathology from the American Speech-Language-Hearing Association and the requirements for licensure by the State of California.

Students seeking special education credentials may obtain specific credentials while completing the Master's degree. Students in allied health fields and linguistic sciences will find courses to supplement their regular majors.

The department maintains a language, speech and hearing clinic to serve as a clinical and research laboratory on campus for both graduate and undergraduate students. Field placements are available in the many nearby hospitals, rehabilitation agencies and nonprofit language/speech/hearing clinics.

Students desiring information should contact the department office for referral to one of the faculty advisors: Undergraduate Advisor, Graduate Advisor, Student Teacher Coordinator, and Clinic Director.

The Department of Communicative Disorders offers graduate study leading to the Master of Arts degree in communicative disorders with options in audiology and speech-language pathology. This coursework meets requirements for certification by the American Speech and Hearing Association (American Speech-Language-Hearing Association, Council on Academic Accreditation, 10801 Rockville Pike, Rockville, MD 20852, phone: 301-897-5700), licensing by the State of California, and appropriate educational credentials.

## Bachelor of Arts in Communicative Disorders (code 2-6842) (120 units)

Students desiring a bachelor's degree in Communicative Disorders must complete ANTH 170 and a course in language and culture/society, (e.g. ANTH 412I, 413, or SOC 485I), in addition to completing the following required courses:

Lower Division: C D 260, 261, 271; PSY 110 or equivalent.

Upper Division: C D 329, 330, 373, 431, 432, 440, 456, 466, 476, 481A, 481B, 483, 489.

## Bachelor of Science in Audiology (code 3-6862) (124-132 units)

The Bachelor of Science degree in Audiology is designed primarily for students who intend to pursue careers in audiology by seeking a Master's Degree in audiology, a professional Doctorate in Audiology (Au.D.), or a research doctor in audiology (Ph.D.). The coursework will provide students with a broad-based undergraduate education with emphasis in the physical and behavioral sciences.

Students completing a Bachelor of Science degree in Audiology must take the following courses:

- A. *Communicative Disorders* (39 units) CD 261, 271, 280, 281, CD 329, 330, 373, 431/531, 432/532, 440, 481A/581A, 481B/581B, and 3 units of 499
- B. *Biological Sciences* (10-12 units chosen from the following) either BIOL 205 or 207, BIOL 204, 208, 211A, 211B, MICR 200
- C. *Chemistry* (6-10 units chosen from the following) CHEM 202 and 302, or CHEM 111A and 111B
- D. *English* (3 units chosen from the following) ENGL 101, 102, or 317
- E. *Mathematics* (6-8 units chosen from the following) MATH 119A and 119B, or 122 and 123
- F. *Statistics* (4 units) PSY 110
- G. *Physics* (8-10 units chosen from the following) PHYS 100A or 101A, 100B or 101B, 151 or 151P, 152 or 152P
- H. *Psychology/Human Development* (15 units chosen from the following) PSY 100 and four courses from the following: PSY 141, 200, 331, 315, 341, 342, 361, 365, 370, 438/538, GERN 400I, H/SC 427
- I. *Culture and Communication* (3 units chosen from the following) ANTH 413/LING 413, ANTH 412I, or COMM 330
- J. *Economics* (3 units) ECON 300

### Credentials for Service in Public Education

Students who wish to complete credentials for service as language, speech and hearing specialists or educational audiologists must be admitted to the graduate program in speech pathology or audiology. The following credentials are offered:

#### Clinical-Rehabilitative Services Language, Speech and Hearing Specialist Credential (code 901)

Candidates must:

1. Complete the master's degree in speech-language pathology.
2. Complete EDP 350 and 564; C D 483, 489, 686A (Field Experience(s) in order to complete 100 contact hours as a Language, Speech and Hearing Specialist trainee in the school setting).

#### Clinical-Rehabilitative Services Audiologist Credential (code 903)

Candidates must:

1. Complete the master's degree in audiology.
2. Complete EDP 350, C D 280, C D 281, 669G, and 680 (internship to be completed in the schools in order to complete 100 contact hours as an Audiologist trainee in a public school environment.)

#### Clinical-Rehabilitative Services Language, Speech and Hearing Specialist Credential with Special Class Authorization to Teach Language Disordered Children (code 910)

Candidates must:

1. Complete the master's degree in speech pathology;
2. Complete ED P 350 and ED P 564; C D 483, 489; EDEL 550, 560, 570, 686A (in order to complete 100 contact hours as a Language, Speech and Hearing Specialist trainee in the school setting) and 686B (in order to complete 100 contact hours as a teacher of severe language disordered children trainee in a school setting).

### Master of Arts in Communicative Disorders (code 5-6842)

#### Admission to the Graduate Program

Enrollment in 500/600 level courses in communicative disorders is restricted to students who have been accepted to the graduate program of the department as unconditionally classified. Students wishing to be admitted must complete the following procedures:

1. Students must meet the criteria for acceptance by the University as a graduate student;
2. Every student (new or continuing) must apply to the Office of Admissions and Records to obtain admission to the University with graduate standing;
3. Every student then must apply to the Department of Communicative Disorders for admission to the graduate program using the department application form. This form must be filed with the graduate advisor by March 1 for admission in the fall semester. The following supportive materials must be filed with the department admission application:
  - a. Change of objective form available at department office (continuing CSULB students only);
  - b. Transcripts of all undergraduate and graduate work. (These transcripts are in addition to those required by the Office of Admissions and Records.) These transcripts should reflect the following minimum criteria:
    - (1) a GPA of 3.0 or better in the last 60 units of coursework; and
    - (2) confirmation of acceptable GPA obtained during the final senior semester.
  - c. Three letters of recommendation from academic faculty in Speech-Language Pathology, Linguistics, etc. Our standard recommendation forms can be obtained from the Graduate Advisor and must be completed.
  - d. Results of the Graduate Record Examination (GRE). Students must make arrangements to take this test in the semester prior to filing for admission to the department graduate program. This is to insure that the student's test results will be available by the filing date since test scores are used as one criterion for acceptance into the graduate program. Students can make arrangements to take the GRE at the Testing Office in SS/AD Rm 216. The testing Office will supply students with further information and provide them with a description and sample items.
4. Any deficiencies will be determined by the department graduate committee after consultation with the student and the student's faculty advisor and study of transcript records.
5. Student will have completed one of the two prerequisites listed in the next section.

#### Prerequisites

1. A bachelor's degree from an accredited institution with a major in communicative disorders (speech pathology and/or audiology); or
2. A bachelor's degree from an accredited institution. The applicant must have at least 33 units of course work in speech science, speech pathology and/or audiology including courses in (a) anatomy and physiology, (b) phonetics, and (c) introduction to communicative disorders.

If student has not completed sufficient units or courses to meet this requirement, he/she may enroll in the University as a conditionally classified graduate student to complete the required undergraduate courses prior to applying to the Graduate Program in Communicative Disorders.

Although the student may apply to our Graduate Program with a minimum of 33 units in Speech-Language-Hearing, all courses required for the B.A. in Communicative Disorders at CSULB (approximately 58 units), or equivalent courses, must be completed before the M.A. in Communicative Disorders will be awarded.

### Advancement to Candidacy

In order to be advanced to candidacy for a Master's degree, a student must meet the following criteria:

1. enrollment in the semester or summer session in which advancement takes place;
2. selection of Speech-Language Pathology or Audiology option;
3. satisfactory completion of C D 696 and three additional units;
4. satisfactory completion of the CSULB Writing Proficiency Examination. The Writing Proficiency Examination must be passed before the student is advanced to candidacy. (After paying a fee at the Business Office [SS/AD Room 148], take your receipt to the Testing Office [SS/AD Room 216] and sign up for the examination. This examination is administered several times per year. A detailed description of the test is available at the Testing Office);
5. maintenance of a GPA of at least 3.0 in (a) all graduate work completed in Communicative Disorders, (b) all graduate work completed at CSULB, and (c) all graduate work transferred to meet graduation requirements;
6. filing of the student Program for the Master of Arts Degree in Communicative Disorders after completion of items 2-5;
7. the Department's standard written program of graduate courses approved by the student's department advisor, the department graduate advisor, the department chairperson, and the College of Health and Human Services Associate Dean.

### Requirements

Students must elect one of two available options: speech-language pathology or audiology.

For speech-language pathology 39 units of course work are required: C D 696, 662, 663, 664, 665, 666, 669A or 669C, 669D, 669F, 669G, 669J, 670, C D 686A and 698 or 695 (Comprehensive Examinations) plus a three-unit elective. Any prerequisites to the course must have been met prior to enrollment. Within the context of the clinical courses (C D 669A, 669C, 669D, 669F, 669G, 669J, 670, 669H, or 686A), the student will complete 25 hours of clinical experience under appropriate supervision with a client determined to have a language or dialect different from that of the student clinician. The specific clinical practicum (669 A-G) to be taken to meet the "linguistically different" requirement must be approved by the student's advisor and the Linguistically Different Clinic professor. C D 483 and 489 or 460/560, or equivalent content, are prerequisites to this experience.

For audiology 40 units of course work are required: C D 696, 530, 574, 669A or 669C, 669G, 673, 6 units of 674 (3-3), 675, 6 units (2-2-2) of 679, 680, and either 698 or 695 (Comprehensive Examinations) and 3 units of electives.

Regulations governing the preparation and eligibility for the administration of comprehensive examinations are available in the Department Office. Departmental regulations concerning preparation of theses are also available in the office.

## Courses (C D)

### Lower Division

#### 060. Special Topics (1)

Prerequisite: Consent of instructor. Speech, language and hearing therapy to students enrolled in the University. May be repeated for credit to a maximum of two units.

#### 260. Introduction to Communicative Disorders (3)

Features of human communication dysfunction. Survey of major communicative disorders. Role of speech-language pathologist and audiologist in medical, educational, and private practice settings.

#### 261. Anatomy and Physiology of the Speech and Hearing Mechanism (3)

Anatomical, physiological and neurological components of the speech and hearing mechanism. Designed for students planning to enter the clinical program in communicative disorders.

#### 271. Phonetics (3)

Phonetic basis of speech sounds and the various factors which influence pronunciation. Consideration is given to linguistic variations, regional dialects and standards. (Lecture 2 hours, laboratory 2 hours.)

#### 280. Sign Language (3)

Sign Language and Non-Vocal Communication Systems. Origin, development and principles of sign language. Practice with American Manual Alphabet, American Sign Language and Signing Exact English to provide basic conversational skills; other sign systems and modes of non-vocal communication are discussed.

#### 281. Intermediate Sign Language (3)

Prerequisite: C D 280. Continuation of C D 280 (Sign Language and Non-Vocal Systems) with emphasis on development of receptive/expressive skills and building of vocabulary. Introduction into use of sign language in educational and therapy settings. Discussion of philosophical and cultural aspects of the deaf community. Required for school audiology credential. Traditional grading only.

### Upper Division

#### 329. Introduction to Language Acquisition (3)

Introduction to the study of the acquisition of first and second languages. Linguistic perspectives on the development of phonological, syntactic, semantic, and pragmatic aspects of language. The influence of developmental stages and social and cultural factors on the individual. Traditional grading only. Same course as LING 329.

#### 330. Speech and Hearing Science (3)

This course examines human communication in its neurological, psychological, anatomical, physiological, acoustic and social aspects. Through readings, discussions, films and experiments the student is expected to become more appreciative, more aware, more analytical and more tolerant of the communication behavior of himself and other speaker/hearers.

#### 373. Audiology I (3)

Introduction to audiology; acoustics, anatomy and physiology of the ear, pure-tone audiometry/masking, speech audiometry/masking, principles of taking a case history, and report writing.

**431./531. Pediatric Audiology (3)**

Prerequisite: C D 373. Pathologies of hearing loss (e.g., syndromes), High-Risk Register/case history, speech and voice characteristics of the hearing-impaired, behavioral observation audiometry, visual reinforcement audiometry, play audiometry, speech audiometry, auditory evoked response, acoustic immittance, counseling parents, hearing screening in the schools, hearing aids/special listening devices. (Lecture 2 hours, laboratory 3 hours.)

**432./532. Audiology II (3)**

Prerequisites: C D 373. Anatomy/pathology/ evaluation of the (1) outer and middle ears, (2) inner ear, (3) central auditory system, and (4) functional hearing loss, taking case history, and report writing.

**440. Aural Rehabilitation for the Hearing Impaired (3)**

Prerequisites: C D 373 and C D 431 or 432. Acoustic features of speech, visual features of speech, hearing impairment and counseling, vibrotactile communication, total communication and the deaf community, speech reading, the geriatric population, assistive listening devices, cochlear implants, learning and hearing impairment, assessment tools, hearing aid evaluation and case history, amplification/hearing aids in the classroom, and classroom acoustics/noise.

**456. Speech Pathology I: Disorders of Phonology (3)**

Prerequisites: CD 261, 271, 329. Etiology, assessment, and treatment for disorders of phonology.

**460./560. Language Assessment of the Limited English Proficient Child (3)**

Prerequisites: CD 329 or equivalent, or consent of instructor. Provides an understanding of the non-discriminatory assessment process for the Limited English Proficient child referred for a Language Assessment. (Lecture-Discussion.) Traditional grading only.

**466./566. Speech Pathology II: Fluency Disorders (3)**

Prerequisite: CD 261, 271, 330. Etiology, assessment, and therapy for disturbances in the fluency of speech with emphasis on psychological, physiological, and linguistic variables correlated to disfluent behaviors.

**476./576. Speech Pathology III: Disorders of Voice/Oro-facial Mechanism (3)**

Prerequisites: C D 261, 271, 330. The processes of phonation and resonance and their application to etiology, diagnosis and therapy of functional and organic voice disorders, such as those arising from laryngeal pathology, vocal abuse, neurological impairment, auditory impairment and oro-facial abnormalities.

**481A./581A. Speech Pathology IV: Disorders of Language (3)**

Prerequisites: CD 271, 329, 330. An analysis of the components of language and how each is involved with language disorders in children. Provides for the understanding and recognition of variables for the assessment and clinical management of such children.

**481B./581B. Speech Pathology IV: Disorders of Language Neuropathologies (3)**

Prerequisite: CD 271, 329, 330. Neurophysiological and neuro-linguistic basis for language and speech disorders associated with central nervous system pathologies. Provides for the recognition and understanding of variables for the assessment and clinical management of such disorders.

**483. Assessment of Monolingual and Bilingual Clients (3)**

Prerequisites: CD 261, 271, 329, 330 and either ANTH 170 or a course in language and culture/society. Principles underlying assessment procedures in speech language disorders for both monolingual and bilingual clients. Focus is on the cultural and linguistic variables affecting standardized and non-standardized assessment procedures. (Lecture 2 hours, laboratory 3 hours.)

**489. Management of Monolingual and Bilingual Clients (3)**

Prerequisites: CD 483. Pre- or corequisites: At least 4 of the following: CD 456, 466, 476, 481A, 481B. Principles underlying management procedures in speech and language disorders for

monolingual, bilingual, and/or bicultural clients. Focus is on the relationship of assessment to management, formulation of objectives, task analysis, data collection, clinical techniques and materials, and transfer and maintenance programs (including parent training). 25 hours of clinic observation and participation will be distributed equitably between campus clinic, schools, and hospital/rehabilitation settings. (Lecture 2 hours, laboratory 3 hours.)

**491. Proctoring in Communicative Disorders (2-3)**

(Open only to students who have achieved the grade of "A" in the course in which they are serving as proctor.) Advanced students shall engage in peer teaching and examination scoring in specific Communicative Disorders undergraduate courses under the specific direction of the course instructor. May be repeated for credit to a maximum of 6 units.

**499. Directed Studies in Communicative Disorders (1-3)**

Prerequisite: Consent of instructor. Independent study under supervision of a faculty member. May be repeated for a maximum of six units. Not acceptable for graduate credit toward the master's degree.

**Graduate Division****530. Audiological Instrumentation (3)**

Prerequisite: Consent of instructor. Acoustics/ decibel, psychoacoustics, calibration of pure-tone and speech audiometers, sound field calibration, industrial audiology and noise measurement. (Lecture 1 hour, laboratory 6 hrs.)

**531./431. Pediatric Audiology (3)**

Prerequisite: C D 373. Pathologies of hearing loss (e.g., syndromes), High-Risk Register/case history, speech and voice characteristics of the hearing-impaired, behavioral observation audiometry, visual reinforcement audiometry, play audiometry, speech audiometry, auditory evoked response, acoustic immittance, counseling parents, hearing screening in the schools, hearing aids/special listening devices. (Lecture 2 hours, laboratory 3 hours.)

**532./432. Audiology II (3)**

Prerequisites: C D 373. Anatomy/pathology/ evaluation of the (1) outer and middle ears, (2) inner ear, (3) central auditory system, and (4) functional hearing loss, taking case history, and report writing.

**560./460. Language Assessment of the Limited English Proficient Child (3)**

Prerequisites: CD 329 or equivalent, or consent of instructor. Provides an understanding of the non-discriminatory assessment process for the Limited English Proficient child referred for a Language Assessment. (Lecture-Discussion.) Traditional grading only.

**566./466. Speech Pathology II: Fluency Disorders (3)**

Prerequisites: CD 261, 271, 330. Etiology, assessment, and therapy for disturbances in the fluency of speech with emphasis on psychological, physiological, and linguistic variables correlated to disfluent behaviors.

**574. Hearing Aids (3)**

Prerequisite: Consent of instructor. Electro-acoustic characteristics, hearing aid evaluation in children and adults, case history, probe tube measurements, earmolds, binaural hearing aids, CROS and its modifications, signal processing and control, programmable hearing aids, digital hearing aids, batteries, assistive listening devices, hearing aid orientation and counseling, cochlear implants, classroom amplification and acoustics, hearing aid dispensing.

**576./476. Speech Pathology III: Voice/Oro-Facial Mechanism (3)**

Prerequisites: C D 261, 271, 330. The processes of phonation and resonance and their application to etiology, diagnosis and therapy of functional and organic voice disorders, such as those arising from laryngeal pathology, vocal abuse, neurological impairment, auditory impairment and oro-facial abnormalities.

**581A./481A. Speech Pathology IV: Disorders of Language (3)**

Prerequisites: C D 271, 329, 330. An analysis of the components of language and how each is involved with language disorders in children. Provides for the understanding and recognition of variables for the assessment and clinical management of such children.

**581B./481B. Speech Pathology IV: Disorders of Language Neuropathologies (3)**

Prerequisites: CD 271, 329, 330. Neurophysiological and neurolinguistic basis for language and speech disorders associated with central nervous system pathologies. Provides for the recognition and understanding of variables for the assessment and clinical management of such disorders.

**590. Advanced Topics and Current Issues in Communicative Disorders (1-3)**

Selected topics from the most recent developments and issues in speech-language pathology and audiology. Course content will vary with each offering. May be repeated for credit under different topics for a maximum of three units. Topics will be announced in the *Schedule of Classes*.

**662. Seminar in Language Disorders in Children (3)**

Prerequisite: C D 481A, 696. The components of language, cognitive and perceptual abilities and communication are examined in children with normal and impaired language development. Major approaches to language intervention are discussed.

**663. Seminar in Disorders of Phonology (3)**

Prerequisites or corequisite: CD 456. Information in the description, assessment and treatment of phonological disorders. Survey of current literature and practices. Practice in conducting procedures.

**664. Seminar in Disorders of Voice and the Oro-facial Mechanism (3)**

Prerequisites: C D 476, 696. Selected problems in voice disorders through an investigation of the literature and clinical research.

**665. Seminar in Language Disorders in Adults (3)**

Prerequisites: C D 481B, 696. Provides an understanding of neuropathological substrates of language disorders in adults resulting from brain damage. Provides for the recognition and assessment of the syndromology and clinical aspects of adult language disorders relative to current research.

**666. Seminar in Fluency Disorders (3)**

Prerequisites: C D 466, 696. Historical and current research and its effect upon the assessment and management of fluency disorders.

**669A. Clinical Practice in Phonological Disorders (2)**

Prerequisites: C D 489; pre- or co-requisite: C D 663 or consent of instructor. Student conducts assessment of phonological disorders and management of therapy, under supervision, with clients in the university speech and hearing clinic. Students handle all aspects of clinical program including initial interviews, parent counseling, and testing.

**669C. Clinical Practice With Language Delayed/Disordered Children (2)**

Prerequisites: C D 483, 489; pre- or co-requisite: C D 662 or consent of instructor. Students provide assessment and management of preschool and school-age children with identified delays/disorders. Under supervision, the practicum includes standardized and non-standardized assessment, parent interviews and conferences, development and implementation of a management program and report writing. Traditional grading only.

**669D. Clinical Practice with Voice and Oro-facial Mechanism Disorders (2)**

Prerequisites: C D 489; pre- or co-requisite: C D 664 or consent of instructor. Student conducts therapy sessions under supervision for persons with functional and/or organic voice disorders. Practicum includes initial interviews, diagnostics, therapy program planning, counseling and report writing.

**669F. Clinical Practice with Fluency Disorders (2)**

Prerequisites: C D 489; pre- or co-requisite: C D 666 or consent of instructor. Assessment, planning, and management in a supervised clinical experience with persons who have fluency disorders.

**669G. Clinical Practice in Audiology (2)**

Prerequisites: C D 431, 432, 440, or consent of the instructor. Student will conduct individual and group therapy with hearing impaired clients, as well as audiological evaluation of hearing impaired persons.

**669H. Clinical Practice-Special Programs (2)**

Prerequisites: At least one of the C D 669A through J courses. Specialized practice placement to obtain experience with speech, language, and hearing disorders. May be repeated to a maximum of 4 units.

**669J. Clinical Practice with Language Disordered Adults (2)**

Prerequisites: C D 489; pre- or co-requisite: C D 665 or consent of instructor. Student conducts clinical management sessions, under supervision, for adults with neurological language disorders. Practicum includes initial interviews, assessment, management program planning, counseling and report writing, and application of research findings to the clinical process.

**670. Internship in Speech and Language Pathology (5)**

Prerequisites: C D 669A or C,D,F,G, and J with a GPA of 3.0. Advanced clinical supervised practice with speech and language disordered persons in either a hospital, rehabilitation agency or speech and language center.

**673. Assessment of Outer, Middle, and Inner Ears (3)**

Prerequisite: Consent of instructor. Advanced masking concepts, anatomy/physiology/pathology of the outer-middle-inner ears, immittance testing, calibration of immittance meters, functional hearing loss.

**674. Seminar in Audiology: Current Topics in Hearing and Hearing Aid Evaluation (3)**

Prerequisite: Consent of instructor. Emphasis will be place on critically analyzing recent articles in (1) hearing aid evaluation for children and adults, (2) evaluating special populations (the elderly, difficult to test, school, and/or industrial), and (3) current topics in audiology. This course will allow students to obtain an in-depth knowledge in areas of interest, and will allow the instructor to share areas of expertise. Course may be repeated to a maximum of 6 units.

**675. Assessment of Central Auditory Nervous and Vestibular Systems (3)**

Prerequisite: Consent of instructor. Anatomy/ physiology/pathology of the 8th cranial nerve, vestibular system, brainstem, and central auditory system; auditory evoked potentials, calibration of auditory evoked systems, tone decay, Bekesy, SISI, ABLB, electroystagmography, functional hearing loss.

**679. Practicum in Audiology (2-10)**

Prerequisites: C D 431, 432, 440, or consent of instructor. Student conducts evaluation and rehabilitative sessions under supervision with persons with more complex hearing disorders. Student handles all aspects of the audiologic program including evaluation, consultation, program planning and execution. May be repeated for credit to a maximum of 10 units.

**680. Internship in Audiology (5)**

Prerequisites: CD 669A or B or C, 679 and 669G, or consent of the instructor. Advanced clinical practice in audiology with hearing impaired persons in a community facility.

**686A. Advanced Field Studies with Communication Handicapped (5)**

Prerequisites: Passing of CBEST, completion of C D 662, 664, 665, 666, and all but one of the following: 669A, 669C, 669D, 669F, 669G, 669J. Enrollment by application to the Communicative Disorders Department only. Assignments to one or two settings with a commitment of 3 or 5 days a week depending on credential objective. Inservice meetings with University Coordinator to be arranged. Clinical Rehabilitative Services, Language Speech and Hearing Specialist students are assigned to complete a practicum in an itinerant speech and language setting for the equivalent of one semester earning 5 units of field study. Credit/No Credit grading only. (Fieldwork)

**686B. Advanced Field Studies with Severe Language Handicapped/Aphasia Classroom (5)**

Prerequisites: Passing of CBEST, completion of C D 662, 663, 664, 665, 666, and all but one of the following: 669A, 669C, 669D, 669F, 669G, 669J. Enrollment by application to the Communicative Disorders Department only. Assignment to one setting with a commitment of 5 days a week for a minimum of 8 weeks. Inservice meetings with University Coordinator to be arranged.

Clinical Rehabilitative Services: Special Class Authorization students are assigned to complete a practicum in a self contained language handicapped classroom earning 5 units of field study. Corequisite enrollment in ED P 686A or a clear Clinical Rehabilitative Services is required. Credit/No Credit Grading Only. (Field-work)

**695. Directed Readings (1-3)**

Prerequisite: Consent of instructor. Readings in communication sciences/disorders. Required of all candidates for the master's degree not electing the thesis option. (Under special circumstances, may be repeated for a maximum of 6 units.)

**696. Research Methods: Applied and Basic (3)**

Prerequisite: PSY 110 or equivalent or consent of instructor. This course is taken the first semester of graduate study. This course focuses on the application of the scientific method in the experimental and clinical settings. Scientific reasoning applied to the clinical and research process is stressed through examination of group and single-subject designs. Strategies and procedures for the control and manipulation of independent variables to effectuate change are explored. Evaluation of the components of research articles and their application to the clinical and research processes are introduced into class readings and discussions. Methods for the organization and analysis of clinical and research data are presented. (Lecture 3 hours.)

**697. Directed Research (1-3)**

Pre- or Corequisite: C D 696 and consent of instructor. Independent research under supervision of a faculty member.

**698. Thesis (1-4)**

Prerequisites: Advancement to candidacy for master's degree. Preparation, completion and submission of an acceptable thesis in partial fulfillment of the requirements for the master's degree.

Students desiring information about the communication studies program at CSULB should contact the department undergraduate advisor or the graduate advisor.

Located within the College of Liberal Arts, the Department of Communication Studies provides students with a solid liberal arts education in communication arts and sciences with specialized training in communication skills and practices at the baccalaureate and graduate levels. The Department of Communication Studies maintains a tradition of liberal education which traces the world's heritage of humanistic tradition in its multicultural diversity. The communication studies curriculum focuses on issues of ethics, creative thought, historical and scientific inquiry, critical thinking, understanding of communication phenomena, aesthetic expression, and the development of excellent human communication skills. To this end, the Department of Communication Studies provides two major services to the University community. First, through specialized curricula, the Department stresses inquiry, analysis, and critical evaluation to students who seek to apply a comprehensive background of communication theory and practice in business, industry, professional fields, or education. Second, through its general education and service offerings, the department provides a variety of courses stressing critical thinking, and oral and written communication designed to give all students experiences in the traditions of the liberal arts and to prepare them for responsible citizenship in a pluralistic society.

The various degree options in the Department of Communication Studies are intended to provide students with the opportunity to emphasize an area of communication studies which will best suit their personal and career goals. Each student is required to consult with the department undergraduate or graduate advisor as appropriate for advisement. Student advising is available during the Fall and Spring semesters only.

NOTE: Lower division 100 and 200 level classes taken through California Community Colleges satisfy lower division CSULB Communication Studies requirements.

## Bachelor of Arts in Speech Communication

The Department of Communication Studies offers three undergraduate degree programs in Communication arts and sciences: The Bachelor of Arts Degree in Speech Communication, the Option in Interpersonal and Organizational Communication, and the Option in Rhetorical Studies.

Speech Communication majors will not be permitted to take any class in the major on a credit/non-credit basis. Speech Communication majors will not be permitted to drop a class in the major after the third week of classes without compelling justification or unless they present acceptable evidence of a change of work schedule that causes a conflict between their work hours and their class schedule, or unless they are totally withdrawing from the University.

Six of the lower division units may be applied to meet General Education requirements in oral communication and critical thinking.

### Option in General Speech (code 2-6841) (120 units)

The General Speech option, as the title implies, is concerned with all the dimensions found in the communication field. It requires course work in both the rhetorical and behavioral dimensions of the field and then permits the student to elect additional work in communication theory, rhetoric and public address.

#### Requirements

This major consists of 48 units of which 39 are upper division.

1. Nine lower division units including COMM 110, 131, and three lower division units from COMM 130, 132, 171, or 220.
2. A core consisting of 18 units drawn from COMM 300, 301, 306, 307, 309, and 330.
3. Six units in performance courses drawn from COMM 331, 333, 334, 335, 338, 344, 352, 358.
4. Nine units in theory courses drawn from COMM 400, 410, 411, 412, 430, 433, 436, 437, 439, 441, 449, 490.
5. Six units in special studies drawn from COMM 337, 414, 420, 421, 432, 442, 450, 452, 490

Only courses in which adequate ("C" or above) grades have been earned may be applied to satisfy upper division requirements in the major. Classes taken in which less than adequate grades are received must be repeated until an adequate grade is achieved.

### Option in Interpersonal and Organizational Communication (code 2-6838) (120 units)

The Interpersonal and Organizational Communication option is designed for students who wish to prepare themselves for careers in public and private organizations requiring well-developed communication skills and a knowledge of interpersonal and organizational behavior. Students choosing this option will study the theoretical and applied aspects of interpersonal and organizational communication as they function in complex organizations. They will also develop a wide range of communication skills useful in organizational environments.

#### Requirements

This major consists of 48 units of which 36 are upper division.

1. Twelve lower division units including COMM 110, 130, 220, and three lower division units from COMM 131, 132, or 171.
2. A core consisting of 24 units drawn from COMM 300, 301, 306, 307, 309, 330, 410, and 420.
3. Six units in performance/special studies courses drawn from COMM 331, 333, 334, 335, 338, 355, 414, 421, 432, 439, 441, 442, 450, 452, 490, 492A or 492B or 495.
4. Six units in theory courses drawn from COMM 344, 400, 411, 412, 430, 433, 449, 490.

Only courses in which adequate ("C" or above) grades have been earned may be applied to satisfy upper division requirements in the major. Classes taken in which less than adequate grades are received must be repeated until an adequate grade is achieved.

### Option in Rhetorical Studies (code 2-6840) (120 units)

The Rhetorical Studies option is designed for students who wish to approach the study of human communication from a cultural or historical-critical perspective. In this option, students will give particular attention to the historical development of rhetoric, the study of persuasion, popular and media culture, and political and public affairs.

#### Requirements

This major consists of 48 units of which 39 are upper division.

1. Nine lower division units including COMM 130, 131, and three lower division units from COMM 132, 171, or JOUR 110.
2. A core consisting of 18 units drawn from COMM 300, 301, 306, 307, 309, and 330.
3. Six units in performance courses drawn from COMM 331, 333, 335, 336, 337, 352.
4. Nine units in theory courses drawn from COMM 433, 436, 437, 439, 441, 449, 490.
5. Six units in special studies drawn from COMM 411, 412, 421, 430, 432, 442, 492A or 492B or 495.

Only courses in which adequate ("C" or above) grades have been earned may be applied to satisfy upper division requirements in the major. Classes taken in which less than adequate grades are received must be repeated until an adequate grade is achieved.

### Minor in Speech Communication (code 0-6841)

The Minor in Speech Communication is available to any non-Speech Communication major. A minimum of 21 units in Communication Studies is required, of which at least 15 must be upper division, chosen in consultation with the Department Undergraduate Advisor.

### Master of Arts in Speech Communication

The Department of Communication Studies at California State University, Long Beach offers two tracks leading to the Master of Arts degree. The Option in Speech Communication involves advanced work in communication studies. A student may construct a personalized program that draws from the following areas: rhetorical, interpersonal, organizational, or intercultural communication, performance studies, forensics, or instructional communication.

The second option, Communication and Human Information Systems, is limited to college graduates who have at least two years of management or managerial-type experience in the public or private sector. The focus in this option is on the knowledge of and skills in interpersonal, organizational, and intercultural communication that are necessary to enhance one's ability to function and lead effectively in different organizational settings.

#### Admission

1. Application for Admission to the University. The office of Enrollment Services processes applications to the University (forms available through that office) and forwards those meeting University criteria to the Department.

2. Application to the Department. Upon receipt of the University application and that required by the Department, the Graduate Advisor and Graduate Committee determine whether to admit an applicant. Students meeting the Department's minimum standards (a bachelor's degree from an accredited university with a minimum 3.00 GPA) receive automatic admission.
3. Probationary Admission. Those not meeting the criteria may petition the Graduate Committee for regular or probationary admission to the program. Persons admitted on a probationary basis will achieve regular admission status after completion of at least six units of graduate core coursework with a 3.00 GPA or better (COMM 541, 546, 640, and 646 for the Option in Speech Communication or COMM 534, 546, 610, 620, and 630 for the Option in Communication and Human Information Systems).
4. Transcripts. Every student must provide the Graduate Advisor with a copy of transcripts documenting all undergraduate and graduate work completed at institutions other than California State University, Long Beach.
5. Graduate Record Examination. The Department requires that applicants complete the Graduate Record Examination, preferably prior to admission.
6. Teaching Associateships and Graduate Assistantships. Employment as a Teaching Associate or Graduate Assistant falls under the jurisdiction of the Personnel Committee of the Department. The positions pay approximately \$950.00 per month. Tuition is not waived. Interested students should send letters of application, transcripts, GRE scores, and three letters of recommendation to: Chair, Department of Communication Studies, California State University, Long Beach, 1250 Bellflower Blvd., MHB-717, Long Beach, CA 90840-2407.
7. Advising. Consult the Graduate Advisor to plan a program of study and to receive information regarding Department procedures prior to enrollment. The Graduate Advisor and/or a faculty mentor will guide students through their programs.

### Prerequisites and Requirements

#### General Considerations

1. Requirements
  - A. All requirements date from the time at which a student receives approval for Advancement to Candidacy, not from when a student begins graduate study.
  - B. The Department requires a minimum of thirty semester hours (including four thesis credits in the Thesis Option) for the Master's Degree. The University requires a minimum of twenty-four graduate credits be completed in residence.
  - C. Students must either pass the Department's comprehensive examination or write an acceptable thesis.
  - D. The Department expects its graduate students to possess the writing skills necessary for advanced study. The University mandates that students pass the Graduate Writing Proficiency Examination or its equivalent. Persons who have passed the CSULB University Writing Examination do not need to take the test again. If you believe you have taken an equivalent examination, consult the Graduate Advisor. Students should pass an acceptable writing examination no later than the end of the first semester of graduate study.

2. Prerequisites
  - A. Units obtained fulfilling prerequisites or deficiencies do not count toward the minimum of thirty semester hours needed to complete the Master's degree.
  - B. Students must meet all prerequisites before enrolling in graduate courses, except for COMM 541 or 546. Individuals may petition for waiver of this rule prior to registering for courses if compelling reasons warrant such a waiver.
3. Students must comply with all University regulations outlined in the *CSULB Catalog*.

### Option in Speech Communication (code 5-6841)

#### Prerequisites

Individuals with a Bachelor's degree in Speech Communication (or its equivalent) from a fully-accredited college or university must have approved coursework in:

- A. Survey of Rhetorical Theory (COMM 300)
- B. Communication Criticism (COMM 301)
- C. Measurement in Communication Research (COMM 307)
- D. Communication Theory (COMM 306)
- E. Language and Behavior (COMM 309)

#### Requirements

1. A minimum of thirty hours of graduate work in Speech Communication distributed as follows:
 

These requirements are those listed in the 1996-97 *University Catalog* and thus are relevant to students advancing to candidacy during or after Fall 1995. For requirements applicable to students advancing to candidacy prior to Fall 1995, consult appropriate *University Catalog*.

  - A. COMM 541 and 546 to be completed prior to advancement to candidacy and preferably within the first semester of graduate work (6 units);
  - B. twelve units consisting of:
    - (1) COMM 640 and 646 (6 units),
    - (2) one course selected from COMM 633, 635, 636, 637, 638 or 639 (3 units), and
    - (3) one course selected from COMM 600, 610, 611, 614, 620, 630, 632, 648, or 649 (3 units).
  - C. twelve elective units of 500 or 600 level coursework approved by the student's advisor and the Graduate Committee, including four thesis units (COMM 698) if the student elects the thesis option.
2. A minimum of six graduate units taken from one or any combination of the following areas:
  - A. graduate courses from within the Department of Communication Studies,
  - B. graduate courses from outside the Department of Speech Communication (maximum of six units)
    - (1) classes taken outside the discipline in a department at California State University, Long Beach require prior approval by the Graduate Committee,
    - (2) classes taken outside the discipline in a department at another university require approval by the Graduate Committee, or
    - (3) classes taken within the discipline in a department at another university.

3. Completion of the Department's Comprehensive Examination or of an acceptable thesis.
4. Please note that Internships and student teaching cannot be included in the required thirty units.

### Option in Communication and Human Information Systems (code 5-6848)

#### Prerequisites

1. Candidates must possess a bachelor's degree from a fully-accredited college or university.
2. Individuals must have a minimum of two years of full-time management or management-type experience in public and/or private organizations. Candidates must have experience in two of the following categories:
  - A. LEADING – managing in close, day-to-day contact with employees or work groups,
  - B. PLANNING – defining missions, goals, and objectives of an organization,
  - C. ORGANIZING – structuring tasks and authority; e.g., defining job specifications, dividing work loads, supervising group activities, recruiting and hiring employees, and delegating authority, and
  - D. CONTROL – setting and implementing work standards and evaluating employees' performance.

(Documentation of management experience should accompany the application to the program. The Graduate Advisor and the Graduate Committee determine whether a candidate meets the experiential criteria for admission into the program. The Graduate Advisor informs candidates of their status).

3. Students must complete the following courses or their equivalents: COMM 307, 306, 309, 410, 420

#### Requirements

1. Candidates must complete the following core curriculum: COMM 534, 546, 610, 620, and 630.
2. Students must complete a minimum of fifteen units drawn from the following: COMM 600, 611, 614, 632, 646, 648, 650, and 697.
3. Individuals may petition to substitute COMM 541 or a 600-level course within the Department's graduate offerings for one of the optional courses. Such substitution will be approved only if accompanied by a rationale arguing that it is integral to the student's program of study.
4. Candidates must pass a written Comprehensive Examination.

#### Enrollment in Communication Studies 697

COMM 697 (Directed Research) should enable students to study topics and methods not normally available through regular coursework. Persons who choose the Thesis Option MAY NOT use COMM 697 to complete any part of the thesis project; however, COMM 697 may function to develop research proficiencies relevant to the thesis. The policy regarding COMM 697 is:

1. The Graduate Committee will approve inclusion of COMM 697 in a graduate program only if:
  - a. the research topic is not available through regular coursework during the student's tenure in graduate study,

- b. the student has completed 6 units from the graduate core courses,
  - c. the student has been advanced to candidacy or has submitted her or his Graduate Program to the Graduate Advisor.
2. Students may take a maximum of three units of COMM 697.
  3. Candidates must secure approval for COMM 697 before taking the course. Prior to the semester of enrollment, students must submit two forms to the Graduate Committee:
    - a. a "Petition for Directed Research,"
    - b. an "Agreement for Independent Study Course" signed by the graduate faculty member directing the independent research (obtain this form from the Department office)
  4. The Graduate Committee will determine whether the proposed study conforms to the purposes of COMM 697. The faculty member directing the research has the responsibility of judging the student's ability to complete the research and also assigning the grade for the project.
  5. Students must file their final 697 projects with the Department Chair.
  6. Only members of the Department graduate faculty may direct COMM 697.

#### Advancement to Candidacy

Advancement to Candidacy defines a candidate's program of study and establishes her or him as an official graduate student in the University. Programs must meet the requirements in effect at the time of advancement. Candidates must submit the form for advancement required by the College of Liberal Arts (forms available in the Department office) to the Graduate Committee. Individuals are eligible for Advancement to Candidacy in the Option in Speech Communication after completing COMM 541 and 546. In the Option in Communication and Human Information Systems, students are eligible for Advancement to Candidacy after completing six units from the core requirements. In both options, students should have an average of "B" or better to be advanced to candidacy. Candidates considering the thesis option should submit a list of ten or more courses, starring (\*) the class or classes to be omitted if the thesis option is selected.

1. To qualify for advancement, a person must:
  - a. be enrolled in the University during the semester or session he or she requests advancement,
  - b. have removed all deficiencies,
  - c. have earned a minimum cumulative grade point average of 3.0 (B) for work taken – i.e., graduate courses and undergraduate prerequisites,
  - d. have completed six units of graduate core courses with an average of "B" or better,
  - e. have passed the Graduate Writing Proficiency Examination or completed its equivalent.
2. If the student fails to petition for Advancement to Candidacy at the recommended time, he or she must do so at least one semester prior to the semester in which she or he intends to graduate. The deadline each semester is exactly four weeks before the last day of instruction. Do not wait for the deadline! The Graduate Committee may require the student to resubmit a program. Students can neither take the Master's Comprehensive Examination nor enroll in COMM 698 until a program is approved.

3. All submitted programs should indicate the semester in which courses were or will be taken and should report ALL grades in courses completed. No grades of Incomplete (I) or Satisfactory Progress (SP) can appear on the program.
4. If a program contains courses taken outside the Department, a student must obtain approval from the Graduate Advisor and the Graduate Committee before including such classes in her or his course of study. This restriction applies to courses taken at CSULB and to ones transferred from other colleges or universities. Failure to obtain Graduate Committee approval for including such courses prior to enrollment may result in students' taking classes which cannot be included in their programs of study. Candidates must submit the appropriate petition to the Graduate Committee to obtain the necessary approval.
5. After receiving the appropriate form, "Petition for Advancement to Candidacy," the Graduate Advisor will seek approval of the Graduate Committee and the Graduate Dean of the College of Liberal Arts.

### Change in Graduate Program

If a student desires to amend her or his program of study after its approval, he or she must submit the College of Liberal Arts "Change of Program" form (available in the Department office) to the Graduate Committee for approval. Approval must be given prior to enrollment in any courses involved in the change; otherwise, the course will not be considered part of the minimum thirty units needed to complete the degree.

### Comprehensive Examination Option

1. Comprehensive Examinations are given during the third weeks of November and April for the Fall and Spring semesters, respectively. Students may not take their Comprehensive Examinations during either the Winter or Summer sessions.
2. The following provisions govern election of the Comprehensive Examination Option:
  - A. If a student elects the Comprehensive Examination option at the time of approval of her or his Graduate Program, the student may not change to the thesis option except with a special permission from the Graduate Committee.
  - B. Eligibility: Candidates may take the Comprehensive Examination if they have:
    - (1) been advanced to candidacy, and
    - (2) maintained a grade point average of at least 3.0 (B) in courses in the Master's degree program (i.e., graduate classes and prerequisites).
3. Description and Preparation
  - A. Description. The Examination consists of two sections:
    - (1) a written section spanning three, three-hour sessions during a single week,
    - (2) an oral defense, generally held within two weeks of writing the examination. The oral defense permits the student to elaborate on written answers and to answer questions that may develop out of those answers. Other discussions may arise from issues that occur to the examining committee during the oral segment of the Comprehensive Examination.
  - B. Preparation. Students should prepare for the Examination by beginning their study well before the actual assign-

ment of an examining committee. Once the Graduate Committee appoints that group, a candidate should meet with his or her Committee Chair to discuss procedures relevant to the Examination. Individuals are responsible for the subject matter of their courses regardless of whom the instructor is. The persons on their committees may or may not be those who have taught the actual seminars taken by the candidates. Professors writing questions are under NO obligation to discuss them with the students. The professors may, however, choose to provide candidates with general guidelines to aid in preparation for the Examination. Students should be familiar with all relevant literature integral to a particular area. Because the Examination is "closed book," no notes may be taken into the examination room. Students may obtain bibliographies from individual instructors or from the Graduate Advisor.

4. Student Petitions, Committee Formation, Guidance, and Facilities/Supervision
  - A. Petitioning. Students must petition to take the Comprehensive Examination no later than the end of the semester prior to the term in which they will write the Examination. Students may not petition to take the Comprehensive Examination until all grades of Incomplete (I) and/or Satisfactory Progress (SP) have been removed.
  - B. Committee Assignment. The Graduate Committee will consider petitions and assign committees during the last week of the first month of each semester. The examining committee consists of three examiners with one member serving as chair. Each member will compose questions for one of the three sessions of the examination.
  - C. Guidance. Graduate students taking the Comprehensive Examination should understand that faculty are free to develop questions from the subject areas in which students take courses, including the undergraduate core. Candidates are responsible for the subject matter in those areas whether or not such material is addressed in a particular class. Faculty may, but are not required to, provide guidance about the content for which the student is responsible. Faculty may, but are not required to, provide sample questions, reading lists, and/or assign open-ended questions for study. Furthermore, graduate students should understand that questions normally require integration of material in original ways.
  - D. Facilities/Supervision
    - (1) The Department will provide rooms in which candidates can write the examination.
    - (2) Students wishing to use computers may bring their own computers, or make arrangements with a specific faculty member to use that person's computer.
    - (3) The Graduate Advisor or his/her designee will be available on each day of the Examination to answer questions and cope with difficulties.
5. Defense, Decision, and Appeal Procedure
  - A. Each Comprehensive Examination Oral Defense will begin by giving candidates the opportunity to explain any revisions they feel will strengthen their written responses.
  - B. Decisions of the Comprehensive Examination Committees
    - (1) A Comprehensive Examination Committee may render one of the following decisions:

Pass: Three votes to pass  
Fail: Three votes to fail  
Rewrite: Two pass, one fail  
Fail: One pass, two fails

(2) If two members of the committee vote to pass and one votes to fail, the student shall be given the opportunity to rewrite once in the area of deficiency. Students must receive question(s) for revision within three working days of the oral examination. The student must respond in writing to the faculty member(s) by the final day of instruction of the semester as specified by the University calendar. The committee will reconvene during the final examination week to review the student's work and to decide whether the candidate passes or fails the Comprehensive Examination.

(3) If the Committee's decision is that the candidate failed the Examination, members shall make themselves available to the candidate to explain their decisions and to facilitate his or her preparation to retake the Examination. A student may petition to retake the Examination no earlier than the semester following that in which she or he has first taken the test. The Examination may be retaken only once.

C. The Department will use the following procedure if a student appeals the decision of a Comprehensive Examination Committee:

(1) The Graduate Committee of the Department will serve as the review board to determine whether the appeal has merit on procedural grounds.

(2) Members of the Graduate Committee will be ineligible to serve on the review board if they are part of the original examining committee.

(3) If such eligibility reduces the membership of the Graduate Committee to fewer than three persons, a replacement will be selected by lottery from among remaining eligible members of the Department faculty.

## Thesis Option

### 1. Electing the Thesis Option

A. This option requires a candidate to include four units of COMM 698 (Thesis) in her or his program. Students may not enroll in COMM 698 until after Advancement to Candidacy or, in rare cases, when advancement occurs in the same semester as the initial enrollment. Note that the Department facilitates timely Advancement to Candidacy of persons writing a thesis by allowing them to submit an advancement form listing ten courses (30 units) or more and starring (\*) the course or courses to be omitted if the thesis option is selected.

B. The "Petition for Permission to the Elect the Thesis Option"

(1) The candidate must submit the petition to the Graduate Committee through the Graduate Advisor. The form provides space for the signatures of the proposed committee members certifying their willingness to serve on the committee and their approval of the candidate's prospectus. Acceptance of the prospectus by the Thesis Committee certifies both the acceptability of the thesis topic and the willingness of the Committee to direct the student's thesis.

(2) The Graduate Committee will not approve the petition until the student completes all requirements in COMM 541 and 546.

### C. The Thesis Committee

(1) The student is responsible for securing faculty to serve on her or his Thesis Committee. At least two members of a three-person committee or three members of a five-person committee must be tenure-track or tenured faculty from the Department of Communication Studies. Faculty holding parallel status in other departments at CSULB or in other Communication Studies departments in the CSU system may fill the other slots on the committee.

(2) The Committee Chair must be a member of the Department's graduate faculty.

D. The candidate shall prepare a prospectus in consultation with the Thesis Committee Chair and other committee members. The project should be more than a minor extension of a seminar project. It should constitute an original contribution to literature in communication studies and should develop a student's research abilities. Candidates must submit a completed, approved prospectus to the Graduate Committee no later than the semester prior to that in which the thesis is to be completed.

### 2. Completing the thesis

#### A. COMM 698

(1) If the "Petition for Permission to Elect the Thesis Option" is approved by the Graduate Committee, a student may not change to the Comprehensive Examination Option except by special permission of the Graduate Committee. If a student has been enrolled for a semester or more in COMM 698, he or she cannot change options under any condition.

(2) If a candidate does not demonstrate satisfactory and continuous progress on the thesis after enrolling in COMM 698, the Graduate Committee, on the recommendation of the Thesis Committee and/or the Graduate Advisor, may terminate the student's graduate program and, if the student is enrolled in COMM 698 at the time, will assign an "F" for the semester.

(3) The Department may endorse a petition for one semester of concurrent enrollment in COMM 698 and in another graduate or professional school only if the candidate's Thesis Committee presents evidence that a draft of the thesis requiring only mechanical revision has been submitted.

B. Neither the Thesis Committee nor the Department is responsible for advising or supervising thesis candidates when they are not enrolled in the graduate program.

C. For thesis specifications and deadlines consult:

(1) The University Thesis Reviewer whose office is in the Library;

(2) the official thesis document: *Master's Thesis and Projects: Guide to Style and Format*;

(3) the Thesis Committee;

(4) thesis guidelines available in the following manuals:

(a) typing requirements (e.g., formatting, table of contents, appendices, etc.): Turabian, Kate. *A Manual for Writers of Term Papers, Theses, and Dissertations*, latest edition

(b) style sheets for technical requirements:

(i) *Publication Manual of the American Psychological Association*, latest edition, or

(ii) *MLA Handbook for Writers of Research Papers*, latest edition

#### D. Approval of the completed thesis

(1) Upon completion of an acceptable thesis, the student will defend the thesis before the Thesis Committee. Other departmental faculty and students may choose to attend. The Chair of the Thesis Committee will make all necessary arrangements for the oral defense and announce its time and place to the Department. The decision of the examining committee is by secret ballot and requires a majority vote. The Committee will notify candidates of their decision immediately after the oral defense. A candidate whose thesis and/or defense does not receive approval may revise and resubmit the thesis and/or defend it no sooner than the following semester. Resubmission or redefense, however, may take place only once.

(2) The completed draft of the thesis must meet the approval of the University Thesis Reviewer.

(3) Candidates must deposit the thesis in the University Library. Copies are given to the Department Library and to the Chair of the Thesis Committee if requested.

#### To Graduate

The *CSULB Catalog* states: "All requirements of the degree program must be completed within seven years of the date . . . when the first course appearing on the student program was completed. . . . A graduate student who expects to receive a degree at the end of any semester or summer session must be enrolled during that . . . [term] and must complete the Request to Graduate Form within the first three weeks of classes of the prior semester. Students completing their degrees in May or in the following summer session should file the application by the preceding October 1. Students completing their degrees January should file by the preceding February 15 at the Admissions and Records Office. . . . Graduate Studies 700 may be used to fulfill the enrollment requirement if the applicant has completed all degree program coursework prior to the semester of graduation."

#### Graduate Student Honors

Several honors for graduate students are awarded each year at commencement. In accordance with the Department policy, such honors shall be awarded to deserving students using criteria such as the following:

1. grade point average
2. papers published or presented at professional conferences
3. conventions attended
4. professional community service not a part of a student's employment
5. Graduate Communication Association involvement
6. Student Communication Association involvement
7. Departmental service — e.g., volunteer forensic assistant, class lecturer, committee membership

#### Financial Assistance

Refer to the *University Catalog* for information regarding financial assistance which is available on a University-wide basis.

#### Forms and Petitions

Sample forms and petitions relevant to enrolled graduate students appear in the Appendix of the Graduate Handbook available only to students registered in the Graduate Program.

#### Questions

Any questions not answered in these pages should be directed to the Department Graduate Advisor.

#### Graduate Courses in Communication Studies

Students may apply the following graduate courses in Communication Studies toward the Master's Degree: 531, 534, 541, 546, 590, 600, 610, 611, 614, 620, 630, 632, 633, 635, 636, 637, 638, 639, 640 (540), 646 (696), 648, 649, 650, 697, 698

#### Undergraduate Core Courses

300 (440), 301 (435), 307 (230), 306 (446), 309 (448)  
Course numbers in parentheses are old course numbers.

#### Graduate Faculty

Terre H. Allen, Amy Bippus, Nancy E. Briggs, Aaron C. Cargile, Sharon D. Downey, Norah Dunbar, Valerie C. McKay, Patricia Kearney, G. Bruce Loganbill, Mary McPherson, Timothy Plax, Karen Rasmussen, Marc Rich, José Rodríguez, James S. Saucedo Manseau, Craig R. Smith, Mat Taylor, Stacy Young

#### Courses (COMM)

##### Lower Division

##### 110. Interpersonal Communication (3)

Prerequisite: Concurrent enrollment in 110 Workshop. LECTURE: Basic characteristics of the processes underlying the formation, maintenance and termination of interpersonal relationships; theoretical and practical implications of these characteristics in various forms of interpersonal communication. WORKSHOP: Planned exercises and activities designed to develop interpersonal communications skills. (Lecture 2 hours, Workshop 2 hours). Not Open to students with credit in COMM 210. (CAN SPCH 8)

##### 130. Essentials of Public Speaking (3)

Composition and delivery of speeches to inform and persuade. Logical organization is stressed. (CAN SPCH 4)

##### 131. Argumentation (2)

Co-requisite: Concurrent enrollment in COMM 131W workshop is required. Theory of argumentation. Includes examination of forms and sources of evidence, inductive and deductive arguments, construction of case briefs, and refutation. (Lecture 1 hour.) (131+131W, CAN SPCH 6)

##### 131W. Argumentation Workshop (1)

Prerequisites: Concurrent enrollment in COMM 131 lecture is required. Two hour workshop develops critical thinking abilities with planned exercises and speeches including construction and presentation of arguments, cases, and refutation. (Workshop 2 hours.) (131+131W, CAN SPCH 6)

##### 132. Small Group Discussion (3)

Basic principles and techniques of discussion. Relationship of discussion to democratic processes and contemporary society including a study and practice of critical thinking and problem-solving techniques in various group discussion settings. (CAN SPCH 10)

**171. Voice and Applied Speaking (3)**

Application of speaking clarity and proficiency, voice quality and pacing, and related communication modification objectives. Speaking process is applied to realize personal, social, and professional verbal communication skills. Not Open to students with credit in COMM 271.

**220. Elements of Organizational Communication (3)**

Role of communication in achieving organizational goals; theory and practice of communication in private and public organizations; techniques to enhance understanding in organizations.

**236. Forensic Activity (1-3)**

Prerequisite: Consent of instructor. Participation in intercollegiate forensic activities. Any student who expects to participate in such activities during the semester should enroll. The student's specific assignments will be determined in consultation with the staff. Maximum credit, 4 units.

**Upper Division**

General Education Category A must be completed prior to taking any upper division course except upper division language courses where students meet formal prerequisites and/or competency equivalent for advanced study.

**300. Survey of Rhetorical Theory (3) F**

Prerequisites: Completion of GE Foundation requirements. A history of major rhetorical theories from the ancient Greeks to the Twentieth century. Where theories are directly provided, as in the case of Gorgias, Plato, Aristotle, Cicero, Quintilian, Augustine, Machiavelli, Locke, and others, they are explained and explored. In such cases as Marx, Freud, and the existentialists, the theories are deduced from primary philosophical writings.

**301. Communication Criticism (3)**

Prerequisite: COMM 300. The analysis and criticism of public communication events including speeches, editorials, advertisements, and mass media from a variety of rhetorical perspectives.

**306. Communication Theory (3)**

Conceptual perspectives and studies of coding, meaning, thinking, information, and persuasion within interpersonal, group and organizational contexts; theoretical contributions from other disciplines.

**307. Measurement in Communication Research (3)**

Prerequisites: COMM 306 and completion of University GE requirement in mathematics. Application of the scientific method to the study of speech communication; examination of the role empirical methodologies play in communication research; fundamental statistical processes. (Formerly COMM 305)

**309. Language and Behavior (3)**

Symbolic basis of human communicative behavior; relationship between language and behavior; investigation and analysis of discourse and behavioral effects.

**330. Intercultural Communication (3)**

Study of the relationship between culture and communication with emphasis given to social, psychological, linguistic and nonverbal variables; problems in the practice of intercultural communication.

**331. Argumentation and Debate (3)**

Techniques of argumentation and their application to debate; logic, reasoning and fallacies of reasoning; experience in various forms of formal argument and debate; techniques of debate program administration.

**333. Interpretive Communication of Literature (3)**

Derivation of meaning in various literary forms and its communicative interpretation to specific audiences.

**334. Business and Professional Communication (3)**

Prerequisite: COMM 130 or consent of instructor. Skills and technologies related to the assessment, strategic planning, development, implementation, and evaluation of effective communication in the business and professional setting.

**335. Persuasive Speaking (3)**

Prerequisites: Completion of GE Foundation requirements. Beginning with analysis of audience behaviors, this course teaches the skills necessary for advanced public speaking in various venues including legislative, legal, and ceremonial public address. The course explores various theories of motivation including speaker credibility, the use of emotional appeals, the importance of evidence and argument, style in language, and delivery skills.

**336. Forensic Activity (1-3)**

Prerequisite: Consent of instructor. Participation in intercollegiate forensic activities. Any student who expects to participate in such activities during the semester should enroll. Student's specific assignments will be determined in consultation with the staff. Max. credit, 4 units.

**337. Conference Management (3)**

Organization and direction of professional, business and political conferences or conventions; program simulation; leadership of and participation in decision making and parliamentary sessions. Course may be repeated to a maximum of 6 units.

**338. Ensemble Interpretive Reading (3)**

Programming and presentation of prose, poetry and drama by an ensemble of readers. Emphasis is placed on experimental presentations and on the development of analytical insight into literary forms.

**344. Theory and Techniques of Interviewing (3)**

Theory and techniques of oral communication in the process of interviewing. Practical application in employment, information gathering and persuasive interviews.

**352. Story Telling (3)**

Cultural heritage in story telling; analysis of story types for oral presentation; techniques of preparation, presentation and listening.

**355. Communication in the Classroom (3)**

Designed primarily for prospective elementary, secondary, and community college teachers, this course focuses on communication theories, principles, and skills applicable to teaching more generally, and to the teaching of speech communication specifically. Because effective teaching relies on effective communication, this course focuses on those communication variables and strategies that contribute to greater student learning. Moreover, students will develop an instructional package for teaching specific units in speech communication.

**358. Speech Arts for Children (3)**

Use of creative dramatics, improvisations, puppetry, choral speech, radio, television and group discussion for the purpose of developing fluency, responsiveness and imagination in children. Integration of speech arts activities with curricular subjects will be stressed. Opportunity to apply the theories in actual situations.

**400. Nonverbal Communication (3)**

Prerequisites: COMM 110 Lecture and Lab; ENGL 100. Basic characteristics of the nonverbal elements of human communication in the oral communication setting.

**410. Advanced Concepts in Interpersonal Communication (3)**

Prerequisites: COMM 110 and 307. Systems and symbolic interaction approaches to interpersonal communication, consideration of interpersonal needs, self disclosure, understanding, interpersonal perception, interpersonal attraction, and social conflict; rule and performance-centered theories of interpersonal communication.

**411. Communication in Conflict Resolution (3)**

Prerequisites: Completion of GE Foundation requirements, completion of one or more Explorations courses, and upper division standing. An analytical investigation of the nature and dynamics of interpersonal conflict; approaches to the study and understanding of conflict management as examined from intrapersonal, interpersonal, intragroup, organizational, and international perspectives.

#### 412. Gender and Communication (3)

Survey of theories and research literature with the objective of increasing students' understanding of, and familiarity with, major issues regarding communication between men and women in various contexts.

#### 414. Communication in Families (3)

Prerequisites: COMM 307, 306, and consent of instructor. A survey course emphasizing the role of communication in families; theoretical perspective of family interaction, current family issues, intercultural aspects of family interaction, effects of changing career/family roles and intergenerational interaction.

#### 420. Advanced Concepts in Organizational Communication (3)

Prerequisites: COMM 220 and 307. Philosophy, methods and designs for studying the communication systems of complex organizations; organizational communication-needs assessment, methods for developing and improving communication in organizations are examined and studied.

#### 421. Communication in Bargaining & Negotiation (3)

Prerequisites: COMM 220 and 307. Role of communication in the decision-making process of negotiation and bargaining. Emphasis on the functions of communication in resolving disputes through bargaining.

#### 430. Advanced Concepts in Intercultural Communication (3)

Prerequisites: COMM 330 or consent of instructor. Continued study of communication processes involved in interaction between people from different cultural groups. Exploration of culturally variable means of thinking and behaving, and study of social psychological processes affecting all forms of intergroup interaction. Traditional grading only.

#### 432. Communication Leadership (3)

Development of leadership skills in problem-solving communication environments; leadership theories, strategies and techniques of problem-solving and decision making.

#### 433. Trends in Interpretive Communication (3)

Trends and issues in the theoretical and historical development of oral interpretation as applied to current times.

#### 436. Communication Strategies of American Speakers (3)

Prerequisites: COMM 300 and 301. Comparison and contrast of famous American speakers and their techniques, effects and environments from the colonial period to present.

#### 437. Communication Strategies of International Speakers (3)

Prerequisites: COMM 300 and COMM 301. Comparison and contrast of famous International speakers and their techniques, effects, and environments from Demosthenes and Churchill to Hitler and Gandhi. Traditional grading only. Course is not repeatable.

#### 439. Communication and Popular Culture

Examines the relationship between communication and popular culture in the public sphere. The course aims at improving students' abilities to respond critically to everyday mass social messages. Traditional grading only.

#### 441. Issues in Freedom of Communication (3)

Prerequisites: Completion of GE Foundation requirements, one or more Explorations courses, and upper-division standing. An examination of the evolution and impact of First Amendment rights on American society and its political system. The course emphasizes the evolution of the First Amendment from the colonial period to its adoption in 1791, significant Supreme Court cases interpreting First Amendment law, the First Amendment and electronic media, and the rhetoric of social protest. The course is recommended for pre-law students.

#### 442. Campaign Persuasion (3)

Prerequisites: Completion of GE Foundation requirements, upper division standing, and at least two Exploration Level Courses. It is recommended that one of these be either COMM 331 or COMM 335. An examination of persuasive communicative strategies in political campaigns inclusive of campaign speeches, commercials, news media coverage, image-building, audience analysis through polling, and fund raising.

#### 449. Studies in Oral Persuasion and Attitude Change (3)

Attitude formation and change through oral communication; factors in persuasion; problems in determining the effects of persuasive messages; source credibility, message variables; and personality factors in the process of persuasion.

#### 450. Communication Training in Organizations (3)

Prerequisite: Major or minor in speech communication or consent of instructor. The nature and role of communication training in a variety of social, educational, and business organizations are investigated and analyzed. Communication effectiveness programs are examined and studied in terms of goals, structure, and impact. Use of audiovisual aids and communication training techniques are emphasized.

#### 452. Communication in the Multinational Organization (3)

Study and analysis of communication patterns in multinational and multicultural organizational settings; the nature and impact of different organizational structures, value systems and cultural norms considered and examined in relation to productivity, employee and organizational obligations and expectations.

#### 490. Special Topics in Speech Communication (3)

Topics of current interest selected for intensive study in speech communication. May be repeated with different topics for a maximum of 6 units. Topics announced in the *Schedule of Classes*.

#### 492A-B. Internship (3-3)

Prerequisite: "PERMIT" required to enroll with consent of instructor; open only to senior majors. At least 120 hours with cooperating organizations on or off-campus. Work to be directed and evaluated by the instructor in consultation with supervisor of the participating organizations. Assignments will be varied. Credit/No Credit grading only. COMM 492A is for unpaid Internship. COMM 492B is for paid internship.

#### 495. Service Learning Internship (3)

Prerequisites: Communication Studies Major with Senior Standing; Minimum 3.0 GPA for all college coursework taken; COMM 130 or 335 or their equivalents; COMM 352 or 355 or 358, or the consent of instructor if one of these courses has not been taken; Consent of COMM 495 instructor. Service Learning Internship in Communication Studies is designed for dedicated Communication Studies majors to apply their academic knowledge of communication skills in the community outside of CSULB. Specifically, students will be trained by the instructors to provide public speaking, listening, interpersonal communication, group communication, multicultural communication, and/or interviewing skills training (1) to students in the elementary, middle, and high schools, or (2) to persons in the public sector. The purpose of the course is to serve others' needs for communication skills via strong connections among the community, CSULB, and the communication discipline. Traditional grading only. Course may be repeated to a maximum of 6 units.

#### 499. Special Studies (1-6)

Prerequisites: "Permit" required to enroll. Open to upper division students or graduate standing and consent of instructor. An approved "Agreement for Independent Study" must be on file with the Department prior to enrolling in this course. Individualized laboratory or library research selected in consultation with instructor. Written report of the research is required. Not acceptable for graduate credit toward the master's degree.

### Graduate Division

#### 531. Administering the Forensic Program (3)

Prerequisite: "PERMIT" required to enroll with consent of instructor. Principles of constructing and administering a forensic program, including recruiting, squad direction, budgeting, tournament policies and current literature on forensics direction.

#### 534. Communicating Professionally (3)

The planning and practice of written and oral communication skills applicable to complex organizational environments. Written message preparation will emphasize writing memoranda, letters, proposals, reports, evaluations, and position descriptions. Oral message preparation will focus on presenting briefs, arguments,

and position papers; conducting performance appraisals, interviews, and meetings; managing the media, stockholders, and the public at large.

**541. Rhetorical Theory and Criticism I (3)**

Introduction to research in rhetorical studies. Examination of major figures and schools of thought on rhetorical theory and criticism from the Pre-socratics through the modern British era.

**546. Communication Theory and Research I**

An examination of theories and research in social cognition, interpersonal, small group, organizational, intercultural, mass, instructional, language and behavior, and nonverbal communication. Critical analysis of empirically-based articles in the field. Social-scientific research proposal required.

**590. Special Topics in Speech Communication (3)**

Prerequisite: Consent of instructor. Investigation of topics of current interest and concern to students in speech communication and allied areas. Topics will be announced in the *Schedule of Classes*. May be repeated for credit with different topics, but no more than three units may count toward the master's degree in speech communication.

**600. Seminar in Nonverbal Communication (3)**

Prerequisite: COMM 546 or consent of instructor. Review and analysis of theoretical writings and critical studies in nonverbal communication; the relationship of nonverbal behavior to oral communication.

**610. Seminar in Interpersonal Communication (3)**

Prerequisite: COMM 546 or consent of instructor. Current theories and research in interpersonal communication.

**611. Seminar in Negotiation and Conflict Resolution (3)**

Prerequisites: COMM 411 or 421 and 546 or consent of instructor. Investigation, analysis, and criticism of the nature, development, and dynamics of conflict and the role of negotiation in interpersonal, group, organizational, and international and intercultural communication; study and understanding of conflict management.

**614. Gender and Family Research (3)**

This course covers major theoretical perspectives that explain the role of communication in family and gender issues. Epistemological, conceptual, and methodological issues in researching family and gender communication are also explored. Traditional grading only.

**620. Seminar in Organizational Communication (3)**

Prerequisite: COMM 546 or consent of instructor. Theories and models of communication in large organizations; design and management of organizational communication systems.

**630. Seminar Intercultural Comm**

Prerequisites: COMM 541 and 546 or consent of instructor. Analysis of cultural influences on interpersonal communication; emphasis given to cultural values, perception, social organization, language and nonverbal codes; development of strategies of effective intercultural communication in both international and domestic settings.

**632. Seminar in Small Group Communication (3)**

Prerequisite: COMM 546 or consent of instructor. Research in small group discussions.

**633. Seminar in Interpretive Communication (3)**

Prerequisite: COMM 541 or consent of instructor. Theories of communicative interpretation of literature, with emphasis upon the theory and evaluation of oral presentation of literature as an art form and a pedagogical instrument.

**635. Seminar in Communication Criticism (3)**

Prerequisite: COMM 541 or consent of instructor. Critical theories of rhetoric and major systems of communication criticism; development of criteria and approaches for the evaluation of select communication acts and contexts.

**636. Seminar in American Public Communication (3)**

Prerequisite: COMM 541 or consent of instructor. Studies of American rhetorical events and their social, political and intellectual settings, application of rhetorical theory in the analysis of these events.

**637. Seminar in International Public Communication (3)**

Prerequisite: COMM 541 or consent of instructor. Studies of international rhetorical events and their social, political, and intellectual settings; application of rhetorical theory in the analysis of these public communication events. Traditional grading only.

**638. Seminar in Greek and Roman Public Communication (3)**

Prerequisite: COMM 541 or consent of instructor. Studies of Greek and Roman rhetorical events and their social, political and intellectual settings, application of rhetorical theory in the analysis of these events.

**639. Seminar in Communication and Popular Culture (3)**

Prerequisite: COMM 541 or consent of instructor. Surveys literature on rhetoric, critical studies, and popular culture to provide a basis for investigating communication in popular culture. Traditional grading only.

**640. Rhetorical Theory and Criticism II (3)**

Prerequisite: COMM 541. Examination of major figures and themes in rhetorical theory and criticism in the contemporary era.

**646. Communication Theory and Research II (3)**

Prerequisites: COMM 307 (or equivalent) and 546. Empirical research methodologies applied to communication research. Theory and design of scientific research; analysis of findings; computer applications. Research report required.

**648. Seminar in Language and Behavior (3)**

Prerequisite: COMM 546 or consent of instructor. Contemporary theories and models in linguistic, psycholinguistic and sociolinguistic research; communication discourse and speech acts analysis.

**649. Seminar in Persuasion and Attitude Change (3)**

Prerequisite: COMM 546 or consent of instructor. Contemporary theories and models of persuasion; structure and relationships of beliefs, values and attitudes; methods of assessing persuasive effects; analysis of research literature.

**650. Seminar in Instructional Communication (3)**

Prerequisites: COMM 541 and 546 or consent of instructor. Designed for either beginning or experienced teacher/trainers, the course will identify those communication variables and strategies which contribute to greater student/client learning as well as greater satisfaction with the learning process. Students will develop an instructional/training package.

**697. Directed Research (1-6)**

Prerequisites: COMM 541 and 546; authorization of the department Graduate Advisor, Agreement for Independent Study Course form, consent of instructor. Directed research leading to the definition and discussion of a selected problem or issue in speech communication and the presentation of research results in a formal paper submitted to the department. Course may be repeated for a maximum of 6 units with different topics. (Independent Study)

**698. Thesis (2-4)**

Prerequisites: COMM 541, 546, 640 and 646, authorization of the department Graduate Advisor, Agreement for Independent Study Course form, consent of instructor. Preparation, completion and submission of an acceptable thesis in partial fulfillment of the requirements for the master's degree. Credit/No Credit grading only.

# COMPUTER ENGINEERING AND COMPUTER SCIENCE

## Accreditation

The Bachelor of Science in Computer Engineering is accredited by the EAC (Engineering Accrediting Commission) of Accreditation Board for Engineering and Technology, Inc. (ABET), 111 Market Place, Suite #1050, Baltimore, MD 21202, phone: 410/347-7710 (website: <http://www.abet.org>). The Bachelor of Science in Computer Science is accredited by the Computer Science Accreditation Commission (CSAC)

of Computer Science Accreditation Board (CSAB), 111 Market Place, Suite #1050, Baltimore, MD 21202, phone: 410/347-7703 (web site: <http://csab.org>).

## Advisory Board

The Department of Computer Engineering and Computer Science is supported by an Advisory Board composed of engineers, computer scientists, and business executives in the Southern California area. This liaison helps the department keep its curricula responsive to the needs of the community.

## Undergraduate Educational Objectives

All courses and programs in the Department of Computer Engineering and Computer Science are designed to meet the following objectives: Students will receive a comprehensive education in Computer Engineering and/or Computer Science, as well as the sciences and humanities, that will serve them in both their professional and personal lives. Students will be able to analyze and solve problems in Computer Engineering and/or Computer Science using modern techniques, skills, and tools. Students will be able to communicate effectively. Students will be able to design systems, components or processes that meet performance, cost, time, safety, and quality requirements. Students will understand their professional responsibilities, including remaining current in their field of study, and will be able to analyze the social and ethical implications of their work.

## Undergraduate Degree Programs

The Department of Computer Engineering and Computer Science offers programs leading to a Bachelor of Science in Computer Engineering or a Bachelor of Science in Computer Science. The goal of both programs is to prepare graduates for a wide variety of computer-related careers by integrating the theoretical foundations of the discipline with practical applications. The degree in Computer Engineering focuses on computer hardware (design, construction, and operation of computer systems) while the Computer Science degree places more emphasis on computer software (programming). The high school student planning to enter either program is advised to pursue a strong program in science and mathematics.

## Bachelor of Science in Computer Engineering (code 3-4013) (126 units)

The Bachelor of Science in Computer Engineering degree program has a two-part objective. The first is to provide students with a strong background in mathematics, physics, and engineering science. The curriculum includes a core of standard electrical engineering courses as well as courses in digital systems, computer organization, programming languages, and software, including operating systems, compiler theory and software engineering. The second objective is to provide students with the skills necessary to be effective contributors in a quality-oriented, customer-focused environment. Courses throughout the program, especially those in the junior and senior years, emphasize an open-ended, design-oriented approach to solving engineering problems. Teamwork, communication skills, and an interdisciplinary approach to problem solving are integrated into the senior, computer engineering design courses.

## Requirements

Lower Division: CECS 174, 201, 228, 261, 274; MATH 122, 222; PHYS 151, 152 (or EE 210 and 210L).

Upper Division: CECS 301, 311, 325, 326, 340, 346, 347, 360, 440, 443, 460A, 460B; EE 380 (or MATH 380), 386; MATH 323, 370A; plus nine units of approved electives to be selected from CECS 406, 451, 474, 475, 497, EE 486, ENGR 310 (or ENGL 317).

## Bachelor of Science in Computer Science (code 3-4011) (126 units)

The Bachelor of Science in Computer Science degree is designed to prepare graduates for a variety of professional careers in the computer field. The curriculum is designed to provide students with both breadth and depth in computer science. Breadth is achieved through a series of core courses that stress a balance between the theoretical and practical aspects of computer science. The topics covered in these courses include the following: the basics of programming languages, software design and analysis, data structures, algorithms, digital systems, computer organization, computer architecture, and operating systems. Extensive laboratory time is required for these courses, and design and analysis experiences are emphasized. Depth is achieved through courses (both required and elective) on advanced computer science topics. These courses provide students with in-depth knowledge of the material covered in the breadth portion of the curriculum.

## Requirements

Lower Division: CECS 174, 201, 228, 261 or 281, 274; MATH 122, 222, 247; PHYS 151, 152 (or EE 210 and 210L); four units of approved courses in science or with strong emphasis in quantitative methods.

Upper Division: CECS 323, 325, 326, 328, 340, 424, 440, 443; ENGR 350; MATH 323, 380 (or EE 380); ENGR 310 or ENGL 317; plus nine units of approved electives to be selected as follows: three (3) units from CECS 471, 475, 481; and six (6) units from CECS 405, 406, 419, 423, 426, 428, 444, 448, 449, 451, 470, 472, 473, 476, 497.

## Minor in Computer Science (code 0-4011)

The minor in Computer Science is designed to prepare students in other majors for careers in a wide variety of fields which require computer science expertise.

## Requirements

A minimum of 21 units. CECS 174, 201, 228, 261 (or 281 or ENGR 202), 274, 323, and 325.

## Master of Science in Computer Science

The Master of Science in Computer Science is offered by the Department of Computer Engineering and Computer Science, College of Engineering. Two options are offered:

1. Option in Computer Engineering
2. Option in Computer Science

The Option in Computer Engineering offers advanced study in the theory, analysis, design and applications of both computer hardware and software. The Option in Computer Science offers advanced study in modeling software systems, operating systems, compiler construction, and analysis of algorithms.

## Admission Procedures

To be considered for admission the graduate applicant must have earned a bachelor's degree from an accredited institution, have been in good standing at the last institution attended, and have a grade point average (GPA) of at least 2.7 for the last 60 semester units (90 quarter units) attempted. The general Graduate Record Examination (GRE) is required. There is no separate department application, but applicants should submit a second set of transcripts to the department.

## Prerequisites

### Option in Computer Engineering (code 6-4010)

1. A bachelor's degree in computer science, engineering, or other appropriate discipline from an accredited college or university, with a minimum grade point average (GPA) of 2.7 in the last 60 semester units attempted.
2. Credit in the following courses or their equivalents: CECS 274, 301, 325, 326, 346, 347, 360, 440, 443, 460A, and MATH 370A.
3. Students must consult with the program graduate advisor prior to enrolling in any course for the program.

### Option in Computer Science (code 6-4011)

1. A bachelor's degree in computer science, engineering, or other appropriate discipline from an accredited college or university, with a minimum grade point average (GPA) of 2.7 in the last 60 semester units attempted.
2. Credit in the following courses or their equivalents: CECS 228, 274, 323 (or 421), 325, 326, 328, 424, 440, 443, and MATH 380.
3. Students must consult with the program graduate advisor prior to enrolling in any course for the program.

## Advancement to Candidacy

Students applying for advancement to candidacy must:

1. have completed all undergraduate deficiencies with grades of C or better;
2. have attained an overall grade point average (GPA) of 3.0;
3. have completed at least 12 units applicable to the degree with a GPA of at least 3.0;
4. have passed the University Writing Proficiency Examination;
5. and have their program of studies approved by the CECS department graduate advisor.

## Requirements for the Option in Computer Engineering (code 6-4010)

Students must complete a minimum of 30 graduate and approved upper-division course units including the following:

1. At least 21 units at the graduate level of instruction;
2. CECS 526, 530, 531, and 546;
3. All students must complete either:
  - A. a comprehensive examination, or
  - B. a thesis with oral defense which requires a total of 6 units of CECS 697 or 698, of which at least 4 units must be CECS 698.

## Requirements for the Option in Computer Science (code 6-4011)

Students must complete a minimum of 30 graduate and approved upper-division course units including the following:

1. At least 21 units at the graduate level of instruction;
2. CECS 526, 528, 530, and 543;
3. All students must complete either:
  - A. a comprehensive examination, or
  - B. a thesis with oral defense which requires a total of 6 units of CECS 697 or 698, of which at least 4 units must be CECS 698.

## Courses (CECS)

### Lower Division

#### 110. Introduction to the Internet (3)

Prerequisite: Some computer experience. Provides a general overview of computer systems, networking, and the Internet. World-Wide Web, email, telnet, ftp, newsgroups, finding information on the Internet, and basic Web page creation. Considers legal, ethical, privacy and security issues on the Internet. (Lecture 2 hours, laboratory 3 hours.)

#### 126. Introduction to the UNIX Operating System (3)

Prerequisite: Consent of instructor. UNIX operating system's user interface. File and directory commands, editor commands, communication commands and other UNIX utilities. UNIX access permissions and security, I/O redirection, pipes, metacharacters, and full-screen editing with vi. Electronic communication, simple shell programming, and using the Xwindow System. (Lecture 2 hours, laboratory 3 hours.)

#### 174. Programming and Problem Solving I (3)

Prerequisite: MATH 117 (or equivalent.) Introduction to the basic concepts of computer science and the fundamental techniques for solving problems using the C++ programming language. Structured problem solving, object-oriented programming, programming style. Applications to numerical and non-numerical problems. Not open to students with credit in CECS 175. (Lecture 2 hours, laboratory 3 hours.) Traditional grading only.

#### 201. Computer Logic Design I (3)

Prerequisite: MATH 117 (or equivalent). Basic topics in combinational and sequential switching circuits with applications to the design of digital devices. Laboratory projects with Small Scale Integration (SSI) implementations using Computer Aided Design (CAD). (Lecture 2 hours, lab 3 hours.) Traditional grading only.

#### 228. Discrete Structures with Computer Science Applications I (3)

Prerequisites: CECS 174 and MATH 122. The specification, development and analysis of algorithms. Sets, relations and functions. Logic and mathematical structures used in computer science. Introduction to combinatorics. Programming projects to exemplify these concepts. (Lecture 2 hours, laboratory/problem session 3 hours.) Traditional grading only.

#### 261. Computing with Java (3)

Prerequisite: CECS 174. Comparison of basic Java constructs to similar constructs in C++. Object-oriented programming in Java. Applets and graphical user interfaces. Mouse, key, and window events. Exception handling and files. (Lecture 2 hours, laboratory 3 hours.) Traditional grading only.

#### 271. Introduction to Numerical Methods (3)

Prerequisites: CECS 174 and MATH 123. An introduction to numerical methods and the FORTRAN programming language. Analysis of computational errors; iterative methods for finding roots and for solving systems of equations. Numerical techniques for evaluating integrals, determining derivatives, and solving ordinary differential equations. FORTRAN programming projects will be assigned. Not open to students with credit in CECS 342. (Lecture 2 hours, laboratory 3 hours.) Traditional grading only.

#### 274. Programming and Problem Solving II (3)

Prerequisite: CECS 174. Disciplined methods of design, coding and testing using the C++ programming language. Data abstraction, object-oriented design. Introduction to data structures

(linked lists, stacks, queues and trees.) Recursion. Sorting and searching. (Lecture 2 hours, laboratory 3 hours.) Traditional grading only.

#### 281. GUI Programming (3)

Prerequisite: CECS 174. Introduction to programming in a graphical user interface (GUI) environment. Menus, dialog boxes, forms, text-boxes, toolbars and other controls. Properties, methods and events of objects. Program control statements including if, case, while, loop, and do. System objects including the mouse, screen and printer. (Lecture 2 hours, laboratory 3 hours.) Traditional grading only.

### Upper Division

#### 301. Computer Logic Design II (3)

Prerequisite: CECS 174. Pre- or Corequisite: CECS 311 or EE 331. Sequential logic, programmable logic design, basic Arithmetic Logic Unit (ALU) design and memory devices. Laboratory projects with Medium Scale to Very Large Scale Integration (MSI to VLSI) implementations and Computer Aided Design (CAD). (Lecture 2 hours, laboratory 3 hours.) Traditional grading only.

#### 311. Data Acquisition, Processing, and Display (3)

Prerequisites: CECS 201, EE 210 and 210L or PHYS 152. Hardware and software used to acquire, process, and display real-time signals. Transducers. Amplifiers. Buffers and isolators. Interrupt generators. Analog-to-digital and digital-analog converters. Display hardware. Software packages for electronics simulation and data acquisition. Sources of noise in digital systems. (Lecture 2 hours, laboratory 3 hours.) Traditional grading only.

#### 323. Database Fundamentals (3)

Prerequisites: CECS 228, 274, MATH 122, 222. Fundamental topics on database management. Topics include entity-relationship models, database design, data definition language, the relational model, data manipulation language, database application programming and normalization. (Lecture 2 hours, laboratory 3 hours.) Traditional grading only.

#### 325. Computer Organization and Assembly Language Programming (3)

Prerequisites: CECS 201 and 274. Basic computer organization, representation of information and instruction, addressing techniques, input/output, assembly language programming, macros and macro processing. Introduction to software systems, including assemblers, linkage editors and loaders. Programming assignments in assembly language. (Lecture 2 hours, lab 3 hours.) Traditional grading only.

#### 326. Operating Systems (4)

Prerequisite: CECS 325. The structure and functions of operating systems. Interrupt handling, processes and interprocess communication, memory management, resource scheduling, information sharing and protection. Project implementation in C/C++. (Lecture 3 hours, laboratory 3 hours.) Traditional grading only.

#### 328. Discrete Structures with Computer Science Applications II (3)

Prerequisites: CECS 228 and 274. A broad view of data structures and the structure-preserving operations on them. Abstract data types, algorithms, complexity. Programming projects to exemplify these concepts. (Lecture 2 hours, laboratory 3 hours.) Traditional grading only.

#### 340. Discrete Event Systems Modeling and Simulation (3)

Prerequisites: CECS 201 and 228. Modeling and simulation of discrete event systems specific to computer science and computer engineering including networks, queuing systems, digital logic, and computer architecture. The use of general purpose and specialized languages for these systems will be explored. Various methods for system input data (stochastic and deterministic) will be explored. (Lecture 2 hours, laboratory 3 hours.) Traditional grading only.

#### 346. Microprocessors and Applications (3)

Prerequisite: CECS 325. Study of microprocessor and microcomputer elements. Design of microprocessor-based systems to solve practical problems. Laboratory projects using CAD implementations and hardware design languages for simulation of designs. (Lecture 2 hours, laboratory 3 hours.) Traditional grading only.

**347. Microprocessor Hardware Design (3)**

Prerequisites: CECS 301 and 346. Study of embedded processor applications and interfacing. Embedded systems design, control of external devices, embedded programming in C and assembly. Laboratory in implementation of embedded designs and hardware assisted debugging. (Lecture 2 hours, laboratory 3 hours.) Traditional grading only.

**360. Integrated Circuit Design Software (3)**

Prerequisites: CECS 301, 325, MATH 123 or 222. Introduction to Computer Aided Design tools used in the design and fabrication of integrated circuits. Discussion of the IC fabrication process, the layout and routing of basic gates, transistor level design of gates, synthesis and RTL level design, floor planning, and IC development costs. (Lecture 2 hours, lab 3 hours.) Traditional grading only.

**\*405. Special Topics in Computer Science (3)**

Prerequisite: Senior standing in computer science major. Selected topics from recent advances in computer science and technology. Course content will vary from year to year. (Lecture-problems 3 hours.) Repeatable to a maximum of 6 units with different topics. Traditional grading only.

**\*406. Special Topics in Computer Science (3)**

Prerequisite: Senior standing in a computer science program. Each offering is based on an area in computer science and technology in which recent advances have been made. Specific topic will be recorded on student's transcript. (Lecture-problems 2 hours, laboratory 3 hours.) Repeatable to a maximum of 6 units with different topics. Traditional grading only.

**\*419. Theory of Computation (3)**

Prerequisite: CECS 328. Finite automata and regular expressions. Pushdown automata and context-free languages. Turing machines and computability. Computational complexity. (Lecture-problems 3 hours.) Traditional grading only.

**\*423.. Database Applications (3)**

Prerequisite: CECS 323 (or 421). Preparation for work on commercial database systems. Advanced modeling and analysis, data definition, constraints, retrieval, manipulation, security and usability. Commercial development tools, distributed/multi-tier environments and integration of databases with intranets and internets. Projects may include cooperation with students from other departments. (Lecture 2 hours, laboratory 3 hours.) Traditional grading only.

**\*424. Organization of Programming Languages (4)**

Prerequisites: CECS 326 and 328. Comparison of programming languages (C, C++, Ada, Java, etc.) in their design and structure regarding features such as data types, control structures and run-time considerations. Includes computer projects illustrating some of these concepts. (Lecture 3 hours, laboratory 3 hours.) Traditional grading only.

**\*426. Topics in Operating Systems (3)**

Prerequisite: CECS 326. Advanced operating system analysis and design. Topics of current interest. Project implementation (Lecture 2 hours, laboratory 3 hours.) Traditional grading only.

**\*428. Analysis of Algorithms (3)**

Prerequisite: CECS 328. Applications of standard combinatorial techniques to applied programming problems. Rigorous analysis of the correctness and complexity of algorithms. Advanced graph algorithms are emphasized. Topics include shortest paths on graphs, sorting, string matching, union find problem, divide-and-conquer technique, and weighted-edge problem. (Lecture 2 hours, laboratory 3 hours.) Traditional grading only.

**440. Computer Architecture (3)**

Prerequisites: CECS 325 and 340. Review of logic design. Register transfer and micro-operations. Basic computer organization. Central processor organization. Microprogram control organization. Arithmetic processor design. Arithmetic algorithms. Input-output organization. Memory organization. (Lecture 2 hours, laboratory 3 hours.) Traditional grading only.

**\*443. Software Engineering (3)**

Prerequisite: CECS 326. Software life cycle. Functional decomposition, data flow and object-oriented development. Reusability and portability. (Lecture 2 hours, laboratory 3 hours.) Traditional grading only.

**\*444. Compiler Construction (4)**

Prerequisites: CECS 325 and 328. Syntax directed compiler study. Organization of a compiler and overall design: parsing, semantic analysis, optimization and code generation. (Lecture 3 hours, laboratory 3 hours.) Traditional grading only.

**\*446. Microprocessor Systems Design (3)**

Corequisites: CECS 347 and 440. Computer system design using microprocessors including the use of multiple CPUs and RISC processors. (Lecture-problems 2 hours, laboratory 3 hours.) Traditional grading only.

**\*448. User Interface Design (3)**

Prerequisites: CECS 323 (or 421), and any one of CECS 471, 475, 481. Evaluation, design and programming of user interface systems. Fundamentals of human cognition, system characteristics, and the interaction between humans and systems. Usability methods and user/task-centered design. Tools for designing and building user interfaces, with emphasis on rapid applications development. (Lecture 2 hours, laboratory 3 hours.) Traditional grading only.

**\*449. Computer Graphics (3)**

Prerequisites: MATH 247, CECS 261 and 274. Basic software and hardware of 2-D computer graphics. Applications. (Lecture 2 hours, laboratory 3 hours.) Traditional grading only.

**\*451. Artificial Intelligence (3)**

Prerequisites: CECS 228 and 274. Introduction to the principles and programming methods of artificial intelligence. Topics include symbol manipulation, knowledge representation, searching, expert systems and logic programming. Project implementation in LISP or Prolog. Not open to students with credit in CECS 420 or 450. (Lecture 2 hours, laboratory 3 hours.) Traditional grading only.

**460A. System on Chip Design I (3)**

Prerequisite: CECS 360 or 440. A complete System on a Chip (SOC) design flow beginning with a design specification and ending with a working SOC. Creation of RTL level modules designed for reuse, integration of Intellectual Property (IP) for both RTL level and physical level IP, IC verification, and the creation of self-checking test benches for SOC designs. (Lecture 2 hours, laboratory 3 hours.) Traditional grading only.

**460B. System on Chip Design II (3)**

Prerequisite: CECS 460A. System on a Chip (SOC) design applications. A variety of SOC designs will be built as class project which involve both the hardware and software aspect of a SOC along with hardware/software integration problems. Design reviews, design specification and team design implementation will be stressed along with project planning and tracking mechanisms for system level design problems. (Lecture 2 hours, laboratory 3 hours.) Traditional grading only.

**\*470. World-Wide Web Development (3)**

Prerequisites: CECS 326 and 323 (or 421). Introduction to commercial practice in World-Wide Web site development. Web server and client software and the underlying networking technologies and protocols. Page and site design and programming using contemporary development tools and languages. Typography, graphics, database integration, usability, ethics and future directions. Projects will include site development for an actual client and may include cooperation with students from other departments. (Lecture 2 hours, laboratory 3 hours.) Traditional grading only.

**\*471. Internet Applications Using Java (3)**

Prerequisites: CECS 261 and 274. Threads, images, and animation. User interface component libraries. Streams, readers and writers. Client-server applications. Java beans. Internationalization. Introduction to remote method invocation, Java database connectivity, and multimedia applications. (Lecture 2 hours, laboratory 3 hours.) Traditional grading only.

**\*472. Computer Network Programming (3)**

Prerequisites: CECS 326 and 328. Fundamentals of client-server programming. Concepts of computer network programming including RPC and CORBA. Introduction to the principles of TCP and routing. (Lecture 2 hours, laboratory 3 hours.) Traditional grading only.

**\*473. Enterprise Web Applications (3)**

Prerequisites: CECS 323 (or 421), 470, and any one of CECS 471, 475, 481. Web commerce, high-availability Web sites, and informa-

tion architecture. Advanced client side and server side scripting, advanced searching and indexing, application servers. Legal and business aspects. Projects may include cooperation with students from other departments. (Lecture 2 hours, laboratory 3 hours.) Traditional grading only.

**\*474. Computer Network Interoperability (3)**

Prerequisite: CECS 326. An overview of computer network theory and practice from a systems perspective. Topics include network infrastructure, local area network (LAN) protocols, wide area network (WAN) protocols, switching technologies, Internet Protocol (IP), Transmission Control Protocol (TCP), network security, and network configuration, design, and performance. (Lecture 2 hours, laboratory 3 hours.) Traditional grading only.

**\*475. Object-Oriented Programming and C++ (3)**

Prerequisite: CECS 274. An overview of object-oriented programming, data abstraction, and the C++ language. Classes, constructors, destructors, function and operator overloading, inheritance, polymorphism, input/output, standard template library (STL), templates, Visual C++, Microsoft Foundation Class (MFC), and object-oriented design. (Lecture 2 hours, laboratory 3 hours.) Traditional grading only.

**\*476. System and Network Administration (3)**

Prerequisites: CECS 326 and 328. Introduction to the management and administration of Unix systems and TCP/IP networks. Managing users, local and network file systems, electronic mail, print queues. Establishing and managing a network. (Lecture 2 hours, laboratory 3 hours.) Traditional grading only.

**\*481. Event Driven Programming (3)**

Prerequisite: CECS 326. A rigorous introduction to Graphical User Interface (GUI) programming as provided in a number of popular software development products. Topics include Windows API (Application Programming Interface) using C and C++, Visual Basic and other development tools. (Lecture 2 hours, laboratory 3 hours.) Traditional grading only.

**496. Computer Science Problem Solving (1)**

Prerequisites: CECS 274 and consent of instructor. A study of problem solving in Computer Science. Discussion of the theory necessary to solve computer science problems as well as the solutions to the problems. Problems studied will involve applications of graph theory, data structures, recursion, and algorithms. The aim of the course is to enhance the student's problem solving ability. (Lecture 1 hour.) Course may be repeated in different semesters to a maximum of 6 units. Traditional grading only.

**\*497. Directed Studies (1-3)**

Prerequisite: Consent of instructor. Assigned study in topics in current computer literature or computer-related projects with a final report. May be repeated for a total of 6 units with written permission of the Department Chair.

## Graduate Courses

**521./621. Database Architecture (3)**

Prerequisites: CECS 328 and 323 (or 421). (Master's students register in CECS 521 or 621; Ph.D. students register in CECS 621.) Relational database design theory—a rigorous approach. Security, recovery, transaction management, distributed databases and query optimization. Additional projects required for CECS 621. (Lecture-problems 3 hours.) Traditional grading only.

**524./624. Advanced Topics in Programming Languages (3)**

Prerequisite: CECS 424 and 471. (Master's students register in CECS 524 or 624; Ph.D. students register in CECS 624.) Intensive study of languages of current interest which support object-oriented, client-server, and multimedia applications (e.g. JAVA). Additional projects required for CECS 624. (Lecture-problems 3 hours.) Traditional grading only.

**526./626. Advanced Operating Systems (3)**

Prerequisites: CECS 228 and 326. (Master's students register in CECS 526 or 626; Ph.D. students register in CECS 626.) Theoretical foundations of concepts applied in the design of operating systems. Control of concurrent processes, deadlocks, mutual exclusion, virtual memory, resource management and scheduling.

Additional projects required for CECS 626. (Lecture-problems 3 hours.) Traditional grading only.

**528./628. Advanced Analysis of Algorithms (3)**

Prerequisite: CECS 428. (Master's students register in CECS 528 or 628; Ph.D. students register in CECS 628.) Theoretical analysis of algorithms. Divide and conquer, dynamic programming and greedy algorithms; basic search and traversal techniques including search trees; sorting; matrix manipulations; NP-completeness. Additional projects required for CECS 628. (Lecture-problems 3 hours.) Traditional grading only.

**529./629. Advanced Compiler Design (3)**

Prerequisite: CECS 444. (Master's students register in CECS 529 or 629; Ph.D. students register in CECS 629.) Real-world and theoretical problems encountered by the compiler writer. Error handling, table management, the symbol table, run-time problems, code optimization, code generation and register allocation. Additional projects required for CECS 629. (Lecture-problems 3 hours.) Traditional grading only.

**530./630. Advanced Computer Architecture I (3)**

Prerequisite: CECS 440. (Master's students register in CECS 530 or 630; Ph.D. students register in CECS 630.) Fundamentals of computer architecture. Description of architecture and description languages. Basic computer design and central processor implementation. Memory hierarchy and input/output. Pipelining. Vector processor, multiprocessor systems and dataflow machines. Additional projects required for CECS 630. (Lecture-problems 3 hours.) Traditional grading only.

**531./631. Advanced Computer Architecture II (3)**

Prerequisite: CECS 530. (Master's students register in CECS 531 or 631; Ph.D. students register in CECS 631.) Advanced computer architecture with emphasis on parallel processing. Vector processors and multiprocessor systems. Dataflow computation. RISC/CISC. Hypercube. Parallel software. Applications in artificial intelligence, signal/image processing, neural network and optical computing. Additional projects required for CECS 631. (Lecture-problems 3 hours.) Traditional grading only.

**543./643. Advanced Software Engineering (3)**

Prerequisite: CECS 443. (Master's students register in CECS 543 or 643; Ph.D. students register in CECS 643.) Study of software engineering as a broad, problem-solving discipline. Includes structured programming and software project management. Additional projects required for CECS 643. (Lecture 2 hours, laboratory 3 hours.) Traditional grading only.

**544./644. Software Testing and Verification (3)**

Prerequisite: CECS 543. Various types of software testing and verification techniques for software development including black box, white box, incremental, top-down and bottom-up, static and dynamic, performance, regression, thread, and stress testing. Discussion of object-oriented software testing with a hierarchical approach. Metrics in complexity for testing, test, and verification plan will be introduced. Automatic software testing and some case studies. Additional projects required for CECS 644. (Lecture 2 hours, laboratory 3 hours.) Traditional grading only.

**545./645. Software Architecture (3)**

Prerequisite: CECS 543. Topics include architectural styles, pipes and filters, data abstraction and object-oriented organization, event-based, implicit invocation, layered systems, repositories, interpreters, process control, distributed processes, domain-specific software architectures, and heterogeneous architecture. Component-based design patterns and some case studies. Additional projects required for CECS 645. (Lecture 2 hours, laboratory 3 hours.) Traditional grading only.

**546./646. Fault Tolerant Computing Systems (3)**

Prerequisite: CECS 530. (Master's students register in CECS 546 or 646; Ph.D. students register in CECS 646.) Fault tolerant techniques are studied as tools to assure the reliability and continuous availability of computing systems. Case studies of modern fault tolerant systems reviewed. Software fault tolerant systems studied as alternatives to verification and validation approaches to software reliability. Additional projects required for CECS 646. (Lecture-problems 3 hours.) Traditional grading only.

**549./649. Advanced Computer Graphics (3)**

Prerequisite: CECS 449. (Master's students register in CECS 549 or 649; Ph.D. students register in CECS 649.) Three-dimensional representations, transformations and viewing. Color models and modeling methods. Hidden-line and hidden-surface removal. Lighting and shading. Visual realism. Topics of current interest. Additional projects required for CECS 649. (Lecture 2 hours, laboratory 3 hours.) Traditional grading only.

**551./651. Advanced Artificial Intelligence (3)**

Prerequisite: CECS 451. (Master's students register in CECS 551 or 651; Ph.D. students register in CECS 651.) Advanced concepts in artificial intelligence. Topics include knowledge acquisition and representation, fuzzy logic, logical reasoning, multi-sensor integration, Dempster-Shafer's theory of evidential reasoning, real-time expert systems and neural networks. Additional projects required for CECS 651. (Lecture-problems 3 hours.) Traditional grading only.

**552./652. Computer Simulation and Modeling (3)**

Prerequisites: EE 380 (or MATH 380) and CECS 326. (Master's students register in CECS 552 or 652; Ph.D. students register in CECS 652.) Studies of general purpose and special simulation software. Model verification including graphical models Applications in various areas. Additional projects required for CECS 652. (Lecture-problems 3 hours.) Traditional grading only.

**553./653. Machine Vision (3)**

Prerequisite: Graduate standing in engineering or computer science. (Master's students register in CECS 553 or 653; Ph.D. students register in CECS 653.) Discussion and laboratory implementation of current research in vision and image understanding. Topics include image formation, early processing, segmentation, relational structures in 2-D and 3-D, motion, stereo, 3-D reconstruction, morphological methods and computer architecture for machine vision. Additional projects required for CECS 653. (Lecture-problems 2 hours, laboratory 3 hours.) Traditional grading only.

**570./670. Concurrent Parallel Programming (3)**

Prerequisite: CECS 428 or 440. (Master's students register in CECS 570 or 670; Ph.D. students register in CECS 670.) An introduction to concurrent and parallel programming for multiprocessing as well as distributed systems. Computational models and paradigms. Parallel programming languages and programming tools. Portable parallel programming and mapping techniques. Heterogeneous concurrent programming. Concurrent programming on local networks on workstations and personal computers. Additional projects required for CECS 670. (Lecture-problems 2 hours, laboratory 3 hours.) Traditional grading only.

**572./672. Network Architecture (3)**

Prerequisite: CECS 472 or 474. (Master's students register in CECS 572 or 672; Ph.D. students register in CECS 672.) Advanced concepts in computer networking. Distributed architectures, computer network standards and design, and computer network performance issues. Additional projects required for CECS 672. (Lecture-problems 3 hours.) Traditional grading only.

**575./675. Object-Oriented Analysis and Design (3)**

Prerequisite: CECS 475 and either CECS 443 or 543. (Master's students register in CECS 575 or 675; Ph.D. students register in CECS 675.) An object-oriented approach to software development based on modeling objects from the real world and then using the model to build a language-independent design organized around those objects. Object-oriented methodology from problem statement through analysis, system design, and object design. Implementation of object-oriented designs in various target environments. Case studies. Additional projects required for CECS 675. (Lecture 2 hours, laboratory 3 hours.) Traditional grading only.

**590./690. Special Topics in Computer Science (3)**

Prerequisites: Graduate standing and consent of instructor. (Master's students register in CECS 590 or 690; Ph.D. students register in CECS 690.) Each offering is based on an area in computer science and technology in which recent advances have been made. Additional projects required for CECS 690. (Lecture-problems 3 hours.) Repeatable to a maximum of 6 units with consent of department. Traditional grading only.

**621./521. Database Architecture (3)**

Prerequisites: CECS 328 and 323 (or 421). (Master's students register in CECS 521 or 621; Ph.D. students register in CECS 621.) Relational database design theory-a rigorous approach. Security, recovery, transaction management, distributed databases and query optimization. Additional projects required for CECS 621. (Lecture-problems 3 hours.) Traditional grading only.

**624./524. Advanced Topics in Programming Languages (3)**

Prerequisite: CECS 424 and 471. (Master's students register in CECS 524 or 624; Ph.D. students register in CECS 624.) Intensive study of languages of current interest which support object-oriented, client-server, and multimedia applications (e.g. JAVA). Additional projects required for CECS 624. (Lecture-problems 3 hours.) Traditional grading only.

**626./526. Advanced Operating Systems (3)**

Prerequisites: CECS 228 and 326. (Master's students register in CECS 526 or 626; Ph.D. students register in CECS 626.) Theoretical foundations of concepts applied in the design of operating systems. Control of concurrent processes, deadlocks, mutual exclusion, virtual memory, resource management and scheduling. Additional projects required for CECS 626. (Lecture-problems 3 hours.) Traditional grading only.

**628./528. Advanced Analysis of Algorithms (3)**

Prerequisite: CECS 428. (Master's students register in CECS 528 or 628; Ph.D. students register in CECS 628.) Theoretical analysis of algorithms. Divide and conquer, dynamic programming and greedy algorithms; basic search and traversal techniques including search trees; sorting; matrix manipulations; NP-completeness. Additional projects required for CECS 628. (Lecture-problems 3 hours.) Traditional grading only.

**629./529. Advanced Compiler Design (3)**

Prerequisite: CECS 444. (Master's students register in CECS 529 or 629; Ph.D. students register in CECS 629.) Real-world and theoretical problems encountered by the compiler writer. Error handling, table management, the symbol table, run-time problems, code optimization, code generation and register allocation. Additional projects required for CECS 629. (Lecture-problems 3 hours.) Traditional grading only.

**630./530. Advanced Computer Architecture I (3)**

Prerequisite: CECS 440. (Master's students register in CECS 530 or 630; Ph.D. students register in CECS 630.) Fundamentals of computer architecture. Description of architecture and description languages. Basic computer design and central processor implementation. Memory hierarchy and input/output. Pipelining. Vector processor, multiprocessor systems and dataflow machines. Additional projects required for CECS 630. (Lecture-problems 3 hours.) Traditional grading only.

**631./531. Advanced Computer Architecture II (3)**

Prerequisite: CECS 530. (Master's students register in CECS 531 or 631; Ph.D. students register in CECS 631.) Advanced computer architecture with emphasis on parallel processing. Vector processors and multiprocessor systems. Dataflow computation. RISC/CISC. Hypercube. Parallel software. Applications in artificial intelligence, signal/image processing, neural network and optical computing. Additional projects required for CECS 631. (Lecture-problems 3 hours.) Traditional grading only.

**643./543. Advanced Software Engineering (3)**

Prerequisite: CECS 443. (Master's students register in CECS 543 or 643; Ph.D. students register in CECS 643.) Study of software engineering as a broad, problem-solving discipline. Includes structured programming and software project management. Additional projects required for CECS 643. (Lecture 2 hours, laboratory 3 hours.) Traditional grading only.

**644./544. Software Testing and Verification (3)**

Prerequisite: CECS 543. Various types of software testing and verification techniques for software development including black box, white box, incremental, top-down and bottom-up, static and dynamic, performance, regression, thread, and stress testing. Discussion of object-oriented software testing with a hierarchical approach. Metrics in complexity for testing, test, and verification plan will be introduced. Automatic software testing and some

case studies. Additional projects required for CECS 644. (Lecture 2 hours, laboratory 3 hours.) Traditional grading only.

**645./545. Software Architecture (3)**

Prerequisite: CECS 543. Topics include architectural styles, pipes and filters, data abstraction and object-oriented organization, event-based, implicit invocation, layered systems, repositories, interpreters, process control, distributed processes, domain-specific software architectures, and heterogeneous architecture. Component-based design patterns and some case studies. Additional projects required for CECS 645. (Lecture 2 hours, laboratory 3 hours.) Traditional grading only.

**646./546. Fault Tolerant Computing Systems (3)**

Prerequisite: CECS 530. (Master's students register in CECS 546 or 646; Ph.D. students register in CECS 646.) Fault tolerant techniques are studied as tools to assure the reliability and continuous availability of computing systems. Case studies of modern fault tolerant systems reviewed. Software fault tolerant systems studied as alternatives to verification and validation approaches to software reliability. Additional projects required for CECS 646. (Lecture-problems 3 hours.) Traditional grading only.

**649./549. Advanced Computer Graphics (3)**

Prerequisite: CECS 449. (Master's students register in CECS 549 or 649; Ph.D. students register in CECS 649.) Three-dimensional representations, transformations and viewing. Color models and modeling methods. Hidden-line and hidden-surface removal. Lighting and shading. Visual realism. Topics of current interest. Additional projects required for CECS 649. (Lecture 2 hours, laboratory 3 hours.) Traditional grading only.

**650./750. Pattern Recognition Using Artificial Intelligence (3)**

(Master's students register in CECS 650; Ph.D. students register in CECS 750.) General concepts of pattern recognition and trainable classifiers, decision theory, supervised learning, non-parametric techniques, rule-based systems and neural networks. Additional projects required for Ph.D. students. (Lecture-problems 2 hours, laboratory 3 hours.) Traditional grading only.

**651./551. Advanced Artificial Intelligence (3)**

Prerequisite: CECS 451. (Master's students register in CECS 551 or 651; Ph.D. students register in CECS 651.) Advanced concepts in artificial intelligence. Topics include knowledge acquisition and representation, fuzzy logic, logical reasoning, multi-sensor integration, Dempster-Shafer's theory of evidential reasoning, real-time expert systems and neural networks. Additional projects required for CECS 651. (Lecture-problems 3 hours.) Traditional grading only.

**652./552. Computer Simulation and Modeling (3)**

Prerequisites: EE 380 (or MATH 380) and CECS 326. (Master's students register in CECS 552 or 652; Ph.D. students register in CECS 652.) Studies of general purpose and special simulation software. Model verification including graphical models Applications in various areas. Additional projects required for CECS 652. (Lecture-problems 3 hours.) Traditional grading only.

**653./553. Machine Vision (3)**

Prerequisite: Graduate standing in engineering or computer science. (Master's students register in CECS 553 or 653; Ph.D. students register in CECS 653.) Discussion and laboratory implementation of current research in vision and image understanding. Topics include image formation, early processing, segmentation, relational structures in 2-D and 3-D, motion, stereo, 3-D reconstruction, morphological methods and computer architecture for machine vision. Additional projects required for CECS 653. (Lecture-problems 2 hours, laboratory 3 hours.) Traditional grading only.

**670./570. Concurrent Parallel Programming (3)**

Prerequisite: CECS 428 or 440. (Master's students register in CECS 570 or 670; Ph.D. students register in CECS 670.) An introduction to concurrent and parallel programming for multiprocessing as well as distributed systems. Computational models and paradigms. Parallel programming languages and programming tools. Portable parallel programming and mapping techniques. Heterogeneous concurrent programming. Concurrent program-

ming on local networks on workstations and personal computers. Additional projects required for CECS 670. (Lecture-problems 2 hours, laboratory 3 hours.) Traditional grading only.

**672./572. Network Architecture (3)**

Prerequisite: CECS 472 or 474. (Master's students register in CECS 572 or 672; Ph.D. students register in CECS 672.) Advanced concepts in computer networking. Distributed architectures, computer network standards and design, and computer network performance issues. Additional projects required for CECS 672. (Lecture-problems 3 hours.) Traditional grading only.

**673./773. Topics in Distributed Computer Systems (3)**

Prerequisite: CECS 572 or 672. (Master's students register in CECS 673; Ph.D. students register in CECS 773.) Network operating systems vs distributed operating systems, research and design issues of distributed operating systems, resources and resource management in distributed systems, communication security and user authentication. Additional projects required for Ph.D. students. (Lecture-problems 3 hours.) Traditional grading only.

**675./575. Object-Oriented Analysis and Design (3)**

Prerequisite: CECS 475 and either CECS 443 or 543. (Master's students register in CECS 575 or 675; Ph.D. students register in CECS 675.) An object-oriented approach to software development based on modeling objects from the real world and then using the model to build a language-independent design organized around those objects. Object-oriented methodology from problem statement through analysis, system design, and object design. Implementation of object-oriented designs in various target environments. Case studies. Additional projects required for CECS 675. (Lecture 2 hours, laboratory 3 hours.) Traditional grading only.

**690./590. Special Topics in Computer Science (3)**

Prerequisites: Graduate standing and consent of instructor. (Master's students register in CECS 590 or 690; Ph.D. students register in CECS 690.) Each offering is based on an area in computer science and technology in which recent advances have been made. Additional projects required for CECS 690. (Lecture-problems 3 hours.) Repeatable to a maximum of 6 units with consent of department. Traditional grading only.

**694. Seminar in Computer Science (3)**

Prerequisite: Six units of 500 or 600 level CECS courses. Intensive study of a broad selection of conceptual and theoretical problems in computer science. A written student research project and an oral presentation are required. Traditional grading only.

**697. Directed Research (1-3)**

Prerequisite: Classified Graduate standing. Theoretical and experimental problems in computer science and engineering requiring intensive analysis. (Independent Study.) Traditional grading only.

**698. Thesis or Industrial Project (2-6)**

Prerequisite: Advancement to Candidacy. Planning, preparation, and completion of a thesis or equivalent industrial project report on a suitable topic in computer engineering and computer science following the library's prescribed format. Requires consultation with department's Graduate Advisor and submission of an Agreement for Independent Study form each semester of enrollment. May be repeated to a total of 6 units.

**750./650. Pattern Recognition using Artificial Intelligence (3)**

(Master's students register in CECS 650; Ph.D. students register in CECS 750.) General concepts of pattern recognition and trainable classifiers, decision theory, supervised learning, non-parametric techniques, rule-based systems and neural networks. Additional projects required for Ph.D. students. (Lecture-problems 2 hours, laboratory 3 hours.) Traditional grading only.

**773./673. Topics in Distributed Computer Systems (3)**

Prerequisite: CECS 572 or 672. (Master's students register in CECS 673; Ph.D. students register in CECS 773.) Network operating systems vs distributed operating systems, research and design issues of distributed operating systems, resources and resource management in distributed systems, communication security and user authentication. Additional projects required for Ph.D. students. (Lecture-problems 3 hours.) Traditional grading only.

# COMPARATIVE WORLD LITERATURE AND CLASSICS

*College of Liberal Arts*

View the CSU, Long Beach *Catalog* on-line at [www.csulb.edu](http://www.csulb.edu) by clicking on "Academics" and then "CSULB Catalog."

Students desiring information should contact the department office for an appointment with the advisor. Comparative World Literature is the study of foreign literatures in translation and the relationships among those literatures and between literature and other fields such as art, music, history, philosophy, and theatre. At CSULB, Comparative World Literature also offers a strong focus in cultural studies and mythology as bases for understanding literature and for the ways we see ourselves in a multicultural environment. Suggested preparation: course work in world literature, history, English composition, and foreign language.

Classics includes the studies of ancient Greek, Latin, and classical literature, mythology and civilizations, and their influence on later eras. Suggested preparation: course work in Latin, Greek, and classical history, art and literature.

## Bachelor of Arts in Comparative Literature (code 2-6832) (120 units)

The Bachelor of Arts in Comparative Literature consists of the Core of 24 units and one of the three emphases that follow.

## The Core

24 units, required of every major, distributed as follows:

1. C/LT 330A AND 330B.
2. *Genre*. At least one of the following: C/LT 346, 440, 422I\*, 451I\*, 453, CLSC 421I\*.
3. *Author*. At least one of the following: C/LT 430, 449.
4. *Non-Western or Mythology*. At least one of the following: C/LT 342\*, 350, 403, 440, 445, 452.
5. *Theory*. At least one of the following: C/LT 361, 461.
6. *Literary Movement or Comparative Study*. At least one of the following: C/LT 310I\*, 312I\*, 349, 404, 410, 448.
7. *European Period*. At least one of the following: C/LT 431, 432, 437, 438.

Note: C/LT 440 may be used in both groups 2 and 4 with appropriate different topics.

Courses denoted by an asterisk (\*) may be used to satisfy Core requirements with the approval of the course instructor and completion of supplementary work.

### Emphasis I: Language and Literature

The traditional undergraduate major in comparative literature, designed to prepare the student for graduate study in comparative literature or related fields.

### Requirements

1. *The 24 Unit Core*
2. *The First Concentration*. 12 upper division units in one foreign language, six of which must be in literature classes. If a language is chosen which offers a limited number of courses, some lower division units will suffice, but they must be, as a minimum, the equivalent of four semesters of college study.
3. *The Second Concentration*. 12 upper division units in any one of the following areas: American Indian Studies, Art History, Asian Studies, Asian American Studies, Black Studies, Chicano and Latino Studies, Classics, English Literature, English-Option in Creative Writing, film studies, History, music history, Philosophy, Religious Studies, Theatre Arts, Women's Studies, or a second foreign language.

If the concentration is in American Indian Studies, Asian Studies, Asian American Studies, Black Studies, Chicano and Latino Studies, English-Option in Creative Writing, Theatre Arts, Women's Studies, or a second foreign language area, 6 of the units must be in literature courses. If the concentration is in Theatre Arts, Women's Studies or film studies, appropriate courses may be chosen from any department offering such courses, including Comparative World Literature and Classics.

### Emphasis II: World Literature

This emphasis offers a broad background in world literature in translation with a strong concentration in one specific related field. It is also appropriate for the student who elects the comparative literature teaching option of the English Single Subject Credential program.

## Requirements

1. *The 24 Unit Core.*
2. *The Concentration.* 18 upper division units in one of the following areas: American Indian Studies, Art History, Asian Studies, Asian American Studies, Black Studies, Chicano and Latino Studies, Classics, English Literature, English-Option in Creative Writing, English-Option in English Education (Comparative Literature Emphasis), film studies, History, music history, Philosophy, Religious Studies, Theatre Arts, Women's Studies, or a single foreign language.

If the concentration is in American Indian Studies, Asian Studies, Asian American Studies, Black Studies, Chicano and Latino Studies, English-Option in Creative Writing, Theatre Arts, Women's Studies, or a foreign language area, at least 9 of the units must be in literature courses. If the concentration is in an ethnic studies area, Women's Studies, Theatre Arts or film studies, appropriate courses may be chosen from any department offering such courses, including Comparative World Literature and Classics. Students taking the English-Option in English Education must take the 35 unit English Education core and must consult with an English education advisor as well as a Comparative World Literature advisor.

*Foreign Language Requirement.* Reading proficiency in a foreign language is required. Proficiency may be certified by examination or by successful completion of four semesters of college study of the foreign language, or equivalent. Consult a department advisor.

### Emphasis III: Cultural Studies

Cultural Studies is the interdisciplinary and multicultural study of literary and other forms of cultural expression analyzed within their social and historical contexts. This emphasis is designed for students wishing to concentrate in cultural studies firmly grounded in literary study. It provides for an interdisciplinary pattern of courses in cultural studies drawn from various disciplines with the approval of a faculty committee.

## Requirements

1. *The 24 Unit Core.*
2. *The Cultural Studies Concentration.* 18 upper division units in appropriate cultural studies courses, approved by a faculty committee and drawn from the following departments or areas: American Indian Studies, Anthropology, Art History, Asian and Asian American Studies, Black Studies, Chicano and Latino Studies, Classics, Dance, English, Film and Electronic Arts, History, Romance, German, Russian Languages and Literatures, Women's Studies, or other appropriate departments and areas of study. The faculty committee shall consist of the Chair of the Department of Comparative World Literature and Classics and one additional full time faculty member in Comparative World Literature. Students are strongly encouraged to select a faculty committee and have their pattern of course work approved by the beginning of the junior year, but it must be approved by the beginning of the senior year.

*Foreign Language Requirement:* Basic reading knowledge of one foreign language is required. It may be certified by examination or by successful completion of two semesters of college study, or the equivalent. Consult a department advisor.

## Minor in Comparative Literature (code 0-6832)

In addition to the bachelor of arts degree, the Department offers a minor in comparative literature. The minor provides a flexible program for the student who is majoring in another discipline, but who is interested in comparative literature either for professional advantages or for intellectual enrichment.

## Requirements

A minimum of 18 units in comparative literature, of which at least 12 are upper division excluding C/LT 499.

---

## Comparative Literature Courses (C/LT)

---

### Lower Division

#### 100. World Literature (3)

Corequisite/prerequisite: Any Foundations course. Readings in translation from masterpieces of world literature with emphasis on the technique and form of literary art as developed in various cultures.

#### 101. Introduction to Comparative Literature (3)

Corequisite/prerequisite: Any G.E. Foundations course. An introduction to the basics of literary interpretation and comparative literature. Strongly recommended for majors in Comparative Literature.

#### 103. Introduction to Comparative Asian Literature and Culture (3)

Prerequisite/Corequisite: Any GE Foundation course. Introduction to two major Asian cultures—India and China—through an exploration of their literatures, cultures, and diasporas. Focus will be on the modern period.

#### 124. Introduction to World Theatre and Drama (3)

Corequisite/prerequisite: Any G.E. Foundations course. Introduction to all aspects of theatre including criticism, dramatic literature, movements, themes, historical background and theatrical production from different parts of the world.

#### 161. Reading the World (3)

Prerequisite/Corequisite: Completion or concurrent enrollment in ENGL 100 or equivalent. An introduction to contemporary theories of reading and interpretation in the humanities. Lectures and classroom discussion will examine various and diverse forms of human expression and critical understanding from around the world and across the disciplines while developing and refining a broad repertoire of reading tools and practices.

#### 232. Folklore and Mythology (3)

Prerequisite: Completion of GE Foundation requirements. Introduction to the study of mythology and folklore in a global context, with an emphasis on their application in literature.

#### 234. Introduction to East Asian Literatures and Cultures (3)

Prerequisites: Completion of GE Foundation requirements. A comprehensive introduction to the comparative study of East Asian cultures through the reading of representative selections from the literatures of China, Korea, and Japan in historical context. Focus is on the modern period.

#### 235. Middle Eastern and South Asian Literature (3)

Prerequisites: Completion of GE Foundation requirements. Introduction to the classical and modern literature of the Middle East and South Asia including India. English translations of major works of epic, drama, poetry and fiction originally written in Arabic, Persian, Turkish, Sanskrit, Hindi, Urdu, and Tamil.

#### 236. Introduction to Southeast Asian Literatures and Cultures (3)

Prerequisites: Completion of GE Foundation requirements. A survey of the traditional and modern literatures and cultures of Southeast Asia with a focus on the modern period.

#### 250. European Literature and the Other Arts I (3)

Prerequisites: Completion of GE Foundation requirements. Investigation of the interrelationships between the arts. Analysis of literary, fine art and music materials from ancient periods through the Middle Ages in regard to movements, techniques, philosophies and formal organization to achieve artistic expression.

### 251. European Literature and the Other Arts II (3)

Prerequisite: Completion of GE Foundation requirements. Interrelationships among the arts through analysis of literary, fine art, and music materials in the western world from the Renaissance to the present. Movements, techniques, philosophies and the formal organization necessary to achieve artistic expression will be examined.

### Upper Division

General Education Category A must be completed prior to taking any upper division course except upper division language courses where students meet formal prerequisites and/or competency equivalent for advanced study.

#### 310I. Greek World (3)

Prerequisites: Completion of GE Foundation requirements, one or more Explorations courses, and upper-division standing. An interdisciplinary examination of major events and ideas in the society and culture of ancient Greece with an emphasis on literature, the arts, and the historical forces at work. Topics include the foundations of Greek culture, Minoan civilization, Homer and the Trojan War, mythology and religion, lyric poetry, the Persian Wars, the "Golden Age" of Athens, the Peloponnesian War, Hellenistic culture and the contributions of the Greeks to the modern world. Same course as HIST 310I.

#### 312I. Roman World (3)

Prerequisites: Completion of GE Foundation requirements, one or more Explorations courses, and upper-division standing. An interdisciplinary examination of major events and ideas in the society and culture of ancient Rome with an emphasis on literature, the arts, and the historical forces at work. Topics include genesis and growth of the Roman world, transition from Republic to Empire, Imperial maturity, decay and decline, and the contributions of the Romans to the modern world. Same course as HIST 312I.

#### 320I. Comic Spirit (3)

Prerequisites: Completion of GE Foundation requirements, one or more Explorations courses, and upper-division standing. An investigation of comedy as a literary genre and of the manifestation of the comic spirit in related art forms such as music, art, and film. Examination is given to the history of comedy as well as to theories of the causes and effects of laughter.

#### 324I. Theatre Today (3)

Prerequisites: Completion of GE Foundation requirements, one or more Explorations courses, and upper-division standing. This course examines current trends, achievements and problems in contemporary Western theatre and dramatic literature. The evolution of a piece of work from script to stage will be studied in order to understand better both the process and the impact of theatre as a defining expression of our cultural milieu. Theatre serves as a voice for each segment of our culture. Consequently, particular attention will be paid to multi-cultural expression in the theatre. The work of African American, Asian American, Latino and women playwrights and theatre groups will be examined in detail and contrasted with theatrical trends in Europe. (Same course as THEA 324I.)

#### 330A,B. Masterpieces of European Literature (3,3)

Prerequisite: One course in literature or consent of instructor. Representative selections, in translation, of European texts to and since the Renaissance, and their relation to the development of Western civilization.

#### 342. The Bible as Literature (3)

Prerequisite: Completion of GE Foundation requirements. Reading of representative Biblical selections interpreted from a literary standpoint.

#### 346. Readings in World Poetry (3)

Prerequisite: One course in literature or consent of instructor. Representative selections of the poetry of the world from the earliest examples to the present. Facing-page translations will be included.

#### 349. Literary Movements (3)

Prerequisite: One course in literature or consent of instructor. Intensive study of a movement or theme in world literature. Specific movement or theme will be announced in the *Schedule of Classes*. (May be repeated for credit to a maximum of nine units with different topics.)

#### 350. Global Literature in American Culture (3)

Prerequisites: Completion of the GE Foundation requirement. A comparative and thematic study of transnational literature of the emerging global culture as represented in various ethnic groups in modern America. The literature and culture of at least three distinct American ethnic groups will be examined in relation to contemporary trans-national themes and the literatures of the countries of origin.

#### 361. Masterpieces of Literary Criticism (3)

Representative selections of literary theory from Plato to the present. Readings from each theory will be supplemented by applications to a specific literary text. Course will provide students with a broad historical background and the critical and practical tools to analyze a literary text.

#### 402. Studies in Middle Eastern Literature and Culture (3)

Prerequisite: One course in literature or consent of instructor. Study of specific authors, themes, genres, movements, or aspects of literature and culture in the Middle East or between the Middle East and the West. Topics to be announced in the *Schedule of Classes*. May be repeated for a maximum of six units with different topics.

#### 403./503. Studies in Asian Literature (3)

Prerequisite: One course in literature or consent of instructor. Interrelationships of two or more authors, themes, genres, movements or aspects of literature and culture in Asia or between Asia and the West. Topics to be announced in the *Schedule of Classes*. May be repeated with different topics, for a max. of nine units.

#### 404./504. Women in World Literature (3)

Prerequisite: One course in literature or consent of instructor. Study of the role of women in world literature. Specific movement, area, or theme will be announced in the *Schedule of Classes*. May be repeated for a maximum of six units with different topics.

#### 405./505. The Modern Confessional Novel (3)

Prerequisite: One course in literature or consent of instructor. A comparative analysis of the thematic and structural characteristics of the confessional novel in the 19th and 20th centuries. Representative novels from Europe, Asia and Latin America are examined.

#### 410. Literature and Music (3)

Prerequisites: ENGL 100 and upper division status. An examination of the relationship between music and literature in the 19th and 20th centuries with emphasis placed on representative literary works and musical compositions that show mutual influences and common features and structures.

#### 412I. Art and Literature (3)

Prerequisites: Completion of GE Foundation requirements, one or more Explorations courses, and upper-division standing. An interdisciplinary study of the dominant movements in art and literature during the 19th and 20th centuries, from Realism through Postmodernism. The course emphasizes comparative analysis of the styles, methods, and aesthetic principles characteristic of the various movements, focusing on the works of major artists, writers and theorists, and examines the social and historical context in which the movements developed.

#### 414I. Medieval World (3)

Prerequisites: Completion of the G.E. Foundation, one or more Explorations courses, and upper-division standing. An interdisciplinary examination of major themes in medieval society and culture with emphasis on literature, the arts, and the historical forces at work. Topics will include the Roman heritage of the middle ages, pre/non-Christian culture, the so-called "dark ages," Romanesque and Gothic worlds, crusades and pilgrimages, commerce and cathedrals, and late medieval problems. Same course as HIST 414I.

#### 415I. Ethnic Literature and Culture in America (3)

Prerequisites: Completion of GE Foundation requirements, one or more Explorations courses, and upper-division standing. This course will introduce the comparative, interdisciplinary study of multicultural literature along with issues of racism and ethnic discrimination. Ethnic groups to be discussed: European-American, Native American, African-American, Latino/Latina, Asian-American, Southeast Asian-American, Middle-Eastern American. Recurrent themes in literature will be situated in their historical and sociopolitical

cal context using printed and media materials. Analytical essays on various theories of race and ethnicity will be presented using supporting multimedia. Traditional grading and credit/no credit.

**422I. Renaissance Theatre and Drama (3)**

Prerequisites: Completion of GE Foundation requirements, one or more Explorations courses, and upper-division standing. An interdisciplinary study of the achievements, problems, themes and trends of Renaissance drama in Italy, Spain, France, and England between 1350 and 1650. Major plays of the period are read in translation, including works by Machiavelli, Tasso, Tirso de Molina, Lope de Vega, Calderon, and Shakespeare. Texts are treated both as literature and as theatre.

**430./530. Dante (3)**

Prerequisite: One course in literature or consent of instructor. A reading, in translation, of the major works of Dante, including the *Vita Nuova* and the *Divine Comedy*. Examination is also given to the comparative nature of Dante's work: his sources and his influence on later writers, artists, and composers.

**431./531. Medieval Literature (3)**

Prerequisite: One course in literature or consent of instructor. Representative selections, in translation, from writings of the medieval period, reflecting dominant ideas of the time.

**432./532. Continental Renaissance Literature (3)**

Prerequisite: One course in literature or consent of instructor. A comparative study of the major works of the chief non-dramatic authors of Renaissance Europe, including all or some of the following: Petrarch, Boccaccio, Lorenzo de' Medici, Machiavelli, Ariosto, Tasso, Ronsard, Rabelais, Erasmus, and Cervantes. Emphasis is also given to influences, trends, and contributions to the modern world.

**437./537. Romantic Literature (3)**

Prerequisites: ENGL 100 or its equivalent and one course in literature. Representative selections, in translation, from European writings of the Romantic period with an emphasis on a comparative study of works from Germany and France from about 1785 to 1870. Traditional grading only.

**438./538. 20th Century European Literature (3)**

Prerequisite: One course in literature or consent of instructor. Comparative study of continental European literature, in translation from 1900 to the present. Novelists studied include Kafka, Gide, Proust, Hesse, Moravia, Kazantzakis, and Mann; dramatists include Pirandello, Chekhov, Beckett, Sartre, and Camus. Movements include realism, naturalism, the development of the psychological novel, existentialism, and the theatre of the absurd.

**440./540. Latin American Literary Studies (3)**

Prerequisite: One course in literature or consent of instructor. A comparative study of major literary genres in Latin American literature in relation to the principal periods and movements of the Western literary tradition. The genres for the semester will be announced in the *Schedule of Classes*. May be repeated with different topics up to nine units.

**445./545. American Folklore Studies (3)**

Prerequisite: One course in literature or consent of instructor. Special topics in American folklore. Topics are chosen to provide a bridge between literary, aesthetic and specialized folkloristic studies of American culture. Special attention will be paid to European and Third World contributions to American folklore. Topics to be announced in the *Schedule of Classes*. May be repeated with different topics up to nine units.

**448./548. Comparative Studies (3)**

Prerequisite: One course in literature or consent of instructor. Interrelationship of two or more disciplines, with emphasis on reciprocal influences and borrowing of materials during various literary periods. The class will feature a different interdisciplinary study each semester to be announced in the *Schedule of Classes*. May be repeated for a maximum of nine units with different topics.

**449./549. Critical Studies in Major Continental Writers (3)**

Prerequisite: One course in literature or consent of instructor. Intensive and comparative study of one to three major continental authors. Authors to be studied will be announced in the *Schedule of*

*Classes*. May be repeated for credit to a maximum of nine units with different topics.

**451I. The Novel and the Motion Picture in Contemporary Society (3)**

Prerequisites: Completion of GE Foundation requirements, one or more Explorations courses, and upper-division standing. Interdisciplinary study of two genres, with particular focus on novels made into films and on the aesthetic distinction of both forms as major genres in the 20th and 21st centuries.

**452./552. Studies in Mythology (3)**

Prerequisites: One course in literature or consent of instructor. Interrelation of two or more mythologies, mythological themes or theories of mythology. This class will feature a different area of an interdisciplinary or comparative nature in the study of mythology each semester, to be announced in the *Schedule of Classes*. May be repeated with different topics to a maximum of nine units.

**453./553. Fairy Tales (3)**

Prerequisite: One course in literature or consent of instructor. An in-depth study of the fairy tale as a unique literary genre and art form. Class will investigate various theories as applied to the tales and identify psychological, religious, cultural, and alchemical patterns and symbols that reappear in fairy tales and manifest man's early realization of his identity and of the creative process.

**461./561. Topics in Contemporary Literary Criticism (3)**

Prerequisite: Two upper division literature courses or consent of instructor. An in-depth study of a particular critic or movement in contemporary literary theory. May be repeated for credit to a maximum of nine units with different topics.

**492. Internship Program (1-3)**

Prerequisites: Consent of instructor and department chair. Field work in literature related industries. Internships and other assignments directed by a supervising faculty member. Course may be repeated for a maximum of 6 units. Credit/No Credit grading only.

**495. Genre (1-3)**

Prerequisite: Consent of instructor. Production of the student journal, *Genre*, including editing, design, soliciting contributors, working with printer, desktop publishing, and financial management. Organizational meeting previous fall semester. Contact department office for information. Course may be repeated for a maximum of 9 units. Credit/No Credit grading only.

**499. Directed Studies (1-4)**

Prerequisite: Consent of instructor. Independent study of special topics under supervision of a faculty member. May be repeated for a maximum of six units with consent of department.

## Graduate Division

**501. Advanced Interdisciplinary Study (3)**

Intensive study of the theories and methods of comparing and interrelating literature with other disciplines such as various areas among the fine arts, the social sciences and the sciences. Course will involve independent research.

**503./403. Studies in Asian Literature (3)**

Prerequisite: One course in literature or consent of instructor. Interrelationships of two or more authors, themes, genres, movements or aspects of literature and culture in Asia or between Asia and the West. Topics to be announced in the *Schedule of Classes*. May be repeated with different topics, for a maximum of nine units.

**504./404. Women in World Literature (3)**

Prerequisite: One course in literature or consent of instructor. Study of the role of women in world literature. Specific movement, area, or theme will be announced in the *Schedule of Classes*. May be repeated for a maximum of six units with different topics.

**505./405. The Modern Confessional Novel (3)**

Prerequisite: One course in literature or consent of instructor. A comparative analysis of the thematic and structural characteristics of the confessional novel in the 19th and 20th centuries. Representative novels from Europe, Asia and Latin America are examined.

### 530./430. Dante (3)

Prerequisite: One course in literature or consent of instructor. A reading, in translation, of the major works of Dante, including the *Vita Nuova* and the *Divine Comedy*. Examination is also given to the comparative nature of Dante's work: his sources and his influence on later writers, artists, and composers.

### 531./431. Medieval Literature (3)

Prerequisite: One course in literature or consent of instructor. Representative selections, in translation, from writings of the medieval period, reflecting dominant ideas of the time.

### 532./432. Continental Renaissance Literature (3)

Prerequisite: One course in literature or consent of instructor. A comparative study of the major works of the chief non-dramatic authors of Renaissance Europe, including all or some of the following: Petrarch, Boccaccio, Lorenzo de' Medici, Machiavelli, Ariosto, Tasso, Ronsard, Rabelais, Erasmus, and Cervantes. Emphasis is also given to influences, trends, and contributions to the modern world.

### 537./437. Romantic Literature (3)

Prerequisite: One course in literature. Representative selections, in translation, from European writings of the Romantic period with an emphasis on a comparative study of works from Germany and France from about 1785 to 1870. Traditional grading only.

### 538./438. 20<sup>th</sup> Century European Literature (3)

Prerequisite: One course in literature or consent of instructor. Comparative study of continental European literature, in translation from 1900 to the present. Novelists studied include Kafka, Gide, Proust, Hesse, Moravia, Kazantzakis, and Mann; dramatists include Pirandello, Chekhov, Beckett, Sartre, and Camus. Movements include realism, naturalism, the development of the psychological novel, existentialism, and the theatre of the absurd.

### 540./440. Latin American Literary Studies (3)

Prerequisite: One course in literature or consent of instructor. A comparative study of major literary genres in Latin American literature in relation to the principal periods and movements of the Western literary tradition. The genres for the semester will be announced in the *Schedule of Classes*. May be repeated with different topics up to nine units.

### 545./445. American Folklore Studies (3)

Prerequisite: One course in literature or consent of instructor. Special topics in American folklore. Topics are chosen to provide a bridge between literary, aesthetic and specialized folkloristic studies of American culture. Special attention will be paid to European and Third World contributions to American folklore. Topics to be announced in the *Schedule of Classes*. May be repeated with different topics up to nine units.

### 548./448. Comparative Studies (3)

Prerequisite: One course in literature or consent of instructor. Interrelationship of two or more disciplines, with emphasis on reciprocal influences and borrowing of materials during various literary periods. The class will feature a different interdisciplinary study each semester to be announced in the *Schedule of Classes*. May be repeated for a maximum of nine units with different topics.

### 549./449. Critical Studies in Major Continental Writers (3)

Prerequisite: One course in literature or consent of instructor. Intensive and comparative study of one to three major continental authors. Authors to be studied will be announced in the *Schedule of Classes*. May be repeated for maximum of nine units with different topics.

### 550. Topics in Comparative Literature (3)

Prerequisite: C/LT 501 or consent of instructor. Special studies of movements, figures and relationships in world literature; or between world literature and other disciplines. Topics to be announced in the *Schedule of Classes*. May be repeated to a maximum of nine units with different topics.

### 552./452. Studies in Mythology (3)

Prerequisites: One course in literature or consent of instructor. Interrelation of two or more mythologies, mythological themes or theories of mythology. This class will feature a different area of an interdisciplinary or comparative nature in the study of mythology

each semester, to be announced in the *Schedule of Classes*. May be repeated with different topics to a maximum of nine units.

### 553./453. Fairy Tales (3)

Prerequisite: One course in literature or consent of instructor. An in-depth study of the fairy tale as a unique literary genre and art form. Class will investigate various theories as applied to the tales and identify psychological, religious, cultural, and alchemical patterns and symbols that reappear in fairy tales and manifest man's early realization of his identity and of the creative process.

### 561./461. Topics in Contemporary Literary Criticism (3)

Prerequisite: Two upper division literature courses or consent of instructor. An in-depth study of a particular critic or movement in contemporary literary theory. May be repeated for credit to a maximum of nine units with different topics.

## CLASSICS

Classics includes the study of the languages, the literatures and the civilizations of the ancient Greeks and Romans and the peoples with whom they had contact. The Department of Comparative World Literature and Classics offers the Bachelor of Arts in Classics and minors in Classical Studies, Latin, and Greek. Within the Classics major two options are offered, Roman Civilization and Greek Civilization.

Classics, along with rhetoric, made up undergraduate education in Europe and the Americas from the Renaissance to the late nineteenth century. Today classical studies remains a practical liberal arts major for developing critical thinking skills, for understanding the core of Western civilization, for developing facility with English, and for cultivating aesthetic and moral sensitivity. Classics majors are often successful in law, government service, business, secondary and elementary education, library science and medicine. Students interested in graduate school in either Classics or Classical Archaeology should consult with the departmental advisor as early as possible in their academic careers.

The department recommends that some time be spent in either Italy or Greece on one of the many programs designed to familiarize students with the physical remains of these civilizations (College Year at Athens, the American School of Classical Studies at Athens, the Aegean Institute, the Intercollegiate Center for Classical Studies in Rome, etc.). Courses at one of these institutions may be substituted for CSULB courses with departmental approval.

## Bachelor of Arts in Classics (120 units)

### Option in Roman Civilization (code 2-6853)

#### Requirements

41-43 units with a minimum of 21 upper division units (excluding LAT 321)

1. *Elementary Latin* - 6-8 units selected from the following: LAT 101A and 101B (8) or LAT 321 (6)

The requirement of this category may be met by high school equivalents, but total units must still equal 41.

2. *Upper Division Latin* - 12 units selected from the following: LAT 301A, 301B, 401, 402, 403, 404, 405, 406, 407, 408, 409, 410A, 410B, 410C, 490

3. *Classics Courses* - 15 units selected from the following: CLSC 124, 135, 191, 310I, 410I, 421I, 490, C/LT 312I\*

\* The Department strongly recommends that this course be taken in Italy during the winter session.

4. *Courses in Antiquity* - A minimum of 8 units selected from the following: GK 101A, 101B; AH 408, 417; COMM 300; C/LT 452\*\*; ENGL 431; HIST 131, 314, 318; PHIL 490\*\*; POSC 301; R/ST 4711

\*\*with topic appropriate to ancient Roman studies and approval of advisor

The Department additionally recommends C/LT 232.

### Option in Greek Civilization (code 2-6854)

#### Requirements

43 total units with a minimum of 21 upper division units:

1. *Elementary Greek* - 8 units: GK 101A, 101B
2. *Upper Division Greek* - 12 units selected from the following: GK 301A, 301B, 351, 352, 490
3. *Classics Courses* - 15 units selected from the following: CLSC 124, 135, 191, 310I, 410I, 421I, 490, C/LT 310I\*  
\*The Department strongly recommends that this course be taken in Greece during the winter session.
4. *Courses in Antiquity* - A minimum of 8 units selected from the following: LAT 101A, 101B, 321; AH 408, 416; COMM 300; C/LT 452\*\*; ENGL 431; HIST 131, 313, 318; PHIL 421, 422, 490\*\*; POSC 301; R/ST 4711

\*\*with topic appropriate to ancient Greek studies and approval of advisor

The department additionally recommends C/LT 232

### Minor in Classical Studies (code 0-6810)

The Minor offers students majoring in any subject an opportunity to supplement their education with background in the oldest European tradition.

The Minor consists of a minimum of 20 units that must include a minimum of 9 units of upper division coursework selected from the following:

1. Two courses in Latin or Greek, both in the same language.
2. A minimum of two courses from: CLSC 124, 135, 191, 310I, 410I, 421I, C/LT 452 (with an appropriate topic); or additional courses in Latin or Greek, not necessarily in the same language as selected in (1).
3. A minimum of two courses from the following C/LT 310I or HIST 310I; C/LT 312I or HIST 312I; HIST 313, 314; PHIL 421, 422; AH 408, 416, 417; ENGL 426, 431; ANTH 140, 448; POSC 301.

Interested students should contact the Classics Advisor prior to or during the first semester of taking courses toward the Minor.

### Minor in Greek (code 0-6811)

A minimum of 20 units that must include four upper division courses. Prospective teachers are strongly urged to take, in addition, HIST 313, CLSC 191, 310I, and other courses touching on the ancient world.

### Minor in Latin (code 0-6815)

A minimum of 20 units which must include four upper division courses. Prospective teachers are strongly urged to take, in addition, HIST 314, CLSC 191, and 310I, and other courses touching on the ancient world.

---

## Classics Courses (CLSC)

---

### Lower Division

#### 124. The Classical World of Greece and Rome (3)

Prerequisite/Corequisite: One GE Foundation course. Introduction to the literature, language and culture of the ancient Greek and Roman worlds. Use of primary sources, such as drama, epic, inscriptions, and the visual arts to explore issues of gender, mythology, the hero, theater, combat and sports, slavery and the family. Students will compare institutions of the ancient world and their modern counterparts.

#### 135. Women in the Classical World (3)

Prerequisite/Corequisite: One GE Foundation course. A survey of the roles and status of women in ancient Greece, Rome and Etruria through literature by and about women and other ancient source material.

#### 191. Greek Mythology (3)

Prerequisite/Corequisite: One GE Foundation course. A survey of the major Greek myths, sagas and tales of gods and heroes, and their influence on later eras, particularly ancient Rome.

### Upper Division

General Education Category A must be completed prior to taking any upper division course except upper division language courses where students meet formal prerequisites and/or competency equivalent for advanced study.

#### 310I. Pagan Culture (3)

Prerequisites: Completion of Foundation requirement, completion of one or more Explorations Course, and upper division standing. This course examines the mass cultures of the Greek and Roman periods, its world view, and its philosophical and religious underpinnings through literary, artistic, archaeological and documentary sources.

#### 410I. Law and Literature in the Classical World (3)

Prerequisites: Completion of GE Foundation requirements, one or more Explorations courses, and upper-division standing. An introduction to the study of the philosophy and interpretation of law through classical literature that encompasses fundamental legal questions and ancient legal source material and the application of modern theories of literary criticism to ancient and modern law.

#### 421I. Classical Drama (3)

Prerequisites: Completion of the G.E. Foundation, one or more Exploration courses, and upper division standing. Examination in translation of the plays of Aeschylus, Sophocles, Euripides, and Aristophanes both as literature and as theater. Includes discussion of origins of tragedy and comedy, later Greek and Roman drama, and the debt of modern drama to the theater of ancient Greeks.

#### 490. Special Topics in Classics (1-4)

Prerequisite: Consent of instructor. Topics of special interest in Classics selected for intensive study. Topics will be announced in the *Schedule of Classes*. May be repeated for a maximum of six units with different topics.

#### A. Antiquity in Film

#### 499. Directed Studies (1-3)

Prerequisite: Consent of instructor. Directed studies to permit individual students to pursue topics of special interest. May be repeated for credit up to maximum of six units.

---

## Greek Courses (GK)

---

### Lower Division

#### 101A. Elementary Greek (4)

Prerequisite/Corequisite: Any Foundation course. Introduction to ancient Greek, the language of Sophocles, Plato, Aristophanes, Homer and Demosthenes. Forms, syntax and basic vocabulary leading also to a reading knowledge of New Testament Greek. Designed for those beginning a study of ancient Greek.

### 101B. Elementary Greek (4)

Prerequisite/Corequisite: Any Foundation course. Prerequisite: GK 101A or equivalent. Continuation of Greek 101A.

#### Upper Division

General Education Category A must be completed prior to taking any upper division course except upper division language courses where students meet formal prerequisites and/or competency equivalent for advanced study.

### 301A-B. Intermediate Greek (3-3)

Continued study of the language and culture. Reading and translating selections of classical writers.

301A. Prerequisite: GK 101B or equivalent.

301B. Prerequisite: GK 301A or equivalent.

### 351. Plato (3)

Prerequisite: GK 301B or equivalent. Translation and literary study of one or more dialogues of Plato.

### 352. Homer (3)

Prerequisite: GK 301B or equivalent or consent of instructor.

Translation and literary study of selected books of the *Iliad* or *Odyssey*.

### 490. Special Topics (1-3)

Prerequisites: 12 units of upper division Greek courses or consent of instructor. Translation and literary study of the selected works of an author, genre (e.g., oratory) or period (e.g., Hellenistic Greek). Course may be repeated for a maximum of twelve units.

### 499. Directed Studies (1-3)

Prerequisite: Consent of instructor. Directed studies to permit individual students to pursue topics of special interest. May be repeated for credit up to a maximum of six units.

---

## Latin Courses (LAT)

---

#### Lower Division

### 101A. Elementary Latin (4)

Prerequisite/Corequisite: Any Foundation course. Introduction to the Latin language as used by Vergil, Cicero, Livy, Catullus, Seneca, Tacitus, and Juvenal as well as late Latin and medieval writers. Roman culture and civilization. Forms, syntax, and basic vocabulary to equip students to begin the study of these and other writers. Designed for those beginning the study of Latin or who have one year of high school Latin.

### 101B. Elementary Latin (4)

Prerequisite/Corequisite: Any Foundation course. Prerequisite: LAT 101A or equivalent. Continuation of LAT 101A.

#### Upper Division

General Education Category A must be completed prior to taking any upper division course except upper division language courses where students meet formal prerequisites and/or competency equivalent for advanced study.

### 301A-B. Intermediate Latin (3-3)

Continued study of the language and culture of the ancient Romans. Reading and translating selections of classical writers.

301A. Prerequisite: LAT 101B or equivalent, or two years of high school Latin.

301B. Prerequisite: LAT 301A or equivalent, or more than two years of high school Latin.

### 321. Intensive Latin (6)

Equivalent to two semesters of Elementary Latin. Designed for undergraduate and graduate students with little or no knowledge of Latin, whose degree programs require or recommend a reading knowledge of the language. Not open to students with credit in LAT 101B.

### 401. Vergil (3)

Prerequisite: LAT 301B or equivalent. Reading of selections from Vergil's *Aeneid*, and/or selections from the *Georgics* and *Eclogues*. Course may be repeated in different semesters to a maximum of 6 units with different topics.

### 402. Cicero (3)

Prerequisite: LAT 301B or equivalent. Reading of one or more works of Cicero. Course may be repeated in different semesters to a maximum of 6 units with different topics.

### 403. Latin Lyric and Elegy (3)

Prerequisite: LAT 301B or equivalent. Reading of selected poems of one or more of the lyric and elegiac poets: Catullus, Horace (*Odes*, *Epodes*, *Carmen Saeculare*), Propertius, Tibullus, and Ovid (*Amores*). Course may be repeated in different semesters to a maximum of 6 units with different topics.

### 404. Latin Epic (3)

Prerequisite: LAT 301B or equivalent. Reading of selections from Lucretius' *De Rerum Natura* and/or Ovid's *Metamorphoses*. Course may be repeated in different semesters to a maximum of 6 units with different topics.

### 405. Historiography of the Republic (3)

Prerequisite: LAT 301B or equivalent. Reading of selections from Sallust and/or Julius Caesar. Course may be repeated in different semesters to a maximum of 6 units with different topics.

### 406. Historiography of the Empire (3)

Prerequisite: LAT 301B or equivalent. Reading of selections from Livy and/or Tacitus. Course may be repeated in different semesters to a maximum of 6 units with different topics.

### 407. Latin of the Early Principate (3)

Prerequisite: LAT 301B or equivalent. Reading of selections from the following authors and works: Pliny the Younger, Martial, Seneca's letters, Suetonius. Course may be repeated in different semesters to a maximum of 6 units with different topics.

### 408. Roman Comedy (3)

Prerequisite: LAT 301B or equivalent. Reading of one or more plays of Plautus and Terence. Course may be repeated in different semesters to a maximum of 6 units with different topics.

### 409. Roman Satire (3)

Prerequisite: LAT 301B or equivalent. Reading of selected satires of Horace, Juvenal, or Persius, the *Satyricon* of Petronius or the *Apocolocyntosis* of Seneca the Younger. Course may be repeated in different semesters to a maximum of 6 units with different topics.

### 410A-B-C. Latin Prose Composition (1-1-1)

Thorough instruction in writing Latin prose at the advanced level. Extensive coverage of syntax and morphology of Latin.

A. Prerequisite: LAT 301B or equivalent. Beginning Latin prose composition

B. Prerequisite: LAT 410A. Continuation of prose composition.

C. Prerequisite: LAT 410B. Continuation of prose composition.

### 490. Special Topics (1-3)

Prerequisites: LAT 301B or equivalent. Translation and study of authors of a particular period (e.g., Medieval Latin) or of a methodological specialty (e.g., Latin epigraphy). Course may be repeated in different semesters to a maximum of 9 units with different topics.

#### A. Medieval Latin

### 499. Directed Studies (1-3)

Prerequisite: Consent of instructor. Directed studies to permit individual students to pursue topics of special interest. May be repeated for credit to a maximum of six units.

# COOPERATIVE EDUCATION

## *University Academic Programs*

Acting Dean, Undergraduate Studies

Dorothy M. Goldish

Office

Academic Affairs

Coordinator

Paul Fornell

Office

Brotman Hall (BH) 250

Telephone

(562) 985-8550

View the CSU, Long Beach *Catalog* on-line at [www.csulb.edu](http://www.csulb.edu) by clicking on "Academics" and then "CSULB Catalog."

The Cooperative Education Office serves as a link between the University's academic programs and those public and private employers interested in the Cooperative Education program (Co-Op), the Educational Participation in Communities program (EPIC), and the Summer Internship program. Each of these programs is designed to offer students academic credit for participation in monitored part-time or full-time practical and professional work experience that is directly related to their academic major or career goal.

The programs offered by the Cooperative Education Office are also designed to assist students in gaining a deeper understanding of the relationship between theory and practical application. Through on-the-job experience, students can assess their capabilities, clarify values, and explore career goals.

The accompanying Co-Op internship courses (see below) provide students with up to 6 units of elective academic credit based on the work experience and required course assignments. Course discussions include relevant topics such as, work ethics, communication skills, conflict resolution, and employer-employee relations. Written assignments enable students to review and process the learning that takes place in the hands-on environment.

### ***Cooperative Education (Co-Op) Internships***

Cooperative Education internships offer students paid work experience in business, industry, government and the non-profit sector. Co-Op students may choose from two types of work experience. Students may alternate full-time work periods with full-time academic periods or they may work part-time while simultaneously attending the University. Upper-division Co-Op courses are available for up to 6 units of elective academic credit.

### ***Educational Participation in Communities (EPIC)***

The (EPIC) program provides volunteer internship opportunities for students who wish to participate in career-related field experiences that complement their classroom study. EPIC internships are available with organizations and agencies in the not-for-profit sector. Upper-division Co-Op courses are available for up to 6 units of elective academic credit.

### ***Summer Internships***

The Summer Internship Program offers students the opportunity to gain career or academically related work experience during summer months. Summer placements are paid, full-time positions and are available locally and nationally to all majors.

### **Curriculum**

#### **C/LA 492A. Internship in Liberal Arts (3)**

Prerequisites: Upper division standing consent of instructor, and a formally declared major in one of the programs included in the College of Liberal Arts. EPIC field experience. Students qualifying can be placed in major or career-related volunteer assignments in private industry or public agencies. An organized plan utilizing a series of seminars and learning agreements is required, accompanied by selected assignments. Minimum 120 hours work per semester for three units of credit. May be repeated to a maximum of six units. No more than six units total in 492A and B. Traditional grading only.

#### **C/LA 492B. Internship in Liberal Arts (3)**

Prerequisites: Upper division standing, consent of the instructor, and a formally declared major in one of the programs included in the College of Liberal Arts. Co-Op field experience. Students who qualify can be placed in major or career-related, community-based, preprofessional experiences as employees in private industry or in public agencies. An organized plan utilizing a series of seminars and learning agreements is required, accompanied by selected assignments. Minimum 120 hours work per semester. May be repeated to a maximum of six units. No more than six units total in 492A and B. Traditional grading only.

#### **ED P 492. Internship in Human Services (3)**

Prerequisite: Consent of instructor. Students in any major are placed in agencies and organizations to engage in volunteer or paid work in human services/mental health. The required fifteen hour seminar shall focus on personal values, interpersonal communications skills, critical thinking, and problem solving as they relate to the students' field placement. Development of knowledge and skills transferable to future careers will be stressed. A minimum of 120 hours field experience is required for the semester.

#### **ENGR 492B. Internship In Engineering (3)**

Prerequisite: Upper division standing and permission of the instructor. A Co-Op field experience. Students who qualify can be placed in a major - or career related, pre-professional experience as an employee in private industry or in public agencies. May be repeated to a maximum of six units. (Lecture-problems 3 hours).

#### **HHS 492. Field Studies and Career Exploration (1-3)**

Prerequisites: Consent of the instructor and a minimum GPA of 2.0. Provides a student with a career-related experience by allowing the student to work in the field or profession related to his or her major. Students qualifying may work in either a major or career-related volunteer or paid assignment in private industry, a non-profit agency, or a public agency. In addition to the practical experience, students will attend a series of seminars designed to complement this field experience by focusing on common issues to the work setting.

#### **NSCI 492. Internships In Natural Science (3)**

Prerequisites: Upper division standing and consent of instructor prior to registration. Students who qualify will be placed in a major or career-related assignment in private industry and public agencies. All participants utilize learning agreements. A final written report is required. Class attendance to be arranged by instructor. (9 hours experience per week). May be repeated for a maximum of six units. Credit/No Credit grading only.

#### **CBA 493. Business Internship (1-3)**

Prerequisites: Classified business major and instructor consent. Qualifying students will be placed in career-related paid assignments in private or public agencies or businesses. An organized plan utilizing a series of seminars and learning agreements is required along with selected reading and writing assignments. A minimum of 120 hours paid experience per semester is required. May be repeated for a maximum of six units.

# CREDENTIAL PROGRAMS

## Credentials

Public school teaching and service credentials in the State of California are regulated by the State Legislature and administered by the California Commission on Teacher Credentialing (CCTC). Credential programs offered at CSULB have been developed to meet current requirements which are complex and continually reviewed and changed by legislative action. Candidates for all credentials must meet legal requirements in effect when completing credential programs. It is the responsibility of the student to be familiar with the program requirements contained in this *Catalog* and to obtain current information from departments offering individual programs. For information regarding admission, academic requirements and field work, contact the specific credential program coordinator. For information on general credential requirements, regulations, pending changes and new legislation, contact the Credential Center, Education (ED) 1 Room 42.

## Basic Credentials

There are three types of basic teaching credentials. The Multiple Subject Credential authorizes the holder to teach all subjects in a self-contained classroom, generally in an elementary school. A teacher authorized for multiple subject instruction may be assigned to teach in any self-contained classroom — pre-school, kindergarten, grades 1 through 12, or in classes for adults. CSULB offers the Multiple Subject Teaching Credential with subject matter met by either a program of coursework (Liberal Studies) or examination (Multiple Subject Assessment for Teachers [MSAT]). Programs leading to the Multiple Subject Teaching Credential (MSCP), with an emphasis in 1) Crosscultural, Language and Academic Development (CLAD), 2) Bilingual Crosscultural, Language and Academic Development (BCLAD) and 3) Middle Level Crosscultural Language and Academic Development have been approved by the California Commission on Teacher Credentialing. For detailed information on the Multiple Subject Credentials, please refer to the section in this catalog listed within the department of Teacher Education or visit the department office located in ED1-17.

Another pathway to Multiple Subject Teaching is the Integrated Teacher Education Program (ITEP). ITEP combines study of academic subjects aligned to the California standards for the K-8 curriculum with professional preparation courses and field experiences leading to a Multiple Subject Credential with a CLAD emphasis. For more information, consult the Liberal Studies section of this catalog.

The Single Subject Credential authorizes the holder to teach within a specified subject-matter category. A teacher authorized for single subject instruction may be assigned to teach this subject at any grade level — pre-school, kindergarten, grades 1 through 12, or in classes for adults. In practice, most teachers with a single subject authorization teach departmentalized classes in middle, junior high or senior high schools. CSULB offers CCTC-approved Subject Matter Programs in Art, Biological Sciences, Chemistry, English, Foreign Language (French, German, Japanese, Spanish), Geoscienc-

es, Health Science, Home Economics, Mathematics, Music, Physical Education, Physics, and Social Science.

The Education Specialist Credential authorizes a candidate to teach in a special education capacity with students with special needs. This K-12 credential certifies individuals to work as a special day class teacher, inclusion support teacher, or as a resource specialist.

Elementary and secondary teachers wishing to diversify their teaching authorizations may do so by fulfilling certain requirements to qualify for supplementary authorizations and/or add-on authorizations. Further information is available in the Credential Center, ED 1 – 42.

## Specialist Credentials

CSULB offers specialist teaching credential programs in Early Childhood Education, the Resource Specialist Certificate of Competence, Reading and Language Arts Specialist, Reading Certificate, and the Adapted Physical Education Certificate. All specialist teaching credentials require a valid basic teaching credential.

## Service Credentials

Service credential programs are available in the following areas: Preliminary Administrative Services, Professional Administrative Services, Library Media Teacher Services, Health Services (School Nurse), School Counseling, School Psychology, Clinical Rehabilitative Services – Language, Speech and Hearing, Clinical Rehabilitative Services – Language, Speech and Hearing with Special Class Authorization, Clinical Rehabilitative Services – Audiology, and School Social Work and Child Welfare and Attendance. Both the Preliminary Administrative Services and Library Media Teacher credentials require a valid basic teaching credential.

## Designated Subjects Credentials

CSULB offers CCTC-approved programs leading to Designated Subjects, Adult, Vocational, and Designated Subjects Supervision credentials. Contact the Department of Occupational Studies, Engineering Technology – 233, for information.

## Obtaining a Credential

Current credentialing law provides for a two-step program for basic teaching credentials, the Preliminary credential and the Professional Clear credential. The Preliminary credential requires:

1. a bachelor's degree from an accredited institution,
2. an approved professional preparation program, including the teaching of reading and student teaching,
3. verification of subject matter competence (program or examination),
4. passage of CBEST (California Basic Educational Skills Test), and
5. completion of an approved course or examination in the U.S. Constitution.

The Preliminary credential is valid for five years from date of issuance, and is not renewable.

There is a new Professional Teacher Induction requirement before the Professional Credential can be awarded. New program requirements are under development. Please contact the Credential Center located in ED 1 - 42, for more information.

### Entry Levels for Basic Credential Programs

Students may begin credential programs at three different levels:

1. Junior level – With a carefully planned program, initial education courses may be taken at the junior level with completion of the program within the four-year degree program culminating in a Preliminary teaching credential. This permits the teacher a maximum of five years to complete the fifth-year approved program for the Professional Clear credential.
2. Senior level – Part of the credential program may be taken as an undergraduate to complete electives toward degree requirements. The remaining credential requirements are then completed at the post-baccalaureate level. The Preliminary credential is issued after completion of the credential program.

**Note:** By petition only, up to twelve units of course work taken in the final undergraduate semester (not needed to meet major or degree requirements) may be counted as postgraduate credit toward fulfillment of the fifth-year program. The petition must be filed prior to completion of the course(s). Petitions submitted after completion of the course will not be approved. Criteria and petition forms are available in the Single Subject Program Office, ED 1 – 54, and the Multiple Subject Program Office, ED 1 – 13.

3. Graduate level – The entire credential program may be completed at the post-baccalaureate level.

### Application to Credential Programs

Information on application to credential programs is available from the appropriate department or program coordinator. Students planning to enroll in credential programs must also file an application for admission to the University.

**Note:** Multiple Subject Credential Programs have established application periods each year which are separate from the University application periods and process.

### Application for Field Work and Student Teaching

Candidates for field work and student teaching for the Summer or Fall term of any year must apply by March 1. Spring candidates must apply by October 1.

### Appeal Process

A student has the right to address an appeal to the appropriate committee regarding any policy related to admission and continuation in a basic teacher preparation program. Petition forms and assistance are available through the credential program coordinator or the department office.

View the CSU, Long Beach *Catalog* on-line at [www.csulb.edu](http://www.csulb.edu) by clicking on "Academics" and then "CSULB Catalog."

The department of Criminal Justice offers an undergraduate bachelor of science degree and a graduate master of science degree. These programs are designed to provide students with an appropriate academic background for a professional career in corrections, law enforcement, probation, parole, or social service agencies. In addition, the programs are designed to prepare students for continuing graduate studies in criminal justice, criminology, or law.

## Bachelor of Science in Criminal Justice (code 3-1031) (124 units)

The program in criminal justice offers the bachelor of science degree to individuals interested in seeking a comprehensive education leading to a professional career in criminal justice. The program is designed to accommodate the needs of the continuing student, the transfer student and the experienced criminal justice practitioner. Unfortunately, it is not possible to offer sufficient courses in the evenings for students to graduate with a degree in criminal justice.

Students intending to transfer from community colleges to this University for a bachelor of science degree in criminal justice are advised to complete general education requirements while attending the community college. A course equivalent to CRIM 101, The Criminal Justice System in Society, should be taken while attending community college. Other criminal justice courses taken at community colleges will only be accepted as lower division electives provided the college where they were taken designated them as transferable to CSU. These courses can not be substituted for upper division criminal justice courses.

## Requirements

All students are required to take a minimum of 42 units of criminal justice course work to meet the department requirements for a bachelors degree in criminal justice: 30 units are CORE and 12 units are upper division electives in the major. CRIM 101 is a prerequisite or corequisite for all CORE courses. Students who would like to declare and/or change to criminal justice as their major/minor must have an overall G.P.A of 2.0 and be enrolled in or have completed CRIM 101 or an equivalent course at another college or university.

The 30 units of required courses that constitute the CORE are: CRIM 101, 301, 303, 331, 351, 404, 468, 480, 483, and 495. Students with upper division transfer units should consult the undergraduate advisor regarding substitutions for CORE classes. Courses taken at a two-year college may not be substituted for upper division CORE courses. All CORE courses must be passed with a letter grade of "C" or better (credit/no credit is not an option). Specifically, every CORE course in which a student receives a final grade of "D" or "F" must be repeated until a grade of "C" or higher is achieved.

In addition to the CORE classes, students are required to complete 12 units of upper division criminal justice electives which may be taken before, concurrently, or after the CORE courses. Any criminal justice course in the CSULB catalog numbered 300 to 499 that is not a CORE class may be used as a criminal justice elective. Students with upper division transfer units should consult the undergraduate advisor regarding substitutions.

### Minor in Criminal Justice (code 0-1031)

#### Requirements

All students are required to take a minimum of 21 units of criminal justice course work to meet the department requirements for a minor in criminal justice: 12 units are CORE, and the completion of nine units of upper-division criminal justice elective classes. CRIM 101 is a prerequisite or corequisite for all CORE courses.

The 12 units of required courses that constitute the CORE are: CRIM 101, 301, 404, and 351. All CORE courses must be passed with a letter grade of "C" or better (credit/no credit is not an option). Specifically, every CORE course in which a student receives a final grade of "D" or "F" must be repeated until a grade of "C" or higher is achieved.

In addition to the CORE classes, students are required to complete 9 units of upper-division criminal justice electives, which may be taken before, concurrently, or after the CORE courses. Any criminal justice course in the CSULB catalog numbered 300 to 499 that is not a CORE class may be used as a criminal justice elective. Students with upper-division transfer units should consult the undergraduate advisor regarding substitutions. Courses taken at a two-year college may not be used to meet this requirement.

### Master of Science in Criminal Justice (code 6-1031)

Graduate study in criminal justice provides the requisite knowledge and opportunity for individuals to (1) be competitive for administrative positions in the courts, corrections, law enforcement, private security, probation and parole, (2) fill research positions in criminal justice agencies, (3) pursue advanced degrees (J.D. or Ph.D), and (4) fill community college teaching positions in criminal justice.

The master of science degree in criminal justice will expand and increase individual competency, develop and mature thought processes, aid in gaining insights into professional leadership and knowledge, permit an exchange between students and faculty and further the spirit of research and scholarship to enhance professional and personal development.

#### Admission

Students seeking admission to the Department of Criminal Justice Graduate Program should have an undergraduate degree and a desire for graduate study. Applications must apply for admission to the Criminal Justice Department in addition to being admitted by the Office of Admissions and Records. Students must be accepted for admission by the Department before their program for a master's degree can be formulated. Students are not allowed to take graduate course work in criminal justice before being accepted to the program. The following items must be completed:

1. A graduate application. The original must be sent to the Office of Admissions and Records and a copy to the Department of Criminal Justice.
2. Scholastic achievement as represented by official transcripts of all undergraduate course work. Each applicant must request that official transcripts be sent to both the Graduate Advisor in the Criminal Justice Department and the Office of Admissions and Records.
3. Resume and statement of goals must be sent to the Department's Graduate Advisor and University Enrollment Services;
4. Three letters of recommendation from persons able to testify to the student's academic ability. These letters must be sent to the Department of Criminal Justice Graduate Advisor.

#### Prerequisites

1. A bachelor's degree with a major or minor in criminal justice or a related discipline. The acceptability of other undergraduate preparation shall be determined by the Department Graduate Committee;
2. A student must have an overall undergraduate average of 2.75 or better and an average of 3.0 in their major.

#### Advancement to Candidacy

1. Students must satisfy the general University requirements for advancement to candidacy, as specified in this bulletin.
2. Before advancing to candidacy students must have passed the Graduate Writing Proficiency Examination.
3. Before advancing to candidacy students must successfully complete CRIM 581, CRIM 582, CRIM 583, and CRIM 584 with a minimum grade of "B" in each of the courses.
4. Each student's graduate program must be approved by the Department Graduate Advisor and Director of Graduate Studies and Research, College of Health and Human Services.

#### Requirements

##### Coursework

Eighteen (18) units of required courses constitute the CORE: CRIM 581, 582, 583, 584, 695, 698

In addition to the CORE classes, students are required to complete 12 units of electives. These courses are to be selected after consultation with the graduate advisor. A maximum of 6 units may be taken from 300 or 400-level courses in Criminal Justice designated with a \* in *CSULB Catalog*. Undergraduate courses that are not designed with a \* may not be applied toward the master's degree. No more than six units of CRIM 599 can be taken. Up to six units of graduate work may be transferred from another accredited university or another department in CSULB. Transfer credit must be a "B" or better. All students must earn a grade of "A" or "B" for each required course. Students may not have more than 6 units of "C" grades apply toward the master's degree. Advancement to candidacy is necessary before Thesis I or Thesis II can be taken.

##### Thesis or Project

The thesis or project is a supervised experience in the application of theory and analytical tools to an issue in crimi-

nology or criminal justice. The thesis should prepare students for further graduate work or research in the field. The project should provide an experience that is directly applicable to an occupation in the criminal justice field.

The thesis is a written product of the systematic study of a significant problem. It clearly identifies the problem, states the major assumptions, explains the significance of the undertaking, sets forth the sources for and methods of gathering information, analyzes the data, and offers a conclusion or recommendation. The finished product evidences originality, critical and independent thinking, appropriate organization and format, and thorough documentation. The coursework is supervised by a committee of three, including the Thesis Chair, who must be a full-time tenure-track or tenured faculty member in the Criminal Justice Department and two other faculty members.

The project is a significant undertaking appropriate to the professional field. It evidences originality and independent thinking, appropriate form and organization, and a rationale. It is described and summarized in a written report that includes the project's significance, a review of the literature, objectives, methodology, and a conclusion or recommendation. The finished product evidences originality, critical and independent thinking, appropriate organization and format, and thorough documentation. The coursework is supervised by a committee of three, including the Project Chair, who must be a full-time tenure-track or tenured faculty member in the Criminal Justice Department and two other faculty members.

## Courses (CRIM)

### Lower Division

#### 101. The Criminal Justice System in Society (3)

Prerequisites/Corequisites: One of the foundation courses (may be taken concurrently). Introduction to the study of criminal justice as a social institution in American society. History and philosophy of the criminal justice system; survey of theories of crime, punishment and rehabilitation; study of ethical issues in social control. The functions and role expectations of the criminal justice system will be explored. Interaction between the citizen and the components of the system will be examined. (CAN AJ2) Traditional grading only.

### Upper Division

#### 301. Contemporary Issues in Criminal Justice (3)

Prerequisite/Corequisite: CRIM 101. Criminal Justice studied as a total interacting system: police, corrections, probation and the judiciary. Special emphasis is placed on current issues and problems. Traditional grading only.

#### 302. Communication for Criminal Justice (3)

Prerequisites: ENGL 100; upper division standing; open only to Criminal Justice majors. Written communication principles and practice in the criminal justice profession.

#### 303. Statistics for Criminal Justice Administrators (3)

Prerequisite/Corequisite: CRIM 101. This course will explore statistical procedures used for the analysis of data by criminal justice administrators in decision-making situations. Emphasis is placed upon understanding and satisfying the restrictions placed upon the most commonly used statistical procedures, descriptive as well as inferential. A discussion of frequently used statistical programs for the computer analysis of data will also be covered, including a "hands-on" approach to computer applications. Traditional grading only.

#### \*305. Ethical Concerns in Criminal Justice (3)

Identifies and explores ethics, values definitions and applications in the criminal justice system: police, courts, probation, parole, corrections and private security organizations. Discusses remedial strategies and behavior relating to unethical behavior from an individual and group perspective.

#### 325. Police Administration (3)

Program approach to the study of police administration. Overview of administration of the police function in the United States. Organization, management and operation of policing agencies.

#### 331. Security and the Criminal Justice System (3)

Prerequisite/Corequisite: CRIM 101. A study of the differences in the theoretical and actual associations between security functions and the criminal justice system. Major topics that are explored include the historical and contemporary relationship between private security and sworn law enforcement, institutional culture, terrorism, computer technology, forensics and physical/operational security. Traditional grading only.

#### 351. Adjudication Process in Criminal Justice (3)

Prerequisite/Corequisite: CRIM 101. Topics related to the adjudication process in criminal cases are covered including: arraignments and preliminary hearings; suppression hearings; sanity hearings; trials; sentencing in capital and non-capital cases; juvenile court proceedings; and revocation of probation and parole. Civil Rights Act cases and other civil suits involving criminal justice personnel are discussed. Traditional grading only.

#### 356. Legal Aspects of Corrections (3)

An overview of court decisions related to corrections. Study of current legal issues and their impact on adult and juvenile procedures.

#### \*359. Substance Abuse and the Criminal Justice System (3)

An examination of substance abuse. Consideration of the social and psychological factors related to alcohol and drug use, abuse and addiction. Concentration on the legal and social elements of substance abuse and their relationship to the criminal justice system; characteristics and categories of various controlled substances; categories of drug offenses; and investigation of drug cases.

#### 361. Criminal Investigation (3)

The study of basic principles in criminal investigation. Analysis of current investigative techniques, patterns and modus operandi, interviewing and interrogation strategies, collection and management of evidence, surveillance, and crime scene investigation. Course will also cover theories, philosophies, and concepts related to prevention and suppression of crime.

#### 369. Correctional Environments (3)

An introduction to the history and current practice of American penology. A first-hand examination of penal institutions and correctional facilities including county, state and federal facilities. It also includes the Department of Children Services (foster care, county and private facilities), juvenile halls and court, and the California Youth Authority. Field trips will be required. Course fee required.

#### 404. Theories of Crime Causation, Prevention and Control (3)

Prerequisite/Corequisite: CRIM 101. This course explores the theories and policy implications of crime in our society. The political, social, and economic environment in our society will serve as the context for the exploration of the etiology of criminal behavior. The underpinnings of criminological theory will be traced through history by focusing on its connection to biology, psychology, and sociology. Traditional grading only.

#### 405. Job Stress and the Criminal Justice System (3)

Theoretical foundations of stress based on current research findings with emphasis on individual assessment, signs and symptoms, causes and effects. In addition, specific stress management skills such as relaxation, meditation, self hypnosis, pain control, biofeedback, nutrition, and exercise will be covered. Not available to students with credit in CRIM 499: Job Stress and the Criminal Justice System.

#### 420./520. Criminal Justice Information and Technology (3)

An examination of the use of computers and technology in the administration of criminal justice. This seminar focuses on current technology. This seminar will focus on a computer desktop mapping geographical information system (GIS) software that utilizes database information to conduct spatial, frequency, and time analysis of crime. The basic approach of this seminar will be to explore procedures that can be used to collect, manage, analyze, and display crime information as a map, chart, or table. Also, a review of the internet and various web sites will be utilized to identify data sources, e.g., census, crime, other. Graduate students will be expected to complete two rather than one project. Grades for these projects are weighted differently for graduate students than undergraduate students. Traditional grading only.

#### 421. Contemporary Issues in Law Enforcement (3)

An examination of various timely law enforcement related subjects including policy and procedures; recruitment of women and minorities; mob and riot activities; hate crimes; ethics and ethical training; administrative and management strategies; special assignments and units; organized crime; task forces; and community policing.

#### 424. Theories of Complex Criminal Justice Organizations (3)

Theories, concepts, issues and applications of administrative and management styles within various criminal justice organizations. Emphasis on various organizational systems, leadership approaches, the organizational culture, occupational socialization; recruitment and retention, communications, change and adaptiveness, and motivation of organizational members.

#### \*451. Search and Seizure, Confessions and Evidence (3)

A study of criminal procedures mandated by the U.S. Constitution with emphasis on search and seizure, confessions, and the right to counsel. Course also covers evidentiary rules that must be employed to introduce testimony and physical evidence in a court proceeding. Not available for students with credit in CRIM 353.

#### 468. Correctional Systems (3)

Prerequisite/Corequisite: CRIM 101. Historical and philosophical development of societal reactions to law violators. Overview of the two major components of the correctional system: institutional and community corrections. Examination of the differing types of penal institutions and an evaluation of rehabilitation as a crime control strategy. Probation, parole, and other alternatives to incarceration will be explored as practical criminal sanctions. Field trips may be required. Traditional grading only.

#### \*470. Probation, Parole and Community Corrections (3)

Historical and philosophic overview of community corrections. The focus is on probation and parole as well as wide range of intermediate sanctions and community treatment options. Community corrections will be examined from both punishment and treatment model perspectives. The process and components of the presentence investigation (PSI) will be analyzed. Supervision of the offender in the community will be explored as well as the revocation process. Field trips may be required.

#### \*477. Correctional Counseling (3)

Theories and techniques of counseling utilized by correctional workers. Evaluation of the effectiveness of correctional treatment. Various correctional counseling and crisis intervention strategies will be examined including reality therapy, behavior modification, group counseling, and 12-step programs. Special areas of correctional treatment such as substance abuse, mental illness, sex offenders, and the elderly will be considered.

#### 480. Introduction to Research Methods in Criminal Justice (3)

Prerequisite/Corequisite: CRIM 101. Introduction to basic techniques in criminal justice research including library research, report writing, research design models, sampling techniques, questionnaire construction, interview techniques and participant observation. Traditional grading only.

#### \*482. Crime, Criminal Justice Systems and the Political Process (3)

This course explores the impact of politics on the criminal justice system. The social, historical, economic, and political forces that shape policies in criminal justice are explored. A critical analysis

of the legal structure, police, courts and corrections is used to examine the efficacy, fairness and quality of justice in our society. This lecture course is designed to promote and develop critical thinking skills.

#### 483. Enforcement Systems (3)

Prerequisite/Corequisite: CRIM 101. Historical tracing of modern American policing from its ancient and Anglo-Saxon roots. Examination of police as a social institution and a control agent. Consideration of modern police patrol strategies; the contemporary role of the police officer; training procedures; ethical standards; women and minority officers; discretion; and corruption in police agencies. Traditional grading only.

#### 484. Comparative Criminal Justice Systems (3)

Prerequisites: Crim 101 or with consent of instructor. Survey of nationwide and worldwide criminal justice philosophies and techniques. Evaluation of current major hypotheses. Review of recent developments and contributions by agencies and academic institutions. Review of current literature in the field. Traditional grading only.

#### 487. Juvenile Justice (3)

Theoretical foundations of delinquency causation. Historical tracing of the American juvenile justice system including the juvenile court and its jurisdiction. Police interaction with juveniles; treatment and correctional strategies for young offenders. Examination of prevention and treatment approaches.

#### 490. Independent Study (1-3)

Prerequisite: Consent of instructor. Individual research and study approved by major professor. May be repeated for credit not to exceed a total of 3 units.

#### \*492. Criminal Justice Response to Domestic Violence (3)

Domestic violence is studied as a phenomenon that impacts the criminal justice system. Spouse abuse, child abuse and elder abuse are studied. Strategies for criminal justice personnel handling these cases are stressed.

#### 493. Computer Applications in Criminal Justice (3)

The course will focus on computer technology and its application to criminal justice. The use of data processing in training, research, field operations, supervision, and administration will be examined. Federal, state, local and private applications; issues concerning civil liberties; and bank security policy options are also discussed.

#### 494. Criminal Justice and Gangs (3)

This course covers the multifaceted aspects of gangs, gang membership and identification. Subjects include historical, psychological, sociological, and economic rationales for gang involvement. Topics include origins, identification, causal factors, coping mechanisms, and remedial systematic approaches. Not open to students with credit in CRIM 499D.

#### \*495. Internship (3)

Prerequisite: Consent of instructor and CRIM 101. Supervised work experience in criminal justice agency in the immediate area. May be repeated for a maximum of six units. (Not open to employed criminal justice officials.)

#### 499. Special Topics in Criminal Justice (3)

Prerequisite: Consent of instructor. Topics of current interest in the field of criminal justice selected for intensive development. Topics are announced in the *Schedule of Classes*. May be repeated for a maximum of 9 units with change of topic.

E. Readings in Criminology and Criminal Justice

### Graduate Division

512. Seminar on Diversity and Criminal Justice Practices (3)  
Study of the effect social, economic, and cultural diversity has on the development and implementation of Criminal Justice practices. Will include topics such as hate crimes, minority perceptions of crime, victim services, and cultural awareness. Traditional grading only.

**520./420. Criminal Justice Information and Technology (3)**

An examination of the use of computers and technology in the administration of criminal justice. This seminar will focus on computer desktop mapping geographical information system (GIS) software that utilizes database information to conduct spatial, frequency, and time analysis of crime. The basic approach of this seminar explores procedures that can be used to collect, manage, analyze, and display crime information on a map, chart, or table. Also, a review of the internet and various web sites will be utilized to identify data sources, e.g., census, crime. Graduate students will be expected to complete two rather than one project. Grades for these projects are weighted differently for graduate students than undergraduate students. Traditional grading only.

**551./451. Contemporary Legal Issues in Criminal Justice (3)**

A study of criminal procedures mandated by the U.S. Constitution with emphasis on search and seizure, confessions, and the right to counsel. Course also covers evidentiary rules that must be employed to introduce testimony and physical evidence in a court proceeding. Not available to students with credit in CRIM 353.

**581. Theories of Crime Causation and Prevention (3)**

Relationship and interaction between social structure and crime. Investigation into the classical and behavioral theories of crime and crime prevention.

**582. Advanced Statistics for Criminal Justice Research (3)**

Prerequisites: One undergraduate social science statistics and research methods course. Statistical inference in normally distributed populations. Regression and multivariate analysis of research data. Utilization of non-parametric statistics. (Lecture 3 hours). Traditional grading only.

**583. Research Methodology (3)**

Prerequisites: One undergraduate research and statistics course. Scientific method of research; variations in research design and methodology; application of research findings to problem solution. Not available to students with credit in CRIM 696. Traditional grading only.

**584. Professional Literature (3)**

Critical analysis and comparative review of professional literature in criminal justice practice, theory, and research. Will include topics of components of research publications; substantive content of articles; library/online searches; critiques of the literature, citations, reference styles, and literature reviews. Required core course. Not available for students with credit in CRIM 691. Traditional grading only.

**590. Independent Study (1-3)**

Prerequisite: Consent of instructor. Individual research and study approved by graduate advisor. May be repeated for credit not to exceed a total of three units.

**599. Special Topics in Criminal Justice (3)**

Group investigation of selected topics in criminal justice. Topics to be announced in the *Schedule of Classes*. May be repeated for a maximum of six units.

**621. Seminar on the Administration and Management of Criminal Justice Organizations (3)**

Study of criminal justice policy development and implementation; administrative theory and issues; problems and current agency activities. Traditional grading only.

**623. Seminar in Comparative Criminal Justice Administration (3)**

Advanced study of the theories, philosophies and techniques of criminal justice worldwide and nationwide. Intensive review of the literature, recent developments and individual research. Traditional grading only.

**624. Crime and Public Policy (3)**

Intensive study of problem areas in crime and justice. Will include topics of control and prevention of crime in urban settings; changing law enforcement and correctional policies; philosophy of law; inter-agency relationships. Traditional grading only.

**630. Seminar on Organized Crime (3)**

Historical development of organized crime and various techniques used to control this form of criminality. Detailed consideration of the political, social and economic conditions of its evolution. Not available to students with credit in CRIM 599 on the topic "Organized Crime." Traditional grading only.

**640. Seminar on Police Organization and Management (3)**

Leadership theories, practices, issues and trends in managing police organization. Thematic areas of focus are: values, ethics, teambuilding, empowerment, politics, Community Oriented policing, and future forecasting. Traditional grading only.

**641. Seminar in Correctional Policy and Administration (3)**

Study of the history, development, and implementation of correctional programs. Analysis of the theories, philosophies, concepts and issues related to the administration and management of prisons, probation, and parole. Traditional grading only.

**650. Seminar in Juvenile Justice (3)**

Study of juvenile justice programs administered by the police, court and correctional agencies; analysis of theories of delinquency causation and prevention; current issues. Traditional grading only.

**694. Design and Implementation of Criminal Justice Field Research (3)**

Prerequisites: CRIM 582 and CRIM 583. Identification of unique problems facing field research in criminal justice agencies. Implementation of viable research methodologies designed to address situations frequently encountered in the field. (Seminar 3 hours). Traditional grading only.

**695. Thesis or Project I (3)**

Prerequisite: Advancement to Candidacy. Student works under direct faculty supervision to complete a proposal for the research study or project. Comprehensive review of the literature on a topic and development of appropriate methodology. For project option student must obtain agency approval and agreement. Traditional grading only.

**697. Directed Research (3)**

Extensive independent research on assigned topics addressing theoretical criminology and synthesis of literature on current issues in criminal justice. Work produced in CRIM 697 will be presented in CRIM 699. Not available to students in thesis option. Traditional grading only.

**698. Thesis or Project II (1-4)**

Prerequisite: CRIM 695. For thesis option, student conducts research and data analysis to complete thesis. For project option, student documents progress in project design and implementation. Traditional grading only.

**699. Integrated Analysis of Criminal Justice (3)**

Prerequisite: CRIM 697. Integration and synthesis of key concepts and issues related to the administration of criminal justice. Project is required. Not available to students in thesis option. Traditional grading only.

Students desiring information should contact the department office for referral to one of the faculty advisors. The Dance Department provides in-depth curricula including courses in history, music, notation, production, theory, composition, performance, and studio technique in modern, ballet, jazz, and tap. The undergraduate curricula are designed to give students basic dance background which prepares them as performers in concert dance companies, television or films; as choreographers; or as a teacher at the secondary or community college level in both public and private schools. All new students enter the major under the BA degree. A separate audition for entrance into the BFA degree plan is required.

Non-major studio classes in ballet, modern dance, jazz, and tap are open to all students and do not require any audition. Several courses are offered which meet the General Education Foundation and Capstone requirements in categories C, D, E, and IC.

A large number of part-time faculty members supplement the expertise of the full-time faculty.

Dance concerts with faculty, students, and visiting choreographers are held in the Martha B. Knoebel Dance Theater. Dance majors and minors are encouraged to participate in activities of the Dance student organization, "Off 7th Dancers."

Students wishing to major or minor in dance must audition for placement prior to starting the program. Auditions are held four times per year. Applicants should contact the Department of Dance to obtain audition dates and an audition application form.

The department is an accredited institutional member of the National Association of Schools of Dance (National Association of Schools of Dance, 11250 Roger Bacon Drive, Suite 21, Reston, VA 20190, phone: 703-437-0700).

## Bachelor of Arts in Dance (code 2-5230) (120 units)

### Requirements

*Composition* (8 units): DANC 120, 220, 320.

*Theory* (21 units): DANC 100, 131, 260, 373I, 435I, 442B, 470, or 475, three units from 488, 491A, or 491B.

*Performance/Production* (4 units): Two units from 181A, 181B, 381A, 381B, 481A, or 481B; two units from 180A, 180B, 295, 380A, 380B, 480A, 480B, or 495.

*Technique* (20 units): Twelve units from DANC 152, 252, 312, 412, (3 units must be earned from 312, 412); eight units from DANC 154, 254, 314, 316, 414 (4 units must be earned from 314, 414).

*Electives* (6 units): Select 6 units from DANC 160, 247, 261, 350, 360, 420, 442A, 445, 470, 475, 488, 491A, or 491B.

## Bachelor of Fine Arts in Dance (code 4-5230) (132 units)

The Bachelor of Fine Arts in Dance is the only professional undergraduate degree in Dance in the CSU. The primary objective of the degree program is to prepare graduates for positions as performers and/or choreographers in dance companies, musical theatre, film, and television. The program also will prepare students for entry into Master of Fine Arts programs in Dance. Preparation: All students wishing to pursue the BFA in Dance must demonstrate intermediate/advanced technical skill in dance by audition. Students may take the BFA studio audition, for entrance into this degree plan, after completing the following course work with a grade of "B" or better: DANC 120, 220, 252, 254, 380A or B, 381A or B.

### Requirements

*Composition* (11 units): DANC 120, 220, 320, 420.

*Theory* (27-28 units): DANC 100, 131, 160, 260, 247 or 261, 350 or 445, 442A, 442B, 470 or 475; six units from 488, 491A, or 491B.

*Performance/production* (7 units): two units from 181A, 181B, 381A, 381B, 481A, or 481B; five units from 180A, 180B, 295, 380A, 380B, 480A, 480B, or 495.

*Technique* (25 units): fifteen units from DANC 152, 252, 312, 412; 3 must be earned from 412. Ten units from DANC 154, 254, 314, 316, 414; 4 must be earned from 314, 414.

*General Education* (6 units): DANC 373I and one course from one of the following: Art: AH 115B, 115C, 335I; Comparative Literature: C/LT 124, 161, 232, 262, 324I, 390, 412I, 490; Philosophy: PHIL 361; Music: MUS 180, 190, 290, 363I, 364I, 375, 368I, 490; Theatre: THEA 124, 324I.

## Minor in Dance (code 0-5230)

The Minor in Dance is available to any non-dance major.

### Requirements

24 unit total with a minimum of 9 units at the upper division: 12 units in Technique to include 9 units selected from DANC 152, 252, 312, 412, and 3 units selected from DANC 154, 254, 314, 414; 5 units in Composition from DANC 120, 220; 2 units in Production/Performance to include one unit selected from DANC 380 A,B, 480A,B, and one unit selected from DANC 381A,B, 481A,B; 5 units in Theory from DANC 131, 442B.

## Master of Arts in Dance

### General Option (code 5-5232)

The Master of Arts Degree in Dance is designed for experienced dance faculty in high schools and community colleges.

### Criteria for Admission into the Program

Candidates must meet the following criteria for entrance into the M.A. in Dance:

1. Bachelor's degree from an accredited institution with a degree in dance or a related field;
2. Minimum of 3 years experience teaching dance in a high school with a secondary teaching credential, or minimum of 3 years part-time or full-time experience teaching dance in a community college (exceptions will be considered for

extensive part-time employment teaching in a high school, or for an exemplary employment history of teaching dance in other venues);

3. A minimum 3.0 gpa is required in the last 60 semester units of the BA or BFA, or any previous graduate course work applied to this degree;
4. Three letters of recommendation, of which one must be from a supervisor or colleague;
5. Movement audition.

Admission will be granted to students who show high promise of success in graduate study, based on past academic record and record of teaching experience.

### Retention Criteria

1. Maintain a GPA of 3.0 in all graduate work completed at CSULB.
2. Continue satisfactory progress toward the degree objective.

### Advancement to Candidacy

1. Satisfy the general university requirements for advancement to candidacy and departmental criteria for admission.
2. Satisfactory completion of the CSULB Writing Proficiency Examination.
3. Maintain a minimum of a 3.0 GPA in all work undertaken for the graduate program.
4. Completion of a minimum of six units of graduate work.
5. Removal of any incompletes.
6. Filing of the student's graduate program form for the Master of Arts in Dance, signed by the student's graduate committee and approved by the Associate Dean for graduate accountability.

### Requirements

A minimum of 30 units with 24 units in DANC 510A, 510B, 521, 565, 591A, 591B, 605, 642; 6 units in DANC 698.

## Master of Fine Arts in Dance (code 7-5230)

This 60-unit plan of study emphasizes performance and choreography grounded in the modern dance genre, and requires 3 years in residence to complete all course work. The Master of Fine Arts degree is the terminal degree in the studio area of dance. It offers professional training preparatory for careers in performance and choreography, and is highly desired by major dance schools in the United States for university and college teaching. CSULB offers the only MFA in Dance in the California State University system.

The Dance Department has chosen to keep the MFA degree program small and selective in order to provide adequate resources to all students in the degree plan. It is expected that applicants for the MFA in Dance should have some life experiences in the field prior to application; therefore, this would normally preclude a person who recently was awarded an undergraduate degree.

### Criteria for Admission into the Program

Candidates admitted into this program will be selected on the following criteria:

1. meet University admissions requirements;

2. B.A., B.F.A., or M.A. degree in dance or equivalent with a 3.0 g.p.a. in upper division dance courses;
3. professional goals consistent with the plan of study;
4. life experiences in the field;
5. audition in performance and choreography.

All MFA candidates are admitted on a conditional status. Removal of the conditional admit will occur after the following:

1. passing the Writing Proficiency Exam;
2. completion of all prerequisites;
3. completion of 20 graduate dance units with a GPA of 3.0;
4. Approval of Graduate Advisor.

### Prerequisites

Advanced technique, Dance Composition (3 courses), Dance History (2 courses), Music for Dance, Anatomy/Kinesiology, Dance Notation or Laban Movement Analysis, Dance Production (2 courses). Candidates may take prerequisite courses along with graduate courses.

When an undergraduate degree is completed in a program which has different requirements than those of the CSULB dance major, additional preparation may be required before the student can be considered for classified status. Up to 24 units from an M.A. degree program may be acceptable, with approval of the graduate advisor.

### Application Requirements

1. A CSULB post-baccalaureate application.
2. The following returned to the CSULB Dance Department:
  - a. letter of application;
  - b. resume;
  - c. 3 letters of reference;
  - d. VHS video of a recent group choreographic work;
  - e. a 2-page (typed, double spaced) personal statement addressing how graduate work will fulfill intended professional goals.
3. Audition on the CSULB campus to include a technique class, and presentation of a 3-5 minute solo composition.

### Advancement to Candidacy

Advancement to candidacy will occur based on the following:

1. unconditional admission status;
2. completion of 30 graduate dance units with a GPA of 3.0;
3. successful choreography produced in a graduate concert;
4. an evaluation by graduate faculty of the candidate's satisfactory progress toward the degree;
5. removal of any incompletes.

### Requirements

60 units total: 16 units in Technique from DANC 512, 514, with a minimum of 12 units from DANC 512, and a minimum of 4 units from DANC 514; 18-20 units in Theory from DANC 505, 531, 565, 588, 597, 599, 605, 642; 10 units in Choreography from DANC 520 A, B,C,D,E; 4 units in Performance from 580 A,B, 585 A,B, 595; 6 units DANC 699 (Thesis), 4-6 units electives.

### Performance Concentration

45 to 47 units to include: DANC 512, 514, 580A, 580B, 585A, 585B, 595, 597, 642, 699;

Electives: 13 to 15 units selected from DANC 518, 528, 520B, 520C, 520D, 525, 545, 583A, 583B, 591A, 591B, 599 or up to 15 units selected from other departments with approval of advisor.

NO NEW STUDENTS ADMITTED IN 2001-2002 YEAR.

### Choreography Concentration

47 to 49 units to include: DANC 510A, 510B, 520A, 520B, 520C, 520D, 525, 580A, 580B, 585A, 585B, 591A, 591B, 597, 642, 699;

Electives: 11 to 13 units selected from DANC 510C, 510D, 514, 518, 545, 595, 599 or up to 13 units selected from other departments with approval of advisor.

NO NEW STUDENTS ADMITTED IN 2001-2002 YEAR.

### Performance/Choreography Concentration

60 units total: 18 units in Technique from DANC 512, 514, with a minimum of 12 units from DANC 512, and a minimum of 4 units from DANC 514; 18-20 units in Theory from DANC 505, 531, 565, 588, 597, 599, 605, 642; 10 units in Performance/Choreography from DANC 520 A,B,C,D, 580 A,B, 585 A,B, 595; 6 units DANC 699 (Thesis), 4-6 units electives.

## Courses (DANC)

### Dance Technique

Note: Dance majors must take technique courses and composition in sequence and screen for level placement in all technique classes. Screening will take place the previous semester and the first day of class. (Non-major technique classes are not screened. They are open to all students.)

### Lower Division

#### 100. Orientation to Dance (1)

Corequisite: DANC 152 or 154. Introductory information, degree requirements, career opportunities, current problems and issues in the field. Credit/No Credit grading only.

#### 110. Viewing Dance (3)

Prerequisite/Corequisite: A General Education Foundation course. Introduction to contemporary dance theater through viewing dance films (modern dance, ballet and ethnic), dance performances, and lecture/discussions on dance.

#### 111. Fundamentals of Modern Dance (2)

Basic skills and techniques of modern dance. Not open to dance majors. Course may be repeated to a maximum of 4 units. (4 studio hours.)

#### 112. Beginning Modern Dance (2)

Prerequisites: DANC 111 or consent of instructor. Open to Non-majors. Increased skill and techniques of modern dance. Course may be repeated to a maximum of 8 units. (4 studio hours.)

#### 113. Fundamentals of Ballet (2)

Basic skills and techniques of ballet. Not open to dance majors. Course may be repeated to a maximum of 4 units. (4 studio hours.)

#### 114. Beginning Ballet (3)

Prerequisites: DANC 113 or consent of instructor. Open to Non-majors. Increased skill and techniques of ballet. Course may be repeated to a maximum of 12 units. (6 studio hours.)

**115. Fundamentals of Jazz (2)**

Basic skills and techniques of jazz. Not open to dance majors. Course may be repeated to a maximum of 4 units. (4 studio hours.)

**116. Beginning Jazz (2)**

Prerequisites: DANC 115 or consent of instructor. Basic theory and practice of modern jazz dance. Course may be repeated to a maximum of 8 units. (4 studio hours.)

**117. Beginning Tap Technique (2)**

Basic technique in the tap dance idiom, time steps, stylistic patterns, rhythmic patterns and tap combinations. Course may be repeated to a maximum of 4 units. (4 studio hours.)

**120. Improvisation I (2)**

Use of improvisation as an introduction to structural form; individual and group problems. (4 studio hours.)

**131. Introduction to Music for Dance (2)**

Basic music notation, simple and complex rhythmic patterns, poly-rhythms, skill in the use of percussion instruments and a brief survey of the historical periods of music for dance. (4 studio hours.) Traditional grading only.

**152. Modern Technique I (3)**

Prerequisites: Dance Major or Minor, and placement screening. Corequisite: DANC 181A or B. Intermediate skill in modern technique. Traditional grading only. Repeatable to a maximum of 12 units. (6 studio hours.)

**154. Ballet Technique I (3)**

Prerequisites: Dance Major or Minor, and placement screening. Corequisite: DANC 181A or B. Intermediate skill in ballet technique. Traditional grading only. Repeatable to a maximum of 12 units. (6 studio hours.)

**160. Makeup for Dance (1)**

Prerequisite: Dance major or minor. Designed to develop expertise in proper makeup techniques integral to dance performance. Instruction, exploration, and experimentation with various types of makeup include corrective and fantasy makeup, hair, masks, and makeup rendering. (2 studio hours.) Traditional grading only. Course may be repeated to a maximum of 2 units.

**179. Exploring Dance: The Language of Movement (3)**

Prerequisites: Open to all Liberal Studies Majors, open to others with permission of the instructor based on availability. Exploration of the movement language of dance: as it relates to the creative process in producing dance; to historical and cultural aspects of dance; as the basis for critical thinking and aesthetic valuing in dance; and to activities geared to the developmental aspects of children, 5-12 years, as outlined in the California State Framework for the Visual and Performing Art, and guidelines. Dance Component, grades k-8. (Lecture 2 hrs, 2 studio hours.)

**180A. Dance Performance (1)**

Prerequisites: Audition, dance major or minor. Participation in dance productions. Traditional grading only. Repeatable to a maximum of 4 units. (2 studio hours.)

**180B. Dance Performance (1)**

Prerequisites: Audition, dance major or minor. Participation in dance productions. Traditional grading only. Repeatable to a maximum of 4 units. (2 studio hours.)

**181A. Dance Production Technical (1)**

Corequisite: DANC 152, 252, 154 or 254. Technical participation in Dance Department-sponsored productions. Repeatable to a maximum of 4 units. Traditional grading only. (2 studio hours.)

**181B. Dance Production Technical (1)**

Corequisite: DANC 152, 252, 154 or 254. Technical participation in Dance Department-sponsored productions. Repeatable to a maximum of 4 units. (2 studio hours.)

**214. Ballet Pointe (1)**

Prerequisite DANC 114 or consent of instructor. Development of the technique of dancing in pointe shoes. May be repeated for a maximum of 4 units. Traditional grading only. (2 studios hours.)

**216. Intermediate Jazz (2)**

Prerequisites: DANC 116 or consent of instructor. Basic theory and practice of modern jazz dance. Course may be repeated to a maximum of 8 units. (4 studio hours.)

**217. Intermediate Tap Technique (2)**

Prerequisite: DANC 117 or placement screening. Intermediate skills in tap technique concentrating on rhythmic complexity, heightened tempos, and contemporary tap styles. Course may be repeated to a maximum of 4 units. (4 studio hours.)

**220. Dance Composition I (3)**

Prerequisite or Corequisite: DANC 120, 131. Theory and practice in the basic elements of dance composition. Traditional grading only. (Lecture 1 hour, 4 studio hours.)

**247. Dance Conditioning (2)**

Prerequisites: DANC 152 or 154. Pilates-based conditioning program for dancer majors employs a prescribed series of exercises performed on the floor mat and augmented to Reformer use. Traditional grading only. (4 studio hours.)

**252. Modern Technique II (3)**

Prerequisites: Dance Major or Minor, and placement screening. Intermediate skill in modern technique. Traditional grading only. Repeatable to a maximum of 12 units. (6 studio hours.)

**254. Ballet Technique II (3)**

Prerequisites: Dance Major or Minor, and placement screening. Intermediate skill in ballet technique. Traditional grading only. Repeatable to a maximum of 12 units. (6 studio hours.)

**260. Functional Anatomy for the Dancer (3)**

Prerequisite: Dance major or minor. A thorough examination of the muscles, bones, and joints of the spine, foot, ankle, knee, shoulder, and pelvis as they relate to the functional application of dance movement. Traditional grading only.

**261. Body Placement for the Dancer (2)**

Prerequisite: Open to Dance Majors and Minors. Body Placement and corrective exercises for modern dance and ballet classes. Traditional grading only. (4 studio hours.)

**295. Repertory (1-3)**

Prerequisites: Audition, dance major. Experience in rehearsal and performance practice in an intensive format. Traditional grading only. Course may be repeated for a maximum of 6 units. (2-6 studio hours.)

**Upper Division****312. Modern Technique III (3)**

Prerequisites: Placement screening. A course for undergraduate dance majors in the intermediate/advanced skill of modern dance techniques. Traditional grading only. Course may be repeated to a maximum of 12 units. (6 studio hours.)

**313. Modern Dance Workshop (1-3)**

Prerequisite: Dance major or minor. Exploration of the techniques of modern dance. May be repeated for a maximum of 6 units. (2-6 studio hours.)

**314. Ballet Technique III (2)**

Prerequisites: Dance Major or Minor, and placement screening. Advanced/ intermediate skill in ballet technique. Traditional grading only. Course may be repeated to a maximum of 8 units. (4 studio hours.)

**315. Ballet Workshop (1-3)**

Prerequisite: Dance major or minor. Exploration of the techniques of ballet. May be repeated for a maximum of 6 units. (2-6 studio hours.)

**316. Advanced Jazz (2)**

Prerequisites: DANC 216 or consent of instructor. Advanced theory and practice of jazz technique. Course may be repeated to a maximum of 8 units. (4 studio hours.)

**317. Advanced Tap Technique (2)**

Prerequisites: DANC 117 and 217 or placement screening. Advanced skills in tap technique concentrating on rhythmic complexity, heightened tempos, improvisational work, and contemporary tap styles. Course may be repeated to a maximum of 8 units. (4 studio hours.)

**\*318. World Dance (1-3)**

Theory and technique of various world forms. (2 studio hours per unit.)

**319. Dance Laboratory (1-3)**

Participation in dance technique projects. Consent of instructor. May be repeated for a maximum of 8 units. Traditional grading only. (2 studio hours per unit.)

**320. Dance Composition II (3)**

Prerequisite: DANC 220. Development of theme and style in small group studies. Traditional grading only. (Lecture 1 hour, 4 studio hours.)

**321. Directed Choreography (1-3)**

Prerequisites: DANC 120, 220 or permission of Instructor. Independent choreographic projects finalized in a performance venue under supervision of a faculty member. Traditional grading only. Repeatable to a maximum of 6 units. (2-6 studio hours.)

**331. Music for Dance (3)**

Prerequisite: DANC 131 and DANC 220. Theoretical and practical analyses of music form and style as appropriate for use in dance classes and performance. Includes a brief survey of historical periods and the development of music repertoire for dance. Traditional grading only. (Lecture 1 hour, 4 studio hours.)

**347. Dance Conditioning II (2)**

Prerequisite: DANC 247 or permission of instructor. Intermediate level Pilates-based conditioning program which employs a series of exercises designed to enhance dance performance and prevent injury, utilizing apparatus based on the designs of Joseph Pilates, exercise balls, free weights and the body for resistance. Traditional grading only. (4 studio hours.)

**350. Dance Notation I (3)**

Prerequisite: DANC 131. Theory and practice of notating movement through Labanotation. Traditional grading only.

**360./560. Prevention and Care of Dance Injuries (3)**

Prerequisite: DANC 260 or permission of instructor. The application of principles of anatomy and kinesiology, integrated with principles of training, for the purpose of fostering a scientific understanding of common dance injuries and their prevention. This course will also focus on the development of the primary components of health-related physical fitness: muscular strength, muscular endurance, flexibility, cardiovascular fitness and body composition in an effort to reduce injury risk and facilitate healthy dance training while attempting to maximize each individual dancer's physiological potential. Traditional grading only.

**373I. Nonverbal Communication: Interaction of Mind and Body (3)**

Prerequisites: Completion of GE Foundation requirements, completion of one or more Exploration course(s), and upper division status. History and theories of the development of mind/body integration. Enhancement of personal and interpersonal relations through lectures, discussion, films and movement experiences. Analysis and synthesis of the interdependence of the psychological and physical processes in nonverbal communication. Same course as ED P 373I.

**380A,B. Dance Performance (1,1)**

Prerequisite: Open to Dance Majors and Minors only. Participation as a performer and/or choreographer in Dance Department productions. Concert participation is by audition only. A combination of 380A,B and 480A,B may be repeated for a total of eight units. (3 or more studio hours.)

**381A,B. Dance Production Technical (1,1)**

Technical production participation in Dance Department sponsored productions. A combination of 381A,B and 481A,B may be repeated for a total of eight units. (3 or more studio hours.)

**398. Fieldwork in Dance Elementary (1-3)**

Prerequisite: DANC 475. Supervised teaching experience in dance in an off-campus setting. Practical experience working with students in kindergarten through 6th grade. Credit/No Credit grading only. May be repeated to a maximum of six units.

**399. Fieldwork in Dance Secondary (1-3)**

Prerequisite: DANC 470. Supervised teaching experience in dance in an off-campus setting. Practical experience working with students in grades 7 through 12 or community college. Credit/No Credit grading only. May be repeated for a maximum of six units.

**412. Modern Technique IV (3)**

Prerequisites: Dance Major or Minor, and placement screening. Advanced skill in modern dance technique. Traditional grading only. Course may be repeated to a maximum of 12 units. (6 studio hours.)

**414. Ballet Technique IV (2)**

Prerequisites: Dance Major or Minor, and placement screening. Advanced skills in the technique of ballet. Course may be repeated to a maximum of 8 units. (4 studio hours.)

**\*416. Ballet Variations (2)**

Prerequisites: DANC 254. Covers modern and classical variations and how to "score" the work. Teaches the dancer how to look at the work and appropriately interpret its style, technique, musicality, focus, special content and phrasing. Stresses the interpretation and analysis of what the variation means artistically. Helps students approach all work with creative visualization. Traditional grading only. (4 studio hours.)

**420. Advanced Composition (3)**

Prerequisite: DANC 320 or consent of instructor. Approaches to the development of choreographic materials of extended structure and content. Traditional grading only. (Lecture 1 hour, 4 studio hours.)

**\*422. Improvisation II (1-3)**

Prerequisites: DANC 220. Development of the individual performer's improvisational skills, exploration of a wide range of subject matter and styles, study of techniques of structuring improvisations. May be repeated for a maximum of 6 units. Traditional grading only. (2-6 studio hours.)

**426. Intermediate/Advanced Ballet Pointe (1)**

Prerequisite: DANC 214 or placement screening. Intermediate skill development in ballet pointe technique. May be repeated for a maximum of 4 units. Traditional grading only. (2 studio hours.)

**435I. Dance in Film (3)**

Prerequisites: Completion of GE Foundation requirements and one or more Exploration course(s), and upper division status. Examination of the relationship between dance and film; study of historical and theoretical connections placed in both aesthetic and cultural contexts.

**442A. History of Dance to 1900 (3)**

Development of dance from Aboriginal to 20th Century. Traditional grading only.

**442B. Twentieth Century Dance History (3)**

Development of Ballet and Modern dance in the 20th Century. Traditional grading only.

**445./545. Movement Analysis (3)**

Prerequisites: Open to Dance Majors and Minors only. Study of the principles underlying movement and their application to all areas of movement study. Traditional grading only. (Lecture 2 hours, 2 studio hours.)

**470. Dance Methodology (3)**

Prerequisites: DANC 312, or consent of instructor. Methods of teaching dance in order to prepare for teaching in studios, recreation departments, companies, institutions, public schools, colleges and universities. Traditional grading only. (Lecture 2 hours, 2 studio hours.)

**475. Dance for Children (3)**

Prerequisites: DANC 120, 312, or consent of instructor. Practical experience in teaching dance to elementary school children employing improvisational approaches to basic elements of dance as integrated into the total elementary curriculum; as a basic form of communications, as an instrument for the development of individual creativity, as identification of dance as an art form. Traditional grading only.

**480A,B. Dance Performance (1,1)**

Prerequisite: Open to Dance Majors and Minors only. Participation as a performer and/or choreographer in Dance Department approved University-sponsored production. Most concert participation is by audition only. A combination of 380A,B and 480A,B may be repeated for a total of 8 units. (3 or more studio hours.)

**481A,B. Dance Production – Technical (1,1)**

Technical participation in Dance Department-sponsored productions. A combination of 381A,B and 4381A,B may be repeated for a total of 8 units. (3 or more studio hours.)

**\*485. Contemporary Dance and the Fine Arts (3)**

Prerequisites: DANC 331 or consent of instructor. Advanced theory and practice relating contemporary dance to the fine arts. Traditional grading only.

**488. Organization of Dance Production (3)**

Prerequisite or Corequisite: DANC 312. Analysis and practice in the production elements of dance concerts. Course is coordinated with a department concert. Traditional grading only.

**489. Special Topics in Dance (1-3)**

Prerequisite: Consent of instructor. Topics of current interest in the field of dance selected for special presentation and development. Topics will be announced in the *Schedule of Classes*. May be repeated for a total of 6 units. (2-6 studio hours.)

**490. Special Topics in Dance (1-3)**

Prerequisite: Consent of instructor. Topics of current interest in the field of dance selected for special presentation and development. May be repeated for credit to a total of 12 units provided it is a different topic, or with consent of department chair. Topics will be announced in the *Schedule of Classes*. (2-6 studio hours.)

**\*491A. Design for Dance Lighting (3)**

Prerequisites: Upper division status or permission of instructor. Techniques of designing lighting for dance. Practical applications include designing and executing lighting for dance for concerts in various settings. Traditional grading only. (6 studio hours.)

**\*491B. Design for Dance Costuming (3)**

Prerequisites: Upper division status or permission of instructor. Designing and constructing costumes for dance. Traditional grading only. (6 studio hours.)

**493. Computers for Dance (3)**

Prerequisites: Dance major or minor. Theory and practice in the basic techniques of computer usage in the art form of dance. Traditional grading only. Course may be repeated for a maximum of 6 units.

**495. Repertory (1-3)**

Prerequisite: Audition. Students learn and perform works of distinguished choreographers. Leads to concert performance. May be repeated for credit to a total of 18 units provided it is with a different instructor each time. (2-6 studio hours.)

**499. Directed Studies in Dance (1-3)**

Prerequisite: Consent of Instructor. Independent projects and research of advanced nature in any area of dance.

**Graduate Division****505. Seminar in Dance Methodology (3)**

Prerequisite: Acceptance into the MA or MFA program or consent of advisor. Discussion specific to the teaching of dance in preparation for teaching in secondary and post-secondary education. Traditional grading only.

**510A,B,C,D. Technique Laboratory (1-3, 1-3, 1-3, 1-3)**

MFA Choreography option students are required to take a technique class each semester. By registering for DANC 510, each will be assigned to an appropriate level technique class. Additional work will be required as appropriate to a graduate level course. May be repeated for a maximum of 6 units. (2-6 studio hours.)

**512. Advanced Modern Technique (3)**

Prerequisites: Placement screening. A course for graduate dance majors in the advanced skill of modern dance techniques. Traditional grading only. Course may be repeated for a maximum of 18 units. (6 studio hours.)

**514. Advanced Ballet Technique (2)**

Graduate level skills in ballet technique. Traditional grading only. Course may be repeated for a maximum of 12 units. (4 studio hours.)

**518. World Dance II (1-3)**

For graduate dance majors to learn the techniques and styles of ethnic dance forms. A dancer from the culture will teach the class. A different culture will be studied each semester. Traditional grading only. Course may be repeated for a maximum of 8 units. (2 studio hours per unit.)

**520A. Choreography A (2)**

A course in advanced approaches to the development of choreographic materials and techniques. The class will include an introduction of video and other multi-media techniques as choreographic tools. Traditional grading only. (4 studio hours.)

**520B. Choreography B (2)**

Prerequisite: DANC 520A. Course in advanced study of choreographic methods with an emphasis on the use of costumes, sets/props, and lighting for dance. Traditional grading only. (4 studio hours.)

**520C. Choreography C (2)**

Prerequisite: DANC 520B. A course in advanced methods and techniques of choreography concentrating on the individual style of the students' work and in depth study in developing a full-length dance work. Class will involve choreographing works of substantial length using small and large numbers of dancers. Instruction will emphasize consistency in choreographic style and content. Traditional grading only. (4 studio hours.)

**520D. Choreography D (2)**

Prerequisite: DANC 520C. A course in the advanced study of choreographic methods, with an emphasis on the use of costuming, lighting, music/sound and other production techniques in preparation for performance. The course involves presenting finished full-length costumed dance works, lighting designs for the work or works and learning the methods of directing dancers during the production run of a concert. Traditional grading only. (4 studio hours.)

**520E. Choreography E (2)**

Prerequisites: DANC 520D or consent of instructor. Methods and practice of developing choreography utilizing an integration of related art forms as the basis for compositional exploration. Traditional grading only. (4 studio hours.)

**521. Dance Composition III (3)**

Prerequisite: Admission to the MA degree program in Dance. Methods and practice of developing choreography as related to the high school and community college setting. Traditional grading only.

**525. Dance in Video/Film (3)**

Basic camera techniques. Exploration of movement within the confines of the camera. Perspective in filming/taping dance. (6 studio hours.)

**531. Music for Dance II (1-3)**

Prerequisite: DANC 331 or equivalent. This course is to provide dance students an opportunity for advanced, in-depth study of musical form and style as it applies to dance. Traditional grading only.

**545./445. Movement Analysis (3)**

Prerequisites: Open to Dance Majors and Minors only. Study of the principles underlying movement and their application to all areas of movement study. Traditional grading only. (Lecture 2 hours, 2 studio hours.)

**560./360. Prevention and Care of Dance Injuries (3)**

Prerequisite: DANC 260 or permission of instructor. The application of principles of anatomy and kinesiology, integrated with principles of training, for the purpose of fostering a scientific understanding of common dance injuries and their prevention. This course will also focus on the development of the primary components of health-related physical fitness: muscular strength, muscular endurance, flexibility, cardiovascular fitness and body composition in an effort to reduce injury risk and facilitate healthy dance training while attempting to maximize each individual dancer's physiological potential. Traditional grading only.

- 565. Dance Science as Related to Teaching Technique (3)**  
Prerequisite: DANC 260 and 505, or permission of instructor. A regional presentation of key kinesiological principles will be utilized to develop an understanding of mechanics, strength, and flexibility exercises, which can then be applied to enhance dance technique and prevent injuries. Scientific principles drawn from exercise physiology will also be combined with anatomical principles to evaluate and better design dance technique classes. Traditional grading only.
- 580A,B. Dance Performance (1)**  
Prerequisite: Audition. Participation as a performer and/or choreographer in Dance Department approved University-sponsored production. Traditional grading only. Course may be repeated for a maximum of 2 units. (3 or more studio hours.)
- 585A,B. Dance Performance (1)**  
Prerequisite: Audition. Participation as a performer and/or choreographer in Dance Department approved University-sponsored production. Traditional grading only. Course may be repeated for a maximum of 2 units. (3 or more studio hours.)
- 588. Seminar in Dance Management (2)**  
Techniques and practices in producing and promoting dance performances in fixed sites and in touring venues relevant to the production of MFA thesis concerts and to venues outside the University. For graduate students with prior experience in the field. Traditional grading only.
- 590. Special Topics (1-3)**  
Prerequisite: Acceptance into MFA program in dance. Topics of current interest to graduate students in dance will be selected for intensive study. Traditional grading only. Course may be repeated for a maximum of 6 units with different topics.
- 591A. Advanced Design for Dance Lighting (3)**  
Provides students with advanced work in design lighting for dance, and offers the in-depth technical knowledge and practical experience necessary to the execution of complete lighting plots. Traditional grading only. (6 studio hours.)
- 591B. Advanced Design for Dance Costuming (3)**  
Provides graduate students with advanced coursework in designing costumes for dance, and with skills necessary to execute the designs. Traditional grading only. (6 studio hours.)
- 592. Special Topics (1-3)**  
Prerequisite: Acceptance into MFA program in dance. Topics of current interest to graduate students in dance will be selected for intensive study. Traditional grading only for Majors/Minors. Course may be repeated for a maximum of 6 units with different topics. (2-6 studio hours.)
- 595. Repertory (1-3)**  
Prerequisite: Audition. A course for graduate dance majors to learn more advanced works from the repertoire of noted choreographers or to have new works created on the students by distinguished choreographers. Instruction, rehearsal and performance gives the dance student a broader knowledge of the various methods used by professional choreographers and the experience of performing those works on stage before an audience with full theatrical production including music, sound, costumes and sets. Traditional grading only. Course may be repeated for a maximum of 6 units. (2-6 studio hours.)
- 597. Criticism and Analysis of Dance (2)**  
Students will analyze choreography and write critiques in order to learn how to look at and evaluate dance works. Traditional grading only.
- 599. Directed Studies (1-3)**  
Prerequisite: Consent of instructor. Individual research or project under the guidance of a faculty member. May be repeated for a maximum of six units. Traditional grading only.
- 605. Seminar in Dance (1-3)**  
Prerequisites: Acceptance into the MA or MFA in Dance. The course will be conducted as a seminar. Literature, including research appropriate to the particular topic of the course, will be examined and discussed. Traditional grading only.
- 642. Seminar in Dance History (3)**  
Intensive study of selected topics in the History of Dance. Traditional grading only. Course may be repeated for a maximum of 9 units with different topics.
- 698. Thesis/Project (1-6)**  
Prerequisite: Advancement to candidacy. Planning, preparation, and completion of a thesis/project in dance for the M.A. degree. May be repeated for a maximum of 6 units. Traditional grading only.
- 699. Thesis/Project (1-6)**  
Prerequisite: Advancement to Candidacy. Planning, preparation, and completion of a thesis/project in dance. Traditional grading only. Course may be repeated for a maximum of 6 units.

# DESIGN

## College of the Arts

### Department Chair

Patricia J. Clark

### Department Office

Design, Room DESN) 101

### Telephone

(562) 985-5089

### Faculty

#### Professors

Mamdouh Fayek

Michael J. Kammermeyer

Charles Leinbach

Bhupendra K. Singhal

Jerry W. Yates

#### Associate Professor

M. Edward Lawing

#### Assistant Professors

Dorothy Ottolia

José Rivera-Chang

#### Administrative Coordinator

Carolyn H. Sandusky

View the CSU, Long Beach *Catalog* on-line at [www.csulb.edu](http://www.csulb.edu) by clicking on "Academics" and then "CSULB Catalog."

The Department of Design was established to provide an administrative and academic framework for professional design training in the fields of Industrial Design, Interior Architectural Design, and Display/Exhibition Design. The degree programs that may be pursued are the Bachelor of Fine Arts, the Master of Arts, the Master of Fine Arts, and the Bachelor of Science, offered in the Industrial Design curriculum.

The faculty of Design believe that an appropriate education for the professional designer must include a comprehensive body of technical knowledge. Such knowledge should include historical sources, tools, techniques, and materials; a methodology for encouraging the creative process; and the attainment of the requisite level of skill to express visual ideas with clarity. While being fully equipped to meet the objectives of the marketplace, today's designer must also achieve sufficient educational breadth to adapt successfully to the varying demands imposed on design work by economic, social, and psychological factors.

The academic programs of the Department of Design have been accredited by the National Association of Schools of Art and Design (National Association of Schools of Art and Design, 11250 Roger Bacon Drive, Suite 21, Reston, VA 20190, phone: 703-437-0700). Student demand for these programs is high. Requirements for admission and degree requirements are given below.

## Bachelor of Fine Arts in Art

The Bachelor of Fine Arts in Art degree is offered as preparation for the student who will eventually seek the Master's degree or a position as a professional designer. The BFA program is a rigorous and competitive one. One hundred and thirty-two semester units are required for the degree, including 81 units for the major and 51 for General Education. Students are first admitted into pre-Interior Design (code 4-5454). Portfolio review is required for admission to the professional BFA program. Portfolios are reviewed in the spring semester for fall admission to junior standing and the upper division program.

### Option in Interior Design (code 4-5854) (132 units)

#### Requirements

Lower Division: AH 115B, 115C; DESN 120A, 120B, 132A, 132B, 141, 142, 151, 232, 241, 242, 243, 244, 246.

Upper Division: DESN 341A, 341B, 342, 343, 346, 367, 369, 440, 441A, 441B; eight units of design/art electives, outside of Interior Design approved by the major adviser. Approved lower and upper division electives to total 132 units.

Students must achieve "C" or better in each required design course to progress in the sequence of study.

### Bachelor of Science in Industrial Design (code 3-5853) (132 units)

This degree program is concerned with the relationship between technology and the visual arts. It includes background courses in engineering and the sciences. Students are first admitted into pre-Industrial Design (code 3-5453). Portfolio review is required for admission to the professional BS program. Portfolios are reviewed in the spring semester for fall admission to junior standing and the upper division program. Students must achieve "C" or better in each required design course to progress in the sequence of study.

#### Requirements

Lower Division: AH 115B, 115C; DESN 120A, 120B, 132A, 132B, 150, 151, 154, 156, 232, 254, 256, 280.

Upper Division: DESN 331A, 331B, 333A, 333B, 368, 431A, 431B; twelve units of design/art electives, nine units of which must be outside of Industrial Design. Approved lower and upper division electives to total 132 units.

### Master of Arts in Art (code 5-5850)

The Design Department Master of Arts in Art program provides professional specializations within the degree: Industrial Design, Interior Design, and Display/Exhibition Design.

#### Prerequisites

1. A bachelor's degree from an accredited institution with a minimum of 24 upper division units in design/art comparable to those required of a major in Design at this University;
2. Completion of 16 units minimum of upper division course work in the area of specialization;

3. Completion of 12 units of design/ art history, six units of which must be upper division;
  4. Successful completion of the Writing Proficiency Examination;
  5. Presentation, to the student's specialization faculty, of a portfolio of representative studio work with emphasis in the area of specialization. Reviews are completed by the first week in October for the following spring semester, by the first week in March for the following fall semester;
  6. A GPA of 3.0 or better in upper division design/art course work. Students who do not meet the minimum 3.0 GPA within the required 24 units as an undergraduate may count units taken as a post-baccalaureate student to meet this GPA. Course work taken as a graduate to validate undergraduate preparation may not be used to satisfy any requirement in the student's MA program.
- All prerequisites must be fulfilled before a student can become classified in a graduate degree program.

All prerequisites must be fulfilled before a student can become classified in a graduate degree program.

#### Advancement to Candidacy Requirements

1. Classified graduate standing. Completion of all prerequisites;
2. A graduate program approved by the student's committee, the Graduate Advisor, the Design Department Chairman, and the Dean of the College of the Arts;
3. A GPA of 3.0 or higher in all work undertaken for the program;
4. The removal of any Incompletes;
5. Successful completion of the Advancement Review;

#### Requirements

Completion of all requirements established by the student's graduate advisory committee, including:

1. A minimum of 30 units of approved upper division and graduate-level courses; a minimum of 15 units at the 500- and 600-level; a minimum of 18 units in the specialization;
2. A minimum of six units of design history or related history beyond the twelve prerequisite units (DESN 698);
3. A thesis or studio project. All studio projects must be formally exhibited (DESN 692).

#### Master of Fine Arts in Art (code 7-5850)

The Design Department Master of Fine Arts degree program provides specializations in: interior design and display/exhibition design.

#### Prerequisites

1. A bachelor's degree from an accredited institution with a minimum of 24 units of upper division design course work comparable to those required for the BFA in Design at this University;
2. Completion of a minimum of 18 units of upper division course work in the area of specialization for the proposed MFA;
3. Completion of a minimum of 12 units of design/art history, six units of which must be upper division;
4. Successful completion of the Writing Proficiency Examination;

5. Presentation, to the student's specialization faculty, of a portfolio of representative studio work with emphasis in the area of specialization. Reviews are completed by the first week in October for the following spring semester, by the first week in March for the following fall semester. (See MA and MFA procedures, "Screening for Acceptance" for details);
6. A GPA of 3.0 or better in upper division design/art course work. Students who do not meet the minimum 3.0 GPA within the required 24 units as an undergraduate may count units taken as a post-baccalaureate student to meet this GPA. Course work taken as a graduate to validate undergraduate preparation may not be used to satisfy any requirement in the student's MA program.

All prerequisites must be fulfilled before a student can become classified in a graduate degree program.

#### Advancement to Candidacy Requirements

1. Classified Graduate standing. Completion of all prerequisites;
2. A graduate program approved by the student's committee, the Graduate Advisor, the Design Department Chairman, and the Dean of the College of the Arts;
3. A GPA of 3.0 or higher in all work undertaken for the program;
4. The removal of any Incompletes;
5. Successful completion of the Advancement Review;

#### Requirements

A minimum of 60 units of approved coursework including at least:

1. Thirty-six 36 units in the area of specialization. Thirty of these units must be in the 500- and 600-levels and must include 690A, 690B, 692, and 699;
2. Six units of approved upper-division or graduate coursework outside of design;
3. A comprehensive review, administered by the student's graduate advisory committee, after the completion of 21 units of studio coursework. This review is to determine whether the candidate will continue in the MFA program;
4. A minimum of 6 units of approved upper division or graduate design/ art history beyond that required as prerequisite work;
5. Twelve units of upper division or graduate level elective coursework in design;
6. A studio project (DESN 699), exhibited and described in a studio thesis (DESN 692).

#### MFA Transfer and Residence Policy

1. Transfer credit allowable on the MFA is normally not to exceed 24 units;
2. MFA candidates must complete a minimum of 18 specialized units with graduate numbers in residence;
3. All transferred credit used in the MFA must be determined by the student's graduate committee and approved by the department Graduate Advisor;
4. The CSULB Master of Arts degree will normally count for a maximum of 30 units (18 in specialization) toward the M.F.A. degree. Exceptions up to an additional 6 units may be approved for outstanding students by the Art/Design Graduate Committee.

## Courses (DESN)

### Lower Division

#### 120A-B. Fundamentals of Design (3-3)

Prerequisites: for 120A: none; for 120B: 120A. A systematic approach to the process of designing two and three-dimensional objects including color theory, surface and volume investigation. (6 hours laboratory.) Traditional grading only.

#### 132A-B. Perspective and Rendering Systems (3-3)

Prerequisites: for 132A: none; for 132B: 132A. Fundamentals of drawing, perspective and rendering techniques used in the design disciplines for accurate and dramatic presentations. (6 hours laboratory.) Traditional grading only.

#### 141. Interior/Architectural Drafting (3)

Architectural drafting and graphic techniques used in light framing and commercial construction with emphasis on interiors. (6 hours laboratory.) Traditional grading only.

#### 142. Beginning Space Planning (3)

Prerequisites: DESN 141. Functional, human, and aesthetic factors of space planning for interiors. (Laboratory 6 hours.) Traditional grading only.

#### 150. Design Drafting (3)

Introduction to manual and computer aided drafting. Includes descriptive geometry; mechanism sketching; orthographic and isometric drafting; blueprint reading, printing and plotting. (6 hours laboratory) Traditional grading only.

#### 151. Industrial Design Materials and Tools (2)

Hands-on experience with wood, metal and plastic materials and the technical tools for creating form. Includes appropriate safety instruction for the use of power equipment. (4 hours laboratory) Traditional grading only.

#### 154. Modeling and Prototyping Techniques (2)

Prerequisites: DESN 150, 151. Materials, processes and techniques for creating mock-ups, models and prototypes used by industrial designers. (4 hours laboratory). Traditional grading only.

#### 156. 3D Computer-Aided Design (3)

Prerequisites: DESN 150. Computer aided modeling strategies and techniques for depicting three-dimensional surfaces and solids. (6 hours laboratory) Traditional grading only.

#### \*232. Visualization Techniques (3)

Prerequisites: DESN 120B, 132B, consent of instructor. Introduction to technical drawing and visual presentation of concepts using communication techniques employed by professional design studios. (6 hours laboratory.) Traditional grading only.

#### 241. Design Drawing and Processes (3)

Prerequisites: DESN 120B, 132B or permission of instructor. Introduction to Design Drawing and Design Processes. Sketching and solving limited scale interior and architectural problems. (Laboratory 6 hours.) Traditional grading only.

#### 242. Interior/Architectural Model Building (3)

Prerequisites: DESN 120B, 132B, 142. Building of interior/architectural models for construction, design analysis and presentation. (Laboratory 6 hours.) Traditional grading only.

#### 243. Materials of Interiors (3)

Prerequisites: DESN 120B, 132B, or permission of instructor. Materials, processes and resources as they relate to interior architecture. Examination of technology and application through lecture, demonstration and field trips.

#### 244. Lighting Design for Interior Architecture (3)

Prerequisites: DESN 120B, 132B, 142. Use of conceptual and practical design problems. The nature and properties of light and color are studied. (Laboratory 6 hours.) Traditional grading only.

#### 245. Building Systems for Interior Architecture (3)

Prerequisites: DESN 142. Survey of design implications of typical building systems (structural, mechanical, plumbing, electrical, acoustical, energy conservation) as influences on interior architectural design. Traditional grading only.

#### 246. Computer-aided Drafting (3)

Prerequisite: DESN 141. Principles and methods of computer graphic applications utilizing AutoCad. Computer drafting of commercial and residential projects. Traditional grading only for majors. Course may be repeated to a maximum of 6 units.

#### 254. Production Materials and Technical Processes (3)

Prerequisites: DESN 150, 151, 154, 156. The study of production processes and industrial materials utilized in the manufacturing of products. Includes introduction to rapid prototyping. (6 hours laboratory) Traditional grading only.

#### 256. 2D Computer-Aided Design (2)

Prerequisites: DESN 150. Computer aided drawing, rendering, and image manipulation for presentation authoring. Includes lighting and animation techniques. (4 hours laboratory) Traditional grading only.

#### 280. Industrial Design Processes (3)

Prerequisites: DESN 120B, 132B, 156, 254, 256. Introductory course in the design processes utilized by industrial designers for product development. (6 hours laboratory) Traditional grading only.

#### 290. Design Methods and Practice (3)

Prerequisites: DESN 150, 151. Survey of design office procedures, methods and professional practices. Includes creative problem solving, market analysis and management.. (6 hours laboratory) Traditional grading only.

### Upper Division

#### 330A. Computer-Aided Design (3-3)

Prerequisites: Upper division status in either Industrial, Graphic or Interior Design or permission of instructor. Introductory course in PC tools for use in the fields of Industrial, Graphic and Interior Design. Includes drafting, 3-D modeling and paint programs. (6 hours laboratory.)

#### \*331A-B. Industrial Design (3-3)

Prerequisites: for DESN 331A: DESN 280 or permission of instructor; for 331B: DESN 331A. Planning and design of useful products for industrial production. (6 hours laboratory.)

#### \*333A-B. Industrial Design Methodology (3-3)

Prerequisites: for 333A: Permission of instructor; for 333B: DESN 333A or permission of instructor. Examination of methods and techniques in design problem solving. (6 hours laboratory.)

#### \*341A-B. Interior Design (3-3)

Prerequisites: for 341A: DESN 232, 243; ART 115B, 115C; for 341B: DESN 341A. Design of interior environments emphasizing interrelationships between interior space, architectural form and human factors in design. (6 hours laboratory.)

#### 342. Interior/Architectural Presentations (3)

Prerequisites: DESN 232, 241, and Junior standing in the professional program. Exploring and using various techniques and methods of visually and verbally presenting design concepts, ideas, and finished projects. (Laboratory 6 hours.) Traditional grading only.

#### 343. Advanced Drafting and Detailing (3)

Prerequisites: DESN 143, 242, 245, and Junior standing in the professional program. Advanced drafting and detailing skills of architectural interior design related to light frame and other construction processes. (Laboratory 6 hours.) Traditional grading only.

#### \*344A-B. Display and Exhibition Design (3-3)

Prerequisites: ART 115B, 115C; DESN 120B, 232 or consent of instructor. Use of materials, processes, and design concepts in the planning and preparation of displays and exhibits. (6 hours lab.)

#### 346. Computer-Aided Design – 3D Modeling (3)

Prerequisites: DESN 132B, 242, 246. Computer-aided drawing, rendering, 3D drawing and solid modeling. Includes lighting and animation techniques for spatial/architectural modeling and design. Traditional grading only for majors. Course may be repeated to a maximum of 6 units.

#### 351A. Process of Architectural/Interior Lighting Design (3)

Prerequisites: DESN 232, 142, 244 or 254; or permission of instructor. Exploration of processes used to conceptualize, present and develop architectural lighting designs. Traditional grading only. (Laboratory)

**351B. Applications of Architectural/Interior Lighting Design (3)**

Prerequisite: DESN 246, 351A, or 330A. Exploration of the major categories of applications (e.g., residential, office, etc.) and the specific principles, conventions and codes that apply to them as well as the basic use of lighting equipment common to these applications. Traditional grading only.

**367. History and Theory of Architecture (3)**

Prerequisite: Completion of GE Foundation requirements. Evolution of architecture relative to the human need to shape environment in accordance with governing concerns of specific periods in history. Not open to students with credit in ART 417.

**368. History and Theory of Design (3)**

Prerequisite: Completion of GE Foundation requirements. Development of design as an independent creative activity including a consideration of both pre-technological and technological culture. Not open to students with credit in ART 418.

**369. History of Furniture and Decorative Arts (3)**

Study of the history of furniture, finish materials, and accessories. (Lecture-discussion 3 hrs.) Traditional grading only.

**370. Design in Contemporary Society (3)**

Prerequisite: Completion of GE Foundation requirements. Discover the principles of design by examining the human relationship to the built environment through a sequence of scales: from the organization of cities, to public architecture and housing, the design of furniture and products. Emphasis will be on experiencing design through lecture, lab, field observations and projects. Traditional grading only.

**\*431A-B. Advanced Industrial Design (4-4)**

Prerequisites: DESN 331B, PHYS 100AB or consent of instructor. Advanced planning and design of projects in the area of mass produced objects, packaging, traffic, transportation, mechanical design and shelter. (8 hours laboratory.)

**\*432. Advanced Rapid Visualization (3)**

Prerequisites: DESN 232 or consent of instructor. Advanced idea generation and visualization for industrial design. (6 hours lab.)

**\*435A. Furniture Design (3)**

Prerequisites: DESN 232, 331A, 341A, or permission of instructor. Design of public and private interior furnishings with an in depth study of the potentials of contemporary production methods and materials. (6 hours laboratory.)

**435B. Advanced Furniture Design (3)**

Prerequisites: DESN 435A, or permission of instructor. Continuation of DESN 435A. Projects focus upon research and the impact of human factors on the design of furniture. Traditional grading only.

**440. Professional Practices for Interior Architecture (3)**

Prerequisites: Permission of instructor. Examination of professional practices for commercial (corporate) institutional/public interior architectural design. Traditional grading only.

**\*441A-B. Advanced Interior Design (4-4)**

Prerequisites: DESN 341B, 343 or consent of instructor. Advanced interior design and space planning problems emphasizing relationships between the built environment and human factors in design. (6 hours laboratory.)

**\*442G. Internship in Industrial Design (3)**

Prerequisite: Consent of instructor. Student internship experience in selected industrial design offices. Opportunity to work under supervision of industrial designers in the field to expand student understanding of the complexities, discipline and challenges in the practice of industrial design. May be repeated once for credit. (6 hours laboratory.)

**\*442H. Internship in Interior Design (3)**

Prerequisite: Consent of instructor. Student internship experience in selected interior design offices. An opportunity to work under supervision of interior designers and architects in the field to expand student understanding of the complexities, discipline and challenges in the practice of interior design. Limited to six units in one semester and a total of nine units. (6 hours laboratory.)

**\*490. Special Topics in Design (1-3)**

Prerequisite: Consent of instructor. Special topics of current interest in design will be selected for intensive study. May be repeated with different topics to a maximum of 12 units. Topics will be announced in the *Schedule of Classes*. (2-6 hours lab.)

**\*495. Field Studies in Design (1-6)**

An opportunity to study design movements, objects, theories, techniques at appropriate off-campus locations. Up to six units of cumulative credit may be earned in DESN 495.

**\*499C. Special Studies in Display and Exhibition Design (3)**

Prerequisite: Consent of instructor. Opportunity for extensive work with faculty supervision on individual problems in display and exhibition design. Limited to six units in one semester and a total of nine units. (6 hours laboratory.)

**\*499G. Special Studies in Industrial Design (3)**

Prerequisite: Consent of instructor. Opportunity for extensive work with faculty supervision on individual problems in industrial design. Limited to six units in one semester and a total of nine units. (6 hrs laboratory.)

**\*499H. Special Studies in Interior Design (3)**

Prerequisite: Consent of instructor. Opportunity for extensive work with faculty supervision on individual problems in interior design. Limited to six units in one semester and a total of nine units. (6 hours laboratory.)

**Graduate Courses**

**590. Special Problems in Design (1-3)**

Prerequisite: Consent of instructor. Special problems of current interest in design will be selected for intensive study. May be repeated with different topics to a maximum of 12 units. Topics will be announced in the *Schedule of Classes*. (2-6 hours laboratory.)

**599. Studio Problems in Design (3)**

Prerequisite: Consent of instructor. Advanced individual graduate projects, with faculty supervision, in an area of design specialization. Limited to six units in one semester and a total of 12 units in any one area. Areas will be designated by letter at the time of registration. (6 hours laboratory.)

**C. Display and Exhibition**

**G. Industrial Design**

**H. Interior Design**

**690A. Seminar in Design (3)**

Prerequisite: Consent of instructor. Selected reading and writing concerning topics relevant to student's specific disciplines in design with an opportunity for interdisciplinary discussion.

**690B. Seminar in Design (3)**

Prerequisite: Consent of instructor. Professional preparation for designers stressing practical concerns as well as current trends in design practices, theory and criticism.

**692. Public Exhibition (2-3)**

Prerequisite: Consent of instructor. Planning, preparation and administration of a public exhibition of creative work related to the design field. Two units only for all M.A. candidates. Three units only for all M.F.A. candidates. The course will result in a public exhibition by each M.A. and M.F.A. candidate. (6 hours or more laboratory.)

**694. Directed Studies Studio (1-3)**

Prerequisite: Consent of instructor. Independent studies in creative studio.

**695. Field Problems in Design (1-6)**

Opportunity to study design movements, objects, theories, techniques or literature at appropriate off-campus locations. Up to six units of cumulative credit may be earned in DESN 695.

**697. Directed Studies (1-3)**

Prerequisite: Consent of instructor. Independent studies in technical and historical aspects of design.

**698. Thesis or Project (1-6)**

Prerequisite: Advancement to candidacy. Planning, preparation and completion of a thesis or project. Required of all Master of Arts candidates.

**699. Thesis or Project (1-6)**

Prerequisite: Advancement to candidacy. Planning, preparation and completion of thesis or project. Required of all M.F.A. candidates and all candidates seeking a second M.A.

When resources are scarce, difficult choices must be made on how resources are to be divided among competing uses. Economics is a social science that addresses the allocation of scarce resources. When applied to individuals, economics attempts to understand the behavior of individuals as consumers, managers and government officials. When applied to society as a whole, economics attempts to explain and predict the economy's total output, level of employment and price level.

## Bachelor of Arts in Economics (code 2-8510) (120 units)

The bachelor of arts degree with a major in economics prepares students for a variety of careers in business and government. The degree also provides the foundation for teaching in elementary and secondary schools and for more advanced study in economics, business, law, and other related fields.

### Requirements

Lower Division: ECON 100, 101, ACCT 201, and either Math 115 or 122. Students with upper division status declaring Economics as a major may substitute ECON 300 for ECON 100 and 101.

Upper Division: 310, 311, 380, and six additional upper division courses in economics of which at least two must be at the 400-level. The following courses may not be used to satisfy the elective requirement in economics: ECON 300, 309I, 495 and 499.

The major also requires a minimum of two courses outside of Economics (totaling at least six units.) Students may take any upper division courses from the departments listed below, or any of the following lower division courses: ANTH 120, GEOG 100, HIST 131, 132; MATH 114, 117, 123, 224; POSC 201; PSY 100; S W 220; SOC 100.

## Option in Mathematical Economics and Economic Theory (code 2-8514) (120 units)

The Bachelor of Arts in Economics with an option in Mathematical Economics and Economic Theory provides students with the tools of economic analysis with an emphasis on economic theory, economic optimization and statistics. This option is recommended for students interested in graduate study in economics.

### Requirements

Lower Division: ECON 100 and 101, MATH 122, 123, 224 and 247. Students with upper-division status declaring the option may substitute ECON 300 for ECON 100 and 101 with departmental consent.

Upper Division:

*Economic Theory*: ECON 310 and 311.

*Statistics*: ECON 380 and 481, or MATH 380 and 381.

*Advanced Theory and Quantitative Methods*: At least one of the following courses: ECON 403, 410H, 411H, 420, 433 or 486.

*Elective Courses:* At least four additional upper-division courses in economics of which at least one must be taken at the 400 level. Students may take one course from the following in meeting the elective requirement: MATH 364A, 480, 485. ECON 300, 309I, 380, 481, 495 and 499 may not be taken to meet the elective requirement.

## Bachelor of Arts in Business Economics (code 2-2775) (120 units)

The bachelor of arts degree with a major in business economics provides students with the tools of economic analysis and their application in a business environment.

The business economics major prepares students for careers in the private or public sector. Students completing this major will have a solid foundation in microeconomic theory, macroeconomic theory, and quantitative methods.

They will have also completed courses in international economics and business administration. The bachelors degree in business economics is excellent preparation for graduate study in economics, business administration, public administration, and law.

### Requirements

Lower Division Requirements: ECON 100, 101, ACCT 201, and either MATH 115 or MATH 122. Students with upper division status declaring economics as a major may substitute ECON 300 for ECON 100 and 101.

Upper Division Requirements: ECON 310, 311, and 380, and six additional upper division courses of which at least two must be at the 400 level. At least three courses must be selected from Group A; at least one course must be selected from Group B; and, at least one course from Group C. The remaining elective may be selected from Group A, B, or C, or any other upper division course in economics except ECON 300, 309I, 495, and 499.

Group A: Business Economics and Quantitative Economics (select at least three courses): ECON 320, 333, 355, 403, 420, 422, 430, 432, 433, 434, 441, 463, 481, 486.

Group B. International Economics (select at least one course): ECON 361I, 365, 368, 369, 370, 372, 465, 472.

Group C. Business Administration (select at least one course): ACCT 310, CBA 300, FIN 300, FIN 320, HRM 360, MGMT 300, MKTG 300.

## Minor in Economics (code 0-8510)

The Minor in Economics is available to any non-Economics or non-Business Economics major.

The economics minor is designed to provide students with a broad-based introduction to the methods of economic analysis. It is suitable for students planning careers in many fields including primary and secondary education, journalism, law, or government. A minimum of 24 units which must include:

Lower Division: ECON 100 and 101, and either MATH 115 or 122. Students with upper division status declaring the minor may substitute ECON 300 for ECON 100 and 101 with departmental consent.

Upper Division: ECON 310 and either ECON 311 or 320, and at least three additional upper division economics courses, of which at least one must be at the 400 level. The following courses may not be taken as upper division electives in economics: ECON 300, 309I, 495, and 499

## Minor in Business Economics (code 0-2775)

The Minor in Business Economics is available to any non-Economics or non-Business Economics major.

The minor in business economics is equally suitable for students pursuing baccalaureate degrees in non-business and business fields. The minor provides students with a strong concentration in the techniques of economic analysis most closely related to business decision-making. A minimum of 24 units which must include:

Lower Division: ECON 100 and 101, and one of the following: ACCT 201, MATH 115 or 122. Students with upper division status declaring the minor may substitute ECON 300 for ECON 100 and 101.

Upper Division: ECON 310 or 333, 311 or 320. The remaining 9 units (3 courses) may be selected from the upper division courses listed immediately above or any of the following courses: IS 310 or ECON 380, 372, 420, 422, 430, 432, 433, 434, 441, 462, 472.

## Minor in International Economics (code 0-8511)

The Minor in International Economics is available to any non-Economics or non-Business Economics major.

The minor in international economics provides students with an introduction to the techniques of economic analysis and the application of those techniques to issues in the world economy. Students will learn about the economic history and institutions of other countries, issues associated with the economic growth of less developed countries, and international trade and finance.

The minor is suitable for students from all majors planning careers in a wide variety of fields including business, government, journalism and education. A minimum of 24 units is required and must include:

Lower Division: ECON 100 and 101, and either MATH 115 or 122. Students with upper division status declaring the minor may substitute ECON 300 for ECON 100 and 101.

Upper Division: ECON 310 or 333 and ECON 311 or 320, and any three of the following courses: ECON 361I, 365, 368, 369, 370, 372, 465, or 472.

## Master of Arts in Economics (code 5-8510)

The master of arts degree in economics is designed to provide academic preparation for positions in industry, government, consulting agencies and teaching. The emphasis is on the immediate application of more advanced principles of analysis to business, management and government. Candidates are responsible for observing the general requirements stated in the *Catalog* as well as requirements specified by the Economics Department. Detailed information on requirements may be obtained from the department graduate advisor.

A limited number of graduate assistantships are available to qualified students.

### Prerequisites

1. A bachelor's degree with a major in economics; or
2. A bachelor's degree with 24 units of upper division courses comparable to those required of a major in economics at this University. (Deficiencies will be determined by the Economics Department.);

3. A minimum undergraduate GPA of 3.0 (B) in upper division economics courses. (A student who fails to meet this requirement may submit Graduate Record Examination scores on the verbal, quantitative and advanced economics sections, and petition the Economics Department for a waiver.)
4. Graduate students must consult with the graduate advisor for information concerning department procedures and for approval of their course of study before entering the master of arts program in economics.

### Advancement to Candidacy

Satisfy the general requirements of the University for advancement to candidacy.

### Requirements

1. Thirty units of upper division and graduate courses approved by the Economics Department (courses marked with an asterisk), of which 24 must be in economics with a minimum of 18 units in the 500 and/or 600 series. All students must develop three fields of concentration in economics, including economic theory (micro and macro economics);
2. Satisfactory completion of ECON 503, 510, 511, 581, and 586;
3. A comprehensive examination in economic theory and successful completion of course work in two elective fields of concentration with grades of "B" or better in the appropriate 600-level courses; or completion of a comprehensive examination in economic theory, one elective field of concentration, and a thesis.

---

## Economics Courses (ECON)

---

### Lower Division

#### 100. Principles of Macroeconomics (3)

Prerequisite or corequisite: One course from the Foundation curriculum. Money and banking, price changes, national income analysis, business cycles, economic growth, fiscal and monetary policy, international trade. Not open to students with credit in ECON 202. (CAN ECON 2)

#### 101. Principles of Microeconomics (3)

Prerequisite or corequisite: MATH 103 or higher. Business organization, price theory, allocation of resources, distribution of income, public economy. Not open to students with credit in ECON 201. (CAN ECON 4)

### Upper Division

General Education Category A must be completed prior to taking any upper division course except upper division language courses where students meet formal prerequisites and/or competency equivalent for advanced study.

#### 300. Fundamentals of Economics (3)

Prerequisites: Completion of GE Foundation requirements. Designed for non-majors. Presents basic training in economics for social studies teachers or citizens who wish to exercise a reasoned judgment about economic issues in public affairs. Content generally same as ECON 100, 101, in condensed form. Not open to students with credit in ECON 100 or 101 except by consent of the Economics Department.

#### 306I. Environmental Issues of the World Economy (3)

Prerequisites: Completion of the G.E. Foundation, Economics 101, 12 units of Exploration Courses from Category B, and upper-division standing. Interdisciplinary analysis of human impact on the atmosphere and biological diversity; consideration of policies to foster sustainable development with emphasis on the economic perspective; international political economy of negotiations to promote global cooperation in defense of our common environment.

#### 309I. The Consumer in the Legal and Economic Environment (3)

Prerequisites: Completion of GE Foundation requirements, one or more Explorations courses, and upper-division standing. Combines an introduction to the economic and ethical components of consumer issues with a critical analysis of relevant substantive aspects of consumer law. Incorporates an integrated coverage of the economic, legal, and regulatory environment of the consumer in avoiding and resolving consumer-related disputes regarding fraudulent transactions, financial matters, personal and real property contracts, torts, credit and investment issues, and family relationships. Team-taught. Same course as FCS 309I and FIN 309I. (Lecture-Activity 3 hours).

#### 310. Microeconomic Theory (3)

Prerequisites: ECON 100, 101 and either MATH 115 or 122. Analysis of economic concepts and their applications to business situations. Emphasis on supply and demand analysis, costs of production, variations of competition and monopoly, revenues, prices, profits and losses, and other aspects of the operations of the business enterprise.

#### 311. Macroeconomic Theory (3)

Prerequisites: ECON 100, 101 and either MATH 115 or 122. Determinants of levels of income, employment, and prices; of secular and cyclical changes in economic activity; and of the effects of public policies upon aggregative economic experience.

#### 313. History of Economic Thought (3)

Prerequisites: ECON 100 and 101, or 300. Evolution of economics as a science. Doctrines of the different schools of economic thought. Study of the contributions of outstanding economists.

#### 320. Money and Banking (3)

Prerequisites: ECON 100, 101 and either MATH 115 or 122. Nature and functions of money and its relation to prices; the monetary system of the United States; the functions of banks, bank credit, foreign exchange and monetary control.

#### 333. Managerial Economics (3)

Prerequisites: ECON 100, 101 and either MATH 115 or 122. Development of the tools of marginalist analysis and their application to managerial decisions and planning. Emphasis upon the calculation of solutions to operational problems of the business firm. Topics include demand analysis, production and cost, pricing, and output decisions under different market structures. Product and factor markets will be analyzed.

#### 355. Law and Economics (3)

Prerequisites: ECON 100 and 101, or 300. Analysis of economic concepts and their application to law and legal institutions. Emphasis on property law, contract law, accident law, crime control and judicial administration.

#### 360I. American Economic History (3)

Prerequisites: Completion of GE Foundation requirements, one or more Explorations courses, and upper-division standing. Economic analysis of growth and welfare in the American economy from the beginnings of industrialization to the present, with emphasis upon the material and social factors affecting the transformation of our economy since the early nineteenth century.

#### 361I. European Economic History (3)

Prerequisites: Completion of GE Foundation requirements, one or more Explorations courses, and upper-division standing. Economic analysis of the principal features of the European economy from the Industrial Revolution to the present, with emphasis upon the problems of economic growth, capital formation and technological and demographic change in this era.

---

## Economics Courses (ECON)

---

### 365. Economics of Modern China (3)

Prerequisites: Completion of GE Foundation requirements. Economic analysis of the Chinese economy in the modern era. After a brief historical background, the main focus of the course will be on the socialistic transformation of the economy (1949-1978). The post-1978 Total Economic Reform will be discussed as a contrast and to suggest some patterns for the future. Economic topics will be supplemented by attention to institutional, geographic, and demographic aspects.

### 368. Comparative Economic Systems (3)

Prerequisites: Completion of GE Foundation requirements. Handling of economic problems in differing national and ideological contexts. Combines an overall conceptual framework with the study of specific national approaches.

### 369. East/Central European Economies in Transition (3)

Prerequisites: Completion of GE Foundation requirements. This course focuses on the East/Central European countries of Hungary, East Germany, Poland and the Czech/Slovak Federal Republic. Topics to be covered include the economic experiences of these countries under Communism (central planning), the movement towards the market allocative process (decentralized choice), as well as the development and influence of neighboring countries and institutions, including Romania, Yugoslavia, West Germany, the European Common Market, the former Soviet Union and the United States.

### 370. Pacific Rim Economy (3)

Prerequisites: Completion of GE Foundation requirements. Examines economic backgrounds and resource bases of the nations comprising the Pacific Rim, patterns of growth in trade among the Pacific Rim countries, flows of capital, activities of multinationals, interdependence of domestic and trade policies among the Pacific Rim countries, and future prospects of trade opportunities and possible constraints on expanded trade relations. Traditional grading only.

### 372. International Economics (3)

Prerequisites: ECON 100 and 101, or 300. International trade and exchange rate theory. Types of trade control: tariffs, quotas, exchange manipulation, monopolies. Basic U.S. and European commercial policies since 1930. Not open to students with credit in ECON 471.

### 380. Economic Statistics (4)

Prerequisites: ECON 100 and 101 and either MATH 115 or 122. Use of descriptive and inferential statistical concepts for the analysis of economic data. Topics applied to economics include measures of central tendency and dispersion, probability theory, discrete and continuous probability distributions, hypothesis testing, regression and correlation analysis, economic time series and index numbers.

### 403./503. Mathematical Economics (3)

Prerequisites: ECON 310, 311 and consent of instructor. Applications of calculus, linear algebra and other mathematical tools in formulating and solving economic problems. Designed for exceptional undergraduate students who intend to pursue a graduate degree in economics. Traditional grading only. (Not open to students with credit in 483./583.)

### 410H./510. Advanced Microeconomics (3)

Prerequisites: ECON 310, 311 and consent of the instructor. Applications of microeconomic theory. Detailed examination and analysis of particular markets and contemporary issues in light of economic theory. Specific emphasis on policy analysis for government and business decisions. This course is designed for exceptional undergraduate students who intend to pursue a graduate degree in economics. Traditional grading only.

### 411H./511. Advanced Macroeconomics and Forecasting (3)

Prerequisites: ECON 310, 311 and consent of the instructor. Applications of macroeconomics, monetary and forecasting theory to operational management and planning decisions of government and business. This course is designed for exceptional undergraduate students who intend to pursue a graduate degree in economics. Traditional grading only.

### \*420. Forecasting (3)

Prerequisite: ECON 311 or 320. Principles and methods of forecasting. Evaluation of the reliability of existing forecasting techniques. Also covers use of the macroeconomic model as a basis for forecasting and the role of forecasts in the formulation of national economic policy.

### 422./522. Macroeconomics for Management (3)

Prerequisites: ECON 311. Managerial applications of macroeconomic concepts. Emphasis on developing tools to analyze and predict aggregate economic activity and on promoting understanding of interrelationships and interdependencies of the macroeconomic environment for managerial decision making. Topics include: macroeconomic goals and efficient management; measurement and sources of economic data; modeling the macroeconomy; structural, or supply-side, changes affecting the macroeconomy; business cycle forecasts and the use of economic indicators; econometric forecasting, input-output analysis.

### \*430. Industrial Organization (3)

Prerequisites: ECON 310 or 333. Exploration of corporate economics. The structure, behavior and performance of the relatively few large enterprises that originate more than two-thirds of the GDP of the U.S. An economic analysis of the arguments for and against 'big business.' Implications of separation of ownership and control, Corporate social responsibility and the profit motive. The dilemma of size versus competition.

### \*432. Economics of Antitrust (3)

Prerequisites: ECON 310 or 333. The attempt of government to produce superior economic practices and results by the legal imposition of purportedly more competitive market structures and behavior patterns on business firms. An economic analysis of the leading judicial decisions comprising the modern law of antitrust. A rigorous examination of the underlying presupposition of antitrust that competition is the best model for economic activity. The future of antitrust including a discussion of proposals for legislative overhaul, including repeal of existing antitrust law.

### \*433. Capital Theory and Financial Analysis (3)

Prerequisites: ECON 310 or 333. Intertemporal choice and decision-making under uncertainty. Topics include multiperiod consumption, multiperiod production, capital budgeting and financial management.

### \*434. Economics of Regulation (3)

Prerequisites: ECON 310 or 333. The attempt of government to intervene in the existing market sector for the purpose of producing more competitive and socially acceptable practices and results while retaining the efficiency of large-scale economic organization. A comprehensive survey of the past, present and future of the political regulation of economic and business activity. Consideration of the rationale for regulation and deregulation and the creation, design and removal of regulatory practices. The changing concept of the public interest.

### \*441. Labor Economics (3)

Prerequisite: ECON 310. Manpower resources and their utilization, with particular reference to labor unions, collective bargaining and related public policies. Effects of these institutions on production, employment, prices and patterns of income distribution.

### \*445. Economics of Health (3)

Prerequisite: ECON 310. Analysis of health as an economic good. Health services as scarce resources. Use of tools of economic theory in study of special problems of health resources, markets, manpower shortages, non-profit enterprises, insurance programs and Medicare. Procedures stress individual studies and reports. Same course as HCA 451.

### \*450. Public Sector Economics (3)

Prerequisites: ECON 310 and 311. The economic role of government. Analysis of the theory of public goods. Criteria for efficient allocation of resources between the private and the public sector. Possible responses of government externalities, such as environmental degradation. Emphasis on the allocation and distribution effects of government expenditures and taxation.

**\*462. Environmental Economics (3)**

Prerequisite: ECON 310. Economic analysis of environmental problems and policy. Market failures due to externalities, public goods, and common property resources will be examined. Private (market) and public (governmental) solutions to environmental problems are examined.

**\*463. Energy Economics (3)**

Prerequisite: ECON 310. Application of economic analysis to energy problems and policies. Representative topics include macroeconomic effects of energy price shocks, international financial fragility, OPEC pricing strategies, determinants of demand and supply, industrial organization and finance, investor and publicly owned utilities, domestic and international policies.

**\*464. Natural Resource Economics (3)**

Prerequisite: ECON 310. Microeconomic and capital theory applied to problems of conserving and managing natural resources. Analysis of public policies affecting renewable and nonrenewable resources including price controls, taxation and leasing. Representative topics include: forestry, fishery, energy, water, and mineral economics.

**465./565. Economic Development (3)**

Prerequisites: ECON 310, 311 and consent of instructor. Economic and social factors underlying economic development. Analysis of problems associated with economic growth of less developed countries. Evaluation of development policies.

**472./572. International Trade and Finance (3)**

Prerequisite: ECON 310, 311, and consent of the instructor. Pure theory of trade. Consequences of balance of payments disequilibrium for national income and prices. Tariffs, customs, unions and the theory of commercial policy. Foreign exchange market and international financial institutions.

**481./581. Intermediate Economic Statistics (3)**

Prerequisites: ECON 310, 311, 380, and consent of instructor. A rigorous treatment of statistics emphasizing aspects relevant to economics. Statistical inference, probability distributions, application of simple and multiple regression analysis to economic problems, analysis of variance and structural analysis of time series.

**486. Introduction to Econometrics (4)**

Prerequisites: ECON 310, 311, 380, and consent of instructor. Elementary mathematical expression of economic theory. Combined use of mathematics and statistics to solve economic problems. Use of econometric models for formulation of economic policy. (Lecture 3 hours, laboratory 2 hours.)

**\*490. Special Topics in Economics (3)**

Prerequisite: Consent of instructor. Topics of current interest in economics selected for intensive development. May be repeated for a maximum of six units. Topics will be announced in the *Schedule of Classes*.

**491H. Senior Honors Seminar in Economics (3)**

Prerequisites: Senior status, ECON 481 or 486, and consent of instructor. Provides opportunity for students to integrate their knowledge of economics, statistics-econometrics and computer studies. Designed as a seminar in research where students will be expected to write a paper and present their research results orally. Research topics must be approved by instructor.

**495. Field Studies Practicum (3)**

Prerequisites: ECON 310 or 333 and consent of instructor. Observation and practical experience, at a managerial level, in an appropriate business or government enterprise. Applications for permission to enroll must be filed with the Economics Department at least six weeks prior to beginning of the semester involved. Course may be repeated for a maximum of six units.

**499. Directed Study (1-3)**

Prerequisite: Consent of instructor. Independent study under the supervision of a faculty member. May be repeated for a maximum of 6 units of credit.

**Graduate Division**

**500. Business Economics (3)**

Workings of the price system in the allocation of resources, and the determination of the level and fluctuations of aggregate economic activity, with special emphasis on the role of business enterprise in the economy. Analysis of the economic implications of various forms of industrial organization and the application of public policy to business activity, including antitrust policy and regulation. Not open to students majoring in economics.

**503./403. Mathematical Economics (3)**

Prerequisites: ECON 310 and 311. Applications of calculus, linear algebra and other mathematical tools in formulating and solving economic problems. (Not open to students with credit in 483./583.)

**510./410H. Advanced Microeconomics (3)**

Prerequisites: ECON 310, 311 and 503. Applications of microeconomic theory. Detailed examination and analysis of particular markets and contemporary issues in light of economic theory. Specific emphasis on policy analysis for government and business decisions.

**511./411H. Advanced Macroeconomics and Forecasting (3)**

Prerequisites: ECON 310, 311 and 503. Applications of macroeconomics, monetary and forecasting theory to operational management and planning decisions of government and business.

**522./422. Macroeconomics for Management (3)**

Prerequisites: ECON 311. Managerial applications of macroeconomic concepts. Emphasis on developing tools to analyze and predict aggregate economic activity and on promoting understanding of interrelationships and interdependencies of the macroeconomic environment for managerial decision making. Topics include: macroeconomic goals and efficient management; measurement and sources of economic data; modeling the macroeconomy; structural, or supply-side, changes affecting the macroeconomy; business cycle forecasts and the use of economic indicators; econometric forecasting, input-output analysis. Traditional grading only.

**565./465. Economic Development (3)**

Prerequisites: ECON 310 and 311. Economic and social factors underlying economic development. Analysis of problems associated with economic growth of less developed countries. Evaluation of development policies.

**572./472. International Trade and Finance (3)**

Prerequisites: ECON 310 and 311. Pure theory of trade. Consequences of balance of payments disequilibrium for national income and prices. Tariffs, customs, unions and theory of commercial policy. Foreign exchange market and international financial institutions.

**581./481. Intermediate Economic Statistics (3)**

Prerequisites: ECON 310, 311 and 380. A rigorous treatment of statistics emphasizing aspects relevant to economics. Statistical inference, probability distributions, application of simple and multiple regression analysis to economic problems, analysis of variance and structural analysis of time series.

**586. Introduction to Econometrics (3)**

Prerequisites: ECON 310, 311, and 380. Elementary mathematical expression of economic theory. Combined use of mathematics and statistics to solve economic problems. Use of econometric models for formulating economic policy.

**597. Directed Studies (1-3)**

Prerequisite: Consent of instructor. Intensive reading and/or practical research in economics.

**660. Seminar in Natural Resources and the Environment (3)**

Prerequisites: ECON 510, 511, and one of the following: ECON 462, 463 or 464. Research methods applied to selected topics from energy, natural resources, and the environment. Traditional grading only. (Seminar, 3 hours.)

**670. Seminar in International Trade and Development (3)**

Prerequisites: ECON 510, 511, and one of the following: ECON 565 or 572. Selected topics dealing with current problems and solutions in international trade, finance, and development. Traditional grading only.

---

## Economics Courses (ECON)

---

### 686. Seminar in Econometrics (3)

Prerequisites: ECON 586, 510 and 511. Development of methods for the estimation and testing of the relationships among economic variables and use of econometric models for prediction and economic policy purposes. Traditional grading only.

### 690. Seminar in Economics (3)

Prerequisite: Consent of instructor. Seminar on topics of current interest in economics. May be repeated for a maximum of six units with different topics.

### 697. Directed Research (1-3)

Prerequisite: Consent of instructor. Independent research under the guidance of a faculty member.

### 698. Thesis (2-6)

Prerequisite: Consent of graduate advisor. Planning, preparation and completion of a thesis related to a field in economics.

---

## Environmental Science and Policy Courses (ES P)

---

### Lower Division

### 200. California Environmental Issues (3)

Prerequisites or corequisites: GEOL 102, 104, BIOL 200 or 211A. Introduction to the history, nature, status, and future of a major environmental issue in California (the coastal environment, water resources, land use, or energy supplies). Biological, physical, and societal aspects will be examined and integrated with the goal of developing a plan to meet the challenges of the 21st Century. (Lecture 2 hrs., discussion 1 hr., and field trips.) Traditional grading only.

### Upper Division

### 300. Environmental Policy, Institutions, and Law (3)

Prerequisites: Completion of GE Foundation requirements; ECON 310, ES P 200, POSC 100. Environmental policy and law focuses on political institutions, property rights, federal and state roles in decision-making, and challenges for environmental policy. Decision-making is examined in the context of the rights and limits of both private parties and the broad public interest. Emphasis is on use of science in decision-making, choices between regulations and incentives, and role of bureaucracy in resource policy. Examples of legal principles as applied to environmental regulation by federal and state governments. Case studies from air pollution, water pollution, land development, wetlands and coastal management. Traditional grading only. (2 hrs lecture, 1 hr discussion).

### 400. Environmental Science and Policy Capstone Project (3)

Prerequisites: BIOL 350, ECON 462 (or 463 or 464), ES P 300, GEOG 485, GEOL 300I. Consists of an interdisciplinary evaluation of the physical, biological, social, economic, and legal dimensions of environmental policies. The instructor will select from the ecosystems that are part of the larger Southern California Bight – and policies with associated environmental impacts – for evaluation and analysis. Examples include policies to reduce, control, or treat surface water run-off, establishing or changing the management of marine protected areas, dredging in the harbors, and decisions to develop in or adjacent to wetlands. Students will transmit results to the public or appropriate legislative bodies, agencies, or courts for consideration and deliberation in legislative, policy, or judicial decisions. (2 hrs lecture, 1 hr discussion, and field trips). Traditional grading only.

The Department of Educational Psychology, Administration and Counseling offers graduate level course work in the following program areas: Educational Administration; Educational Psychology; Social and Philosophical Foundations Education; Career Counseling; Marriage and Family Therapy (MFT); School Counseling; School Psychology; Student Development in Higher Education; Vocational Rehabilitation Counseling; and Special Education; as well as undergraduate service courses in life skills and other areas.

Students desiring information should contact the department office for referral to one of the faculty advisors.

All CED graduate level courses (500/600) are assumed to be traditional grading only unless stated otherwise.

## Graduate Degrees

Master of Arts degrees in Education with the following options are offered:

- Educational Administration
- Educational Psychology
- Social and Multicultural Foundations of Education

Two Master of Science degrees are available:

- Special Education
- Counseling

MS in Counseling offers five options:

- Career Counseling
- Marriage and Family Therapy
- School Counseling
- Student Development in Higher Education
- Vocational Rehabilitation Counseling (Discontinuance is under consideration.)

## Credentials

The department offers credentials in Administrative Services (Preliminary and Professional), Pupil Personnel Services (School Counseling, School Counseling Internship, School Psychology, School Psychology Internship), Special Education (Mild/Moderate and Moderate/Severe, Resource Specialist Certificate) and Library Media Teacher Services. In addition, a Graduate Certificate as a Career Guidance Specialist is offered.

Required credential courses must be completed with a grade of "C" or better. The minimum grade point average for successful progress in the credential programs of the department is 3.0 on all units to be applied to the credential program. Students falling below 3.0 will be notified. To maintain their status in the credential program students must earn sufficient grade points to bring their GPA back to 3.0 by the end of the regular semester following the semester in which their GPA fell below 3.0. Students may appeal to the department chair.

View the CSU, Long Beach *Catalog* on-line at [www.csulb.edu](http://www.csulb.edu) by clicking on "Academics" and then "CSULB Catalog."

## Interdisciplinary Minor in Crosscultural Language and Academic Development Studies (code 0-9683)

The minor comprises courses that integrate studies of culture, language, learning and the academic environment, and human development. It is an interdisciplinary program designed to support career objectives related to public education in Crosscultural Language and Academic Development. The minor consists of a minimum of 18 units selected with an advisor. Courses in the department of the student's major may not be used.

1. One course from each of the following areas (12 units):  
*Culture:* ANTH 421/LING 425 or EDP 432/EDEL 430  
*Language:* EDP 454 or LING/CD 329  
*Schooling:* EDP/LING 485  
*Development:* EDP 301, EDP 302, HDEV 307I, or PSY 361
2. Six additional units, selected with an advisor, from the following:  
*Culture:* AIS 319, ASAM 319, B/ST 319, CHLS 319, W/ST 319, ANTH 329, ANTH 412I, ANTH/LING 413, ANTH 419, ANTH 421/LING 425, ANTH/WST 475, CHLS/ASAM 335I, EDP 432/EDEL 430  
*Language:* ANTH 170, CHLS 402, EDP 454, LING/CD 329, LING/ENGL 327, LING 363I, LING 435, LING 472, LING 486.  
*Schooling:* AIS 361, ASAM 310, B/ST 420, CHLS 340, EDP 305, EDP 350.  
*Development:* EDP 301, EDP 302, HDEV 307I, PSY 361.

## Master of Arts in Education

### Admission and Advancement to Candidacy

Please refer to the College of Education section for information concerning admissions criteria and advancement to candidacy.

### Option in Educational Administration (code 5-3103)

Educational leaders serve in many capacities. No matter what position an individual holds within an educational organization, all energies should be directed at maximizing the academic achievement of all students being served. The courses in the Educational Administration Option are designed to prepare leaders for this important work. Emphasis is placed on the role of schooling in a democratic society, instructional leadership, building collaboratives, managing and guiding change, and working with diverse populations. Because of our location, issues associated with urban schools are a primary focus of the program.

### Prerequisites

15 upper-division units in education including ED P 400, or equivalent experience.

### Clear Admission

1. Meet University admission requirements;
2. A minimum 2.85 overall GPA in the last 60 semester units of course work, and provide official copies of transcripts to the Department and University;
3. Pass the Writing Proficiency Examination (WPE);

4. Submit two non-confidential letters of recommendation from individuals familiar with your professional competence and potential as an educational leader, one of which must be from your principal or immediate supervisor;
5. Submit a double-spaced typed personal statement (2-3 pages) describing your educational and experiential background, and your philosophy of leadership;
6. Attend the Educational Administration advisement meeting.

### Requirements

A minimum of 30 units with a 15 unit concentration in Educational Administration is required. 21 units must be in the 500/600 level series taken at this University.

1. One of the following (3 units): EDP 574 or EDAD 649.
2. One of the following (3 units): EDP 575, 576, OR 672.
3. One of the following (3 units): EDP 500, 595, or 696.
4. One of the following chosen in consultation with the faculty advisor: EDAD 695 master's project (3-6 units) or EDAD 698 thesis (6 units).
5. All of the following (18 units): EDAD 541, 544, 647, 648, 650, EDP 677.

### Option in Educational Psychology (code 5-3158)

A research-oriented option in the Masters of Arts (MA) in Education has been designed for students and educators who seek to develop their understanding of learning and development, testing and assessment, research, and program evaluation in education. This program offers a rigorous curriculum in each of these areas and requires that the student declare a "foundation" emphasis within the Option. All students who are admitted to the master's program are assigned to Track 1. Admission to the MA, Option in Educational Psychology does not guarantee acceptance to the highly competitive School Psychologist Credential Program. Students with this credential objective must apply separately to the School Psychologist Credential Program. Upon acceptance to the School Psychology Credential Program, a master's student may petition to be assigned to Track 2 no later than May 1 of that academic year. (Check the CSULB Catalog and the Department Office for application deadlines.)

### Admission Requirements

#### University Admission Application

1. File an "Application for Graduate Admission" along with one complete set of official transcripts with the University Office of Admissions no later than July 1 for Fall admission and no later than December 1 for Spring admission.
2. Complete Parts A and B.

In Part B, insert program code 5-3158.

#### Conditional Admission to the Program

1. Meet University admission requirements.
2. Send official transcripts, one from each college attended, to the Graduate Office in the College of Education. Transcripts must verify a GPA of 3.00 or higher on the last 60 semester (or 90 quarter) units of college course work taken. Evidence of completing at least a baccalaureate degree majoring in the behavioral sciences, education, or a related program prior to beginning the Master of Arts in Education (Educational Psychology Option). (Applicants with other majors should seek advisement from the program faculty.)

3. Send an official transcript of test scores obtained from the Educational Testing Service for the Graduate Record Exam (GRE) General Test to the Graduate Office in the College of Education. For admission consideration, the criterion is a combined Verbal and Quantitative score of 1000.

4. For international students, whose primary language is not English, in addition to GRE scores, send an official transcript of test scores obtained from the Educational Testing Service (ETS) for the Test of English as Foreign Language (TOEFL) to the Graduate Office in the College of Education. For admission consideration, the criterion is a TOEFL score of 550 or higher is required.

5. Official transcript(s), GRE scores, and TOEFL score if applicable must be on file in the Graduate Office in College of Education no later than July 1 for consideration to enter the Fall semester or no later than December 1 for consideration to enter the Spring semester.

6. Note: "Conditional admission" status does not guarantee admission to the master's program. To qualify for University admission in "conditionally classified" or "classified" graduate standing, a student must be accepted into a graduate degree program on a "conditional" basis or as "clear admission" status.

7. Applicants are not allowed more than 9 semester units of credit applied to curriculum requirements of this option completed prior to admission into the first semester of the program.

## Clear Admission to the Program

The catalog published in the academic year in which the student is advanced to candidacy governs the course of that student's program.

### Requirements for Advancement to Candidacy

1. Evidence of completing the following prerequisites: EDP 301 or 302, 305, 350, 405, 419, and 420, or acceptable equivalents.
2. Completion of the following core courses: EDP 519 and 520.
3. Verification of a 3.0 grade point-average on the prerequisites plus 6 to 9 units of core courses.
4. Removal of all incomplete grades.
5. Pass the Writing Proficiency Exam (WPE).
6. An approved plan of study completed in consultation with the program advisor.

### Program Requirements

#### MA Objective (Track 1)

The degree objective requires a total of 36 units made up of a 30-unit core and a 6-unit "foundation" that culminates in either (a) a master's thesis or (b) a written comprehensive examination.

1. Degree Core:
  - A. EDP 519, 520, 541, 595, 596, and 619
  - B. 9 units from EDP 604 and 605, PSY 632, 634, and 637
  - C. 3 units from EDP 529 and 564
2. For the "foundation" culminating in a master's thesis, the student completes all of the above 30 units of core courses plus 6 units of EDP 698. OR, for the "foundation" culminat-

ing in a written comprehensive examination, the student complete all of the above 30 units of core courses plus 6 units 500/600 electives selected with the approval of the program advisor; and a written comprehensive examination.

#### MA Objective (Track 2)

Assignment to Track 2 requires that students admitted to the School Psychologist Credential Program petition the Graduate Office to transfer from Track 1 to Track 2. The degree objective requires a total of 37 units made up of a 31-unit core and a 6-unit "foundation" that culminates in either (a) a master's thesis or (b) a written comprehensive examination. All courses are 3 units unless specified otherwise.

1. Degree Core:
  - A. EDP 519, 520, 524(4 units), 595, 596, and 619
  - B. 9 units from ED 579A, 604, and 605 and PSY 632, 634, and 637
  - C. 3 units from EDP 525, 529, and 564
2. For the "foundation" culminating in a master's thesis, the student completes all of the above 31 units of core courses plus 6 units of EDP 698. OR, for the "foundation" culminating in a written comprehensive examination, the student complete all of the above 31 units of core courses plus 6 units 500/600 electives selected with the approval of the school psychology credential program advisor; and a written comprehensive examination.

## Option in Social and Multicultural Foundations of Education (code 5-3160)

Students pursuing the option in Social and Multicultural Foundations receive both traditional and contemporary preparation through specialized, interdisciplinary study. The Option is designed for individuals seeking careers in multicultural/multilingual education programs, international education, contemporary urban educational environments, and for students interested in pursuing higher academic degrees.

### University Admission

File an application for Graduate Admission along with one complete set of official transcripts with the University Office of Admission no later than July 1 for Fall semester consideration and December 1 for Spring semester consideration. Transcripts must verify a minimum grade point average (gpa) of 2.85 in the last 60 semester or 90 quarter units of course work.

### Requirements

A minimum of Thirty-three (33) units of upper division and graduate courses, of which a minimum of twenty-one (21) units must be at the 500/600 level.

### Prerequisites

Fifteen (15) units of advisor-approved upper division or graduate level courses in education, ethnic studies, humanities, social and behavioral sciences, liberal studies, or other appropriate areas. Courses may be chosen from the following:

Three (3) units from W/ST 315, W/ST 318I, AS/ASAM/BST/CHLS/W/ST 319, W/ST 320, W/ST 381, ANTH/W/ST 475, SOC/W/ST 325, SOC 340, or SOC 346, (or and equivalent).

Nine (9) units from EDP/LING 485, EDP 432/EDEL 430, and W/ST 401, (or their equivalent).

Three (3) units from EDP 400 (or an equivalent upper division quantitative methods course).

### Advancement to Candidacy

1. Send official transcripts, one from each college attended, to the Office of Graduate Studies in the College of Education.
2. Provide to the Office of Graduate Studies a 2-3 page statement including: previous profession experience and proposed course of study with respect to professional goals.
3. Complete all prerequisites plus 6-9 units of program requirements.
4. Provide evidence of passing the Writing Proficiency Examination (WPE).
5. Maintain a 3.0 gpa in all course work.
6. Complete any and all Incomplete grades.

### Core Requirements

At least fifteen (15) of the 33 units must include: EDP 574, 575, 576, 582 and one of the following 3 units EDP 500 or EDP 595/LING 595. Also, (3 units) EDP 697 Directed Research and Comprehensive Exam; or (3-6 units) EDP 699 Project; or (6 units) EDP 698 Thesis.

### Areas of Concentration

Additionally, students must take a minimum of fifteen (15) units in the Areas of Concentration. The program provides flexibility for students to design their course of study (with advisor's approval) by enrolling in courses from those listed below, *in any combination*. For convenience, related courses are grouped together under areas of concentration. (When selecting courses outside of the College of Education, students may choose only those courses with an asterisk (\*) beside the course number, indicating that they are acceptable for credit in a master's degree – or those courses appearing on the List of Approved 400-Level Courses).

#### International/Global Education

EDP 583, EDP 672, ANTH 421/LING 425, ETEC 525.

#### Language, Literacy, and Culture

EDP 578/LING, 475/575, EDP 589, ANTH 413, 530, EDEL/EDSE 540, EDP 573, EDP 577/LING 500, ENGL 510, LING 460

#### Language Minority Education

EDP 573, EDP 672, EDP 454, EDP 578/LING 475/575, LING 486, LING 650

#### Special Concentration

Alternatively and with advisor's approval, students may focus their program of study on a specialized area of their choice. (Suggested areas of concentration include, but are not limited to, education for ethnic/race/gender-specific groups or populations with special needs; bicultural/bilingual education or urban education; instructional technology among marginalized populations.)

## Master of Science in Counseling

Counselors serve valuable functions in fields of education, health and human services, and business. Their domains of practice include public and private educational institutions, medical facilities and allied health agencies, social service agencies and organizations, state and federal human service agencies and programs, correctional facilities, business and industry, and private practice. The program's philosophy is to introduce students to a variety of approaches to counseling, and to encourage the development of competencies within these approaches.

The program combines theory and practice utilizing on and off campus course work and field work assignments. Required courses are offered predominantly in the evening, but most field assignments require daytime participation during normal business hours defined by the off campus sites.

Students coming from diverse experiential backgrounds are trained at the graduate level to be able to perform entry level duties expected by the counseling profession and its specialty areas. Students are prepared to assume future leadership positions in their area(s) of expertise after additional work experiences have been acquired in the field following graduation.

The Master of Science in Counseling Program consists of five options:

1. Career Counseling
2. Marriage and Family Therapy
3. School Counseling
4. Student Development in Higher Education
5. Vocational Rehabilitation Counseling (Discontinuance is under consideration)

The total number of course units needed to satisfy requirements for graduation depends upon the option selected by the student.

### University Admission

Upon acceptance to the program, file an "Application for Graduate Admission" along with one complete set of official transcripts with the University Office of Admissions no later than July 1 [VRC applicants only: April 15];

### Program Admission

File a "Master of Science in Counseling" application to only one program option area with the College of Education Graduate Office along with one complete set of official transcripts no later than March 1 including steps 1-3 listed below:

1. Transcripts must verify a GPA of 2.85 or higher on the last 60 semester (or 90 quarter) units of course work taken. Evidence of completing at least a baccalaureate degree majoring in the behavioral sciences, education, or related program prior to beginning the Master of Science in Counseling program (those with other majors should seek advisement from the program faculty);
2. Send three (3) letters of recommendation along with the Program Application;
3. Send a type-written personal statement along with the Program Application;
4. Screening interview(s) (upon notification by the option area);

5. Items 1-3 above must be on file in the Graduate Office no later than March 1 for the following fall semester (students are admitted to begin course work in the fall semester only) except as noted below.
- Career Counseling applicants only: Items 1-5, along with results of the Miller Analogies Test (MAT) and current edition of the Strong Interest Inventory, must be on file in the College no later than March 15.
- MFT applicants only: Items 1-3 must be on file in the College no later than March 1 for fall or October 1 for spring. Item 6 is required. (MFT students are permitted to begin course work in either summer, fall, or spring semester upon admission to this option);
- VRC applicants only: Items 1-3, along with results of the Miller Analogies Test (MAT) and current edition of the Strong Interest Inventory, must be on file in the College no later than May 1. (Program discontinuance is planned.)
- School Counseling applicants only: Items 1-3 must be on file in the College of Education Graduate Office no later than March 1.
- Student Development in Higher Education applicants only: Items 1-3 must be on file in the College of Education Graduate Office no later than March 1.
6. Applicants are not allowed more than one-third the total number of semester units credit applied to curriculum requirements of the option selected completed prior to admission into the first semester of the program.

### Option in Career Counseling (code 6-3171)

Students in this option prepare to provide career counseling and guidance services to adults and adolescents in the community and public agencies, college and university settings, business and industry settings, and private practice. The training prepares individuals for the California Registered Professional Career Counselor (CRPCC) and National Master Career Counselor (MCC) examinations.

#### Requirements

All of the following (37 units): EDP 430, 502, 510, 513, 515, 529, 530, 531, 637, 638, 643C, 644C; and,

All requirements of ONE of the following tracks (21 units):

*Thesis Track* – EDP 419, 420, 519, 520, 696, 698; OR  
*Comprehensive Examination Track* – EDP 400; and six elective courses from EDP 505, 516, 517, 520, 524, 555, 564, 566, 580, 596, and 601.

#### Advancement to Candidacy

EDP 430, 515, 530, and 400 or 419; pass the Writing Proficiency Examination.

### Option in Marriage and Family Therapy (code 6-3176)

Students in this option will prepare for licensed independent MFT practice to work in private practice, community-agency settings, government-court settings, hospitals, clinics, Employee Assistance Programs, and city-county-state agencies to provide counseling services for adults, children, families and couples.

### Requirements

All of the following (64-70 units): EDP 419, 420, 430, 510, 511, 512, 513, 514, 515, 520, 522, 543, 555, 556, 557, 601, 604, 608, 609, 634, 638, 643D, 644D, and EDP 698 or comprehensive examination.

EDP 609 requires completion of 150 experience hours.

EDP 643D requires completion of 175 experience hours.

EDP 644D requires completion of 175 experience hours.

Advancement to Candidacy: EDP 430, 510, 513: pass the Writing Proficiency Examination (WPE)

### Option in School Counseling (code 6-3172)

The school counseling program is designed to prepare counselors to work in elementary, middle, and high schools. The program supports a comprehensive, developmental, and collaborative school counseling model. Students are expected to become proactive leaders who will advocate for their students and themselves, as counseling professionals working toward equity, achievement, and opportunity for all students.

#### Requirements

All of the following (51-57 units): EDP 400, 430, 506, 515, 520, 530, 531, 536, 555, 596, 604, 607, 638, 639, 643A, 644A, 695C, and EDP 698 or comprehensive examination.

Advancement to Candidacy: EDP 400, 430, 506, 515; and pass the Writing Proficiency Examination (WPE).

### Option in Student Development in Higher Education (SDHE) (code 6-3173)

Students completing this option are employed in residence halls, financial aid, student activities, adult re-entry, admissions, career centers, academic advising, disabled student services, counseling centers, orientation, trio and educational opportunity programs, multicultural affairs, and community outreach in two- and four-year institutions.

#### Requirements

All of the following (47-54 units): EDP 400, 430, 515, 516, 538, 547, 548, 549, 555, 576, 593, 596, 638, 643B, 644B, 693, and one from EDP 520 or 595; and EDP 698 or comprehensive examination.

Advancement to Candidacy: EDP 400, 430, 515, 593; and pass the Writing Proficiency Examination (WPE)

### Option in Vocational Rehabilitation Counseling (VRC) (code 6-3170)

Students in this option prepare to provide vocational rehabilitation services to people with disabling conditions in state rehabilitation service offices, community-based sheltered workshops, hospitals, clinics, geriatric centers and hospices, Employee Assistance Programs, Social Security Disability Administration offices, private counseling firms, private practice, and School-to-Work Transition Programs. They also prepare for national Certified Rehabilitation Counselor (CRC) and California Registered Professional Rehabilitation Counselor (CR-PRC).

Applicants should be aware that this option is under consideration for suspension or discontinuance and selected courses will not be offered in the 2002-03 academic year.

## Requirements

All of the following (59-65 units): EDP 419, 420, 430, 501, 505, 510, 513, 515, 520, 524, 529, 531, 555, 637, 645, and one from 564 or 580; and EDP 698 (Thesis) or comprehensive examination.

Advancement to Candidacy: EDP 419, 430, 501; pass the Writing Proficiency Examination (WPE).

## Master of Science in Special Education (code 6-3155)

Students in the master's degree program are working toward attaining leadership positions in public and private schools and agencies in the community, which provide services for individuals with disabilities. The master's degree program is aimed at developing advanced skills and knowledge of current research in special education and demonstration of the ability to engage in reflective inquiry. The master's degree program ends with a thesis or comprehensive exam.

### Admission

1. Copies of transcripts verifying a GPA of 2.85 or higher on the last 60 semester units (or 90 quarter units) or course work taken.
2. Baccalaureate degree from an accredited institution
3. A typed essay of three to five pages, double-spaced, outlining the candidates reasons for entering the programs, experiences and training related to the program, and anticipated outcomes from completing the program
4. Attendance at an on-campus program orientation

### Prerequisites

A bachelor's degree with 24 upper division units to include the following areas of study (suggested courses in education noted in parentheses):

1. Development: 3 units (EDP 301, 302)
2. Statistics and measurement: 3 units (EDP 400)
3. Individual differences: 3 units (EDP 350)

### Requirements

Students must complete a minimum of 30 units of upper division and graduate courses with a minimum of 21 units at the 500/600-level taken at this university. Degree requirements include the following courses:

1. Degree Requirements:
  - A. EDP 550, EDP 535 and EDP 546C (9 units)
  - B. One of the following advanced methods courses (3 units): EDP 563 or 565
  - C. One of the following areas of emphasis (3 units): EDP 542 or 566
  - D. Electives to meet the required minimum of 30 units selected with a special education faculty advisor.
  - E. One of the following in consultation with faculty advisor: Comprehensive exam or Thesis

Comprehensive exam pathway: EDP 520 (3 units), 695S (3 units), and written comprehensive exam; Thesis pathway: EDP 520 (3 units), 695 (3 units), and 698 (6 units)

## CREDENTIAL PROGRAMS

### Pupil Personnel Services

The College of Education at CSULB offers two of the four Pupil Personnel Services Credential programs issued by the California Commission on Teacher Credentialing (CCTC): school counseling and school psychology.

### School Counseling Credential (code 802)

The school counseling credential is required of persons serving counseling and guidance functions beyond the advisory duties customarily performed by classroom teachers. A teaching credential or experience is not required. The credential holder is authorized to work in California public schools from kindergarten through grade 12. The counseling credential requirements include (1) undergraduate course work in the behavioral sciences and (2) specific graduate courses including practicum and field experience.

### Admission

1. Copies of transcripts verifying a GPA of 2.85 or higher on the last 60 semester units (or 90 quarter units) of course work taken;
2. Evidence of completing at least a baccalaureate degree majoring in the behavioral sciences, education, or related program prior to beginning the school counseling credential program (those with other majors should seek advisement from the credential program coordinator);
3. Three letters of recommendation;
4. A type-written personal statement;
5. Interview.

Applicants are responsible for obtaining the most recent revision of the school counseling information packet including application materials, available in the department office (ED1-Room 10).

Application Deadline for Fall Admission: March 1

A Master of Science in Counseling or an approved equivalent degree is now required as part of the Pupil Personnel Services School Counseling Credential Program. Applicants to the Pupil Personnel Services School Counseling Credential Program who lack a Master of Science in Counseling or approved equivalent degree must concurrently apply to the Master of Science in Counseling (School Counseling Option) Program to be considered.

### Prerequisites

1. Application for Certificate of Clearance is required for public school field work. Apply at least one year prior to the expected first field work semester. Persons possessing a valid California credential are exempt from this requirement.
2. Applicants are required to take the California Basic Educational Skills Test (CBEST) no later than the second available administration date following enrollment in the program.

### Requirements

1. Completion of the Master of Science in Counseling (School Counseling Option) or an acceptable equivalent degree.
2. Completion of the following (51 units): EDP 419, 420, 430, 506, 515, 520, 530, 531, 536, 555, 604, 607, 638, 639, 643A, 644A, 695C.
3. Field Work Prerequisites:

A. School Counseling Field Work (EDP 643A) (300 hours of approved activities, average of 20 hours per week):

- (1) EDP 607
- (2) Certificate of Clearance (see Prerequisites above)

B. Advanced School Counseling Field Work (EDP 644A) (300 hours of approved activities, average of 20 hours per week):

- (1) EDP 530, 638, 643A, and 536 (or concurrent enrollment in 536)
- (2) Pass CBEST

4. Certification of program completion by the faculty is required. The faculty may require students to complete additional course work, field work, or demonstrate specific competencies before recommendation to the state CCTC for the school counseling credential.

### School Counseling Internship

For additional information, contact the School Counseling Program Coordinator at (562) 985-5626

### School Psychology Credential (code 804)

School Psychologists consult with teachers, parents, and others regarding student learning and behavior difficulties. They monitor the progress of students with special needs, assist students to develop more productive school careers, and assist teachers in the areas of behavior management and teaching methods. A teaching credential is not required.

#### Admission

1. Copies of transcripts verifying a GPA of 3.0 or higher on the last 60 semester units (or 90 quarter units) of course work taken;
2. Possession of a baccalaureate degree from an accredited university;
3. Three letters of reference by persons who have had professional work association with applicant;
4. Evidence of a passing grade on the WPE;
5. A written personal statement – the application form contains a list of the items to be included;
6. Evidence of having taken the CBEST is required prior to clear admission to the program;
7. Screening interview - after the admission committee reviews the papers sent in by each applicant, those selected for the interview will be notified as to time and place.

#### Requirements for the Completion of the School Psychology Credential

1. Completion of an acceptable master's degree in one of the behavioral sciences. Master's degrees which typically meet this requirement in the Department of Educational Psychology, Administration and Counseling are: Master of Science in Counseling; Master of Arts in Education with an option in Educational Psychology; Master of Science in Special Education or approved equivalent master's degree;
2. Completion of a minimum of 60 units in graduate coursework or their equivalents with the approval of the PPS School Psychology faculty in the following areas of study: Educational Psychology: EDP 405, 520, 528, 596; Counseling EDP 430, 517; Assessment and Intervention: EDP 524, 525, 527, 536, 560, 579, 605; and Practicum and Fieldwork: EDP

641, 642A, 642B; and 3 pre-approved elective courses in the area of counseling, special education or educational psychology.

3. Certification of program completion by the PPS credential School Psychology faculty is required. The student may be required to complete additional course work, field work, or demonstrate specific competencies before approval;
4. A Certificate of Clearance and successful performance on CBEST is required prior to field work/ internship;
5. Field Work in School Psychology prerequisites: Approval of field work-school psychology internship application by the faculty. All program courses except EDP 527, 536, 560, and 642. Application deadlines are March 1 for Summer and Fall and October 1 for Spring fieldwork.
6. Complete the National School Psychology Examination (ETS/ PRAXIS II #10400) prior to completion of the credential program.

### School Psychology Internship

See Program Coordinator for details.

An internship is paid field work, performed under the supervision and with the permission of the PPS credential School Psychology faculty and the school district which hires the intern. In order to be recommended to a district as a possible intern, the student must have completed the prerequisites listed above in "1" and "5," and be approved by the School Psychology credential coordinator.

### Special Education Credentials

As a result of regulation changes by the California Commission on Teacher Credentialing (CCTC) in the Spring of 1996, the Department of Educational Psychology, Administration and Counseling now offers the Education Specialist Credential. This credential program prepares and certifies special education teaching candidates in the CCTC Education Specialist Credential categories of Mild/Moderate and Moderate/Severe. This program does not require a Multiple or Single Subject credential as a prerequisite. An Intern Option is also available in collaboration with certain school districts. Please consult with the department office for further information.

#### Preliminary Level I – Education Specialist Credential and Intern Option: Mild/Moderate Disabilities (code 468) and Moderate/Severe Disabilities (469)

#### Professional Level II – Education Specialist Credential: Mild/Moderate Disabilities (code 468) and Moderate/Severe Disabilities (469)

This Specialist credential program prepares candidates in the areas of Mild/Moderate and Moderate/Severe disabilities in a program approved by the California Commission on Teacher Credentialing. The program is designed so that candidates may be certified in both areas of authorization if they complete two separate field experiences, i.e., one with students with mild and moderate disabilities and one with students with moderate and severe disabilities. Upon admission to the program, candidates must identify an area of authorization and indicate whether their goal is to become certified in one or both areas. The program

has two tiers: the Preliminary Level I Education Specialist Credential and the Professional Level II Education Specialist Credential. Following receipt of the Preliminary Level I Credential, candidates need to complete the Professional Level II preparation in special education within five years of the date of issuance of the preliminary credential. An Intern Option is also available in partnership with selected school districts. Please consult the College of Education Student Information Center for further information.

### **Preliminary Level I Education Specialist Credential: Mild/Moderate and Moderate/Severe**

Application for admission to the Education Specialist Credential Program should be made the semester before beginning the required courses in Level I. Students may apply to the program concurrent with completion of prerequisite courses and conditions, and may be admitted on a conditional basis pending completion of these preparatory experiences. To be considered for full acceptance, students must provide verification of the following:

1. Admission to the University
2. GPA of 2.75 in college and university course work (last 60 or 90 quarter units);
3. Demonstration of subject matter competence - Multiple Subject Assessment for Teachers (MSAT) passed or verification of an approved subject matter preparation program.
4. Prerequisites for full acceptance (must be completed or in progress before enrolling in level I courses): EDP 301 (or HDEV 307I or PSY 361) or EDP 302; EDP 454; ETEC 444 or meet clear credential competencies through testing.

To complete the admissions process, students should:

1. Complete and submit the Education Specialist Credential Program application;
2. Specify area of authorization (Mild/Moderate, Moderate/Severe, or both)
3. Provide verification that prerequisites have been met;
4. Provide verification of California Basic Educational Skills Test (CBEST) attempt; and
5. Participate in a face to face interview with program faculty.
6. Each applicant will be informed in writing of the decision of the program faculty regarding acceptance into the program shortly after the interview. Upon admission, students are required to meet with assigned program faculty for advisement and may begin taking coursework in Level I in the advised sequence after acceptance into the program.

#### **Requirements: Level I**

1. EDP 480, 405; EDEL 452, 462; EDP 564, 558.
2. Pass CBEST and apply for certificate of clearance prior to field study.
3. Pass Reading Instruction Competency Assessment (RICA) Test prior to field study.
4. EDP 587 A, B or 588 A, B Advanced Field Study and Seminar (A and B at 6 units each)
5. U.S. Constitution Requirement (meet competencies through testing or POSC 100 or 391).

### **Preliminary Level I Education Specialist Intern Option: Mild/Moderate and Moderate/Severe**

Application for admission to the Education Specialist Intern Program should be made the semester before beginning the required courses in Level I. To be considered for admission, candidates must provide verification of the following:

1. Employment by a collaborating school district in a qualifying special education classroom or setting;
2. Subject Matter Competence (completion of an approved waiver program such as CSULB's Liberal Studies degree or passage of the MSAT);
3. Passing score on the CBEST;
4. A GPA of 2.75 in college and university course work (last 60 units).

#### **Prerequisites to Admission**

EDP 350, EDP 405, ETEC 444

To complete the admissions process, students must:

1. Complete and submit the Education Specialist Intern Credential Program application;
2. Specify area of authorization (Mild/Moderate, Moderate/Severe, or both)
3. Participate in oral interview with program faculty.

Upon acceptance, students will complete a program advisement sheet with an advisor and may begin taking prescribed coursework in Level I after acceptance into the program.

#### **Requirements: Level I, Intern Option**

1. EDP 480, 454; EDEL 452, 462; EDP 546D, E, 564, 558.
2. Apply for certificate of clearance prior to field study
3. Pass CBEST and RICA prior to field study.
4. EDP 587 B or 588 B Advanced Field Study and Seminar (6)
5. US Constitution Requirement (meet competencies through testing or POSC 100 or 391)

### **Professional Level II Education Specialist Credential: Mild/Moderate and Moderate/Severe**

Professional Level II Education Specialist Credential preparation is intended to enable new Education Specialist teachers to apply their Level I preparation to the demands of their professional positions while also developing as reflective practitioners in advanced skill areas and knowledge. The Level II program incorporates several courses in the Masters of Science in Special Education program and students are encouraged to complete the M. S. in special education.

#### **Application and Admission**

Candidates are encouraged to apply for admission to the Professional Level II Education Specialist Credential program in the semester immediately prior to their anticipated completion of Level I. The CCTC requires that candidates complete Level II within five years of the completion of Level I. Candidates must be employed for at least 2 years under a Level I credential to be granted a Level II credential. Upon completion of the Level I credential, candidates have 120 days of employment to select a support provider and develop a Level II Individual Induction Plan. To be considered for admission, candidates must provide verification of the following:

## Prerequisite Conditions and Requirements

1. Admission to the University
2. Overall GPA of 2.85 in college and university course work (last 60 units)
3. Completion of Preliminary, Level I Credential or Certificate of Eligibility
4. Employment in a special education position in the area listed on your Level I credential
5. HSC 411 A or B (Health Science requirements)
6. CPR certification  
For students who completed their Level I credential in a program other than the Education Specialist Credential program at CSULB, the following conditions must also be met:
7. Two letters of recommendation (from employer and a university faculty member at previous institution)
8. Interview with program faculty.

## Professional Level II Education Specialist Credential Requirements

1. Complete 546C Practicum in Special Education and complete an Individualized Induction Plan. Select area of emphasis (mild/moderate or moderate/severe); identify specialization and action research focus; and identify non-university activities.
2. Complete the following Core classes: EDP 550 and 535.
3. Complete one Specialization course: EDP 542 or 566
4. Complete one Advanced Specialization course: EDP 563 or 565
5. Participate in an Exit interview with University Faculty Mentor and District Support Provider.

## Resource Specialist Certificate (code 467)

The Resource Specialist Certificate Program is a post-baccalaureate program for professionals who hold a regular teaching credential and a Learning Handicapped, or Severely Handicapped, or the Clinical Rehabilitative Services Credential in Language, Speech and Hearing with the Special Class Authorization. The candidate for this certificate must have had three or more years of teaching experience, including assignments with both students with and without disabilities. Student teaching experience can be counted toward the three-year requirement.

### Requirements

ED P 535, 546B, 570, electives up to 3 units, based on determination of competencies in ED P 546B. (The evaluation process in ED P 546B is a certification of competencies and determination by the Special Education Faculty of the candidate's skills.)

## Administrative Services Credential

Certification of school administrators is established in a two-level Administrative Services Credential.

The Preliminary Administrative Services Certificate (first tier) has no expiration and authorizes the holder to seek an administrative position. The Certificate informs the employing school district/agency of eligibility to serve. The Certificate must be registered with the CCTC at the time the candidate accepts employment as an administrator. The CCTC will then issue the Pre-

liminary Administrative Services Credential authorizing the candidate to serve as an administrator. Once issued, the Preliminary Credential is valid for five (5) years and it is not renewable.

The Professional Administrative Services Credential (second tier) cannot be pursued until the candidate is employed in a position requiring an administrative credential. Once issued it is valid for five years and is renewable subject to fulfillment of professional development requirements.

## Preliminary (code 501)

Certification under this credential authorizes the candidate to serve in any position requiring the Administrative Services Credential. The program is oriented toward the following positions: elementary and secondary principals, assistant principals, supervisors of instruction, curriculum directors, and other building level positions. The program has been revised to meet the new Commission on Teacher Credentialing program standards. Approval pending. See Department for further information.

### Clear Admission

1. Complete the "clear admission" requirements (#'s 1-6) as listed for the MA in Education, Option Educational Administration;
2. Possession of a valid teaching credential, or pupil personnel, or library media teacher, or health services credential, or vocational education instructor's credential, or clinical rehabilitative services credential.

### Requirements

1. EDAD 541, 544, 580, 647, 648, 650, 680, ED P 677, and EDAD 649 or ED P 574. One of the two required field experiences (EDAD 580 or 680) must be during the school day, either during the regular year with time off, or during the summer at a year around school;
2. Passing the CBEST prior to entrance in advanced field experience (EDAD 680). Take CBEST no later than the second available test administrative date following enrollment.

### Exit Requirements

1. Verification of three years of successful experience in a position requiring one of the credentials listed in "Clear Admission", Item 2;
2. Satisfy the state requirement for mainstreaming;
3. Present to program faculty a professional portfolio of course and field experience projects and papers completed during the program which demonstrate candidate competency.

## Professional (code 502)

Certification under the Professional Administrative Services Credential (Tier II) authorizes the candidate to serve in any position requiring the Administrative Services Credential. The professional Credential cannot be pursued until the candidate is employed in a position requiring an administrative credential. The program requirements must be completed within the five year authorization of the Preliminary Administrative Services Credential. Once issued, the Professional Credential is valid for five years and is renewable subject to fulfillment of professional development requirements.

## Prerequisites

1. Possession of a valid Preliminary Administrative Services Credential;
2. Verification of employment by an educational agency in an administrative position.

## Admission

1. Program application and evidence that prerequisites have been met;
2. Copy of transcript verifying a 3.0 minimum overall GPA in most recent thirty (30) semester units of graduate work;
3. Two (2) non-confidential letters of recommendation, one of which must be from the applicant's immediate supervisor;
4. A personal statement (double spaced 2-3 page) regarding your experience and educational background, and your philosophy of educational leadership;
5. Personal interview with the Coordinator of the Professional Administrative Services Credential Program;
6. Employer verification of support for the induction and mentoring program.

## Requirements

The Professional Administrative Services Credential Program has a unique design intended to better meet the needs of the new administrator. The unit requirement ranges from 16-24 semester units, with an option for non-university professional development activities of up to 120 clock hours to substitute for any or all of the 8 elective units. The program has been designed to provide the candidate with professional support through a two (2) unit mentoring and professional development plan. The plan is developed collaboratively by the candidate, the school district mentor, and the University supervisor. The academic core consists of 12 units which must be completed with a grade of B or better. In the final semester there is a two (2) unit candidate assessment conducted through the Portfolio Exhibition. The balance of the program is completed through approved electives and/or professional development plan activities.

1. Individual candidate professional development plan prepared in EDAD 640.
2. The Program includes four (4) components:
  - Mentoring and Professional Development Planning* - 2 units: EDAD 640;
  - Core Courses* - 12 units: EDAD 641, 657, 658, and 659;
  - Electives/Professional Development Plan Activities* - up to 8 units: selected from approved courses throughout the University; EDAD 691 for 1-8 units; and/or up to 120 clock hours of professional development activities to substitute for the 8 elective units. (non-university);
  - Candidate Assessment* - 2 units: EDAD 692.
3. Satisfactory completion of the professional development plan as demonstrated through the Portfolio Exhibition in EDAD 692.
4. Minimum of two years of successful, full-time school administrative experience in the public school, or private school of equivalent status.

## Exit Requirements

1. Provide verification of two years of successful full time experience in a position requiring the Administrative Services Credential;
2. Present to program faculty, school district mentor, and a panel of other candidates a professional portfolio of course and professional development projects, activities, and papers completed during the program which demonstrate candidate competency.

## Library Media Teacher Services Credential (code 700)

The 31 unit program in Library Media prepares students for service as a library media teacher, grades K-12, in the State of California. For additional information go to [www.csulb.edu/programs/LMT](http://www.csulb.edu/programs/LMT).

## Admission

1. Submit a University Application, July 1 for Fall or December 1 for Spring (a maximum of six units may be completed through Open University/Extension Services prior to enrollment into the University);
2. Completion of a bachelor's degree;
3. Possession of a valid California teaching credential;
4. Passage of CBEST;
5. Overall 3.0 GPA in the last 60 semester or 90 quarter units of course work or 3.0 GPA in the completion of first 15 units of basic teaching credential course work;
6. Three letters of recommendation (submit to program advisor or department office prior to screening interview);
7. A one page personal statement (submit to program advisor or department office prior to screening interview);
8. Screening interview.

## Requirements

1. Core Courses (6 units): EDP 677 or equivalent, and EDP 583 or EDEL/EDSE 530 or equivalent;
2. Specialization Courses (21 units): LI 510, 520, 530A, 530B, 540, 550, 570;
3. Field Experience (4 units): LI 580.

A working knowledge of word processing, databases, spreadsheets, desktop publishing, presentation software, Internet searching and e-mail usage is expected.

## Graduate Certificate Community College (code 1-3001)

The community college graduate certificate is designed to prepare graduate students to work in community college settings as teaching faculty or counselors. Courses offered in this program provide students with an overview of the community college and its role in the American higher education system. Students will gain insights and experiences in the classroom and in fieldwork that will strengthen their knowledge and skills in working with community college students, faculty, and staff. The certificate program consists of 18 credits; 9 credits are from the master's degree program and must be approved by the student's master's degree program graduate advisor; and 9 credits are specific to the study of

college students, the community college, and fieldwork. All students will be required to:

1. Be enrolled in a master's degree program or have an earned master's degree in a discipline leading to teaching or counseling in post-secondary education settings.
2. Complete 9 credits of coursework in Educational Psychology: Introduction to the Community College (EDP 552), Students in U.S. Higher Education (EDP548), and a fieldwork class that is counseling or teaching focused (EDP 644B).
3. Complete an additional 9 credit hours approved by their master's degree program graduate advisor for consideration to fulfill the 18 credits required for the certificate. These courses may include pedagogy, learning theory, instructional management, and/or teaching methodology courses in the student's major area of study, or any other courses in the discipline deemed appropriate by the master's degree program graduate advisor.

### Graduate Certificate for Career Guidance Specialist (code 1-3000)

This post-baccalaureate certificate program is planned for counselors and educators with interests in career education and career counseling.

Applicants should be aware that this option is under consideration for suspension or discontinuance and selected courses will not be offered in the 2002-03 academic year.

#### Admission

1. File an "Application for Graduate Admission," along with two complete sets of official transcripts, with the University Office of Admissions no later than March 1 for fall semester or October 1 for spring semester;
2. Transcripts must verify a GPA of 2.85 or higher on the last 60 semester (or 90 quarter) units of course work taken;
3. Evidence of completing at least a baccalaureate degree prior to beginning the Graduate Certificate program;
4. Two letters of recommendation (send only after notification by the program);
5. A type-written personal statement (send only after notification by the program);
6. Screening interview(s) (upon notification by the program);
7. Items 1-5 above must be on file in the department no later than November 1 for the following spring semester, or April 1 for the following fall semester;
8. Applicants are allowed only nine semester units credit applied to curriculum requirements completed prior to admission into the first semester of the program.

#### Requirements

1. 19 core course units: ED P 529, 530, 531, 637, and 643C;
2. Passage of the Writing Proficiency Examination (WPE);
3. Approved electives in the Departments of Educational Psychology, Administration and Counseling; Human Resources Management; Occupational Studies; Psychology or Sociology as needed to fulfill 19 units upon waiver of any core course units granted upon admission to certificate program.

## Departmental Courses

The courses offered by the department align with several academic disciplines and traditions as listed below:

---

### Counseling

---

- EDP 191 Career and Personal Explorations
- EDP 357 Self Management
- EDP 430 Orientation to Counseling
- EDP 501 Foundations of Vocational Rehabilitation
- EDP 502 Vocational Aspects of disability
- EDP 503 Case Management Rehabilitation
- EDP 504 Family Systems Approach to School Discipline Problems
- EDP 505 Job Placement and Independent Living
- EDP 506 Counseling in School Settings
- EDP 510 Laws and Ethics for Counselors
- EDP 511 Counseling the Alcohol/Chemically Dependent Person
- EDP 512 Child and Spousal/Partner Abuse
- EDP 513 Introduction to Clinical Interviewing
- EDP 514 Medications and Counseling
- EDP 515 Counseling Theory
- EDP 516 Counseling the Adult
- EDP 517 Seminar in School Counseling
- EDP 522 Counseling Methods and Techniques
- EDP 529 Assessment in Career Counseling
- EDP 530 Career Development and Decision Theory
- EDP 531 Career Information Resources
- EDP 535 Collaborative Partnerships and Effective Communication in School Settings
- EDP 536 Collaborative Consultation in the Schools
- EDP 538 Student Development in Higher Education
- EDP 543 Human Sexuality Counseling
- EDP 547 Student Development Theory
- EDP 548 Students in U.S. Higher Education
- EDP 549 Management of Student Development in Higher Education
- EDP 552 Introduction to the Community College
- EDP 555 Cross-Cultural Counseling
- EDP 556 Counseling Children and Adolescents
- EDP 557 Counseling Couples
- EDP 580 Vocational Work Evaluation Systems
- EDP 593 Seminar in Professional Development in Counseling and Human Services
- EDP 595 Qualitative Research Methods
- EDP 601 Trauma and Grief counseling
- EDP 607 School Counseling Practicum
- EDP 608 Seminar and Practicum in Marriage and Family Therapy
- EDP 609 MFT Practicum
- EDP 615 Seminar in Home-School – Community Relations
- EDP 634 Family Systems Therapy: Theory and Practice
- EDP 637 Career Counseling Practicum
- EDP 638 Group Counseling
- EDP 639 Seminar in Organization of Pupil Personnel Services
- EDP 643A-D Counseling Field Work
- EDP 644A-D Advanced Counseling Field Work
- EDP 645 Internship in Rehabilitation Counseling
- EDP 692 Special Topics in Counseling
- EDP 693 Advanced Seminar in Professional Development and Counseling
- EDP 695C Seminar in Professional Development in Counseling and Human Services

---

## Educational Administration

---

EDAD 541 Leadership, Decision Making, and Collaboration  
EDAD 544 Legal Aspects of Education: Equity and Access  
EDAD 580 Introduction to Field Experience in Administration  
EDAD 590 Special Problems in Educational Administration

### Educational Administration Courses (EDAD)

---

#### Graduate Division

**541. Leadership, Decision-Making, and Collaboration (3)**  
 Prerequisite: A valid regular teaching credential or 15 upper division or graduate units in education. Leadership theory, styles, skills and their relationship to effective schools. Importance of developing a vision and skills for leading an organization to accomplish goals supportive of academic achievement for all pupils. Decision-making, communication, group dynamics, conflict resolution, and collaboration. Participate in a personal assessment, develop a philosophy and vision statement, a professional and academic plan, and begin a professional portfolio to demonstrate educational leadership competence.

**544. Legal Aspects of Education: Equity and Access (3)**  
 Prerequisite: EDAD 541. Study of school law with particular emphasis on California law, as set forth in the State and Federal Constitutions, statutes, judicial decisions, and in the rules and regulations of the U.S. Department of Education, California Department of Education and local units of administration.

**580. Introduction to Field Experience in Administration (3)**  
 Prerequisite: Approval by the Program Coordinator, Department of Educational Psychology, Administration and Counseling. Written application should be made by October 1 for the spring semester and March 1 for the fall semester. This is the first of two on-the-job experiences involving the student in the solution of problems in administration and supervision at the elementary and secondary levels. The course requires 100 hours of field experiences at the Candidate's school site. Credit/No Credit grading only.

**590. Special Problems in Educational Administration (1-3)**  
 Prerequisite: Enrollment limited to graduate students who hold a standard teaching credential and consent of instructor. Advanced study in educational administration within an area of specialization done on experimental, research and/or seminar basis. Area will be designated by department at the time course is scheduled. A student may enroll for one-three units to a maximum of 6 units for certificate and degree purposes, subject to suitable change in course content. Non-degree and non-certificate students may enroll for additional units subject to suitable change in course content.

#### 597A,B,C. Directed Study (1,2,3)

Prerequisite: Approval of program coordinator and Graduate Studies Office. Application for enrollment must be made to the Office of Graduate Studies by March 1 for the summer or fall semester or by October 1 for the spring semester. Individual creative activity; projects, surveys, intensive reading; practical and action research in an area significant to the field of educational administration. Could also involve small group activity focused on an educational problem or issue. May be repeated for a maximum of six units, with no more than three units in one semester or for degree purposes.

#### 640. Mentoring and Professional Development Planning for the New Administrator (2)

Prerequisite: Admission to EDAD Professional Administrative Services Program. The candidate, the University supervisor, and the school district mentor work together to develop an individualized induction plan for the support and professional development of the beginning administrator. The plan is based on a pre-assessment of the candidate's skills and competence. The plan includes a mentoring component, portfolio, academic course work, and optional non-university based professional development activities. Emphasis is placed on preparation to provide leadership in socioculturally diverse schools. Credit/No Credit grading only.

#### 641. Advanced Instructional Leadership (3)

Prerequisite: EDAD 640. A major intent of the course is to guide instructional leaders in broadening their theoretical knowledge of transformational pedagogy (transformative theories based on constructivism, critical, and affective pedagogies, and in applying these transformative constructs to structure schools for student success. The course is designed to present a holistic approach to educational leadership and curricular decision-making through the integration of the major themes: 1) organizational and cultural environment, 2) ethical and reflective leadership, and 3) management and information systems.

#### 647. Human and Financial Resources (3)

Prerequisite: EDAD 541. Examine civil service systems, study the role and structure of personnel administration used in public school education. Review bureaucracy, rules and regulations, limitations in hiring and firing, PERB decisions, case law; labor contracts and limitations imposed by those contracts. Examine the costs associated with human resources and other fiscal infrastructure costs associated with the provision of free public education in California. Traditional grading only. (Lecture 2 hours; Lab 2 hours.)

---

## Educational Administration Courses (EDAD)

---

### 648. Schools as Organizations: Development, Management, and Assessment (3)

Prerequisite: EDAD 541. Concepts and skills of managing educational organizations. Decision making, conflict management, motivation, leadership, team building, communication, planning, and organizational change, culture and renewal. Perspectives and analysis of complex organizations and the theoretical and conceptual advances in the field

### 649. Urban Schools and the Community: Social, Political, Policy Issues (3)

Examination of characteristics of urban schools and the diversity of student populations and attitudes towards them. Study of the social, political, cultural forces impacting schools. Study of school programs and community collaboratives for delivering instruction and services which lead to safe, effective urban schools.

### 650. Instructional Leadership and Assessment (3)

Prerequisite: Admission to MA and/or Preliminary Administrative Services Credential program. Examine instructional leadership practices which have been proven successful in maximizing achievement for all students in urban schools. Examples of such practices included: working with teachers to develop a learning community which values diversity and provides powerful learning experiences based on knowledge of constructivist pedagogy, cognitive and language development; planning and utilizing valid and reliable assessments of student progress; utilizing instructional supervision models which provide for formative evaluation of teachers; planning and implementing staff development.

### 657. Practical Application of Human and Fiscal Resources (3)

Prerequisite: EDAD 640. Examination and application of principles, practices, procedures and guidelines affecting the management of fiscal and human resources, and information systems in public education. Course will include labor relations, collective bargaining, contract management, staffing, and budgeting issues.

### 658. Organizational Development, Culture, and Change (3)

Prerequisite: EDAD 640. An examination of the current and historical contexts of schooling; macro and micro factors and conditions that influence schools as organizations; moral and ethical leadership principles; and the application and management of change to improve the cultural and organizational environments of schools.

### 659. Educational Governance, Politics and Policy (3)

Prerequisite: EDAD 640. A critical examination of the moral and ethical dimensions of schooling, policies related to equity and access issues, political, economic, and legal perspectives and how they influence educational organizations, and the effects of collaborative leadership models on evolving school governance systems.

### 680. Advanced Field Experience in Administration (3)

Prerequisites: EDAD 541, approval by the Coordinator of Educational Administration, successful completion of EDAD 580. Application should be made by March 1 for the fall semester and October 1 for the spring semester. This is the second of two on-the-job experiences involving the student in the solution of problems in administration and supervision at the elementary and secondary levels. The course requires three weeks of full time field experiences completed at a location other than the candidate's school site. Credit/No Credit grading only.

### 691. Educational Administration Professional Development (1-8)

Prerequisite: EDAD 640. Participation in field-based professional development activities as specified in the candidate's individual Professional Development Plan created and approved in EDAD 690. One unit credit may be granted for 15 contact hours of professional development activity. Course may be repeated to a maximum of 8 units. Credit/No Credit grading only.

### 692. Administrator Portfolio Development and Exhibition (2)

Prerequisite: Completion of the Professional Development Plan, including the core courses, electives and/or professional develop-

ment activities. Presentation of the candidate's Professional Portfolio consisting of academic course accomplishments such as papers, projects action research; a personal mission statement; a reflective journal and/or artifacts which portray accomplishments in the administrative work setting, mentor involvement, and optional professional development activities completed during the credential program. The presentation will be made to the instructor, the school district mentor, and a panel of other candidates. Credit/No Credit grading only.

### 693. Developing Teacher Leadership in Middle Level Education (3)

Prerequisite: Students must be enrolled in either a Teacher Education Masters Program, or the Tier II Professional Administrative Services Credential Program, or have the permission of the instructor. Contemporary research on effective schools identifies teacher empowerment as critical to school improvement and success. This course will involve administrators and teachers in developing middle level teacher leadership. Students will learn and practice collaborative and action research models. Traditional grading only. Same course as EDEL 693 and EDMS 693.

### 695. Masters Project in Educational Administration (3)

Prerequisites: Advancement to candidacy in Educational Administration Option, approval of graduate advisor, and written application to the Graduate Office. Application for enrollment must be made to the Graduate Office by March 1 for the summer or fall semester or October 1 for the spring semester. Study and analysis in the field of educational administration including use of archival data and public records at university, district, and school sites; development of a culminating masters project which can take any of the following forms: 1) utilize action based research to examine a school/district-based problem and recommend resolution to the problem; or 2) develop a position paper, issue paper, or policy recommendation. (Not open to students pursuing the thesis option.) Course may be repeated to a maximum of 6 units.

### 697. Directed Research (1-3)

Prerequisites: Consent of instructor, department chair and associate dean. Individual research or intensive study under the guidance of a faculty member. A student may enroll for one-three units to a maximum of three units for certificate and degree purposes, subject to suitable change in course content. Application for enrollment must be made by March 1 for the fall semester or by October 1 for spring.

### 698. Thesis (3,3)

Prerequisites: Advancement to candidacy, ED P 595 or 696, approval by director, department chair and associate dean. Planning, preparation and completion of a thesis under supervision of a faculty committee. Must be taken for six units. Application for enrollment must be made to the Graduate Studies Office by March 1 for the fall semester or summer session or October 1 for the spring semester.

---

## Educational Psychology Courses (EDP)

---

### Lower Division

#### 180. Family School Partnerships (3)

This course is designed to introduce students to various current family, school, and community partnership models and approaches. Students will acquire knowledge and skills toward fostering two-way partnerships with families and communities of diverse backgrounds and develop historical, legal, social, and political perspectives regarding educational access and equity for diverse student populations found in contemporary classrooms. Teacher candidates will also broaden their knowledge and understanding of ethnically and linguistically diverse families and communities to be more effective in building relationships with them.

#### 190. Current Topics in Education (1-3)

Orientation to and exploration of topics relevant to the college student as a learner-scholar and decision-maker within the changing campus, community and societal milieu. Lectures, discussion, field study. May be repeated under different topics for a maximum of six units. Topics will be announced in the *Schedule of Classes*.

### 191. Career and Personal Explorations (3)

Prerequisite or Corequisite: Any foundation (G.E. Category A1, A2, A3, or B2) class. Not open to students with credit in EDP 360I. A course designed for, but not limited to, entering and undeclared students. An exploration of the issues, topics and tasks related to personal, educational and career choices. Includes educational and career planning, exploration of personal characteristics and individual differences, life and work values and interests, decision making, goal setting, and job/career search preparation.

### 192. Learning Strategies and Study Skills (3)

Determination of individual cognitive (learning) style preferences and development of strategies to use the preferred style in the educational and work environment. Identify and implement study and life skills and habits which facilitate the effective use of the preferred cognitive style.

## Upper Division

### 301. Child Development and Learning: A Cross-Cultural Perspective (1-3)

Explores the physical, cognitive, communicative/linguistic, and socio-emotional development of the child from the prenatal to adolescent period across diverse cultures with an emphasis on the learning process.

### 302. Early and Late Adolescent Development: A Cross-Cultural Perspective (3)

Explores the social, emotional, cognitive, and physical development of early and late adolescents across diverse cultures.

### 305. Educational Psychology (3)

Modifiability and educability of the human organism at different levels of maturity; psychology of learning applied to teaching.

### 350. Education of Exceptional Individuals (3)

Survey of the education of individuals who have communication disabilities, visual disabilities, hearing disabilities, physical disabilities, learning disabilities, severe disabilities, and those labeled as gifted and talented. Field work.

### 357. Self-Management (3)

(Not open to students with credit in PSY 357.) Prerequisite: PSY 100. Introduction to theory, research and application of self-management procedures. Methods for integrating and managing the cognitive, emotional, behavioral, and physiological aspects of an individual will be discussed. Topics will include systematic self-observation, career decision-making, interpersonal relations, time management, stress and emotion management, and habit change and maintenance.

### 360I. Life and Career Decisions (3)

Prerequisites: Completion of GE Foundation requirements, one or more Explorations courses, and upper-division standing. Not open to students with credit in EDP 191. The course content will cover self-awareness (locus-of-control, personal characteristics, life values, etc.), personal styles and preferences (study and work skills and preferences), analysis of educational progress, decision making, selecting a major, and selecting a career. A series of assessments and assignments will be used to explore each of these areas. This course is designed to assist juniors and seniors who are undeclared majors or who have declared a major but are unsure that their choice of major is the right one for them. Traditional grading only.

### 373I. Nonverbal Communication: Interaction of Mind and Body (3)

Prerequisites: Completion of GE Foundation requirements, completion of one or more Exploration course(s), and upper division status. History and theories of the development of mind/body integration. Enhancement of personal and interpersonal relations through lectures, discussion, films, and movement experiences. Analysis and synthesis of the interdependence of the psychological and physical processes in nonverbal communication. Same course as DANC 373I.

### 390. Current Topics in Education (1-3)

Orientation to and exploration of topics relevant to the college student as a learner-scholar and decision-maker within the changing campus, community and societal milieu. Lectures, discussion, field study. May be repeated under different topics for a maximum of six units. Topics will be announced in the *Schedule of Classes*.

### \*400. Introduction to Educational Measurement and Statistics (3)

An introductory course in educational testing and measurement and statistical concepts that support these methods. Basic concepts of measurement including descriptive statistics, norms, reliability, and validity; correlation and simple regression; derived and transformed scores, issues related to the development of educational measures; interpretation of test scores. This course may not be used as a substitute for EDP 419 or 420.

### \*405. Positive Strategies for Classroom Management (3)

Applications of existing models and strategies of classroom management to promote student prosocial behaviors and academic growth and development. Includes information regarding functional analysis, hypothesis testing, instruction of alternative behaviors, crisis management and program modification in school settings.

### \*419. Educational Statistics (3)

Prerequisite: Satisfactory completion of an undergraduate mathematics course suitable for general education math credit and, if required by the major, a lower division statistics course. Introduction to descriptive and inferential statistical methods with application to educational research problems. Emphasis upon understanding statistical concepts, computation skills, and the use of computer programs in data analysis (Lecture 2 hours, laboratory 2 hours).

### \*420. Tests, Measurements and Evaluations (3)

Prerequisite: ED P 419. Determination, meaning and use of fundamental statistical concepts applied to problems of measurement and evaluation; construction, interpretation and use of standardized and teacher-made tests.

### 428. Language, Learning and the Developing Child: A Cross-Cultural Perspective (3)

Explores the communicative-linguistic, cognitive, physical, and socio-emotional development of the child from the prenatal to adolescent period across diverse cultures with an emphasis on language acquisition and the learning process. Traditional grading only. Not open to students currently enrolled in the Liberal Studies program. (Same course as LING 429, FCS 409, and EDEL 429).

### \*430. Orientation to Counseling (3)

A survey of the specialties, functions, roles, models and activities commonly employed in the counseling profession. The course will also include practice in rudimentary active listening skills, a survey of historical and conceptual frameworks, voluntary participation in community-educational services, and developing a professional orientation perspective, and exploring the special needs of clients and other professional considerations.

### 431. Cultural and Linguistic Diversity in Schools (3)

This course addresses multiple forms of diversity present in schools, including issues surrounding culture, ethnicity, race, language, faith, special needs, gender, sexual orientation, and socio-economic difference. Emphasis is on multicultural education, language minority education, and the promotion of learning for all students. The course treats concepts of culture, education equity, stereotyping, and cultural and linguistic contact. History, policy and practice regarding cultural and linguistic minorities in the United States. Models of English Language Development and bilingual education. Special focus on educational initiatives to address the rich ethnic diversity of California schools. Not open to Liberal Studies majors. Traditional grading only. Same course as EDEL 431 and LING 431.

---

## Educational Psychology Courses (EDP)

---

### \*432. Social and Cultural Diversity in Educational Settings (3)

Experiential opportunity to examine personal attitudes toward distinct groups of persons, to develop multicultural competencies, and examine racism. Study of cultural, historical, social, and psychological factors that promote equal human worth. Same course as EDEL 430.

### 439. SDAIE: Specially Designed Academic Instruction in English (3)

Theories of second language acquisition and practical application: methods of teaching content to English language learners, reading and writing strategies, and curriculum development with application to K-12. Traditional grading only. Same course as EDEL 439 and EDSE 439.

### \*454. Development of Communication Skills in Bilingual Contexts (3)

Prerequisite: Consent of instructor. Normal and atypical development of language skills in school-aged children from non-English language backgrounds. Focus on the skills needed in the classroom, including communicative competence, pragmatics and literacy. Distinguishing between normal language development and linguistic problems.

### 480. Foundations of Inclusive Education in a Diverse Society: Philosophical and Historical Perspectives and Legal Mandates (3)

Prerequisites: Admission to Education Specialist credential program. Introduction to the philosophical and historical foundations of special education in a diverse society. Examination and discussion of educational theories, philosophies, models, legal mandates, and traditions of inclusive education. Discussion of impact of contemporary school practices on students with disabilities and their families. Traditional grading only.

### \*485. Theoretical Foundations of Language Minority Education (3)

Introduction to theoretical foundations of language minority instruction. Background on the historical and political context of the development of educational language policies. Same course as LING 485. Traditional grading only.

### \*490. Special Topics in Educational Psychology (1-6)

Prerequisite: Consent of instructor. Topics of current interest in educational psychology selected for intensive study. May be repeated under different topics for a maximum of six units. Topics will be announced in the Schedule of Classes.

### 492. Internships in the Human Services (3)

Prerequisite: Consent of instructor. Students in any major are placed in agencies and organizations to engage in volunteer or paid work in human services/mental health. The required fifteen hour seminar will focus on personal values, interpersonal communications skills, critical thinking, and problem solving as they relate to the students' field placement. Development of knowledge and skills transferable to future careers will be stressed. A minimum of 120 hours field experience is required for the semester.

### \*497. Independent Study (1-3)

Prerequisites: Consent of instructor and department chair. Independent study undertaken under the supervision of a faculty member. May be repeated for credit to a maximum of six units, with no more than three units applicable to credential or major requirement.

## Graduate Division

### 500. Educational Research (3)

Prerequisite: ED P 400. Types and applications of educational research, research design, problems of internal and external validity, uses of research resources, and critiques of research studies. Recommended to be taken early in a master's degree program.

### 501. Foundations of Vocational Rehabilitation (3)

History, philosophy, and legislation of rehabilitation affecting people with disabilities served by public and private rehabilitation delivery systems.

### 502. Vocational Aspects of Disability (3)

Prerequisite: ED P 501. Medical, psychological, and sociocultural aspects of disabling conditions related to vocational activities. Emphasizes identification of functional limitations, attitudinal barriers to employment, and methods of remediating handicapping conditions.

### 503. Case Management in Rehabilitation (3)

Prerequisite: ED P 502. Techniques and methods of information processing, service arrangement, program monitoring, and overall management of client services and client caseload. Designed to meet certification requirements for rehabilitation counselors.

### 504. A Family Systems Approach to School Discipline Problems (3)

Designed to help teachers and parents develop appropriate student behavior. A communications based family systems approach to discipline.

### 505. Job Placement and Independent Living (3)

Job seeking skills, job development and placement methods, supported employment, and employer concerns. Employability and placeability issues are examined in relation to independent living and job placement services.

### 506. Counseling in School Settings (3)

Prerequisite: Official admission to the School Counseling Program and/or permission of instructor. An overview of issues related to school counseling and the role of the professional school counselor. Includes a practicum component designed to develop counseling skills and promote helping relationships. Field experiences are required. School Counseling students are expected to take this course in their first semester in the program. Traditional grading only.

### 510. Laws and Ethics for Counselors (3)

Prerequisites: ED P 430 and/or consent of instructor. Examines laws governing the professional aspects of counseling. Included are the legal and ethical considerations of the practice of family/child and clinical community counseling services. The emphasis will focus on clinical practice.

### 511. Counseling the Alcohol/ Chemically Dependent Person (2)

Survey of the theories, etiologies, and major treatment approaches for counseling and preventing alcohol and chemical dependency, and the role of family and community resources, referrals, and prevention programs.

### 512. Child and Spousal/Partner Abuse (1)

Child and spousal/partner abuse assessment indicators, laws, community resources, mandatory reporting requirements for child abuse and spousal/partner violence, assessment, detection, and interventions for the child, family, spouse/partner, and the offender. Designed for licensure requirements for mental health practitioners and graduate students.

### 513. Introduction to Clinical Interviewing (3)

Theoretical bases and applications in the conduct of problem identification and diagnostic interviewing in career, clinical, college, school, and vocational rehabilitation counseling settings.

### 514. Medication and Counseling (2)

Prerequisites: EDP 513 or Consent of Instructor. An examination of the categories of psychotropic medications: antidepressants including antipsychotics, anxiolytics, and mood stabilizers. Major side-effects of these medications and a brief overview of their medical management are reviewed. Herbal alternatives to pharmacologic agents will be explored. Identification of information resources for counselors and clients. Traditional grading only.

### 515. Counseling Theory (3)

Prerequisite or Corequisite: EDP 430. Major counseling theories examined and the competencies of each developed for use in helping relationships.

**516. Counseling the Adult (3)**

Prerequisite: ED P 515. Theory and practice of counseling and guidance of the adult.

**517. Seminar in School Counseling (3)**

Prerequisite: ED P 515. Theory, research and techniques of counseling; use and analysis of case studies. Clinical work is required. (Not open to students with credit in ED P 631.)

**519. Quantitative Educational Data Analysis I (3)**

Prerequisites: EDP 419 and 420 or equivalent. An advanced educational univariate data analysis course: hypothesis testing using analysis of variance, analysis of covariance, multiple regression, and path analysis. Traditional grading only.

**520. Research Methods in Education (3)**

Prerequisites: For majors in Educational Psychology: EDP 419 and 420, or equivalents. For other majors, with approval of program advisor: EDP 400 or equivalent. Examination and application of educational research methodology including various types of qualitative and quantitative methods, research designs, sampling methods, inferential statistics and hypothesis testing, and the structure and content of a research proposal. Traditional grading only.

**522. Counseling Methods and Techniques (3)**

Prerequisites/Corequisites: EDP 513, 515. An applied course which provides practice in the methods and techniques of the major theoretical approaches employed in counseling.

**524. Individual Intelligence Testing (4)**

Prerequisite: ED P 420. Practice in administration and interpretation of individual intelligence tests. Students will administer practice tests to adults and children, be observed for proficiency, and test clinic cases. (Lecture 3 hrs, lab 3 hrs.)

**525. Psychoeducational Diagnosis in Multicultural Settings (4)**

Prerequisite: EDP 524. Theory and practice of assessment of individuals with an emphasis on the linguistically and culturally diverse. Application of assessment results to regular and special education programs. (Lecture 3 hrs., lab 3 hrs.) May only be offered in the Spring semester. Traditional grading only.

**527. Clinical Practice in School Psychology (3)**

Prerequisites: ED P 525, and concurrent enrollment in ED P 642A. Diagnostic and remedial techniques with individuals, including those with learning disabilities and those with low-incidence exceptionalities. Discussion of problems and solutions in school psychology practice.

**528. Orientation to Professional School Psychology (3)**

Prerequisites: Admittance to the School Psychologist Program; EDP 515. Introduction to the field of school psychology. History of the field, orientation to public education, roles and functions, laws and ethics, research base, organization and supervision, social and cultural influences, service delivery models, and current literature will be discussed.

**529. Assessment in Career Counseling (3)**

Prerequisite: ED P 420 or equivalent or consent of instructor. The selection, administration, scoring, and interpretation of assessment instruments in career counseling. Assessment areas include interests, values, personal characteristics, and aptitudes and abilities. Techniques for developing and using special assessment instruments will also be covered.

**530. Career Development and Decision Theory (3)**

Emphasis on life planning concepts as related to the world of work, theories of career development and the career decision process.

**531. Career Information Resources (3)**

Knowledge, use and management of information resources in the career development field.

**535. Collaborative Partnerships and Effective Communication in School Settings (3)**

Prerequisites: Completion of Level I of the Education Specialist Credential Program, development of an Individualized Induction Plan, or consent of instructor. Methods for developing collabora-

tive partnerships and effectively communicating with educators, community members, families, and individuals with disabilities. Traditional grading only.

**536. Collaborative Consultation in the Schools (3)**

Prerequisites/Corequisites: EDP 642A, 642B, 643A, 644A, or Field Placement in Special Education. Theory and practice of collaborative consultation in the schools. Models, roles and skills will be discussed, rehearsed during in-class simulations, and practiced in field settings. Field experiences are required.

**538. Student Development in Higher Education (3)**

Survey of student development in public and private colleges and universities, focusing on historical, philosophical and theoretical foundations; roles and functions; legal, ethical, and organizational issues.

**541. Seminar in Educational Measurement and Assessment (3)**

Prerequisites: EDP 419, 420, 519, and 520 or equivalents. Advanced studies examining the reliability and validity of test scores, item response theory, and other statistical approaches for the improvement of educational testing, and practical application of administration and interpretation of assessment outcomes. Traditional grading only.

**542. Assistive Technology and Augmentative Communication (3)**

Prerequisite: Completion of Level I of the Education Specialist Program, development of an Individualized Induction Plan, or consent of instructor. Overview of assistive technology and augmentative communication for individuals with exceptional needs. Examination of legislation, devices, and services using assistive technology and augmentation. Advanced development of computer assisted instruction across the curriculum for individuals with exceptional needs. Introduction to assistive technology assessment. Principles of augmentative communication systems. Traditional grading only.

**543. Human Sexuality Counseling (3)**

Prerequisite: ED P 515. Training in human sexuality education, counseling, and therapy. An examination of personal attitudes and values. The study of the physiological, psychological, and socio-cultural variables associated with sexual behavior, sexual identity, and sexual disorders. For MFCC certification only.

**546A,B,C,D,E,F. Practicum in Special Education (3,3,3,3,3,3)**

Prerequisites:

A. EDP 350 and consent of instructor; for the M.S. in Special Education.

B. EDP 350 and consent of instructor; for the Resource Specialist Certificate.

C. Completion of Education Specialist Credential Program Level I, or Certificate of Eligibility and consent of instructor; for the Education Specialist Credential Program, Level II.

D. For Education Specialist Intern Program, Level I (first semester)

E. Level I (first semester) & EDP 546D; for the Education Specialist Intern Program, Level I (second semester).

F. Level I (second semester) & EDP 546E; for the Education Specialist Intern Program, Level I (third semester).

Supervised experience with individuals with exceptionalities in schools, clinics, post-secondary education, workplaces, and residential settings. Application should be made by March 1 for the fall semester and October 1 for the spring semester. Traditional grading only.

**547. Student Development Theory in Higher Education: Theory to Practice (3)**

Prerequisite: EDP 538. This course will explore student development theory and the application of theory to practice for programs and services in student affairs/higher education. Students will examine cognitive, psychosocial, topology, and person/environment theories and their application to traditional and non-traditional student populations. Critiques of these models for viability and usefulness with diverse student populations will be considered. Program models that allow for the translation of theory to practice will guide students in designing an effective program for college student populations as a requirement for this class. Traditional grading only.

---

## Educational Psychology Courses (EDP)

---

### 548. Students in U. S. Higher Education (3)

Prerequisite: ED P 538. Focus on the concepts of community and culture in the United States college with an emphasis on understanding the diversity of the student population to include age, gender, ethnic culture, sexual orientation, and people with disabilities.

### 549. Management of Student Development in Higher Education (3)

An analysis of the management and organizational theory and practice as it pertains to student development in higher education. Includes study of human and physical resources management.

### 550. Emerging Perspectives in Special Education (3)

Prerequisite: Completion of Level I of the Educational Specialist Program, development of an Individualized Induction Plan, or consent of instructor. Interpretation and application of emerging research in special education. Historical foundations, litigation, legislation, policy and practice in special education, emphasizing the last century. Current and emerging issues in the field, and the relationships between research and practice. Traditional grading only.

### 552. Introduction to the Community (3)

Prerequisite: Enrollment in M.A., M.S. or Credential Programs. An introduction, orientation, and survey of the California and American community college. Components and modules include teaching and learning, leadership and governance issues, organization and administration, student development, classroom research, institutional resources, and student diversity and equity in the community college. Traditional grading only.

### 554. Principles of Educational Remediation (3)

Prerequisite: Admission to the special education credential program, learning handicapped. Analysis of theories and assumptions underlying definitions and etiologies of learning handicaps and models of remedial intervention. Implications of current research for the selection and implementation of materials and classroom management and instructional methods.

### 555. Cross-Cultural Counseling (3)

Prerequisite: EDP 515 or consent of instructor. Examination of discriminatory attitudes and practices including historical antecedents. Problems of minorities in cross cultural counseling. Psychological, sociological, cultural, and educational concerns regarding counseling of multicultural populations.

### 556. Counseling Children and Adolescents (3)

Prerequisites: EDP 515 and 522, or consent of instructor. Theories and application of the methods and techniques of the major theoretical approaches employed in counseling children and adolescents.

### 557. Counseling Couples (3)

Prerequisites: EDP 515. Couple development theories, issues, and practices pertaining to counseling couples. Traditional grading only.

### 558. Curriculum and Instruction for Students with Disabilities (3)

Prerequisites: Full admission to the Level I Education Specialist Credential program or Education Specialist Intern program or acceptance in the Integrated Teacher Education Program - Education Specialist option and completion of or concurrent enrollment in EDP 564. Curricular issues, models and practices for students with disabilities. Emphasis on core curriculum in public schools and appropriate modifications and delivery of content to students with disabilities. Additional emphasis on effective instructional practices and methods for use with students with disabilities. Individualized instructional planning procedures, validated instructional strategies, and collaborative teaching are emphasized. Traditional grading only.

### 560. Behavioral Analysis and Positive Behavioral Interventions (3)

Prerequisite: Admission to the field work (internship) in school psychology (EDP 642 A or B) or consent of instructor. Multi-

dimensional and functional assessments of student behavioral problems. Developing data-based positive behavioral interventions for students with severe behavioral difficulties, including students with TBI, Autism, ED, etc. Credit/No Credit grading only.

### 561. Individuals with Severe Handicaps (3)

Prerequisite: Admission to Special Education Specialist credential, Severely Handicapped. Assessment of developmental and learning disabilities relating to etiology and diagnosis in individuals with severe handicaps. Identification of theoretical frameworks, current issues and practices. Utilization of research findings in curriculum development and program implementation.

### 563. Advanced Methods of Teaching Individuals with Significant Disabilities (3)

Prerequisite: Completion of Level I of the Educational Specialist Program, development of an Individualized Induction Plan, or consent of instructor. This course will focus on the utilization of formal and informal assessment procedures that are responsive to the cultural, socio-economic and linguistic characteristics of individual students with disabilities; the use of data-based decision making; the acquisition of knowledge and skills necessary to adapt, modify and integrate curriculum; implementation of systems to provide academic and social skill instruction to students with disabilities; and collaboration with community agencies for successful transition from school to work.

### 564. Assessment and Evaluation of Students with Disabilities (3)

Prerequisites: Admission to the Education Specialist Credential program, EDP 350, 405, 480, or consent of instructor. Knowledge of appropriate use of formal, informal and authentic assessment procedures for planning, monitoring and evaluating instructional programs for students with disabilities. Emphasis on issues in assessing and evaluating culturally and linguistically diverse students.

### 565. Advanced Methods of Teaching Individuals with Mild/Moderate Disabilities (3)

Prerequisites: Completion of Level I of the Educational Specialist Program, development of an Individualized Induction Plan, or consent of instructor. Advanced assessment, methods, strategies, and curriculum adaptations for students with mild/moderate disabilities at all levels. Emphasis on collaboration, diversity, literacy, technology and transition. Traditional grading only.

### 566. Career Planning and Transition for Youth and Adults with Disabilities (3)

Prerequisites: Completion of Level I of the Educational Specialist Program, development of an Individualized Induction Plan, or consent of instructor. Examination of various models for and approaches to providing career educational and transition services to persons with disabilities. Traditional grading only.

### 567. Curriculum Models and Practices for Learners with Disabilities (3)

Prerequisites: Admission to Education Specialist credential program and completion of regular education methods coursework or equivalent. Curricular issues, models and practices for students with disabilities. Emphasis will be placed on core curriculum in the public schools and appropriate modifications and delivery of content to students with disabilities. Traditional grading only.

### 569. Effective Instructional Strategies for Learners with Disabilities (3)

Prerequisites: Admission to Education Specialist credential program, completion of regular education methods coursework or equivalent and completion of EDP 567. Effective instructional practices and methods for use with learners with disabilities. Emphasis placed upon individualized instructional planning procedures, validated instructional strategies, and collaborative teaching for students with disabilities. Traditional grading only.

### 570. Role of the Resource Specialist (3)

Prerequisite: ED P 350. The concepts of the resource program as related to the aspects of consultation, program coordination, legal consideration, staff development and parent education pro-

grams. Instruction in developmental processes and skills for planning individual programs for students with special needs.

**573. Intercultural Communication in Education (3)**

Analysis of patterns and functions of communication in the classroom and school from the perspective of intercultural communication; structures of participation; communication and social structure; communicative events and interaction; attitudes toward languages and language skills in school contexts; comparison of school and community styles and expectations regarding communication. Course fulfills a requirement for the Supplementary Authorization in Teaching English as a Second Language.

**574. Sociological Foundations of Education (3)**

Relationships between society and the schools; local/national ideologies and political/economic influences; education as a social function; current trends and issues as they affect education. (Not open to students with credit in ED P 480.)

**575. Intellectual Foundations of Educational Reforms, 19th Century to Present (3)**

Historical survey of the intellectual and ideological foundations of educational reform movements in the United States, with emphasis from the late 19th century to present. Focus on individual educational philosophers and on major curriculum orientations; comparison of the major educational ideologies; canons for basic mass literacy education versus elite education are compared, with consideration of their impact on diverse groups.

**576. Education and Diversity: Historical and Contemporary Perspectives (3)**

Major themes in the history of education from the perspectives of ethnic, racial, linguistic diversity, and gender in the United States and in California with an emphasis on the 19th and 20th centuries; survey of educational approaches for diversity; focus on the experiences of various groups; examination of the implications of major educational ideologies, policies and curriculum movements for various groups.

**577. Educational Linguistics (3)**

Prerequisites: Six units in linguistics or permission of instructor. A graduate introduction to the role of language and linguistics in contemporary education; analysis of the context of language acquisition; attitudes toward multilingualism; language policies which set guidelines and expectations for instruction; cultural factors which influence language acquisition. Same course as LING 500.

**578. Literacy and Linguistics (3)**

Prerequisites: Six units in linguistics or permission of instructor. This course provides a general introduction to the field of literacy studies from a linguistic and sociocultural perspective. Among the major topics presented are the relationship between oral and written language; the relationship between literacy and socioeconomic/sociocultural factors; and the impact of societal expectations regarding literacy. Pedagogical implications of these issues are explored. Same course as LING 575.

**579A. Curriculum-based Strategies for Individuals with Learning Handicaps (4)**

Effective instructional strategies for diverse learners, including students with disabilities. Emphasis will be placed on on-going curricular-based assessments and their usefulness in identifying and maintaining effective academic interventions. Students will apply these skills in the Educational Psychology Clinic by problem-solving for clients who are experiencing academic failure. May only be offered in the Spring semester. (lecture 3 hrs, lab 3 hrs) Traditional grading only.

**579B. Instructional Strategies for Individuals with Severe Handicaps (3)**

Prerequisites: Admission to the Special Education Specialist Credential, Severely Handicapped, or School Psychologist Credential, and ED P 525 or 564. Development and implementation of effective instruction for individuals with severe handicaps. Demonstration and application of clinical strategies with students with severe handicaps. Twenty (20) hours of field work required. (Course held off campus.)

**580. Vocational Work Evaluation Systems (3)**

Prerequisites: ED P 430, 529. Concepts and processes of vocational work evaluation systems as they pertain to the assessment of occupationally disabled clientele. The role and functions of work evaluators in industry, private and public vocational rehabilitation agencies, schools, and personnel/training activities will be examined in regard to their theoretical and situational applications.

**582. Comparative International Education (3)**

An overview of education in selected countries; a study of institutional organization, as well as issues which develop in particular social, economic, and political contexts; an examination of types of educational problems and solutions which are commonly shared. Traditional grading only.

**583. Global Education (3)**

Background on critical world issues and cultural influences, as well as methods and resources for application in the classroom. Format includes resource speakers and practitioners, map activities, and cultural simulation exercises. Traditional grading only.

**586B,C. Field Study with Students with Disabilities (7,7)**

Prerequisites: Admission to the Learning or Severely Handicapped Special Education Specialist Credential and demonstration of specified competencies.

**B. Learning Handicapped**

**C. Severely Handicapped**

Application for admission should be made by March 1 for the summer session and fall semester and October 1 for the spring semester. Advanced field study including student teaching in a public or private school or facility serving individuals with disabilities. Students will be assigned to field sites five days a week or demonstrate competencies in their own classroom under an emergency credential, for the equivalent of one semester, under the supervision of a field-site specialist.

Opportunities will be provided for the student to demonstrate competencies in (1) the analysis and evaluation of all program elements; (2) the application of appropriate intervention to extend interaction among individuals with disabilities and their peers; (3) planning and conducting parent meetings; (4) utilization of ethical practices in communication to others about individuals with disabilities; and (5) the initiation and pursuit of a program of self-assessment and professional improvement. Credit/No Credit grading only. Both "B" and "C" courses may be repeated for a maximum of 14 units.

**587A. Advanced Field Study and Seminar: Education Specialist Credential in Mild/Moderate Disabilities (6)**

Prerequisite: Admission to the Level I Education Specialist Credential in Mild/Moderate Disabilities. Must complete all Level I courses or be concurrently enrolled in EDP 569. Application for admission should be made by March 1 for the summer and fall semester and October 1 for the spring semester. Advanced field study in a public or private school or community based site serving individuals with mild/moderate disabilities. Candidates will be assigned to field sites five days a week with a master teacher or demonstrate competencies in their own classroom with an emergency/intern credential, under the supervision of a university supervisor. Students may concurrently enroll in EDP 587B upon advisement by their faculty advisor. Credit/No Credit grading only.

**587B. Advanced Field Study and Seminar: Education Specialist Credential in Mild/Moderate Disabilities (6)**

Prerequisite: EDP 587A or concurrent enrollment in EDP 587A upon advisement by their faculty advisor. Application for admission should be made by March 1 for the summer and fall semester and October 1 for the spring semester. Advanced field study in a public or private school or community based site serving individuals with mild/moderate disabilities. Candidates will be assigned to field sites five days a week with a master teacher or demonstrate competencies in their own classroom with an emergency/intern credential, under the supervision of a university supervisor. Credit/No Credit grading only.

---

## Educational Psychology Courses (EDP)

---

### 588A. Advanced Field Study and Seminar: Education

#### Specialist Credential in Moderate/Severe Disabilities (6)

Prerequisite: Admission to the Level I Education Specialist Credential in Moderate/Severe Disabilities. Must complete all Level I courses or be concurrently enrolled in EDP 569. Application for admission should be made by March 1 for the summer and fall semester and October 1 for the Spring semester. Advanced field study in a public or private school or community based site serving individuals with moderate/severe disabilities. Candidates will be assigned to field sites five days a week with a master teacher or demonstrate competencies in their own classroom with an emergency/intern credential, under the supervision of a university supervisor. Students may concurrently enroll in EDP 588B upon advisement by their faculty advisor. Credit/No Credit grading only.

### 588B. Advanced Field Study and Seminar: Education

#### Specialist Credential in Moderate/Severe Disabilities (6)

Prerequisite: 588A or concurrent enrollment in 588A upon advisement by their faculty advisor. Application for admission should be made by March 1 for the summer and fall semester and October 1 for the spring semester. Advanced field study in a public or private school or community based site serving individuals with moderate/severe disabilities. Candidates will be assigned to field sites five days a week with a master teacher or demonstrate competencies in their own classroom with an emergency/intern credential, under the supervision of a university supervisor. Credit/No Credit grading only.

### 589. Adult Literacy and Language Diversity (3)

Prerequisite: Three (3) units from ED P 578/LING 575, ENGL 510; ENGL 535, or from an instructor approved course in literacy studies or adult second language acquisition. A general survey of issues in adult and family literacy/biliteracy and native language literacy with special focus on the educational needs of language minority adults and their families; consideration of the relationship between theory, policy and practice with attention to the social, economic and cultural characteristics of populations in need of literacy services. Traditional grading only.

### 590. Special Problems in Educational Psychology (1-6)

Prerequisite: Consent of instructor. Advanced study of special topics and problems in educational psychology. A student may enroll for one-three units to a maximum of six units for certificate and degree purposes, subject to suitable change in course content. Non-degree and non-certificate students may enroll for additional units subject to suitable change in course content.

### 593. Seminar in Professional Development in Counseling and Human Services (1)

Prerequisite: EDP 538 and 548 (must have completed or concurrently enrolled) This course is an experiential orientation to the profession of counseling and student development/student affairs in higher education with an emphasis on opportunities to observe the interactions between organizational cultures, student cultures, and the functions and role of student affairs professionals in the work environment. Students will meet in a seminar format to discuss and analyze their observations and intentional learning activities from shadowing a professional and completing a fifty-hour practicum. Traditional grading only.

### 595. Qualitative Research Methods (3)

Introduction to the theory and application of ethnographic and qualitative methods in educational settings with special emphasis on applications for educational linguistics, educational anthropology, and research related to language arts instruction. Surveys the basic rationale for qualitative/ethnographic inquiry and basic concepts and methods for applications in teacher-as-researcher approaches and for action research. Same course as LING 595.

### 596. Program Evaluation in Education (3)

Prerequisites: For majors in Educational Psychology: EDP 419, 420, and 520 or equivalents. For other majors, EDP 400 and 520 or equivalents. Identifying and comparing various approaches to program evaluation in educational settings including needs assessments; selecting evaluation questions and criteria; collecting,

analyzing, and interpreting qualitative and quantitative evaluation data; the mechanics and process of developing an evaluation plan. Traditional grading only.

### 601. Trauma and Grief Counseling. (3)

Prerequisites: EDP 556 or consent of instructor. A required course for students in the Marriage and Family Therapy Program and a recommended course for graduate students in the other Counseling Programs. Will provide an overview of developmentally informed models of trauma response, training in identifying and assessing problematic responses to trauma and loss, and guidelines for working with traumatized children, adolescents and families in various settings. Current treatment approaches for the treatment of acute and chronic forms of post-traumatic distress and traumatic bereavement will be covered. Will not cover the treatment of childhood sexual or physical abuse. Traditional grading only.

### 604. Seminar in Human Development (3)

Prerequisites: EDP 301 or 302, and EDP 400 or 419. Theories and issues in developmental psychology, Cognitive, linguistic, perceptual, biological, psychomotor, social and emotional development; nature-nurture and individual differences.

### 605. Seminar in Consultation on School Learning (3)

Prerequisites: ED P 305, and ED P 400 or ED P 419. Analysis of current theory and research in the area of student motivation, achievement and learning problems in the classroom; role of consultation among pupil service personnel, teachers, special educators and parents in maximizing the school learning of all students.

### 607. School Counseling Practicum (3)

Prerequisites: EDP 506, EDP 515. Practical application of counseling theory to work with children and adolescents. Supervised counseling, consultation, and case management experiences conducted in the educational psychology/counseling clinic and in school settings. (Not open to students with credit in EDP 517.) Traditional Grading only.

### 608. Seminar in Marriage and Family Therapy (3)

Prerequisites: EDP 510, 511, 512, 513, 515, 522. Recommended: EDP 556 and 634. Theories, research, treatment planning, and therapeutic methods of MFT counseling utilizing major psychotherapeutic approaches regarding assessment, diagnosis, and treatment of various mental health problems.

### 609. MFT Practicum (2,2)

Prerequisites: EDP 510, 511, 512, 513, 515, 522. Practicum application submitted no later than March 1 for the following fall semester, and October 1 for the spring semester. May be taken concurrently with EDP 608. MFT counseling in an appropriate non profit setting with closely supervised experiences prior to MFT fieldwork. Students will be required to assess, diagnose, describe appropriate interventions and conduct counseling services for individuals and/or families. Credit/No Credit grading only.

### 615. Seminar in Home-School – Community Relations (3)

Prerequisite: EDP 430. Theory and research into the social influences of home, school, and community on child behavior; techniques to foster close home-school relations and use of community agencies. (Open only to School Counseling Master's Degree students who have advanced to candidacy prior to Fall 1999 and to PPS/SC credential-only students admitted to the program prior to Spring 1999.)

### 619. Quantitative Educational Data Analysis II (3)

Prerequisites: EDP 419 and 519 or equivalents. An advanced multivariate statistical analysis course: multivariate analysis of variance, discriminant function analysis, canonical correlation, exploratory factor analysis, and structural equation modeling. Traditional grading only.

### 634. Family Systems Therapy: Theory and Practice (3)

Major family systems therapy theories, research issues, and techniques for counseling families.

### 637. Career Counseling Practicum (4)

Prerequisites: EDP 510, 515, 529, 530 or 531, and 524 or 564 or 580. Career counseling at the secondary and post secondary levels with closely supervised clinical experiences. Students will be required to assess, diagnose, develop treatment plans, write

progress and termination reports, provide appropriate interventions and conduct counseling services for individuals seeking career/vocational guidance.

**638. Group Counseling (3)**

Prerequisite: EDP 515. Theory and application of small group processes in guidance and counseling, laboratory practice in selection of participants, leadership, interaction methods, problem solving and evaluation.

**639. Seminar in Organization of Pupil Personnel Services (3)**

Prerequisite: EDP 430, 506. Practices in organizing, administering, supervising, and evaluating pupil personnel programs at various educational levels. Traditional grading only.

**641. Apprenticeship in School Psychology (3)**

Prerequisite: Admission to school psychology credential program, EDP 528, and EDP 524. Field placement with an experienced school psychologist for two 8-hour days per week for 16 weeks, or by some other arrangement pre-approved by the instructor to equal 250 hours of experience. Observation of and entry level participation in routine school psychological services. May only be offered in Spring semester. Credit/No Credit grading only.

**642A. Field Work I - School Psychology (3)**

Prerequisites: ED P 525, completion of acceptable masters degree, concurrent enrollment in ED P 527, and approval of program committee. Application for field work should be made by October 1 for the spring semester, or by March 1 for summer (if offered) or fall semester. Credit/No Credit grading only.

**642B. Field Work II - School Psychology (3)**

Prerequisites: ED P 527, 642A, and approval of program committee. Continuation of school psychology field work experiences. Application for field work should be made by October 1 for the spring semester, or by March 1 for summer (if offered) or fall semester. Credit/No Credit grading only.

**643A-D. Counseling Field Work (3)**

**A. School Counseling**

Prerequisites: EDP 607, Certificate of Clearance.

**B. Student Development in Higher Education**

Prerequisites: ED P 516, 538.

**C. Career Counseling**

Prerequisites: ED P 637.

**D. Marriage, Family, Child Counselor**

Prerequisites: ED P 608.

Practical experiences in counseling and guidance activities under supervision in approved settings. Applications for field work must be made no later than March 1 for the following summer or fall semester, and October 1 for the spring semester. (Not open to students with credit in ED P 541.) Credit/No Credit grading only.

**644A-D. Advanced Counseling Field Work (3)**

**A. Advanced School Counseling**

Prerequisites: EDP 530, 536 (may take concurrently with 644A), 638, EDP 643A, pass CBEST.

**B. Student Development in Higher Education**

Prerequisites: ED P 549, 638, 643B.

**C. Career Counseling**

Prerequisites: ED P 638, 643C.

**D. Marriage, Family, Child Counselor**

Prerequisites: ED P 638, 643D.

Continued field work under licensed/credentialed supervisors (if required by specialty area or work setting). Applications for field work must be made no later than March 1 for the following summer or fall semester, and October 1 for the spring semester. (Not open to students with credit in ED P 545.) Credit/No Credit grading only.

**645. Internship in Rehabilitation Counseling (6)**

Prerequisites: ED P 637 and Advancement to Candidacy. Application must be made no later than March 1 for the following summer/fall semester or October 1 for the spring semester. Full-time paid employment situation resulting in a minimum of 600 clock hours in

an approved rehabilitation site under supervision of a nationally Certified Rehabilitation Counselor. The student will demonstrate competencies for national certification and advanced professional development. (Supervision.)

**651. Urban School Reform (3)**

Prerequisite: Urban School Experience or consent of instructor. This course analyzes the urban school reform movement since 1983 and focuses upon what works in making effective urban schools. This focus is upon what schools themselves can do to improve. Successful partnerships between public schools/universities/corporations and other entities are examined along with various reform measures including professional development schools, charter schools, national standards, teacher competency testing, site-based management, diversity recruiting, technological infusion, alternative teacher certification, and moral responsibility development. Traditional grading only.

**672. Language and Educational Policies (3)**

Examination and analysis of contemporary and historical language policies, educational language policies, and legal decisions in the United States which provide the context for current language practices in the schools; comparison of U.S. experiences with those of other nations; discussion of the relationship between language attitudes and educational policy formation.

**677. Curriculum/Program Development and Evaluation (3)**

Broad-based approach to classroom curriculum planning and curriculum design, and the technical process of curriculum and program planning. The role of the administrator as the leader of the learning community. Examine issues of: school democracy, developing a thinking curriculum, restructuring of public school curricula in urban and culturally diverse communities, and an integrated bi-literacy approach to learning. Examine ways to apply current instructional design models, and evaluate and assess their effective implementation. The California Curriculum Frameworks will be used to supplement and guide the development of a restructured curricula.

**692. Special Topics in Counseling (1-6)**

Advanced study of special topics in the field of counseling. Continuing education and non-degree students may enroll for units subject to suitable changes in course content. Course may be repeated with different topics. Topics regarding continuing education for mental health providers are announced in the UCES *Schedule of Classes* or the University Fall, Spring, or Summer semester *Schedule of Classes*. Course may be repeated under different topics to a maximum of 12 units.

**A. Special Topics in Counseling: Introduction to Psychodrama**

An applied course which provides instruction and practice in the major theoretical approaches to psychodrama, a specialized group psychotherapy approach, with special attention to individual, child, adolescent, and family issues. Does not qualify for psychodrama certification.

**B. Special Topics in Counseling: Advanced Psychodrama**

Prerequisites: EDP 692A or consent of instructor. An applied course which provides instruction and practice in directing psychodrama as a counseling method.

**693. Advanced Seminar in Professional Development in Counseling and Human Services (1-2)**

Prerequisites: ED P 515, 538, 548, 593, and concurrently enrolled in 549. Students will explore the professional associations available for counselors and student affairs professionals, and will attend one on-campus professional development institute and one off-campus professional conference that is either regional or national in scope. Additionally, students will explore and demonstrate an integration of roles, philosophy, and theory for counseling and student development work. Finally students will develop a life long professional development plan. Traditional grading only.

**695C. Seminar in Professional Development in Counseling and Human Services (3)**

Prerequisites: Advancement to candidacy and permission to enroll from College of Education Graduate Office. A seminar stressing integration of counselor roles and specializations. The student will demonstrate knowledge of the field along with selected skills in critical thinking and counseling methods.

---

## Educational Psychology Courses (EDP)

---

### 695S. Seminar in Special Education (3)

Prerequisites: Advancement to candidacy, and written application to Graduate Office. Application for enrollment must be made by March 1 for the summer session or fall semester, or by October 1 for the spring semester. Studies of problems and issues in special education. Relating research to practice in the several areas of exceptional individuals. For qualified candidates preparing for the comprehensive examination. (Not open to students with credit in ED P 650.)

### 696. Thesis Study: Plan Development and Organizing Aspects (3)

Prerequisites: EDP 400 and 520 or 595; OR EDP 419, 420 and 520 or 595. Designed for students planning to write a thesis. A thesis committee must be formed and the thesis problem approved by the thesis committee by midterm in the course. A completed draft of the thesis plan will be accomplished by the end of the term/semester. Grading is CR/NC (Traditional grading is an option only for those students whose master's programs require EDP 696).

### 697. Directed Research (1-3)

Prerequisites: Consent of instructor, department chair and associate dean. Individual research or intensive study under the guidance of a faculty member. A student may enroll for one-three units to a maximum of three units for certificate and degree purposes, subject to suitable change in course content. Application for enrollment must be made to the Office of Graduate Studies and Research by March 1 for the fall semester or by October 1 for the spring semester.

### 698. Thesis (3,3)

Prerequisites: Advancement to candidacy, ED P 519 or 520 or 595 or 696, approval by director, department chair and associate dean. Planning, preparation and completion of a thesis under supervision of a faculty committee. Must be taken for six units. Application for enrollment must be made to the Graduate Studies Office by March 1 for the fall semester or October 1 for the spring semester.

### 699. Project (3)

Prerequisites: Advancement to candidacy, approval of graduate advisor, and written application to the College of Education Graduate Office. Project application to be made to the College of Education Graduate Office by March 1 for the Summer or Fall semester or October 1 for the Spring semester. Information and discussion related to the development of master's degree projects in Educational Psychology, School Administration, Counseling and related fields. Traditional grading only. Can be repeated with consent of program advisor. Course may be repeated to a maximum of 6 units.

---

## Educational Technology Courses (ETEC)

---

### Lower Division

#### 110. Introduction to Computers as Tools (1)

Introduction to operations, terminology, and components of computing systems. Introduction to computer applications including word processing, databases, and spreadsheets. Introduction to University e-mail systems, and electronic searching. Traditional grading only.

### Upper Division

#### \*443. Educational Technology (3)

An introduction to the variety of technological applications used in education today. The course provides a survey of today's educational technology tools and describes how these tools are used by educators. Students complete a series of hands-on learning experiences to become familiar with today's educational technologies, including computer applications, multimedia resources, programming and authoring tools, computer-assisted instruction,

Internet-based educational resources, and technology-based human research tools (seminar 2 hours, laboratory 2 hours). Students should be aware that this course will no be offered after Summer 2001 and are advised to take ETEC 444.

#### 444. Computer Technology in Education, Level I (3)

Prerequisites: Course design assumes familiarity with topics introduced in LI 110. (See the course Web page on the College of Education Web site for more information and a self-assessment.) Introduction to educational computer technology: resources and tools for professional use; strategies for integrating computers into teaching; applications to diverse learners; and legal, ethical, and societal issues. This course satisfies the California Level I teaching credential computer technology standard. (Seminar 2 hours, laboratory 2 hours.)

#### \*449. Technology Applications for Educators (1-3)

Prerequisites: Consent of Instructor. Contemporary applications of technology for teaching, learning, and the management of instruction. Demonstration and hands-on experience with computer and media applications in education. Demonstration and hands-on experience with computer and media applications in educational settings. Topics are announced in the *Schedule of Classes*. Course may be repeated to a maximum of 12 units with different topics.

##### A. Internet Resources for Educators

This course introduces students to the growing number of Internet-based educational resources for educators. The course provides discussion, demonstrations, and hands-on experience in the use of computer communication tools, including e-mail, file transfer protocol (FTP), newsgroups, listservs, and the world wide web. May be taken for Graduate Credit.

##### B. Evaluation and Selection of Instructional Technology Resources

This course introduces students to a variety of evaluation instruments and techniques for evaluating and selecting instructional technology resources to support the California curriculum frameworks. They will become familiar with exemplary programs and learn to evaluate new programs in terms of these exemplars.

### Graduate Divison

#### 523. Computer Technology in Education, Level II (3)

Prerequisites: ETEC 444 or equivalent experience satisfying the California Level I computer technology standard. (See the course Web page on the College of Education Web site for more information and a self-assessment.) Advanced principles for integrating computer technology into learning environments to improve: planning, designing and implementing learning experiences; educational communication and collaboration; assessment and evaluation. This course satisfies the California Level II computer technology standard. (Seminar 2 hours, laboratory 2 hours.) Traditional grading only.

#### 525. Social and Cultural Implications of Educational Technology (3)

Course Description: Critical examination of social and cultural implications of educational technologies, considering issues of cultural bias, equity, and questions of who benefits from particular technologies. International applications of computer technologies to promote learning about different cultures. Case studies of issues concerning computers and society.

#### 530. Educational Technology Leadership (3)

Prerequisites: ETEC 523. Examines the role of leadership as it relates to the implementation of educational technology in schools. Provides theory, knowledge, and skills necessary to use, evaluate, plan, and implement technologies effectively within a school system. Examines broader administrative issues, including security and ethics, associated with computers and other technologies.

#### 551. Education and the Internet (3)

Prerequisites: ETEC 523, Technology-Based Learning. The course provides discussion, demonstrations, and hands-on experience related to educational applications of computer communications systems such as e-mail, file transfer protocol (ftp),

computer bulletin boards, listservs, and the world wide web. Students complete a series of hands-on instructional assignments using technology-based tools to design and manage educational programs delivered via the Internet. (Seminar 2 hours, Laboratory 2 hours).

### 553. Instructional Design (3)

Prerequisites: ETEC 523 or equivalent experience satisfying the California Level II computer technology standard. An introduction to principles of instructional design with emphasis on designing effective teaching strategies with educational technology. Students will apply design theories and models to plan, create, and refine learner-centered educational activities. Students will complete a series of instructional design assignments involving educational technology. Traditional grading only.

### 623. Developing Technology – Based Learning (3)

Prerequisites: ETEC 523, 553. Analysis and hands-on experience related to the use of modern techniques for developing technology-based learning. The course provides discussions, demonstration, and hands-on experience in the computer lab toward the development of technology-based interactive learning programs. The course introduces advanced concepts of technology-based instructional design that are of value to educators including educational psychologists, curriculum developers, school administrators, special education teachers, and school counselors. Students will complete a series of hands-on instructional design assignments using state of the art technology-based tools for the delivery of learning programs. Each Student will apply these methods by designing a technology-based instructional program. Seminar 2 hours, laboratory 2 hours.

### 695. Seminar in Educational Technology (3)

Prerequisites: Successful completion of all required course work for the Master of Arts in education, option in educational technology. Application for enrollment must be made by March 1 for the summer session or fall semester, or by October 1 for the spring semester. Advanced studies in educational technology including reviews of the literature, critique of educational technology research, and systematic development and evaluation of areas of students' prior work. For qualified candidates preparing for the comprehensive examination. Traditional grading only. Course may be repeated up to a maximum of six units.

---

## Library Media Courses (LI)

---

### Upper Division

#### \*497. Independent Study (1-3)

Prerequisites: Consent of instructor and department chair. Independent study undertaken under the supervision of a faculty member. May be repeated for credit to a maximum of six units, with no more than three units applicable to credential or major requirement.

### Graduate Division

#### 500. Foundations of Information (3)

Exploration of the role of information and information technology in organizations (particularly in Western education) and society. Topics include societal needs and demands, sociology of knowledge and science, the exploration of diffusion of knowledge and technology, information seeking and use, information and culture, and technology and culture. Traditional grading only.

#### 510. Selection of Materials and Information Sources (3)

Criteria, tools, procedures and policies for evaluating and selecting instructional resources appropriate to use in school library media centers.

#### 520. Basic Reference (3)

Philosophy of reference service; criteria for evaluation, selection, study, and use of selected basic reference sources, both print and electronic; selection of reference tools to reflect cultural and linguistic diversity of our students; instruction in the use of reference sources.

#### 530A. Library Media Materials for Elementary Grades (3)

Selection and use of fiction and non-fiction books, audiovisual and electronic media, and related materials of interest to children that reflect the cultural diversity of our state and support current curriculum frameworks; criteria and tools for selection and use; current issues.

#### 530B. Library Media Materials for Secondary Grades (3)

Selection and use of fiction and non-fiction books, audiovisual and electronic media, and related materials of interest to young adults that reflect the cultural diversity of our state will support current curriculum frameworks; criteria and tools for selection and use; current issues.

#### 540. Organization and Cataloging of Materials (3)

Rationale and use of card and online catalogs; principles and practice in classification and cataloging applied to school library media centers; processing/organization of information.

#### 550. School Library Media Center Management (3)

Philosophy, principles and problems of planning, organizing, supervising and managing a school library media center program.

#### 570. Library Media Technologies (3)

Prerequisites: Beginning skill with word processing and database management programs required. Evaluation, selection, and curriculum applications of computer, video, videodisc, CD-ROM, audiovisual, and other technologies appropriate for use in school library media centers; analysis and management of available hardware and software.

#### 580. Field Experience in the School Library Media Center (4)

Prerequisites: Pass CBEST; possession of valid California teaching credential; and completion of the courses required for the credential or consent of program coordinator. Students will model effective practices in administering a library media program under the supervision of a credentialed library media teacher. Applications for spring and summer semester must be in the office of the program coordinator by October 1 and for fall semester by March 1.

**T**he College of Education (CED) prepares students for professional careers in the field of public and private education.

The College of Education's main purpose is to create and nurture a learning and teaching community committed to excellence in education. We fulfill our purpose by: preparing professionals to be socially responsible leaders; engaging in research and scholarly activity which informs and improves practice; valuing diversity as we work to achieve common goals; serving and collaborating with schools, agencies, the community and each other; engaging in an inclusive process for planning, communicating, working, and assessing our progress towards our goals.

The College of Education provides undergraduate and graduate studies in education. It offers specific curricula focusing on the preparation of personnel for teaching and educational service in the pre-school, elementary, middle and high schools, community colleges, adult programs, and other educational agencies. In addition to three certificate programs and a variety of teaching and service credentials, the College offers a Bachelor of Arts in Liberal Studies, a Master of Arts in Education degree with various options, and two Master of Science degrees (special education and counseling). All graduate level courses (500/600) in the departments in the College of Education are assumed to be "traditional grading only" unless stated otherwise. Descriptions that include prerequisites and requirements for each credential, certificate, and degree program are listed in this *Catalog* in the College of Education department that houses the particular program.

## Degree Programs

### Bachelor of Arts in Liberal Studies

### Master of Arts in Education with Options in:

Educational Administration

Educational Psychology

Social and Multicultural Foundations of Education

Specialization in International/Global Education

Specialization in Language, Literacy, and Culture

Specialization in Language Minority Education

Special Concentration

Elementary Education

Specialization in Curriculum and Instruction

Specialization in Early Childhood Education

Specialization in Reading and Language Arts

Specialization in Middle Level Education

Secondary Education

Specialization in Curriculum and Instruction

Specialization in Reading and Language Arts

### Master of Science in Special Education

### Master of Science in Counseling with Options in:

Marriage and Family Therapy (MFT)

Vocational Rehabilitation Counseling

(discontinuance under consideration)

School Counseling

Student Development in Higher Education

Career Counseling

### California Teaching and Service Credentials

### Basic Teaching Credentials

#### *Elementary:*

- Multiple Subject Credential, Cross-cultural Language, and Academic Development (CLAD) Emphasis

- Multiple Subject Credential, Bilingual Cross-cultural Language and Academic Development (BCLAD) Emphasis
- Multiple Subject Internship Credential, with Cross-Cultural, Language and Academic Development (CLAD) Emphasis
- Integrated Teacher Education Program (ITEP) (see the Liberal Studies section of this catalog)

*Secondary:*

- Single Subject Internship Credential
- Single Subject Credential

Art; English (Emphasis in Black Studies, Comparative Literature, Creative Writing, Journalism, Language & Linguistics, Literacy & Composition, Literature, Speech, Theatre Arts); Languages Other than English (French, German, Japanese, Spanish); Health Science; Home Economics; Life Science; Mathematics; Music; Physical Education (Adapted P.E., Elementary School, Secondary School); Physical Science (Chemistry, Earth Science, Physics); Social Science (covering Anthropology, Economics, Geography, History, Political Science, Psychology, Sociology)

### Specialist Teaching Credentials

- Adapted Physical Education
- Early Childhood Education
- Reading and Language Arts
- Resource Specialist Certificate
- Education Specialist Credential: Mild/Moderate Disabilities (plus Internship)
- Education Specialist Credential: Moderate/Severe Disabilities (plus Internship)

### Services Credentials

- Preliminary Administrative
- Professional Administrative
- Library Media Teacher
- Clinical Rehabilitative (Communicative Disorders)
- Health (Nursing)
- School Counseling
- School Counseling Internship
- School Psychology
- School Psychology Internship
- School Social Work and Child Welfare and Attendance

### Other Credentials and Authorizations

- Designated Subjects (Adult and Vocational Education, ROTC, Supervision and Coordination)

### Certificates

- Career Guidance Specialist (Graduate)
- Community College (Graduate)
- Reading and Language Arts (Graduate)

### Scholarships

Scholarships are available to undergraduate teacher track, credential and master's students in the College of Education. Scholarship applications are available the first week in November in the Office of Graduate Studies and Research, ED1-07, and should be completed and submitted by the first Friday in February. Scholarship recipients are identified by April 30 and

the scholarship funds are awarded in the beginning of the next academic year (i.e., all students applying February 2001 will receive the funding in the academic year beginning in August 2001).

### Educational Psychology Clinic

The Educational Psychology Clinic is housed in the College of Education (ED2, Room 155, (562) 985-4991) and serves University and public school students. The primary purpose of the Clinic is to give practicum experience for CSULB students in the areas of school psychology, school counseling career counseling, special education (learning disabilities), elementary and secondary reading and mathematics instruction. The secondary purpose of the Clinic is to serve the wider community in Los Angeles and Orange Counties by providing services to K-12 students and their families in the above areas at a reduced rate. No client is refused who can meet the criteria for acceptance but lacks the finances. Parents also participate in the clinic program through parent education groups in order to become better informed about their children's problems.

Specific services available at the Clinic include: diagnostic testing, counseling, consultation outreach to community, remediation, parent education, and continuing education.

### Educational Career Services (ECS)

Located in the College of Education, Educational Career Services assists students and alumni in their search for professional positions in the field of education. ECS serves current student teachers and also provides services to students and alumni seeking positions as school administrators, school counselors, college instructors, school librarians, and school psychologists. Multiple Subject and Single Subject candidates should establish a placement file during their student teaching semester. All other candidates should register with the office just prior to graduation or completion of their credential program.

Services offered by ECS include: duplicating and mailing professional placement files, posting written job vacancy notices, sponsoring jobfairs, conducting job search seminars, providing individual advisement, mailing job vacancy bulletins, and providing information about professional educational opportunities. Appointments may be scheduled with an Educational Career counselor to obtain information about the current job market within the field of education or to receive assistance with resume writing or job interview skills. ECS is located in ED1, Room 67, phone (562) 985-5772. The 24-hour job tape hot line number is (562) 985-5320.

### Credential Processing Center

The Credential Processing Center assists CSU, Long Beach students in pursuit of their credential and educational goals. Staff of the Center serve as a campus liaison to the State of California Commission on Teacher Credentialing (CTC), and coordinates the dissemination of credential information to University staff, faculty, students and the general public.

The Credential Processing Center is responsible for the evaluation, verification, and recommendation of all initial elementary teaching, secondary teaching and specialist service credentials. Candidates completing requirements by the end of the summer or fall term of any year should register with the CPC prior to March 1. Spring term candidates should file prior

to October 1. Multiple Subject and Single Subject candidates complete this registration process as part of the student teaching application.

The Credential Processing Center provides a University resource of credential requirements and regulations, which includes advisement and program admission for the Professional Clear Single Subject and Multiple Subject Credential Programs (Fifth-Year Programs), advisement for out-of-state and out-of-country credential applicants, and assistance to credentialed teachers seeking renewal information.

The Center is located in ED 1, Room 42, and is open for service Monday through Friday, from 10:00 to 12:00 Noon, and 1:00 to 5:00 PM, unless otherwise posted. The telephone number is (562) 985-4109.

### Master's Degree Programs

Master's degree programs are offered in each of the two departments within the College. General procedures, policies and requirements, for the Master of Arts in Education degree are available in each department and are listed following each option and specialization.

The Department of Educational Psychology, Administration and Counseling offers two Master of Science degrees: MS in Counseling, with Options in: Marriage and Family Therapy; Vocational Rehabilitation Counseling; School Counseling; Student Development in Higher Education; Career Counseling; and MS in Special Education. One Master of Arts in Education degree is offered with Options in: Educational Administration, Educational Psychology, and Social and Multicultural Foundations of Education.

The Department of Teacher Education offers two Options in the Master of Arts in Education: Elementary Education and Secondary Education. The Elementary Education Option offers four specializations: Curriculum and Instruction, Early Childhood Education, Reading and Language Arts and Middle Level. The Secondary Education Option has two specializations: Curriculum and Instruction and Reading and Language Arts.

To be considered for admission to a master's degree program, students must submit a program application, official transcripts, test scores (if applicable), and any additional program requirements to the College of Education, Office of Graduate Studies and Research. Program applications may vary, please check the individual program for additional requirements. The individual program application deadline date for School Counseling, Student Development in Higher Education, Marriage and Family Therapy and Special Education is March 1, to be considered for the fall semester. To be considered for the spring semester for Marriage and Family Counseling and Special Education, the individual application deadline date is October 1. Please note, not all programs admit students for the spring semester. For additional program information, please visit the College of Education WEB site at [www.ced.csulb.edu](http://www.ced.csulb.edu).

Information regarding degree programs is available in the Office of Graduate Studies and Research (ED-1, Room 7). Students should consult with faculty in the various departments concerning particular programs and refer to the appropriate department's section of the *Catalog*.

All master's degree candidates in education are required either to complete a thesis or project or to take a comprehensive examination according to the requirements of the degree, degree option, or degree option specialization. Application for enrollment for thesis, project, or comprehensive examination must be made by October 1 for the spring semester or by March 1 for the fall semester or summer session.

### University Graduate Admission to Master's Programs

Master of Arts in Education

Master of Science in Counseling

Master of Science in Special Education:

To be eligible for conditional admission to the respective College of Education master's degree programs, applicants must meet the following grade-point average (GPA) requirements:

**Clear Conditional Admission** — To be eligible for clear admission to a master's program in the College of Education, applicants must have a GPA of 2.85 or higher in the last 60 semester or 90 quarter units of course work taken. Lower division and/or extension courses taken after obtaining the bachelor's degree are excluded from this calculation.

**Conditional Admission** — Applicants who meet all requirements for clear conditional admission except one program requirement may qualify for clear conditional admission by earning a minimum of 3.00 on 12 units of approved course work planned by the student and advisor. Applicants who fail to meet more than one program admission requirement must be recommended by faculty as a promising candidate in order to be conditionally admitted.

**NOTE:** Individual programs retain the right to determine who is admitted to their programs. Meeting the University requirements for clear conditional or conditional admittance does not guarantee acceptance to the program.

Clear conditional admission to the CED is required for enrollment in 500 and 600 level courses.

### Advancement to Candidacy

To be advanced to candidacy for a graduate degree, each student must:

1. Pass the Writing Proficiency Examination (WPE). By University regulation, all applicants must pass the WPE prior to advancement to candidacy;
2. Students must satisfy all general University requirements for advancement to candidacy, as well as the specific requirements for the degree option and specialization;
3. All prerequisites and testing must have been completed, an approved program of studies must have been filed with the College of Education, Office of Graduate Studies and Research, and the student must be currently enrolled;
4. Resolution of all incomplete grades (to either "complete" or "default" grade).
5. The Graduate Record Examination (GRE) is required for the MA in Education Educational Psychology Option only.

### *Advisory and Development Council*

The Department of Electrical Engineering is supported by an Advisory and Development Council consisting of outstanding engineers and executives from industry and government in southern California. Its function is to form a liaison between the University and industry and to keep the administration and faculty informed of modern engineering practices. This ensures that the curricula are kept up-to-date. It also advises on placement opportunities before and after graduation.

### *ABET Accreditation*

The Bachelor of Science in Electrical Engineering Program is accredited by the Engineering Accreditation Commission (EAC) of the Accreditation Board for Engineering and Technology (ABET) (Accreditation Board for Engineering and Technology, Inc., 111 Market Place, Suite #1050, Baltimore, MD 21202, phone: 410-347-7700). Students enrolling in this program are advised to get in touch with the undergraduate advisor for information regarding ABET requirements.

### Bachelor of Science in Electrical Engineering (code 3-4330) (133 units)

The degree in electrical engineering is designed to prepare graduates for responsible engineering positions in design, development, research, applications, and operation in the fields of communications, control systems, digital signal processing systems, electromagnetics, digital and analog electronic circuits, physical electronics, computer-aided design and power systems. The curriculum is built around a strong basic core of mathematics, physics and engineering science. This is followed by intermediate courses in electrical engineering topics and finally a senior elective sequence including a senior design seminar and terminating in a capstone design course.

By choice of senior elective sequence comprehensive coverage is provided in any one of the above fields.

Laboratory facilities are available in the engineering buildings allowing for basic as well as more advanced laboratory instruction in electronics, digital signal processing, control systems, micro-electronics, communications, power, and digital systems.

### Requirements

Core: CECS 174; EE 200, 201; either EE 210 and 210L or PHYS 152; EE 211, 211L, ENGR 202; MATH 122, 123, 224; MATH 370A or equivalent; PHYS 151, PHYS 254; EE 310, 330. Each of the foregoing courses must be completed with a grade of "C" or better as well as all courses that are prerequisite or corequisite to courses required for the major including ENGL 100 or equivalent. The interdisciplinary courses as well as the Communications Studies (COMM) courses required for general education must be taken for a letter grade. Other required courses are EE 330L, 346, 347, 350, 370, 370L, 380, 382, 386, 400D, 430, 430L, 462 or 464; CE 370 or ME 330; plus an elective sequence with capstone senior design course as follows:

*Analog and Digital Electronics Elective Sequence:* either EE 301 and 301L or 435 and 435L; 320, 332, 447; plus additional electives\* totaling at least 134 units approved by the department.

*Communications Elective Sequence:* EE 482, 486, 488; plus additional electives\* approved by the department totaling at least 133 units.

*Controls Elective Sequence:* EE 450, 470, 471; plus additional electives\* totaling at least 133 units approved by the department.

*Digital Signal Processing Sequence:* EE 482, 486, 489; plus additional electives\* approved by the department totaling at least 133 units.

*Power Elective Sequence:* EE 450, 452, 458; plus additional electives\* totaling at least 133 units approved by the department.

\* See undergraduate advisor for the list of approved electives and the number of elective units required.

### **Bachelor of Science in Engineering Option in Biomedical and Clinical Engineering (code 3-4336) (132 units)**

The Department of Electrical Engineering administers an option in Biomedical and Clinical Engineering that allows the student to acquire substantive competence in biomedical engineering and biology. The program builds upon a strong base of biology, mathematics, physics, chemistry, and engineering science to develop a clinically oriented biomedical engineer to serve medical and industrial needs. It includes a core of standard electrical engineering courses as well as courses and laboratories in biomedical engineering, anatomy, physiology and biology. Elective units are available in the senior year to explore individual areas of interest.

Students planning to attend medical, dental or other health professional or graduate schools in Biomedical Engineering may select courses in Chemistry and/or Biology with the approval of BME advisor.

Laboratory facilities in the field of biomedical engineering are available in the engineering buildings; and laboratory facilities for anatomy and physiology are available on campus. Computer systems are available to simulate biological systems and to collect, process and display physiological data.

#### **Requirements**

CECS 174; CHEM 111A; EE 200, 201, 211, 211L, 310, 330, ENGR 202, MATH 370A; MATH 122, 123, 224; PHYS 151, 152, 254. Each of the foregoing courses must be completed with a grade of "C" or better as well as all courses that are prerequisite or corequisite to courses required for the major including ENGL 100 or equivalent. The interdisciplinary courses as well as the Communications Studies (COMM) courses required for general education must be taken for a letter grade. BIOL 207 (GE category B1a); EE 330L, 346, 347, 350, 370, 370L, 382, 406, 406L, either 407 or 408; 430; 460; ME 330 or CE 370; plus additional approved biomedical electives, including approved senior design course, to at least 132 units.

### **Certificate Program in Energy Conversion and Power Systems Engineering (code 1-4000)**

The 27-unit Certificate Program in Energy Conversion and Power Systems Engineering is an undergraduate program designed to prepare electrical and mechanical engineering students to become proficient in the analysis and design of power generating systems (such as direct conversion, coal burning, hydraulic, nuclear, solar, wind and various other types of power plants), the elements of electrical power plants and systems, and industrial electric power systems design.

For certificate requirements see the Mechanical Engineering Department section of this *Catalog*.

### **Master of Science in Electrical Engineering (code 6-4330)**

This program affords an opportunity for engineers and others to advance their competency in analysis and design to better meet the high technology needs of local industry. Each student selects three graduate courses in one area of emphasis, and the remaining courses must augment and support that area of emphasis. Some current examples of areas of emphasis are biomedical, communications, control systems and robotics, digital signal processing, digital systems, electromagnetics and optics, electronics, engineering mathematics, networks and filters, and power. Students may create other areas of emphasis with the approval of the graduate advisor. A limited number of laboratory and teaching assistantships are available to qualified graduate students.

#### **Prerequisites**

1. A bachelor's degree from an accredited curriculum in electrical engineering or a bachelor's degree from an accredited engineering, natural science or other appropriate curriculum with the requirement that essential undergraduate deficiencies in electrical engineering are removed prior to Advancement to Candidacy.
2. Graduate students must consult with the graduate advisor and obtain the MSEE Handbook which covers procedures and requirements. A tentative program must be approved by the graduate advisor. That program must exhibit an area of emphasis comprised of at least three related graduate courses (500 or 600 level).
3. The prospective graduate student must have attained a GPA of at least 2.5 for the last 60 semester units (90 quarter units) attempted prior to entry in the MSEE program. The student should apply directly to the University Admissions Office. There is no need to apply to the Department initially. International students should apply through the Center for International Education.

#### **Advancement to Candidacy**

1. Fully classified standing (if initially admitted as conditionally classified) by completing all deficiency requirements.
2. Currently enrolled in a regular session.
3. For classified students, removal of all undergraduate deficiencies as determined by the graduate advisor. The GPA must be at least 3.0 for all such courses attempted.

4. Demonstration of competence in technical writing by passing an appropriate writing course with a grade of "C" or better or by providing acceptable proof of technical writing ability. This requirement can be waived for thesis students upon recommendation of the graduate advisor and the thesis advisor.
5. Passing the Writing Proficiency Exam.
6. Completion of at least 9 units as a graduate student in residence while maintaining an overall GPA of at least 3.0 and a major GPA of at least 3.0. Students are advised strongly to seek advancement before completing 15 units of the program.

## Requirements

EE core courses consist of the following: EE 501, 508, 509, and 511. Students must select at least 2 out of the above 4 courses appropriate to their area of emphasis and subject to the approval of the Graduate Advisor. Completion of a minimum of 30 units in 400-, 500- or 600-level courses as approved in advance by the graduate advisor. Students must choose either the thesis or nonthesis alternatives. Successful completion of a thesis provides a unifying culmination to the program and an enhanced resume for future industrial or academic endeavor.

*Thesis Alternative:* EE 500/600 including the above core requirement (15 units); EE 697 (3 units); EE 698 (6 units); EE 400/500/600 (6 units); Comprehensive Oral Exam on Thesis.

*Non-Thesis Alternative:* EE 500/600 including the above core requirement (24 units); EE 400/500/600 (6 units); Comprehensive Oral Exam on MSEE Program.

## Courses (E E)

### Lower Division

#### 200. Trends in Electrical Engineering (1)

Electrical Engineering as a profession. Nature of professional and design activities. Advances in Electrical Engineering. Current designs, future trends and challenges in various fields of Electrical Engineering. (Lecture 1 hour.) Traditional grading only.

#### 201. Digital Logic Design (4)

Prerequisite: MATH 117 (or equivalent). Practical design of digital circuits. Basic topics in combinational and sequential switching circuits with applications to the design of digital devices. (Lecture-problems 4 hours.)

#### 210. Fundamentals of Electric Circuits (3)

Prerequisites: MATH 123, PHYS 151. Electric fields. Magnetic fields. Ohm's law. Kirchoff's laws. Physics of inductance and capacitance. Conservation of energy. Introduction to RL, RC and RLC circuits. Introduction to phasors. Introduction to electric machinery, computer electronics, electromagnetic radiation, and communication. (Lecture-problems 3 hours) Traditional grading only.

#### 210L. Fundamentals of Electric Circuits Laboratory (1)

Corequisite: EE 210. Laboratory experiments demonstrating behavior of resistive circuits; capacitors and inductors; transient RL and RC circuits; sinusoidal (phasor) RL, RC and RLC circuits; motors, generators, and transformers. Traditional grading only.

#### 211. Electric and Electronic Circuits (3)

Prerequisites: EE 210 or PHYS 152, MATH 224. Linear circuit analysis techniques including circuit transformations, mesh and node analyses. Thevenin's, Norton's, Superposition, and Maximum Power Transfer theorems. Transient analysis of RL, RC and RLC circuits. Phasors. Power concepts. Nonlinear circuits including diodes. Circuit solution using PSpice. (Lecture-problems 3 hours) Traditional grading only. (211, CAN ENGR 12; EE 211+211L, CAN ENGR 6)

#### 211L. Electric Circuits Laboratory (1)

Corequisite: EE 210 or EE 211. Laboratory investigation of Ohm's Law, Kirchoff's Laws, voltage and current division, mesh and nodal analysis, Thevenin and Norton equivalents, superpositions, simple RL, RC, RLC circuits, phasors, power. Instrumentation using voltmeter, ammeters, ohmmeters and oscilloscopes. Power Measurements. Identification of unknown elements. (Laboratory 3 hours.) Traditional grading only.

#### 220. Materials Sciences for Electrical Engineers (3)

Prerequisites: MATH 224 and EE 210. Basic principles of optical and wave propagation. Introduction to quantum electronics. Fundamental aspects of photonics and materials sciences and their relevance to solid state electronic circuits. (Lecture-problems 3 hours). Traditional grading only.

### Upper Division

All 300- through 700-level courses are Traditional grading only unless otherwise stated.

#### 301. Sequential Circuit Design (3)

Prerequisite: EE 201. Synthesis of sequential circuits. Asynchronous sequential circuits, algorithmic state machines, hardware design languages, sequential circuit design using programmable logic devices. (Lecture-problems 3 hours)

#### 301L. Sequential Circuit Design Laboratory (1)

Prerequisite or Corequisite: EE 301. Design implementation and verification of digital systems using medium scale integrated and large scale integrated circuits. (Laboratory 3 hours)

#### 310. Signals and Systems (3)

Prerequisites: EE 210 or 211; and MATH 370A or equivalent. Fundamental concepts of signals and systems. Laplace Transforms. Fourier Series. Fourier Transforms. Two-port parameters. (Lecture-problems 3 hours).

#### 320. Solid State Electronic Devices (3)

Prerequisite: PHYS 154 or 254. Semiconductor crystal structure and growth. Carrier modeling, drift and diffusion currents. P-N junctions, diodes, solar cells and light-emitting diodes (LED). Bipolar junction transistor (BJT) biasing, linear and switched operation. Metal oxide semiconductor field effect transistor (MOS-FET) operation. (Lecture-problems 3 hours).

#### 330. Analog Electronic Circuits I (3)

Prerequisite: EE 211. Analysis and design of diode, bipolar junction transistor, field-effect transistor (MOSFET and JFET), and CMOS circuits. Op-Amp linear and nonlinear circuit applications. (Lecture-problems 3 hours).

#### 330L. Analog Electronics Laboratory I (1)

Prerequisite or Corequisite: EE 330. Transistor and operational amplifier circuit design laboratory. (Lab 3 hrs)

#### 331. Mixed Signal Electronics (3)

Prerequisites: CECS 201, EE 210, 210L. (Not open to EE majors) Analysis and design of digital electronic circuits. Operation of bipolar and MOS transistors. NMOS, CMOS and bipolar transistor inverters, NAND gates and NOR gate. Interfacing digital circuits with external devices. D/A and A/D converters. Mechatronics. (Lecture 2 hrs, laboratory 3 hrs)

#### 332. Digital Electronic Circuits (3)

Prerequisites: EE 201, 211, 320. Analysis and design of digital electronic circuits. Structure and operation of MOS transistors, including SPICE models. NMOS and CMOS inverters. Bipolar transistor inverters. Bipolar digital gate circuits (TTL & ECL). Regenerative logic circuits (flip-flop, Schmitt trigger, multivibrator). Semi-conductor memories. Basic IC design-Gate Array, Standard Cell, PLA. (Lecture-problems 3 hrs)

#### 333. Audio Electronics (3)

Prerequisite: EE 210 or 211. Physical principles of electromagnetic phenomena and their historical application to the production of music. Analysis and design of the electronic circuitry used in the reproduction, modification, and creation of sound. In the lab, the electric guitar, its amplifiers, and special effects devices

(analog and digital) will be used to gain practical experience with this circuitry. (Lecture 2 hours-laboratory 3 hours.)

### **346. Microprocessor Principles and Applications (3)**

Prerequisites: CECS 174, EE 201. Study of microprocessor and microcomputer elements for applications of these devices to practical problems. Assembly language programming. Design of microprocessor based systems using 80X86 architecture. (Lecture-problems 2 hours, laboratory 3 hours.)

### **347. Microprocessor Based System Design (3)**

Prerequisite: EE 346. Design and construction of a microprocessor based system. Interfacing and control of external devices. (Lecture-problems 2 hours, laboratory 3 hours.)

### **350. Energy Conversion Principles (3)**

Prerequisites: EE 211 and 211L, or consent of instructor. Electro-mechanical energy conversion. Power transformers. DC, synchronous, and induction machines. Laboratory experiments on power electronics and rotating machinery. (Lecture-problems 2 hours, laboratory 3 hours.)

### **350L. Energy Conversion Laboratory (1)**

Prerequisite: EE 350. Testing and performance validation of electric, electronic, electrochemical and electromechanical components and apparatus. (Laboratory 3 hours.)

### **370. Control Systems (3)**

Prerequisites: EE 310. Control systems analysis; block diagrams, signal flow graphs, stability criteria, root locus, frequency domain analysis. Examples of classical control system design. (Lecture-problems 3 hours.)

### **370L. Control Systems Laboratory (1)**

Prerequisite: EE 370. Experiments which reinforce concepts learned in EE 370. Compensator design techniques. Real-time servomechanism modeling, velocity control and position control. (Laboratory 3 hours)

### **380. Engineering Probability and Statistics (3)**

Prerequisites: EE 310. Introduction to probability, statistics, random variables and their application. Not open to students with credit in EE 480. (Lecture-problems, computer projects 3 hrs.)

### **382. Communication Systems I (3)**

Prerequisite: EE 310. Review of Fourier series and transforms. Introduction to passive, active, and digital filters. Basic elements of probability theory, statistics, concept of white noise, AM, DSB, SSB and vestigial modulation, narrowband and wideband FM. (Lecture-problems 2 hours, laboratory 3 hours.)

### **386. Digital Signal Processing (3)**

Prerequisite: EE 310 or CECS 325. (Not open to students with credit in EE 485). Study of continuous-time signals and systems, and the corresponding discrete-time signals and systems. Z-transform analysis. Sampling theorem, analog-digital and digital-analog conversion approximation. Analysis and design of digital filters. Laboratory projects with Computer Aided Design (CAD) tools for implementing digital systems including Finite Impulse Response (FIR) and Infinite Impulse Response (IIR) filters. (Lecture-problems 2 hours, laboratory 3 hours.)

### **\*400D. Electrical Engineering Design Seminar and Project (2)**

Prerequisites: EE 347, 370, and 382; or permission of instructor. Design terminologies, processes and issues. Simple design examples. Constraints imposed by factors such as performance, economics, reliability, safety, aesthetics, packaging, codes, standards and practices. Ethics and social and environmental impact. Case studies. Open-ended solution. Specification and schedule of design projects. Individual and group projects. Oral presentation required. (Lecture-problems 1 hour, laboratory 3 hours)

### **\*401. Mathematical Methods for Electrical Engineers (3)**

Prerequisite: MATH 370A. Analytic techniques relevant to electrical engineering. (Lecture-problems 3 hours.)

### **\*405. Special Topics in Electrical Engineering (3)**

Prerequisites: Senior standing in electrical engineering or consent of instructor. Selected topics from recent advances in elec-

trical engineering. Course content will vary from year to year and may be repeated once for credit with the consent of the department undergraduate advisor. (Lecture-problems 3 hours)

### **\*406. Medical Instrumentation and Measurements (3)**

Prerequisite: EE 330 or consent of instructor. Design and analysis of medical instruments, electrodes and amplifiers for measurement of physiological signals. (Lecture-problems 3 hours)

### **\*406L. Biomedical Engineering Laboratory (1)**

Prerequisite or corequisite: EE 406. Laboratory study of medical instrumentation, transducers and computer data processing. (Laboratory 3 hours.)

### **\*407. Applications of Computers in Medicine (3)**

Prerequisites: EE 346 or consent of instructor. Principles of analysis and design of computers and data collection equipment for real-time on-line medical systems. (Lecture-problems, computer projects 3 hours)

### **\*408. Health Care Delivery Systems Engineering (3)**

Prerequisites: EE 406 or 407. Applications of engineering in health care delivery systems. Classroom and hospital studies of clinical engineering. Professional aspects of biomedical engineering including engineering support of medical care, employment practices and ethics. (Lecture-problems 3 hours.)

### **\*410. Analog Filter Design (3)**

Prerequisites: EE 310. Theory and design of active filters using operational amplifiers. Emphasis is placed on low-pass filters. (Lecture-problems 3 hours)

### **411./511. Linear Systems Analysis (3)**

Prerequisites: EE 370. Review of matrices and linear algebra. Z-transforms and difference equations. Continuous and discrete-time systems. Sampled-data systems. State-space linear system analysis. Stability, reachability, and observability. Minimal realization. State feedback and pole assignment. Asymptotic observers. Additional projects required for EE 511. (Lecture-problems 3 hours.) Traditional grading only.

### **428./528. Speech Signal Processing (3)**

Prerequisite: EE 386 or consent of the instructor. Principles and engineering applications of speech signal processing. Speech synthesis, recognition, encoding, and compression. Applications of neural networks. Additional projects required for EE 528. (Lecture-problems 3 hours.)

### **\*430. Analog Electronic Circuits II (3)**

Prerequisites: EE 330, 370; Prerequisite or Corequisite: EE 330L. Differential pairs, current sources, output stages, and integrated operational amplifiers. Op-amp applications and practical issues. Frequency response. Computer-aided circuit analysis and design. Feedback amplifiers and stability. Oscillators. (Lecture-problems 3 hours.)

### **\*430L. Analog Electronics Laboratory II (1)**

Corequisite: EE 430. Advanced transistor, operational amplifier, and linear-integrated circuits and systems design laboratory. Not open to students with credit in EE 433L. (Laboratory 3 hours)

### **\*432. Design of Analog Circuits and Systems (3)**

Prerequisites: EE 400D, 430. Corequisite: EE 410. Extensive laboratory projects. Building blocks such as practical amplifiers, transducers, signal sources, nonlinear circuits, phase-locked loops, D/A and A/D converters, ASICs. Noise. Computer-aided system design. (Lecture-problems 2 hours, laboratory 3 hours.)

### **434./534. Mixed-Signal IC Design (3)**

Prerequisites: EE 201, and 330 or 331, or consent of instructor. MOSFET modeling. Components and blocks. Design CAD tools. Noise coupling, system-on-chip considerations. Additional projects required for EE 534. (Lecture-problems 2 hours, laboratory 3 hours.)

### **\*435. Microelectronics (3)**

Prerequisites: EE 201, EE 330. Microelectronic fabrication processes and characterization of devices. Full custom design examples with small scale integration of bipolar, NMOS and CMOS devices, both analog and digital formats. (Lecture-problems 3 hours) Not open to students with credit in EE 420.

**\*435L. Microelectronics Laboratory (1)**

Corequisite: EE 435. Laboratory evaluation of IC process steps. Wafer probe, packaging, and final test. Empirical device model formulation from test data. (Laboratory 3 hours.) Not open to students with credit in EE 420L.

**445./545. Computer Networks (3)**

Prerequisite: EE 482 or consent of instructor. Design and analysis of computer communication networks including their topologies, architectures, protocols, and standards. Local area, baseband and broadband are covered as well as the use of fiber optics. Additional projects required for EE 545. (Lecture-problems 3 hours).

**446./546. Advanced Microprocessors and Embedded Controllers (3)**

Prerequisites: EE 346 and 347 or consent of the instructor. Advanced microprocessors including 32 bit 386, 486, Pentium and 64 bit Itanium. Hardware features and new instructions. Support for virtual memory, paging, privilege levels, multitasking and internal cache. Floating Point coprocessors. Embedded controllers, on-chip resources, and applications. Additional projects required for EE 546 (Lecture - problems 3 hours).

**\*447. Design of Electronic Systems (3)**

Prerequisites: EE 301 or 435, 346, 400D, 430. Extensive laboratory projects. Design of analog and digital systems. Computer-aided design including, for example, hardware descriptive language (HDL) and SPICE. (Lecture-problems 2 hours, laboratory 3 hours.)

**\*450. Electronic Control of Motors (3)**

Prerequisites: EE 350, 370. Multidisciplinary coverage of motor control. Characteristics of semiconductor power switches. Modeling and application of control theory to various types of motors. Bidirectional and four-quadrant converter topologies for motion control. Selection of drives to control AC and DC motors. Transient and steady-state motor control. Uninterruptible power supplies and adjustable speed drives. (Lecture-problems 3 hours).

**\*452. Computer Applications in Power Systems (3)**

Prerequisite: EE 350, or consent of instructor. Modeling of power generation, transmission, and distribution systems, load-flow analyses, short-circuit studies, voltage drop and power loss calculations, transient stability and optimal power flow analyses. Application of specialized computer software for power system design and analyses. (Lecture-problems 3 hours.)

**453./553. Protection of Power Systems (3)**

Prerequisites: EE 310, 350. Protective relays, instrument transformers, low-voltage and high-voltage circuit breakers, protection of generators and motors, transformer protection and transmission line protection. Relay coordination and commercial power systems. Application of computer programs for protective device coordination. Additional projects required for EE 553. (Lecture-problems 3 hours).

**\*455. Space Electric Power Systems (3)**

Prerequisites: EE 330, EE 350. A comprehensive treatment of characteristics of and requirements imposed by missions on spacecraft power systems, power sources, power conversion and control. Energy storage, electrical equipment, power converters and loads, power management. Effects of environment, future space missions and technological needs. (Lecture-problems 3 hrs)

**\*458. Design of Power System Components (3)**

Prerequisites: EE 330, 400D, and either 450, 452, or 453. Design of electrical, electrical and electromechanical components required for power conversion, control, transmission, distribution, protection and measurements in terrestrial and space electric power systems. (Lecture-problems 2 hours, laboratory 3 hours.)

**\*460. Electromagnetic Fields (3)**

Prerequisites: EE 310. Electric and magnetic field theory including propagation of planewaves in lossless and dissipative media. Maxwell's equations. Transmission lines. (Lecture-problems 3 hours).

**\*462. Electromagnetics and Applications to Wireless Systems (3)**

Prerequisite: EE 310. Electromagnetic field theory including transmission lines, vector fields, electrostatics and magnetostatics. Maxwell's equations and plane wave propagation. Waveguides and microstrip-RF circuit principles and devices. Radiation and antenna design. Wireless communication systems including satellite and cell-phone technologies. Not open to students with credit in EE 460 or 464. (Lecture-problems 2 hours, laboratory 3 hours).

**\*464. Electromagnetics and Applications to Electro-Optics (3)**

Prerequisite: EE 310. Electromagnetic field theory including transmission lines, vector fields, electrostatics and magnetostatics. Maxwell's equations and plane wave propagation. Electromagnetic formulation of geometric and Fourier optics. Semiconductor and gas laser applications to fiber-optic communication systems and electro-optic devices. Not open to students who have credit in EE 460 or 462. (Lecture-problems 2 hours, laboratory 3 hours).

**\*470. Digital Control (3)**

Prerequisites: EE 370L, 386. Analysis and synthesis of digital control systems. General application of both the Z-transform and the state-space approach for discrete system design. (Lecture-problems 2 hours, laboratory 3 hours) Traditional grading only.

**\*471. Design of Control Systems (3)**

Prerequisite: EE 400D. Corequisite: EE 470. Design of compensators using root-locus and Bode-plot methods. Design of state-space control systems and observers. Computer-aided design. (Lecture-problems 2 hours, laboratory 3 hours.)

**474./574. Robot Dynamics and Control (3)**

Prerequisite: EE 511 or consent of instructor. Basic methodology for analysis and design of robotic manipulators. Classification of robots. Homogeneous transformations, kinematics, dynamics, trajectory planning and control of robots. Application of robots in flexible manufacturing. Additional projects required for EE 574. (Lecture-problems 3 hours.)

**\*482. Communication Systems II (3)**

Prerequisites: EE 382. Information sources and communication systems. Orthogonal series representation of signals, pulse and digital modulation techniques, band-pass digital communication systems, special topics in communications. (Lecture-problems 3 hours)

**\*483. Digital Image Processing (3)**

Prerequisites: MATH 370A. Image formation. Image detectors and their characteristics. Perception, image models. Sampling and quantization. Pixel relationships. Statistical characterization of discrete images - probability density models. Image fidelity criteria and image intelligibility. Image transforms. Image enhancement techniques. (Lecture-problems 3 hours)

**\*486. Digital Signal Processing for Multimedia Communications (3)**

Prerequisite: EE 386. Digital signal processing and computation and analysis techniques. Discrete and fast Fourier transforms, discrete Hilbert transform, periodogram, spectrum and cepstrum analyses, and homomorphic deconvolution. Introduction to multi-rate signal processing. Projects with Computer Aided Design (CAD) tools for implementing DSP applications such as data compression, single sideband modulation, binary spread spectrum, and adaptive line enhancer. (Lecture-problems 2 hours, laboratory 3 hours.)

**\*488. Communication Systems Design (3) F**

Prerequisites: EE 400D, 430, 430L, 482. Application of communication theory to the design of communication systems/subsystems and their implementation with digital and analog integrated circuits. (Lecture-problems 2 hours, laboratory 3 hours.)

**\*489. Digital Signal Processing Design (3) S**

Prerequisites: EE 386, EE 400. Corequisite: EE 486. Design of digital filters, including Finite Impulse Response (FIR) and Infinite Impulse Response (IIR) filters. Design of digital signal processing systems and the implementation of digital filters with digital signal processors in real time. (Lecture-problems 2 hours, laboratory 3 hours.)

**\*490. Special Problems (1-3)**

Prerequisite: Consent of instructor. Assigned topics in technical literature or laboratory projects and reports on same. May be repeated for a total of six units.

**Graduate Division**

**505./605. Advanced Engineering Mathematics for Electrical Engineers (3)**

Prerequisites: EE 401 or equivalent or consent of the instructor. (Master's students register in EE 505; Ph.D. students register in EE 605.) Boundary-value problems and generalized Fourier (or eigenfunction) expansions. Review of Fourier series. Fourier transforms (FT, FFT and STFT), wavelet transform and its computer implementation. The Z-transform. The Hilbert transform. Solutions of partial differential equations using the methods of separation of variables, Laplace, Fourier and wavelet transforms, conformal mapping, numerical (finite difference, finite element), and experimental techniques. Additional projects required for EE 605. (Lecture-problems 3 hours.)

**506./606. Theory and Practice of Biomedical Instrumentation (3)**

Prerequisites: Graduate standing in engineering or natural sciences and either EE 406 or consent of the instructor. (Master's students register in EE 506; Ph.D. students register in EE 606.) Advanced design concepts and practical utilization of biomedical instrumentation. Transduction of physiological parameters. Theory and practice. Additional projects required for EE 606. (Lecture-problems 3 hours.)

**507./607. Advanced Biomedical Systems (3)**

Prerequisites: Graduate standing in engineering or natural sciences and either EE 406 or consent of the instructor. (Master's students register in EE 507; Ph.D. students register in EE 607.) Novel trends in biotechnology, design and organization of modern hospital systems and utilization of advanced technologies. Modeling and simulation of physiological and medical systems. Additional projects required for EE 607. (Lecture-problems 3 hours.)

**508. Probability Theory and Random Processes (3)**

Prerequisites: EE 380. Probability spaces, random vectors and processes, convergence concepts, stationarity and ergodic properties, second-order moments and linear systems, correlation and spectral representations. Some applications of random processes. (Lecture-problems 3 hours)

**509. Network Theory (3)**

Prerequisites: EE 386, 410 or 430. Network classifications and study of non-linear circuits. Analysis of linear networks using topological and state-space techniques. Characterization of networks using scattering and other parameters. Tellegen's theorem and its application. (Lecture-problems 3 hours.)

**510. Circuit Synthesis (3)**

Corequisite: EE 509. Synthesis of passive lumped networks, cascade synthesis (link with filter synthesis), realization of commensurate distributed networks, discrete passive networks. (Lecture-problems 3 hours.)

**511./411. Linear Systems Analysis (3)**

Prerequisite: EE 370. Review of matrices and linear algebra. Z-transforms and difference equations. Continuous and discrete-time systems. Sampled-data systems. State-space linear system analysis. Stability, reachability, and observability. Minimal realization. State feedback and pole assignment. Asymptotic observers. (Lecture-problems 3 hours.)

**514. Advanced Circuit Synthesis and Design (3)**

Prerequisite: EE 510. Scattering synthesis in (s-z) domains, wave digital filters. Lossless bounded-real two-port and orthogonal digital filters with an emphasis on structures suitable for VLSI implementation. (Lecture-problems 3 hours.)

**527. Digital Filter Design and Audio Processing (3)**

Prerequisite: EE 486 or consent of instructor. Frequency and time domain analysis using FFT, FIR, and IIR filter design and implementation techniques. Principles of digital audio processing, compression/decompression. Applications of audio coding standards,

such as MPEG audio and G.729. (Lecture-problems 3 hours.) Not open to students with credit in EE 513.

**528./428. Speech Signal Processing (3)**

Prerequisite: EE 386 or consent of the instructor. Principles and engineering applications of speech signal processing. Speech synthesis, recognition, encoding, and compression. Applications of neural networks. Additional projects required for EE 528. (Lecture-problems 3 hours.)

**531. CMOS Electronics (3)**

Prerequisite: EE 430. Electronic design automation CAD tools, silicon compilers, CMOS design, BiCMOS design (technologies, modeling, device characterization and simulation), CMOS and BiCMOS subcircuits, amplifiers, op-amps and systems. (Lecture-problems 3 hours.)

**532./632. Analog Signal Processing (3)**

Prerequisite: EE 430 or consent of the instructor. (Master's students register in EE 532; Ph.D. students register in EE 632.) Basic CMOS circuit techniques. Low-voltage and current-mode signal processing. Switched-capacitor (SC) and switched-current (SI) circuits such as amplifiers, integrators, S/H circuits, filters, oscillators, comparators, D/A and A/D converters. Advanced techniques for corrections of nonideal behavior. Analysis and simulation projects. Additional projects required for EE 632. (Lecture-problems 3 hours.)

**533./633. Quantum and Optical Electronics (3)**

Prerequisites: EE 430 and 460 or equivalent. (Master's students register in EE 533; Ph.D. students register in EE 633.) Modern quantum and optical concepts of relevance in lasers, fiber optics, optical technology and semiconductor solid state electronics. Basic theory and applications to state-of-the-art electronics engineering. Additional projects required for Ph.D. students. (Lec-prob 3 hrs)

**534./434. Mixed-Signal IC Design (3)**

Prerequisites: EE 201, and 330 or 331, or consent of instructor. MOS-FET modeling. Components and blocks. Design CAD tools. Noise coupling. System-on-chip considerations. Additional projects required for EE 534. (Lecture-problems 2 hours, laboratory 3 hours.)

**535. VLSI Design (3)**

Prerequisite: EE 430. Techniques for designing Very Large Scale Integrated (VLSI) circuits using n-channel metal oxide semiconductors (n-MOS). (Lecture-problems 3 hours). Not open to students with credit in EE 520.

**540. Advanced Digital System and Computer Architecture (3)**

Prerequisite: EE 446 or consent of instructor. High level computer architectures including studies of supercomputers, array processors, parallel processing, direct execution computers. (Lecture-problems 3 hr.)

**545./445. Computer Networks (3)**

Prerequisite: EE 482 or consent of instructor. Design and analysis of computer communication networks including their topologies, architectures, protocols, and standards. Local area, baseband and broadband are covered as well as the use of fiber optics. Additional projects required for EE 545. (Lecture-problems 3 hours.)

**546./446. Advanced Microprocessors and Embedded Controllers (3)**

Prerequisites: EE 346 and 347; or consent of the instructor. Advanced microprocessors including 32 bit 386, 486, Pentium and 64 bit Itanium. Hardware features and new instructions. Support for virtual memory, paging, privilege levels, multitasking and internal cache. Floating Point coprocessors. Embedded controllers, on-chip resources, and applications. Additional projects required for EE 546 (Lecture - problems 3 hours.)

**550. Power Electronics and Applications (3)**

Prerequisites: EE 350 and 430. Power converters: rectifiers, inverters, choppers and cycloconverters. PWM and PFM techniques. Harmonics and filters. Magnetics. Applications in motor controls in industrial systems, energy conversion, HVDC transmission, aircraft and spacecraft power systems. (Lecture-problems 3 hours.)

**551. Theory and Applications of DC/DC Converters (3)**

Prerequisite: EE 550 or consent of instructor. Modeling, analysis, design and application of DC/DC switch-mode converters. (Lec-prob 3 hrs.)

**552. Electric Machines and Robotic Applications (3)**

Prerequisites: EE 370, 452 or consent of instructor. Applications and design of small electric machines including stepper and brushless DC motors with emphasis on robotic control. Performance characteristics of electric machines interfacing with robotic systems. (Lecture-problems 3 hours).

**553./453. Protection of Power Systems (3)**

Prerequisites: EE 310, 350. Protective relays, instrument transformers, low-voltage and high-voltage circuit breakers, protection of generators and motors, transformer protection and transmission line protection. Relay coordination and commercial power systems. Application of computer programs for protective device coordination. Additional projects required for EE 553. (Lecture-problems 3 hours).

**563. Microwave Engineering (3)**

Prerequisite: EE 462. Propagation of guided waves in lossless and dissipative media. Radiation and antenna design. Waveguides, microstrip, microwave circuits. (Lecture-problems 3 hours).

**565. Photonics (3)**

Prerequisite: EE 464. Maxwell's equations applied to electro-optic devices and systems. Electromagnetic formulation of geometrical and Fourier optics. Topics include optics in semiconductors, fiber optics and integrated optics, lasers and holography. (Lecture-problems 2 hours, laboratory 3 hours).

**572. Linear Quadratic Control (3)**

Prerequisites: EE 471, 511. In depth study of the Linear Quadratic Regulator (LQR) problem. Stochastic control and the Linear Quadratic Gaussian (LQG) problem. Robustness properties and Loop Transfer Recovery. (Lecture-problems 3 hours.)

**574./474. Robot Dynamics and Control (3)**

Prerequisite: EE 511 or consent of instructor. Basic methodology for analysis and design of robotic manipulators. Classification of robots. Homogeneous transformations, kinematics, dynamics, trajectory planning and control of robots. Application of robots in flexible manufacturing. Additional projects required for EE 574. (Lecture-problems 3 hours.)

**580. Statistical Communication Theory (3)**

Prerequisites: EE 482, 505 and 508 or consent of instructor. Power spectral density of analog and digital communication signals. Matched filters. Signal-to-noise-ratio performance analysis for analog and pulse modulation systems. Vector space representation of digital signals. Error rate analysis for various signaling formats. Optimum digital receivers. Fading channels. (Lecture-problems 3 hours.)

**581. Satellite Communication Systems (3)**

Prerequisite: EE 580 or consent of instructor. Basic orbital mechanics, link analysis, multiple access architectures and protocols. FDMA, TDMA and CDMA systems. Synchronization techniques, modulation and coding techniques. Security and spread spectrum requirements. System design. (Lecture-problems 3 hours.)

**582. Spread Spectrum Communication Systems (3)**

Prerequisite: EE 580 or consent of instructor. Spread spectrum (SS) techniques. Direct sequence systems, frequency hopped systems. Generation and correlation properties of pseudo random sequences. Electronic jamming and interference. Processing gain against interference, carrier synchronization, code acquisition and tracking, information modulation and coding. Total SS system design considerations. Applications include ranging, combating multipath effects, code division multiple accessing in mobile satellite and cellular communication systems. (Lecture-problems 3 hours.)

**583./683. Digital Image Processing (3)**

Prerequisite: EE 505 or consent of the instructor. (Masters students register in EE 583; Ph.D. students register in EE 683. Acquiring Images. Correcting Imaging defects. Image enhancement. Segmentation and thresholding. Processing Binary images. Tomography. Three dimensional Imaging. Some image data compression techniques. Additional projects required for EE 683. (Lecture-problems 3 hours).

**584. Information Theory and Coding (3)**

Prerequisites: EE 482 and 508. Information measures, source coding, Shannon's first theorem, mutual information and channel capacity, Shannon's second theorem, coding techniques for reliable information transmission over noisy channels. (Lecture-problems 3 hours.)

**586. Real-Time Digital Signal Processing (3)**

Prerequisite: EE 486, EE or CECS 440, or consent of instructor. Digital signal processors architecture and language. Real-time DSP considerations and limitations. Digital filter and signal processing system implementations. (Lecture-problems 3 hours).

**589./689. Neural Networks and Fuzzy Logic (3)**

Prerequisite: EE 486 or consent of instructor. (Master's students register in EE 589; Ph.D. students register in EE 689.) Principles and applications of artificial neural networks and fuzzy logic. Mechanisms of supervised and unsupervised neural networks. Fuzzy Control Systems. Applications in signal processing, communications, control, and other areas. Additional projects required for EE 689. (Lecture-problems 3 hours.)

**590. Special Topics in Electrical Engineering (3)**

Prerequisites: Graduate standing in electrical engineering and consent of instructor. Selected topics from recent advances in electrical engineering. Course content will vary from year to year. Topics will be announced in the *Schedule of Classes*. May be repeated for a maximum of six units. (Lecture-problems 3 hours).

**605./505. Advanced Engineering Mathematics for Electrical Engineers (3)**

Prerequisites: EE 401 or equivalent or consent of the instructor. (Master's students register in EE 505; Ph.D. students register in EE 605.) Boundary-value problems and generalized Fourier (or eigenfunction) expansions. Review of Fourier series. Fourier transforms (FT, FFT and STFT), wavelet transform and its computer implementation. The Z-transform. The Hilbert transform. Solutions of partial differential equations using the methods of separation of variables, Laplace, Fourier and wavelet transforms, conformal mapping, numerical (finite difference, finite element), and experimental techniques. Additional projects required for EE 605. (Lecture-problems, 3 hours.)

**606./506. Theory and Practice of Biomedical Instrumentation (3)**

Prerequisites: Graduate standing in engineering or natural sciences and either EE 406 or consent of the instructor. (Master's students register in EE 506; Ph.D. students register in EE 606.) Advanced design concepts and practical utilization of biomedical instrumentation. Transduction of physiological parameters. Theory and practice. Additional projects required for EE 606. (Lecture-problems 3 hours).

**607./507. Advanced Biomedical Systems (3)**

Prerequisites: Graduate standing in engineering or natural sciences and either EE 406 or consent of the instructor. (Master's students register in EE 507; Ph.D. students register in EE 607.) Novel trends in biotechnology, design and organization of modern hospital systems and utilization of advanced technologies. Modeling and simulation of physiological and medical systems. Additional projects required for EE 607. (Lecture-problems 3 hours).

**610. Seminar in Circuit Theory and Design (3)**

Prerequisites: EE 509 and EE 510 or EE 527. Intensive study of current professional literature and recent techniques related to circuit theory. (Seminar 3 hours.) Course may be repeated to a maximum of 6 units with different topics.

**632./532. Analog Signal Processing (3)**

Prerequisite: EE 430 or consent of the instructor. (Master's students register in EE 532; Ph.D. students register in EE 632.) Basic CMOS circuit techniques. Low-voltage and current-mode signal processing. Switched-capacitor (SC) and switched-current (SI) circuits such as amplifiers, integrators, S/H circuits, filters, oscillators, comparators, D/A and A/D converters. Advanced techniques for corrections of nonideal behavior. Analysis and simulation projects. Additional projects required for EE 632. (Lecture-problems 3 hours.)

**633./533. Quantum and Optical Electronics (3)**

Prerequisites: EE 430 and 460 or equivalent. (Master's students register in EE 533; Ph.D. students register in EE 633.) Modern quantum and optical concepts of relevance in lasers, fiber optics, optical technology and semiconductor solid state electronics. Basic theory and applications to state-of-the-art electronics engineering. Additional projects required for Ph.D. students. (Lecture-problems 3 hours.)

**670. Seminar in Control Systems (3)**

Prerequisite: EE 572. Study of selected topics in the areas of synthesis and design of optimum control systems. (Seminar 3 hours.)

**675./775. Non-Linear Control Systems (3)**

Prerequisite: EE 511 or consent of instructor. (Master's students register in EE 675; Ph.D. students register in EE 775.) Methodologies and results dealing with stability and robust stabilization of nonlinear systems which can be applied to robotics, aerospace, artificial neural network, circuit theory etc. Phase plane analysis and limit cycles, Lyapunov stability theory and its extension. Positive real transfer matrix and passive systems, feedback linearization, feedback stabilization and tracking and robust control. Additional projects for EE 775 students. (Lecture-problems 3 hours.)

**683./583. Digital Image Processing (3)**

Prerequisite: EE 505 or consent of the instructor. (Masters students register in EE 583; Ph.D. students register in EE 683.) Acquiring Images. Correcting Imaging defects. Image enhancement. Segmentation and thresholding. Processing Binary images. Tomography. Three dimensional Imaging. Some image data compression techniques. Additional projects required for EE 683. (Lecture-problems 3 hours.)

**685./785. Advanced Digital Signal Processing (3)**

Prerequisites: EE 401, 486 or consent of instructor. (Master's students register in EE 685; Ph.D. students register in EE 785.) Advanced topics in digital signal processing including adaptive filters, spectral estimation and multimedia standards: JPEG, MPEG. State space description of linear discrete time systems. Realization and applications. Additional projects for EE 785. (Lecture-problems 3 hours.)

**689./589. Neural Networks and Fuzzy Logic (3)**

Prerequisite: EE 486 or consent of instructor. (Master's students register in EE 589; Ph.D. students register in EE 689.) Principles and applications of artificial neural networks and fuzzy logic. Mechanisms of supervised and unsupervised neural networks. Fuzzy Control Systems. Applications in signal processing, communications, control, and other areas. Additional projects required for EE 689. (Lecture-problems 3 hours.)

**697. Directed Research (1-3)**

Prerequisites: Graduate Standing. Theoretical and experimental problems in electrical engineering requiring intensive analysis.

**698. Thesis or Industrial Project (3-6)**

Prerequisite: Advancement to Candidacy. Planning, preparation and completion of a thesis (total 6 units), or industrial project (3 units), in electrical engineering.

**775./675. Non-Linear Control Systems (3)**

Prerequisite: EE 511 or consent of instructor. (Master's students register in EE 675; Ph.D. students register in EE 775.) Methodologies and results dealing with stability and robust stabilization of nonlinear systems which can be applied to robotics, aerospace, artificial neural network, circuit theory etc. Phase plane analysis and limit cycles, Lyapunov stability theory and its extension. Positive real transfer matrix and passive systems, feedback linearization, feedback stabilization and tracking and robust control. Additional projects for EE 775 students. (Lecture-problems 3 hours.)

**785./685. Advanced Digital Signal Processing (3)**

Prerequisites: EE 401, 486 or consent of instructor. (Master's students register in EE 685; Ph.D. students register in EE 785.) Advanced topics in digital signal processing including adaptive filters, spectral estimation and multimedia standards: JPEG, MPEG. State space description of linear discrete time systems. Realization and applications. Additional projects for EE 785. (Lecture-problems 3 hours.)

For information about programs of study in the Department of English, the department office can refer students to one of the coordinating faculty advisors: Undergraduate, Graduate, MFA, English Education, Composition, Creative Writing, Literature, Technical and Professional Writing, and the American Language Program. Regular office hours for all English faculty are posted near the department office, and information sheets are available detailing which faculty members regularly advise for specific options. Students should establish a file folder in the department when they first appear for major advising. Unofficial transcripts from other institutions are needed to establish continuity, waive requirements, or substitute equivalent courses.

In the discipline of English, the department's teaching-learning emphasis is on developing and sustaining each student's own critical reasoning, imagination, and expressive skills, including clarity, coherence, and respect for truth and meaning. Just as literature broadens and deepens one's experience of life, the study and practice of language and writing sharpen and clarify one's thinking. Learning to see and to seek out expressive possibilities of language in fiction, drama, poetry, essays, and the mass media also adds dimension and meaning to the experiences of life.

The course of study for the undergraduate English major enlarges the literary background of students and prepares them for graduate study, teaching, or careers in business, law, and other professions.

In all options for the major, study of a foreign language is recommended. Ideally, acquaintance with a foreign language should begin before University study, but a student can also gain a great deal by beginning language study at the university level and continuing it through upper-division courses. Because most advanced degrees require knowledge of at least one foreign language, students aiming at such degrees should definitely include language study in their undergraduate programs.

## Bachelor of Arts in English

While planning a program of courses for the major in English, a student should consider the opportunities and limitations of the different options detailed below. For each option, official Program Planners are available in the department office. They require faculty consultation and approval for a graduation audit, but students should also consult department faculty for advising when choosing a program in English and regularly after making that choice.

For all options, the major in English consists of at least 41 units. Because ENGL 100 satisfies a University general education requirement, it is not part of any English option. Some options permit or require courses from other departments; if approved by a faculty advisor, options may also include other courses outside English. Because some courses meet requirements in several options, many students can change options with no great loss of credit toward the required total.

In rare instances, a student may accelerate completion of the major in English by taking advantage of the department's credit by examination policy. Certain courses may also be waived or substituted for under certain circumstances. Consult a department advisor for the option concerned.

### Option in Creative Writing (code 2-6831) (120 units)

The Creative Writing option is designed for students who wish to write, as well as to study, fiction, poetry, plays, or media scripts. Exposure to traditional and recent literature is also of significant value for anyone seeking to master the forms and conventions of writing creatively for the literary marketplace. (Students seeking a Secondary Credential should complete the Creative Writing emphasis of the English Education option.)

This option consists of 41 units, 26 of which must be upper division, including the following:

Lower Division: ENGL 184, 205 or 206, 250A,B.

Upper Division: nine units in creative writing chosen from ENGL 405, 406, 407, 408, 499; FEA 404; THEA 380, 480; three classes chosen from the following in recent literature, literary genres, and literary criticism: ENGL 384, 385, 386, 459, 467A,B, 469, 474, 475, 476, 477A,B, 478, 479; electives to make up a total of 41 units chosen from the classes listed above and/or any upper-division English courses.

### Option in English Education (code 2-6803) (120 units)

The English Education option is designed for prospective secondary English teachers and satisfies the state-mandated requirement in subject matter competence for the Single Subject Teaching credential. The option combines a 35-unit core with a specified emphasis in one of nine areas. Areas of emphasis vary in the number of breadth and perspective units required beyond the core as indicated below.

Students must complete the following core courses for all emphases: ENGL 184, 310, 327 (or LING 327), 363, 375, 410, 482, LING 339; ENGL 250A or 250B; ENGL 370A or 370B.

In addition to the English Education option, credential candidates must complete 33 units of professional preparation in the Single Subject Credential Program (see Single Subject Teacher Education). Students may begin the professional preparation course as early as the junior year. With careful planning, students may complete all English Education courses and professional preparation courses, other than student teaching, prior to graduation. Prospective majors should consult an English Education advisor early to plan their programs.

English Education emphases should not be confused with B.A. options or majors in English or other departments, which have significantly different requirements.

#### Black Studies Emphasis

Students are required to complete the core of thirty-five (35) units and eighteen (18) units to provide breadth and perspective.

Breadth and Perspective (18 units): B/ST 140, 343, 415, 499 (minimum of 3 units); select three units from B/ST 155, 201, 370; select three units from B/ST 180, 240, 340, 346.

#### Comparative Literature Emphasis

Students are required to complete the core of thirty-five (35) units and fifteen (15) units to provide breadth and perspective.

Breadth and Perspective (15 units): select three units from C/LT 101, 361; select three units from C/LT 100, 330A, 330B; select three units from C/LT 250, 251, 410, 412I, 451I, 461; select three units from C/LT 234, 235, 236, 403, 415I, 440; select three units from C/LT 310I, 312I, 414I, 422I, 431, 432, 438.

#### Creative Writing Emphasis

Students are required to complete the core of thirty-five (35) units and eighteen (18) units to provide breadth and perspective.

Breadth and Perspective (18 units): select nine units from ENGL 405, 406, 407, 408, 499; select nine units from ENGL 385, 386, 459, 463, 467A, 467B, 474, 475, 476, 477A, 477B, 478.

#### Journalism Emphasis

Students are required to complete the core of thirty-five (35) units and a minimum of twenty-one (21) units to provide breadth and perspective.

Breadth and Perspective (21 units minimum): JOUR 110, 120, 319A, 320, 331, 430; select a minimum of three units from JOUR 300, 312I, 319B, 370, 422, 431, 490, 499.

#### Language and Linguistics Emphasis

Students are required to complete the core of thirty-five (35) units and eighteen (18) units to provide breadth and perspective.

Breadth and Perspective (18 units): select six units from LING 420, 421; select six units from LING 485 (or ED P 485), 486; select three units from ANTH 421 or LING 472; select three units from ENGL 435, LING 460.

#### Literacy and Composition Emphasis

Students are required to complete the core of thirty-five (35) units and a minimum of fifteen (15) units to provide breadth and perspective.

Breadth and Perspective (15 units minimum): ENGL 435, 436; select a minimum of six units from ENGL 309, 496, 497, LING 460; select three units from ENGL 300, 317, 405, 406, 407, 417, 418.

#### Literature Emphasis

Students are required to complete the core of thirty-five (35) units and a minimum of fifteen (15) units to provide breadth and perspective.

Breadth and Perspective (15 units minimum): ENGL 384; select three units from ENGL 451, 452, 453, 455, 456, 458, 459; select a minimum of three units from ENGL 474, 475, 476, 477A-B, 478, 479; select three units from ENGL 318I (or FEA 318I), 385, 386, 398; select three units from C/LT 100 or any upper division English course.

#### Speech Communication Emphasis

Students are required to complete the core of thirty-five (35) units and twenty-one (21) units to provide breadth and perspective.

Breadth and Perspective (21 units): select six units from COMM 110, 130, 171; select six units from COMM 331, 333, 335; select nine units from COMM 306, 309, 330, 355, 410, 411.

### Theatre Arts Emphasis

Students are required to complete the core of thirty-five (35) units and twenty-three (23) units to provide breadth and perspective.

Breadth and Perspective (23 units): THEA 101, 114A, 142, 148, 321, 374, 476; select one unit from THEA 310A or 340A.

### Discontinued Emphases

Emphases in American Studies, Dance, and Radio/TV/Film were discontinued December 1997 in compliance with the Commission on Teacher Credentialing of the State of California.

### Option in Language and Composition (code 2-6829)

The Language and Composition option has been discontinued. Students who officially declared this option as a degree objective prior to Fall 1996 may complete it with the required courses or approved substitutions. Students wishing to begin a comparable program after Summer 1996 should pursue an option in Language and Linguistics, Literacy and Composition, or Special Emphasis.

### Option in Language and Linguistics (code 2-6825) (120 units)

The Language and Linguistics option is designed for students who desire a balanced program (language and literature, plus some focus on written communication) which emphasizes the linguistic needs of California students and teachers, particularly in a second language context. This option provides background for graduate study in linguistics and other fields, for Teaching English as a Second Language (TESL), for language minority education, and for fields involving intensive language acquisition and communication. (Students seeking a Secondary Credential should complete the Language and Linguistics emphasis of the English Education option.)

This option consists of 41 units total, 29 of which must be upper division, including the following:

Lower division: ENGL 184, 250A or 250B.

Upper division: ENGL 370A or 370B, LING 329; LING 327 (or ENGL 327) or 363I; three courses from ENGL 426 (or LING 426), LING 420, 421, 426; two courses from LING 472, 485, 486; one course from ENGL 300, 310, LING 460; electives to complete 41 units from courses listed and/or ENGL 499, 481, 482.

### Option in Literacy and Composition (code 2-6826) (120 units)

The Literacy and Composition option is designed for students who desire a balanced program of composition, literature, and language study with particular emphasis on the ways literacy is defined and promoted in our society. This option prepares students for graduate study in English, rhetoric and composition, and literacy studies, for teaching on virtually all levels, and for fields involving intensive writing and communi-

cation skills. (Students seeking a Secondary Credential should complete the Literacy and Composition emphasis of the English Education Option.)

This option consists of 41 units, 29 of which must be upper division, including the following:

Lower Division: ENGL 184, 250A, B.

Upper Division: ENGL 410, 436; one course in composition: either 309 or 310; two courses from ENGL 435, 496, 497, LING 329; two courses from ENGL 300, 317, 337, 405, 407, 417, 418, 419; electives to make up a total of 41 units. Recommended additional courses, ENGL 370A, 370B, 385, 390, 421, 423, 426, 482.

### Option in Literature (code 2-6830) (120 units)

The Literature option is designed for students who desire a thorough grounding in English and American literature, particularly those planning on graduate study in English. Students aiming at advanced degrees should take as many of the recommended electives as possible. (Students seeking a Secondary Credential should complete the Literature emphasis of the English Education option.)

This option consists of 41 units, 29 of which must be upper division, including the following:

Lower Division: ENGL 184, 250A,B.

Upper Division: ENGL 384; three courses in English literature: 363 and either two courses from the 450 series or one course from the 450 series and one course from 462, 463, 467A,B, 468; three courses in American literature: 370A,B and one course from 474, 475, 476, 477A,B, 478; one senior seminar: 469 or 479; electives to make up a total of 41 units. Recommended: 431 (Classical Background); additional courses in the 450, 460, 470 series: 405, 406, 407, 499, C/LT 330A,B.

### Option with Special Emphasis (code 2-6827) (120 units)

Some students wishing to major in English have special interests or career objectives so different from those for which the other options are designed that another pattern of courses would better serve their personal educational needs. For those students, the Special Emphasis option offers an opportunity to pursue individually designed 41-unit programs of study. Student programs may center on technical writing, for example, or other writing goals; they may focus on American or English literature or literature in a particular genre, a particular historical period, or a particular theme.

A Special Emphasis program may include courses outside the Department of English closely related to a student's focus in English studies. At least 21 units must be earned in the Department of English and at least 21 units of the program must be upper division. For degrees with more than four courses in any single other department, students should consider a Special Major in the Interdisciplinary Studies Program.

Students wishing to take the Special Emphasis option should prepare a detailed program proposal early in their college careers. Such programs will be recognized only if planned in consultation with a faculty advisor in the Department of English, approved in writing by the advisor, given signed approval by the Department Chair, and carried out under the advisor's continuing supervision. Students must complete at least 15 upper-division units applicable to their Special Emphasis program after it has been officially approved.

The only specific course requirements and limitations are the following: ENGL 184, Composition and Literature (four units); ENGL 384, Principles of Literary Study (three units).

Electives in English and related fields are needed to make up a total of 41 units. These electives may not include ENGL 100 or 101.

## Minor in English

### Creative Writing (code 0-6831)

The Creative Writing minor in English requires a minimum of 21 units and includes the following: ENGL 184; three units from ENGL 205 or 206, three units from ENGL 405 or 406; three units from ENGL 385 or 386; and eight units of electives from ENGL 405, 406, 407, 459, 467A,B, 474, 475, 476, 477A,B, 499. (Note: ENGL 405 and 406 may be repeated for credit to a maximum of six units by consent of instructor.)

### Language and Composition (code 0-6829)

The Language and Composition minor in English requires a minimum of 20 units and must include: ENGL 310, 497, LING 420, and 421. Also recommended are three units from ENGL (or LING) 423 or 426.

### Literature (code 0-6830)

The Literature minor in English requires a minimum of 21 units and must include: ENGL 184; eight units from ENGL 250A,B, 370A,B, and nine units of electives from ENGL 363, 385, 386, 390, 398 and/or any courses from the 450, 460, or 470 series.

### Special Emphasis (code 0-6828)

The Special Emphasis minor in English requires a minimum of 21 units in a program developed, approved, and supervised in the same manner as the Special Emphasis Option. ENGL 184 is required of all students, with the rest of the program constructed in consultation with a faculty advisor. At least 9 upper division units must be taken after program approval, and at least 11 units must be earned in the Department of English.

### Teaching Emphasis (code 0-6803)

The Teaching Emphasis minor in English requires a minimum of 21 units and includes the following: ENGL 184, 310, 482; eight units from ENGL 250A,B, 370A,B; three units from ENGL (or LING) 327 or LING 329. This minor meets State of California requirements for a supplemental teaching area in the Single Subject Credential.

### Certificate Program in Teaching English as a Second Language (code 1-6050)

The Certificate Program in Teaching English as a Second Language is conducted by the Linguistics Department faculty. Please refer to the Linguistics sections of this *Catalog*.

### Certificate Program in Technical and Professional Writing (code 1-6060)

The Department of English offers a Certificate in Technical and Professional Writing to students interested in careers in writing and editing. Application forms and advising materials may be obtained from the department office.

## Prerequisites

1. Formal consultation with a faculty advisor in the Technical and Professional Writing (TPW) Certificate program;
2. Submission of an application to enter the program, supported by transcripts;
3. Upper division or post-baccalaureate standing at CSULB with a grade point average of at least 2.75 overall;
4. Admission to a degree program in this university or possession of a degree from an accredited university;
5. Successful completion of English 317, Technical Writing, with a letter grade of "C" or higher.

## General Requirements

1. A baccalaureate degree, which may be taken concurrently with the Certificate in Technical and Professional Writing;
2. A minimum of 24 units in courses approved for the Certificate Program at this University, preferably completed within 10 years of the first credit granted toward the Certificate (consult an advisor concerning any transfer or extension credit that may be allowable);
3. A letter grade of "C" or higher in every course in the Certificate program (a grade of "CR" is acceptable in no more than one course);
4. Completion of a program of courses in Areas I through IV, developed in consultation with an advisor in the Technical and Professional Writing Certificate program, and approved by the Program Director and the Dean of the College of Liberal Arts (or the Dean's designee);
5. Demonstrations (in or outside the program of courses) of competence in the use of computers and graphic media;
6. Development of a portfolio of reports, written and edited by the student during enrollment in the Certificate program, for review and approval by faculty in the Technical and Professional Writing Certificate program (required for a grade in English 492A/B, Area IV).

## Course Requirements

For each of the following courses, TPW Certificate students have been granted enrollment rights equal to those of students majoring in the Department offering the course. Substitutions are possible, especially in more advanced courses, with approval by the Program Director.

*Area I:* Technical and Professional Writing (9 units):

ENGL 417, 418, and one from the following courses: ART 307, 309; CRIM 302; ET 300; ENGL 419; GEOL 420; JOUR 355, 455.

*Area II:* Language Studies (4 units): ENGL 319, 320.

*Area III:* Electives chosen from the following courses (minimum 8 units):

*Analytical Reading:* ENGL 384, 423; GEOG 380; HIST/PHYS 4001; PHIL 381; COMM 301; NSCI 375;

*Business/Professional Skills:* ACCT 201; FIN 220, JOUR 370; MKTG 300, 330; COMM 334, 335, 344;

*Computer Applications:* CECS 174; IS 240; JOUR 331; MGMT 426; NSCI 200; SOC 200;

*Creative Writing:* ENGL 405, 406, 407; FEA 304, 404; THEA 380;

*Intercultural Communication:* ANTH 412I, 413; COMM 330; MKTG 480;

*Visual Communication*: ET 170; GEOG 200; JOUR 305; ME 172.

*Area IV: Practical Writing* (3 units): ENGL 491 (1 or more units), 492A (2 or more units). No grade in ENGL 492 will be assigned without an approved portfolio, as indicated in Paragraph 6, General Requirements.

## GRADUATE PROGRAMS

The Department of English offers two graduate degrees, an M.A. in English and an MFA in Creative Writing. Teaching assistantships are available in both. Application information may be obtained from the Department office, (562) 985-4223.

### Master of Arts in English (code 5-6830)

The Department of English offers graduate study leading to the Master of Arts degree. The candidate must satisfy the general requirements stated in this *Catalog* as well as the specific departmental requirements stated here and, more fully, in the Master of Arts brochure issued by the department (copies of which are available upon request). The candidate must file transcripts of all college work with the Department and must consult a graduate advisor to plan a tentative program. The deadline for submitting an application for Fall semester is May 1; the deadline to apply for Spring is October 15.

#### Prerequisites

An applicant may be admitted to the M.A. program in English only after satisfying University requirements for admission and the following prerequisites to this degree:

1. A Bachelor of Arts degree in English from an accredited institution or a bachelor's degree from an accredited institution with 24 units of upper division English courses that offer a broad coverage of English and American literature.

Any deficiencies will be determined by the Department Graduate Advisor in consultation with the Graduate Studies Committee. Courses used to remove course or unit deficiencies may not be included in the M.A. program.

2. A 3.2 GPA in upper division English courses.

#### After Admission to Program

Students must be formally admitted to the program before they can enroll in ENGL 696, which is pre-requisite or co-requisite to all other 600-level courses.

#### Advancement to Candidacy

1. The student must satisfy the general requirements of the University, including passing the Writing Proficiency Examination (WPE).
2. The student's M.A. program must be approved by a faculty graduate advisor, the Department Graduate Advisor, and the Department Chair before submission to the Associate Dean of Liberal Arts.
3. Advancement to candidacy should take place upon completion of at least six units (and preferably no more than nine units) in the M.A. program. Advancement to candidacy must take place no later than the semester preceding the awarding of the degree.

#### Requirements

1. A minimum of 30 units of approved upper division (indicated in the *Catalog* with an asterisk\*) and graduate courses including 24 units in English;
2. A minimum of 20 units in the 500 and/or 600 series in English at this University, 16 of which must be in the 600 series, including ENGL 696, which is to be completed before or concurrently with other 600-series courses. (A student will not be granted credit for 600-series courses unless admitted to the M.A. program);
3. A minimum of one seminar in the 600 series in English literature before 1800;
4. A foreign language requirement, which may be fulfilled in one of the following ways:
  - a. completing college course work in a foreign language equivalent to sophomore proficiency (normally 201B at this University) with "C" or better;
  - b. completing college course work in a foreign language equivalent to freshman proficiency (normally 101B at this University) with "C" or better and completing either ENGL 550 or ENGL 551 with "B" or better;
  - c. earning a passing score equivalent to sophomore proficiency on the Graduate School Foreign Language Test, administered by the University's Testing Office (passing scores: French 570, German 610, Russian 500, Spanish 560);
  - d. passing a special examination or demonstrating native proficiency in any foreign language accepted by the Graduate Studies Committee.

NOTE: Students planning to enter a doctoral program should strive for sophomore-level proficiency in at least one foreign language, whether demonstrated by course work or examination. Most institutions granting doctorates in English demand reading proficiency in two foreign languages. Ph.D. aspirants should also consider taking both ENGL 550 and ENGL 551, since some doctoral programs require Old and Middle English.

5. Successful completion of a final comprehensive examination in a specified specialty area. (Students who fail the examination may retake it once only.) A thesis may be written in lieu of the examination;
6. Appropriate filing for Graduation Check and for Diploma. Teaching assistantships are available in the Department of English. In addition, the Department's tutoring program, the Writer's Resource Lab, employs a number of graduate and undergraduate students each semester. Application for both of these programs may be obtained from the Department office at (562) 985-4223.

### Master of Fine Arts in Creative Writing (code 7-6831)

The Master of Fine Arts degree in Creative Writing is the recognized terminal degree which offers the minimum professional training deemed necessary by the major schools in the United States for university and college teaching and for positions in the publishing industry. It is also the degree most frequently held by professional writers. The Department of English at California State University, Long Beach is a fully accredited program that meets the standards of the State of California.

## Criteria for admission to the program

1. Students applying for admission to the MFA degree program generally have completed a bachelor's or master's degree in English from an accredited institution with a 3.2 GPA in upper division English courses, meet university admission requirements, and submit evidence of creative ability in fiction or poetry (20 pages poetry, 30-40 pages fiction). For each annual cycle, applications are due by February 15, when review will begin.
2. When an undergraduate degree has been completed in a program having different requirements from those of CSULB or in some field other than English, additional preparation may be required before the student can be considered for classified status in the degree program.
3. At the time of the student's conditional classification into the program, an examining diagnostic committee consisting of at least two instructors in the student's field of specialization and at least one other faculty member must approve and evaluate the student's work no later than the end of his/her first full year in residence and judge whether the student should continue in the program.
4. In order to obtain a full classified status, the student must obtain satisfactory evaluation from his/her committee at the end of the first full year in residence. Both the student's coursework and the student's portfolio will be evaluated. The appeals procedure for unfavorable portfolio evaluation is as follows:

If the student feels that his/her work has been unfairly evaluated, that student has recourse any time to discuss the matter informally with the MFA Coordinator in order to resolve the issue. If the issue cannot be resolved on that basis, the following procedure shall be followed:

  - a. The student shall present a written appeal to the MFA Coordinator.
  - b. Within ten (10) working days of receipt of a written appeal by a student, the MFA Coordinator shall refer the appeal to an ad hoc committee consisting of three tenured creative writing faculty not involved with the issue.
  - c. The committee shall meet in formal sessions holding hearings at separate times for the student and for the faculty involved to gather information and evidence relevant to the issue.
  - d. After deliberation, the committee shall present its findings to the MFA Coordinator within thirty (30) working days from the origination of the committee. (Working days do not include periods of time between semesters.)
  - e. The MFA Coordinator shall inform the concerned student in writing of the committee's decision.
5. Advancement to candidacy
  - a. Attain fully classified status.
  - b. Remove all undergraduate deficiencies as determined by the graduate advisor, the department chair, and the dean of graduate studies.
  - c. Pass the Writing Proficiency Examination.
  - d. Submit a program of courses for approval by the student's faculty advisor.
6. Up to 24 units of credit from a Master of Arts program in Creative Writing may be acceptable after review and approval by the faculty evaluation committee.

7. Requirements for the Master of Fine Arts in Creative Writing
  - a. The MFA degree is a sixty-unit degree normally requiring full-time residency. Course requirements are arranged according to the following structure.

Core Courses: (39 units, to be chosen on the basis of consultation with a faculty advisor, to include): ENGL 505A,B or 506A,B; 590A; 590B; 605A,B or 606A,B; 584; 590; 598; 696; 698.

Elective Courses: (21 units, to be chosen on the basis of consultation with a faculty advisor, to include): ENGL 523, 526, 535, 537, 550, 551, 552, 553, 554, 555, 556, 558, 559, 562, 567A, 567B, 568, 574, 575, 576, 577A, 577B, 578, 583, 652, 653, 655, 656, 657, 659, 672, 673, 674, 681; FEA 404; \*THEA 380, \*THEA 480.

\* may be counted for graduate credit
  - b. Both fiction and poetry specializations share a common core of courses which offer study in literary history, theory, and research. The remainder of the courses offer students the opportunity to develop additional skills in their particular area of related interest. The program culminates in a major creative project (novel, short story collection, or poetry collection) of publishable quality.

## Courses (ENGL)

To encourage clarity and uniformity in the reporting of scholarship, students in all English courses are expected to learn and use standard methods of citation and documentation. For literary and critical study, the standard format is the documentation system prescribed by the Modern Language Association, detailed in the *MLA Handbook*, and simplified in many beginning textbooks in literary study. At the instructor's discretion, other methods may be used in courses in composition, technical writing, literacy studies, and other classes required for the English Education option.

### Lower Division

Please check the section on "Application Procedures and Admissions Requirements" of this *Catalog* for CSU system-wide writing proficiency requirements.

#### 001. Writing Skills (3)

Required of all entering students who score between 142 through 150 on the English Placement Test and who have not taken an equivalent writing skills course in another department. Does not count toward graduation but does count toward course load. A basic course in writing, offering intensive practice in every stage of the writing process from the generation of ideas to final proofreading. Reviews organization, paragraph and sentence development, appropriate word choices, and conventional mechanics, including spelling. Credit/No Credit grading only.

#### 001E. Writing Skills (4)

An equivalent, yet more intensive, ENGL 001 course. Students who score 147 or below, and who have not taken equivalent writing courses in another department, are eligible for enrollment in this course. Does not count toward graduation but does count toward course load. A basic course in writing, offering intensive practice in every stage of the writing process from generating ideas to final proofreading. Reviews and teaches organizational strategies and includes strategies for paragraph and sentence development and for making appropriate word choices. Teaches conventional mechanics, spelling, and the grammar of standard edited written English. Credit/No Credit grading only.

#### 100. Composition (3)

Prerequisite: A recorded total score of 151 or above on the English Placement test, or credit in ENGL 001 (or its equivalent) and con-

sent of the instructor. Writing non-fiction prose, with emphasis on exposition. Readings may be assigned. Satisfies the baccalaureate degree requirement for one course in English composition. Same course as ENGL 100W. Not open to students with credit in ENGL 100W. (CAN ENGL 2)

### 100W. Composition (3)

Prerequisites: A recorded total score of 151 or above on the English Placement Test, or credit in ENGL 001 (or its equivalent) and consent of the instructor. Integrating a large group lecture (1 hour) and small lab (2 hours) setting, writing non-fiction prose, with emphasis on exposition. Readings may be assigned. Satisfies the baccalaureate degree requirement for one course in English composition. Same course as ENGL 100. Not open to students with credit in ENGL 100.

### 101. Composition (3)

Prerequisite: ENGL 100. Writing expository prose, with emphasis on the research paper.

### 102. Critical Reading and Writing (3)

Prerequisite: ENGL 100 with a minimum grade of "C." Analytical reading and persuasive writing with emphasis on logic and argumentation. (Not open to students with credit in ENGL 200.)

### 180. Appreciation of Literature (3)

Prerequisites/Corequisites: One Foundation course. Study of works representing the scope and variety of themes and types of imaginative literature. (Not applicable toward an English major. Not open to students with credit in ENGL 184.)

### 184. Composition and Literature (4)

Prerequisite: ENGL 100. Introduction to the major literary genres and to methods of critical expository writing, including methods of research and documentation. Required of all English majors. Open to non-majors with consent of instructor.

### 204. Introduction to Creative Writing: Creative Nonfiction (3)

Practice in the basic elements of creative nonfiction writing, including description, dialog, and framing.

### 205. Introduction to Creative Writing: Fiction (3)

Prerequisite: ENGL 100; completion of GE Foundation requirements. Practice in the basic elements of fiction writing: character sketch, plot development, description, dialog.

### 206. Introduction to Creative Writing: Poetry (3)

Prerequisite: ENGL 100; completion of GE Foundation requirements. Theory and techniques of poetry. Practice in creative work, with group discussions and individual conferences.

### 250A,B. Survey of English Literature (4,4)

Prerequisite: ENGL 100; completion of GE Foundation requirements. Representative selections from English writers to and since the late eighteenth century. (CAN ENGL 8, 250A; CAN ENGL 10, 250B)

### 283. Science Fiction (3)

The literature of science fiction, from *Frankenstein* and H.G. Wells to the present, emphasizing the relevance of science and technology to literary fantasy.

### 285. Detective Fiction and Film (3)

Prerequisites: ENGL 100. A course designed to acquaint students with the variety of short stories, novels, and films available in the genre of detective fiction. These works, both on paper and on film, will be discussed using traditional literary analyses.

## Upper Division

General Education Category A must be completed prior to taking any upper division course except upper division language courses where students meet formal prerequisites and/or competency equivalent for advanced study. Therefore, ENGL 100 or its equivalent is a prerequisite for all upper division courses.

An asterisk (\*) next to a course number means the course is acceptable for the M.A. degree. An "I" next to a course number means the course is acceptable for Interdisciplinary Credit in General Education.

### 300. Advanced Composition (3)

Writing expository prose, with emphasis upon organization, style and diction.

### 302E. Writing Fluency (3)

Prerequisite: ENGL 100. An advanced course in English language development for students for whom English is a second language. It is open to students who need to develop further their academic writing after having completed ENGL 100. It is recommended that students have a score of 9 or 10 on the CSULB Writing Proficiency Exam. Class size is limited to 18 students. Course may be repeated in different semesters to a maximum of 6 units. Traditional grading only.

### 309. Applied Composition: Explorations in Children's Writing (4) F,S

An advanced composition course also incorporating the study of the evolution of written discourse and emergence of rhetorical structures in the writing of pre-adolescents. The course includes a 30-hour tutorial/research component. Discussion/Laboratory.

### 310. Applied Composition (4)

Prerequisite: ENGL 101 or 184 or 317 or a baccalaureate degree. Intensive practice in writing, correcting and evaluating compositions, with specific reference to contemporary classroom situations and problems. The course includes a 30-hour tutorial component in which students work as composition tutors. Required for all English credential candidates.

### 317. Technical Writing (3)

Expository writing on technical subjects dealt with in industry, science, and government. Long and short forms including reports, proposals, manuals, and journal articles, with emphasis on the longer research paper or technical report.

### 318I. Theory of Fiction and Film (3)

Prerequisites: Completion of GE Foundation requirements, one or more Explorations courses, and upper-division standing. Examination of the narrative methods and conventions of American and British fiction and the methods and conventions of film; consideration of the relationships between the artistic structure of fiction and film; study of theoretical and practical approaches to fiction and film. Same course as FEA 318I.

### 319. Technical Editing (4)

An introduction to the editing of written technical and business communication formats such as manuals, brochures, booklets, and newsletters. Students will demonstrate competence in the principles of English grammar, of checking for accuracy, and of document design and production in professional settings.

### \*320. English Grammar (4)

Advanced study of the principles of English grammar.

### 327. Essentials of the English Language (3)

Prerequisites: ENGL 100 or its equivalent. Introduction to the essentials of English language study for credential candidates, including the history of the English language, key models of English grammar, and a variety of applied topics ranging from semantics and dialect study to current research in the teaching of English. Same course as LING 327.

### 337. Technology in the English Classroom (3)

Meets Title 5 computer-education requirements for the Single Subject, Clear Teaching Credential in English and the Multiple Subject, Clear Teaching Credential with English Concentration. Focuses on: (1) issues in the use of computer-based technologies in society; (2) basic components and operations of computer-based technology; (3) computer applications/programs and video tape/film for teaching problem-solving, critical thinking, writing, and literature. Applications include brainstorming, outlining, word processing, document checking, desktop publishing, data processing, document checking, desktop publishing, data bases, telecommunications, networking, program development, drills, and instructional management.

### 363. Shakespeare I (4)

Prerequisites: ENGL 100; completion of GE Foundation requirements. Principal plays of Shakespeare.

- 370A,B. Survey of American Literature (4,4)  
Prerequisites: ENGL 100; completion of GE Foundation requirements. Representative selections from American writers to and since about 1865.
- 372I. Comedy in the United States (3)  
Prerequisites: Completion of GE Foundation requirements, one or more Explorations courses, and upper-division standing. A study of the history of American humor from beginnings to the present. Most of the representative works studied will be from literature; however, considerable attention will be devoted to manifestations of American tradition of humor found on stage, in film, in song, and in signs. Theories of comedy will be included in discussion.
375. American Ethnic Writers (3)  
Prerequisites: ENGL 100; completion of GE Foundation requirements. A survey of American writers of various non-European ethnic backgrounds who have made major contributions in all literary genres.
382. Women and Literature (3)  
Prerequisites: ENGL 100; completion of GE Foundation requirements. Images of women in English literature; works in various genres that present the range and complexity of women's lives; feminist critical approaches and bibliographic resources. Same course as W/ST 382.
384. Principles of Literary Study (3)  
Prerequisite: ENGL 184. Fundamental issues of literary study such as literary history; literary forms; themes and conventions; major critical approaches. Intense written practice in literary analysis.
385. The Short Story (3)  
Prerequisites: ENGL 100; completion of GE Foundation requirements. The short story as a literary genre, with emphasis on analysis of individual stories.
386. Poetry (3)  
Prerequisites: ENGL 100; completion of GE Foundation requirements. Poetry as a literary genre, with emphasis on analysis of individual poems.
- \*390. Studies in Contemporary Literature (3)  
Reading and analysis of literary works, British and American, written since 1945. Topics, themes, limitations for each section will be announced in the *Schedule of Classes*. May be repeated once with a different topic.
- \*398. Modern Drama (3)  
Continental, English, and American drama from Ibsen to the present.
404. Creative Writing: Creative Nonfiction (3)  
Prerequisites: ENGL 204 or permission of instructor. Writing Creative nonfiction with detailed studies of published models. Course may be repeated to a maximum of 6 units.
- \*405. Creative Writing: Short Story (3)  
Prerequisite: ENGL 205 or consent of instructor. Writing short stories, with a detailed study of published models and with emphasis on the creative process. (May be repeated for credit to a maximum of 6 units by consent of instructor.)
- \*406. Creative Writing: Poetry (3)  
Prerequisite: ENGL 206 or consent of instructor. Writing poetry, with a detailed study of published models and with emphasis on the creative process. (May be repeated for credit to a maximum of 6 units by consent of instructor.)
- \*407. Creative Writing: Novel (3)  
Prerequisite: Consent of instructor. Writing long fiction, with a detailed study of published models and with emphasis on the creative process. (May be repeated for credit to a maximum of 6 units by consent of instructor.)
408. Writing the Screen Adaptation (3)  
Prerequisite: FEA 303 or 304 with a 'B' or better, or ENGL 405 or 407 with a 'B' or better, or consent of the instructor. Writing script adaptations, with a study of adaptation theory and successful adaptation models. Course may be repeated to a maximum of 6 units. Same course as FEA 408.
- 410./510. Theories of Writing and Literacy (3)  
Prerequisite: ENGL 309 or 310 or consent of instructor. Focuses on several cross-disciplinary theories of producing written discourse. Studies how writing is learned, taught, viewed by the public, and used in social and academic interchange.
417. Proposal Writing (3)  
Intensive writing of proposals in their various forms as letter, memo, and grant application. The main focus will be on the formal proposal as a marketing strategy.
418. Manual Writing (3)  
Writing of original manuals of various types in technical and professional fields. Company publications will be studied as models.
419. Writing in Science and Technology (3)  
Intensive practice in writing on topics in science and literature. Traditional and contemporary examples will be studied as models.
- 423./523. Semantics (3)  
Study of meaning in language. Same course as LING 423.
- 426./526. History of the English Language (3)  
Development of the English language from its beginnings to the present day. Same course as LING 426.
- \*431. Classical Background of English Literature (3)  
Greek and Roman literature, in translation, in relation to English literature; the interrelations of classical literature with philosophy and art.
432. Arthurian Literature: Medieval to Modern (3)  
Examination of the genesis, development, and popularity of stories about King Arthur and his knights from the earliest medieval texts to modern treatments of the legend.
435. Teaching Composition (3)  
Prerequisite: Consent of instructor. Intensive examination and study of composition teaching practices, research and evaluation in public schools, including community colleges.
436. Theories and Practices of Reading (3)  
Intensive investigation of theories and practices of reading with attention to how experienced and inexperienced readers construct text.
- 451./554. Medieval Literature of the British Isles (3)  
Representative selections of Old and Middle English prose and poetry read for the most part in modern English including Beowulf, the romance, medieval drama, Chaucer, and the ballad.
- 452./552. Literature of the Renaissance (1500-1603) (3)  
Prose and poetry of Marlowe, Sidney, Raleigh, Spenser, and other predecessors and contemporaries of Shakespeare, noting the influence of Humanism and the emergence of literary identity.
- 453./553. Literature of the Late Renaissance (1603-1660) (3)  
Poetry and prose (chiefly non-dramatic) of Milton, Bacon, Jonson, Donne and the 'Metaphysicals,' and their contemporaries.
- 455./555. English Literature of the Enlightenment (1660-1798) (3)  
Prose and poetry (chiefly non-dramatic) of Swift, Dryden, Pope, Johnson, Boswell, and their contemporaries, with emphasis on major satires such as *Gulliver's Travels* and *The Rape of the Lock*.
- 456./556. English Literature of the Romantic Period (1798-1832) (3)  
Poetry and prose (chiefly non-dramatic) of Blake, Wordsworth, Coleridge, Byron, Shelley, Keats, and their contemporaries, emphasizing the modern Romantic spirit, theories of literary art, and the concept of the self.
- 458./558. English Poetry and Prose of the Victorian Age (1832-1900) (3)  
Poetry and prose of Tennyson, Browning, Arnold, Carlyle, Mill, and others, emphasizing literary, social and political issues, and religious controversies.

**459./559. English Literature of the Twentieth Century (1900-Present) (3)**

Prose and poetry of Shaw, Conrad, Yeats, Lawrence, Joyce, Woolf, and others, emphasizing artistic experimentation and the development of modern value systems.

**\*461. Essentials of Old/Middle English (3)**

The Old English and Middle English languages and dialects are studied through the exploration of representative literature.

**462./562. Chaucer (3)**

Works of Geoffrey Chaucer in Middle English.

**\*463. Shakespeare II (3)**

Prerequisite: ENGL 363. Advanced study of some of the plays of Shakespeare.

**467A,B./567A,B. The English Novel (3,3)**

History and development of long prose fiction in the British Isles to and since 1832.

**468./568. English Drama (3)**

Readings from the history of English drama, excluding Shakespeare, including Marlowe, Jonson, and Restoration comedy.

**\*469. Critical Studies in Major English Writers (4)**

Prerequisites: At least senior standing, 12 units of upper division English. Intensive study of one to three major English authors. May be repeated for credit with different authors to a maximum of 8 units, but no more than 4 units may be used to satisfy the requirements for the English major. Topics include:

B) Dickens

F) Joyce

J) Lawrence

N) Woolf

P) Yeats

R) Austen

S) Charlotte and Emily Brontë

T) Oscar Wilde

**470. American Ethnic Literatures (3)**

Prerequisites: ENGL 375 or consent of instructor. American Ethnic Literatures is an advanced course in the examination of issues in the field of American ethnic writing.

**472. American Literature: 1820-1865 (3)**

An intensive examination of the major authors and works, along with newly recovered texts, from the period that is often called the "American Renaissance."

**473. American Literature: 1865-1918 (3)**

An in-depth exploration of leading developments in poetry, the novel, the short story, and non-fictional prose in the United States between the Civil War and the first world war.

**474./574. Twentieth Century American Literature (3)**

American literature from about 1914 to the present.

**475./575. The American Short Story (3)**

History and development of the short story and its criticism in the United States.

**476./576. American Poetry (3)**

History and development of poetry and its criticism in the United States.

**477A,B./577A,B. The American Novel (3,3)**

History and development of the novel and its criticism in the U. S. to and since the 1920's.

**478./578. American Drama (3)**

History and development of drama and its criticism in the United States.

**\*479. Critical Studies in Major American Writers (4)**

Prerequisites: At least senior standing, 12 units of upper division English including ENGL 370A,B. Intensive study of one to three major American authors. May be repeated for credit with different authors to a max of 8 units, but no more than 4 units may be used to satisfy the requirements for the English major. Topics include:

C) Faulkner

D) Fitzgerald/Hemingway

G) Hawthorne/Melville

L) Jeffers

N) Melville

T) Toni Morrison

U) Richard Wright

V) Langston Hughes

X) Raymond Carver

Y) Ralph Ellison

**481. Children's Literature (3)**

Survey of literature suitable for children.

**482. Literature for Adolescents (3)**

Prerequisite: One college course in literature. Survey of literature suitable for adolescents.

**483. Women in the Early Modern Era (3)**

Prerequisites: Upper division status. Study of representations and realities of women's lives, 1500-1800, from international and interdisciplinary perspectives. Critical methodology of history and literature; analysis of literary and historical texts to explore women's experiences of law and economics; religion; education and culture; marriage, sex, and health; politics and revolution.

**484./584. Contemporary Literary Theory (3)**

Study of the principal theories of literature including structuralism, hermeneutics, theory of genre, and theory of criticism.

**491. Applied Technical Writing (1-3)**

Prerequisite: Admission to Certificate Program in Technical and Professional Writing. Writing and editing technical reports and papers. Independent production of a report in a technical or scientific area under faculty supervision. May be repeated to a maximum of 4 units.

**492A-B. Internship Technical- Professional Writing and Editing (1-3)**

Prerequisite: Admission to Certificate Program in Technical and Professional Writing. At least 90 hours writing and editing with cooperating agencies and companies on- and off-campus under direction and with evaluation of faculty in consultation with supervisors of the participating agency or company. May be repeated to a maximum of 4 units.

**\*496. California Writing Project (1-4)**

Specifically designed for teachers, prospective teachers, school administrators, and writers. Focus is on successful classroom practices in teaching writing; writing and responding to others' writing; and on the theory and research behind successful literacy training. CSULB - South Basin Writing Project is an affiliate of both the California and National Writing Project.

**497. Directed Studies in Composition (3)**

Prerequisite: One upper division writing course in English or permission of instructor. Theory and practice of writing and language instruction. Recommended for prospective K-12 and college-level teachers. On-site participation in an educational setting required as a basis for research project.

**\*498. Topics in English (3)**

Exploration of topics in language and literature, specific topics to be announced in the *Schedule of Classes*. May be repeated with different topics, but no more than 6 units may be applied to the 41 units required for the English major. Topics include:

A) American Novel/Film

C) Bible in American Literature

F) Finnegans Wake

G) Hemingway on Film

J) Medieval Society

K) Literature and Psychoanalysis

L) Poetry and the Self

O) Short Fiction/Film

**499. Directed Studies (1-3)**

Prerequisite: Consent of instructor. Independent study undertaken under the supervision of a faculty member. May be repeated for credit to a maximum of 4 units. Not applicable toward the Master of Arts in English.

## Graduate Division

See Comparative World Literature and Classics Department for course offerings applicable to the M.A. in English.

### 505A. Seminar in Fiction Writing (4)

Prerequisite: Admission to the MFA in Creative Writing. Discussion, criticism, and detailed evaluation of works in progress. Traditional grading only.

### 505B. Seminar in Fiction Writing (4)

Prerequisites: Admission to the MFA in Creative Writing and ENGL 505A. Discussion, criticism, and detailed evaluation of works in progress. Traditional grading only.

### 506A. Seminar in Poetry Writing (4)

Prerequisite: Admission to the MFA in Creative Writing. Discussion, criticism, and detailed evaluation of works in progress. Traditional grading only.

### 506B. Seminar in Poetry Writing (4)

Prerequisites: Admission to the MFA in Creative Writing and ENGL 506A. Discussion, criticism, and detailed evaluation of works in progress. Traditional grading only.

### 510./410. Theories of Writing and Literacy (3)

Prerequisite: ENGL 309 or 310 or consent of instructor. Focuses on several cross-disciplinary theories of producing written discourse. Studies how writing is learned, taught, viewed by the public, and used in social and academic interchange.

### 523./423. Semantics (3)

Study of meaning in language.

### 526./426. History of the English Language (3)

Development of the English language from its beginnings to the present day.

### 535. Theories and Practices in Composition (3)

Prerequisite: ENGL 435 or consent of instructor. Focuses on the formation of composition studies in the latter half of the Twentieth Century. Studies relationships among theories, practices, and research concerned with the teaching of writing, particularly at the college level.

### 537. Special Topics (3)

Designed for in-service teachers. Intensive studies and research in special, timely topics (as announced in the *Schedule of Classes*) related to the teaching of English. May be repeated to a maximum of 6 units with different topics.

### 550. Old English Language and Literature (4)

Prerequisite: ENGL 461 or consent of instructor. Beowulf and other representative selections from Anglo-Saxon literature in the original language.

### 551. Middle English Language and Literature (4)

Prerequisite: ENGL 461 or consent of instructor. Chaucer and other representative selections from Middle English literature in the original language.

### 552./452. Literature of the Renaissance (1500-1603) (3)

Prose and poetry of Marlowe, Sidney, Raleigh, Spenser and other predecessors and contemporaries of Shakespeare, noting the influence of Humanism and the emergence of literary identity.

### 553./453. Literature of the Late Renaissance (1603-1660) (3)

Poetry and prose (chiefly non-dramatic) of Milton, Bacon, Jonson, Donne and the "Metaphysicals" and their contemporaries.

### 554./451. Medieval Literature of the British Isles (3)

Representative selections of Old and Middle English prose and poetry read for the most part in modern English including Beowulf, the romance, medieval drama, Chaucer, and the ballad.

### 555./455. English Literature of the Enlightenment (1660-1798) (3)

Prose and poetry (chiefly non-dramatic) of Swift, Dryden, Pope, Johnson, Boswell, and their contemporaries, with emphasis on major satires such as *Gulliver's Travels* and *The Rape of the Lock*.

### 556./456. English Literature of the Romantic Period (1798-1832) (3)

Poetry and prose (chiefly non-dramatic) of Blake, Wordsworth, Coleridge, Byron, Shelley, Keats, and their contemporaries, emphasizing the modern Romantic spirit, theories of literary art, and the concept of the self.

### 558./458. English Poetry and Prose of the Victorian Age (1832-1900) (3)

Poetry and prose of Tennyson, Browning, Arnold, Carlyle, Mill, and others, emphasizing literary, social and political issues, and religious controversies.

### 559./459. English Literature of the Twentieth Century (1900-Present) (3)

Prose and poetry of Shaw, Conrad, Yeats, Lawrence, Joyce, Woolf, and others, emphasizing artistic experimentation and the development of modern value systems.

### 562./462. Chaucer (3)

Works of Geoffrey Chaucer in Middle English.

### 567A,B./467A,B. The English Novel (3,3)

History and development of long prose fiction in the British Isles to and since 1832.

### 568./468. English Drama (3)

Readings from the history of English drama, excluding Shakespeare, including Marlowe, Jonson, and Restoration comedy.

### 572. American Literature: 1820-1865 (3)

An intensive examination of the major authors and works, along with newly recovered texts, from the period that is often called the "American Renaissance."

### 573. American Literature: 1865-1918 (3)

An in-depth exploration of leading developments in poetry, the novel, the short story, and non-fictional prose in the United States between the Civil War and the first world war.

### 574./474. Twentieth Century American Literature (3)

American literature from about 1914 to the present.

### 575./475. The American Short Story (3)

History and development of the short story and its criticism in the United States.

### 576./476. American Poetry (3)

History and development of poetry and its criticism in the United States.

### 577A,B./477A,B. The American Novel (3,3)

History and development of the novel and its criticism in the United States to and since the 1920's.

### 578./478. American Drama (3)

History and development of drama and its criticism in the United States.

### 583. Special Topics in Literature (3)

Intensive studies in special topics in literary theory, techniques, types, genres, modes, themes, movements and in the relations of literature with other arts and disciplines, as announced in the *Schedule of Classes*. May be repeated for credit, on different topics, to a maximum of 6 units.

B) Women Writers

E) Modes of Fantasy

### 584./484. Contemporary Literary Theory (3)

Study of the principal theories of literature including structuralism, hermeneutics, theory of genre, and theory of criticism.

### 590. Directed Reading (3)

Students will be assigned a reading list developed with the assistance of faculty. There will be a series of conferences in which the works are discussed with the instructor. A comprehensive paper will be due at the end of the semester. Will be taken for two semesters during the student's second year of residency in the MFA program. Traditional grading only. Course may be repeated for a maximum of 6 units.

**598. Directed Studies (1-3)**

Prerequisites: Baccalaureate degree, consent of instructor. Independent creative writing activity under the supervision of a creative writing faculty member.

**605A. Advanced Seminar in Fiction Writing (4)**

Prerequisites: Admission to the MFA in Creative Writing, ENGL 505A, and 505B. Discussion, criticism, and detailed evaluation of works in progress. Traditional grading only.

**605B. Advanced Seminar in Fiction Writing (4)**

Prerequisites: Admission to the MFA in Creative Writing, ENGL 505A, 505B, and 605A. Discussion, criticism, and detailed evaluation of works in progress. Traditional grading only.

**606A. Advanced Seminar in Poetry Writing (4)**

Prerequisites: Admission to the MFA in Creative Writing, ENGL 506A, and 506B. Discussion, criticism, and detailed evaluation of works in progress. Traditional grading only.

**606B. Advanced Seminar in Poetry Writing (4)**

Prerequisites: Admission to the MFA in Creative Writing, ENGL 506A, 506B, and 606A. Discussion, criticism, and detailed evaluation of works in progress. Traditional grading only.

**652. Seminar in the English Renaissance (4)**

Prerequisite: ENGL 696 (may be taken concurrently). Intensive studies in the literature of the period, chiefly Elizabethan.

**653. Seminar in the Age of Milton (4)**

Prerequisite: ENGL 696 (may be taken concurrently). Intensive studies in English literature of the Stuart and Commonwealth periods, including Milton.

**655. Seminar in Restoration and Eighteenth Century Literature (4)**

Prerequisite: ENGL 696 (may be taken concurrently). Intensive studies in English literature of the Restoration and eighteenth century.

**656. Seminar in Romantic Literature (4)**

Prerequisite: ENGL 696 (may be taken concurrently). Intensive studies in English literature of the Romantic period.

**657. Seminar in Victorian Literature (4)**

Prerequisite: ENGL 696 (may be taken concurrently). Intensive studies in English literature of the Victorian period.

**659. Seminar in Twentieth Century English Literature (4)**

Prerequisite: ENGL 696 (may be taken concurrently). Intensive studies in English literature from about 1900 to the present.

**672. Seminar in the Nineteenth Century American Renaissance (4)**

Prerequisite: ENGL 696 (may be taken concurrently). Intensive studies in American literature from about 1820 to about 1865.

**673. Seminar in American Realism (4)**

Prerequisite: ENGL 696 (may be taken concurrently). Intensive studies in the development of realism in American literature.

**674. Seminar in Twentieth Century American Literature (4)**

Prerequisite: ENGL 696 (may be taken concurrently). Intensive studies of 20th Century American writers.

**681. Seminar in Major Authors (4)**

Prerequisite: ENGL 696 (may be taken concurrently). Intensive studies in the works of specific authors as announced in the *Schedule of Classes*. Not open to students with credit in ENGL 469 or 479 covering the same author. May be repeated for credit, on different authors, to a maximum of 12 units. Topics include:

- A) Shakespeare
- B) Chaucer
- C) Yeats
- D) Melville
- E) Joyce
- F) John Fowles

**683. Seminar in Special Topics in English Studies (4)**

Prerequisites: ENGL 696 or its equivalent (may be taken concurrently). Intensive explorations of special topics in English studies. May be repeated for credit, on different topics, for a maximum of eight units. Traditional grading only. Topics include:

- A) Feminism/Modernism
- B) Autobiography
- C) Postmodernism and the Novel
- D) Current Issues in Rhetoric and Composition
- E) Teaching Literacy
- F) The Irish Short Story

**696. Seminar in Literary Criticism and Research (4)**

Study of major critical approaches to literature and basic literary research methods. Introduction to the discipline of literary criticism, various critical methodologies, techniques of bibliography and research, important literary reference works. Writing of critical research papers. A student will not be allowed to take ENGL 696 unless admitted to the M.A. program. (An English M.A. candidate may not be enrolled in any other 600 course without completion of or concurrent enrollment in ENGL 696.)

**697. Directed Research (1-3)**

Prerequisites: ENGL 696 and consent of instructor. Individual research or intensive study under the guidance of a faculty member.

**698. Thesis (1-6)**

Prerequisites: ENGL 696 and consent of instructor. Planning, preparation, and completion of a thesis under supervision of a faculty committee. Must be advanced to candidacy. Must be taken for a total of 6 units.

# COLLEGE OF ENGINEERING

## Interim Dean

Michael K. Mahoney

Assistant to the Dean (562) 985-5123

Vickie Messina

Associate Dean for Instruction

Mihir K. Das

Associate Dean for Strategic Planning and Facilities

Tesfai Goitom

Associate Dean for Administration and Fiscal Operations

Linda Tiggs-Taylor

Assistant to the Associate Deans (562) 985-8032

Kim Truesdelle

Development (562) 985-5840

Terri McDermot, Director

Administrative Services (562) 985-8218

Christa L. Johnson, Manager

Admissions and Advising Center (562) 985-1800

Lily Gossage, Director

Facilities & Equipment (562) 985-8746

Mike Berg

Safety Officer (562) 985-2260

Hamid Kavianian

## Departments

Chemical Engineering (562) 985-7532

Lloyd Hile, Chair

Civil Engineering (562) 985-8010

Joseph Plecnik, Chair

Computer Engineering and Computer Science (562) 985-4285

Sandra Cynar, Chair

Electrical Engineering (562) 985-5102

Fumio Hamano, Chair

Engineering Technology (562) 985-8021

Anastasios Chassiakos, Chair

Mechanical and Aerospace Engineering (562) 985-1502

Hamid Hefazi, Chair

COE Phone Directory

(562) 985-5121

Web Site

<http://www.csulb.edu/coe>

View the CSU, Long Beach *Catalog* on-line at [www.csulb.edu](http://www.csulb.edu) by clicking on "Academics" and then "CSULB Catalog."

The College of Engineering offers four-year curricula leading to Bachelor of Science degrees in the disciplines of engineering, computer science, and engineering technology as well as master's and Ph.D. degree programs. The B.S. programs provide broad education and training for entry to the professions and for continuing academic work toward advanced degrees. Master of Science degrees are offered in aerospace, civil, computer, electrical and mechanical engineering, and in computer science. The Master of Science in Engineering is also offered in interdisciplinary areas. The Ph.D. in Engineering and Industrial Applied Mathematics is offered jointly with The Claremont Graduate University. Undergraduate programs provide opportunities to specialize in the areas of aerospace, biomedical, chemical, civil, computer, electrical, industrial-management, manufacturing, materials, mechanical, ocean engineering (currently not offered and proposed for discontinuance), computer science and engineering technology. Engineering programs are accredited by the Engineering Accreditation Commission (EAC) of the Accreditation Board of Engineering Technology (ABET, 111 Market Place Suite #1050, Baltimore, MD 21202, phone: (410) 347-7700, website – <http://www.abet.org>). The engineering technology programs are accredited by the Technology Accreditation Commission (TAC) of ABET. The Computer Science program is accredited by the Computer Science Accreditation Commission (CSAC) of the Computer Science Accreditation Board (CSAB), 111 Market Place, Suite #1050, Baltimore, MD 21202, phone: (410) 347-7703, (website – <http://www.csab.org>). The Construction Engineering Management program is accredited by the American Council for Construction Education (ACCE, 1300 Hudson Lane, Suite #3, Monroe, LA 71201, phone: (318) 323-2816, website – <http://acce-hq.org>). Several certificate programs are also offered. Evening sections of most of the regular courses are offered to help the working students.

## *Engineering Facilities*

The engineering and engineering technology buildings house the College of Engineering in a complex of several nearby buildings, including a modern six-story Engineering and Computer Science (ECS) building, providing modern laboratories and offices for faculty. The buildings feature advanced and comprehensive engineering, computer science, and technology facilities, totalling over 130,000 square feet of laboratory space.

## *Engineering Advisory and Development Councils*

The College of Engineering has Advisory and Development Councils, one for the entire college, one for each of the six departments, and one for the minority engineering program. These councils consist of outstanding engineers and executives from industry and government in Southern California. Their function is to form a liaison between the University and industry and to keep the administration and faculty informed of modern engineering practices. This helps to ensure that the curricula are kept up-to-date. They also advise on placement opportunities before and after graduation.

## *Programs at a Glance*

### ABET Accreditation

The Bachelor of Science degrees followed by an asterisk (\*) are accredited by EAC or TAC of the Accreditation Board for Engineering and Technology (ABET) as appropriate, (\*\*) is accredited by the Computer Science Accreditation Board (CSAB) and (\*\*\*) is accredited by American Council for Construction Education (ACCE).

### Baccalaureate Degrees

- B.S. in Aerospace Engineering
- B.S. in Chemical Engineering \*
- B.S. in Civil Engineering \*
- B.S. in Computer Engineering\*
- B.S. in Computer Science\*\*
- B.S. in Construction Engineering Management\*\*\*
- B.S. in Electrical Engineering \*
- B.S. in Manufacturing Engineering
- B.S. in Mechanical Engineering \*
- B.S. in Engineering
  - Option in Industrial-Management Engineering
  - Option in Materials Engineering
  - Option in Ocean Engineering (inactive)
  - Option in Biomedical and Clinical Engineering
  - Option in Audio Engineering
  - Option in Theme Park Engineering
- B.S. in Engineering Technology
  - Option in Environmental Technology
  - Option in Manufacturing Technology\*
  - Option in Quality Assurance Technology\*
- B.S. in Electronics and Computer Engineering Technology
  - Option in Electronics Technology\*
  - Option in Computer Technology\*

### Minors

- Minor in Computer Science
- Minor in Environmental Engineering

### Graduate Degrees

- M.S. in Aerospace Engineering
- M.S. in Civil Engineering
- M.S. in Computer Science
  - Option in Computer Engineering
  - Option in Computer Science
- M.S. in Electrical Engineering
- M.S. in Engineering (Interdisciplinary)
- M.S. in Mechanical Engineering
- Civil Engineer (professional degree)
- Ph.D. in Engineering and Industrial Applied Mathematics (jointly with The Claremont Graduate University)

For detailed descriptions, see departmental listings for Chemical Engineering, Civil Engineering, Computer Engineering and Computer Science, Electrical Engineering, Engineering Technology, and Mechanical and Aerospace Engineering.

Students should submit applications early in August for the following Spring Semester and November for the following Fall Semester, or as soon as possible thereafter. Applications may be accepted at later dates, particularly for upper-division transfer students from community colleges and from students applying for masters or doctoral programs.

### Certificate Programs

- Certificate in Heating, Ventilating and Air-Conditioning Engineering (offered by M.E. Department)
- Certificate in Waste Engineering and Management (offered by C.E. Department)
- Certificate in Energy Conversion and Power Systems Engineering (offered by M.E. and E.E. Departments)
- Certificate for Industrial Plastics Processing and Design (offered by M.E. and Ch.E. departments)
- Certificate in Facilities Operations (offered by E.T. Department)
- Certificate in Safety Operations (offered by E.T. Department)
- Certificate in Aerospace Manufacturing (offered by A.E. Department)

### Mathematics, Engineering, Science, Achievement Program (MESA) Center

The MESA Center is a program that serves low income and educationally disadvantaged students at the pre-college and college levels. The program is funded by the State of California and also receives program donations from private industry. The MESA Center is comprised of two distinct programs with operations based in the College of Engineering, the MESA Schools Program (MSP) and the MESA Engineering Program (MEP). The MESA Schools Program (MSP) partners with middle and high schools in the Los Angeles basin area to prepare students to attend college. MSP provides academic support services to over one thousand pre-college students with the primary objective of increasing future enrollment at the university level in the disciplines of mathematics, engineering and science. The MESA Engineering Program (MEP) provides non-remedial academic support services to matriculated college students. The major objectives of MEP are to support the recruitment, retention and graduation of a select campus student population. The MESA Engineering Advisory and Development Council (MEADC) includes a membership of industry representatives from local area businesses with an interest in promoting the educational experience of low income and underrepresented students.

### Academic Standards

#### *Preparation for Admission to the College of Engineering*

The high school student planning to enter engineering, engineering technology, or computer science is advised to pursue a program with courses in biology, physics, chemistry, advanced algebra, and trigonometry. In addition, the general requirements for admission to the University must be satisfied. Deficiencies in some of the above areas may result in an extension of the time required to complete a program in engineering, technology, or computer science. Full-time students can complete any baccalaureate degree in engineering, engineering technology, or computer science in four years.

The curricula are also designed to accommodate students transferring from other colleges such as the community colleg-

es and liberal arts colleges. Full-time students who complete two years at a community college can complete the B.S. degrees in two years. Transfer students should note and follow, where possible, the appropriate curriculum as outlined in later sections. None of study programs are impacted. Only general admission requirements of University apply and must be met.

### **General Academic Requirements**

In addition to technical knowledge, skills and training, the College of Engineering values good communication skills. The University in its General Education courses provides the basic communication skills and measures them with the graduation requirement of the Writing Proficiency Examination. Students are advised that all College of Engineering courses and student course work require not only correct analysis, competent design and professional presentation but also clear and concise written and oral communication in English. While individual specific course requirements vary depending on the nature of the course, good communication skills, both in written and oral reports, are expected of all students and will normally constitute a portion of the student's grade.

A grade of "C" or better must be achieved in prerequisites for courses required of engineering majors. English 100 or equivalent is a prerequisite to upper division laboratory courses.

Admission to any one of the graduate degree programs in the College of Engineering normally requires a minimum GPA of 2.5 in the last 60 units taken.

A student must pass the Writing Proficiency Examination (WPE) before qualifying for any degree.

### **Letter Grade Policy**

Letter grades ("C" or better) are required for prerequisites for required courses of Engineering, Computer Science, and Engineering Technology majors.

Required English, Speech, and Upper Division Interdisciplinary (IC) courses must be taken for a Letter Grade, not Credit/No Credit.

### **Concurrent and/or Summer Enrollment in Another College**

Students who wish to take coursework in a community college or another college to meet curricular requirements while enrolled as an undergraduate in the College of Engineering must petition the appropriate department for prior approval to enroll in specific courses. This policy is for either concurrent enrollment or summer enrollment. University policy must also be complied with. (See "Concurrent Enrollment" and "Transfer of Undergraduate Credit" in this *Catalog*.) Courses not receiving prior approval may not be accepted for credit by the department.

### **Dual Degree Program**

Students wishing to combine an engineering degree with one in business, education, fine arts, humanities or the sciences may enter the Dual Degree Program. The College of Engineering at CSULB has agreements with other Colleges within the University and with other institutions which allow students to do this. After three years at the first institution, students transfer to CSULB as juniors to complete the two final years of engineering study. At the end of the first year at CSULB, students who have completed all of the requirements for their first

degree are awarded those degrees by the appropriate College or institution. At the end of their fifth year, students who have completed all engineering requirements receive their engineering degrees. As an option, students may choose to complete both degrees simultaneously.

### **Course Availability**

Full-time students without deficiencies in the principal College of Engineering programs can comfortably complete their degree requirements in four years, or in two years after completing two years at a community college. Most of the required courses are offered in multiple sections every semester. In addition, many required courses are also offered during Summer Sessions.

### **General Education (GE) Requirement for Engineering Major**

Engineering majors will have somewhat modified general education programs depending upon the catalog year and enrollment status. Students, especially returning and transferring students and those in the ABET accredited programs, must see an advisor in the department to work out a plan which meets both the campus GE and ABET GE requirements.

In accordance with the ABET Engineering Criteria 2000, the programs in the College of Engineering must demonstrate that our graduates have the broad education necessary to understand the impact of engineering solutions in a global and societal context. Accordingly, we have a general education component that complements the technical content of the curriculum and is consistent with both our programs and campus objectives. The College of Engineering has created a set of thematic clusters incorporating the upper division, interdisciplinary GE courses.

Accordingly, all engineering students must take at least two upper division Interdisciplinary GE courses in one of the following nine themes. (Note: CSULB General Education has been revised to include "Capstone" courses. Our themes will be changing later to include them.)

#### **THEME I: Technology and Society**

"Technology and Society" provides an understanding of the role of technology in our society. It covers human and economic aspects of engineering practice and the impacts of technological developments on society in the context of social, political and environmental perspectives. Courses included are:

GE Category B: ENGR 370I, HIST 400I, NSCI 375I

GE Category D: ANTH 307I, ECON 360I, ENGR 302I, 375I, HIST 400I, OCST 417I, POSC 461I, PSY 350I

GE Category E: ECON 309I, ENGR 375I, FIN 309I, FCS 309I, REC 340I

#### **THEME II: Arts, Creativity, and Human Enrichment**

"Arts, Creativity, and Human Enrichment" explores various aspects of the creativity of human beings in the context of arts as a vehicle for enrichment of human experience.

Students gain a better appreciation of the role of arts and humanities in life, and the thought processes in human inquiry which enrich our lives. Courses included are:

GE Category C: ART 335I, CLSC 421I, C/LT 320I, 324I, 412I, 422I, 451I, HIST 404I, MUS 363I, 364I, 375, 468I, THEA 324I, W/ST 365I

GE Category D: HIST 404I

### THEME III: Science, Environment, and Public Policy

"Science, Environment, and Public Policy" encompasses the scientific considerations that have an impact on the natural environment. The student also explores the historical development of attitude toward the environment, and the moral obligation of humanity including the political processes to mitigate the environmental concerns. Courses included are:

GE Category B: ENGR 370I, GEOL 300I, 303I, MICR 302I

GE Category C: PHIL 362I

GE Category D: ANTH 307I, ENGR 302I, 375I, HIST 307I, 474I, I/ST 319I, POSC 461I, PSY 350I, SOC 410I

GE Category E: ENGR 375I, HSC 420I

### THEME IV: The Individual in a Complex Society

"The Individual in a Complex Society" addresses the relationship of the individual to an increasingly complex and technologically advanced modern world. The impacts of social changes on the individual and the ability of the individual to cope with these changes are addressed. Courses included are:

GE Category B: ENGR 370I, MICR 302I

GE Category C: HIST 303I, PHIL 451I®

GE Category D: ENGR 302I, 375I, FCS 312I, HIST 308I, KPE 339I, POSC 388I, PSY 300I, SOC 441I, U/ST 301I

GE Category E: ENGR 375I, HSC 425I®, REC 340I

### THEME V: Human Diversity

"Human Diversity" focuses on the physical and cultural diversity as encountered in our multi-faceted world. It deals with such topics as ethnicity, gender, and rational evaluation of regional and global cultures in order to appreciate societal development. Courses included are:

GE Category C: C/LT 415I®, R/ST 302I®, 331I, 341I, W/ST 318I®

GE Category D: ART 330I, ASAM 319®, 335I®, A/ST 301I, 393I, 495I, CHLS 335I®, 390I, C/LT415I®, GERM 380I, HIST 407I, I/ST 317I, SOC 335I, U/ST 301I, W/ST 401I

### THEME VI: Language and Culture

"Language and Culture" explores language and its role in the development of culture. Students examine how human inquiry and expression have shaped the world in which they live. Courses included are:

GE Category C: CLSC 410I, 421I; C/LT 412I, 415I®, 350®, 422I, 451I; FEA 318I; MUS 363I

GE Category D: ANTH 412I, HIST 404I, PSY 300I, SOC 485I

GE Category E: LING 363I

### THEME VII: Our Interdependent World

"Our Interdependent World" provides a global perspective of human and societal problems in an increasingly interdependent world. Students can better appreciate sources of conflicts, immigration and social tension, economic disparity, overpopulation, war, famine, disease, and natural disasters. Courses included are:

GE Category B: ENGR 370I

GE Category C: R/ST 383I, RUSS 410I

GE Category D: ANTH 307I, ASAM 335I A/ST 300I, ENGR 302I, 375I, GERM 380I, HCA 422A, I/ST 317I, 318I, 319I, POSC 461I, 494I

GE Category E: ENGR 375I, HSC 420I

### THEME VIII: The Creative Experience

"The Creative Experience" explores various aspects of the creativity of human beings. The student examines the thought processes employed in human inquiry through a study of the culture, history, philosophy, and the physical universe. Courses included are:

GE Category B: ENGR 370I, HIST 400I, PHYS 400I

GE Category C: ART 330I, PHIL 452I, C/LT 422I, 451I, DANC 373I, 435I, EDP 373I, MUS 468I

GE Category D: ANTH 311I, ART 330I, DANC 373I, EDP 373I, ENGR 302I, 375I,

GE Category E: ENGR 375I,

### THEME IX: Technology and the Modern Age

"Technology and the Modern Age" considers the modern technological world in its broadest context. It addresses the on-going development of modern civilization and impacts of technological advances on the future of mankind. Courses included are:

GE Category B: ENGR 370I

GE Category D: ANTH 307I, ENGR 302I, 375I, HIST 307I, I/ST 317I, OCST 417I, POSI 494I, PSY 350I, SOC 410I, 441I, U/ST 301I

GE Category E: ENGR 375I

### Requirements for the ABET Accredited Degree Programs

Students working for an ABET accredited degree will meet with an academic advisor in their department as early as possible to make themselves fully aware of the ABET requirements, not only in General Education as outlined above, but also in other areas, such as math/science requirements. Requirements are subject to change and current requirements for all programs are posted at <http://www.abet.org>.

### Bachelor of Science in Manufacturing Engineering (code 3-4305)

The objective of the Bachelor of Science in Manufacturing Engineering (BSMfgE) program is to educate engineers who can design, build and manage competitive production systems. In accomplishing this objective, the program has been developed to include a resource of manufacturing knowledge that can be used to infuse manufacturing theory, principles and practices into all other disciplines in the College of Engineering.

### Requirements (137 units)

I. General Education (36 units, not counting 9 units of Math/Science)

Required GE categories:

1. Communication and Critical Thinking (Category A)
2. Physical Universe (Category B)
3. Humanities and the Arts (Category C)
4. Social and Behavioral Sciences (Category D)
5. Self Integration (Category E)

II. Basic Sciences (13 units): CHEM 111A; PHYS 151, 152

III. Basic Mathematics (15 units): MATH 122, 123, 224, 370A

IV. Engineering Sciences (16 units): EE 210 (or 211), EE 211L; CE 205; ME 205, 371, 373

V. Engineering Topics (11 units): ME 172

#### VI. Manufacturing Engineering Core (36 units):

1. Design for Manufacturing (9 units): ME 376, 405A
2. Manufacturing Materials and Processes (9 units): ENGR 330, CH E 385, ME 322
3. Manufacturing Systems and Automation (9 units): ENGR 483; ME 406B, 474
4. Manufacturing Management, Quality and Productivity (9 units): ENGR 461

#### VII. Emphasis Electives

The student selects 9 units from one of the following specialized emphases:

1. *Engineering*: ME 429, 445, 476
2. *Mechanical Engineering*: ME 324, 409A, 428, 495
3. *Chemical Engineering*: CH E 335, 425, 435, 437
4. *Aerospace Engineering*: AE 315, 472, 483; ME 428
5. *Electrical Engineering*: EE 330, 350, 450

### Bachelor of Science in Engineering

#### Option in Audio Engineering (code 3-4302) (126 units)

This option is designed to train students for work in the audio engineering industry. The curriculum in the College of the Arts will show students in the program how the arts and entertainment industry uses modern technology in the recording, processing and creation of sound. The curriculum in the College of Engineering will teach students how to analyze and design the electronic and computer components used in the arts and entertainment industry.

As this option is not ABET accredited, students are urged to either take a second major in Computer Engineering (follow the Computer Engineering Track) or Electrical Engineering (follow the Electrical Engineering Track)

#### Requirements

##### Computer Engineering Track

Lower Division: BIOL 207, PHYS 151, MATH 122, 222, MUS 190, EE 210, 210L, CECS 174, 201, 228, 261, 274.

Upper Division: MATH 323, 370A, 380, FEA 307, MUS 343, 370, ENGR 340, EE 331, 386, 486, CECS 301, 325, 346, 347, 360, 460A, 460B, 497, plus an approved technical elective to a total of 126 units.

##### Electrical Engineering Track

Lower Division: BIOL 207, PHYS 151, MATH 122, 123, 224, MUS 190, ENGR 202, CECS 174, EE 201, 210, 210L, 211, 211L.

Upper Division: MATH 370A, FEA 307, MUS 343, 370, ENGR 340, CE 370, EE 310, 330, 330L, 346, 347, 370, 370L, 382, 386, 430, 460, 486, 489 or 490 plus an approved technical elective to a total of 127 units.

#### Option in Theme Park Engineering (code 3-4304) (132 units)

This option is designed to prepare students to work as engineers in theme parks or amusement facilities, and the industries that support them. The program of study includes courses primarily from Electrical Engineering, with additional training from the Civil and Mechanical Engineering Depart-

ments, and covers topics in electrical power, and electrical, mechanical, hydraulic, and pneumatic control.

As this option is not ABET accredited, students are urged to also obtain an ABET accredited second major in Electrical Engineering.

#### Requirements

BIOL 207, CHEM 111A, MATH 122, 123, 224, 370A, PHYS 151, CECS 174, ENGR 202, EE 201, 210, 210L, 211, 211L, 310, 330. Each of the foregoing courses must be passed with a grade of "C" or better. Other required courses are CE 335, 370, EE 346, 347, 350, 350L, 370, 370L, 450, 452, 453, 490, ME 172, 330, 490B or 490E or MAE 438, ET 365, 365L, plus an approved technical elective to a total of 132 units.

#### Minor in Environmental Engineering (code 0-4307)

This interdisciplinary Minor in Environmental Engineering is designed for undergraduates from various engineering and science backgrounds who are interested in applying engineering approaches to environmental issues. Coursework in the minor focuses on engineering solutions to problems in preserving the quality of air, water, and soil by developing procedures and designing processes, consistent with current government regulation, to improve the environment and prevent pollution.

#### Requirements

A minimum of 6 units selected from the following core: CH E 475 or C E 364; CH E 455 or C E 469. Additional courses to complete the 18 unit minor may be selected from: CH E 405, 415, 445, 465, 485; C E 466; M E 490C.

Most of the courses in the minor require some background in engineering and/or chemistry. Upper division students majoring in Biology, Chemistry, Chemical Engineering, Civil Engineering, or Mechanical Engineering may have sufficient background to select from the above choices without needing additional prerequisites. Those majoring in other branches of science and engineering may need several additional courses in engineering and/or chemistry to meet prerequisite requirements of courses in this minor. All prerequisites to the courses in the minor must be completed with a grade of "C" or better.

### GRADUATE PROGRAMS

Graduate Program Director

Mihir K. Das, Associate Dean for Instruction

#### Master of Science in Engineering (code 6-4301)

The College of Engineering offers graduate study programs for the Master of Science in Engineering degree. Typical tasks and responsibilities undertaken by students in the curriculum would not fall within one of the traditional specialties in engineering, e.g. aerospace, chemical, civil, electrical and mechanical engineering, or computer science and engineering. The student may pursue an interdisciplinary program, approved by a Graduate Advisor, by selecting courses from the various departments of engineering. Additional information concerning the programs, special facilities, laboratories and research possibilities may be obtained from the College of Engineering.

#### Prerequisites

1. A bachelor's degree in an ABET accredited curriculum in engineering with a minimum GPA of 2.5; or

2. A bachelor's degree with a minimum GPA of 2.5 in engineering, mathematics, a natural science or other discipline with the requirement that essential undergraduate prerequisites in engineering be satisfied;
3. Graduate students must consult with a graduate advisor, with whom they will be working, for information concerning procedures and requirements for appropriate approval of their courses of study prior to enrolling in their graduate programs.
4. The Writing Proficiency Examination (WPE) must be passed during the first semester in residence unless taken and passed previously. Courses taken after the first semester without having passed the WPE will not be counted toward the graduate degree.

#### Advancement to Candidacy

1. Removal of all undergraduate deficiencies as determined by the Graduate Advisor;
2. Students may, at the discretion of the Graduate Advisor, be required to take examinations in some chosen areas;

#### Requirements

1. Completion of a minimum of 30 units beyond the bachelor's degree in upper division and approved graduate courses, including:
  - A. A minimum of 18 units of 500 and/or 600 level courses in engineering;
  - B. Six units of electives selected from approved upper division (400-level) or graduate courses from appropriate areas;
  - C. Completion of an acceptable thesis or project and/or comprehensive examination.

Note: Students are strongly advised to read and be familiar with the campus regulations described under "Graduate Programs" elsewhere in this *Catalog*.

#### Certificate in Systems Engineering (code 1-4301)

Director: Dr. Mihir K. Das, Associate Dean for Instruction

The 18-unit Post Baccalaureate Certificate Program in Systems Engineering (SE) is designed to provide interested students or practicing engineers with the very latest in SE capability and the ability to plan and execute complex SE projects. The Certificate Program is focused toward development and management of complex systems. Each such complex system requires a clear SE Master Plan, a set of SE Methodologies, appropriate tools, a rigorous requirements flow-down technique, and a comprehensive Project Management Plan to enable system design and project management for effective and efficient human interaction.

#### Requirement

1. Completion of an accredited baccalaureate degree in engineering or equivalent;
2. Satisfactory completion of 18 units listed below;
3. File a program application card with Admissions and Records, and file for the Certificate at least one semester prior to completion;
4. The Certificate may be awarded concurrently or subsequently to baccalaureate degree.

#### Required Courses

The Certificate Program requires a minimum of 18 semester units, as indicated below.

1. System Engineering Core Courses, 6 units of the following: ENGR 532 and MAE 508.
2. Elective Engineering Management Courses, 6 units from the following: CECS 521, MAE 506 and 507
3. Elective Manufacturing Courses, 3 units from the following: ENGR 574, 595 and MEA 574
4. Advanced Engineering Mathematics/Analysis, 3 units from the following: EE 505, 508, ME 501 and 502

#### Ph.D. in Engineering and Industrial Applied Mathematics (code 8-4303)

Program Director: Dr. Mihir K. Das, Associate Dean for Instruction

Ph.D. in Engineering and Industrial Applied Mathematics, offered jointly by the College of Engineering at California State University, Long Beach and The Claremont Graduate University, allows students to pursue doctoral programs in most areas of engineering and applied mathematics.

The College of Engineering at California State University, Long Beach (CSULB) has the primary responsibility for the engineering portion of the program, and the Department of Mathematics at The Claremont Graduate University (CGU) has the primary responsibility for the applied mathematics portion. The program of study for each Ph.D. candidate is carefully integrated to ensure the interdisciplinary nature of each student's research.

#### Degree Designation

The degree shall be designated as the Doctor of Philosophy in Engineering and Industrial Applied Mathematics and shall be granted at the Claremont Graduate University in the name of the two universities in accordance with an agreement between CGU and CSULB. The diploma shall indicate the dual nature of the degree and shall specify that it is being granted only when requirements have been satisfied in both subject areas as specified by the collaborating institutions.

#### Program Supervision

Overall program supervision will be the responsibility of a committee (The Program Committee) consisting of two faculty members from the Mathematics Department at CGU and two faculty members from the CSULB College of Engineering. The Dean at CGU and the Dean of Engineering at CSULB will serve as ex-officio members of the Program Committee. The Chair of this committee shall be elected each year and shall alternate between CGU and CSULB committee members. Students must be admitted to both institutions jointly.

#### Admission Requirements

Admission will be granted to a limited number of qualified students, and therefore application should be made as early as possible. Applications are encouraged from both men and women, and particularly from members of minority and handicapped groups. Completed applications are due preferably by February 20 for the Fall semester and by October 31 for the Spring semester, although later applications may be allowed at the discretion of the Program Committee. Students shall be jointly admitted to the two campuses. The Program Committee has the responsibility of deciding admissions, consistent with

campus regulations. (See Application Procedure on p. 10 of this booklet.)

To be admitted to the Joint Ph.D. Program, an applicant must have received a bachelor's or a master's degree in science, engineering, or mathematics from an accredited institution. He or she must, moreover, have attained such a scholastic record and present such confidential recommendations as to indicate that he or she is well qualified to pursue, with distinction, advanced study and research. Admission sometimes may have to be refused solely on the basis of limited facilities in the option desired.

GRE General is a requirement before admission. Applicants, whose first or native language is not English, are required to have a minimum score of 550 in the Test of English as a Foreign Language (TOEFL). However, this requirement is waived for students with a bachelor's or master's degree from an accredited U.S. university.

### Program Planning and Supervision

Within a semester of beginning study in the Joint Doctoral Program, the student arranges with the Program Committee for an advisor in Mathematics at CGU and an advisor in Engineering at CSULB. The student's program of study will be arranged individually by each student in collaboration with the advisors. However, the student's overall performance will be monitored by the Program Committee. The two advisors on the two campuses will confer periodically regarding the student's progress.

### Plan of Study

After consultation with the advisors, the student must prepare and file with the Program Committee before the end of the first semester a Plan of Study for completing the course requirements for the degree. The purpose of the Plan is to ensure that the student is aware of the requirements for the degree. The Plan of Study must indicate the areas of study that the student will be taking in preparation for the preliminary examinations. In exceptional circumstances, a Plan of Study may be altered at a subsequent time by petition to the Program Committee.

A minimum of 72 units of course work, independent study, and research (including transfer credit) must be completed. Transfer credits of up to 24 units of related courses at the master's level is permissible on approval of the Program Committee; this course work must have been completed with at least a grade of "B" or its equivalent at an accredited institution and must be directly related to the joint program and to the student's Ph.D. goals. Of the 72 units, a minimum of 24 units must normally be completed in the graduate engineering program at CSULB and a minimum of 24 in the graduate mathematics program at CGU. Both sets of 24 units must conform to the area requirements of the relevant institution and must be approved by the Program Committee. All degree requirements must be completed within seven years (or six with the transfer of 24 units according to CGU regulations) from the time a student begins graduate study.

If a student withdraws from the program after completing a substantial portion of the course work, a master's degree at either or both institutions is still possible by satisfaction of the appropriate requirements. Both CGU and CSULB require 30 semester units of course work for master's degrees.

### Preliminary Examinations

The student is required to pass written preliminary examinations. These examinations shall consist of four examination areas: two in engineering and two in mathematics. In each area there will be a three-hour examination. These examinations are usually taken after completion of the relevant course work at each institution. These examinations will be given two or three times a year at the discretion and under the control of the Program Committee. Should a student fail an exam, one retake will be allowed, after petition to the Program Committee.

### Research Tools

A student in the Joint Ph.D. Program must demonstrate proficiency in problem-solving ability using computer programs. This demonstration may take different forms depending on the student's engineering sub-discipline, but it must include evidence that the student has used an appropriate computer language and an algorithmic method to solve a problem from an engineering discipline.

### Doctoral Committee

During entry to the program and through the period of the main body of course work at CGU and CSULB, a student's progress will be monitored by the Program Committee. On successful completion of the preliminary examinations, the student may petition the Program Committee to constitute the Doctoral Committee. This committee is chosen by the student with advice from the faculty and with approval of the Program Committee, and must include at least two faculty members from each of CGU and CSULB and must provide both breadth and depth in mathematics and engineering in the faculty chosen. The Doctoral Committee supervises the student's progress through research preparation and Dissertation writing, and administers the qualifying and oral examinations for the degree. The Chair of the Doctoral Committee is the Dissertation supervisor.

### Research Preparation

On completion of at least 48 units of course work (including transfer units) and completion of the preliminary examinations and research tool test, a student embarks on the research phase of the Joint Doctoral Program. In preparation for the research phase, the student is expected to spend at least a semester in advanced graduate courses, seminars, or directed reading courses, where exposure to research material is emphasized. From these and other sources the student gains the ability to understand the motivation for research in engineering and applied mathematics, and learns to apply research techniques.

### Research Proposal and Qualifying Examination

With these advanced courses as background, and with the guidance of the Doctoral Committee, the student shall define an area of proposed research and prepare a written Dissertation Proposal containing an outline of the research to be undertaken and references to relevant source materials. The Dissertation Proposal is presented to the Doctoral Committee at least two weeks prior to the qualifying examination. The qualifying examination is an oral presentation to the Doctoral Committee by the student describing the research planned. The student shall be expected to present evidence both as to the mathematical content and to the engineering application of

the proposed research, supporting such evidence with references to previous research work in both areas. The Doctoral Committee judges the fitness and quality of the Dissertation Proposal from this presentation and from the written proposal, and subsequently communicates its recommendations to the Program Committee; only upon a positive recommendation may the student embark on a Dissertation. In the event of failure, the qualifying examination may be retaken once, after petition to the Program Committee. (See CGU Math Department or the Registrar's Office at CGU for forms required to initiate these processes.)

### Advancement to Candidacy

After successful completion of the Qualifying Examination and certification that all other requirements are fulfilled, the student is advanced to candidacy. This must occur at least six months before the Final Oral Defense. The form for this is available in the CGU Mathematics Department.

### Dissertation and Final Oral Examination

On completion of the research, the student will prepare the Dissertation in accordance with CGU regulations. A final draft of the Dissertation will be presented to each member of the Doctoral Committee at least three weeks prior to the final oral examination. The oral defense will be held on the campus of the Dissertation supervisor.

### Residency Requirements

Doctoral students must complete their programs in a period of seven years. (or six with the transfer of 24 units according to CGU regulations, see below. During this time, a minimum of 72 units of course work, independent study, and research, including transfer credit, must be completed. Normally no more than 12 units per semester or per summer session may be credited toward the degree.

All degree requirements must be completed within seven years from the time a student begins graduate study. Work for which transfer credit is granted will be counted as part of the seven years, e.g., if transfer credit of 24 units (one year) is granted, the time limit will be six years. The Program Committee will consider petitions for extensions.

The residency requirements for the Ph.D. degree may be met either by two semesters of full-time study in a 24-month period or by the completion of 48 units of course work within a 48-month period, including work in the Summer Session, on either or both campuses.

Students who receive transfer credit for 12 units or less may meet the residence requirement either by completing two full-time semesters of course work within a 24-month period or by completing 36 units within a 48-month period. Those receiving transfer credit for 13 to 24 units may meet the residence requirement by completing 24 units within a 36-month period. The seven-year maximum time period for the Ph.D. degree is reduced by six months for 12 units or less of transfer credit and by 12 months for 13 to 24 units of transfer credit.

### Policies and Procedures

1. Throughout their entire program of study, unit-taking students must be registered at either CGU or CSULB. Students who intend not to take course units at either institution, including those who have finished their course

units, must take the necessary steps to maintain continuous enrollment. This is achieved by registering for M499 Doctoral Study at Claremont Graduate University. Requests for leaves of absence must be submitted to each Registrar's Office and approved by both institutions according to the standards of each, and upon approval of leave should advise the Math Office at CGU and their department of study at CSULB. Contact each Registrar's Office for leave of absence policies.

2. International students registered for units at CSULB must provide the CGU International Student Advisor with proof of registration within two weeks of the beginning of the semester at CGU. Proof of full-time registration is required to maintain immigration status.
3. Students should arrange for advisors, one in math at CGU and one in engineering at CSULB, at the earliest opportunity. The program committee will help provide advisors.
4. After consultation with their advisors, students must submit a plan of study, including a petition for transfer of credits, if applicable, during their first year of study. The plan of study must be approved and transfer of units recommended to the Registrar by the program committee.
5. Students admitted to provisional status must provide the materials needed to complete their files before the end of their first semester of enrollment. Official scores for the GRE General Test are required of all students before admission to full graduate standing. An official score for the GRE engineering subject examination is recommended for applicants with an engineering B.S., and for the mathematics subject examination for applicants with a mathematics B.S. The joint faculty program committee will review completed files for change of status.
6. The academic progress of students admitted to conditional status will be reviewed by the program committee prior to a decision about change of status.

### Procedures for Student Admission

1. Students must complete application forms for both CGU and CSULB. In addition they must supply transcripts, at least 3 letters of reference (preferably on the forms supplied in the CGU package), and pay fees for both applications. Current and official GRE scores (on Q,A and V) are required, but if the exam has not been taken at the time of admission it must be taken within the first semester of enrollment.
2. Completed applications (and fees for both CGU and CSULB) are to be submitted to the CGU Admissions Office, 170 E. Tenth Street, Claremont, CA 91711-6163. (Do not send application materials to CSULB, as it will result in considerable delay.)
3. A complete file is reviewed by the CGU members of the Joint Ph.D. Program Committee. In the event of a negative review, a rejection letter is issued by CGU.
4. A positive review sets up the following steps. The LB application form and check, and copies of the transcripts and letters are sent to the CSULB Program Director, Dr. Mihir K. Das, Associate Dean for Instruction, College of Engineering, Phone 562-985-5257; FAX: 562/985-7561. (Email - mdas.csulb.edu ) The LB members of the Joint Ph.D. Program Committee then review the application in

consultation with professors in the appropriate discipline. Results of this review are transmitted to CGU Math. Upon a positive review the application and fee are sent to the CSULB Admissions Office to be processed. A negative review initiates a rejection letter from CGU.

5. A positive review (now from both CGU and CSULB) generates an Admission letter from CGU. Signatures from both campuses are required on this, so the letter is signed in Claremont and forwarded to the CSULB Registrar at LB for signature, who relays it to the student, and sends copies to CGU Admissions and Dr. Reddy.

Notes:

A. The CGU Admissions office, regularly and routinely, informs students of the status of their application by letter. Missing items are noted.

B. Since only complete files are transmitted from CGU to LB, information on the status of a file is available only from CGU (Rosa Delia Rosas, Admissions Office, 909-621-8069 or Mary Solberg, Math Department, 909-621-8080, email - mary.solberg@cgu.edu).

C. In case of rejection it may be worthwhile to note reasons in the files.

D. For any CSULB information relating to the Joint Doctoral Program, please contact Kim Truesdelle at 562-985-8032.

### **Teaching Practicum**

Students who have completed coursework equivalent to a master's degree and who intend to pursue a career in university education may enroll in a Teaching Practicum for three units of credit. The student will receive instruction in teaching techniques and, under the supervision of a senior faculty member, will teach an undergraduate class in engineering or mathematics. In addition, opportunities are available for qualified Ph.D. candidates to teach undergraduate courses as part-time lecturers.

## **Courses (ENGR)**

### **Lower Division**

#### **090. Special Topics in Engineering (1)**

Selected topics from recent advances of interest to beginning engineering students. Course content will vary from year to year and may be repeated to a maximum of three units. (Lecture problems 1 hour).

#### **101. Introduction to the Engineering Profession (1)**

Freshman orientation seminar on careers in engineering. Speakers from various fields illustrate opportunities and challenges in the engineering profession. (Lecture-problems 1 hour.) Traditional grading only.

#### **202. Computer Methods in Engineering (3)**

Prerequisite: CECS 174 and MATH 224. Introduction to MATLAB and numerical methods with applications to engineering. Programming in MATLAB. Introduction to SIMULINK and other MATLAB toolboxes. (Lecture 2 hours, laboratory 3 hours.) Traditional grading only.

#### **203. Engineering Problems and Analysis (3)**

Prerequisite: MATH 120; Corequisite: ENGR 203L. Formulation of engineering problems and methods for their analysis. Application of vectors, matrices, derivatives and integration into engineering problems. Computer aided analysis using MATLAB, MathCad, etc. (Lecture - Problems hours.) Traditional grading only.

#### **203L. Engineering Problems and Analysis Laboratory (1)**

Prerequisite: MATH 120; Corequisite: ENGR 203. Computer-based exercises on fundamental concepts such as vectors, matrices, derivatives, integrals. Practical engineering problems are assigned and solved using MATLAB. (Laboratory 3 hours.) Traditional grading only.

#### **205. Surfing the Information Superhighway – Internet Resources and Services (3)**

Prerequisite: ENGL 100. Overview of Internet resources, services and networked information systems for nonspecialists. Instructional and learning methods include a combination of lecture, on-line demonstrations, class discussions, guest speakers, and computer lab exercises. (Lecture-problems 3 hours.) Traditional grading only.

### **Upper Division**

#### **3021. Energy and Environment: A Global Perspective (3)**

Prerequisites: Completion of the G.E. Foundation, one or more Explorations courses, and upper-division standing. Renewable and nonrenewable energy sources, including but not limited to fossil fuels, nuclear, solar, wind, wave, tides, geothermal, hydroelectric and biomass. Available world resources, market, trends, and technology. Energy conservation and energy balance. Practical energy alternatives and their social, cultural, and political impacts. Ecosystem and environment, human-induced climate changes. Environmental aspects of power generation, air pollution, acid rain, ozone depletion, and global warming. Recycling and blue print for a sustainable environment. (Lecture-Problem 3 hours) Traditional grading only.

#### **310. Business Communications in Engineering Profession (3)**

Prerequisites: ENGL 100, COMM 110. This course provides basic concepts for understanding and practice of communication in the changing world of business for managers and professionals. It examines the use of language and conversations in business settings and their role in coordinating actions, resolving breakdowns in work performance, and providing customer satisfaction. Course topics include: Practice in professional styles of business writing and formats, preparation of a formal report, development of competence in business conversation skills (written, electronic, and oral), and other selected topics. International, technical, and linguistic developments are integrated into various applications of business communication. (Lecture - Discussion 3 hours.) Traditional grading only.

#### **330. Manufacturing Processes (3)**

Prerequisites: ENGR 223 and ME 322. Primary manufacturing processes for metals, plastics, composites, and ceramics such as casting, metal-forming, injection molding, blow molding, and powder processing. Computer simulation. (Lecture-problems 2 hours, laboratory 3 hours.) Traditional grading only.

#### **340. Guitar Electronics: Engineering Sound (3)**

Prerequisites: Upper division standing, completion of GE Foundation requirements, one course from G.E. category B1b. (Not open to students with credit in EE 333). Historical review of electromagnetic principles and their application to the reproduction, modification, and creation of sound. The electric guitar, its amplifiers, and special effects devices (analog and digital) will be used to gain practical experience. Electrical safety, physiology and physics of the ear. (Lecture 2 hours, laboratory 3 hours.) Traditional grading only.

#### **345. Digital Signal Processing Fundamentals and Applications (3)**

Prerequisite: MATH 120 or MATH 224. (Not open to students with EE 386). Principles and practices of signal processing, including multimedia, sound, and images. Techniques for analog-to-discrete and discrete-to-analog conversion, difference equations and digital filters, and spectrum analysis. Applications such as digital audio, computer music, CD player, FM/AM synthesis, reconstruction and zooming images. (Lecture 2 hours, laboratory 3 hours.) Traditional grading only.

### 350. Computers, Ethics and Society (3)

Prerequisites: ENGL 100, one computer programming course, 3 units from GE Category A.1 (Writing), and 3 units from GE Category C.2.b (Philosophy) or GE Category D (Social and Behavioral Science). An examination of the social impact of information technologies. Topics include a survey of the technology (software, hardware and key applications), ethical obligations of specialists, the computer in the workplace, shifts of power, privacy, and legal issues related to computing. (Lecture-problems 3 hrs).

### 370I. Astronautics and Space (3)

Prerequisites: Completion of GE Foundation requirements, one or more Explorations courses, and upper-division standing. This course combines the disciplines of space engineering with economics, human physiology, satellite meteorology, earth resources and environmental science, astronautics and space exploration. Emphasis on oral and written communications, numeracy and use of computers. Extensive use of computer animation, videographics and the Internet. (Lecture-problems 3 hours.) Traditional grading only.

### 375I. Total Quality and Continuous Improvement (3)

Prerequisites: Completion of GE Foundation requirements, one or more Explorations courses, and upper-division standing. The course examines the global competitiveness and the use of Total Quality approach to achieve Continuous Improvement. The topics include the following: History of quality movement, Quality gurus and Deming's philosophy on TQM, Strategic planning, Customer satisfaction, TQM tools, Effective visual representation of data, Worker empowerment and teamwork, Supply chain management, Statistical tools for controlling quality, ISO 9000 and its role in quality improvement, Malcolm Baldrige National Quality Award, Deming's Prize, Industrial practice and Case studies. The course fosters teamwork with Team project reports and oral presentations. (Lecture-problems 3 hours). Traditional grading only.

### 391. Engineering and Civilization (3)

Prerequisites: ENGL 100 and a Critical Thinking course (A3 category of GE) or consent of instructor. Study of the interaction between human beings, the environment, resources, engineering and science, including the impact of engineering on society. Readings and lectures providing perspective and insight into current problems at the interfaces between engineering and other disciplines, especially anthropology, art, ecology, economics, philosophy, psychology, science and the social sciences. (Lecture-Problems: 3 hours.)

### 492B. Internship In Engineering (3)

Prerequisite: Upper division standing and permission of the instructor. A Co-Op field experience. Students who qualify can be placed in a major- or career-related, pre-professional experience as an employee in private industry or in public agencies. May be repeated a maximum of six units. (Lecture-problems 3 hours).

### 461. Manufacturing Resource Planning (3)

Prerequisites: Upper division standing. Basic principles of manufacturing resources planning, operations management, and control. Forecasting techniques, production planning and scheduling procedures, and analysis of manufacturing resources. Material inventory activities, facilities and physical plant layout, production process and equipment, and productivity and quality. Team projects using computer modeling software. (Lecture-problems 3 hours) Traditional grading only.

### 483. Computer Integrated Manufacturing (3)

Prerequisite: ENGR 430. Principles and practices of the function of computers in controlling the manufacturing process, including hardware and software requirements for computer automation; computer architectures used in manufacturing; computer-aided design; manufacturing systems; computer controlled manufacturing equipment; simulation; quality assurance; programming the factory. (Lecture-problems 3 hours) Traditional grading only.

## Graduate Division

### 511. Quality Assurance in Manufacturing (3)

Prerequisites: CE 406 or consent of instructor, and graduate standing. In-depth studies of planning for quality, productivity and competitive positioning in manufacturing. Understanding the TQM process. Inspection and standardization and product reliability strategies. Case study projects. (Lecture-problems 3 hours.) Traditional grading only.

### 532. Logistics Principles and Practice (3)

Prerequisite: Graduate standing or consent of instructor. Logistics concepts, history, industry and military practice, lessons learned, and the complete product life cycle. Logistics processes including maintainability, support resource identification and technical documentation and training. Engineering design influence on product maintenance and material and operational support. (Lecture-problems 3 hours.) Traditional grading only.

### 574. Advanced Manufacturing Technology and Processes (3)

Prerequisites: Consent of instructor, and graduate standing. Build from manufacturing process into factory integration, study of advanced manufacturing processes including composites, electronics manufacturing, automated material handling, assembly, inspection, warehousing, factory and office of the future. Automation, robotic applications, flexible manufacturing systems, group technology and the economics of the automated systems. (Lecture and Computer Laboratory, 3 hours). Traditional grading only.

### 591. Engineers to Managers – A Transition (3)

Prerequisites: Consent of instructor and graduate standing. This course is designed to assist and equip engineers in making a successful transition into management. The subject areas include: Engineering mindset - its advantages and disadvantages; Traits of successful managers; Corporations as an intricate system of people, machines, and facilities; Management positions and their specific requirements; Management and inter-acting disciplines; Role of "people skills" in non-coercive supervision; Responsibilities of technical managers; Strategic planning and implementation; Managing changes and technology innovation; Total Quality Management (TQM) concepts; Team projects involving realistic scenarios and case studies. (Lecture-Problems 3 hours.) Traditional grading only.

### 596. Special Projects in Engineering Management (3)

Prerequisites: Eligible for advancement to candidacy and consent of instructor. Under faculty supervision students will pursue synthesis work, as a culminating experience, on the topics learned for the interdisciplinary MSEM degree. In consultation with the Program Advisor, an Independent Study form must be completed. An acceptable project report must be submitted. Can be repeated for credit to a maximum of 6 units. Traditional grading only.

### 790. Advanced Special Topics in Engineering (4)

Prerequisite: MS or equivalent and formally admitted to the Ph.D. program. Each offering is based on an area of Engineering in which recent advances have been made. Specific topics will be recorded on student's transcripts. Repeatable to a maximum of 8 units with different topics. Course Survey Form must be completed. Traditional grading only.

### 795. Advanced Directed Studies (4)

Prerequisite: MS or Equivalent and formally admitted to the Ph.D. program. Explorations of theoretical and experimental (if applicable) Engineering problems in great depth with emphasis on mathematical modeling and analysis. Students must present the findings in a formal report and a seminar. Repeatable to a maximum of 8 units. Course Survey Form must be completed. Traditional grading only.

### 798. Doctoral Dissertation (4-12)

Prerequisites: Enrollment is limited to students formally admitted to the Ph.D. program who have passed the preliminary examinations and research tool tests on completion of at least 48 units of course work. A written dissertation proposal containing an outline of the research to be undertaken and references to relevant source material must be submitted. Only upon a positive recommendation a student may embark on a dissertation. Minimum 4 units per semester. May be repeated until the work is completed; any work beyond the maximum of 12 units does not count toward the degree. Traditional grading only.

# CENTER FOR ENVIRONMENTAL STUDIES

*College of Natural Sciences and Mathematics*

## Director

Roswitha B. Grannell

## Location

Peterson Hall 3 (PH), Room 130

## Telephone

(562) 985-4927 or (562) 985-4809

View the CSU, Long Beach *Catalog* on-line at [www.csulb.edu](http://www.csulb.edu) by clicking on "Academics" and then "CSULB Catalog."

## Certificate in Environmental Studies (code 1-7000)

The Center for Environmental Studies has as its objectives (1) creation of an awareness of the kind and scope of environmental problems, (2) preparation to analyze environmental problems and issues and (3) training in research in, and solution of, environmental problems.

The Center offers the Environmental Studies Certificate Program which is comparable to an academic minor. It has three components: natural environment prerequisites (or corequisites), core requirements, and elective courses distributed in human behavior, resources and analysis and application.

The pattern of completion for the certificate is directed toward both the technically trained, research oriented student and the liberal arts, humanistically oriented student. Students in both areas must contact the Director, Center for Environmental Studies, for entry into the program. This contact should be made as early as possible in the student's academic career so that he or she may receive counseling in the most appropriate course work.

## Requirements

1. A bachelor's degree (may be completed concurrently);
2. Consultation with the director of the program;
3. Overall GPA of 2.0 in all work attempted;
4. 33 units distributed as follows:
  - A. Prerequisite or Corequisite Courses (nine units outside the major department selected from the three categories below; at least one laboratory course from categories A. or B. must be included, and a second is highly recommended);
    - (1) Life Sciences: At least three units from BIOL 200, 313, 324, 350, 351, 353, 427, 450, 453, 464; MICR 211;
    - (2) Physical Sciences: At least three units from CHEM 100, 111A, 111B, 202, 302; GEOL 102, 104, 105, 160, 163, 465; PHYS 100A, 100B, 151, 152;
    - (3) Geography: 140, 440, 442, 444;

- B. Core requirements (nine units; upon petition to the Director, three units of E/ST 499 may be substituted for E/ST 490 (2 units) - (1 unit), taken concurrently (only the sections entitled Environmental Field Studies may be used; the prerequisite for these courses is prior completion of six units of Section A, above, including the laboratory);
- C. Elective Requirements (15 units, distributed over the following three categories; nine of these units must be outside the major department, six units must be outside the College, and six units must be at upper division level);
  - (1) Human Behavior: At least three units outside the major department from MICR 303I; POSC 442; PSY 351 or SOC 335I; SOC 350;
  - (2) Man and Resources: At least three units outside the major department from BIOL 100; CH E 475; C E 364; GEOG 160, 304, 455, 460, 467; GEOL 190, 191; H SC 422; SOC 410I;
  - (3) Analysis and Application: Three units from BIOL 260; ECON 380; GEOG 486; H SC 485; MATH 180; PSY 310. (Upon approval of the Director, one additional course from this category may be used to fulfill Section C, Elective Requirements in lieu of a course from A. or B. above).

## Courses (E/ST)

### Upper Division

#### 490. Special Topics in Environmental Studies (1-3)

Prerequisite: Consent of instructor. Topics of current interest in environmental studies selected for intensive development. May be repeated (with change of topic) for a maximum of six units of credit. Topics will be announced in the *Schedule of Classes*. Upon approval of the director of the Center for Environmental Studies, this course is acceptable for credit in lieu of equivalent units in Section C, Elective Requirements. (Lecture 3 hrs.)

#### 499. Directed Studies (1-3)

Prerequisite: Consent of instructor. Independent study under the supervision of a faculty member. Upon approval of the director of the Center for Environmental Studies this course is acceptable for credit toward the Environmental Studies Certificate in lieu of equivalent units in Sections B and C (Core Requirements and Elective Requirements).

**S**tudents desiring detailed information should contact the department office for referral to one of the faculty advisors.

## ***Construction Engineering Management and Engineering Technology Advisory Council***

The advisory council, composed of leaders actively engaged in areas of construction and technology with which the programs are concerned, continually provides information and guidance about industrial developments in methods, materials and techniques so that the programs reflect the best of current practices. The members examine various

aspects of the programs and make recommendations for changes in course content, methods and/or facilities. Present membership in the council is made up of representatives from the different sectors of the American industries or corporations.

## **Bachelor of Science Degree in Construction Engineering Management Program**

The four-year program in Construction Management leads to the Bachelor of Science degree which is accredited by the American Council for Construction Education (ACCE) (American Council for Construction Education, 1300 Hudson Lane, Suite 3, Monroe, LA 70201-6054, phone: 318-323-2816). Major emphasis is placed on organizing and managing the construction phase of society's efforts to improve the environment. The constructor is an important member of the building team and requires a professional knowledge of techniques, materials, equipment, job planning and cost control to add to the contributions of the planning and design professions. Graduates of this program can help supply the urgent needs of the construction industry and its related fields.

Every effort is made to provide a well-integrated program which will give the student the opportunity to develop the proficiencies necessary for a successful, professional career in construction. The program is also designed to accommodate students who may wish to enter the University in a four-year program, or who may wish to transfer credits earned to other colleges or approved technical or military service Schools. It is recommended that prospective students, prior to submitting an application for admission, be advised by a member of the Construction Engineering Management faculty to discuss departmental requirements and the admission requirements of the University.

## **Bachelor of Science Degree in Engineering Technology Program**

The Engineering Technology Program, accredited by The TAC (Technology Accreditation Commission) of ABET (Accreditation Board for Engineering and Technology, Inc., 111 Market Place, Suite #1050, Baltimore, MD 21202, phone: 410-347-7710, website: <http://www.abet.org>), is a practice-oriented program. It serves the state of California and the nation by providing high quality, applications-oriented education that prepares students to become professionals and perform high quality technical, administrative or managerial work in an existing or emerging technological field. The Engineering Technology graduates are provided with excellent education in the fundamentals of Engineering Technology through a combination of theory and laboratory practice, and with the ability to apply their knowledge to transform their ideas into working systems.

The Engineering Technology program has been developed to accommodate students who may wish to enter the University in a four-year program, or who may wish to transfer credits earned to other colleges or approved technical or military service Schools. It is recommended that prospective students, prior to submitting an application for admission, be advised by

a member of the Engineering Technology faculty to discuss departmental requirements and the admission requirements of the University.

The three options in Engineering Technology are:

### **Environmental Technology Option**

The Environmental Technology Option program is to provide career educational opportunities to students whose technological interests and aptitudes are applications-oriented. The goal is to produce occupational-ready college graduates with practical skills and potential for growth to meet defined technical manpower needs, primarily for California's environmental industry. To achieve these goals, emphasis is placed on meeting students' needs through lecture and laboratory teaching, through the co-op program with local industry, and through other relevant learning experiences.

In addition to acquiring technical knowledge and skills, graduates will be able to communicate well. They will be prepared not only for immediate employment but for continuing development as citizens and responsible human beings as well. This will be accomplished by requiring appropriate courses in technical fields, communications, and in general education courses. Furthermore the ethical considerations of environmental issues will have a major role throughout the curriculum. Finally, every effort is made to help the students in proper job placement upon graduation.

### **Manufacturing Technology Option**

The objective of the Manufacturing Technology Option program is to prepare graduates to pursue careers in the application of methods required by industry to manufacture products. Emphasis is placed on specific job skills required of entry-level professionals in manufacturing technology such as the evaluation and implementation of manufacturing processes and equipment, plant planning and layout, quality control systems, tool design, manufacturing standards and cost control, computer applications, safety, automation, and integrated product and process development. Additional emphasis is placed on oral and written communication skills and manufacturing management and leadership principles. Graduates of the program will be employed in the manufacturing engineering, production, production control, procurement and materials management departments of both large and small companies in all areas of the manufacturing industry. The major is designed to meet TAC of ABET criteria for accredited programs in engineering technology.

### **Quality Assurance Technology Option**

The objective of the Quality Assurance Technology Option program is to prepare graduates to pursue careers in the practical application of quality systems required to produce quality products in both the manufacturing and service industry. Emphasis is placed on specific job skills required of entry-level professionals in quality technology such as the evaluation and implementation of quality systems to support manufacturing processes, quality assurance, process improvement, quality inspection systems, measurement science, quality related computer hardware and software applications, product safety, reliability and maintainability, statistical process control and industrial designed experiments, and integrated process development. Also included are oral and written communication

skills, and quality management and leadership principles. Graduates of the program will find jobs in quality engineering, quality assurance, product assurance, supplier assurance, configuration and data management, procurement, software quality assurance, production, operations, material management, and industrial engineering departments of both large and small companies in all areas of the manufacturing industry and service industry. The major is designed to meet TAC of ABET criteria for accredited programs in engineering technology.

### **Bachelor of Science in Electronics and Computer Engineering Technology**

The Electronics and Computer Engineering Technology program, accredited by TAC of ABET (Accreditation Board for Engineering and Technology Inc., 111 Market Place, Suite #1050, Baltimore, MD 21202, phone: 410-347-7710, website: <http://www.abet.org>), is designed to provide a solid technical foundation to its graduates which will enable them to perform well in a variety of employment situations. The program focuses on applications of current electrical, electronics, and computer technologies to solve real-world problems by offering a broad curriculum which covers current trends in the industry.

The program has been developed to accommodate students who may wish to enter the University in a four-year program, or who may wish to transfer credits earned at other colleges or approved technical or military service schools. It is recommended that prospective students, prior to submitting an application for admission, be advised by a member of the Electronics and Computer Engineering Technology faculty to discuss departmental requirements and the admission requirements of the University. The two options under the B.S. in Electronics and Computer Engineering Technology are:

#### **Option in Electronics Technology**

The Electronics Option prepares the student for a position as a technologist, in such industries as aerospace, computers, communications, biomedical, chemical, power, etc. Students are offered a wide range of training in topics such as instrumentation, controls, microprocessors, microelectronics, biomedical electronics, communications, motors and generators, robotics, computer applications, programming and interfacing. Moreover the option emphasizes written and oral communications skills as well as modern methods of industrial administration and supervision. The option is designed to meet ABET criteria for accredited programs in engineering technology.

#### **Option in Computer Technology**

The primary objective of the Computer Option is to prepare graduates to pursue careers related to manufacturing, integration, and support of computer systems. Emphasis is placed on specific job skills required of entry level professionals in computer industry, including systems analysis and design, data administration, networking, data communications, data acquisition, oral and written communication, and management principles. The Computer Option is available to students interested in the manufacturing of computers and the applications and operations aspects of computer hardware and software. The option is designed to meet ABET criteria for accredited programs in engineering technology. The graduates of this program will find employment in industry and organizations where a combination of practical hardware and software background is important.

## Engineering Technology Facilities

The multi-million dollar building for Engineering Technology is designed with laboratories and modern equipment for instruction in planning and scheduling, foundry and pattern-making, metallurgy and heat treating, metrology, quality assurance, materials testing, electronic systems and testing, electro-chemical processes, microelectronics, industrial electricity, plant layout, robotics and control, computer networks, data acquisition, and CAD/CAM.

### Bachelor of Science in Construction Engineering Management (code 3-4374) (132 units)

All Construction Engineering Management students must receive a minimum grade of "C" in each of the prerequisite courses before enrolling in any Construction Engineering Management course. In addition to any other all-university requirements regarding grade point averages for graduation, a Construction Engineering Management student must achieve a minimum 2.0 average in all Construction Engineering Management courses.

Students enrolled in the Construction Engineering Management B.S. program must complete a minimum of 132 units. These courses cover the broad disciplines and functions of Construction Engineering Management.

#### Requirements

Lower Division Basic Engineering Science Courses: CHEM 111A; MATH 120; ENGR 203; PHYS 100 A&B; CEM 101, 202, 121, 204, 205, 205L.

Construction Engineering Management Courses:

Lower Division: ACCT 201 or CEM 201; CEM 220, 225, 225L, 230, 235, 235L.

Upper Division: CEM 300, 300L, 304, 309, 321, 322, 325, 328, 330, 335, 335L, 410, 421, 422, 426, 428, 430, 431, 435, 435L, 490; ECON 300; ENGR 310; MGMT 300.

Upper Division Elective Courses: Plus six units of approved electives selected in consultation with an advisor from: CEM 374, 409, 423, 438; FIN 342.

### Bachelor of Science in Engineering Technology (pre-code 3-4375)

All Engineering Technology students must receive a minimum grade of "C" in each of the prerequisite courses before enrolling in any Engineering Technology course. In addition to any other all-university requirements regarding grade point averages for graduation, an Engineering Technology student must achieve a minimum of 2.0 average in all Engineering Technology courses.

Students enrolled in the Engineering Technology B.S. program must complete a minimum of 128 units for Manufacturing and Quality Assurance. These courses cover the broad disciplines and functions of Engineering Technology.

#### Requirements

Core Engineering Technology Courses for Manufacturing and Quality Assurance:

Lower Division: CHEM 111A; MATH 120; ENGR 203, 203L; PHYS 100 A&B; ET 101, 170, 202, 202L, 204, 205, 205L.

Upper Division: ECON 300; ET 301, 301L, 307, 309, 311, 335, 335L, 410, 435, 435L.

### Option in Environmental Technology (code 3-4381) (135 units)

Lower Division: ET 206, 209, 210, 213

Upper Division: ET 303, 319, 329, 329L, 333, 333L, 400, 400L, 407, 449, 449L

Select at least six units of approved electives in consultation with an advisor from the following: ET 390/L, 476, 485.

### Option in Manufacturing Technology (code 3-4378) (128 units)

Lower Division: ET 244, 244L, 264, 264L.

Upper Division: ET 302, 302L, 304, 312, 313, 313L, 363, 365, 365L, 390, 390L, 418, 461, 498.

Select at least 3 units of approved electives in consultation with an advisor from the following: ET 409C, 419, 420; CEM 374.

### Option in Quality Assurance (code 3-4379) (128 units)

Lower Division: ET 244, 244L; FIN 220.

Upper Division: ET 302, 302L, 312, 313, 313L, 320, 390, 390L, 418, 419, 420, 461, 496.

Select four units of approved electives in consultation with an advisor from the following: ET 409D, CEM 374.

### Bachelor of Science in Electronics and Computer Engineering Technology (pre-code 3-4385)

All Electronics and Computer Engineering Technology students must receive a minimum grade of "C" in each of the prerequisite courses before enrolling in any Electronics and Computer Engineering Technology course. In addition to any other all-university requirements regarding grade point averages for graduation, an Electronics and Computer Engineering Technology student must achieve a minimum of 2.0 average in all Electronics and Computer Engineering Technology courses.

Students enrolled in the Electronics and Computer Engineering Technology B.S. program must complete a minimum of 130 units. These courses cover the broad disciplines and functions of Electronics and Computer Engineering Technology.

#### Requirements

Core Electronics and Computer Engineering Technology Courses:

Lower Division: CHEM 111A; MATH 120; ENGR 203, 203L; PHYS 100 A&B; ET 101, 170, 202, 202L, 204, 205, 205L; 250, 250L, 252, 252L, 255, 255L, 260, 260L, 286, 286L.

Upper Division: ET 309, 311, 360, 360L, 386, 386L, 387, 387L, 388, 388L, 410, 442, 442L, 488, 488L.

### Option in Electronics Technology (code 3-4386) (130 units)

Select 21 units from the following: ET 301, 301L, 341, 341L, 350, 350L, 441, 444, 445, 445L, 447, 447L, 460, 460L, 409B.

### Option in Computer Technology (code 3-4387) (130 units)

Select 21 units from the following: ET 301, 301L, 486, 486L, 487, 487L, 489, 489L, 491, 491L, 492, 492L, 494, 494L, 497, 497L, 409E.

## Fieldwork Requirements

Fieldwork experience is required for the BS in Construction Engineering Management, the BS in Engineering Technology (all options) and the BS in Electronics and Computer Engineering Technology (all options), consisting of no less than three months full-time (or equivalent part-time) of employment in an approved industry or governmental agency. The student must hold a position equivalent to a technician or higher which affords the opportunity to exercise responsibility usually given to those who have completed two years of college. The fieldwork must be completed prior to graduation, be certified and approved by the faculty of the Department.

## Facilities Operations Certificate (code 1-4010)

The Certificate Program in Facilities Operations is designed to qualify the graduate to serve in plant engineering, industrial construction coordination, facilities development and design, plant layout, and facilities project management. Examples of the myriad positions available to the graduate of this program include facilities planner, construction supervisor, facilities or plant supervisor, facilities project analyst, and facilities design-analyst.

This program provides the Facilities Operations graduate with a depth of technical knowledge in facilities operations-oriented technical courses, as well as the knowledge of behavioral sciences essential for managing technical functions.

### Requirement

1. The Certificate in Facilities Operations may be earned concurrently with or subsequent to the baccalaureate degree.
2. This program is open to all majors who have fulfilled the prerequisites as stated below.
3. The program requires a total of 25 units as specified below.
  - a. The completion of supporting technical courses chosen in consultation with an advisor.
  - b. The following 25 units of facilities operations oriented courses are required: ET 221, 410; CEM 321, 374, 431, 432, 433, 434, 436.
4. Any deviation from this program requires the written permission of the program advisor.

## Safety Operations Certificate (code 1-4020)

The Certificate Program in Safety Operations is designed to prepare students for safety positions that require a strong background in the technology of safe industrial environments. Examples of this kind of position are manufacturer's safety representative, manufacturing facilities safety analyst, traffic safety analyst, and representative of California or Federal agencies involving public safety. This interdisciplinary program provides the student with a depth of technical training in safety, and related technical courses, including the experiences in human resources management necessary to effectively supervise safety programs.

### Requirements

1. The Certificate of Safety Operations may be earned concurrently with or subsequent to the baccalaureate degree.

2. This program is open to all majors who have fulfilled the required prerequisites as stated below.
3. The program requires a total of 24 units as specified below:
  - a. The completion of supporting technical courses chosen in consultation with an advisor.
  - b. The following 24 units of safety operations-oriented courses are required: ET 207, 307, 309 and 410.
4. Any deviation from this program requires the written permission of the program advisor.

---

## Engineering Technology Courses (ET)

---

### Lower Division

#### 101. Introduction to Engineering Technology (1)

Survey of the professional activities and environment of the engineering technologist. Course covers the role of the technologist in American industry, the history of technology and the growth and future of those professionals who hold the Bachelor of Science degree in Engineering Technology. (Lecture-Discussion 1 hour) Credit/No Credit grading only.

#### 170. Engineering Drafting and Design (3)

Prerequisite: Sophomore standing. Graphic communication including freehand sketching. Introduction to blueprinting reading and computer aided drafting. Emphasis on engineering drafting practices; general standards, tolerances, thread series, welding joints, surface finishes, fasteners, and structural shapes. (Lecture 1 hour, laboratory 3 hours) Traditional grading only.

#### 202. Probability and Statistics for Technology (3)

Prerequisite: High school algebra. Corequisite: ET 202. Statistics and probability theory, sampling, correlation, regression as applied to Engineering Technology. (Lecture-problems 3 hours.) Traditional grading only.

#### 202L. Probability and Statistics for Technology Laboratory (1)

Prerequisites: Two years high school algebra, geometry, and intermediate algebra (or MATH 010) or the equivalent. Corequisite: ET 202. Laboratory exercises in statistics and probability theory, sampling, correlation, regression as applied to Engineering Technology. Simulation using statistical packages. (Laboratory 3 hours.) Traditional grading only.

#### 204. Applied Mechanics-Statics (3)

Prerequisites: MATH 120, PHYS 100A. Force systems acting on structures, moments, equilibrium, centroids, trusses, beams, cables, frames, machines, friction, section properties, masses, both U.S. and S.I. units of measurements. (Lecture 2 hrs, activity 2 hrs)

#### 205. Computer Systems and Programming (1)

Corequisite: ET 205L. An overview of computer systems, computer hardware, and software development. Hardware topics include the central processing unit and memory, input/output devices, storage mechanism, and communication. Software topics include programming languages, operating systems, and systems analysis and design. A programming language will be used for lab activities. (Lecture - discussion, exercise, 1 unit) Traditional grading only. Same as CEM 205

#### 205L. Computer Systems and Programming Lab (1)

Corequisite: ET 205. Laboratory exercises in computer programming to solve problems in business, manufacturing, research and simulation. An object-oriented programming language will be used for these activities. (Laboratory 3 hours.) Traditional grading only. Same as CEM 205L

#### 206. Introduction to Environmental Hazardous Materials and Waste Technology (3)

Prerequisites: CHEM 111A, PHYS 100A. Overview of the environmental effects of industrial pollution and the history of environmental legislation. Study of industrial processes and the generation of waste streams in selected industries. Introduction to the concepts of sustainable development, energy conservation, waste minimization and waste treatment. (Lecture-Discussion 3 hours.)

---

## Engineering Technology Courses (ET)

---

### 207. Ergonomics (3)

Prerequisite: sophomore standing. Interface between people and machine related to work area, design and use of equipment, protective equipment and life-support requirements for hazardous environments. (Lec-Discussion 3 hrs) Traditional grading only.

### 208. Hazardous Waste Stream Generation, Reduction, Treatment (3)

The study of industrial processes and their generation of waste streams in selected industries including: electroplating, metal finishing and printed circuit board production, oil refining and chemical production, general manufacturing, printing and graphic reproduction, agriculture and consumer services. The course will center on various raw materials and chemicals used in industry, examining the changes that occur as they move through the industrial process, as well as understanding the material balance concept of inventory. Discussion of applicable regulations will be included, and the importance of waste minimization/treatment concepts will be stressed.

### 209. Environmental Applications of Physical and Organic Chemistry (2)

Prerequisite: CHEM 111A. Applications of physical and organic chemistry in environmental science and engineered environmental systems. (Lecture-Discussion 2 hours.)

### 210. Hazardous Material and Waste Management (3)

Prerequisites: CHEM 111A, ET 206. A study of the requirements of federal, state and local regulations relating to the management of hazardous materials and hazardous wastes. Particular focus on compliance with shipping, storage, labeling, sampling, and inventory and release reporting requirements. (Lecture-Discussion 3 hours.)

### 212. Hazardous Materials Management Application (3)

The study of the requirements and applications of federal, state and local laws and regulations relating to hazardous materials. Emphasis on compliance with Department of Transportation, Occupation Safety and Health Administration (OSHA) Hazard Communication, Superfund Amendments and Reauthorization Act (SARA) Title III community Right to Know, Underground Tank, Asbestos, Proposition 65, and Air Toxics Regulation. The course will provide the student with an understanding of the legal portion of hazardous materials laws; as well as, applications of these laws.

### 213. Environmental Health, Safety and Emergency Response (3)

Prerequisites: CHEM 111A, BIOL 211A, ET 206. Hands-on instruction in safety and emergency response to chemical and physical exposures in industrial and field settings. Acute and chronic health effects produced by exposure to chemical agents. (Lecture-Discussion 3 hours.)

### 244. Machine Tools (1)

Corequisite: ET 244L. Operations and use of the conventional and non-conventional machine tools. Not open to students with previous machine tools credit. (Lecture-Discussion 1 hour.) Traditional grading only.

### 244L. Machine Tools Laboratory (1)

Corequisite: ET 244. Laboratory exercises using conventional and non-conventional machine tools. Not open to students with previous machine tools experience. (Laboratory 3 hours.) Traditional grading only.

### 250. Circuit Analysis I (2)

Prerequisite: PHYS 100B. Corequisite: ET 250L. Fundamentals of DC theory, units of measurements, systems of units. Current, voltage, resistance, Ohm's law, power, energy. Series and parallel circuits. Methods of analysis and selected topics. Network theorems such as superposition, Thevenin's, Norton's and Millman's theorems. (Lecture-Discussion 2 hours.) Traditional grading only.

### 250L. Circuit Analysis I Laboratory (1)

Prerequisite: PHYS 100B. Corequisite: ET 250. Laboratory exercises will be conducted on AC and DC circuits using proto boards and power supplies, multi-meters, function generators, oscilloscopes and frequency counters. (Laboratory 3 hours.) Traditional grading only.

### 252. Circuit Analysis II (2)

Prerequisites: MATH 120, ET 250, 250L. Corequisite: ET 252L. Study of circuit analysis techniques in AC, including network theorems, mesh and nodal analysis, transients, time domain and phasors, magnetic circuits, sinusoidal and non-sinusoidal wave forms, resonance circuits (series and parallel), filters (low-pass, high-pass, passband and bandstop). (Lecture-Discussion 2 hours) Traditional grading only.

### 252L. Circuit Analysis II Laboratory (1)

Prerequisites: MATH 120, ET 250, 250L. Corequisite: ET 252. Laboratory exercises will be conducted on AC circuits using proto boards and AC power supplies, function generators, oscilloscopes, and frequency counters. (Laboratory 3 hours.) Traditional grading only.

### 253. General Electricity (2)

Prerequisite: PHYS 100B. Corequisite: ET 253L. An overview of electrical/electronics principles and applications including instrumentation, power distribution, and digital electronics. Not open to ET students in the Electronics Option and the Computer Option. (Lecture - discussion, exercise 2 units.) Traditional grading only.

### 253L. General Electricity Laboratory (2)

Prerequisite: PHYS 100B. Corequisite: ET 253. Laboratory exercises in basic electrical/electronics circuits and applications. Not open to ET students in the Electronics Option and the Computer Option. (Laboratory 3 hours.) Traditional grading only.

### 255. Introduction To Digital Electronics (2)

Prerequisites: ET 250, 250L. Corequisite: ET 255L. Combinational logic utilizing Boolean algebra and the binary numbering system. This beginning course includes Karnaugh maps, truth tables, coding, switching circuits, converters and logic circuit elements. (Lecture-problems 2 hours.) Traditional grading only.

### 255L. Introduction to Digital Electronics Laboratory (1)

Prerequisites: ET 250, 250L. Corequisite: ET 255. Laboratory exercises in basic logic circuits. Topics included are breadboarding, basic gates, and combinational circuits. (Laboratory 3 hours.) Traditional grading only.

### 260. Solid-State Electronics I (3)

Prerequisites: ET 252, 252L. Corequisite: ET 260L. Analysis and design of solid-state electronic circuits using diodes, bipolar, unijunction and field-effect devices. (Lecture-Discussion 3 hours.) Traditional grading only.

### 260L. Solid State Electronics I Laboratory (1)

Prerequisites: ET 252, 252L. Corequisite: ET 260. Laboratory exercises in breadboarding and measurements of solid-state circuits utilizing all types of electronic measuring equipment. (Laboratory 3 hours.) Traditional grading only.

### 264. Industrial Tooling (1)

Prerequisites: ET 170, 205L; corequisite: ET 264L. Design of tools for production. Typical tooling problems include working drawings and hardware. (Lecture-Discussion 1 hour.) Traditional grading only.

### 264L. Industrial Tooling Laboratory (1)

Prerequisites: ET 170, 205L; corequisite: ET 264. Laboratory experiments in tool design in relation to mass part production. (Laboratory 3 hours.) Traditional grading only.

### 286. Introduction to Object-Oriented Programming (2)

Prerequisites: ET 205, 205L; corequisite: ET 286L. Introduction to an object-oriented programming language (C++). Problem analysis and software development methodology. Emphasis on applications to technology (Lec-Discussion 2 hrs)

### 286L. Introduction to Object-Oriented Programming Laboratory (1)

Prerequisites: ET 205, 205L; corequisite: ET 286. Introduction to an object-oriented programming language (C++). Problem analysis and software development methodology. Emphasis on applications to technology. (Laboratory 3 hours.)

## Upper Division

### 301. Engineering Materials (2)

Prerequisites: ET 204, CHEM 111A; corequisite: ET 301L. Study of physical and mechanical properties and applications of engineering materials. (Lecture-Discussion 2 hours.)

### 301L. Engineering Materials Laboratory (1)

Prerequisites: ET 204, CHEM 111A; corequisite: ET 301. Laboratory investigation and experiments in the application of engineering materials. Field trips. (Lab 3 hrs.)

### 302. Industrial Electricity (2)

Prerequisite: PHYS 100B; corequisite: ET 302L. An overview of electrical principles and applications in electrical manufacturing industries including instrumentation and power distribution. (Lecture 2 hours.) May not be used for credit for the ECET program.

### 302L. Industrial Electricity Laboratory (1)

Prerequisite: PHYS 100B; corequisite: ET 302. Overview of laboratory techniques in electrical engineering technology and applications in the industry. (Laboratory 3 hours.) May not be used for credit for the ECET program.

### 303. Fundamentals of Environmental Technology (3)

Prerequisites: CHEM 111A, MATH 120, PHYS 100A. Fundamentals of the techniques and unit operations for pollution control of air, land, surface water and groundwater pollution, as well as design of conveyances for water and wastewater, with an emphasis on their application in an industrial setting. Includes fundamentals of hydrology and fluid flow in environmental engineering technology. (Lecture-Discussion 3 hours.)

### 304. Applied Mechanics Strength of Materials (3)

Prerequisite: ET 204. Analysis of strength and rigidity of structural members in resisting applied forces, stress, strain, shear, moment, deflections, combined stresses, connections, and moment distribution. (Lecture-Discussion 3 hours.)

### 307. Industrial Safety (2)

Prerequisites: Junior Standing. Survey of industrial safety administration, engineering and management. Emphasis is placed on the role of the first line supervisor in establishing and maintaining a safe, healthful work environment for employees. Introduction to supporting computer resources used in the safety field. (Lecture-Discussion 2 hours)

### 309. Industrial Communications and Leadership (3)

Prerequisites: ET 205, 205L, English Composition. Principles, theories and concepts of industrial communications and management for engineering technology. Emphasis is placed on the primary management functions of planning, organizing, motivating, leading, controlling and staffing in a technical environment. Introduction to basic decision support models. Students also learn written and oral transmission and interpretation of technical information; communication forms and procedures of industry, with computer applications. (Lecture-Discussion, 3 Hours.) Traditional grading only.

### 311. Quality Engineering Technology (3)

Prerequisites: ET 202, 202L, Junior standing. Quality engineering technology principles and practices in industry, including management concepts, inspection practices, costs of quality and testing. (Lecture-Discussion 3 hours.)

### 312. Statistical Quality Control (3)

Prerequisite: ET 311. Statistical process control; including use of statistical methods for analysis and improvement of product quality, control charts, linear correlation; sampling procedures, stratification, cause and effect analysis, process capability and introduction to design of experiments. (Lecture-Discussion 3 hours.) Traditional grading only.

### 313. Quality Assurance, Inspection Measurement and Testing (2)

Corequisite: 313L. Theory and application of inspection procedures, instrument calibration, precision measurements including theory and application of non-destructive testing of materials for quality control. Traditional grading only.

### 313L. Quality Assurance, Inspection Measurement and Testing Laboratory (1)

Corequisite: ET 313. Laboratory experiments; instrument calibration including standards and precision measurements including the use of non destructive test equipment for quality control. (Laboratory 3 hours.) Traditional grading only

### 319. Environmental Regulations and Compliance (3)

Analysis of federal and local administration of environmental laws, including the National Environmental Policy Act of 1969 and litigation of that act in the courts. Special attention paid to California and comparison of the environmental regulation policies of California. Case studies of legislation and political conflict in the environmental issues, and regulatory compliance. (Lecture-Discussion 3 hours.)

### 320. Software Quality Assurance (2)

Prerequisite: ET 205, 205L. Theory and practices of software Quality Assurance. Course emphasizes Government specifications such as DOD-STD-2167 and DOD-STD-2168. (Lecture-Discussion 2 hours.) Traditional grading only.

### 329. Environmental Study of Groundwater and Soils (2)

Corequisite: ET 329L. Detection, analysis and control of groundwater/soil contamination involving the regulatory hierarchy, distribution network and subsurface formations. Basic tools and procedures utilized in compliance operations. (Lecture-Discussion 2 hours.)

### 329L. Environmental Study of Groundwater and Soils Laboratory (1)

Corequisite: ET 329. Laboratory exercises in the techniques of detection, analysis and control of groundwater/soil contamination. Rules of compliance set by regulatory hierarchy, distribution network and subsurface formations. (Laboratory 3 hours.)

### 331. Environmental Auditing and Reporting (3)

Concepts, methods and techniques of performing environmental operational audits. Duties and responsibilities of a regulatory auditor within the State and Federal hierarchy. State and Federal compliance forms and procedures in industrial manufacturing processes as required by regulatory agencies. Written and oral transmission and interpretation of compliance information and related resource networks. (Lecture-Discussion 3 hours.)

### 333. Solid Waste Technology (2)

Corequisite: ET 333L. Survey of regulated hazardous and non-hazardous solid waste generated by common industrial processes. Topics include waste generation, storage, collection, transfer, transport, processing and recovery. Consideration of system performance, legislation, regulations and environmental impact. (Lecture-Discussion 2 hours.)

### 333L. Solid Waste Technology Laboratory (1)

Corequisite: ET 333. Techniques of identification, measurement and assessment of solid waste. Focus on regulated hazardous solid waste from common industrial processes. Topics include waste generation, storage, collection, transfer, transport, processing and recovery. Consideration of system performance, legislation, regulations and environmental impact. (Laboratory 3 hours.)

### 335. Engineering Materials and Processes I (3)

Corequisite: ET 335L. Examination of engineering materials and manufacturing processes including the study of: Phase diagrams; heat treatment; metal casting processes; welding and soldering; corrosion, powder metallurgy, electronic fabrication; tribology, friction, wear, lubrication; surface treatment, coating and cleaning. (Lecture - Discussion 3 hours) Traditional grading only.

### 335L. Engineering Materials Processes I Laboratory (1)

Corequisite: ET 335. Laboratory exercises in engineering materials and manufacturing processes including the study of: Phase diagram; heat treatment; casting; metallography and electronic manufacturing processes. (Laboratory 3 hours.) Traditional grading only.

### 341. Solid State Electronics II (3)

Prerequisites: ENGR 203, 203L, ET 260, 260L, corequisite: ET 341L. Miller's Theorem, integrated circuits, feedback, operational amplifiers, Fourier series, distortion, modulation, phase-locked loops, linear and non-linear circuits, and breadboarding. (Lec-Discussion 3 hrs) Traditional grading only.

---

## Engineering Technology Courses (ET)

---

### 341L. Solid State Electronics II Laboratory (1)

Prerequisites: ENGR 203, 203L, ET 260, 260L, corequisite: ET 341. Laboratory exercises in design and measurement of various circuits using operational amplifiers, comparators, regulators, silicon controlled rectifiers, frequency mixers and phase-locked loops. (Lab 3 hours.) Traditional grading only.

### 350. Motors and Generators (2)

Prerequisites: ET 252, 252L; corequisite: ET 350L. Study of electric rotating machinery, its theories, principles, design and applications in automation industries. (Lecture-Problems 1 hour.) Traditional grading only.

### 350L. Motors and Generators Laboratory (1)

Prerequisite: ET 252 252L; corequisite: ET 350. Laboratory exercises in applications and design of rotating machines. Topics covered are DC machines, synchronous machines, servomotor, step motor, and control circuits. (Laboratory 3 hours.) Traditional grading only.

### 360. Control Instrumentation (2)

Prerequisites: ET 260, 260L; corequisite: ET 360L. Application and basic design of analog and digital control instrumentation for industrial processes. Physical and electrical properties of thermal, mechanical and optical transducers with associated signal conditioning. (Lecture-Problems 2 hours.) Traditional grading only.

### 360L. Control Instrumentation Laboratory (1)

Prerequisites: ET 260, 260L; corequisite: ET 360. Laboratory exercises in developing and measuring various control systems utilizing operational amplifiers, transducers, thermocouples, bridges, and various pressure devices. (Laboratory 3 hours.) Traditional grading only.

### 363. Kinematics of Mechanisms (3)

Prerequisites: ET 170, 304. Mathematical and graphical approaches to analyze the motion of mechanisms, for further machine development, through studies of displacement, velocity and acceleration of mechanical elements. (Lecture-Discussion 2 hours, Activity 2 hours.) Traditional grading only.

### 365. Fluid Power and Control (2)

Prerequisites: PHYS 100A, ET 302, 302L; corequisite: ET 365L. Fundamentals and application of hydraulic, pneumatic and vacuum power as used in current manufacturing plants. (Lecture-Discussion 2 hours.)

### 365L. Fluid Power and Control Laboratory (1)

Prerequisites: PHYS 100A, ET 302, 302L; corequisite: ET 365. Demonstration and operation of fluid power systems. Design and selection of components for specific applications. Computer data acquisition and analysis. (Laboratory 3 hours.)

### 386. Introduction to Microprocessors (2)

Prerequisite: ET 286, 286L; corequisite: ET 386L. Theory and concepts of programming, hardware configuration, and functional capabilities of microcomputer systems including peripheral devices. (Lecture-Problems 2 hours.)

### 386L. Introduction to Microprocessors Laboratory (1)

Prerequisites: ET 286, ET 286L; corequisite: ET 386. Laboratory exercises in programming microcomputers. Topics included are number systems, microcomputer structure, mnemonic, binary code, peripheral devices operations, stand alone operations, and system operations. (Laboratory 3 hours.)

### 387. Robot Programming and Mechatronics (2)

Prerequisites: ET 205, ET 205L; corequisite: ET 387L. Basic concepts of robot manipulators, robot kinematics, robot programming languages. Applications of industrial robots, machine vision systems. Basic concepts of mechatronic systems: combine hardware, software, interface, and system integration to make an intelligent system. Sensors and actuators for robotics and mechatronic systems. (Lecture-Problems 2 hours.)

### 387L. Robot Programming and Mechatronics Laboratory (1)

Prerequisites: ET 205, ET 205L; corequisite: ET 387. Laboratory exercises in industrial and educational robot operation and appli-

cations. Laboratory exercises on mechatronic systems. Robot systems and their computer language instructions will be used. The experiments include teach pendant programming, high level language programming, workcell applications, continuous path programming.

### 388. Technical Applications Using Programming Languages (2)

Prerequisites: ET 286, 286L; corequisite: ET 388L. Techniques for design and development of industrial programs that includes composite program design, module coupling, module strength, program testing, top-down structured programming concepts and tools, object oriented programming, and memory management. These concepts are investigated and examined for use in solving complex problems in engineering technology. (Lecture-problems 2 hours.)

### 388L. Technical Applications Using Programming Languages Laboratory (1)

Prerequisites: ET 286, 286L; corequisite: ET 388. Laboratory experience in techniques for designing and development of industrial programs such as composite program design, module coupling, module strength, program testing, top-down structured programming concepts and tools, object oriented programming, and memory management. These concepts are investigated and examined for use in solving complex problems in engineering technology. (Lab 3 hours.)

### 390. Applied Computer-Aided Design and Manufacturing (2)

Prerequisites: ET 170, 205, 205L; corequisite: ET 390L. Roll of the computers in the manufacturing process, application of CAD/CAM systems, hardware and software components for automation, part programming for manufacturing, computer controlled manufacturing equipment, simulation, programming the factory. (Lecture - Discussion 2 hours.) Traditional grading only.

### 390L. Applied Computer-Aided Design and Manufacturing Laboratory (1)

Prerequisites: ET 170, 205, 205L; corequisite: ET 390. Use of microcomputer based hardware and software to solve 2D and 3D modeling problems. Computer automation software packages. Also includes part programming and CAD/CAM data exchange exercises. (Laboratory 3 hours.) Traditional grading only.

### 400. Industrial Wastewater Treatment (2)

Prerequisites: CHEM 111A, BIOL 211A, ET 303, 319; corequisite: ET 400L. Fundamentals of the characterization, minimization, treatment selection and design of industrial wastewater treatment systems. (Lecture-Discussion 2 hours.)

### 400L. Industrial Wastewater Treatment Laboratory (1)

Prerequisites: CHEM 111A, BIOL 211A, ET 303, 319; corequisite: ET 400. Laboratory exploration of fundamentals of the characterization, selection and operation of industrial wastewater treatment systems. (Laboratory 3 hours.)

### 407. Environmental Systems Safety and Emergency Management (3)

Prerequisites: ET 303, 311, 319. Emergency management and contingency planning in accordance with U.S. environmental regulations and international standards. Emphasis on training, preparedness, response and recovery. Concepts, methods and techniques of performing environmental operational systems audits in accordance with the International Standards Organization (ISO). (Lecture-Discussion 3 hours.)

### 409. Senior Problems in ET (1-3)

Prerequisites: Senior standing in ET, consent of instructor. Advanced work of a technical nature within an area of specialization on an experimental or research basis.

### B. Electronics Technology

### C. Manufacturing Technology

### D. Quality Assurance

### E. Computer Technology

### 410. Cost Engineering and Analysis (3)

Prerequisites: Economics course, Junior Standing. Introduction to the concepts of capital and operations budgets, capital acquisitions, economic evaluations of capital alternatives and factors of

the time-value of money in industrial operations and construction industries. (Lecture-Discussion 3 hours.)

**418. Production Methods and Process Improvement (3)**

Prerequisite: ET 410. Simplification and improvement of manufacturing operations through the use of production analysis tools for optimum production economy. Also included is the investigation of production automation applications for improving manufacturing process, quality and productivity. (Lecture-Discussion 3 hours.) Traditional grading only.

**419. Design of Experiments (3)**

Prerequisite: ET 312. Advanced statistical analysis applied to quality functions. Comparative and single factor experiments. Factorial designs and multiple regression. (Lecture-Discussion 3 hours.)

**420. Reliability and Maintainability (3)**

Prerequisites: ET 419. Principles and Practices of reliability; reliability analysis and design; testing for reliability. Maintainability concepts. (Lecture-Discussion 3 hours.) Traditional grading only.

**435. Engineering Materials and Processes II (3)**

Prerequisites: ET 335, 335L. Corequisite: ET 435L. Application of engineering materials and manufacturing processes including: rolling; forging; extrusion and drawing; sheet-metal forming; manufacturing of plastics and composites; material removal processes and rapid prototyping. (Lecture - Discussion 3 hours.) Traditional grading only.

**435L. Engineering Materials and Processes II Laboratory (1)**

Prerequisites: ET 335, ET 335L. Corequisite: ET 435. Continuation of ET 335L. Laboratory exercises in: welding processes; machining processes; metal forming; manufacturing of composite materials. (Laboratory 3 hours.) Traditional grading only.

**441. Theory of Electronic Control (3)**

Prerequisites: ET 360, 360L. Procedures for the design, preparation, and evaluation of electronic systems that control manufacturing and production processes, simulation analysis for sensing, programming, and actuating operations. (Lecture-Discussion 3 hours.) Traditional grading only.

**442. Computer Circuits (2)**

Prerequisites: ET 255, ET 255L; corequisite ET 442L. Introduction to digital hardware design. Combinational/sequential logic circuits and systems and application of integrated circuits to logic controls. Programmable logic devices, Field-programmable gate array, Circuit synthesis, and analysis. (Lecture-Problems 2 hours.)

**442L. Computer Circuits Laboratory (1)**

Prerequisites: ET 255, ET 255L; corequisite ET 442. Laboratory study of digital computer circuits design and implementation. Standard designing and trouble-shooting procedures will be discussed. Topics covered are multivibrator, register, counter, decoder, arithmetic circuits, and memory. (Laboratory 3 hours.)

**444. Telecommunications (3)**

Prerequisites: ET 360, 360L. National Communication Network, decibels, transmission units, transmission lines, characteristic impedance, loading systems, lattice networks, PCM, Nyquist Criterion, Bessel functions, coaxial cable, fiber optics, microwave, impedance matching, and Smith chart. (Lecture-Discussion 3 hours.) Traditional grading only.

**445. Microelectronics (1)**

Prerequisites: ET 350, 350L; corequisite: ET 445L. Design, processing and applications of monolithic and hybrid microcircuits for analog and digital systems. (Lecture 1 hour.) Traditional grading only.

**445L. Microelectronics Laboratory (1)**

Prerequisites: ET 350, 350L; corequisite: ET 445. Laboratory exercises in the processing of thick-film and thin-film materials, ultrasonic and thermocompression wire bonding and laser resistive trimming. Practical application and equipment utilization is emphasized. (Laboratory 3 hours.) Traditional grading only.

**447. Industrial Applications of Electronic Circuits (2)**

Prerequisites: ET 341, 341L; corequisite: ET 447L. An in-depth study of the applications of important electronic circuit concepts in industry. Analysis of circuits and how they work in industrial appli-

cations. Techniques for troubleshooting of design circuits. Biomedical electronic circuits which have industrial applications are emphasized. (Lec-Discussion 2 hours.)

**447L. Industrial Applications of Electronic Circuits Laboratory (1)**

Prerequisites: ET 341, 341L; corequisite: ET 447. Laboratory exercises include constructing circuits which have important applications in industry. Troubleshooting methodology emphasized throughout. Assignments focus on biomedical electronic circuits which have industrial applications. (Laboratory 3 hours.)

**449. Environmental Air Quality (2)**

Corequisite: ET 449L. Planning and evaluation of systems for management of air quality. Consideration of system performance, legislation regulations, environmental impacts and socio-economic factors. Selected case studies. (Lecture-Discussion 2 hrs.)

**449L. Environmental Air Quality Laboratory (1)**

Corequisite: ET 449. Techniques of measurement and assessment of air quality. Focus on measurement of regulated air quality health hazards. (Laboratory 3 hours.)

**460. Electronic Packaging and Design (2)**

Prerequisites: ET 341, 341L; corequisite: ET 460L. Techniques and materials used in making permanent versions of circuits, including printed circuit, wire-wrap, and various hand soldered methods. Considerations for electronic design and modification of existing designs. Troubleshooting of prototype implementations. Methods of enclosure, including safe handling of AC power. (Lecture-Discussion 2 hours.) Traditional grading only.

**460L. Electronic Packaging and Design Laboratory (1)**

Prerequisites: ET 341, 341L; corequisite ET 460. Project oriented laboratory exercises in various methods of making permanent versions of circuits. Hands-on exercises in printed circuit boards, wire wrap, vero-strip, circuit sticks, terminal tie points, etc. Metal and plastic enclosures. AC power safety, electronic components. (Laboratory 3 hours.) Traditional grading only.

**461. Management of Manufacturing Operations (3)**

Prerequisite: ET 418. Application of analytical planning and control techniques to the resources of industry including the physical plant, equipment, personnel, inventories and supplies use in the production of products and services. (Lecture-Discussion 3 hrs.)

**476. Environmental Impact (3)**

Prerequisite: BIOL 306. Required components of environmental impact reports and assessments and the processes involved in their preparation. Special emphasis is placed on the biological portions of EIRs and impact on flora and fauna. (Lecture-Discussion 3 hours.)

**485. Environmental Assessment (3)**

Definition and study of problems related to specific issues of environmental impact, mitigating solutions, costs, benefits and consequences. (Lecture-Discussion 3 hours.)

**486. Data Structures (2)**

Prerequisites: ET 388, 388L; corequisite: ET 486L. Data structures and applications. Choice and implementation of appropriate data structures for applications. Treatment of arrays, lists, stacks, queues, lined lists, trees, and assorted algorithms. Introduction to search and sorting. File organization techniques. (Lecture-Problems 2 hours.) Traditional grading only.

**486L. Data Structures Laboratory (1)**

Prerequisites: ET 388, 388L; corequisite: ET 486. Laboratory exercises in data structures and applications. A recursive programming language will be used. (Laboratory 3 hours.) Traditional grading only.

**487. Client/Server Computing Technology (2)**

Prerequisites: ET 286, 286L; corequisite: ET 487L. Introduction to client/server computing. Hardware and software technology. Protocols, networks, relational database technology. Example applications using client/server computing. Tools and development environments. Groupware, middleware. A design project and class presentation required. (Lecture-Discussion 2 hours.)

---

## Engineering Technology Courses (ET)

---

**487L. Client/Server Computing Technology Laboratory (1)**  
Prerequisites: ET 286, 286L; corequisite: ET 487. Laboratory and programming exercises developing client/server applications. Hardware and software technology. Protocols, networks, relational database technology. Applications using software/hardware tools and development environment. (Laboratory 3 hours.)

**488. Microcomputer Systems (2)**  
Prerequisites: ET 386, 386L; corequisite: ET 488L. Study of available microprocessors and microcomputer systems. Topics cover microcomputer architecture, software structure, assembly language, central processing unit, input/output, memory manipulation, and interfacing applications in Engineering Technology. (Lecture-problems 2 hours.)

**488L. Microcomputer Systems Laboratory (1)**  
Prerequisites: ET 386, 386L; corequisite: ET 488. Laboratory experience in microcomputer architecture, assembly language programming, and interfacing applications in Engineering Technology. Topics covered are central processing unit function, memory organization, and input/output operation. Available microcomputer systems will be used. Applications in Engineering Technology. (Laboratory 3 hours.)

**489. Computer Interfacing (2)**  
Prerequisites: ET 442, 442L, 488, 488L; corequisite: ET 489L. Study of theories and techniques that are used in peripheral control and interfacing. Topics covered are serial interfacing, Parallel interfacing, timing, handshaking, A/D converters, buffering, and UARTs. (Lecture-Discussion 2 hours.) Traditional grading only.

**489L. Computer Interfacing Laboratory (1)**  
Prerequisites: ET 442, 442L, 488, 488L; corequisite: ET 489. Laboratory exercises in computer interfacing applications and design. Available computer system and its assembly language instructions will be used. (Laboratory 3 hours.) Traditional grading only.

**491. Microcomputer Development Systems (2)**  
Prerequisites: ET 489, 489L; corequisite: ET 491L. Microcomputer development systems and applications. Software and hardware development process, modular program development, complex data structures, linkage with high level language, and in-circuit emulator operation. Introduction to development cycle with in-circuit emulator. (Lec-Problems 2 hrs.) Traditional grading only.

**491L. Microcomputer Development Systems Laboratory (1)**  
Prerequisite: ET 489, 489L; corequisite: ET 491. Laboratory exercises in microcomputer development systems and applications. In-circuit emulator in software and hardware development process. (Laboratory 3 hours.) Traditional grading only.

**492. Computer Controlled Industrial Systems (2)**  
Prerequisites: ET 387, 387L; corequisite: ET 492L. Procedures for the simulation and evaluation of contemporary electronic control systems. Includes analysis and synthesis of the sensing, programming and actuating sub-systems within industrial and educational robots. (Lecture-Discussion 2 hours.)

**492L. Computer Controlled Industrial Systems Laboratory (1)**  
Prerequisites: ET 387, 387L; corequisite: ET 492. Laboratory exercises on robotic systems. Emphasis on analysis and synthesis of the sensing, programming and actuating sub-systems within industrial and educational robots. (Laboratory 3 hours.)

**494. Applied Systems Development Project (2)**  
Prerequisites: ET 486, 486L, 491, 491L; corequisite: ET 494L. Systems development concepts, principles, and practices to a comprehensive systems development project. Hands-on approach is used to analyze, design and document a realistic system. Actual use of project management, interviewing, forms analysis, structured methods, behavioral dynamics, walk-throughs, report writing, and presentations. (Lecture-Discussion 2 hours.) Traditional grading only.

**494L. Applied Systems Development Project Laboratory (1)**  
Prerequisites: ET 486, 486L, 491, 491L; corequisite: ET 494. Laboratory exercises on applied system development. Emphasis will be on systems development concepts, principles, and practices to a comprehensive systems development project. (Laboratory 3 hours.) Traditional grading only.

**496. Advanced Quality Systems and Analysis (3)**  
Prerequisites: ET 419, 420. Quality systems analysis and applications. Course includes in-depth case studies in strategic quality planning, organization and management, integrated product design, application of quality diagnostic techniques and advanced statistical problem-solving methods, product reliability and quality assurance. Students perform a comprehensive systems analysis team project covering and industry application using the continuous process improvement (CPI) methodologies. (Lec-problems 3 hours.)

**497. Computer Network Technology (2)**  
Prerequisites: ET 487, 487L; corequisite: ET 497L. Hardware and software technology as it relates to computer networking. LAN, WAN environments and access methods. Ethernet, ATM. Bridges, routers, gateways and intelligent hubs. Networking protocols. Load balancing, use of simulation tools in designing networks. (Lecture-Discussion 2 hours.)

**497L. Computer Network Technology Laboratory (1)**  
Prerequisites: ET 487, 487L; corequisite: ET 497. Laboratory exercises using hardware and software technology as it relates to computer networking. Internetworking laboratory. Ethernet, ATM. Bridges, routers, gateways and intelligent hubs. Load balancing. Use of simulation tools. (Laboratory 3 hours.)

**498. Manufacturing Engineering Technology Capstone Project (3)**  
Group project involving analysis, design, tooling and production processes for product manufacture. Economic, market and capital requirements, manpower analysis. Written reports and oral presentations required. (Lecture 2 hours, Activity 2 hours.)

---

## Construction Engineering Management Courses (CEM)

---

**101. Introduction to Construction Engineering Management (1)**  
Survey of the professional activities and environments of Construction Engineering Management. Course covers the role of the Construction Engineering Manager in construction industry. The study of construction and the growth future of the Construction Engineering Management. Credit/No Credit grading only. (Lecture-Discussion 1 hour.)

**121. Construction Drawing I (2) F**  
Use of scale, drawing instruments, lettering and drawing media. Interpretation of plan, elevation, section, perspective and isometric drawings. Blueprint symbols, abbreviations, terminology. Basic design parameters as required by the building code. Familiarity with reference materials and texts, including Sweets Catalogues, laboratory including a simple building design set of drawings. (Lecture 1 hr, laboratory 3 hrs.) Traditional grading only.

**201. Cost Accounting for Construction Engineering (3)**  
Theoretical Practical and concepts of cost accounting. Variable and fixed costs, break-even point, interrelationships of cost, volume and profits; job-order accounting, general and flexible budgeting, standard costs; product costing methods; cost allocation; inventory planning; control and valuation; joint product and by products; process costing. (Lecture-Problems 3 hours.) Traditional grading only.

**202. Probability and Statistics for Construction Engineering Management (3)**  
Prerequisite: High School Algebra. Statistics and probability theories, sampling, correlation, regression applied to Construction Engineering Management. Laboratory. (Simulation using statistical packages.) (Lecture-Discussion 3 hours) Traditional grading only.

**204. Applied Mechanics–Statics (3)**

Prerequisite: MATH 120 and PHYS 100A Force systems acting on a structures, moments, equilibrium, centroids, trusses, beams, cables, frames, machines, friction, section properties, masses, both U.S. and S.I. units of measurements. (Lecture 2 hours, Activity 2 hours.)

**205. Computer Systems and Programming (1)**

Corequisite: CEM 205L. An overview of computer systems, computer hardware, and software development. Hardware topics include updated coverage of the central processing unit and memory, input/output devices, storage mechanism, and communication technology. Software topics include programming and languages, operating systems, and systems analysis and design. A programming language will be used for lab activities. (Lecture – discussion, exercise, 1 unit) Traditional grading only. Same as ET 205

**205L. Computer Systems and Programming Lab (1)**

Corequisite: CEM 205. Laboratory exercises in computer programming to solve problems in business, manufacturing, research and simulation. An object-oriented programming language will be used for these activities. (Laboratory 3 hours.) Traditional grading only. Same as ET 205L

**220. Fundamentals of Construction (2)**

Prerequisite: CEM 121. An overview of construction trends. Effects of scientific and engineering advancements on the building team acting as consultants to the architect. Field trips. (Lecture-Discussion 1 hour, Activity 2 hours.) Traditional grading only.

**225. Construction Surveying (1)**

Prerequisites: CEM 220 and High School algebra and trigonometry. Corequisite: 225L. Fundamentals of surveying methods as applied to construction layout. Use of level and transit for location and control of structures, vertical and horizontal control, area determination, care and use of instruments. (Lecture-Problems 1 hour.) Traditional grading only.

**225L. Construction Surveying Laboratory (1)**

Prerequisite: CEM 220. Corequisite: CEM 225. Laboratory exercises on land measurement, differential and profile leveling, construction layout and plotting profiles using tape, leveling and transit instruments. (Laboratory 3 hours.) Traditional grading only.

**230. Fundamentals of Estimating and Drafting (2)**

Prerequisite: CEM 220. Interpretation of drawings and specifications for use in estimating, planning, and communication. Plan reading, visualization, sketching, and quantity take-off techniques. (1 hour lecture, 2 hours activities) Traditional grading only.

**235. Concrete Construction (1)**

Prerequisites: CEM 220, CHEM 111A; Corequisite: CEM 235L. Concrete terminology, tools, practices and building codes. Includes concrete form construction, erection and stripping, mixing, placing, finishing and curing. Field trips. (Lecture-Discussion 1 hour.) Traditional grading only.

**235L. Concrete Construction Laboratory (1)**

Prerequisite: CEM 220, CHEM 111A; Corequisite: CEM 235. Laboratory exercises in support of CEM 235, Concrete Construction. Develop concrete mix designs and prepare concrete samples for testing, such as compressive strength, slump and air content, and aggregate testing. (Laboratory 3 hours.) Traditional grading only.

**300. Computer Applications for Construction Engineering Management (1)**

Prerequisites: CEM 205, 205L. Corequisite: CEM 300L. Survey of computer, hardware, software, languages and applications in construction management. (Lecture-Discussion 1 hour.) Traditional grading only.

**300L. Computer Applications for Construction Engineering Management Laboratory (1)**

Prerequisites: CEM 205, 205L. Corequisite: CEM 300. Laboratory exercises in computer systems to control cost, scheduling, manpower, and materials in construction operations in the building industry, development of construction management games. (Laboratory 3 hours.) Traditional grading only.

**304. Applied Mechanics Strength of Materials (3)**

Prerequisite: CEM 204. Analysis of strength and rigidity of structural members in resisting applied forces, stress, strain, shear, moment, deflections, combined stresses, connections, and moment distribution. (Lecture-Problems 3 hours.) Traditional grading only.

**309. The Management of Contemporary Organizations (3)**

Prerequisite: MGMT 300, ENGR 310. An overview of managerial and organizational theory and practice, including a discussion of the contingencies that influence an organization's effectiveness and efficiency. Focus of the course is on the decision-making and problem-solving processes that affect managerial performance in planning, implementing, and controlling the work of contemporary organizations (Lecture - Discussion 3 hours.) Traditional grading only.

**321. Operations Management (3)**

Prerequisites: CEM 309. An introduction to the basic concepts and methods used to analyze and improve performance of operations in construction and service organizations. Decisions and problems presented are related to operations in the construction industry. A study of the duties and responsibilities of construction on-site and office personnel. Emphasis is placed on the method and techniques used to ensure an efficient quality management and on-schedule operations. (2 hours lecture-discussion.) Traditional grading only.

**322. Mechanical Equipment for Buildings (2)**

Prerequisite: CEM 230, PHYS 100B. Principles and current practices in water supply, waste disposal, heating, ventilating, air conditioning and fire protection. (Lecture 1 hour, Activity 2 hours.) Traditional grading only.

**325. Construction Practices and Methods (3)**

Prerequisites: CEM 230. Properties and applications of materials for the construction industry. Current practices in fabrication, and erection methods used in industrial, commercial and heavy construction. Field trips. (Lecture - Problems 3 hours.) Traditional grading only.

**328. Construction Safety (2)**

Prerequisites: CEM 230. Terminology, safety functions, accident costs, workman's compensation and liability laws, O.S.H.A., and many other governmental and non-governmental codes, regulations and field safety methods pertinent to the construction industry. Field trips. (Lecture 1 hour, Activity 2 hours.) Traditional grading only.

**330. Advanced Estimating and Bidding (3)**

Prerequisites: CEM 201, 300, 300L, 325. A study of the concepts and practices involved in the total estimate bidding process in construction, from initial project selection to submission of final bids. Covers considerations in project selection, variables affecting labor productivity, sub-bid analysis, contingency and risk analysis, pricing concepts, bidding models, and an introduction to computer applications. A complete project estimate and bid is prepared by each student. (Lecture 2 hours. Activity 2 hours.) Traditional grading only.

**335. Soil Mechanics Technology (2)**

Prerequisite: ET 304. Corequisite: CEM 335L. Soil Composition, description, and classification; soil compaction; determination of physical properties of soils. (Lecture-Problems 2 hours.) Traditional grading only.

**335L. Soil Mechanics Technology Laboratory (1)**

Prerequisite: ET 304. Corequisite: CEM 335. Laboratory investigations and experiments in the phenomena of soil mechanics. Field trips. (Laboratory 3 hours) Traditional grading only.

**374. Plant Planning and Layout (3)**

Prerequisite: CEM 121. Planning practices, procedures and requirements for laying out industrial facilities. (Lecture - Discussion 2 hours. Activity 2 hours.) Traditional grading only.

**404. Structural Concrete and Masonry Design (3)**

Prerequisite: CEM 304. Analysis and design of structural concrete and masonry building in compliance with the Uniform Building Code. (Lecture-Problems 3 hours.) Traditional grading only.

---

## Construction Engineering Management Courses (CEM)

---

### 409. Direct Studies in Construction Engineering Management (1-3)

Prerequisites: Senior standing in ET, consent of instructor. Advanced work of a technical nature within an area of specialization on an experimental or research basis.

### 410. Cost Engineering and Analysis (3)

Prerequisites: ECON 300. Introduction to the concepts of capital and operations budgets, capital acquisitions, economic evaluations of capital alternatives and factors of the time-value of money in industrial operations and construction industries. (Lecture-Discussion 3 hours.) Traditional grading only.

### 421. Construction Planning and Scheduling (3)

Prerequisites: CEM 330. Planning, scheduling and control by graphic charts and PERT/CPM networks. Resource allocation and leveling. Manual and computer methods. Field trips. (Lec-Discussion 3 hrs) Traditional grading only.

### 422. Electrical Equipment for Buildings (2)

Prerequisite: PHYS 100B. Principles and current practices in the application of electrical equipment and material utilization, sound and signal systems. (Lecture 1 hour - Activity 2 hours.) Traditional grading only.

### 423. Site Analysis (3)

Prerequisites: CEM 225, 225L. Detailed analysis and investigation of construction sites. Economics and feasibility of land development. Field trips. (Lecture-Discussion 3 hours.) Traditional grading only.

### 426. Business and Construction Law (3)

Prerequisite: CEM 328. Contractors license laws; mechanics lien laws; real estate and subdivision law; public works projects bid and bid requirements, O.S.H.A.; administration enabling legislation and penalties; citations and appeals; current litigation and legal trends in affirmative action and minority subcontractor quotas, design professional's liability. Traditional grading only.

### 428. Construction Proposals and Specifications (3)

Prerequisites: CEM 426. Principles and methods for developing the technical knowledge to structure a construction proposal. Analysis of letters of transmittal, inquiry and bidding specifications. (Lecture-Activities 3 hours.) Traditional grading only.

### 430. Construction Equipment (3)

Prerequisites: CEM 330, 335, 335L, 410, 421. Characteristics, capabilities, limitations, economics, and utilization of general building and heavy construction equipment. (Lecture 2 hours - Activity 2 hours) Traditional grading only.

### 431. Construction Cost Control (3)

Prerequisites: CEM 430, and Senior Standing. Basic applications of construction cost control systems and the use of cost information and associated reports. (Lecture - Discussion 3 hours.) Traditional grading only.

### 432. Facility Administration (3)

Prerequisite: CEM 374. Management skills for facility management. Emphasis is placed on the management functions of planning, organizing, directing and controlling. topics include: negotiation; communication; performance measurement; job enrichment; motivation; contracting services and interpersonal relationships. (Lecture-Discussion 3 hours.) Traditional grading only.

### 433. Facility Finance Management (3)

Prerequisite: CEM 432. Analysis of financial management strategies associated with facility management. Topics include: buy-lease considerations; building efficiency; leasing considerations; cost control and record keeping; facility capitalization; facility budgeting; cost benefit analysis and financial reports. (Lecture-Discussion 3 hours.) Traditional grading only.

### 434. Facility and Property Management (3)

Prerequisite: CEM 433. Principles of facility and property management. Topics include: property development; cost benefit analysis; site selection; architectural design; layout plans; building engineering; specifications; stacking and blocking plans;

aesthetic standards; renovation and contracting standards. (Lecture-Discussion 3 hours.) Traditional grading only.

### 435. Construction Materials (2)

Prerequisites: CEM 235, 235L, 335, 335L. Corequisite: CEM 435L. A comprehensive study of the principle materials such as masonry, metals, woods, thermal materials, finishes, composite materials, insulation that are used in the construction industry. (Lecture-Discussion 2 hours.) Traditional grading only.

### 435L. Construction Materials Laboratory (1)

Prerequisites: CEM 235L, 335L. Corequisite: CEM 435. Laboratory and field tests are performed to all construction materials. (3 hours laboratory.) Traditional grading only.

### 436. Facility Operations Management (3)

Prerequisite: CEM 374. Analysis of the functions of facility operations management. Topics include: building systems; mechanical systems; energy management; electrical systems; trades operations; grounds maintenance; custodial; furniture and equipment; waste removal contracting services; furniture standards; security systems and planned maintenance. (Lecture-Discussion 3 hours.) Traditional grading only.

### 438. Structural Steel and Wood Design (3)

Prerequisite: CEM 304. Analysis and design of structural steel and wood buildings in compliance with the Uniform Building Code. (Lecture-Problem 3 hours.) Traditional grading only.

### 490. Construction Project Management (3)

Prerequisites: CEM 322, 422, 426, 428, 431. Principles of project management are applied to a case study of an actual construction project. Topics include site facilities planning, procurement, shop drawings, scheduling coordinating subcontracts and contract administration. Relationships with owners, designers and other officials are analyzed. (Lecture-Discussion 3 hours.) Traditional grading only.

The faculty of the Department of Family and Consumer Sciences seeks to prepare men and women to enter professions concerned with enhancing the quality of individual and family life in the context of the near environment. The following objectives have been articulated:

To prepare men and women to the highest standards for professions in Family and Consumer Sciences and related fields requiring a bachelor's or master's degree.

To prepare students for successful careers within the diversity of human relationships while enhancing their own physical, psychological, and emotional development through their lifespan.

To provide continuing education and post-master's study in professional fields of Family and Consumer Sciences.

To provide information to a diverse student population and the community about current services and career opportunities as well as the potential for emerging professional careers in a changing society.

To employ the most effective methodology and useful resources on the university campus and in the surrounding communities. Provide the best quality program within the structure of the CSU system.

To continue creative and scholarly research for the future growth of the profession.

To apply knowledge gained from research and study to serve the needs identified in the university and surrounding community.

## Accreditation

The Department of Family and Consumer Sciences is accredited by the American Association of Family and Consumer Sciences (AAFCS) (American Association of Family and Consumer Sciences, Council for Accreditation, 1555 King Street, Alexandria, VA 22314, phone: 703-706-4600). The Didactic Program in Dietetics and the Dietetic Internship are accredited by the American Dietetic Association (ADA) (Commission on Accreditation for Dietetics Education, American Dietetic Association, 216 West Jackson Boulevard, Suite 800, Chicago, IL 60606-6995, phone: 312-899-4872). The Preschool and Toddler Study Laboratories are accredited by the National Association for the Education of Young Children. The Child Development and Family Studies Program is approved by the National Council on Family Relations to offer a program leading to Provisional Family Life Education Certification.

The Department of Family and Consumer Sciences offers programs of study leading to the Bachelor of Arts, Bachelor of Science, Master of Arts, and Master of Science degrees.

Curricula are designed to provide a liberal education through study in the social and natural sciences, the humanities and the arts, and to offer specialized instruction based on these disciplines which will lead to professional careers in Family and Consumer Sciences and related fields.

Programs of study cover various aspects of the field: Apparel Design and Merchandising; Child Development and Family Studies; Consumer Affairs; Education; Food Science; Gerontology; Hospitality Foodservice and Hotel Management; Nutrition and Dietetics.

Degrees and certificates available in the Family and Consumer Sciences Department include:

- Bachelor of Arts in Family and Consumer Sciences in five option areas (see below)
- Bachelor of Science in Dietetics and Food Administration in three option areas (see below)

- Master of Arts in Family and Consumer Sciences
- Master of Science in Nutritional Science
- Master of Science in Gerontology (specific requirements are listed under Gerontology)
- Dietetic Internship
- Child Development Certificate
- Foodservice Systems Administration Certificate
- Gerontology Certificate (Specific requirements are listed under Gerontology)
- Home Economics Single Subject Teaching Credential (a 5th year of study is required.)

Information about Family and Consumer Sciences sponsored degrees and certificates are organized by degrees and options.

## Bachelor of Arts in Family and Consumer Sciences

The Department of Family and Consumer Sciences offers students a Bachelor of Arts degree in five option areas of study:

- Child Development and Family Studies
- Communication
- Consumer Affairs
- Fashion Merchandising
- Textiles and Clothing

Specific degree and certificate information as well as option requirements are as follows:

Requirements for all majors include a minimum of 120 units for the Bachelor of Arts degree. In addition to general education requirements (51 units), a minimum of 40 units in Family and Consumer Sciences must be completed, 24 of which must be upper division. Students transferring from another college or university will receive transfer credit in required courses if the course is equivalent to the course at this University and it is first accepted by the University.

## Child Development and Family Studies

The field of Child Development and Family Studies (CDFS) strives to improve the lives of children and families. As an integrative and interdisciplinary specialization, Child Development and Family Studies incorporates information from a variety of disciplines. Our primary focus is on utilizing the preventive approach to assist individuals and families. Career options for professionals in the field of CDFS are wide-ranging. Many of our graduates pursue the following opportunities: family life educator; child life specialist; teen pregnancy counselor; domestic violence counselor; toy research and development professional; child development educator/administrator – infant and toddler care, preschool teaching, and school age programs; child development consultant; community resource and referral professional; parent educator; and corporate human services consultant.

### Option in Child Development and Family Studies (code 2-1012) (120 units)

BIOL 205 or 207; PSY 100; SOC 100 or ANTH 120; FCS 111, 132, 211, 214, 299, 311 or 314, 312I, 321\*, 411, 412 or 413, 414 or 415, 3 units of 492A or 492B or 3 units of 497 or 3 units of approved alternative, 499 plus 9 units of advisor approved electives. The student must select with an advisor's approval 15 units from FCS 223, 233, 251, 319\*, 322, 387, 402, 410,

416A, 416B, 417, 418, 3 units of 419, 433 or FCS courses not taken above. Each course on the student's program planner must be completed with a grade of "C" or better. In addition, a course in which a grade lower than "C" is received must be re-taken and successfully completed prior to enrolling in a course for which it is a prerequisite. A student receiving a grade lower than a "C" may proceed with other courses with approval of the Area Coordinator.

## Child Development Certificate (code 1-1040)

Child Development and Family Studies in the Family and Consumer Sciences Department provides an academic and professional background for working with children and families. It offers an interdisciplinary foundation in several areas that influence the life and education of children and families. Fieldwork opportunities where students have direct experiences with children and families in the community are provided.

The Certificate in Child Development must be earned in conjunction with the baccalaureate degree, master's degree or teaching credential in Family and Consumer Sciences or related fields. Courses offered for the certificate may be the same ones used to satisfy, where applicable, major, minor, credential, general education or interdisciplinary requirements.

### Requirements

1. Bachelor's Degree in Family and Consumer Sciences or related field;
2. 36 units distributed as follows:
  - Lower division (12 units): FCS 111, 132, 211, 214.
  - Upper Division (24 units): FCS 311 or 314, 312I, 411, 413, 414 or 415, 416A, 418.

Successful completion of the Certificate in Child Development will be recommended by the Certificate Program Director.

Interested students should apply to the Child Development Certificate Program Director, Dr. Richard Tuveson, Family and Consumer Sciences (562) 985-4487 or [tuveson@csulb.edu](mailto:tuveson@csulb.edu).

---

## Child Development and Family Studies Courses

---

- 110. Infants and Toddlers
- 111. The Preschool Child
- 211. Guiding Young Children
- 213. Family, Community, and Young Children
- 214. Environments for Young Children
- 290. Directed Studies
- 311. Prenatal Development and Infancy
- 312I. Family and Personal Development
- 314. The Older Child
- 319. Family Stress and Coping
- 358. Fathers and Fathering
- 402./502. Child and Family Law
- 409. Language, Learning and the Developing Child: A Cross-Cultural Perspective
- 410. International Families: Families in Cross-Cultural Perspectives
- \*411. Individual Child Study and Guidance
- \*412. Family Interaction
- \*413. Child and Family in the Community
- 414. Fieldwork with Preschool Children
- 415. Fieldwork with Infants/ Toddlers
- 416A. Introduction to Administration and Supervision of Child Development Programs

- 416B. Applications of Administration and Supervision of Child Development Programs
- 417. Premarital Intervention
- \*418. Parent Education
- \*419. Family Life Education
- 492A. Internship in Child Development and Family Studies
- 492B. Internship in Certified Family Life Educator

## Communication

A Bachelor of Arts degree in Family and Consumer Sciences: Communication (to be changed to Education) prepares students for careers in teaching youth and adults in various educational settings, as well as for positions in business, industry and government. Courses in the program focus on enhancing the quality of life for diverse individuals and families through assignments and activities that promote solutions to problems encountered in daily living.

Students who earn a Home Economics Single Subject Credential will be prepared to teach in middle, junior, and senior high schools, and in adult or career and technical education programs and community colleges. Career opportunities also include positions in cooperative extension, government, and community service agencies; and education program specialist positions in business, industry, and government.

Students should consult with the Family and Consumer Sciences Communication (to be changed to Education) Credential Advisor as early as possible in order to design an efficient undergraduate program of study. Students with majors in other FCS option areas who are interested in becoming a secondary teacher should also consult the FCS Single Subject Credential Advisor regarding meeting subject matter competency for the single subject credential. Students may also work on a teaching credential while completing a Master of Arts degree in Family and Consumer Sciences.

### Option in Communication (code 2-1013) (120 units)

CHEM 100; ECON 100 and 101 or 300; ENGL 100, 101 or 300 or 317; PSY 100; SOC 100 or ANTH 120; COMM 110; HSC 411B; EDSS 300H; FCS 111, 132, 154, 233, 235, 251, 275, 296, 299, 312I, 314, 321\*, 322, 326, 353, 387, 488, 492D, 499, plus 12 units of one of the following concentrations: Child Development and Education Occupations FCS 214, 414, 416A, 416B; Fashion Design, Manufacturing and Merchandising FCS 155, 351, 355, 455; Foodservice and Hospitality FCS 270, 375, 377, 474. Candidates for the Home Economics Single Subject Credential must take professional education requirements.

### Communication Courses

- 296. Applied Arts in Family and Consumer Sciences
- 299. Themes and Issues in Family and Consumer Sciences
- 387. Consumer Technology
- \*486. Teaching-Learning Strategies in Family and Consumer Sciences
- \*488. Developing Occupational Programs in Family and Consumer Sciences
- \*490. Special Topics
- 492D. Internship In Family and Consumer Sciences Education
- 497. Directed Studies

- 499. Perspectives in Family and Consumer Sciences
- EDSS 300H. Introduction to Teaching Home Economics
- EDSS 450H. Curriculum and Methods in Teaching Home Economics

## Consumer Affairs

Consumer Affairs provides students with a foundation in Consumer Advocacy, Personal Financial Management, and Housing Services. The program focuses on how businesses, government agencies, and community organizations interact with families and consumers. Career opportunities could include: consumer credit counselor, consumer protection agent, consumer educator, financial counselor, marketing consultant, sales representative, customer service representative, paralegal, property manager, housing counselor, homeless coordinator.

### Option in Consumer Affairs (code 2-1014) (120 units)

ACCT 201; ECON 100 and 101 or 300; ENGL 101 or 317; FCS 223, 299, 312I, 321\*, 322, 326, 387, 420, 422, 425, 426, 428, 429, 486, 492C or 497, 499; MKTG 300, 490; PSY 100; SOC 100; C/LA 250 or SOC 250, plus 9 units of advisor approved electives. Each course on the student's program planner must be completed with a grade of "C" or better. In addition, a course in which a grade lower than "C" is received must be retaken and successfully completed prior to enrolling in a course for which it is a prerequisite. A student receiving a grade lower than a "C" may proceed with other courses with approval of the Area Coordinator.

### Minor in Consumer Affairs (code 0-1014)

Twenty-one units as approved by a Consumer Affairs faculty advisor. Twelve units of required courses include: FCS 223, 321\*, 322, 326; and 9 units selected from FCS/FIN/ECON 309I, FCS 420, 422, 425, 426, 428 and 429 are required to complete the minor.

The Minor in Consumer Affairs is available to any non-Consumer Affairs major.

---

### Consumer Affairs Courses

---

- 222. Contemporary Housing
- 223. Personal and Family Financial Management
- 228. Housing in Global Perspective
- 309I. The Consumer in the Legal and Economic Environment
- 321. Family and Consumer Resource Management
- 322. Family Housing and the Urban Community
- 326. Consumer Problems
- 420./520. Personal Finance for the Aging
- \*422. Housing Policies: Public and Private
- \*424. Independent Living for Disabled and Elderly Persons
- \*425. Personal Financial Planning Analysis
- \*426. Family Financial Problems
- \*428. International Housing
- 429./529. Consumer Protection
- 492C. Internship in Consumer Affairs

## Apparel Design and Merchandising

A B.A. in Family and Consumer Sciences: Textiles and Clothing or Fashion Merchandising enables students to pursue careers in the design, production and merchandising of textile and apparel products and to meet individual and family textile and apparel

needs. Career opportunities include: buyer-retailing, manufacturer's representative, product designer-pattern maker, store operations manager, stylist-fashion director, textiles (testing and evaluation) specialist.

Course requirements for a B.A. in Family and Consumer Sciences: Textiles and Clothing and Fashion Merchandising are:

### Option in Fashion Merchandising (code 2-1015) (120 units)

ACCT 201; CHEM 100 or 111A; ECON 100 and 101 or 300; HIST 131; IS 240 or FCS 387; MKTG 300; PSY 100; SOC 100 or ANTH 120; FCS 154 or 252, 155, 251, 258, 296, 299, 312I, 321\*, 351, 353, 355, 450\*, 455, 456, 457, 486, 492E or 497 and 499; plus 9 units of advisor approved electives. Each course on the student's program planner must be completed with a grade of "C" or better. In addition, a course in which a grade lower than "C" is received must be retaken and successfully completed prior to enrolling in a course for which it is a prerequisite. A student receiving a grade lower than a "C" may proceed with other courses with approval of the Area Coordinator.

### Minor in Fashion Merchandising (code 0-1015)

Eighteen units including FCS 155, 252, 455, 457, 6 units selected from FCS 251, 351, 353, 355, 492E as approved by an Apparel Design and Merchandising faculty advisor. It is the student's responsibility to adhere to all prerequisites listed below. It should be noted that several prerequisites fulfill general education requirements.

1. FCS 252 or 154 and 155 are prerequisites for FCS 455.
2. ECON 100 and 101 (fulfills GE Category D2b) or 300 (fills GE Category D2b); FCS 353; and senior standing or consent of instructor are prerequisites for FCS 457.
3. FCS 251 (fulfills GE Category E), 252 or 154, and 155 are prerequisites for FCS 351.
4. ELM passage; FCS 155; ACCT 201; and IS 240 or FCS 387; or consent of instructor are prerequisites for FCS 355.
5. FCS 455 and 457 are prerequisites for FCS 492E.
6. FCS 155 and CHEM 100 or 111A (fulfills GE Category B1b) are prerequisites for FCS 353.

The Minor in Fashion Merchandising is available to any non-Fashion Merchandising major.

### Option in Textiles and Clothing (code 2-1016) (120 units)

CHEM 100 or 111A; ECON 100 and 101 or 300; HIST 131; PSY 100; SOC 100 or ANTH 120; FCS 154, 155, 251, 257, 258, 296, 299, 312I, 321, 352, 353, 354, 357, 387, 450, 452, 453 or 458, 454, 456, 457, 486, 492M or 497, and 499. Each course on a student's program planner must be completed with a grade of "C" or better. In addition, a course in which a grade lower than "C" is received must be retaken and successfully completed prior to enrolling in a course for which it is a prerequisite. A student receiving a grade lower than a "C" may proceed with other courses with approval of the Area Coordinator.

### Minor in Textiles (code 0-1116)

Eighteen units including FCS 155, 353, 453, 457; 6 additional units selected from FCS 450\*, 456, and 492M as approved by an Apparel Design and Merchandising faculty advisor. It is the student's responsibility to adhere to all prerequisites listed below. It should be noted that several prerequisites fulfill general education requirements.

1. FCS 155 and CHEM 100 or 111A (fulfills GE Category B1b) are prerequisites for FCS 353.
2. FCS 155 and 353 are prerequisites for FCS 453.
3. ECON 100 and 101 (fulfills GE Category D2b) or 300 (fulfills GE Category D2b), FCS 353, and senior standing are prerequisites for FCS 457.
4. ENGL 100 (fulfills GE category A1); and ANTH 120 (fulfills GE category D2a) or SOC 100 (fulfills GE category D2b) or 142 (fulfills GE category D2b) are prerequisites for FCS 450\* (fulfills GE category D2b) and HD).
5. FCS 251 (fulfills GE category E); FCS 353; and HIST 131 (fulfills GE category D2a) are prerequisites for FCS 456.
6. FCS 453 is a prerequisite for FCS 492M.

The Minor in Textiles is available to any non-Textiles major.

---

### Apparel Design and Merchandising Courses

---

154. Fundamentals of Apparel Production
155. Introduction to the Fashion Industry
251. Professional and Personal Apparel Selection
252. Analysis, Evaluation & Comparison of Ready-to-Wear
257. Apparel Design: Introduction to Flat Pattern
258. Pre-internship in Apparel Design and Merchandising
351. Fashion Promotion and Sales
352. Apparel Design: Computerized Pattern Making
353. Textiles
354. Apparel Design: Analysis of Garment Design, Tailoring and Production Processes
355. Fashion Merchandising Planning and Control
357. Apparel Design: Advanced Flat Pattern
450. Cultural Perspectives of Dress
- \*452. Apparel Design: Draping
- \*453. Quality Control in Apparel Design and Merchandising
- \*454. Experimental Clothing
- \*455. Fashion Merchandising
456. Historic Perspectives of Fashion
457. International Textiles and Apparel
- \*458. Fashion Product Development
- 492E. Internship in Fashion Merchandising
- 492M. Internship in Textiles and Clothing

### Bachelor of Science in Dietetics and Food Administration

The Department of Family and Consumer Sciences offers students a Bachelor of Science degree in three option areas of study:

- Nutrition and Dietetics
- Food Science
- Hospitality Foodservice and Hotel Management

Specific degree and certificate information as well as option requirements are as follows:

Requirements for all majors include a minimum of 129 units to receive the Bachelor of Science degree. The courses which will provide these units are determined by the option the student chooses. In addition to general education requirements (51 units), a minimum of 40 units in Family and Consumer Sciences is required, 24 of which must be upper division. Students transferring from another college or university will receive transfer credit in required courses if the course is equivalent to the course at this University and it is accepted by the University.

## Nutrition and Dietetics

Individuals choosing this option will concentrate their studies in the areas of nutritional science, medical nutrition therapy, community nutrition, food production and management of food-service operations, chemistry, physiology, plus a variety of supporting course work in related disciplines. The Nutrition and Dietetics option with appropriate elective selection fulfills the American Dietetic Association (ADA) academic requirements for eligibility to apply for qualifying experiences required to become a Registered Dietitian. Career opportunities include: community nutrition programs, health clubs, private consulting, health and welfare agencies, program administration, health promotion, government agencies, hospitals and clinics, food-service operations, public and private schools, research, and business and industry.

### Option in Nutrition and Dietetics (code 3-1009) (129 units)

BIOL 207 or 342 and 342L; BIOL 260 or ED P 419 or H SC 403 or IS 310; CHEM 111A, 327, 448, 449; ENGL 100; ENGL 101 or 317; HRM 361 or PSY 381; IS 240; MICR 200; PSY 100; SOC 100; FCS 132, 233, 234, 235, 275, 299, 312I, 321, 331A, 331B, 332, 336, 436, 436L, 438, 461, 486; 3 units of 490 or 492K or 497, 499. Additionally, a minimum of 6 units of electives is selected in consultation with a faculty advisor. Recommended electives include: FCS 375, 377, 433, 439, 466, 492K, 497. If a stronger foundation in Chemistry is desired, CHEM 320A and 320B may be selected instead of CHEM 327. If a stronger foundation in biochemistry is desired, CHEM 441A and 441B may be selected instead of CHEM 448.

Students who wish to take the Nutrition and Dietetics Option as a Pre-Professional degree (e.g., medical) should check with the appropriate programs to verify specific requirements.

## The American Dietetic Association (ADA) Didactic Program in Dietetics

The ADA Didactic (Academic) Program in Dietetics (DPD) is designed to provide students with a foundation of knowledge and skills in dietetics that will enable them to perform successfully in a dietetic internship or pre-professional practice program. The DPD is granted accreditation by the American Dietetic Association Commission on Accreditation for Dietetics Education, a specialized accrediting body recognized by the Council on Postsecondary Accreditation and the United States Department of Education. It is the responsibility of the student to consult with the ADA DPD Director to verify current ADA requirements to become a Registered Dietitian.

Students who choose to meet ADA academic requirements must select FCS 375 and FCS 377 as electives in their major.

Students must receive a grade of "C" or better in the DPD courses to receive verification of completion of the ADA pro-

gram. Approval of a student's academic program by the CSULB DPD Director requires that the student complete courses FCS 377, 436L and 438 at CSULB.

## Food Science

The Food Science curriculum has an interdisciplinary focus which includes food science, food processing, sensory evaluation, nutrition, chemistry, and microbiology, plus a variety of supporting course work in related disciplines. All courses are designed to develop an understanding of the physical and chemical nature of foods and how it relates to the food industry and consumer safety. The food industry careers awaiting graduates offer diverse opportunities as the world supply expands with technological developments. Career options for professionals in the field of food science include: research and product development, food formulation and processing, consumer safety, sensory evaluation, quality assurance, government regulations, and food and ingredient sales and marketing.

### Option in Food Science (code 3-1010) (129 units)

BIOL 207; BIOL 260 or ED P 419 or H SC 403; CHEM 111A, 111B, 327, 448 and 449; CHE 200; COMM 110; ENGL 101 or 317; MATH 119A and 119B; MKTG 300; MICR 200 and 473; PHYS 100A; PSY 100 or SOC 100; FCS 132, 234, 235, 299, 321, 330, 331A, 332, 336, 338, 432, 435, 464, 469, 486, 492F and 499.

### Minor in Food Science (code 0-1010)

Significant preparation for employment in the Food Science Industry may be developed through completion of this program of study.

Twenty-one units including FCS 235, 332, 338, 432, 435, 464; 3 units selected from FCS 492F or 3 units of FCS 497 as approved by the Food Science faculty advisor. It is the student's responsibility to adhere to all prerequisites listed below. Some of the prerequisites fulfill General Education requirements.

1. CHEM 111A (fulfills GE Category B1b) or 202 (fulfills GE Category B3) is the prerequisite for FCS 235.
2. CHEM 327 and FCS 235 and MICR 200 are prerequisites for FCS 332.
3. FCS 332 is the prerequisite for FCS 338 and 435.
4. CHEM 327 and FCS 332 are prerequisites for FCS 432.
5. FCS 332 and BIOL 260 or equivalent statistics are prerequisites for FCS 464.

The Minor in Food Science is available to any non-Food Science major.

## Hospitality Foodservice and Hotel Management

Hospitality Foodservice and Hotel Management furnishes students with the necessary background and expertise to excel as managers and leaders in the restaurant, foodservice, hotel, and lodging industries. The program of study provides a broad-based foundation in both academic and professional courses and includes hands-on practical experience. Career options include: restaurant manager, hotel manager, catering director, foodservice manager in a college, university, in-flight, healthcare, or corporate setting, manager in a motel or bed and breakfast facility, school foodservice director, manager in senior dining programs, stadiums or amusement parks, or as a food purchaser or broker.

## Option in Hospitality Foodservice and Hotel Management (code 3-1011) (129 units)

ACCT 201; BIOL 205 or 207; CHEM 100 or 100A or 202; COMM 110; ECON 300 or 100 and 101; ED P 419 or IS 310 or MATH 180 or HSC 403; ENGL 100; FIN 320 or FCS 378; HRM 360 or 361 or PSY 381; IS 240; MKTG 300; PHIL 160; PSY 100 or SOC 100; PSY 130 or PHIL 170 or ENGL 102; REC 141 or 225; FCS 132, 233, 234, 235, 270, 275, 299, 321, 336, 372, 375, 376, 377, 437, 474, 486, 492J, and 499. Additionally, a minimum of 9 units of pre-approved electives for professional enhancement is selected in consultation with a faculty advisor. Recommended electives include: ACCT 310; GEOG 352; GERN 400I; IS 301; REC 340I, 427, 462, 468; FCS 223 or 429, 312I or 319, 331A or 433 or 439, 332, 379, 461, 464, 492J, 497; others as approved by advisor.

FCS 492J requires 800 hours of approved work experience as a prerequisite for this option. Field study hours in FCS 379 can be used toward meeting the 800 hours.

## Minor in Hospitality Foodservice and Hotel Management (code 0-1011)

Twenty-two units including FCS 233, 270, 379 or 492J, and 15 units selected from FCS 235, 275, 372, 375, 376, 377, 378, 437, and 474 as approved by a Hospitality Foodservice and Hotel Management faculty advisor. It is the student's responsibility to adhere to all prerequisites listed below.

1. FCS 132 (fulfills GE Category E) and FCS 235 are prerequisites for FCS 275.
2. FCS 233 and FCS 275 are prerequisites for FCS 375.
3. FCS 270 is a prerequisite for FCS 372 and 376.
4. FCS 375 is a prerequisite for FCS 377.
5. FCS 275, FCS 375, 800 hours of approved work experience, and senior standing are prerequisites for FCS 492J.
6. FCS 375, FCS 377, and senior standing are prerequisites for FCS 437.
7. FCS 375 or consent of instructor are the prerequisites for FCS 474.

The Minor in Hospitality Foodservice and Hotel Management is available to any non-Hospitality Foodservice and Hotel Management major.

## Foodservice Systems Administration Certificate (code 1-1070)

The Certificate program in Foodservice Systems Administration is designed to provide those students pursuing the bachelor's degree in Dietetics and Food Administration, Business Administration, and other related fields with additional background in foodservice management, increasing their expertise at the management entry level. The program is appropriate for a variety of applications, including foodservice in restaurants, catering, hospitals, public schools, industrial foodservice, hotels and motels, airlines, and in governmental regulatory agencies.

The Certificate may be earned in conjunction with the bachelor's degree or awarded subsequent to obtaining the degree at CSULB. Courses taken to meet the requirements of the Certificate may be the same ones used to satisfy major, minor or General Education requirements, or the degree requirements of the participating departments.

## Requirements

1. A bachelor's degree in dietetics/food administration, business administration, or other related fields;
2. Satisfactory completion of the following courses:
  - A. Nutrition: FCS 132;
  - B. Food Preparation and Service: FCS 235, 275;
  - C. Foodservice Management: FCS 375, 377, 474, 492J;
  - D. Business Administration: ACCT 201, HRM 361, 362, 440, MGMT 300, MKTG 300, IS 240;
  - E. Related Fields: CHEM 202 and 302, ECON 300.
3. Maintain a GPA of 2.5 in the courses of the program and overall;
4. Consultation with and certification of successful completion by the Director of the Program in the Department of Family and Consumer Sciences.

Courses taken under the Credit/No Credit grading option may not be applied to this Certificate program.

---

## Courses for Nutrition and Dietetics, Food Science, and Hospitality, Foodservice and Hotel Management Options

---

- 132. Introductory Nutrition
- 233. Applied Foodservice Sanitation
- 234. Orientation to Dietetics and Food Administration
- 235. Principles of Food Preparation
- 270. Introduction to Hospitality Foodservice and Hotel Management
- 275. Food Production Systems I
- 301. College Dining Services and Bookstore Administration
- 330. Dairy Science
- 331A. Fundamentals of Human Nutrition
- 331B. Fundamentals of Human Nutrition
- 332. Food Science
- 336. Cultural Aspects of Food and Nutrition
- 338. Introduction to Food Processing
- 339. Metabolic Functions of Nutrients.
- 372. Hotel and Lodging Management
- 375. Food Production Systems II
- 376. Customer Service Management in the Hospitality Foodservice and Hotel Industry
- 377. Foodservice Administration
- 378. Legal Issues in Hospitality Foodservice and Hotel Management
- 379. Field Studies in Hospitality Foodservice and Hotel Management
- 430. Nutrition and Health
- 432./532. Food Analysis
- 433. Nutrition in the Life Cycle
- 435./535. Food Processing, Preservation and Packaging
- \*436. Advanced Nutrition
- \*436L. Nutritional Status Assessment Techniques
- 437. Beverage Management
- \*438. Medical Nutrition Therapy
- 439. Nutrition and Aging
- 461. Community Nutrition
- 464./564. Sensory Analysis of Foods
- 466./566. Biochemical and Hormonal Adaptations to Physical Activity
- 469. Food Production Development
- \*474./574. Cost Control in Hospitality Foodservice and Hotel Management
- 492F. Internship in Food Science
- 492J. Internship in Hospitality Foodservice and Hotel Management
- 492K. Internship in Nutrition and Dietetics

## Gerontology Certificate (code 1-1080)

A Certificate in Gerontology (24 units) may be earned in conjunction with the baccalaureate or master's degree. The purpose of this multidisciplinary program is to prepare specialists to work in the field of aging. Specific requirements are listed under Gerontology.

## Master of Arts in Family and Consumer Sciences (code 5-1020)

The Master of Arts degree in Family and Consumer Sciences is designed for students seeking a master's degree, or professional enhancement, or for those wishing to pursue further graduate study. The mission of the program is to educate students to become competent researchers and practitioners who are responsive to the complex and changing needs of diverse families and communities.

The main goal of the graduate program is to provide an opportunity for students to increase competencies and knowledge within their disciplines. In addition, the program gives students opportunities to develop professional leadership and administrative skills. Students are able to work collaboratively with individuals in other disciplines as well as diverse communities to improve the quality of life.

The focus of the curriculum is to promote an understanding of theoretical approaches to the study of the disciplines within the department and the application of theories to enhance the quality of life of individuals, families, and communities. All students will get a strong background in research methods. The advanced candidate selects either a thesis track or directed project track to facilitate a selected career path. Students can expect to:

- Gain professional leadership and knowledge,
- Develop scholarship and research abilities,
- Enhance professional development.

There are three specializations in the Master of Arts degree in Family and Consumer Sciences.

- Apparel Design and Merchandising
- Consumer Affairs
- Family and Consumer Sciences Education

Interested students should contact Dr. Mary Jacob, Family and Consumer Sciences Graduate Coordinator, at (562) 985 4516 or marjacob@csulb.edu. On-line information can be found at [www.csulb.edu/~marjacob](http://www.csulb.edu/~marjacob).

### Admission

Prospective applicants must comply with University requirements for admission to graduate studies as outlined in the CSULB Catalog. Students must concurrently submit applications to the University Admissions and Records office and the Department.

### Admission Requirements to the Department

Admission to the Master of Arts in Family and Consumer Sciences is dependent upon approval by the Graduate Coordinator. The application requirements for prospective graduate students for the Master of Arts degree are:

1. An undergraduate overall GPA of at least 3.0 and a GPA of at least 3.0 in the last 60 undergraduate semester units.

2. A copy of the application submitted to the University Office of Admissions and Records.
3. Official transcripts of your baccalaureate degree. (These are in addition to those transcripts required for general graduate admission to California State University, Long Beach).
4. Three letters of recommendation (preferably from previous instructors).
5. Additional materials that provide evidence of academic performance may be requested (at a later date) after review of applicant's file.
6. Approval of the Graduate Coordinator.
7. THE DEADLINES FOR RECEIPT OF APPLICATIONS TO THE DEPARTMENT GRADUATE COORDINATOR ARE MAY 1<sup>ST</sup> FOR FALL ADMISSIONS AND NOVEMBER 1<sup>ST</sup> FOR SPRING ADMISSIONS.

If the appropriate coursework is taken in the correct sequence, the Qualifying Examination is passed with a grade of B and the Thesis or Directed Project requirements are completed in a timely manner, the student may be able to fulfill the requirements for the Master of Arts degree and graduate in two years (six semesters). This also requires the student to take six units every semester including two summer semesters. The Master of Arts degree in Family and Consumer Sciences offers three emphases: Apparel Design and Merchandising, Consumer Affairs, and Family and Consumer Sciences Education.

### Prerequisites

1. A bachelor's degree with a major in Family and Consumer Sciences; or a bachelor's degree with a minimum of 24 units of upper division courses in Family and Consumer Sciences unless otherwise stated by the program area.
2. An undergraduate overall GPA of at least 3.0 and a GPA of at least 3.0 in the last 60 undergraduate units attempted. Students with less than a 3.0 GPA on the last 60 undergraduate units attempted, but who show promise in all other aspects, may be given special consideration after petitioning for admission into the program through the Graduate Coordinator.
3. Prerequisites for all courses carrying graduate credit must have been completed within seven years of taking the graduate courses. If the prerequisite is outdated, the prerequisite(s) must be repeated or credit obtained by examination.
4. Students deficient in undergraduate preparation must take courses to remove these deficiencies at the discretion of faculty in the specified subject matter area and the Graduate Coordinator. Courses taken to remove deficiencies or raise the GPA may not be included in the graduate program of study.

### Retention

1. Maintain a 3.0 or better grade point average in all graduate work completed at CSULB and all graduate work transferred to meet graduate requirements.
2. Pass the Qualifying Examination at the end of the first year of coursework with a grade of B. A candidate who has failed will be allowed to take the Qualifying Examination a second time and the department Graduate Coordinator should be contacted for specific procedures for the second attempt.
3. Continued satisfactory progress toward the degree objective.

## Advancement to Candidacy

1. Classified status.
2. Satisfactory completion of the Writing Proficiency Examination (WPE).
3. Minimum of 3.0 overall GPA and a 3.0 GPA average in all units undertaken for the approval program of study.
4. Complete EDP 419, FCS 511, FCS 563, FCS 605, FCS 655A, and FCS 696.
5. Pass the Qualifying Examination with a grade of 'B' or better. This examination will test the ability of the graduate student to understand, analyze, integrate and apply information and concepts presented in the following courses: FCS 511, FCS 563, FCS 605, FCS 655A, and FCS 696.

A faculty committee will prepare the questions, administer and grade the Qualifying Examination. Students do not register for a course to take the Qualifying Examination

6. Approval of the Graduate Coordinator, and Associate Dean of the College of Health and Human Services.
7. Enrolled in the semester in which the Advancement to Candidacy takes place.

## Requirements

1. Completion of a minimum of 34 units of approved upper division and graduate courses with a minimum of 21 units in FCS.
2. Completion of EDP 419 and FCS 511, 563, 605, 655A, 696, 697, 692 or 698, and 9 units of Advisor approved courses in the area of specializations (Apparel Design and Merchandising or Consumer Affairs or Family and Consumer Sciences Education).
3. Completion of an oral presentation of the Thesis or Directed Project report.

---

## Family and Consumer Sciences Courses

---

- 511. Family Theories
- 515. Perspectives in Human Development
- 520./420. Personal Finance for the Aging
- 529./429. Consumer Protection
- 550. Cultural Bases of Textiles and Apparel Design
- 559. Apparel Behavior
- 561. Curriculum Development in Family and Consumer Science
- 563. Evaluation in Family and Consumer Sciences
- 592. Internship in Family and Consumer Sciences/Gerontology
- 597. Independent Study
- 605. Seminar in Administration of Family and Consumer Sciences/ Gerontology Programs
- 615A. Seminar in Child Development
- 615B. Seminar in Family Dynamics
- 655A. Introduction to Literature and Research in Apparel Design and Merchandising
- 655B. Apparel Product Development
- 696. Research Methods
- 697. Directed Research
- 698. Thesis

## Master of Science in Gerontology (code 6-1040)

A Master of Science degree in Gerontology may be earned through the Department of Family and Consumer Sciences. This interdisciplinary program consists of 45 members of the

Gerontology faculty interest group in 21 departments. Gerontology is the scientific study of the processes and phenomena of aging, including biological, psychological and sociological dimensions. Specific requirements are listed under Gerontology.

## Master of Science in Nutritional Science (code 6-1019)

The Master of Science Degree in Nutritional Science offers 3 emphases: Clinical/Community Nutrition, Food Science, and Foodservice Systems Management. These provide an opportunity for students to:

1. Specialize in clinical/community nutrition, food science and foodservice systems management;
2. Complete a master's degree and the academic requirements to qualify for membership in the American Dietetic Association concurrently and become eligible to apply to the Approved Dietetic Internship;
3. Increase competence in food and nutrition subject matter in preparation for college teaching, research, graduate study beyond the master's degree and administrative positions in public and private agencies.

Each applicant must request that a copy of the official transcript(s) of college course work be sent to the Graduate Coordinator in the Department of Family and Consumer Sciences in addition to the copies required by the Enrollment Services Office. Three letters of recommendation and the general GRE score must be submitted to the department Graduate Coordinator to complete the application. At least two of these letters of recommendation must be written by persons familiar with the scholastic ability of the student. The student also must submit a completed graduate application. Admission to the program is dependent on approval by the department Graduate Coordinator.

## Prerequisites

1. A bachelor's degree with an undergraduate overall GPA of at least 3.0 and a GPA of 3.0 on the last 60 undergraduate units attempted. If students hold a 3.0 or better GPA and show academic potential for postgraduate study as judged by the GRE score (1350 minimum) they may be given conditional status;
2. Students may be admitted to the program under conditional status for several reasons. Students are responsible for meeting all conditional requirements to be removed from conditional status prior to enrolling in 500/600 level courses:
  - A. Students who need to bring their GPA up to 3.0 must achieve a GPA of 3.0 within one year of admission. Courses taken to raise the GPA may not be included in the graduate program of study,
  - B. the student who needs to pass the Writing Proficiency Examination (WPE) must do so within one year of admission and must attempt the WPE the first semester of enrollment,
  - C. the student who needs to pass the Test of English as a Foreign Language (TOEFL) must do so within one year of admission, and/or
  - D. the student who needs to complete prerequisite deficiencies must do so using a program of study developed with the specialization area faculty advisor and approved by the Graduate Coordinator.

- Students from other disciplines will be required to complete prerequisite courses before enrolling in 500/600 level courses;
- Prerequisites for all courses carrying graduate credit must have been completed within seven years of taking the graduate courses. If any prerequisite is outdated, it may be repeated or credit obtained by written examination. Specifically, basic biological science courses and foundation nutrition and food science courses are evaluated for currency. A proficiency examination covering the content of FCS 331A and 332 courses is administered by the department for students in all emphases who have not taken these courses or their equivalents within the past five years. In addition, FCS 331B course content will be included in the proficiency examination for students in the Clinical/Community Nutrition emphasis. Any student failing to pass the proficiency examination with a grade of "B" or better must take the appropriate course for credit;
- Entering graduate students will meet with the Graduate Coordinator to prepare a tentative degree program. In order to enroll in any graduate course, the student must complete all prerequisites and deficiencies and must obtain approval from the Graduate Coordinator.

#### Advancement to Candidacy

- Satisfy the general University requirements for advancement to candidacy;
- Completed 9 units of graduate courses, including FCS 696;
- Successful completion of Writing Proficiency Examination;
- Approval of the Graduate Coordinator, the Associate Dean of the College of Health and Human Services.

#### Requirements

- Completion of a minimum of 34 units of approved upper-division and graduate courses;
- At least 18 units of 500/600 level courses in Family and Consumer Sciences which include FCS 696, 697, 698 and those specified for the 3 emphases;

##### *Clinical/Community Nutrition*

FCS 530A, 530B, 562, 591B or 635

##### *Food Science*

FCS 533, 535, 562, 564, 597, 635, 532

##### *Foodservice Systems Management*

FCS 533, 562, 592, 635

- An advanced statistics course: EDP 519 or H/SC 503 or BIOL 563 or BIOL 565;
- Selection of appropriate electives by advisement to meet the competencies of each emphasis;
- An overall GPA of 3.0 or better;
- A written thesis;
- Oral presentation of the thesis.

#### American Dietetic Association (ADA)

#### Accredited Dietetic Internship (DI)

The Department of Family and Consumer Sciences offers a combined Master of Science in Nutritional Science and DI supervised practice. This experience fulfills the registration eligibility requirements of the ADA to become a Registered Dietitian. Upon successful completion of the DI, the student

will be eligible to write the Registration Examination for Dietitians.

The DI requires 1,093 hours total, with 928 hours of practice divided into four emphases: nutrition therapy, foodservice systems management, community and business/entrepreneurial nutrition. The Seminar in Dietetic Practice constitutes the remaining 165 hours of the DI. The supervised practice is conducted off campus at a variety of excellent facilities. Opportunities exist in acute and long-term health care sites, as well as in teaching, research, community and governmental agencies. Students will receive training in general dietetics with experiences that expose them to various specialty areas.

#### Admission Requirements

- Completion of the Didactic Program in Dietetics as stipulated by ADA with an original verification statement from a Didactic Director;
- Earned baccalaureate degree;
- GPA 3.0/4.0 scale required on the last 60 units of courses completed;
- Related volunteer or work experience in the United States;
- Graduate standing in the CSULB Master of Science, Nutritional Science program;
- Application materials to Dietetic Internship Director by February 1<sup>st</sup> including three letters of recommendation, formal ADA application, and copies of all college transcripts; and
- Personal interview with Program Director and review committee.

#### Program Requirements

Upon satisfactory completion of the Supervised Practice in Dietetics: FCS 591A, the Seminar in Dietetic Practice: FCS 591B, and completion of two of the three core graduate courses, FCS 531, 533, 562 or equivalent with a grade of "A" or "B", the student will be eligible to take the Registered Dietitian (R.D.) exam sponsored by the American Dietetic Association.

The 6 units of required graduate courses and a total of 2 units of FCS 591B are applicable toward the M.S. degree in Nutritional Science. Completion of the M.S. degree is not a requirement for completion of the Dietetic Internship. Students should contact the Dietetic Internship Director for complete details on this program at [www.csulb.edu/~gcfrank](http://www.csulb.edu/~gcfrank).

Career opportunities include: clinical dietitian; consultant; entrepreneur; community nutritionist; foodservice manager in hospitals, schools, universities, airlines, businesses; manager in restaurant, hotel, or lodging industries; researcher in the medical, food or nutrition industry, and government inspector in the food industry.

---

#### Nutritional Science Courses

---

530A. Carbohydrates, Lipids and Proteins

530B. Vitamins and Minerals

531. Advanced Community Nutrition

532./432. Food Analysis

533. Recent Advances in Food Science

535./435. Food Processing, Preservation and Packaging

562. Contemporary Issues in Nutrition

564./464. Sensory Analysis of Foods

566./466. Biomedical and Hormonal Adaptations to Physical Activity

- 574./474. Cost Control in Hospitality Foodservice and Hotel Management
- 591A. Professional Practicum in Dietetics
- 591B. Seminar in Dietetic Practice
635. Seminar in Food Science, Nutrition and Foodservice Systems Management

## Courses (FCS)

### Lower Division

#### 110. Infants and Toddlers (2)

Growth and development of very young children from birth through 1 1/2 years of age. Applications of developmental theory and research to caregiving for infants/toddlers. Traditional grading only. (Seminar)

#### 111. Preschool Child (3)

Behavior and development in early childhood, with emphasis on the interaction of parents, children and teachers. (Lecture-discussion 3 hours.) (CAN FCS 14)

#### 132. Introductory Nutrition (3)

Prerequisite: One of the Foundation courses (may be taken concurrently). Essential nutrients, their physiological functions and human needs during the life cycle; food sources as applied to selection of an adequate diet; problems encountered providing food to meet nutritional needs; food additives and consumer protection. Traditional grading only for majors/minors. Not open to students with credit in FCS 232. (Lecture-discussion 3 hours.) (CAN FCS 2.)

#### 154. Fundamentals of Apparel Production (3)

Analysis of the interrelationship of garment design and apparel construction. Application of theories and methods of apparel design to garment construction. Traditional grading only for majors/minors. Not open to students with credit in FCS 254. (Lecture-discussion 2 hours, Laboratory 3 hours.) (CAN FCS 10)

#### 155. Introduction to the Fashion Industry (3)

Organization, structure and interrelationship of industries and services that comprise the business of fashion: terminology, designers, trade organizations and publications. Professional opportunities explored. Traditional grading only. (Lecture-discussion 3 hours.)

#### 211. Guiding Young Children (3)

Prerequisites: PSY 100 or SOC 100 or FCS 111. Processes, techniques, models, research, and selected issues in child guidance as applied to 3-5 year-old children in family and community settings. Development of a personal approach to guidance based on current scientific research and theory concerning child development. (Lecture-discussion 3 hours.)

#### 213. Family, Community, and Young Children (3)

Introductory study of young children and the influences of family, school and community on their development. Exploration of various cultural and social factors, focusing on the resources necessary to promote healthy growth and development. Students may not substitute this course for FCS 413. (Seminar 3 hours.)

#### 214. Environments for Young Children (3)

Prerequisites: FCS 111 or consent of instructor. Introduction to designing professional care environments for infants, toddlers, and preschool children with emphasis on social, emotional, physical-motor, cognitive, and creative development in family and community settings. (Seminar 3 hours.)

#### 219. Stress, Coping and Resiliency for the Professional Educator (3)

Prerequisites: ENGL 100. This course identifies stressors which diminish the effectiveness of the learning environment and place children at-risk for school problems. The Family Resiliency Model is utilized to examine critical family dynamics which affect children's emotional and psychological development. Stressors which spill over from the broader community (e.g., community violence, and natural catastrophes), as well as stressors which emerge from within the classroom (e.g., peer conflict, teacher-

student conflict, and teacher-burnout are also examined). Practical skills are provided to future teachers to assist them in managing their personal stress, in developing effective communication and conflict management skills, and in creating a safe, competence-producing and cooperative learning environment. (Lecture-Discussion 3 hours.) Traditional grading only.

#### 222. Contemporary Housing (3)

Psychological, functional, technical and aesthetic concepts as they relate to individuals and families in housing environments. (Lecture-activity 3 hours.)

#### 223. Personal and Family Financial Management (3)

Prerequisites: Completion of the 13 unit G.E. Foundation requirements. A functional approach to personal finance including budget systems, consumer credit, insurance, debt collection system, status obligation, accumulating reserves. Applicable for personal and professional use. (Lecture-discussion 3 hours.)

#### 228. Housing in Global Perspective (3)

Prerequisites: Completion of the 13-unit G.E. Foundation Requirements. Family housing options and choices in urban and rural areas throughout the world viewed within the context of history, politics, culture, art, environment, geography, technology and economics, (Lecture-discussion, 3 hours.)

#### 233. Applied Foodservice Sanitation (1)

This course is designed to acquaint students with the principles of sanitation and safety as applied to any restaurant or institutional food-service facility. The course content includes: the cause, control and investigation of foodborne illnesses; sanitary practices with purchasing, receiving, storing and preparing food; sanitary maintenance of kitchen, dining room and all equipment; personal hygiene; the safety of all equipment and the food handler; vector control; and safety practices. (Lecture-discussion 1 hour.)

#### 234. Orientation to Dietetics and Food Administration (2)

Role of the professional in dietetics and food administration; orientation to career opportunities in Food, Nutrition and Foodservice Systems Management; personnel and physical facilities, including equipment in health care and mass feeding programs. (Lecture-discussion 1 hour, activity 2 hours.)

#### 235. Principles of Food Preparation (3)

Prerequisites: CHEM 100 or 111A or 202. Application of scientific principles in the preparation of selected food products with emphasis on the physical and chemical properties of food; methods and techniques of food preparation; factors that contribute to quality of prepared foods. (Lecture-discussion 2 hours, Laboratory 3 hours.) Course fee required. (CAN FCS 8)

#### 251. Professional and Personal Apparel Selection (3)

Prerequisites: Completion of the 13-unit G.E. Foundation requirements. Apparel selection for professional and personal needs based on design, culture and fashion. Wardrobe analysis and coordination; consumer clothing guidelines. (Lecture-discussion 3 hours.) (CAN FCS 20)

#### 252. Analysis, Evaluation and Comparison of Ready-to-Wear (3)

Analysis of the quality of materials, design and construction in ready-to-wear garments and accessories; comparison of processes involved in manufacturing, concepts of sizing, principles of fit; aids in buying and selling. (Lecture-discussion 3 hours.)

#### 257. Apparel Design: Introduction to Flat Pattern (3)

Prerequisites: 154 and FCS 251. Introduction to the design concept as it applies to flat pattern manipulation. (Discussion 2 hours, Laboratory 3 hours.)

#### 258. Pre-internship in Apparel Design and Merchandising (3)

A structured work/learning experience in the retail industry designed to develop competencies required for successive performance in retail management or other fashion related fields. (Lecture-activity 3 hours.)

#### 270. Introduction to Hospitality Foodservice and Hotel Management (3)

Introduction to the hospitality foodservice and hotel industry and historical overview of the field. Careers in hospitality foodservice and hotel management are defined. Relationship of careers to the community and the foodservice and hotel/lodging industry are explored. Overview of the organization and current forces shaping foodservice and hotel operations. (Lecture-discussion 3 hours.)

### 275. Food Production Systems I (3)

Prerequisites: FCS 132 and 235. Factors which influence individual, family and quantity foodservice. Menu planning and food selection, preparation and service in relation to management of time, energy and money. Foodservice practices for regular meals and special occasions. (Lecture-discussion 2 hours, laboratory 3 hours.) Course fee required.

### 290. Directed Studies (1-3)

Independent study under the direction of a faculty member. Exploration and experience in areas which are not a part of any regular course. May be repeated for a maximum of 6 units. Traditional grading only. (Seminar) Course may be repeated to a maximum of 6 units with different topics.

### 296. Applied Arts in Family and Consumer Sciences (3)

Applied arts in communicating design concepts for Family and Consumer Sciences professions. (Activity 3 hours.)

### 299. Themes and Issues in Family and Consumer Sciences (1)

Must be taken during first semester as Family and Consumer Sciences or Dietetics and Food Administration major. Study of family and consumer sciences as a discipline of study and a profession in both historic and contemporary perspectives. An integrative, interdisciplinary framework is the basis for examining the relationship of each area of specialization to the mission of family and consumer sciences and to the root disciplines. (Discussion 1 hour.)

## Upper Division

### 301. College Dining Services and Bookstore Administration (3)

Prerequisite: Permission of instructor. Academic and experiential learning in the management of college dining services and bookstore. An internship for student employees of Forty-Niner Shops, Inc.; 150 hours of work experience, 18 hours of classroom instruction.

### 309I. The Consumer in the Legal and Economic Environment (3)

Prerequisites: Completion of foundation courses; completion of one or more exploration courses; upper division standing. Combines the economic and ethical components of consumer issues with a critical analysis of relevant substantive aspects of consumer law. Incorporates an integrated coverage of the economic, legal, and regulatory environment of consumers in avoiding and resolving disputes regarding fraudulent transactions, financial matters, personal and real property contracts, torts, credit and investment issues, and family relationships. Team taught. Same course as ECON 309I and FIN 309I. (Lecture-discussion 3 hours.)

### 311. Prenatal Development and Infancy (3)

Prerequisites: FCS 111 and upper division standing. Human development from conception through prenatal development, childbirth, the neonatal period, infancy and toddlerhood with emphasis on the various aspects of development and the environmental/social factors essential for human growth. (Lecturer-discussion 3 hours.)

### 312I. Family and Personal Development (3)

Prerequisites: completion of the G.E. Foundation, one or more Explorations courses, and upper-division standing; PSY 100, SOC 100 or ANTH 120. Interdisciplinary introduction to the concepts underlying contemporary American family life and the influence of social and cultural conditions on human development. (Lecture-discussion 3 hours.)

### 314. The Older Child (3)

Prerequisites: FCS 111, and upper division standing or consent of instructor. Behavior and development in middle and late childhood and adolescence, with emphasis on individual and cultural differences. (Lecturer-discussion 3 hours)

### 319. Family Stress and Coping (3)

Prerequisites: Completion of the 13-unit G.E. Foundation requirements; ANTH 120 or PSY 100 or SOC 100 or consent of instructor. Examination of theories and research associated with stressors

affecting family functioning throughout the lifecycle. Consideration given to both normative transitions and non-normative stressors. Emphasis on strategies to assist families to deal productively with stress and change. (Lecture-discussion 3 hours.)

### 321. Family and Consumer Resource Management (3)

Prerequisites: Completion of the 13-units G.E. Foundation requirements; upper division standing. Basic management principles applied to personal and family settings. The role of values, goal formation, decision-making, planning, implementing, and evaluation of managerial behavior in diverse family and cultural settings are examined. (Lecture-discussion 3 hours.)

### 322. Family Housing and the Urban Community (3)

Prerequisites: Upper-division standing. Critical analysis of family housing in the urban community including aspects of shelter, city and service providers. Sociological, psychological, legislative, economic and technical factors are investigated. Special attention is given to families of various structures and socioeconomic background (Discussion 3 hours.)

### 326. Consumer Problems (3)

Prerequisite: Upper-division standing. A study of consumer problems, their effective prevention, and resolution through government, business, and private organizations with a view toward personal and professional interventions. (Lecture-discussion 3 hours.)

### 330. Dairy Science (2)

Prerequisites: FCS 132, 235. Study of dairy science from chemical microbiological quality assurance, processing techniques, nutritional values, and economic standpoints. Integration of recent technology as implemented to feature marketed dairy products both traditional and contemporary. (Lecture-discussion 2 hours.)

### 331A. Fundamentals of Human Nutrition (3)

Prerequisites: FCS 132, BIOL 207, CHEM 302 or 327 or equivalent. Nutritional needs with emphasis on the physiological and chemical foundation for these needs; factors influencing nutrient needs. (Lecture-Discussion 3 hours.)

### 331B. Fundamentals of Human Nutrition (3)

Prerequisites: FCS 331A. Nutritional needs with emphasis on changes through the life cycle. Introduction to dietary modifications in various pathological conditions. Introduction to nutrition assessment and nutrition education techniques. (Lecture-discussion 3 hours.)

### 332. Food Science (3)

Prerequisites: CHEM 327; FCS 235; MICR 200 or equivalent. Composition and structure of foods: chemical changes in foods that affect their color, flavor, texture, aroma, and nutritive quality during processing and preparation; techniques for food preservation. (Lecture-discussion 2 hours, laboratory 3 hours.) Course fee required. Traditional grading only for Majors/Minors.

### 336. Cultural Aspects of Food and Nutrition (3)

Prerequisites: PSY 100 or SOC 100 or ANTH 120 or equivalent; FCS 132. Cross-cultural study of food and nutrition. Factors such as religion, food supply and socioeconomic status are considered as they influence nutritional status and food intake in various populations throughout the world. (Lecture 3 hours.)

### 338. Introduction to Food Processing (3)

Prerequisites: FCS 332. Study of industrial concepts of food processing and technology. Discussion of processing raw agricultural commodities through the production phases to a final product acceptable to consumers. (The course may include limited visitations to food preparation sites.) (Lecture-discussion 3 hours.)

### 339. Metabolic Functions of Nutrients (1)

Prerequisites: CHEM 302, BIOL 207, and consent of instructor. Metabolic role of nutrients in the human body; practical application of nutrition to patient care. Open to Nursing Majors only. (Activity 2 hours.)

### 351. Fashion Promotion and Sales (3)

Prerequisites: FCS 155, 251, 252 or 154. Concepts, practices and procedures related to fashion promotion. Includes planning, directing and evaluating promotion activities such as visual merchandising, special events, publicity and personal and non-personal selling. (Discussion 3 hours.)

**352. Apparel Design: Computerized Pattern Making (3)**

Prerequisites: FCS 155, 251, 257 and 387. Use of computer aided design software for apparel pattern development. (Laboratory 6 hours.)

**353. Textiles (3)**

Prerequisites: CHEM 100 or 111A and FCS 155. Interrelationship of fiber, yarn, structure, fabric geometry and finishing treatments to the textile's appearance, comfort, durability and maintenance. (Discussion 2 hours, laboratory 3 hours.)

**354. Apparel Design: Analysis of Garment Design, Tailoring and Production Processes (3)**

Prerequisites: FCS 155, 154, 251, or consent of instructor. Analysis of traditional and contemporary processes in the design and production of tailored apparel. Application of apparel design and production process for couture, ready-to-wear and individually produced garments. (Discussion 2 hours, Laboratory 3 hours.)

**355. Fashion Merchandising Planning and Control (3)**

Prerequisites: ELM Passage, ACCT 201, FCS 155, IS 240 or FCS 387, or consent of instructor. Concepts, practices and procedures as well as calculations and computer applications as they relate to apparel retail profit. Includes inventory methods, operating statements and purchase planning procedures. (Discussion 3 hours.)

**357. Apparel Design: Advanced Flat Pattern (3)**

Prerequisite: ELM Passage, FCS 155, 251, 257, and 353 (may be taken concurrently). Exploration of the total design concept as it applies to pattern manipulation. (Discussion 2 hours, laboratory 3 hours.)

**358. Fathers and Fathering (3)**

Prerequisites: PSY 100 and SOC 100 or FCS 111. An overview of the sociological and psychological literature on parenting with emphasis on fathers and fathering in the U.S. Focus on current literature and research regarding the perceived and changing roles of fathers. Discussion of fathers from various ethnic groups in an effort to diminish stereotypes. Same course as PSY 366. (Lecture-discussion 3 hours.)

**372. Hotel and Lodging Management (3)**

Prerequisite: FCS 270. Students will become acquainted with the organization and management of hotel and lodging facilities. The course covers the functions of various operational departments and how they interrelate. The importance of assuring quality guest service will be emphasized. Field trips may be required. (Lecture - discussion 3 hours.)

**375. Food Production Systems II (3) F,S**

Prerequisites: FCS 233 and 275. Facilities at various types of quantity food operations are utilized to provide students with production and operational experiences -- menu planning, costing, standardizing recipes, serving, merchandising, sanitation and safety. Field experiences include commercial and non-commercial settings, such as, hospitals, restaurants, hotels, school districts, universities, airlines, and senior foodservice systems. (Lecture - discussion 2 hours, Laboratory 3 hours.) Traditional grading only.

**376. Customer Service Management in the Hospitality Foodservice and Hotel Industry (3)**

Prerequisites: FCS 270. Components of customer service management and guest relations in the foodservice and lodging industries are examined. Importance of quality customer service and its relationship to the success of operations in the industry will be covered. Field trips and off-campus activities required. (Lecture-activity 3 hours.) Traditional grading only.

**377. Foodservice Administration (3)**

Prerequisites: FCS 375. Principles of administration and leadership in commercial and non-commercial foodservice operations are explored. Topics include organizational management, human resource management, productivity, financial management, facilities planning and design, and quality management as they are applied to the foodservice industry. (Lecture - discussion 3 hours.)

**378. Legal Issues in Hospitality Foodservice and Hotel Management (3)**

Prerequisite: Upper division standing or consent of instructor. The laws of foodservice and lodging are examined as they have

evolved historically and as they exist today. Legal components of foodservice and lodging management will be covered. (Lecture discussion 3 hours.) Traditional grading only for majors/minors.

**379. Field Studies in Hospitality Foodservice and Hotel Management (1-3)**

Prerequisites:/Course Description: Upper division standing or consent of instructor. A structured experiential learning course designed to expand professional experiences and to enhance the development of competencies required for successful performance in hospitality foodservice and hotel management. Course may be repeated for a maximum of six units. Traditional grading only for majors and minors.

**387. Consumer Technology (3)**

Prerequisites: FCS 299 and upper division standing. The impact of consumer technology on the quality of life of individuals and families at home, in home-based work environments, and in professional environments. Computer application for consumers in family resource and household management, including problem solving and decision-making. Professional applications. Analysis of social, psychological, and economic impacts. Discussion 2 hours, Laboratory 3 hours.)

**402./502. Child and Family Law (3)**

Prerequisites: FCS 312I and upper division standing. Establishment, conduct, and termination of family relationships as well as the rights and duties of parties to non-marital family relationships will be examined. Topics include, the "Best Interest of the Child Rule," artificial insemination, property rights, adoption, child custody, domestic violence, support of children, spousal support, genetic testing, new trends in family law, and paternity. Traditional grading only. (Lecture-discussion 3 hours.)

**409. Language, Learning and the Developing Child: A Cross-Cultural Perspective (3)**

Explores the communicative-linguistic, cognitive, physical, and socio-emotional development of the child from the prenatal to adolescent period across diverse cultures with an emphasis on language acquisition and the learning process. Traditional grading only. Not open to students currently enrolled in the Liberal Studies program. (Same course as LING 429, EDEL 429, and EDP 428).

**410. International Families: Families in Cross-Cultural Perspectives (3)**

Prerequisites: FCS 312I or consent of instructor. Designed to provide students with an in-depth understanding of cross-cultural diversities in families from varied nationalities. Information concerning similarities and differences which exists in such areas as dating and marriage customs, family structure and family forms from selected cross-cultural families will be considered. (Lecture-discussion 3 hours.)

**\*411. Individual Child Study and Guidance (3)**

Upper-division standing, a 300 level course in Child/Human Development, or consent of instructor. Analysis and interpretation of theory, research, trends and techniques for the study and guidance of the individual child in family and community settings. (Lecture-discussion 3 hours.)

**\*412. Family Interaction (3)**

Prerequisites: Upper-division standing, FCS 312I, or consent of instructor. Dynamics of interaction and communication in interpersonal relationships throughout the family life cycle. Experience with a variety of communication skills in small group settings. (Lecture-discussion 3 hours.)

**\*413. Child and Family in the Community (3)**

Prerequisites: Upper-division standing, FCS 312I, or consent of instructor. Study of cultural varieties and the needs of the contemporary American family in an urban community; analysis of current issues and problems; identification of and experience with community resources and agencies. (Lecture-discussion 3 hours.)

**414. Fieldwork with Preschool Children (3)**

Prerequisites: FCS 111, 211, 214, or consent of instructor. Supervised teaching/learning experience with preschool children including development of skills for observation and assessment as well as curriculum planning, implementation and evaluation. Course may

be repeated for up to 6 units with assignments reflecting increasing levels of difficulty. (Lecture 1 hour, laboratory 6 hours.)

#### **415. Fieldwork with Infants/Toddlers (3)**

Prerequisites: FCS 111, 211, 214, or consent of instructor. Supervised teaching/learning experience with infants/toddlers, including development of skills for observation and assessment as well as curriculum planning, implementation, and evaluation. Course may be repeated for up to 6 units with assignments reflecting increasing levels of difficulty. (Lecture 1 hour, laboratory 6 hours.)

#### **416A. Introduction to Administration and Supervision of Child Development Programs (3)**

Prerequisites: FCS 414 or FCS 415 or consent of instructor. Minimum and recommended standards and laws pertaining to housing, equipment, play space, adult/child ratio, health supervision and meal service for children's programs. Selection and supervision of personnel, program planning and directing. Traditional grading only. (Lecture-discussion 3 hours.)

#### **416B. Applications of Administration and Supervision of Child Development Programs (3)**

Prerequisites: FCS 416A or consent of instructor. Decision theory and its application, communication strategies, planning, operating and evaluating programs for young children. (Lecture-discussion 3 hours.) Traditional grading only.

#### **417. Premarital Intervention (3)**

Prerequisites: FCS 312I or consent of instructor. Review of research on dating relationships and intervention programs designed for individuals or couples prior to marriage. Consideration of shyness, dating anxiety, intimacy, sexual decision-making, values clarification, self-disclosure, and conflict resolution. Emphasis on applying research to the development of programs to assist premarital individuals enrich their relationships. (Lecture-discussion 3 hours.)

#### **\*418. Parent Education (3)**

Prerequisites: Upper-division standing and at least 6 units of upper division child development and family studies or equivalent courses, or consent of instructor. Principles and techniques for working with parents in community and school programs. Assessment of needs and development of programs for adults in a variety of social and cultural settings. Traditional grading only. (Lecture-activity 3 hours.)

#### **\*419. Family Life Education (3)**

Prerequisites: Upper-division standing, FCS 413, or consent of instructor. Concepts, principles and paradigms on family life education will be explored. Contemporary issues confronting individuals and families will be addressed. The focus of the course is on planning, implementing, and evaluating family life education programs. Gender, ethnicity, and diversity issues as they relate to family life education will be stressed. Traditional grading only. (Lecture-discussion 3 hours.)

#### **420./520. Personal Finance for the Aging (3)**

Prerequisites: 400-level course in Consumer Affairs or consent of instructor. Provides an understanding of the operations of personal finance as applied to the aging population. Topics include public and private sources of income, living expense, public and private sources of assistance, personal budget systems, financial planning, legal rights of the aged affecting their personal finances, and financial counseling for the aging. Same course as GERN 420/520. (Lecture-discussion 3 hrs)

#### **\*422. Housing Policies: Public and Private (3)**

Prerequisites: FCS 322, upper division standing or consent of instructor. Federal, state, and local policies, programs and legislation concerning housing and urban development. Analysis of the housing industry and its influence on the consumer market. Traditional grading only. (Discussion 3 hours.)

#### **\*424. Independent Living for Disabled and Elderly Persons (3)**

Prerequisite: FCS 321 or 322 or GERN 400I or consent of instructor. Independent living concepts related to physically and/or functionally disabled adults. Personal, environmental and programmatic responses to disability and aging. Activities include individual and group projects and site visits to such locations as an adapted pri-

vate home, an Independent Living Center, a "special clothing" manufacturer, and a multipurpose rehabilitation center. Same course as GERN \*424. (Lecture-Activity 3 hours.)

#### **\*425. Personal Financial Planning Analysis (3)**

Prerequisite: FCS 223 or consent of instructor. Analysis and protection of personal and family resources; planning and forecasting goals; development of financial strategies utilizing insurance, investment, tax management, pensions, wills and trusts. (Lecture-discussion 3 hours.)

#### **\*426. Family Financial Problems (3)**

Prerequisite: FCS 223 or consent of instructor. Theory and practice in the diagnosis of family financial crises; selecting alternative solutions; constructing practical methods for the prevention of family financial problems. (Discussion 2 hours, laboratory 3 hours.)

#### **\*428. International Housing (3)**

Prerequisite: FCS 322 and upper division standing. Theories and solutions of family housing in urban and rural communities throughout the world. Traditional grading only (Discussion 3 hours.)

#### **429./529. Consumer Protection (3)**

Prerequisites: Upper Division course in consumer affairs or consent of instructor. Concepts of consumer protection with analysis of a myriad of resources available for individuals and families with consumer problems. (Seminar 3 hours.)

#### **430. Nutrition and Health (3)**

Prerequisite: Upper-division standing. Intensive study of nutrition including evaluation of current trends in food and nutrition. Designed for students in health education, elementary and secondary education, social service and other elective students. Not open to family and consumer sciences majors. (Lecture-discussion 3 hours.)

#### **432./532. Food Analysis (3)**

Prerequisites: CHEM 327, FCS 332 or equivalent. Application of scientific methods of food analysis. Consideration of the manner in which such variables as ingredients, proportions, and techniques in food preparation affect the quality of products. Experimental laboratory problems. (Lecture-discussion 2 hours, Laboratory 3 hours.) Course fee required.

#### **433. Nutrition in the Life Cycle (3)**

Prerequisite: FCS 132 or 331A or equivalent. Nutrition throughout the life cycle. Interaction of physical, biological, cultural and psychological factors involved in assessing and maintaining optimal nutritional health. Community nutrition programs introduced. (Lecture-discussion 3 hours.)

#### **435./535. Food Processing, Preservation and Packaging (3)**

Prerequisites: FCS 332 or consent of instructor. Methods and technological aspects in food processing, preservation and packaging. Application of principles and assessment of nutritional and physical qualities. Evaluation of chemical additives in food products. Microbiological aspects of food safety and food plant sanitation. (Lecture-discussion 2 hours, laboratory 3 hours.)

#### **\*436. Advanced Nutrition (3)**

Prerequisites: FCS 331B, CHEM 448, 449 (may be taken concurrently). Metabolism of proteins, fats, carbohydrates, minerals and vitamins; interrelationship of nutrients; principles of determining nutritional requirements of individuals. (Lecture-discussion 3 hours.)

#### **\*436L. Nutritional Status Assessment Techniques (2)**

Prerequisites: FCS 436 (may be taken concurrently), CHEM 449. Designed to provide training in nutrition assessment and nutrition counseling. Use of procedures for interviewing, counseling and instructing patients/clients in various settings comparable to those encountered in dietetic practice. Includes laboratory methods for collection and interpretation of demographic, dietary, anthropometric, biochemical and clinical data. (Laboratory 3 hours, Clinical Practice 3 hours.)

#### **437. Beverage Management (3)**

Prerequisites: FCS 375, 377, senior standing. Identification, use and service of wines and other alcoholic beverages, with an in-depth analysis of the various elements of beverage operations including purchasing, control, merchandising and bar management. Field trips are made to hotels and restaurants to demonstrate and observe operating principles. (Lecture-discussion 3 hours.)

**\*438. Medical Nutrition Therapy (3)**

Prerequisites: FCS 436, 436L (may be taken concurrently). Therapeutic nutrition. Metabolic changes in specific pathological conditions; dietary modifications used for treatment. (Lecture-discussion 3 hours.)

**\*439. Nutrition and Aging (3)**

Prerequisites: FCS 132 or BIOL 207 or consent of instructor. Nutritional needs as related to physiological changes that occur during aging. Factors that influence food intake and nutritional status of the elderly. Diet adaptation for chronic diseases commonly found in older people. Same course as GERN \*439. (Lecture-discussion 3 hours.)

**450. Cultural Perspectives of Dress (3)**

Prerequisites: Completion of the 13-unit G.E. Foundation requirements; ANTH 120 OR SOC 100 OR 142 and upper division standing or consent of instructor. Factors influencing design of textiles and apparel, techniques of textile and apparel production, and human behavior in the selection of dress in societies and cultural groups are studied. Emphasis on symbolism of textiles and clothing designs as a communicative device for expressing social and cultural values. Impact of other cultures on western dress and impact of western dress on other apparel systems is included. (Seminar 3 hours.)

**\*452. Apparel Design: Draping (3)**

Prerequisites: FCS 353, 354 and 357, or consent of instructor. Exploration of the total design concept as it applies to fabric manipulation. (Discussion 2 hours, Laboratory 3 hours.)

**\*453. Quality Control in Apparel Design and Merchandising (2)**

Prerequisites: FCS 155 and 353. The effect of textile fabric and apparel construction on garment performance. (Discussion 1 hour, Activity 2 hours.)

**\*454. Experimental Clothing (3)**

Prerequisites: FCS 452 or consent of instructor. Exploration of clothing design and production through the experimental process. Individual investigation of the creative design process; evaluation of equipment; experiences with a variety of fabrics and techniques. (Discussion 2 hours, Laboratory 3 hours.)

**\*455. Fashion Merchandising (3)**

Prerequisites: FCS 155, 252 or 154, senior standing, or consent of instructor. Application of merchandising concepts for the budgeting, planning, buying, promoting and selling of fashion goods and apparel in retail organizations. Traditional grading only. (Discussion 3 hours.)

**456. Historic Perspectives of Fashion (3)**

Prerequisites: FCS 251, 353, HIST 131, senior standing, or consent of instructor. Social, political, economic, geographic and religious forces that affect styles of fashion from antiquity to the present day. Emphasis is on the relationship of historic styles to current fashion. Primary focus is on the fashion influences of the western world. (Seminar 3 hours.)

**457. International Textiles and Apparel (3)**

Prerequisites: ECON 100 and 101 or 300, FCS 353, senior standing, or consent of instructor. International, political and economic issues relevant to the textile and apparel industries. Emphasis on understanding international aspects of the textile and apparel industries in the United States. (Seminar 3 hours.)

**\*458. Fashion Product Development (3)**

Prerequisites: Six upper-division units in apparel design and merchandising or consent of instructor. The process of designing and engineering fashion products to be serviceable, producible, salable and profitable for various consumer market segments. (Discussion 3 hours.)

**461. Community Nutrition (3)**

Prerequisites: Upper-division standing, FCS 331B. Survey of nutrition programs in community. Techniques of program planning, implementation, management evaluation. (Lecture-discussion 3 hours.)

**464./564. Sensory Analysis of Foods (3)**

Prerequisites: FCS 332, BIOL 260 or equivalent statistics; consent of instructor. Principles and methods of analysis of sensory attributes.

Applications, advantages and limitations of sensory methods using trained judges and consumer panels. Computer use of statistical data analysis and plotting. Statistical analysis, data interpretation and comparison with previous literature. (Discussion 2 hours, Laboratory 3 hours.) Course fee required.

**466./566. Biochemical and Hormonal Adaptations to Physical Activity (3)**

Prerequisites: Upper-division undergraduate or Graduate standing; KPE 301 or equivalent; CHEM 111A or its equivalent. Consent of instructor required for upper-division undergraduate students prior to registration. Study of the biochemical and hormonal changes that occur as a result of acute and chronic physical activity. Emphasis will be placed on the application of concepts to the development of exercise training programs. Upper-division undergraduate students register in FCS 466; graduate students register in FCS 566. Traditional grading only. Same course as KPE 466./566. (Seminar 3 hours.)

**469. Food Production Development (1)**

Prerequisites: FCS 332, 338, 432 and 435 or consent of instructor. Industrial concepts of food product development, formulation and technology. The course will focus on the principles of new product development, identification of ingredient replacements and improvements. Development of a prototype, ingredient interaction, and the functions of different applications of newly created product in consideration of cost analysis. Traditional grading only.

**474./574. Cost Control in Hospitality Foodservice and Hotel Management (3)**

Prerequisites: FCS 375 or consent of instructor. Financial management, including control of food, labor, supplies, equipment and other operational costs; principles and procedures used for controlling purchasing, receiving, storing, and issuing of food, beverage, and supplies; factors affecting quality and customer satisfaction; inventory and security management; utilization of computers in cost control; and analysis of financial reports in the hospitality foodservice and hotel industry. (Lecture - discussion 3 hours.) Miscellaneous course fee: \$25.00

**\*486. Teaching-Learning Strategies in Family and Consumer Sciences (3)**

Utilize the principles and concepts of each area of family and consumer sciences in developing a variety of teaching-learning experiences appropriate for individuals or groups in an education, business, government agency, or other community setting. (Laboratory 6 hours.)

**\*488. Developing Occupational Programs in Family and Consumer Sciences (3)**

Prerequisite: EDSS 300H or teaching experience or consent of instructor. Utilizing knowledge and skills derived from the field of family and consumer sciences as a basis for offering occupational opportunities for youth and adults through planning programs in school and community. (Lecture-discussion 3 hours)

**\*490. Special Topics (1-3)**

Group investigation of selected topics. Topics will be announced in the *Schedule of Classes*. May be repeated for credit to a maximum of 9 units. (Seminar 1-3 hours.)

**490A. European Fashion Study Tour**

**490B. New York Fashion Study Tour**

**490C. Los Angeles Fashion Study Tour**

**492A. Internship in Child Development and Family Studies (3)**

Prerequisites: Student must be a Family and Consumer Sciences: Child Development and Family Studies major; have senior standing; have a 2.5 overall GPA or a 3.0 major GPA; approval of a faculty advisor in Child Development and Family Studies; and FCS 411, 413, and 414 or 415. Each prerequisite course must be completed with a grade of "C" or better. A course in which a grade lower than "C" is received must be retaken and successfully completed prior to enrolling in any course for which it is a prerequisite. A student receiving a grade lower than a "C" may proceed with other courses with approval of the Area Coordinator. Field experience of 120 hours in which the student assumes a pre-professional role in an agency, business or other community setting. Internship supervi-

sors monitor and evaluate student work based on preestablished criteria stated in the internship contract. The preestablished criteria in the contract consists of objectives developed by the student in consultation with the supervisor. The objectives and the placement site must be approved by the student's faculty advisor and the internship coordinator. Students evaluate the internship at the end of the experience. The course may be repeated for a maximum of six units. (Seminar 3 hours.)

#### **492B. Internship in Certified Family Life Educator (3)**

Prerequisites: Student must be a Family and Consumer Sciences: Child Development and Family Studies major; have senior standing; have a 2.5 overall GPA or a 3.0 major GPA; approval of a faculty advisor in Child Development and Family Studies; and FCS 319, 412, and 413. Each prerequisite course must be completed with a grade of "C" or better. A course in which a grade lower than "C" is received must be retaken and successfully completed prior to enrolling in any course for which it is a prerequisite. A student receiving a grade lower than a "C" may proceed with other courses with approval of the Area Coordinator. Field experience of 120 hours in which the student assumes a pre-professional role in an agency, business or other community setting. Internship supervisors monitor and evaluate student work based on preestablished criteria stated in the internship contract. The preestablished criteria in the contract consists of objectives developed by the student in consultation with the supervisor. The objectives and the placement site must be approved by the student's faculty advisor and the internship coordinator. Students evaluate the internship at the end of the experience. The course may be repeated for a maximum of six units. (Seminar 3 hours.)

#### **492C. Internship in Consumer Affairs (3)**

Prerequisites: Student must be a Family and Consumer Sciences: Consumer Affairs major; have senior standing; have a 2.5 overall GPA or a 3.0 major GPA; approval of a faculty advisor in Consumer Affairs; and FCS 321, 326, 422, 425, 429, or consent of instructor. Each prerequisite course must be completed with a grade of "C" or better. A course in which a grade lower than "C" is received must be retaken and successfully completed prior to enrolling in any course for which it is a prerequisite. A student receiving a grade lower than a "C" may proceed with other courses with approval of the Area Coordinator. Field experience of 120 hours in which the student assumes a pre-professional role in an agency, business or other community setting. Internship supervisors monitor and evaluate student work based on preestablished criteria stated in the internship contract. The preestablished criteria in the contract consists of objectives developed by the student in consultation with the supervisor. The objectives and the placement site must be approved by the student's faculty advisor and the internship coordinator. Students evaluate the internship at the end of the experience. The course may be repeated for a maximum of six units. (Seminar 3 hours.)

#### **492D. Internship in Family and Consumer Sciences Education (3)**

Prerequisites: Student must be a Family and Consumer Sciences Education major; have senior standing; have a 2.5 overall GPA or a 3.0 major GPA; approval of a Family and Consumer Sciences Education faculty advisor. Each prerequisite course must be completed with a grade of "C" or better. A course in which a grade lower than "C" is received must be retaken and successfully completed prior to enrolling in any course for which it is a prerequisite. A student receiving a grade lower than a "C" may proceed with other courses with approval of the Area Coordinator. Field experience of 120 hours in which the student assumes a pre-professional role in an agency, business or other community setting. Internship supervisors monitor and evaluate student work based on preestablished criteria stated in the internship contract. The preestablished criteria in the contract consists of objectives developed by the student in consultation with the supervisor. The objectives and the placement site must be approved by the student's faculty advisor and the internship coordinator. Students evaluate the internship at the end of the experience. The course may be repeated for a maximum of six units. (Seminar 3 hours.)

#### **492E. Internship in Fashion Merchandising (3)**

Prerequisites: Student must be a Family and Consumer Sciences: Fashion Merchandising major; have senior standing; have a 2.5 overall GPA or a 3.0 major GPA; approval of a faculty advisor in Apparel Design and Merchandising; and FCS 455 and 457. Each prerequisite course must be completed with a grade of "C" or better. A course in which a grade lower than "C" is received must be retaken and successfully completed prior to enrolling in any course for which it is a prerequisite. A student receiving a grade lower than a "C" may proceed with other courses with approval of the Area Coordinator. Field experience of 120 hours in which the student assumes a pre-professional role in an agency, business or other community setting. Internship supervisors monitor and evaluate student work based on preestablished criteria stated in the internship contract. The preestablished criteria in the contract consists of objectives developed by the student in consultation with the supervisor. The objectives and the placement site must be approved by the student's faculty advisor and the internship coordinator. Students evaluate the internship at the end of the experience. The course may be repeated for a maximum of six units. (Seminar 3 hours.)

#### **492F. Internship in Food Science (3)**

Prerequisites: Student must be a Family and Consumer Sciences: Food Science major; have senior standing; have a 2.5 overall GPA or a 3.0 major GPA; approval of a faculty advisor in Food Science; and FCS 331A and 332; FCS 432 is recommended. Each prerequisite course must be completed with a grade of "C" or better. A course in which a grade lower than "C" is received must be retaken and successfully completed prior to enrolling in any course for which it is a prerequisite. A student receiving a grade lower than a "C" may proceed with other courses with approval of the Area Coordinator. Field experience of 120 hours in which the student assumes a pre-professional role in an agency, business or other community setting. Internship supervisors monitor and evaluate student work based on preestablished criteria stated in the internship contract. The preestablished criteria in the contract consists of objectives developed by the student in consultation with the supervisor. The objectives and the placement site must be approved by the student's faculty advisor and the internship coordinator. Students evaluate the internship at the end of the experience. The course may be repeated for a maximum of six units. (Seminar 3 hours.)

#### **492G. Internship in Gerontology (3)**

Prerequisites: Student must be a Gerontology Certificate candidate; have senior standing; have a 2.5 overall GPA or a 3.0 major GPA; approval of the Gerontology program director; and GERN 4001, ANTH 454, PSY 365 or HDEV 3571. Each prerequisite course must be completed with a grade of "C" or better. A course in which a grade lower than "C" is received must be retaken and successfully completed prior to enrolling in any course for which it is a prerequisite. A student receiving a grade lower than a "C" may proceed with other courses with approval of the Area Coordinator. Field experience of 120 hours in which the student assumes a pre-professional role in an agency, business or other community setting. Internship supervisors monitor and evaluate student work based on preestablished criteria stated in the internship contract. The preestablished criteria in the contract consists of objectives developed by the student in consultation with the supervisor. The objectives and the placement site must be approved by the student's faculty advisor and the internship coordinator. Students evaluate the internship at the end of the experience. The course may be repeated for a maximum of six units. Same as GERN 492G. (Seminar 3 hours.)

#### **492J. Internship in Hospitality Foodservice and Hotel Management (3)**

Prerequisites: Student must be a Family and Consumer Sciences: Hospitality Foodservice and Hotel Management Major; have senior standing; have a 2.5 overall GPA or a 3.0 major GPA; approval of a faculty advisor in Hospitality Foodservice and Hotel Management; and FCS 275, 375 and 800 hours of approved work experience. Each prerequisite course must be completed with a grade of "C" or better. A course in which a grade lower than "C" is received must be retaken and successfully completed prior to enrolling in any course for which it is a prerequisite. A student receiving a grade lower than a "C" may proceed with other courses with approval of the Area Coordinator. Field experience of 120 hours in which the student assumes a pre-professional role in an agency, business or other community setting. Internship supervisors monitor and evaluate student work based on preestablished criteria stated in the internship contract. The preestablished criteria in the contract consists of objectives developed by the student in consultation with the supervisor.

The objectives and the placement site must be approved by the student's faculty advisor and the internship coordinator. Students evaluate the internship at the end of the experience. The course may be repeated for a maximum of six units. (Seminar 3 hours.)

#### **492K. Internship in Nutrition and Dietetics (3)**

Prerequisites: Student must be a Family and Consumer Sciences: Nutrition and Dietetics major; have senior standing; have a 2.5 overall GPA or a 3.0 major GPA; approval of a faculty advisor in Nutrition and Dietetics; and FCS 275, 331B and 332. Each prerequisite course must be completed with a grade of "C" or better. A course in which a grade lower than "C" is received must be retaken and successfully completed prior to enrolling in any course for which it is a prerequisite. A student receiving a grade lower than a "C" may proceed with other courses with approval of the Area Coordinator. Field experience of 120 hours in which the student assumes a pre-professional role in an agency, business or other community setting. Internship supervisors monitor and evaluate student work based on preestablished criteria stated in the internship contract. The preestablished criteria in the contract consists of objectives developed by the student in consultation with the supervisor. The objectives and the placement site must be approved by the student's faculty advisor and the internship coordinator. Students evaluate the internship at the end of the experience. The course may be repeated for a maximum of six units. (Seminar 3 hours.)

#### **492M. Internship in Textiles and Clothing (3)**

Prerequisites: Student must be a Family and Consumer Sciences: Textiles and Clothing major; have senior standing; have a 2.5 overall GPA or a 3.0 major GPA; approval of a faculty advisor in Apparel Design and Merchandising; and FCS 453 and 454. Each prerequisite course must be completed with a grade of "C" or better. A course in which a grade lower than "C" is received must be retaken and successfully completed prior to enrolling in any course for which it is a prerequisite. A student receiving a grade lower than a "C" may proceed with other courses with approval of the Area Coordinator. Field experience of 120 hours in which the student assumes a pre-professional role in an agency, business or other community setting. Internship supervisors monitor and evaluate student work based on preestablished criteria stated in the internship contract. The preestablished criteria in the contract consists of objectives developed by the student in consultation with the supervisor. The objectives and the placement site must be approved by the student's faculty advisor and the internship coordinator. Students evaluate the internship at the end of the experience. The course may be repeated for a maximum of six units. (Seminar 3 hours.)

#### **497. Directed Studies (1-3)**

Prerequisites: Upper class standing, consent of instructor. Independent study under the supervision of a faculty member. Exploration and experience in areas which are not a part of any regular course. May be repeated for a maximum of six units.

#### **499. Perspectives in Family and Consumer Sciences (2)**

Prerequisites: FCS 299, 321, 12 units of upper division coursework in Family and Consumer Sciences completed prior to enrollment. Must be taken in one of the last two semesters prior to graduation. Analysis of contemporary issues, public policies and future directions of family and consumer sciences as a discipline of study and as a profession with integrated specializations will be undertaken. A culminating outreach project is developed to emphasize the contribution of each specialization to the quality of life for individuals and families in an urban setting. (Lecture-discussion 2 hours.)

### **Graduate Courses**

#### **502./402. Child and Family Law (3)**

Prerequisites: FCS 312I and upper division standing. Establishment, conduct, and termination of family relationships as well as the rights and duties of parties to non-marital family relationships will be examined. Topics include, the "Best Interest of the Child Rule," artificial insemination, property rights, adoption, child custody, domestic violence, support of children, spousal support, genetic testing, new trends in family law, and paternity. Traditional grading only. (Lecture-discussion 3 hours.)

#### **511. Family Theories (3)**

Prerequisite: FCS 412 or 413 or consent of instructor. Theoretical approaches to the study of the family; analysis of the process of interaction between the individual, the family and society with emphasis on current issues. (Seminar 3 hours.)

#### **515. Perspectives in Human Development (3)**

Prerequisite: FCS 411 or consent of instructor. Theory, trends and research toward maximum development of human potential as it applies to children in the family and community. (Seminar 3 hours.)

#### **520./420. Personal Finance for the Aging (3)**

Prerequisites: 400-level course in Consumer Affairs or consent of instructor. Provides an understanding of the operations of personal finance as applied to the aging population. Topics include public and private sources of income, living expense, public and private sources of assistance, personal budget systems, financial planning, legal rights of the aged affecting their personal finances, and financial counseling for the aging. Same course as GERN 520/420. (Lecture-discussion 3 hours.)

#### **529./429. Consumer Protection (3)**

Prerequisites: Upper Division course in consumer affairs or consent of instructor. Concepts of consumer protection with analysis of a myriad of resources available for individuals and families with consumer problems. (Seminar 3 hours.)

#### **530A. Carbohydrates, Lipids and Proteins (3)**

Prerequisites: FCS 436, 436L, BIOL 260. Nutritional, metabolic and clinical aspects of carbohydrates, lipids and proteins. Current knowledge of interactions between macronutrients and assessment of needs. Traditional grading only. (Seminar 3 hours.)

#### **530B. Vitamins and Minerals (3)**

Prerequisites: FCS 436, 436L, BIOL 260. Nutritional, metabolic and clinical aspects of vitamins and minerals. Current knowledge of interactions between micro- and macro-nutrients. Principles of nutritional status assessment and determination of needs. Traditional grading only. (Seminar 3 hours.)

#### **531. Advanced Community Nutrition (3)**

Prerequisites: FCS 436 and 436L or 562; 461. Program planning and evaluation with emphasis on major nutrition-related public health problems. Students develop protocols for nutrition questionnaires, define a study sample and collect data. Skill development involves data analyses on computerized statistical packages, verbal and written communications. (Lecture-discussion 3 hours.)

#### **532./432. Food Analysis (3)**

Prerequisites: CHEM 327, FCS 332 or equivalent. Application of scientific methods of food analysis. Consideration of the manner in which such variables as ingredients, proportions, and techniques in food preparation affect the quality of products. Experimental laboratory problems. (Lecture-discussion 2 hours, Laboratory 3 hours.) Course fee required.

#### **533. Recent Advances in Food Science (3)**

Prerequisites: FCS 432 or consent of instructor. New developments in food processing, techniques of food preservation, chemical additives. Food and water sanitation. Methods of standardization, preservation, and evaluation of quality. Retention of nutritive value, flavor, appearance, and safety of foods. (Lecture-discussion 3 hours.)

#### **535./435. Food Processing, Preservation and Packaging (3)**

Prerequisites: FCS 332 or consent of instructor. Methods and technological aspects in food processing, preservation and packaging. Application of principles and assessment of nutritional and physical qualities. Evaluation of chemical additives in food products. Microbiological aspects of food safety and food plant sanitation. (Lecture-discussion 2 hours, Laboratory 3 hours.)

#### **550. Cultural Bases of Textile and Apparel Design (3)**

Prerequisites: FCS 353, 450, 456, 457 or equivalents or consent of instructor. Factors influencing design and techniques of textile and apparel production in societies that create and use them. Symbolism of indigenous and adapted textile and clothing designs as a communicative device for expressing social and cultural values. Course may be repeated to a maximum of six (6) units with assignments of increasing levels of difficulty. (Seminar 3 hours.)

**559. Apparel Behavior (3)**

Prerequisites: Admission to the Apparel Design and Merchandising emphasis in the Family and Consumer Sciences graduate program or consent of instructor. Psychological and sociological influences on the selection of professional and personal apparel. (Seminar 3 hrs)

**561. Curriculum Development in Family and Consumer Sciences (3)**

Prerequisite: Field experience in Home Economics, Family and Consumer Sciences or a related area. Current philosophies and principles basic in the analysis and organization of curricular programs and materials. (Seminar 3 hours.)

**562. Contemporary Issues in Nutrition (3)**

Prerequisite: FCS 436 or consent of instructor. Analysis of recent developments and current research in human nutrition. Topics include: nutrition through the life cycle; diet and dental health, athletic performance, human behavior, obesity, cancer; vegetarianism; practical application of scientific knowledge to diet management. (Seminar 3 hours.)

**563. Evaluation in Family and Consumer Sciences (3)**

Prerequisites: Upper division course in research methods (preferably FCS 696) and upper division course in statistics, or consent of instructor. Principles, design, and methods of evaluation for use by professional family and consumer scientists. Selection and development of instrumentation for data collection and interpretation, methods of reporting for purposes of accountability. (Seminar 3 hours.) Traditional grading only. Same course as GERN 563.

**564./464. Sensory Analysis of Foods (3)**

Prerequisites: FCS 332, BIOL 260 or equivalent statistics; consent of instructor. Principles and methods of analysis of sensory attributes. Applications, advantages and limitations of sensory methods using trained judges and consumer panels. Computer use of statistical data analysis and plotting. Statistical analysis, data interpretation and comparison with previous literature. (Discussion 2 hours, Laboratory 3 hours.) Course fee required.

**566./466. Biochemical and Hormonal Adaptations to Physical Activity (3)**

Prerequisites: Upper-division undergraduate or Graduate standing; KPE 301 or equivalent; CHEM 111A or its equivalent. Consent of instructor required for upper-division undergraduate students prior to registration. Study of the biochemical and hormonal changes that occur as a result of acute and chronic physical activity. Emphasis will be placed on the application of concepts to the development of exercise training programs. Upper-division undergraduate students register in FCS 466; graduate students register in FCS 566. Traditional grading only. Same course as KPE 566./466. (Seminar 3 hours.)

**574./474. Cost Control in Hospitality Food Service and Hotel Management (3)**

Prerequisites: FCS 375 or consent of instructor. Financial management, including control of food, labor, supplies, equipment and other operational costs; principles and procedures used for controlling purchasing, receiving, storing, and issuing of food, beverage, and supplies; factors affecting quality and customer satisfaction; inventory and security management; utilization of computers in cost control; and analysis of financial reports in the hospitality food service and hotel industry. (Lecture - discussion 3 hours.) Miscellaneous course fee: \$25.00

**591A. Professional Practicum in Dietetics (11)**

Prerequisites: FCS 531, 533, 562, admission to the American Dietetic Association (ADA) Dietetic Internship (DI) and consent of instructor. Supervised on-site practicum in selected field settings preparing the student to meet performance requirements to qualify for the dietetic registration examination. A total of 22 units of FCS 591A are required to completion of the AP4, with a maximum of 11 units per semester. Not applicable toward the M.S. degree in Nutritional Science. Course may be repeated for a maximum of 22 units. (Clinical Practice.)

**591B. Seminar in Dietetic Practice (1)**

Concurrent enrollment in FCS 591A. Oral and written presentations, critical review of case studies and practices in the American

Dietetic Association (ADA) Dietetic Internship (DI) field experience, FCS 591A Professional Practicum in Dietetics. A maximum of 2 units applicable to the M.S. degree in Nutritional Science. Traditional grading only. Course may be repeated for a maximum of 2 units. (Seminar 1 hour.)

**592. Internship in Family & Consumer Sciences/Gerontology (3)**

Prerequisites: Graduate standing and consent of instructor. Field experience in which student assumes a self directed responsible role in an agency, business or other community setting. May be repeated to a maximum of six units. Same course as GERN 592. (Seminar 3 hours.)

**597. Independent Study (1-3)**

Prerequisites: FCS 400 level course in area of study. Varied learning activities utilized to achieve competency related to family and consumer sciences not offered in regular course. Written report required. (Projects.)

**605. Seminar in Administration of Family & Consumer Sciences/Gerontology Programs (3)**

Prerequisites: FCS 696 or GERN 696 or consent of instructor. Application of administration, management and leadership theories to family and consumer sciences/gerontology programs. Concepts include structure of organizations, leadership styles, management techniques, methods of analyzing and evaluating business systems, management philosophies and performance evaluation procedures. Activities and assignments focus on organization theory, planning, decision making and control techniques, in relation to leadership and management skills needed for success as a family and consumer sciences/gerontology administrator. Same course as GERN 600. (Seminar 3 hours.)

**615A. Seminar in Child Development (3)**

Prerequisites: FCS 511 or 515, 696 or consent of instructor. Area of study will be announced in the *Schedule of Classes*. (Seminar 3 hours.)

**615B. Seminar in Family Dynamics (3)**

Prerequisites: FCS 511 or 515, 696 or consent of instructor. Area of study will be announced in the *Schedule of Classes*. (Seminar 3 hours.)

**635. Seminar in Food Science, Nutrition and Foodservice Systems Management (2)**

Prerequisite: Graduate standing. Presentation and description of advanced work in special fields of food science, nutrition therapy, foodservice systems management. Traditional grading only. (Seminar 2 hours.)

**655A. Literature Review and Research in Family and Consumer Sciences (3)**

Prerequisites: ED P 419. Critical analyses of the current professional literature, theory, practice and research. The research process including conceptualization of the problem, literature search and review. The legal and ethical aspects of research are stressed. (Seminar 3 hours) Traditional grading only.

**655B. Apparel Product Development (3)**

Prerequisites: ED P 419, FCS 655A and 696. An introduction to the research and strategies needed to develop apparel products and services for culturally diverse consumer markets. (Seminar 3 hours.)

**696. Research Methods (3)**

Prerequisite: Upper-division course in statistics (may be taken concurrently). Problems in family and consumer sciences with emphasis on the methods of research and use of the library. Required of all master's degree candidates in family and consumer sciences. (Seminar 3 hours.)

**697. Directed Research (3)**

Prerequisites: Advancement to candidacy. Student works under direct faculty supervision to complete a proposal for the thesis or directed project (thesis).

**698. Thesis (1-4)**

Prerequisites: Advancement to candidacy, approval of department graduate committee. Planning, preparation and completion of a thesis related to the family and consumer sciences field. (Thesis.)

# FEES

## Average Annual Cost of Education and Sources of Funds Per Full-Time Equivalent Student

The 23 campuses and the Chancellor's Office of the California State University are financed primarily through funding provided by the taxpayers of California. The systemwide cost of education is defined as total support expenditures (State University Fee revenue and General Fund support appropriations) divided by the number of full-time equivalent students. The total 2001/02 state General Fund appropriation to the CSU (not including capital outlay funding in the amount of \$225,000,000) is \$2,607,425,000 and campus budgeted State University Fee Revenue is \$509,417,000 for a total of \$3,116,842,000. The \$3,116,842,000 total cost of education for the CSU must provide support for a projected 305,854 full-time equivalent students (FTES). The number of full-time equivalent students is determined by dividing the total academic student load by 15 units per term (the figure used here to define a full-time student's academic load).

The 2001/02 systemwide cost of education per full-time equivalent student is \$10,191. Of this amount, the average student fee support per FTE is \$1,876. (The State University Fee, and campus fees that must be paid to apply to, enroll in, or attend the university are included in the average costs paid by the students. Individual students may pay less or more than \$1,876, depending on the campus and whether the student is attending part-time/full-time, or is a resident/nonresident student. Also, other campus fees may be charged that are not required of all enrolled students, which include user and penalty/deposit fee types.)

	Amount	Avg Cost per FTE Student	%
Total Cost of Education	\$3,116,842,000	\$10,191	100.0
• State Appropriation	2,607,425,000	8,525	84.0
• Student Fee Support	509,417,000	1,666	16.0

## Schedule of Fees 2001-2002

Legal residents of California are not charged tuition. The following reflects applicable systemwide fees and nonresident tuition for the semester system in which CSULB operates. The following fees represent Fall 2001 and Spring 2002 semesters. (Fees are subject to change without notice.)

Students who wish to drop units AND to simultaneously or subsequently add the same number of units to accomplish this exchange may do so without financial penalty in State University Fees, provided this exchange in units meets all other signature requirements. This activity may not occur later than 14 days following the day of the term when instruction begins, which is the normal refund deadline date.

## Procedure for the Establishment or Abolishment of a Student Body Fee

The law governing the California State University provides that fees defined as mandatory, such as a student body association fee and a student body center fee, may be established. A student body association fee must be established upon a favorable vote to two-thirds of the students voting in an election held for this purpose (Education Code Section 89300). A student body center fee may be established only after a fee referendum is held which approves by a two-thirds favorable vote the establishment of the fee (Education Code Section 89304). The student body fee was established at CSULB by student referendum on April 7, 2000. The campus President may adjust the student body association fee only after the fee adjustment has been approved by a majority of students voting in a referendum established for that purpose (Education Code Section 89300). The required fee shall be subject to referendum at any time upon the presentation of a petition to the campus president containing the signatures of 10 percent of the regularly enrolled students at the University. Once bonds are issued, authority to set and adjust student body center fees is governed by provisions of the State University Revenue Bond Act of 1947, including, but not limited to Education Code Sections 90012, 90027, and 90068. Student body fees support a variety of cultural and recreational programs child care centers, and special student support programs.

The process to establish and adjust other campus-based mandatory fees requires consideration by the campus fee advisory committee and a student referendum. The campus President may use alternate consultation mechanisms if he/she determines that a referendum is not the best mechanism to achieve appropriate and meaningful consultation. Results of the referendum and the fee committee review are advisory to the campus President. The President may also request the Chancellor to establish the mandatory fee. Authority to adjust fees after consideration by the campus fee advisory committee and the completion of a student referendum is delegated to the President.

## All Students

Application Fee (nonrefundable), payable by check or money order at time application is made: \$55.00

### Undergraduates

#### State University Fee (per semester)

0.1 units to 6.0 units .....	\$414.00
6.1 units or more .....	\$714.00

#### Other Mandatory Activity Fees (per semester)

Facilities Fee .....	\$3.00
Instructionally Related Activities Fee (IRA) .....	\$25.00
Associated Students Inc. Fee .....	\$44.00
University Student Union Fee .....	\$50.00
Student ID Card .....	\$1.00
Student Health Services Fee .....	\$35.00
<b>Total Resident Fees Per Semester</b>	
0.1 to 6.0 units .....	\$572.00
<b>Total Resident Fees Per Semester</b>	
6.1 or more units .....	\$872.00

## Graduates

### State University Fee (per semester)

0.1 units to 6.0 units .....	\$438.00
6.1 units or more .....	\$753.00

### Other Mandatory Activity Fees (per semester)

Facilities Fee .....	\$3.00
Instructionally Related Activities Fee (IRA) .....	\$25.00
Associated Students Inc. Fee .....	\$44.00
University Student Union Fee .....	\$50.00
Student ID Card .....	\$1.00
Student Health Services Fee .....	\$35.00
Total Resident Fees Per Semester	
0.1 to 6.0 units .....	\$596.00
Total Resident Fees Per Semester	
6.1 or more units .....	\$911.00

Systemwide mandatory fees are waived for those individuals who qualify for such exemption under the provisions of the Alan Pattee Scholarship Act Ed Code, Section 68120. Systemwide mandatory fees are waived for those individuals who qualify for such exemption under the provision of Education Code, Section 32320 (Children of deceased disabled veterans).

## Nonresident Students (U.S. and Foreign) Tuition

Non-Resident Tuition is charged to all U.S. non-California residents and Foreign students. Tuition is \$246.00 per unit, in addition to applicable State University and Other Mandatory Fees. (Tuition is subject to change by State Legislative action without notice.)

The total fee paid per term is determined by the total number of units taken, including those in excess of fifteen units.

No fees of any kind will be required of or collected from those individuals who qualify for such exemption under the provisions of the Alan Pattee Scholarship Act.

## Optional Fees (per semester)

The following represents rates for the Fall 2001 and Spring 2002 semesters and are subject to change.

Motorcycle and Moped Parking (per semester) .....	\$15.75
Automobile Parking (per semester) .....	\$63.00
Replacement Parking Permit .....	Full Price

## Other Fees and Charges (non-refundable)

Late Registration .....	\$25.00
Application and Reapplication Fee .....	\$55.00
Diploma/Commencement Fee .....	\$30.00
Missed Deadline Fee .....	\$10.00
Dishonored Check Charge .....	\$20.00
(If the Dishonored Check was for payment of registration fees, the Late Registration Fee may also apply)	
Disputed Credit Card Charge .....	\$10.00
Complete transcript of record .....	\$4.00
Replacement of Student ID Card .....	\$5.00

REMINDER: Fees are Subject to Change Without Advance Notice

Payment of State University Fee, other mandatory activity fees (as detailed earlier in this section under "All Students") and any other obligations must be paid prior to registration.

## Credit Cards

Credit Card Payments - VISA or MASTERCARD - ONLY

Payment of student fees can be accepted at:

1. U-ASK - University Automated Student Kiosk. (Various locations on Campus.)
2. C-CAPS - Credit Card Authorization/Payment System. Telephone number is (562) 985-7300. Hours are Monday - Friday, 7:00 AM - 10:00 PM Saturdays when VRR is available.

You can only pay for the following fees using U-ASK or C-CAPS: Registration Fees, Non-Resident Tuition, Financial Obligations (ie: Fines, breakage, etc.), Student Parking (Auto & Motorcycle). For all other payments by credit card, you must go to the cashier windows located at Brotman Hall (BH) 148

3. Cashier's Office, BH 148

Hours are Monday - Thursday, 9:00 AM - 7:00 PM  
Friday, 9:00 AM - 5:00 PM

NOTE: Office closes at 5:00 p.m. during Spring Recess, Winter Recess and Summer Break.

Credit card payments are not accepted through the U.S. Mail, or at the Business Office.

Please have the following ready when using U-ASK or C-CAPS:

1. Student Identification Number (Social Security Number).
2. Student Personal Identification Number (PIN).
3. Credit Card Number.
4. Credit Card Expiration Date.

Your Credit Card statement is your receipt.

For a receipt send a self-addressed, stamped envelope Attention: Student Account Services, CSULB, 1250 Bellflower Blvd., Long Beach, CA 90840-0103.

Payment of registration fees CANNOT be made if the following exist on your account:

1. Unpaid Housing Balance - contact the Housing Office to clear problems.
2. Holds for any outstanding obligations.
3. Disputed credit card charges.

[Contact the Student Account Services Office for information. (562) 985-8280.]

## Short Term Loans

A limited number of short term loans for assistance in paying registration fees, books, or authorized emergencies are available to qualified students on a first come, first served basis. Information about this program is available at BH 155, Student Account Services or BH 148, Window #10. Recorded Information is available by calling (562) 985-8258.

## Installment Payment Plan

The Installment Payment Plan is available to all eligible students except financial aid recipients who have sufficient funds to cover the State University Fee. A \$33 non-refundable charge is assessed to defer the administrative costs of the program. A 9% service charge is assessed to the deferred balance for non-resident tuition and international Visa students. An Installment Plan Contract must be obtained from the Student Account Services, BH 155 before submitting payment.

## Auditors

Students enrolled as auditors, not for credit, are exempt from payment of the application fee, but must pay fees appropriate to the number of units taken.

## Refund of Fees Including Nonresident Tuition

Regulations governing the refund of mandatory fees, including nonresident tuition, for students enrolling at the California State University are included in Section 41802 of Title 5, *California Code of Regulations*. For purposes of the refund policy, mandatory fees are defined as those system-wide fees and campus fees that are required to be paid in order to enroll in state-support programs at the California State University (courses offered through extended education) are governed by a separate policy established by the university.

In order to receive a full refund of mandatory fees, including nonresident tuition, a student must cancel registration or drop all courses prior to the first day of instruction for the term. Information on procedures and deadlines for canceling registration and dropping classes is available in the *Schedule of Classes*.)

For state-supported semesters, quarters, and non-standard terms or courses of four (4) weeks or more, a student who withdraws during the term in accordance with the university's established procedures will receive a refund of mandatory fees, including nonresident tuition, based on the portion of the term during which the student was enrolled. No student withdrawing after the 60 percent point in the term will be entitled to a refund of any mandatory fees or nonresident tuition.

For state-supported semesters, quarters, and non-standard terms or courses of less than four (4) weeks, no refunds of mandatory fees and nonresident tuition will be made unless a student cancels registration or drops all classes prior to the first day in accordance with the university's established procedures and deadlines.

Students will also receive a refund of mandatory fees, including nonresident tuition under the following circumstances:

- The tuition and mandatory fees were assessed or collected in error;
- The course for which the tuition and mandatory fees were assessed or collected was cancelled by the university;
- The university makes a delayed decision that the student was not eligible to enroll in the term for which mandatory fees were assessed and collected and the delayed decision was not due to incomplete or inaccurate information provided by the student; or
- The student was activated for compulsory military service.

Students who are not entitled to a refund as described above may petition the university for a refund demonstrating exceptional circumstances and the chief financial officer of the university or designee may authorize a refund if he or she determines that the fees and tuition were not earned by the university.

Information concerning any aspect of the refund of fees may be obtained from Student Account Services Office.

## Refunds of Registration and Tuition Fees

Details regarding Registration and Tuition Fee Refunds may be found in the *Schedule of Classes*. As this information may differ from one semester to another, students are advised to refer to the *Schedule of Classes* for that particular semester. Students must complete the class drop or withdrawal process prior to becoming eligible for any credit of fees. The amount to be refunded is determined by the effective withdrawal or drop date. In addition, any other outstanding financial obligations that the student may have incurred will be deducted from any credits due to the student before a refund is processed. Refund deadlines are reflected in the *Schedule of Classes*. A processing fee will be withheld from the refunds.

Details regarding refunds due to Medical Withdrawals can be found in the *Schedule of Classes*.

Further details regarding fees that may be refunded and the circumstances under which they may be refunded may be obtained by consulting the *California Code of Regulations*, Title V, in the following sections:

- Registration and Tuition Fees – Section 41802
- Parking Fees – Section 42201
- Housing Fees – Section 42019

The following fees are non-refundable: Late Fees, Application Fees, Disputed Credit Card Fees, Dishonored Check Fees, Student I.D. Card Replacement Fees

## Special Circumstances Refunds

There are two levels of financial appeals. They are as follows:

### I. Request for Refunds After Published Deadlines:

Students who withdraw or drop in units after the deadlines detailed in the *Schedule of Classes* have passed, may appeal for a Special Circumstances Refund based on the following:

1. Campus Variation
2. Compulsory Military Service
3. Death of Student
4. Fees Collected in error

Further information regarding Special Circumstances Refunds may be obtained from the current semester's *Schedule of Classes* or by calling the Student Account Services Office at (562) 985-8280.

### II. Financial Appeals Independent Review Committee (F.A.I.R.)

If a student wishes to petition the decision made at the first appeal level, a written request must be submitted to the F.A.I.R. Committee (BH 155) for review.

This Committee has been approved by the President as the final financial appeal level. It consists of representatives from various University Offices. F.A.I.R. will only review appeals for the current academic year.

## Tax Credits for Higher Education

The Taxpayer Relief Act of 1997 encourages postsecondary and continuing education by providing tax benefits to students and their families. Taxpayers can claim one, or in some cases, two of these new tax credits for expenses they pay for postsecondary education for themselves and their dependent children. These tax credits can directly reduce the amount of federal income tax for returns filed.

The Hope Scholarship Credit is available on a per-student basis for the first two years of postsecondary education. The maximum credit is \$1,500 and will increase for inflation after 2001. It will be offered to students or parents who pay tuition and related expenses for attendance at least half-time in a degree-granting program.

The Lifetime Learning Credit provides a tax credit to parents and/or students of up to 20% of the first \$5,000 of total annual educational expenses. This maximum will increase for inflation starting in 2003.

Education expenses that are paid with tax-free grants, scholarships, and employer-education assistance are not eligible for either tax credit. Education expenses paid with loans are eligible for these tax credits. Interest paid on qualified student loans may also be deductible from taxpayer income. Interest can be taken as a deduction during the first 60 months (5 years) of repayment on student loan.

To assist you in taking advantage of these tax credits, the University will provide you with the following information:

- Form 1098T (Tuition Payments Statement) - This form must be submitted along with your federal tax return to claim these credits.
- Form W-9S (Request for Student's or Borrower's Social Security Number and Certification). This form should be completed and returned to the University, if your social security number is incorrect.
- An 800 phone Hot Line to assist you with your inquiries.
- The website is <http://www.tra97.com>

Either your lender or loan servicer will provide interest deduction information to you. Those eligible will be provided with a 1098E form, which must be submitted along with your federal tax return to claim this deduction.

NOTE: The information described above, and the information available via the Hot Line regarding the new tax benefits, is in general terms. Your ability to claim these tax benefits depends on your individual circumstances. We recommend that you consult a tax advisor to determine your personal eligibility.

### Parking Fee

Parking at CSULB is limited. Parking permits are required 24 hours a day, Monday through Friday, and the vehicle code is enforced at all times. Please contact the Parking Office (562) 985-4146 for additional information.

To request a partial or full refund, attach all parking documents, permits stickers, decals and gate cards to the refund application and return to Student Financial Services, Window #10, Brotman Hall 148. Refer to the *Schedule of Classes* for deadline information. If parking documents are not available or have not been received, students MUST contact the Parking Administration Office located on Merriam Way adjacent to the parking structure. If any of these parking documents are affixed to the vehicle, their removal by a campus security officer or under the officer's direction, shall constitute appropriate return. Attach all parking documents, permits stickers, decals and gate cards to the refund application and return to Student Financial Services, BH 148 Window #10. There shall be no refund if such amount is less than \$5.

There shall be no refund for:

1. Coin operated parking meters.
2. Daily permits for coin operated parking gates.
3. Special events.
4. Fees paid by monthly payroll deductions.

### Determination of Residence for Nonresident Tuition Purposes

The campus Office of Enrollment Services is responsible for determining the residence status of all new and returning students for nonresident tuition purposes. Responses to the Application for Admission, Residency Questionnaire, and Reclassification Request Form, and, as necessary, other evidence furnished by the student are used in making this determination. A student who fails to submit adequate information to establish eligibility for resident classification will be classified as a nonresident.

The following statement of the rules regarding residency determination for nonresident tuition purposes is not a complete discussion of the law, but a summary of the principal rules and their exceptions. The law governing residence for tuition purposes by The California State University is found in *California Education Code*, Sections 68000-68084, 68120-68134, and 89705-89707.5, and *California Code of Regulations*, Title 5, Sections 41900-41916. A copy of the statutes and regulations is available for inspection at the campus Admissions Office or can be viewed on the Internet by accessing the California State University's website at [www.calstate.edu](http://www.calstate.edu).

Legal residence may be established by an adult who is physically present in the state and who, at the same time, intends to make California his or her permanent home. Steps must be taken at least one year prior to residence determination date to show an intent to make California the permanent home with concurrent relinquishment of the prior legal residence. The steps necessary to show California residency intent will vary from case to case. Included among the steps may be registering to vote and voting in elections in California; filing resident California state income tax forms on total income; ownership of residential property or continuous occupancy or renting of an apartment on a lease basis where one's permanent belongings are kept; maintaining active resident memberships in California professional or social organizations; maintaining California vehicle plates and operator's license; maintaining active savings and checking accounts in California banks; maintaining permanent military address and home of record in California if one is in the military service.

The student who is within the state for educational purposes only does not gain the status of resident regardless of the length of the student's stay in California.

In general, an unmarried minor (a person under 18 years of age) derives legal residence from the parent with whom the minor maintains or last maintained his or her place of abode. The residence of an unmarried minor who has a parent living cannot be changed by the minor's own act, by the appointment of a legal guardian or by the relinquishment of a parent's right of control.

A married person may establish his or her residence independent of his or her spouse.

An alien may establish his or her residence, unless precluded by the Immigration and Nationality Act from establishing domicile in the United States. An unmarried minor alien derives his or her residence from the parent with whom the minor maintains or last maintained his or her place of abode.

Nonresident students seeking reclassification are required to complete a supplemental questionnaire including questions concerning their financial dependence, which will be considered along with physical presence and intent in determining reclassification.

The general rule is that a student must have been a California resident for at least one year immediately preceding the residence determination date in order to qualify as a "resident student" for tuition purposes. A residence determination date is set for each academic term and is the date from which residence is determined for that term. The residence determination dates are: Fall – September 20; Spring – January 25; Summer – June 1.

There are exceptions from nonresident tuition including:

1. Persons below the age of 19 whose parents were residents of California but who left the state while the student, who remained, was still a minor. When the minor reaches age 18, the exception continues until the student has resided in the state the minimum time necessary to become a resident;
2. Minors who have been present in California with the intent of acquiring residence for more than a year before the residence determination date, and entirely self-supporting for that period of time. The exception continues until the student has resided in the state the minimum time necessary to become a resident;
3. Persons below the age of 19 who have lived with and been under the continuous direct care and control of an adult or adults, not a parent, for the two years immediately preceding the residence determination date. Such adult must have been a California resident for the most recent year. The exception continues until the student has resided in the state the minimum time necessary to become a resident.;
4. Dependent children and spouse of persons in active military service stationed in California on the residence determination date. There is no time limitation on this exception unless the military person transfers out of California or retires from military service. If either of those events happen, the student's eligibility for this exception continues until he or she resides in the state the minimum time necessary to become a resident;
5. Military personnel in active service stationed in California on the residence determination date for purposes other than education at state-supported institutions of higher education. Effective January 1, 1994, this exception continues until the military personnel has resided in the state the minimum time necessary to become a resident.
6. Military personnel in active service in California for more than one year immediately prior to being discharged from the military. Eligibility for this exception runs from the date the student is discharged from the military until the student has resided in state the minimum time necessary to become a resident.
7. Dependent children of a parent who has been a California resident for the most recent year. This exception continues until the student has resided in the state the minimum time necessary to become a resident, so long as continuous residence is maintained at an institution.
8. Graduates of any school located in California that is operated by the United States Bureau of Indian Affairs, including, but not limited to, the Sherman Indian High School. The exception continues so long as continuous attendance is maintained by the student at an institution.
9. Certain credentialed, full-time employees of California school districts;
10. Full-time State University employees and their children and spouses; State employees assigned to work outside the State and their children and spouses. This exception continues until the student has resided in the state the minimum time necessary to become a California resident;
11. Children of deceased public law enforcement or fire suppression employees who were California residents and who were killed in the course of law enforcement or fire suppression duties;
12. Certain amateur student athletes in training at the United States Olympic Training Center in Chula Vista, California. This exception continues until the student has resided in the state the minimum time necessary to become a resident;
13. Federal civil service employees and their natural or adopted dependent children if the employee has moved to California as a result of a military mission realignment action that involves the relocation of least 100 employees. This exception continues until the student has resided in the state the minimum time necessary to become a resident;
14. State government legislative or executive fellowship program enrollees. The student ceases to be eligible for this exception when he or she is no longer enrolled in the qualifying fellowship.

A campus residence classification appeal must be in writing and submitted to The California State University, Office of General Counsel, 401 Golden Shore, 4th Floor, Long Beach, California 90802-4210, within 120 calendar days of notification of the final campus decision. The Office of General Counsel can either decide the appeal or send the matter back to the campus for further review.

Students incorrectly classified as residents or incorrectly granted an exception from nonresident tuition are subject to reclassification as nonresidents and payment of nonresident tuition in arrears. If incorrect classification results from false or concealed facts, the student is subject to discipline pursuant to Section 41301 of Title 5 of the *California Code of Regulations*. Resident students who become nonresidents, or who no longer meet the criteria for an exception, and nonresident students qualifying for exceptions whose basis for so qualifying changes, must immediately notify the Admissions Office. Applications for a change in classification with respect to a previous term are not accepted.

The student is cautioned that this summation of rules regarding residency determination is by no means a complete explanation of their meaning. The student should also

note that changes may have been made in the rate of non-resident tuition, in the statutes, and in the regulations between the time this catalog is published and the relevant residence determination date.

Changes in residency for tuition purposes are not automatic. Students wishing to apply for residence reclassification may submit a form and supporting documents from October 1 to November 1 for Spring semester, and from April 1 to May 1 for the Fall and semesters.

Exceptions from nonresident tuition are valid for one semester only. Students must reapply for an exemption each semester. Forms are located at the Office of Enrollment Services, BH 101.

### Fees and Debts Owed to the Institution

Should a student or former student fail to pay a fee or a debt owed to the institution, the institution may "withhold permission to register, to use facilities for which a fee is authorized to be charged, to receive services, materials, food or merchandise or any combination of the above from any person owing a debt" until the debt is paid (see Title 5, *California Code of Regulations*, Sections 42380 and 42381).

Prospective students who register for courses offered by the university are obligated for the payment of fees associated with registration for those courses. Failure to cancel registration in any course for an academic term prior to the first day of the academic term gives rise to an obligation to pay student fees including any tuition for the reservation of space in the course.

The institution may withhold permission to register or to receive official transcripts of grades or other services offered by the institution from anyone owing fees or another debt to the institution. If a person believes he or she does not owe all or part of an asserted unpaid obligation, that person may contact the Student Account Services Office. The Student Account Services Office, or another office on campus to which the Student Account Services Office may refer the person, will review all pertinent information provided by the person and available to the campus and will advise the person of its conclusions.

### Financial Obligations and Holds

Other University offices, including but not limited to the Library, may request that a student reimburse the University for an item that was not returned, returned late or damaged; or they may impose other charges. The requesting office may ask the Student Account Services Office to post this charge to the student's account. Once posted it becomes an obligation to the student. Student Account Services will be able to provide general information concerning obligations. The student will be directed to the appropriate department in which to inquire about the obligation. Until all obligations are paid, or a written release from the originating office is received by the Student Account Services Office, a financial hold will be placed on academic records and the student is restricted from receiving University services, including but not limited to registration, grades, and transcripts. If the obligation continues to appear on the University reports, the student's name will be submitted to the Franchise Tax Board. In this case, the student or former student, permanently loses the privilege of submitting

checks as payment for fees or services. (Acceptable methods of payment are cash, cashiers' check or money order). The State then has the authority to withhold amounts owed to the University from any tax refund to which the student may be entitled.

To pay your balance due — Cashier's Office, BH 148.

For information regarding the amount due — Student Financial Services, BH 148, Window #10, or call Student Account Services at (562) 985-8280.

- EPT, ELM and WPE — For information, refer to your *Schedule of Classes*. For further information, contact the Testing and Evaluation Services (562) 985-4006
- Perkins Loans — Business Office, BH 155, (562) 985-5348
- Measles — Student Health Services, (562) 985-4771
- VISA hold (Foreign Clearance) — CIE, BH 201, (562) 985-4106

### Dishonored Checks

Students paying fees by personal check are hereby given notice that if the unpaid check is returned dishonored to the University FOR ANY REASON, a \$20.00 fee is charged to the student's account. The University has no control whether the bank sends checks through a second time for clearing. The check should be honored upon first presentation to the bank.

In compliance with *California Code of Regulations*, Title V, Section 42381, students with dishonored checks may be disenrolled from classes and may be required to reapply for admission to the University. Also, future services including, but not limited to, transcripts, grades, and future registration may be withheld.

Dishonored checks are monitored in the student's record. Any student with a record of two (2) dishonored checks will lose check writing privileges with the University and future payments by personal check will not be accepted.

### Disputed Credit Card Charge

Students are strongly encouraged to contact the Student Financial Services Window #10 (BH 148), or call Student Account Services at (562) 985-8280, before disputing a credit card charge through the bank. Upon receipt of a disputed credit card charge, the amount of the credit card charge plus a \$10.00 fee becomes the STUDENT'S financial obligation to the University. Payment of Registration fees with a credit card charge which has later been disputed may result in disenrollment and in withholding of future University services including, but not limited to, transcripts, grades, and future registration (*California Code of Regulations*, Title V, Section 42381). Students who are disenrolled may be required to reapply for admission to the University.

# FINANCIAL ASSISTANCE

## Estimated Expenses

Students should be prepared to meet expenses for fees at the time of registration. Books should be purchased when classes begin. Other expenses are ongoing and must be anticipated monthly and included in the total cost of attendance. Expenses generally go up an average three to four percent per year. Actual costs depend upon where the student lives and if there are dependent children. Financial aid programs are designed to help students meet standard University-related expenses during the academic year. The following budgets will assist students in planning costs for average expenses: (Costs include University fees, books and supplies, room and board, personal miscellaneous and transportation based on 2001-2002 CSULB budgets.)

Student living at home with parents (nine month term) .....	\$7,648
Student living in a residence hall (nine month term) .....	\$10,334
Single student living off-campus (apartment, house nine month term, assumes shared housing) .....	\$13,246

## Availability of Institutional and Financial Assistance Information

The following information concerning student financial assistance may be obtained from Financial Aid, BH Bldg., Rm. 101, (562) 985-1887:

1. student financial assistance programs, including state grants, available to students who enroll at CSULB;
2. the procedures and forms by which application for student financial assistance is made;
3. the student eligibility requirements for financial assistance and the criteria used in determining how financial assistance is distributed among eligible applicants who enroll at California State University, Long Beach; and
4. the rights and responsibilities of students receiving financial assistance including aid provided under federal Title IV student assistance programs.

Information concerning the cost of attending California State University, Long Beach is available from the Office of Financial Aid, BH Bldg., Rm. 101, (562) 985-1887, and includes fees and tuition (where applicable); the estimated costs of books and supplies; estimates of typical student room and board costs and typical commuting costs; and, if requested, additional costs for specific programs.

Information concerning the refund policies of California State University, Long Beach for the return of unearned tuition and fees or other refundable portions of institutional charges is available from the Controller, BH Bldg., Rm. 365.

Information concerning policies regarding the return of federal Title IV student assistance funds as required by regulations is available from the Office of Financial Aid, BH Bldg., Rm. 101, (562) 985-8403.

Information concerning athletic opportunities available to male and female students and the financial resources and personnel that CSULB dedicates to its men's and women's teams may be obtained from Cindy Masner, Sports Athletics and Recreation, 562-985-8527.

The Office of Financial Aid at CSULB provides both financial and advisory assistance to enable students to pursue a quality education despite increasing costs. It administers funds made available by the federal and state governments, CSU and by private sources that are awarded to students who demonstrate a need to cover educational expenses.

Due to limited funding, deadlines are critical. Students financial aid files must be complete before financial need can be determined. To receive maximum funding, students must file a Free Application for Federal Student Aid (FAFSA) by March 2.

## Application

To apply for financial aid from CSULB, students must file the Free Application for Federal Student Aid (FAFSA). The FAFSA is a multi-purpose form that also is used to apply for California Grants from the California Student Aid Commission and for Pell Grant funds from the federal government. The FAFSA must be mailed to a nationally designated processor. New students may obtain the FAFSA from high school counselors or local college financial aid offices. Students currently enrolled at CSULB may pick up the FAFSA from the Office of Financial Aid. Detailed information about CSULB financial aid programs is available in the Office of Financial Aid, BH Bldg., Room 101, (562) 985-1887. The submission of various supportive documents may be required. These may include the following: (1) verification of all taxable and nontaxable income reported on the FAFSA; and (2) other clarifying information requested by the Office of Financial Aid. Upon receipt of all documentation, the applicant's file is evaluated to determine eligibility for financial aid. A student is automatically considered for all programs for which he/she qualifies at the University by submitting the FAFSA, and appropriate supporting documents. All loan, grant and work programs are available for the academic year.

## Financial Aid Eligibility

To determine financial aid eligibility, a standard needs analysis system is used. This system allows the Office of Financial Aid to analyze family financial strength and ability to contribute toward the cost of attending CSULB. Subtracted from the student's educational expenses to arrive at financial need are: the parental contribution, the applicant's (and spouse's) contribution from employment, savings, a portion of assets and other resources. As long as program funds permit, a "package" consisting of various types of funds (grants, loans, work-study) is awarded to meet full need.

Although enrollment is assumed to be full-time, part-time students are eligible to receive aid if they carry a minimum of six undergraduate units, or four graduate level units.

## Notification of Awards

Upon determination of eligibility, students are sent a financial aid offer. Students are also notified if determined to be ineligible.

It is the goal of CSULB to package aid that fully meets the need of all qualified aid applicants. However, in the event that funds are insufficient, priority will be given to students whose financial aid files meet the first priority deadlines and who demonstrate the highest need.

## Academic Responsibilities

Aid recipients must:

1. be in good academic standing;
2. make satisfactory academic progress toward a degree by earning credit for units attempted each semester; and
3. remain within the maximum time frame for the degree program in which the student is enrolled.

Aid eligibility is governed by the number of units attempted and successfully completed with a passing grade ("D" or better). Most aid recipients enroll in a full-time program of study carrying 12 undergraduate units or eight graduate level units (500-level courses or higher) per semester. To be considered an eligible financial aid applicant, students cannot have earned more academic units than an established "unit cap." At CSULB, the established unit cap for students seeking a bachelor's degree is 170 units and for master's degree candidates the unit cap is 50 units. This includes units earned as a recipient of financial aid as well as units earned while not receiving aid. It also includes any transferable units for those students who have attended college elsewhere.

## Financial Responsibilities

If you are determined ineligible for financial aid, you are responsible for the payment of any University obligations you may have, including fees.

Students who are receiving financial aid funds and completely withdraw from all of their classes, may have to repay all or part of the award they received. Students should check with the financial aid office to find out if they will owe a repayment, before withdrawing from all of their classes.

## Campus Financial Aid Programs

### Federal Perkins Loans

The Federal Perkins Loan is a federal program providing long-term, low interest loans to both graduate and undergraduate students. Repayment of loan principal and interest begins nine months after you cease to be enrolled at last half-time.

### Federal Supplemental Educational Opportunity Grant (SEOG)

The SEOG is a federally funded grant program for undergraduate students with exceptional financial need.

### Federal Work-Study (FWS)

The work-study program is a federally funded employment program to expand part-time job opportunities for students with financial need. Students are placed in jobs according to their skills, career and academic goals and must see the Office of Financial Aid for job referral. Positions are available on campus or with organizations off campus.

### Educational Opportunity Program Grants

EOP grants are provided by the State of California for undergraduate students admitted to one of The California State University campuses under the Educational Opportunity Program. Eligibility is determined by the same need criteria as federal financial aid programs. Students also receive special academic counseling and tutorial assistance when needed. Further information may be obtained by contacting the Educational Opportunity Program Office on campus.

## State University Grant

The State University Grant is funded by the State of California to assist students whose ability to attend postsecondary institutions is jeopardized by increases in student fees. Students must be residents of California and must demonstrate financial need.

## Graduate Equity Fellowship

The Graduate Equity Fellowship is funded by the California State University to graduate students underrepresented in their field of study. These groups are currently defined as: individuals with disabilities; women majoring in academic areas in which women are underrepresented; African Americans, Hispanics, American Indians, Filipinos and Pacific Islanders. Applicants must be California residents, demonstrate financial need of at least \$1000, and be accepted into or continuing in a full-time graduate program with at least a 3.0 grade-point average. Approximately 40 recipients are selected annually depending upon fund availability.

## University Scholarships

The Office of Financial Aid administers a limited number of small scholarships funded by CSULB. Other scholarships are funded by private donors, businesses, corporations, agencies, religious groups, and fraternal and civic organizations. Most scholarships are not based solely on financial need. They may be awarded on the basis of academic achievement, leadership, merit, motivations, and talent. Some scholarships are administered directly by the academic department for specific academic majors. Students may consult with their academic department or the Office of Financial Aid regarding scholarships available.

### President's Scholars Program — Four Years

High school valedictorians may be eligible. Includes registration fees, housing, and book allowance – up to \$24,000 for four years.

National Merit Scholarship finalists may also be eligible. Includes registration fees, housing, food, and book allowance – up to \$34,000 for four years.

Applications are available from your high school counselor. For more information contact Valerie Bordeaux in the CSULB Office of University Outreach and School Relations at (562) 985-5358.

## Outside Student Aid Programs

The following programs are administered by other agencies and coordinated by the Office of Financial Aid:

### Cal Grant A

Cal Grant A is awarded by the California Student Aid Commission to entering and continuing undergraduate students who are California residents. Cal Grant A awards are based on academic achievement and financial need. Grants are for fees only.

### Cal Grant B

Cal Grant B is awarded by the California Student Aid Commission to entering undergraduate students who have not completed more than one semester of college. Applicants must be California residents, and must demonstrate substantial financial need. Grants vary depending on educa-

tional costs. Fees, in addition to the basic award, are normally provided in the second, third, and fourth years. The grant is renewable for four years.

### Cal Grant T

Cal Grant T is awarded by the California Student Aid Commission to students who have graduated from college, are California residents and are enrolled in a professional teacher preparation program. Cal Grant T awards are based on academic achievement and financial need. Grants are for one year of fees only.

### Federal Pell Grant Program

The Pell Grant Program is a federal aid program designed to provide financial assistance to undergraduate students who demonstrate financial need under the guidelines of the program. Teacher credential students in an eligible program may also qualify. Once a student is determined eligible for the Pell Grant, the amount of the award is based on the cost of education at the school attended and enrollment on a half-time, three-quarter-time, or full-time basis. Eligibility is limited to U.S. citizens and eligible non-citizens.

### Federal Stafford Loan (GSL)

The Stafford Loan Program enables eligible students to obtain loans through banks, credit unions, and other lending institutions outside of the University. During the time the student is enrolled at least half-time, the federal government pays the interest on the cumulative amount borrowed if the loan is based on financial need. An unsubsidized Federal Stafford Loan is not based on financial need. Once funds are disbursed, the student is responsible for interest due on the loan while in school. The Parent Loan is available to parents of dependent undergraduate students. The parent's credit history is a determinant for participation in this program.

Information, brochures, advising, and application forms are available from BH 101, or phone (562) 985-1887.

Federal regulations allow any student to apply for the Federal Stafford Loan providing the student: 1) is enrolled and in good standing or has been accepted for enrollment at an eligible school; 2) is enrolled as at least a half-time student; and 3) is a citizen of the United States or an eligible non-citizen. Local lender policy is available from the Office of Financial Aid.

### Alan Pattee Scholarships

Pursuant to the Alan Pattee Scholarship Act, Education Code Section 68120, children of deceased public law enforcement or fire suppression employees who were California residents and who were killed in the course of law enforcement or fire suppression duties are not charged mandatory system-wide fees or tuition of any kind at any California State University campus. Students who may qualify for these benefits should contact the Enrollment Services Office for an eligibility determination.

### Bureau of Indian Affairs (BIA) Grants

Students who are at least one-fourth American Indian, Eskimo, or Aleut may apply for a BIA grant. The amount of the grant depends upon financial need and availability of funds. Students must complete an application for financial aid and then contact their tribe or tribal agency for an application.

## Other Types of Financial Assistance

### Cooperative Education (Co-Op)

The Cooperative Education Office places students in career or academic related positions with corporations, businesses, agencies and institutions. Students are paid at normal entry-level wages. Minimum periods of employment for full-time Cooperative Education placements are one semester. For part-time placements, a minimum of 20 hours is required. Summer internships are also available. Contact the Experiential Learning Center, BH 250.

### Student Part-Time Employment

Listings are available and assistance is offered in the Career Development Center to students interested in part-time employment.

### Federal/State Regulations

The information contained in this publication accurately reflects regulations and policies at the time of printing. Be aware that Federal and State regulations governing financial aid processing and eligibility are subject to change at any time.

View the CSU, Long Beach *Catalog* on-line at [www.csulb.edu](http://www.csulb.edu) by clicking on "Academics" and then "CSULB Catalog."

**F**ilm and Electronic Arts is an innovative academic program which emphasizes both professional education and liberal arts, both theory and practice. Focusing upon the integration of media and the arts in our information society, as well as upon the impact of technology on our culture and the media themselves, the curriculum is designed to assist the student major in becoming more future-oriented while developing a sound foundation in the arts and the humanities.

The faculty includes a diversity of expertise and interests which cross traditional media lines, resulting in ongoing discussion and experimentation while integrating the traditional audio, film and video production modes. Theory and aesthetics are taught as an integral part of the development of communication and production skills. Part-time lecturers include a variety of highly-qualified Los Angeles area media professionals.

### *Admission under Impaction*

The number of applicants to the major in Film and Electronic Arts exceeds the number that can be accommodated by the Department's facilities and resources. For this reason, the Film and Electronic Arts program has been designated as impacted by the California State University.

Applicants for admission to the University with a major in Film and Electronic Arts will be designated as pre-majors and assigned a pre-major code. Acceptance into the pre-

major category does not imply or assure subsequent acceptance into the major. Similarly, acceptance into the pre-major is not a prerequisite for admission into the major. Some FEA courses are open to non-majors as well as majors. Completion of any of these university-wide courses does not imply acceptance into the major.

Admission into the major is only open to matriculated students in the university and is determined solely on the basis of meeting all of the following supplemental criteria:

1. Completion of minimum of 56 semester units of college-level course work with a cumulative GPA of 2.80 or higher.
2. Completion of FEA 200 with a grade of "B" or higher. Students receiving a "C" in FEA 200 are allowed to retake the course once for purposes only of admission into the major. The "C" grade will remain in effect and no credit will be gained by taking the course twice. It will allow the student, however, to have a second chance for admission into the major if he/she is able to obtain a "B" or higher on the second try. This policy applies retroactively to Fall 2000 to students who have taken the course once and received a "C". A student receiving a "D", "F", or "U" in FEA 200 the first time will no longer be eligible for admission to the major, but will be allowed to repeat/delete that grade per university policy.
3. Completion of the general education requirement in mathematics.
4. Successful completion of the CSULB Writing Proficiency Examination (WPE) requirement.
5. International student applicants are required to complete the Test of English as a Foreign Language (TOEFL) with a score of 550 or higher.
6. Priority admissions will be given to legal residents of the State of California.

To apply for admission to the Film and Electronic Arts major, after meeting the six criteria above, a student must complete the departmental major application form obtainable from the department office, sign it, and attach official transcripts of all previous college work at CSULB or elsewhere.

Admission to the major does not guarantee access to or enrollment in intermediate or advanced production courses.

## **Bachelor of Arts Film and Electronic Arts (pre-code 2-5880)**

Two B.A. degree options are offered by the department: one in Film and Electronic Media requiring 39 units in the major and 12 units of electives and one in Film and Video Production requiring 51 units in the major. After successfully completing all lower division requirements for admission to the major (including FEA 200 with a grade of "A" or "B"), students will be admitted to the B.A. degree Option in Film and Electronic Media. Students may apply for admission to the B.A. degree Option in Film and Video Production after completing FEA 309. Admission to the production option is highly competitive and will be based on the quality of a creative portfolio submitted by the applicant.

## Option in Film and Electronic Media (code 2-5881) (120 units)

Students must complete all requirements, pre-requisites, and electives in residence at the upper division level.

### Requirements

- I. Pre-Major Screening Course: FEA 200
- II. Media Studies Core: FEA 301 and 300 or FEA 302 and 305, FEA 313 or 314
- III. Media Practice Core (choose 2 courses from one of the following tracks for a total of 6 units):
  - A. *Film/Video/Audio*: FEA 303, and FEA 307 or 309
  - B. *Management*: FEA 327, 373, 376, 420
  - C. *Writing*: FEA 303, 304, 404, 408(Students interested in the B.A. Option in Film and Video Production can apply after completing FEA 309. Admission is by portfolio application.)
- IV. Culture, Media, and Politics (choose 3): FEA 310, 317, 318I, 380, 394, 412, 486I
- V. International Media (choose 3): FEA 363, 364, 392A, 392B, 392C; only one of the following may be used to meet this requirement: FEA 454/ITAL 454, FEA 456/FREN 456, RUSS 428, SPAN 428
- VI. Electives: This requirement can be met with a sequence of elective courses in FEA. With prior advisor approval, certain non-FEA courses may be counted toward this requirement.
- VII. Senior Theory Course (choose 1): FEA 401, 402 or 430

## Option in Film and Video Production (code 2-5882) (120 units)

The Option in Film and Video Production involves a separate and competitive admission process. FEA majors may apply for the Film and Video Production Option after successfully completing FEA 309.

Students admitted to the Option in Film and Video Production who fail to maintain a GPA of at least 3.0 in the major will revert to their former status in the Option in Film and Electronic Media. No probationary period is recognized.

The requirements for admission to the option are as follows:  
1) Grade of "B" or better in FEA 309; 2) Submission of a creative portfolio consisting of one film or video produced in FEA 309; 3) A completed application form; and 4) A statement by the student outlining academic goals or career objectives. Admissions decisions, based on a review of these application requirements and materials, will be made by a committee of full-time faculty members. The department is committed to diversity and encourages women and minority students to apply.

### Requirements

- IA. Pre-major Screening Course: FEA 200
- IB. Film and Video Production Option Screening Course: FEA 309 (requires major status)  
Note: Students submit creative portfolio and application materials for admission to the Option in F/V Production after completing this course.
- II. Media Studies Core: FEA 301 and 300 or FEA 302 and 305, FEA 313 or 314

- III. Advanced Film/Video Production: FEA 304/336/328, 340/341, 342/343
- VI. Production Electives (choose 4): FEA 303, 307, 320, 327, 344, 404, 405, 408, 415, 492
- V. International Media (choose 2): FEA 363, 364, 392A, 392B, 392C, only one of the following may be used to meet this requirement: FEA 454/ITAL 454, FEA 456/FREN 456, RUSS 428, SPAN 428
- VI. Production Electives (choose 4): FEA 303, 304, 307, 320, 327, 328, 340, 342, 344, 404, 405, 408, 415, 492
- VII. Senior Theory Course (choose 1): FEA 401 or 402

## Courses (FEA)

### Lower Division

#### 200. Media Aesthetics (3)

Study of aesthetic principles governing media productions. Emphasis on relationships between various art forms and development of critical vocabulary. This course serves as a screening course for students wishing to enter the FEA major. Students receiving a "C" in FEA 200 are allowed to retake the course once for purposes only of admission into the major. The "C" grade will remain in effect and no credit will be gained by taking the course twice. It will allow the student, however, to have a second chance for admission into the major if he/she is able to obtain a "B" or higher on the second try. This policy applies retroactively to Fall 2000 to students who have taken the course once and received a "C". A student receiving a "D", "F", or "U" in FEA 200 the first time will no longer be eligible for admission to the major, but will be allowed to repeat/delete that grade per university policy. Traditional grading only.

### Upper Division

#### 300. History of Electronic Media (3)

Prerequisite: Major status or consent of instructor. The development of electronic media in the United States. Traditional grading only.

#### 301. Electronic Media: Theory and Culture (3)

Prerequisites: Major status or consent of instructor. Study of electronic media and their role in the information society. Consideration of mass communication theories and dimensions of electronic media today, including the traditional media of radio, television and cable. Emphasis upon new media technologies and their potential impact upon media and society in the future. Traditional grading only.

#### 302. Critical Study of Film (3)

Prerequisites: Major status. Introduction to classical and critical theories of film analysis including Realism, Formalism, Classical Hollywood Cinema, Auteur Theory, the Art Film, and Structuralism. Traditional grading only.

#### 303. Film and Electronic Media Writing (3)

Prerequisite: Major status or consent of instructor. Study of scripting and other writing skills unique to audio, video, and film. (Lecture-Discussion 3 hours) Traditional grading only.

#### 304. Writing the Short Script (3)

Prerequisite: Major status or consent of instructor. Scriptwriting with emphasis on adaptation and dramatic fiction. Traditional grading only.

#### 305. Film History (3)

Prerequisite: Major status. Historical development of the motion picture. Traditional grading only.

#### 307. Audio Production (3)

Prerequisite: Major status. Basic principles and techniques of audio production. (Act 4 hrs to be arr.) Traditional grading only.

#### 309. Film/Video Production (3)

Prerequisite: Major status. Basic principles and techniques of film/video production. (Act 4 hrs to be arr.) Traditional grading only.

### 310. Film and Culture (3)

Prerequisite: Completion of 13-unit General Education Foundation requirement. An exploration of the ways films create, pattern, shape, reinforce, and/or change culture. A variety of viewpoints, derived from contemporary critical and cultural studies, highlight the relationship between a culture and its images.

### 312. Television Programming Symposium (3)

Discussion and analysis of creative problems in the television industry. Current local and network programs. Interviews with visiting executives, producers, directors, writers, performers and technicians. May be repeated once. Only 3 units may be used as credit toward major.

### 313. New Technologies in Film and Electronic Media (3)

Prerequisites: FEA 300 and 301, or 302 and 305, or consent of instructor. Study of developing technologies in film and electronic media production, distribution, and exhibition. Focus on economic, social, and policy issues raised by technological innovation and the impact of new technology on the industry. Traditional grading only.

### 314. Theatrical Film Symposium (3)

Lectures and discussions of creative problems in the motion picture industry; current films; interviews with visiting producers, directors, writers, performers and technicians. May be repeated once. Only three units may be used toward the major.

### 316. Mass Media and Society (3)

Prerequisite: Completion of 13-unit General Education Foundation requirement. Theory and functions of the mass media in America. Enduring issues and unresolved problems of the media. Impact of mass culture on a mass-mediated society. G. E. credit only. Does not count toward units in the major.

### 317. Women in the History of U.S. Film (3)

History of women as they are represented, presented as images, or constructed in the development of U.S. film. Theory and analysis of film from a feminist perspective. (Same course as W/ST 316.)

### 318I. Theory of Fiction and Film (3)

Prerequisites: Completion of the G.E. Foundation, one or more Explorations courses, and upper-division standing. Examination of the narrative methods and conventions of American and British fiction and the methods and conventions of film; consideration of the relationships between the artistic structure of fiction and film; study of theoretical and practical approaches to fiction and film. Same course as ENGL 318I.

### 320. Sound Design (3)

Prerequisites: Major status. Examination of the basic aesthetic and technical principles of sound design for film and video production.

### 325. Radio Station Activity (2)

Prerequisite: FEA 307 or consent of instructor. Experience in administering and programming the University radio station. (Activity hours to be arranged.) Course may be repeated for a maximum of 4 units. Credit/No Credit grading only.

### 327. Production Management (3)

Prerequisite: Major status or consent of instructor. Examination of the step-by-step process of budgeting and scheduling feature length motion pictures. Students will learn methods and procedures of breaking down a script, analyzing production elements, preparing a production board, scheduling principal photography, and preparing a comprehensive budget. (Lecture 3 hours; activity hours to be arranged.) Traditional grading only.

### 328. Film and Video Lighting (3)

Prerequisites: FEA 309 with a grade of "B" or better. Priority enrollment given to students in Film/Video Production Option. Examination of the basic aesthetic and technical principles of film and video lighting. Students will explore various creative lighting styles and techniques through lectures and practical exercises. Traditional grading only.

### 335. University Television Activity (2)

Prerequisites: Consent of instructor. Experience in administration and production of video projects at the University Television facility. (Activity hours to be arranged.) May be repeated once for a maximum of 4 units. Credit/No Credit grading only.

### 336. Intermediate Film/Video Production (3)

Prerequisites: Admission to Option in Film/Video Production, concurrent enrollment in FEA 304. Preparation for the advanced level of film and video production through research and exercises designed to develop essential filmmaking and videographic skills. (Production laboratory 9 hours.) Traditional grading only. Miscellaneous course fee.

### 340. Advanced Film/Video Production (3)

Prerequisites: FEA 328, FEA 336, and concurrent enrollment in FEA 341. Experience in the group production of original films and videos. Emphasis is on narrative short films and videos resulting in public performance. (Production laboratory 9 hours.) Course may be repeated to a maximum of 6 units, but second enrollment must follow completion of the production sequence (III) in the Option in Film and Video Production. Traditional grading only. Miscellaneous course fee.

### 341. Advanced Cinematography I (3)

Prerequisites: FEA 328, FEA 336, concurrent enrollment in FEA 340. This course is designed to further the student's understanding of the art and craft of cinematography and to enhance the effectiveness of visual storytelling in their advanced film and video projects. Emphasis is on production cinematography, lighting, composition, lenses, film stocks, filters, telecine and lab procedures. Traditional grading only.

### 342. Advanced Film/Video Production II (3)

Prerequisites: FEA 340, concurrent enrollment in FEA 343. Experience in the group production of original films and videos. Emphasis is on narrative short films and videos resulting in public performance. (Production laboratory 9 hours.) Course may be repeated to a maximum of 6 units, but second enrollment must follow completion of the production sequence (III) in the Option in Film and Video Production. Traditional grading only. Miscellaneous course fee.

### 343. Advanced Cinematography II (3)

Prerequisites: FEA 340, FEA 341, concurrent enrollment in FEA 342. This course is designed to further the students' understanding of the art and craft of cinematography and to enhance the effectiveness of visual storytelling in their advanced film and video projects. Emphasis is on post-production cinematography including printing, opticals, video mastering, and video-to-film transfers. Traditional grading only.

### 344. Directing (3)

Prerequisites: FEA 309 or consent of instructor. Theory and practical experience in the directing of narrative film. Emphasis on directing actors in fictional work. (Activity hours to be arranged.)

### 355. Audio-Video-Film Activity (1)

Prerequisite: FEA 309 or consent of instructor. Group and individual experience in areas of audio-video-film production, and broadcast education. Specific assignments determined in consultation with instructor. (Activity hours to be arranged.) May be repeated once, for a maximum of two units. Credit/No Credit grading only.

### 363. International Electronic Media Systems (3)

Prerequisites: FEA 301 or 302 or consent of instructor. Comparative analysis of internal and external electronic media systems with emphasis on their motives, origins, technologies, and programming. Consideration of political, economic, regulatory constraints, and the potential impact of new technologies.

### 364. Global Electronic Media Communication (3)

Prerequisites: FEA 301 or 302 or consent of instructor. Study of international electronic media systems targeted toward other nations with emphasis on their cultural, economic, and political influences. Focus on the impact of new technologies on such cross border communication in the future. Traditional grading only.

### 373. Electronic Media Programming (3)

Prerequisites: FEA 300 and 301, or 302 and 305, or consent of instructor. Principles and practices of programming for electronic media networks, television and radio stations, and local cable systems. Analysis of the relationship between programming, promotion, and profit. Traditional grading only.

**376. Film and Electronic Media Sales and Promotion (3)**

Prerequisite: Major status or consent of instructor. Study of marketing, promotion, and sales among film distributors, production companies, program suppliers, broadcast networks, cable systems, local radio, television, and cable operators. Theory and application of media research principles, promotion strategies. Development of selling skills.

**380. Documentary History and Theory (3)**

Prerequisites: FEA 302 and 305 completed or consent of instructor. A critical study of the history, methods, and aesthetics of documentary media production. A specific focus on problems of representation, objectivity, and personal style in both theory and practice. Course fee required. Traditional grading only.

**382. Documentary Digital Video Production (3)**

Prerequisites: FEA 309 with a grade of "B" or better and FEA 380 (may be taken concurrently). Theory and practice of directing, shooting, and editing video documentaries and experimental video using digital video and post-production technology. Traditional grading only.

**392. International Cinema (3)**

Prerequisites: FEA 302 and 305 completed or consent of instructor. Variable topics course which explores the domain of international cinema. Course may be repeated for a maximum of 6 units with different topics. Topics will be announced in the *Schedule of Classes*. Course fee required. Traditional grading only.

- A. European Cinema 1930-1960
- B. European Cinema 1960-1990
- C. Latin American Cinema
- D. Japanese Cinema

**394. American Film Genres (3)**

Prerequisites: FEA 302 and 305 completed or consent of instructor. Historical and critical examination of Hollywood film genres. Places genre analysis and theory within a sociocultural perspective including issues of gender and ethnicity. Genres to be covered include the Western, film noir, science fiction/horror, detective/gangster, the musical, war films, screwball comedy, and family melodrama. May be repeated for a max. of 6 units with different topics. Traditional grading only.

**401. Film Critical Theory (3)**

Prerequisites: FEA 302, 305 and an additional six units in film studies. Study of contemporary theoretical models of film analysis and evaluation. Topics include: Structuralism, Feminism, Psychoanalytic Theory, Narratology, Cultural Studies, Postcolonialism, Queer Theory, and Post-modernism. Course fee required. Traditional grading only.

**402. TV Critical Theory (3)**

Prerequisites: FEA 300, 301, and 6 additional units in the major. Examines television from an aesthetic and textual perspective. Specific interests include the distinctive ways that television produces its meanings, as well as the ways that critical analysis differs from quantitative mass communications approaches. Topics to be covered include semiotics, postmodernism, and feminism, as well as narrative, ideological, and psychoanalytic theories of criticism. Traditional grading only.

**404. Advanced Scriptwriting for Film and Electronic Media (3)**

Prerequisites: FEA 303 or 304 with a "B" or better, or ENGL 405 or 407 with a "B" or better, or consent of instructor. Writing dramatic and comedic screenplays and teleplays. Includes study of produced models with emphasis on the creative process. Course may be repeated for a maximum of 6 units. Traditional grading only.

**405. Comedy Writing (3)**

Prerequisites: FEA 303 or 304 with a "B" or better, or ENGL 405 or 407 with a "B" or better, or consent of instructor. Study of a variety of historical and contemporary models. Practice in the creation of print pieces; stand-up routines; scripts for television, film, and other media. Heavy focus on comedy as social, political, and technological criticism. Traditional grading only.

**408. Writing the Screen Adaptation (3)**

Prerequisites: FEA 303 or 304 with a grade of "B" or better, or ENGL 405 or 407 with a grade of "B" or better, or consent of instructor. Writing script adaptations, with a study of adaptation theory and successful adaptational models. Course may be repeated to a maximum of 6 units. Same course as ENGL 408.

**412. American Television and African-Americans (3)**

Prerequisites: FEA 301 or 305 or permission of instructor. Comparative examination of the depiction of African Americans in American network and syndicated television in a variety of types of programs. Traditional grading only.

**415. Electronic Editing (3)**

Prerequisite: FEA 309 or consent of instructor. Principles of non-linear editing in post-production.

**420. Electronic Media: Labor and Management (3)**

Prerequisites: Junior or senior status and at least 12 completed units in the FEA major, or consent of instructor. Study of management and labor in the changing field of telecommunications, with emphasis upon the manager's roles and functions in the labor intensive cable, film, radio, television and related industries.

**430. Government Media Policy and Politics (3)**

Prerequisites: FEA 300, 301, and 6 additional units in the major. Current issues, policies, and regulations affecting the cable, film, radio, television industries, including the impact of new technologies. Traditional grading only.

**454. Italian Cinema (3)**

Historical and critical examination of Italian cinema. Traditional grading only for majors. Same course as ITAL 454.

**456. French Cinema (3)**

Historical and critical examination of French cinema. Traditional grading only for majors. Same course as FREN 456.

**486I. Alternative Media (3)**

Prerequisites: Completion of the G.E. Foundation, one or more Explorations courses, and upper-division standing. Critical study of censorship and suppression of information in mainstream media by governmental and corporate entities. Focus on the importance of freedom of information and access to diverse viewpoints. Students select and research environmental, multicultural, peace, and other issues utilizing alternative media.

**490. Special Topics in Radio, Television and Film (3)**

Prerequisite: Major status or consent of instructor. Topics of current interest in radio-television-film selected for intensive development. May be repeated for a maximum of 9 units with different topics; only 6 units may be applied toward the major. Topics will be announced in the *Schedule of Classes*. Traditional grading only.

**492. Internship (3)**

Prerequisites: Senior standing in major or consent of instructor. Students intern with cooperating media facilities. Course may be repeated for a maximum of 6 units. Credit/No Credit grading only.

**498. Senior Seminar (3)**

Intensive study of significant issues in film and electronic media.

**499. Special Projects in Radio, Television, and Film (1-3)**

Prerequisites: Senior standing in major and consent of instructor. Research into an area of special interest to the student, culminating in a research paper or production. Productions will be limited by equipment and facilities available during any term.

## Courses (FIN)

### Lower Division

#### 220. Introduction to Law and Business Transactions (3)

Introduction to law and the American legal system in today's business world. Special emphasis is given to contracts, sales, and commercial paper. An examination of the role and function of the judiciary, elements of civil and criminal lawsuits, and other emerging areas of the law, including alternative dispute resolution.

### Upper Division

#### 300. Business Finance (3)

Prerequisite: IS 310 can be taken concurrently. An introductory course for all business majors, integrating computer applications and management information systems in the following ar-

reas of finance: (1) Time Value of Money, Risk, Valuation, Cost of Capital, Capital Structure; (2) Capital Budgeting; (3) Long-Term Financing Decisions; (4) Working Capital Policy and Management; (5) Financial Analysis and Planning; (6) Special topics including: Mergers, Bankruptcy, and International Finance.

#### 309I. The Consumer in the Legal and Economic Environment (3)

Prerequisites: Completion of the G.E. Foundation, one or more Explorations courses, and upper-division standing. Combines the economic and ethical components of consumer issues with a critical analysis of relevant substantive aspects of consumer law. Incorporates an integrated coverage of the economic, legal and regulatory environment of consumers in avoiding and resolving disputes regarding fraudulent transactions, financial matters, personal and real property contracts, torts, credit and investment issues, and family relationships. Team taught. Same as ECON 309I and FCS 309I. (Lecture Discussion 3 hours.) Traditional grading only.

#### 310. Personal Finance (3)

Financial analysis planning and management for the individual. Topics include owning and financing a home, minimizing taxes, investing – goals and strategies, budgeting to match income and expenses, developing a savings plan, controlling expenses and credit usage, determining life, health, home and auto insurance needs, planning retirement.

#### 320. Legal and Regulatory Environment of Business (3)

Prerequisite: FIN 220. An examination of the forms of business organizations, employment law, securities law, environmental law, anti-trust issues, and international transactions. A consideration of the social, cultural and economic influences on domestic and multinational corporations. Exploration of the relationship of government to business. Introduction to business ethics.

#### 330. Insurance Principles (3)

Principles of risk-bearing and insurance; life and property-liability insurance needs of the individual. Types of carriers and insurance markets; organization and functions of carriers; industry regulation.

#### 340. Real Estate Principles (3)

Overview of real estate markets, institutions and activities from the perspective of the decision makers involved in real estate development, financing and equity investment. The fundamental physical, legal, regulatory, economic, mathematical and taxation considerations influencing real estate decision and values are investigated. The real estate decision support areas of brokerage, property management, appraisal and counseling are examined.

#### 350. Investment Principles (3)

Prerequisite: FIN 300. Investment markets and transactions; sources of investment information and advice; return vs. risk; margin trading and short selling; investment planning; investing in equities and fixed income securities; speculative tax-sheltered investments; gold and other tangibles; portfolio management. Demonstrations and use of microcomputer technology in the above areas, including accessing various databases available to the investor.

#### 360. Capital Markets (3)

Prerequisite: FIN 300. Capital formation, rates, markets and institutions. Flow of fund analysis, intermediation, interest rate structures, risks and liquidity. Management of financial institutions.

#### 400. Financial Management (3)

Prerequisites: FIN 300 and ACCT 310 or 320. An intermediate level course in financial management integrating computer applications and management information systems into the area of financial functions and decisions. The course is primarily a case study and requires use of the computer and appropriate software. The main areas of concentration are: cash budgeting, capital budgeting, business combinations and mergers, cost of capital, and international finance.

#### 424. International Legal Environment of Business (3)

Prerequisite: FIN 320. Study of the global environment in which international managers and investors function. Topics will include the form in which international businesses operate, such as subsidiaries and joint ventures, along with a discussion of how business operations are affected by treaties, and by the laws and policies of the several governments involved. Also, included are resolution of business and investment disputes, protection of property rights, the financing and taxing of international operations, and ethical responsibility issues. Traditional grading only.

#### 425. Legal Aspects of Real Estate (3)

Prerequisite: FIN 340. Basic principles of law of real estate as related to conveyances, titles, private and public restrictions on the use of land, escrows, community property and financial transactions.

#### 450. Security Analysis (3)

Prerequisite: FIN 350. Use of microcomputer technology to perform security analysis including bonds and the bond market, stocks and the stock market, security valuation, fundamental and technical analysis, portfolio management and risk-reward relationships. A review of the various microcomputer software programs available to perform all aspects of security analysis and portfolio management, including accessing and utilization of the numerous databases available to the investment analyst.

#### 480. Derivatives and Futures Markets (3)

Prerequisites: FIN 300 and 350. The study of futures markets includes an analysis of the exchanges, the operation of member firms, the mechanics of trading, the construction of a personal-risk profile analysis and the discussion of traditional decision variables, including the construction of a 2-asset portfolio. Included is a solid theoretical examination of the question of bias in futures prices, the theory of the price of storage, ledger and speculator behavior, and the stochastic nature of the futures prices. Traditional grading only.

#### 490. International Finance (3)

Prerequisite: FIN 300; suggested, CBA 300. International trade theories, international payments; currency value fluctuations and exchange rates; international capital markets; roles of developing countries; international institutions and multi-national enterprises. Individual research required.

#### 495. Selected Topics (1-3)

Prerequisite: Consent of instructor. Topics of current interest in finance selected for intensive study. May be repeated for a maximum of 6 units. Topics will be announced in the *Schedule of Classes*.

#### 497. Directed Studies (1-3)

Prerequisites: Consent of instructor and Department Chair, on Dean's List and 3.0 GPA or higher in finance. Individual projects, study and research of advanced nature in finance.

#### 499A-B. Applied Portfolio Management (3-3)

Prerequisites: FIN 499A: FIN 350, 400, 450 (either or both FIN 400 and 450 may be taken concurrently), and consent of instructor and Department Chair; FIN 499B: FIN 499A and consent of instructor and Department Chair. FIN 499A to be offered in Fall and accepted students must enroll in FIN 499B in Spring. Participation in the management of an actual investment portfolio. Research, monitor, and analyze securities and make buy and sell recommendations for a student-managed investment fund utilizing state-of-the-art computer software and on-line information data retrieval services. Contribute to the publication of a semi-annual report of the activities of the fund. Market, sector and firm analysis with individual and group presentations and outside research required. Traditional grading only.

### Graduate Prerequisite Course

#### 520. Legal, Regulatory, and Ethical Environment of Business (3)

Prerequisite: MBA standing required. Analysis of the legal and regulatory environment in which managers must operate. Review of the constitutional and judicial structures for resolving disputes, the effect of governmental and political policies, and the liability encountered by business in various defined areas of substantive law. Special attention is given to ethical issues faced by business in the domestic and global marketplace. Traditional grading only.

### Graduate Division

#### 524. International Legal Environment of Business (3)

Prerequisite: FIN 520. A study of the international legal environment in which multinational firms operate. Selected topics include treaties and laws, government policies, resolution of legal disputes, regulation of competition, enforcement of property rights and issues involving ethical responsibilities. Traditional grading only.

#### 525. Estate Planning (3)

Prerequisite: FIN 520. Planning and administration of the disposition of property by wills, estates and trusts including use of life insurance, impact of federal and state taxes and special trust provisions and devices.

#### 600. Seminar in Business Finance (3)

Prerequisite: MBA standing required. Financial theory and management: (1) Time value of money, risk, valuation, cost of capital, capital structure; (2) Capital budgeting; (3) Long-term financing decisions; (4) working capital policy and management; (5) Financial analysis and planning; (6) Special topics including mergers, bankruptcy, international finance. Course may be repeated to a maximum of 3 units. Traditional grading only.

#### 620. Capital Budgeting (3)

Prerequisite: FIN 600. Theory of capital budgeting within the framework of the firm. Cost of capital determination and logic of expansion vs. growth, and equity financing vs. debt financing. Computer applications are required for this course. Traditional grading only.

#### 624. Cyberlaw (3)

Coverage of foundation of e-commerce and public policy issues; study of the interaction of law with the globalized e-commerce environment; critical analysis of the legal, ethical, international and political aspects of technology as it relates to business; examination of issues of jurisdiction, intellectual property, electronic payment systems and contracting, online securities offerings, telecommunications mergers and acquisitions, privacy, security, and cybercrime. Traditional grading only.

#### 630. Seminar in Financial Forecasting (3)

Prerequisite: FIN 600. Research projects in industry, individual company, product and commodity areas. Computer applications are required in this course. Traditional grading only.

#### 650. Seminar in Investments (3)

Prerequisite: FIN 600. Selected problems in security analysis, portfolio planning, balance and adjustment as related to (1) individual circumstances of the investor, (2) specific market conditions, and (3) broader financial aspects of the economy. Presentation and interpretation of student reports on selected topics. Computer applications are required for this course. Traditional grading only.

#### 690. Seminar in International Finance (3)

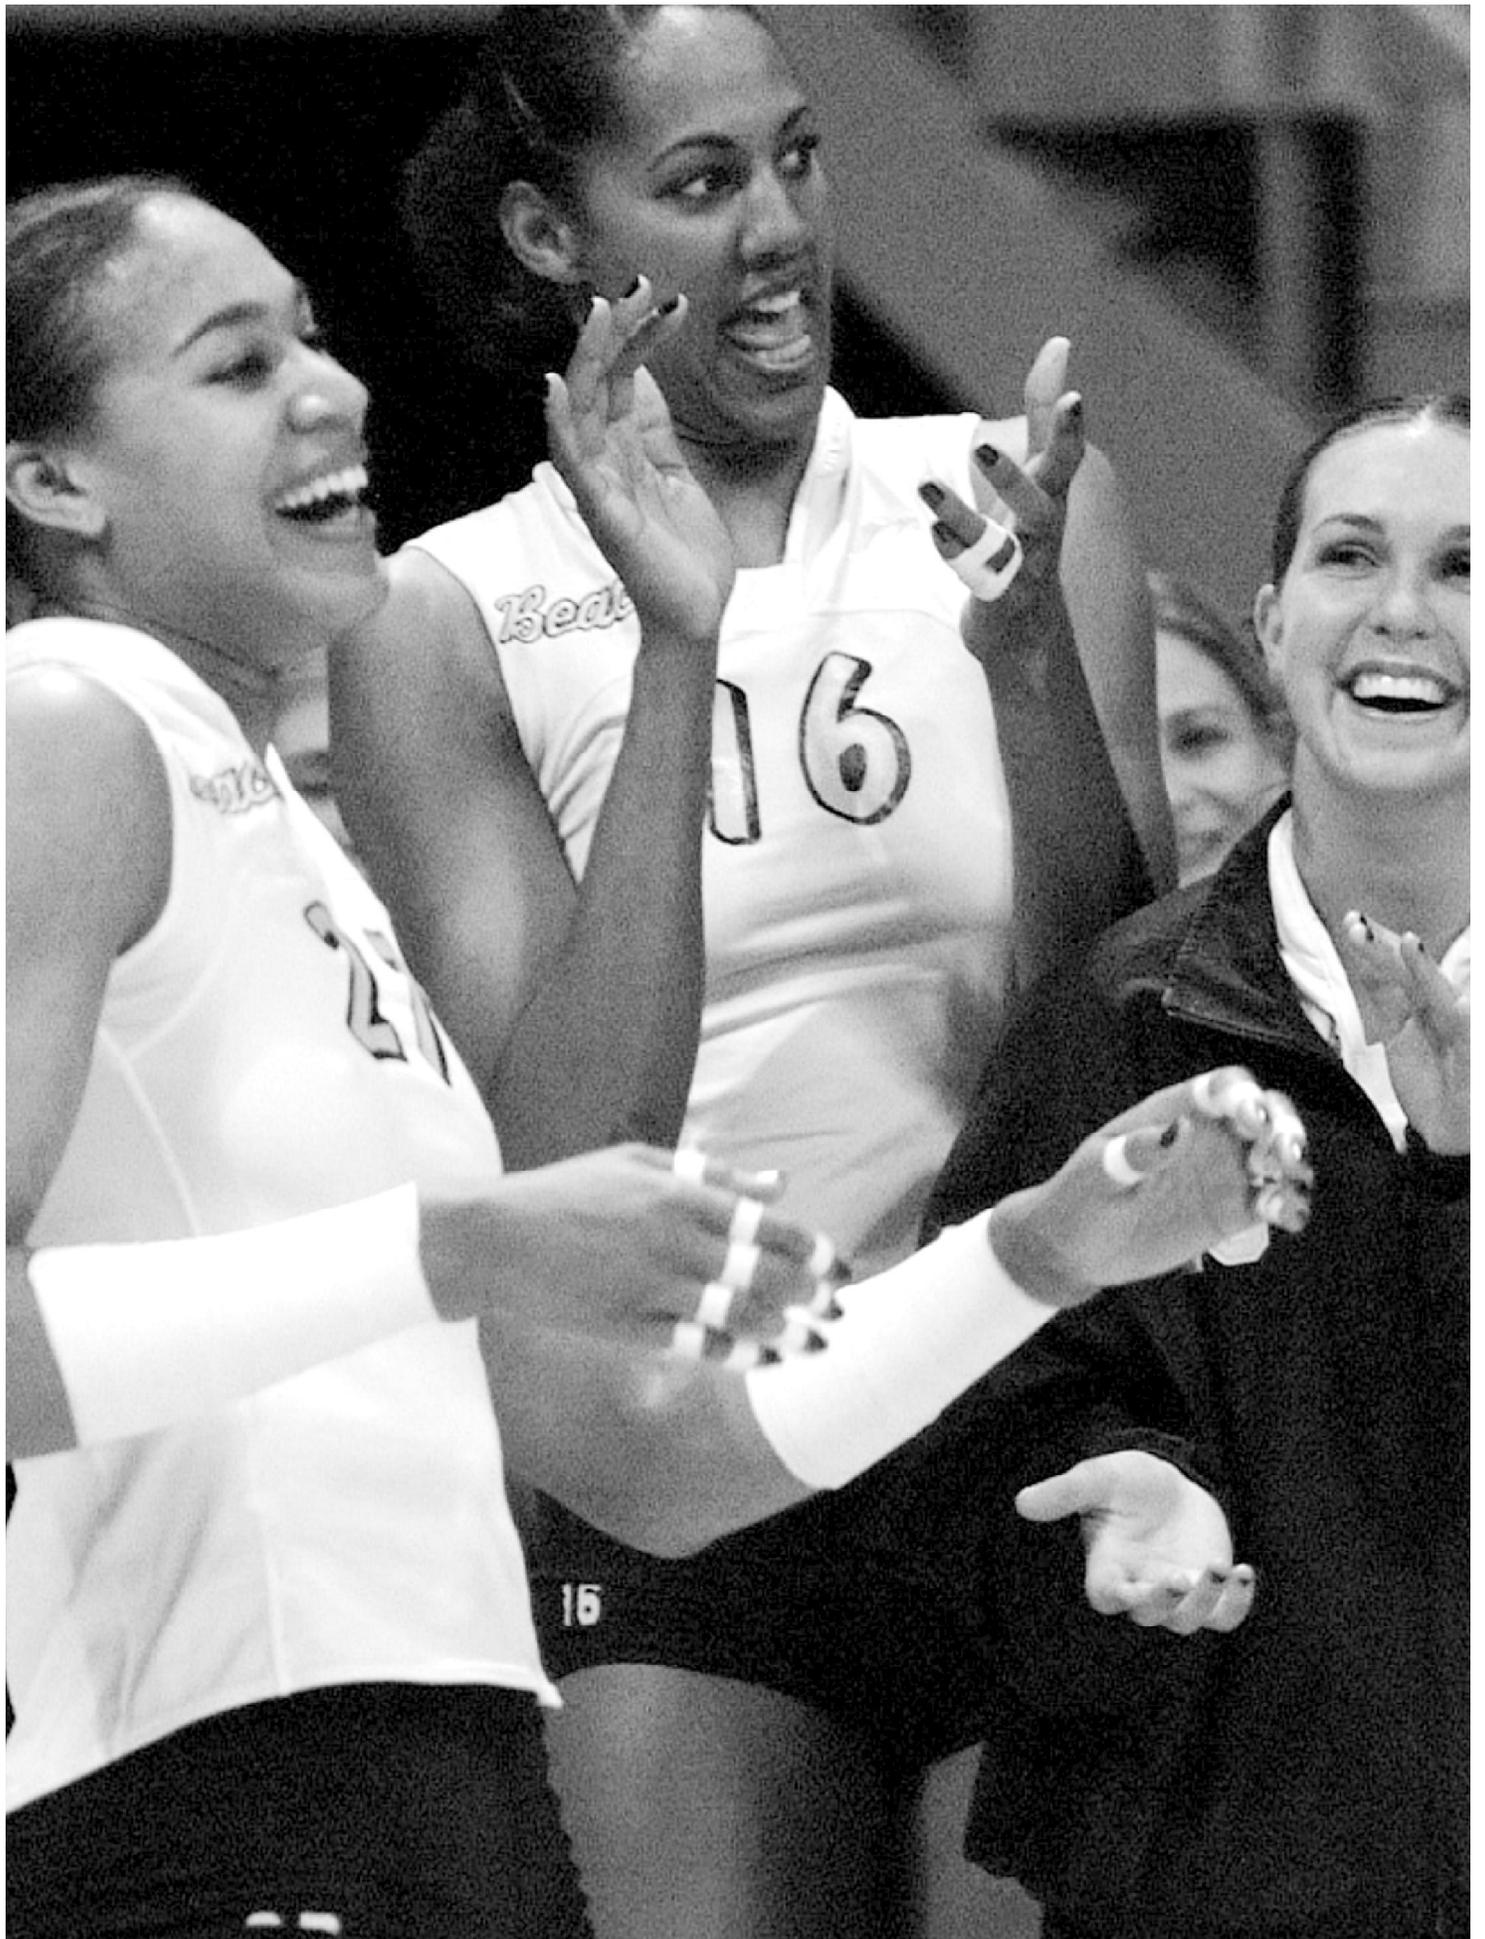

Prerequisite: FIN 600. Background in economics, accounting and finance, graduate standing in business administration. Covers real and monetary factors in the finance of international business, international capital markets, movement of funds and special problem areas.

#### 697. Directed Studies (1-3)

Prerequisite: Consent of instructor. Individual study under the direction of the faculty.

#### 699A-B. Applied Portfolio Management (3-3)

Prerequisites: FIN 699A: FIN 520, 600, 650 and consent of instructor and Department Chair; FIN 699B: FIN 699A and consent of instructor and Department Chair. FIN 699A will be offered in Fall and accepted students must enroll in FIN 699B in Spring. Participation in the management of an actual investment portfolio. Research, monitor, and analyze securities and make buy & sell recommendations for a student-managed investment fund utilizing state-of-the-art computer software and on-line information data retrieval services. Contribute to the publication of a semi-annual report of the activities of the fund. Market, sector and firm analysis with individual and group presentations and outside research required. Traditional grading only.

# GENERAL EDUCATION

General Education is an important aspect of the baccalaureate degree and of your personal development. It is the part of your university program which encourages you to develop or improve such basic life skills as self-motivation, independence, creativity, critical thinking, an understanding of values, and a general philosophy by which to make decisions throughout life. Possession of these skills makes possible continued personal growth and the further development of your creative and adaptive capabilities. It is the basis for lifelong learning, and it can increase your ability to be self-directing.

At California State University, Long Beach, courses approved for General Education credit provide:

- Information: the raw material for thinking, analysis, reflection, and discourse;
- Basic Skills: the ability to analyze ideas and data, to relate these to other materials, to develop arguments both logical and cogent, to reach conclusions, and to present the results of these processes with clarity and style;
- Methods of inquiry: direction and practice in methodologies of the several disciplines;
- Qualities of Mind: a respect for data and unpleasant facts; tolerance, commitment, a taste for learning; an appreciation of the arts; creativity, perpetual curiosity, and a sensitivity to ethical considerations.

The present policy of the Board of Trustees of The California State University is that students graduating from a CSU campus must fulfill certain breadth requirements (Section 40405, Title 5, California Code of Regulations). Of these, a minimum of 9 semester units must be upper-division general education courses taken at the campus conferring the degree. Partial credit may be transferred from another institution; a participating, regionally-accredited institution may certify completion of 39 lower-division semester units.

Each campus in the CSU system may define which of its courses satisfy its General Education requirements and determine which courses are transferable from other institutions (except where a maximum of 39 units are certified). The campus may add requirements and enact other regulations.

Beginning in the 1996-97 academic year, CSULB inaugurated a series of Odyssey theme years. Each involves the campus in a year-long series of major speakers, video conferences, performances, films, events, field trips, and classes (across campus and in the community) focused on a single intellectual issue of importance to our time. Please see the end of this section for a listing of courses with theme-year content.

## General Education Requirements

Each California State University, Long Beach, baccalaureate graduate must complete at least 51 semester units of General Education courses. Only courses specifically approved for General Education and so listed in the *Schedule of Classes* may be used to fulfill General Education requirements. At least three units of the 51 General Education units

must be instruction which focuses on global issues or world societies and cultures (Global Issues Courses). At least three units of the 51 General Education units must be instruction which focuses on instructive examples of human diversity (Human Diversity Courses). At least nine of the 51 General Education units must be upper-division units taken at CSULB and after you achieve upper-division standing (completion of 60 semester units). The 51 units of General Education course work include three units of work in U.S. History and three units in U.S. Constitution and American Ideals, required by Section 40404, Title 5, California Code of Regulations. (See Category D. below). Title 5 provides that each student shall demonstrate competence by completing a course in these fields or by passing a comprehensive examination in them. These examinations are provided by the Departments of History and Political Science, respectively.

No course in your major department may be used to satisfy G.E. requirements with these exceptions: all courses in Category A, Category B.1.a for life science majors, Category B.2 for mathematics majors, Category C.1 and C.3 for art and music majors, Category D.1.a for history majors, Category D.1.b for political science majors, all interdisciplinary courses (I), and human diversity courses (HD, identified with " " in the *Schedule of Classes*) for all majors. A cross-categorized Interdisciplinary Course may be counted (at the student's option) in any one of the approved categories, but not in more than one.

Upper-division transfer students entering CSULB under the 1998-1999 catalog or any earlier catalog may take two interdisciplinary courses (I) and any other upper-division course approved for General Education in lieu of the Capstone requirement listed below.

Engineering and Technology students have special GE requirements. They have to satisfy a theme by taking two upper-division I courses within that theme. For details, see the College of Engineering section of this catalog.

## GE Requirements for Continuing and Transfer Students Under the 1998-1999 and Earlier Catalogs

Nine of your 51 General Education units must be upper division and taken after you complete 60 units. Six of the 9 upper division units must be interdisciplinary courses (I). These 9 units must be completed at CSULB.

Interdisciplinary Courses are required as a part of your General Education breadth requirements. You must complete six units of courses with the "I" suffix in any of the categories specified. These units must be completed before graduation.

You must take one 3-unit Human Diversity course (denoted with a " " in the *Schedule of Classes*) before graduation. These courses occur in several categories at the lower- and upper-division levels. This is a requirement for students under the 1993-94 and subsequent *Catalogs*.

## New GE Requirements for Freshmen Enrolling at CSULB in 1999-2000 or Later or Transferring to CSULB Under These Catalogs

### First Year: Foundation

The first year at CSULB is designed to devote special attention to the development and improvement of fundamental academic skills that are critical to student success in college. Every CSULB student will be expected to demonstrate mastery of key academic skills early in their course of study, ideally within the first year. Among the skills most central to success are communication in English, both written and oral, mathematical concepts and quantitative reasoning, and analytical and critical thinking. Students also need a solid foundation in skills for learning, including the ability to read for information, information retrieval skills, the use of the library, and basic computer skills. In addition, all first-year students will receive an introduction to the University. Finally, the University is committed to fostering the development of communities of learners, and it will provide to all incoming students opportunities for the formation of learning communities.

The Foundation curriculum consists of twelve units of general education courses that meet the distribution requirements in Categories A and B2, and one unit of University 100. The following courses make up the Foundation:

- University 100 (1 unit), "The University." This course is a graduation requirement for students entering as lower-division students. It is coordinated pedagogically with the skills and content of the first-year curriculum. It introduces students to the history of universities (including the history, mission, and character of CSULB) and current issues in higher education. It introduces students to the use of our academic research library and also introduces them to the skills essential for success in an academic environment.
- One 3-unit course in written composition in English.
- One 3-unit course in oral communications.
- One 3-unit course in mathematical concepts and quantitative reasoning.
- One 3-unit course in critical thinking.

The courses listed above must all be completed with a grade of at least "C". Where appropriate exams exist, Foundation requirements may be met by advanced placement.

The 13-unit Foundation curriculum must be completed by the time a student has completed 36 units, except that lower-division transfer students have at least one semester in residence to complete the requirements.

Courses in the Foundation curriculum are numbered from 100 to 199. All other General Education courses have pre- or co-requisites from the Foundation curriculum, and all General Education courses numbered 200 or higher have the entire Foundation curriculum as prerequisites. General Education courses numbered between 100 and 199 may appropriately be taken at the same time as courses in the Foundation curriculum.

### Explorations

After an early focus on fundamental learning and academic skills, students will have an opportunity to explore human knowledge in many disciplines. The Explorations stage encom-

passes all areas outside the Foundation curriculum, except the final nine units of General Education, described under "Capstone."

Although the primary purpose of Explorations is the development of breadth of knowledge, all courses offer opportunities for continued development of foundational skills. Reading, writing, oral discussion and presentation, problem solving and/or quantitative reasoning, and critically- and analytically-based research are central to the learning of content.

In addition, as students progress through their Explorations, they are expected to develop additional skills and attributes, including ethical reasoning, analytical reading, creativity, respect for difference, awareness of other cultures, questioning of stereotypes, the values of citizenship, negotiating skills, and other attributes of use in a diverse society.

### Global Issues

Students are required to complete at least three units of coursework from any category devoted to the study of global issues or world societies and cultures (identified with a "W" in the *Schedule of Classes*).

### Capstone

The final nine General Education units form the Capstone. The purpose of the Capstone is to bring the strands of the General Education experience into focus, to reinforce knowledge and skills acquired from many areas, and to incorporate depth in the form of more sophisticated tools and analysis, if not necessarily in terms of content knowledge. For transfer students, the Capstone may offer an opportunity to connect to the campus in a learning community outside of the major department.

Capstone General Education courses are at the upper-division level. These courses have the entire Foundation curriculum as a prerequisite, along with one or more prerequisites from the Explorations stage. Upper-division standing is also required. All Capstone courses are designed to develop advanced college skills, including synthesis and application of knowledge, analysis, critique, and research.

All students, including transfer students who have completed a certified lower-division General Education program, must complete 9 units of Capstone classes and must do so at CSULB.

Capstone classes are classified as Interdisciplinary (identified with the letter "I" in the *Schedule of Classes*), Advanced Skills (identified with the letter "A"), Service Learning (identified with the letter "S"), or Linked (identified with the letter "L"). Students are permitted to count no more than one Advanced Skills class and one Service Learning class toward the 9-unit Capstone requirement.

### Distribution Requirement

General Education units must be distributed as follows:

#### Category A

Communication in the English Language and Critical Thinking — 9 units to include:

1. One approved course in written English;
2. One approved course in oral communication or a combination of oral and written communication, to in-

clude an understanding of the process of communication and experience in communication;

3. One approved course in critical thinking, designed to develop the ability to reason clearly and logically and to analyze the thinking of others.

### Category B

Physical Universe — 12 units to include:

1. At least six units of inquiry into the physical universe and its life forms to include one approved course in the life sciences and one approved course in the physical sciences; both must involve laboratory experience;
2. At least three units of study in mathematical concepts and quantitative reasoning; approved courses foster an understanding of mathematical concepts rather than merely providing instruction in basic computational skills;
3. Another three units as necessary, selected from approved courses, to achieve a minimum of 12 units.

### Category C

Humanities and the Arts — 12 units to include:

1. At least three units from approved fine arts courses;
2. At least six units from approved courses to include courses in at least two of the following areas:
  - a. literature
  - b. philosophy, and
  - c. foreign languages.
3. Another three units as necessary, selected from approved courses to achieve a minimum of 12 units.

### Category D

Social and Behavioral Sciences and Their Historical Backgrounds — 15 units to include:

1. Citizenship:
  - a. Three units selected from courses in U.S. History;
  - b. Three units selected from courses in U.S. Constitution and Ideals (formerly Category F.)
2. Additional Social and Behavioral Sciences  
Complete at least 9 units from the following courses in at least two disciplines. Students under the 1985 and 1993 GE patterns must complete at least 3 units from the following courses designated as a Global Issues course (●). All courses with a ● in this category meet the category D.2.a. requirement for students following the 1985 and 1993 GE patterns.

### Category E

Self-Integration — 3 units:

At least three units selected from approved courses which facilitate understanding of the human being as an integrated physiological, psychological, and social organism.

Cross categorized courses may count in only one category, not both.

The following General Education courses are approved for the fall semester. There may be some changes in the spring semester. Please consult the Spring *Schedule of Classes* for the updated list.

Suzanne Wechsler

View the CSU, Long Beach *Catalog* on-line at [www.csulb.edu](http://www.csulb.edu) by clicking on "Academics" and then "CSULB Catalog."

**G**eography integrates information from many social and natural sciences by focusing upon human activities within the context of their physical and cultural environment. Because of the diversity of subject matter which it considers, geography offers a broad, liberal education which is applicable to many careers. These include elementary, secondary, and college teaching; cartography; geographic information systems (GIS); computer mapping; regional, urban and environmental planning; business; government, travel and tourism, and the foreign service.

The Geography Department offers the Bachelor of Arts and Master of Arts degrees, as well as a minor. Certain geography courses are applicable to teaching credential programs; to the degree in liberal studies; and to certificate programs in environmental, liberal, urban, Asian, Latin American, and Russian and East European studies, and cartography and GIS.

Students may obtain materials from the department describing the geography programs and courses recommended for career preparation.

The Master of Arts degree in geography is designed for those wishing to expand their geographic competence beyond that expected of the bachelor's degree. The Master of Arts degree in geography is becoming a common requirement for employment advancement and it provides the preparation necessary for success in geography Ph.D. programs at other universities. Candidates are responsible for observing the general requirements stated in this Catalog as well as the specific departmental requirements contained in the Geography Master of Arts Handbook.

## Bachelor of Arts in Geography (code 2-8515) (120 units)

### Requirements

The Geography major requires 48 units of which at least 9 units must be lower division and at least 36 units must be upper division.

Lower Division: 9 units required: GEOG 140 or 150, 160, and 200.

Upper Division: 36 units as follows:

1. Regional courses: 6 units required, only one course marked \* may be used for the regional requirement: 304\*, 306\*, 308I, 309I, 314I, 316, 318, 320I; and 326.
2. Systematic courses: 15 units required, \*\*must include at least one of these systematics: GEOG 440\*\*, 442\*\*, 444\*\*, 352, 381, 446, 455, 452, 460, 466, 467, 470;
3. Methods and Techniques courses: 9 units required which must include GEOG 380 and 6 units from: GEOG 400, 482, 473, 484, 485, 486, 488.

Electives: 9 units required, at least 6 units of which must be upper division Geography courses or U/ST 301I.

Recommendation: Courses should be selected in consultation with the undergraduate advisor for the purpose of planning career objectives. \* At the time of enrollment in 494 or 497 the student must obtain written departmental notification whether the course will meet systematic or methods and techniques or regional requirements for the major.

## Minor in Geography (code 0-8515)

The Minor in Geography is available to any non-Geography major. A minimum of 21 units consisting of GEOG 380 and 18 units chosen in consultation with the undergraduate advisor. At least 12 units must be in upper division.

## Certificate in Cartography and Geographic Information Systems (code 1-8040)

Director  
Franklin Gossette

Associate Directors  
Judith Tyner  
Christopher Lee  
Suzanne Wechsler

This program offers specialized training in a variety of theoretical and applied cartographic techniques. The program is designed to provide experience in communication through maps and serves as a supplement to standard degree programs. It provides essential training for those seeking map making careers in both the public and private sector.

### Requirements

1. A Bachelor's Degree, which may be earned concurrently.
2. Consultation with the Director of the program.
3. 30 units distributed as follows:
  - A. Courses marked with an \* are required;
  - B. At least one elective must be taken from each category;
  - C. Courses marked with \*\* are not available to undergraduate students.

*Design and Presentation:* GEOG 482\*, 484\*

*Analysis:* GEOG 200 (or equivalent)\*, 380\*, 400, 473\*, 485\*, MATH 101 (or equivalent), 117.

*Methods/Applications:* GEOG 486, 488\*, 492, 680\*\*, CE 225, ME 172, GEOL 535\*\*.

## Certificate in Urban and Regional Studies (code 1-8120)

The Urban and Regional Studies Program administered in the Department of Geography offers training in a variety of significant urban problem areas. The certificate program is designed to provide exposure to the analysis of urban problems and serves as an excellent supplement to standard degree programs. It offers essential training for those seeking both private sector and public sector careers in fields concerned with the urban region, its development, problems, and special communities.

Because urban problems cut across such a variety of disciplines, the program is characterized by an interdisciplinary approach. This is accomplished within the certificate curriculum by allowing students to draw together in a distinctive mix related courses from a variety of other departments. The result is a program that provides essential knowledge of the dynamics of urban regions. This approach assures a common core of essential knowledge, while allowing flexibility to each student in designing an individualized program of study using electives drawn from a variety of relevant disciplinary concentrations. The Certificate Program in Urban and Regional Studies is a 24-unit course of study comprised of 9 units of core requirements and 15 elective units.

A brochure describing the Urban and Regional Studies Certificate Program in greater detail is available in the Geography Department Office.

### Requirements

1. A bachelor's degree;

2. Consultation with the undergraduate advisor of the Geography department;
3. Twenty-four units distributed as follows:  
Core requirements: U/ST 3011, GEOG 466 and 467.

Elective Courses: 15 units to be selected from the following: ANTH 416; ASAM 345; ECON 300, 436, 437, 451; FIN 342; GEOG 452; HIST 469, 474; FCS 342; CHLS 350 (same as SOC 340); POSC 327, 442, 447 or 448; PSY 375; C/LA 319 (same as AIS 319, AMST 319, ASAM 319, B/ST 319, CHLS 319, W/ST 319); SOC 340 (same as CHLS 350), 410; U/ST 446; W/ST 432.

## Master of Arts in Geography (code 5-8515)

### Prerequisites

1. A bachelor's degree in geography; or,
2. A bachelor's degree with 24 units of upper division courses substantially equivalent to those required for a geography major at this University; or,
3. A bachelor's degree in a related discipline with 24 units of upper division courses in a combination of geography and approved courses in related disciplines;
4. Completion of introductory statistics course;
5. An undergraduate GPA of 3.0 (B) or better in geography, or alternative evidence of ability to do graduate work;
6. File with the department a declaration of intent to seek the master's degree in geography.

### Advancement to Candidacy

1. See the Geography Graduate Study Handbook;
2. See the general University requirements;

### Requirements

1. Completion of courses required to remove foundational and prerequisite deficiencies;
2. Passage of the Writing Proficiency Examination;
3. Completion of 30 units of approved upper division and graduate courses. A minimum of 24 units of Geography courses. If not already taken for undergraduate credit, a Cartography course (GEOG 482 and 485/585 qualify) and a Field Methods course (GEOG 486 qualifies). A minimum of 18 units of 500- and 600-level courses, which must include GEOG 596, 2 seminars and 6 units of thesis (GEOG 698).

### Grouping of Geography Courses

The CSULB Geography Department encourages geography students to acquire a knowledge of the breadth of the discipline, to develop an understanding of the regional and systematic approaches to studying and applying the discipline, and to become proficient in the application of the methods of inquiry and analysis that are employed in the discipline. To facilitate the development of a prepared and well rounded geographer, Geography courses are grouped into three affinity clusters: Regional Geography Courses, Systematic Geography Courses; and Methods and Techniques Geography Courses. Students are urged to complete courses in each cluster and to seek the advice of the undergraduate advisor and other faculty to identify courses that are best suited to meet their educational and career objectives.

---

## Regional

---

These courses examine the relationships among peoples, cultures, and their landscapes in specific areas of the world. There are no prerequisites for these courses; their broad scope provides the student with a better understanding and appreciation of the world in which we live. Thus, they are ideally suited for general education and liberal studies.

- 100. World Regional Geography
- 304. California
- 306. United States and Canada
- 307I. Modernization in Global Perspective
- 308I. Africa South of the Sahara
- 309I. The Middle East and North Africa
- 314I. South and Southeast Asia
- 316. Europe
- 318. Russia and Its Neighbors
- 320I. Latin America
- 326. Pacific Island Area

---

## Systematic Geography

---

These courses address with diverse subjects and are organized to provide the basic framework for the physical and cultural sub-fields of the discipline.

- 120. Geography of Human Diversity in the United States
- 140. Introduction to Physical Geography
- 150. Planet Earth: An Introduction
- 160. Introduction to Human Geography
- 319. International Development
- 352. Geography of Travel and Tourism
- 355. International Environmental Issues
- \*381. Maps and Civilization
- 301I. Urban Life and Problems
- 440./540. Land and Water Environments
- \*442. Biogeography
- \*444. Climatology
- \*446 Land Use Planning
- \*452. Economic Geography
- \*455. People As Agents of Environmental Change
- \*460. Population Geography
- \*466. Urban Geography: Principles
- 467./567. Urban Geography: Metropolitan Problems
- \*470. Political Geography

---

## Methods and Techniques

---

These courses develop skills in graphic and statistical communication and field analysis which are used within the various sub-fields of the discipline.

- 200. Introduction to Research Methods for Geographers
- 380. Map Interpretation and Analysis
- \*400. Geographical Analysis
- \*482. Thematic Map Design for Presentation and GIS
- \*473. Remote Sensing
- 484./584. Advanced Concepts in Presentation Cartography
- 485./585. Introduction to Geographic Information Systems
- \*486. Field Methods in Landscape Analysis
- 488./588. Geographic Information Systems

---

## General

---

- \*492. Internship in Applied Geography
- \*494. Special Topics
- \*497. Directed Studies

---

## Geography Courses (GEOG)

---

### Lower Division

#### 100. World Regional Geography (3)

Prerequisite/Corequisite: One G.E. Foundation course. Through a spatial approach, World Regional Geography introduces students to the world's geographic realms and examines their cultural, population and political dynamics, resources and economic development, patterns of settlement and environmental elements. Same course as GEOG 100W. Not open to students with credit in GEOG 100W.

#### 100W. World Regional Geography (3)

Through a spatial approach, World Regional Geography introduces students to the world's geographic realms and examines their cultural, population, and political dynamics, resources and economic development, patterns of settlement and environmental elements. Same course as GEOG 100. Not open to students with credit in GEOG 100.

#### 120. Geography of Human Diversity in the United States (3)

Prerequisite/Corequisite: One G.E. Foundation course. This course examines America's Human Diversity from a geographic perspective. Four broad themes are considered: (1) the ways in which the social categories of race/ethnicity and gender/sexuality impact the spatial distributions of different people across the country; (2) the distinctive expressions of human diversity on/in the cultural landscapes of rural and urban United States; (3) the day-to-day spatial politics (i.e., social-spatial processes) that exclude/include different groups in different places; and (4) the patterns that emerge in a particular spatial context, southern California.

#### 140. Introduction to Physical Geography (3)

Prerequisite/Corequisite: One G.E. Foundation course. Systematic study of the physical environment with an emphasis on human-environmental interaction and perceptions of environmental hazards and resources. Not open to students who have completed GEOG 150. (CAN GEOG 2)

#### 150. Planet Earth: An Introduction (3)

Prerequisite/Corequisite: One G.E. Foundation course. Introduction to the earth as a whole, its many regions, and the structures and processes that determine the environment we live in. Explorations of weather and climate: landforms, earthquakes, volcanoes; coastal and water resources; ecosystem patterns; and human-environmental interactions. Focus on the dynamic environment of southern California. Small group activity sections involve field experiences, computer based activities and lab projects. Not open to students who have completed GEOG 140.

#### 160. Introduction to Human Geography (3)

Prerequisite/Corequisite: One G.E. Foundation course. Geographic aspects of culture, including the past and present social, political and economic factors that are related to man's perception, organization and use of his environment. (CAN GEOG 4)

#### 200. Introduction to Research Methods for Geographers (3)

An introduction to the scientific method in geography with an emphasis on geographic information science. (Lecture 2 hours, Laboratory 2 hours).

#### 250. The World: Origins to 1500 (4)

Prerequisites: Open only to Integrated Teacher Education Program (ITEP) students. This course uses the perspectives of history and geography to introduce students to the civilizations of Eurasia, Africa, and the Americas as they developed prior to European contact. To understand their origins and subsequent growth and development, special attention will be given to geographic and historical factors such as location and place, human/environment interactions, migrations, cultural and technological diffusion as well as the intensity of cross-cultural contact and exchange between cultures and civilizations over time. Same as HIST 250.

### Upper Division

General Education Category A must be completed prior to taking any upper division course.

#### 301. The Urban Scene (3)

Prerequisites: ENGL 100 and upper division status. Not open to students with credit in SOC 419. Review and analysis of the changing urban scene: urban life-styles; community patterns of land use and design; population trends; conflicts in the increasingly multicultural set-

ting of the central city; housing and community development; sub-urban-central city relationships; human utilization of urban life spaces; examination of the views of landmark urbanists; and future trends. Same course as U/ST 3011.

**304. California (3)**

California's diverse natural and cultural environment with emphasis upon social and economic problems and the human response to environmental hazards.

**306. United States and Canada (3)**

Common social, economic and political interests of the major human use regions of the United States and Canada. Describes and interprets the culture patterns of each region in relation to the natural settings in which they have developed.

**307I. Modernization in Global Perspective (3)**

Prerequisites: Completion of the G.E. Foundation, one or more Explorations courses, and upper-division standing. An exploration of the ways in which current psychological and material problems in modern society (both western and Third World) can be traced to a process of accelerating change which began with the advance of technology, the rise of capitalism, the abandonment of "old values," the increasing complexity of bureaucracy and a lowering of social barriers. Exploration of all facets of modernization utilizing films, discussions and readings (fiction and nonfiction). Same course as HIST 307I and ANTH 307I.

**308I. Africa South of the Sahara (3)**

Prerequisites: Completion of the G.E. Foundation, one or more Explorations courses, and upper-division standing. Human and environmental settings of Africa South of Sahara and the ecological, cultural, demographic, economic settlement and political relationships that characterize them.

**309I. The Middle East and North Africa (3)**

Prerequisites: Completion of the G.E. Foundation, one or more Explorations courses, and upper-division standing. Human and physical settings of the Middle East and North Africa and the cultural, economic, settlement, and political relationships that characterize them stressing those factors which underlie the region's instability and global importance.

**313. Southeast Asia (3)**

Prerequisites: Completion of the GE Foundation, one or more Exploration courses and upper division status. This course is a cross-cultural examination of the various characteristics and problems found across the region of: Southeast Asia. The specific foci will be: environmental and cultural patterns, the historical development of the spatial organization of society, demographic and other dynamics of social change related to issues of socio-economic and political development. Traditional grading only.

**314I. South Asia (3)**

Prerequisites: Completion of the GE Foundation, one or more Exploration courses and upper division status. This course is a cross-cultural examination of the various characteristics and problems found across the region of: South Asia. The specific foci will be: environmental and cultural patterns, the historical development of the spatial organization of society, demographic and other dynamics of social change related to issues of socio-economic and political development. This course will satisfy an interdisciplinary capstone requirement. Traditional grading only.

**315. East Asia (3)**

Prerequisites: Completion of the GE Foundation, one or more Exploration courses and upper division status. This course is a cross-cultural examination of the various characteristics and problems found across the region of: East Asia. The specific foci will be: environmental and cultural patterns, the historical development of the spatial organization of society, demographic and other dynamics of social change related to issues of socio-economic and political development. Traditional grading only.

**316. Europe (3)**

The human and physical patterns of Europe. Current cultural conditions and environmental problems.

**318. Russia and Its Neighbors (3)**

Systematic and regional study of the physical, economic and cultural geography of the Soviet Union.

**319. International Development (3)**

This course focuses on the issues and problems of development confronting the countries of the Third World. The causes and theories of underdevelopment will provide a background for identifying the problems of underdevelopment and for exploring regional, national and global strategies for development. Same course as I/ST 319I.

**320I. Latin America (3)**

Prerequisites: Completion of the G.E. Foundation, one or more Explorations courses, and upper-division standing. Human and environmental characteristics of Middle and South America with a focus on the historical-cultural factors which shaped their present-day societies and the problems of population growth, resource utilization and economic development.

**326. Pacific Island Area (3)**

Regional synthesis of the physical and cultural geography of Australia, New Zealand and the island groups of Oceania.

**352. Geography of Travel and Tourism (3)**

Historical and contemporary spatial characteristics and dimensions of tourism activity. Tourism, destinations, travel patterns, environmental and economic impacts, and analysis of regional tourism patterns.

**355. International Environmental Issues (3)**

An examination of the deterioration, destruction, maintenance and restoration of environmental systems and resources forms the core content of this course. Identification of major environmental problems that have international dimensions, an analysis of their causes and ramifications, and an investigation of potential and/or already initiated attempts at their resolution form the structural framework of the course. Same course as I/ST 355.

**380. Map Interpretation and Analysis (3)**

Interpretation and understanding of maps as graphic communication with particular emphasis on critical analysis, symbolization, scale, and projection. (Lecture, problems 3 hours)

**\*381. Maps and Civilization (3)**

Maps and Civilization is an interdisciplinary and cross-cultural examination of the role maps play in different cultures. It draws upon the disciplines of cartography, geography, history, art, and science. It looks at maps in both Western and non-Western cultures; both conventional and alternative cartographies; and mapping activities of both men and women. Traditional grading only.

**\*400. Geographical Analysis (3)**

Prerequisite: MATH 180 or any other equivalent introductory statistics course. Examination of advanced quantitative techniques commonly employed by geographers in analysis of spatial phenomena. Topics to be covered include: multivariate statistical methods as models for geographical analysis. Emphasis on the application of these techniques in geographical research, including the use of computers where appropriate.

**440./540. Land and Water Environments (3)**

Prerequisites: GEOG 140 and 380 or consent of instructor. (Undergraduates register in GEOG 440; graduates register in GEOG 540.) Land-forms and related soil and water resources as physical components of the human environment. (Lecture-problems and field experience.)

**\*442. Biogeography (3)**

Prerequisite: GEOG 140. A course in biology is strongly recommended. Methods of mapping plant and animal distributions, spatial interaction with environmental limiting factors and man's role in temporal and spatial variation of ecosystems. (Lec-problems; field experience.)

**\*444. Climatology (3)**

Prerequisites: GEOG 140 or GEOG 150 or GEOL. 163. Descriptive and explanatory analysis of the elements and controls of climate. Climates of the world with emphasis on California and North America. (Lecture, problems 3 hours)

**\*446. Land Use Planning (3)**

Not open to students with credit in U/ST 446 Land Use Planning. This course provides an examination of urban land use planning from the perspective of professional urban planners. The course will focus on planning issues and responses in some of the following major areas: land use; coastal zone planning; resource planning; urban growth, speculation, and economics; design and aesthetic issues; planning parameters for residences, shopping centers; and industrial parks; revitalization of built-up core areas and transportation. Same course as U/ST 446.

**\*452. Economic Geography (3)**

Prerequisite: Consent of instructor. Location theory and its application to the study of the distribution of various economic activities, international and interregional changes in the spatial structure of economic activities and the role of these changes in international and regional development. (Lecture, problems.)

**\*455. People As Agents of Environmental Change (3)**

Spatial variations in environmental change as effected by humans. A systematic and regional analysis at both macro and micro levels. (Lecture 3 hours.)

**\*460. Population Geography (3)**

Introduction to the geographic study of population. Includes growth and distribution of world population; results of changing births, deaths, and migration; variations in population composition; related problems such as food supplies and environmental deterioration.

**\*466. Urban Geography: Principles (3)**

Examination of cities; their location, shape, structure and function. Selected world population clusters, theoretical and practical application of urban planning and the evolution of cities are studied. (Lecture-problems.)

**467./567. Urban Geography: Metropolitan Problems (3)**

Prerequisite: GEOG 466 or consent of instructor. (Undergraduates register in GEOG 467; graduates register in GEOG 567.) Geographic components of metropolitan problems and their solutions. Problems related to transportation systems, housing, evolution of ghettos, urban perception and behavioral patterns will be discussed in terms of theoretical and practically applied urban planning solutions. (Lec, problems 3 hrs.)

**\*470. Political Geography (3)**

Prerequisite: GEOG 100 or consent of instructor. Comparative study of the earth's politically organized regions and related systems. Varied approaches are explored, such as power analysis, genetic analysis and functional analysis of political units. Stress is upon political geographic concepts used in analyzing the viability of states and nations. (Lecture, problems.)

**\*473. Remote Sensing (3)**

Prerequisites: GEOG 200 and 380, or consent of instructor. Interpretation and processing of remotely sensed imagery including acquisition of imagery, the electromagnetic spectrum, kinds of imagery, and digital methodology. (Lecture 2 hours, laboratory 2 hours.)

**\*474. Introduction to Digital Image Processing (3)**

Prerequisites: GEOG 140 and 473 or permission of instructor. Provides a background to the principles and concepts of digital image processing and the extraction of information from digital satellite data with focus on various enhancement and extraction techniques, specifically, within the visible and near-infrared portions of the electromagnetic spectrum. Traditional grading only for Majors/Minors (Lecture 2 hours; Lab 2 hours)

**475A./575A. Geographic Applications in Remote Sensing: NASA Applications (3)**

Prerequisites: GEOG 140,160, 473, and 474 Focuses on the inner workings of the NASA Applications Division as well as ongoing projects and upcoming programs funded by that Division. Chief among these projects is the Southern California Wildfire Hazard Center, a NASA Regional Earth Science Application Center (RESAC) housed at CSULB. Students will be introduced to sophisticated imagery and analysis techniques, weather modeling, and static GIS data layers used to assess various fire hazard indexes derived for use by fire and planning officials. Traditional grading only for Majors/Minors.

**475B./575B. Geographic Applications in Remote Sensing: Urban Environment Applications (3)**

Prerequisites: GEOG 140, 160, 473, and 474 Focuses on remote sensing applications specific to municipal and county governments. Spatial data sets with high spatial and temporal resolution are identified and discussed in the context of what in many cases, are rapidly developing techniques to support cadastral, transportation, emergency response and infrastructure needs. Traditional grading only for Majors/Minors

**475C./575C. Geographic Applications in Remote Sensing: Arid Lands Applications (3)**

Prerequisites: GEOG 140, 160, 473, and 474 Focuses on remote sensing applications specific to arid environments. Problems and processes specific to the worlds arid lands are identified and discussed in the context of both published literature and current research projects. Applications focus on vegetation, hydrology, geology, and geomorphology. Global desertification, famine early warning and food security issues are also examined. Traditional grading only for Majors/Minors.

**\*481. Geographic Information Science for Natural Sciences (4)**

Prerequisites: Junior/Senior/Graduate standing; GEOG 140 or 150 or BIOL 153 or 211B or GEOL 102. This course introduces the fundamentals of geographic information science and systems (GIS) to non-geography students. The course introduces the concepts of and develops skills in spatial reasoning and spatial thinking. Students explore the use of GIS for spatial query, problem analysis and decision support using examples tailored to biologic, geologic and ecologic applications. Previous course work or experience in GIS would be helpful but is not required. (2 hours of seminar, 2 hours of computer laboratory.)

**\*482. Map Design for Presentation and GIS (3)**

Prerequisites: GEOG 200 or equivalent and 380 or consent of instructor. Theory and techniques in the creation of thematic maps including design, generalization, and symbolization, with an emphasis on computer presentation methods. (Seminar 2 hours, laboratory 2 hours.)

**484./584. Advanced Concepts in Presentation Cartography (3)**

Prerequisites: GEOG 200 or equivalent, GEOG 380 and GEOG 482. (Undergraduates register in GEOG 484; Graduates register in GEOG 584.) Advanced theory and techniques for presentation cartography including communication, visualization, terrain representation, animation, and color. (Seminar 2 hours, Laboratory 2 hours.) Traditional grading only.

**485./585. Introduction to Geographic Information Systems (3)**

Prerequisites: GEOG 200 or equivalent; GEOG 482 or consent of instructor. (Undergraduates register in GEOG 485; Graduates register in GEOG 585.) Fundamental concepts and techniques of geographic information systems are introduced, including problems of acquiring and processing machine-readable map data. (Seminar 2 hours, laboratory 2 hours) Traditional grading only.

**\*486. Field Methods in Landscape Analysis (4)**

Prerequisite: GEOG 380 or consent of instructor. Introduction to field techniques, including formulation of field plans, recording direct observation, field mapping, sampling techniques, interviewing, and organizing and evaluating data for presentation. (Lecture-discussion 1 hour, supervised field work 6 hours)

**488./588. Geographic Information Systems (3)**

Prerequisites: GEOG 200 or equivalent; GEOG 380 and GEOG 482; GEOG 485 or permission of instructor. (Undergraduates register in GEOG 488; Graduates register in GEOG 588.) Advanced concepts in geographic information systems and techniques are introduced and their applications in geography and related disciplines are explored. (Seminar 2 hours; laboratory 2 hours.) Traditional grading only.

**\*492. Internship in Applied Geography (3)**

Prerequisites: Geography major with upper division or graduate standing, prior geography coursework or equivalent recommended, and consent of instructor. Community-based placement to enhance professional preparation in applied geography. May be repeated once for credit; a second semester experience shall differ substantially from first semester experience. Undergraduates may elect Credit/No Credit or letter grading; letter grading only is required for graduate students. Student will work under faculty supervision.

**\*494. Special Topics (1-3)**

Prerequisite: Consent of instructor. Application of geographical concepts and methodology to selected contemporary problems. Themes will be announced in the Schedule of Classes. May be repeated for a max of 6 units with consent of department chairperson. May not be credited toward the major in geography without written department consent in advance of enrollment.

### \*497. Directed Studies (1-3)

Prerequisite: Consent of instructor. Individually directed studies of special problems in geography. May be repeated for a maximum of six units with consent of department chairperson. May not be credited toward the major in geography without written department consent in advance of enrollment.

## Graduate Division

### 540./440. Land and Water Environments (3)

Prerequisites: GEOG 140 and 380 or consent of instructor. (Undergraduates register in GEOG 440; graduates register in GEOG 540.) Landforms and related soil and water resources as physical components of the human environment. (Lecture-problems and field experience.)

### 567./467. Urban Geography: Metropolitan Problems (3)

Prerequisite: GEOG 466 or consent of instructor. (Undergraduates register in GEOG 467; graduates register in GEOG 567.) Geographic components of metropolitan problems and their solutions. Problems related to transportation systems, housing, evolution of ghettos, urban perception and behavioral patterns will be discussed in terms of theoretical and practically applied urban planning solutions. (Lec, problems 3 hrs)

### 575A./475A. Geographic Applications in Remote Sensing: NASA Applications (3)

Prerequisites: GEOG 140, 160, 473, and 474 Focuses on the inner workings of the NASA Applications Division as well as ongoing projects and upcoming programs funded by that Division. Chief among these projects is the Southern California Wildfire Hazard Center, a NASA Regional Earth Science Application Center (RE-SAC) housed at CSULB. Students will be introduced to sophisticated imagery and analysis techniques, weather modeling, and static GIS data layers used to assess various fire hazard indexes derived for use by fire and planning officials. Traditional grading only for Majors/Minors.

### 575B./475B. Geographic Applications in Remote Sensing: Urban Environment Applications (3)

Prerequisites: GEOG 140, 160, 473, and 474. Focuses on remote sensing applications specific to municipal and county governments. Spatial data sets with high spatial and temporal resolution are identified and discussed in the context of what in many cases, are rapidly developing techniques to support cadastral, transportation, emergency response and infrastructure needs. Traditional grading only for Majors/Minors

### 575C./475C. Geographic Applications in Remote Sensing: Arid Lands Applications (3)

Prerequisites: GEOG 140, 160, 473, and 474. Focuses on remote sensing applications specific to arid environments. Problems and processes specific to the world's arid lands are identified and discussed in the context of both published literature and current research projects. Applications focus on vegetation, hydrology, geology, and geomorphology. Global desertification, famine early warning and food security issues are also examined. Traditional grading only for Majors/Minors.

### 584./484. Advanced Concepts in Presentation Cartography (3)

Prerequisites: GEOG 200 or equivalent, GEOG 380 and GEOG 482. (Undergraduates register in GEOG 484; Graduates register in GEOG 584.) Advanced theory and techniques for presentation cartography including communication, visualization, terrain representation, animation, and color. (Seminar 2 hours, laboratory 2 hours.) Traditional grading only.

### 585./485. Introduction to Geographic Information Systems (3)

Prerequisites: GEOG 200 or equivalent; GEOG 482 or consent of instructor. (Undergraduates register in GEOG 485; Graduates register in GEOG 585.) Fundamental concepts and techniques of geographic information systems are introduced, including problems of acquiring and processing machine-readable map data. (Seminar 2 hours, laboratory 2 hours.) Traditional grading only.

### 588./488. Geographic Information Systems (3)

Prerequisites: GEOG 200 or equivalent; GEOG 380; GEOG 482; GEOG 485 or GEOG 585 or permission of instructor. (Undergraduates register in GEOG 488; Graduates register in GEOG 588.) Ad-

vanced concepts in geographic information systems and techniques are introduced and their applications in geography and related disciplines are explored. (Seminar 2 hours; laboratory 2 hours.) Traditional grading only.

### 596. Literature and Methods in Geography (3)

Prerequisite: Consent of instructor. Proseminar in the methods, theory and techniques of geographic investigation with emphasis upon classical and contemporary literature.

### 600. Seminar in Regional Geography (3)

Prerequisite: Consent of instructor. Regional methods of study common to geographic research, and their utilization in developing regional concepts.

### 640. Seminar in Physical Geography (3)

Prerequisite: Consent of instructor. Physical/environmental issues and problems.

### 650. Seminar in Cultural Geography (3)

Prerequisite: Consent of instructor. Systematic investigation of human occupancy in its varied environmental and regional settings. May be repeated once with consent of department advisor.

### 666. Seminar in Urban Geography (3)

Prerequisite: Consent of instructor. Geographic concepts and techniques of research applied to specific urban areas. May be repeated once with consent of department advisor.

### 680. Seminar in Cartography and Geographical Information Systems (3)

Prerequisites: Consent of Instructor. Application of geographic concepts and methodology to selected cartographic and GIS problems. Maybe be repeated with the consent of Department Advisor. Possible research themes: cartographic communication, history of cartography, applications of geographic information systems.

### 697. Directed Research (1-3)

Prerequisite: Consent of instructor. Research in geography supervised on an individual basis.

### 698. Thesis (1-6)

Prerequisite: Consent of instructor. Planning, preparation and completion of thesis for the master's degree.

---

## Urban and Regional Studies Courses (U/ST)

---

### Upper Division

General Education Category A must be completed prior to taking any upper division course.

### 3011. The Urban Scene (3)

Prerequisites: Completion of the G.E. Foundation, one or more Explorations courses, and upper-division standing. Not open to students with credit in SOC 419. Review and analysis of the changing urban scene: urban life-styles; community patterns of land use and design; population trends; conflicts in the increasingly multicultural setting of the central city; housing and community development; suburban-central city relationships; human utilization of urban life spaces; examination of the views of landmark urbanists; and future trends. Same course as GEOG 301.

### \*446. Land Use Planning (3)

Not open to students with credit in U/ST 490 Land Use Planning. This course provides an examination of urban land use planning from the perspective of professional urban planners. This course will focus on planning issues and responses in some of the following major areas: land use, coastal zone planning; resource planning; urban growth, speculation, and economics; design and aesthetic issues; planning parameters for residences; shopping centers, and industrial parks; revitalization of built-up core areas and transportation. Same course as GEOG 446.

### 490. Topics in Urban and Regional Studies (1-3)

Prerequisite: Consent of instructor. Topics of current interest in urban and regional studies selected for intensive development. Topics will be announced in the *Schedule of Classes*.

### 499. Independent Study (1-3)

Prerequisite: Consent of instructor. Independent study under the supervision of a faculty member.

View the CSU, Long Beach *Catalog* on-line at [www.csulb.edu](http://www.csulb.edu) by clicking on "Academics" and then "CSULB Catalog."

The Geological Sciences includes the study of the solid earth, the hydrosphere, and the atmosphere. Within the broad field of Geological Science students may elect to take course work leading to professional careers in such areas as geohydrology, environmental geology, urban geology, engineering geology, petroleum geology, mineral exploration and government service. The degree programs also prepare students for academic careers in schools or universities, although additional work is usually required for such careers. All Earth Science and Geology majors must contact the department office to obtain a departmental advisor prior to the first semester in residence.

The Geological Sciences Department participates in the Southern California Marine Institute. See the Ocean Studies Institute section of this *Catalog* for additional information.

## *Concurrent and/or Summer Enrollment in Another College*

Students who wish to take course work in a community or another college to meet curricular requirements while enrolled as undergraduates in the College of Natural Sciences and Mathematics must petition the appropriate department for prior approval to enroll in specific courses. This policy applies to concurrent enrollment or summer enrollment. University policy must also be complied with. See 'Concurrent Enrollment' and 'Transfer of Undergraduate Credit' in this *Catalog*. Courses not receiving prior approval will not be accepted for credit by the department.

## *Facilitated Enrollment into Classes*

All entering students who declare a major in a degree program offered by this Department should participate in the College of Natural Sciences and Mathematics' Science Safari to Success (for first-time freshmen) or EONS (Enrollment and Orientation in the Natural Sciences and Mathematics for transfer students) Program. These programs are held in June-July for those starting in the Fall Semester and in January for those starting in the Spring Semester. Department advisors will be available to provide an overview of the students' chosen baccalaureate degree program, to assist with academic advisement, to provide information on the many career opportunities available, and to aid students in enrolling in classes. Contact the Student Access to Science Center (FO5-109) or Department Office for additional information.

## **Bachelor of Science in Geology (code 3-7664) (126-133 units)**

The bachelor of science degree program is intended to provide a thorough background in the geological sciences for those planning to pursue careers in industry or to do graduate study. The program is designed with the conviction that, in an ever-changing and technologically-oriented industry and research environment, a student must have a strong geological background. As such, he/she needs a program which explores the fundamental geological processes, cultivates skills in integrative three-dimensional geological thinking, provides laboratory and field experience, and stimulates interest in the many subdisciplines of the geological sciences.

Within the broad field of geology, students may elect to follow any one of five emphases: General Geology, Petroleum Geology, Stratigraphy/Sedimentology, Geochemistry/Mineralogy-Petrology, and Structural Geology. Each student should contact the undergraduate advisor for assistance in planning the degree program.

Geology majors must receive a grade of "C" or better in all courses required for the major. A grade of "C" or better is required in the laboratory portion of each geology course in order to pass that course. Also, before any geology course can be taken, all geology prerequisites for that course must be completed with a grade of "C" or better.

A minimum of 126-133 units is required for the bachelor of science degree in the various emphases in geology. Emphases

other than General Geology are based on the General Geology emphasis, but have structured electives and other variations from that plan. An additional course chosen with the consent of the undergraduate advisor may be recommended for individual emphases, transfer students should fulfill, prior to transferring, the appropriate lower division curricular requirements as outlined in later sections. Particular attention should be paid to fulfilling the lower division math, chemistry, physics, and biology requirements.

Lower Division: GEOL 102, 104, 240, 273; MATH 122, 123, CHEM 111A-B; PHYS 151, 152; BIOL 200. Additional required courses for the various emphases are listed below.

Upper Division: GEOL 321, 324, 341, 343, 428, 429, 433, 450, 451. Additional required courses for the various emphases are listed below.

1. General Geology: Twelve units of elective courses (normally at upper division) approved in advance by the undergraduate advisor. At least one of the courses taken toward these 12 units must be chosen from among the following: GEOL 460, 461, or 462.
2. Petroleum Geology: MATH 224, GEOL 420, 460, 461, 471.
3. Stratigraphy/Sedimentology: GEOL 364, 364L, 420, 424, 431, 461.
4. Geochemistry/Mineralogy-Petrology: MATH 224; CHEM 371A-B; GEOL 461.
5. Structural Geology/Tectonics: GEOL 430, 460, 462; MATH 224, 370A.

### Minor in Geology (code 0-7664)

The Minor in Geology is available to any non-Geology major.

Twenty units in geology courses which must include:

Lower Division: GEOL 102, 104, 240.

Upper Division: At least 9 additional units of geology approved in advance by the appropriate undergraduate departmental advisor.

### Bachelor of Science in Earth Science (code 3-7663) (130-131 units)

The Earth Science program prepares students to understand the natural environment, earth resources, land and ocean use, pollution, geology of the sea floor, and other areas of critical importance to present and future world problems. Career-oriented interdisciplinary emphases are offered in Geohydrology/Environmental Geology, Engineering Geology, Exploration Geophysics, and Marine Geology/Oceanography.

Earth Science majors must receive a grade of "C" or better in all courses required for the major. A grade of "C" or better is required in the laboratory portion of each geology course in order to pass that course. Also, before any geology course can be taken, all geology prerequisites for that course must be completed with a grade of "C" or better.

As outlined below a minimum of 124 units is required for the various emphases in Earth Science.

Lower Division: GEOL 102, 104, 240, 273; MATH 122, 123, 224; CHEM 111A; PHYS 151, 152.

Upper Division: GEOL 324, 343, 428, 433, 460.

1. Geohydrology/Environmental Geology: MICR 200; CHEM 111B; CE 205, 335, 336; GEOL 450, 451, 461, 477, 496 (1 unit devoted to hand specimen petrology which MUST be taken the same semester as GEOL 428); and a minimum of 3 units selected in consultation with the undergraduate advisor.

2. Engineering Geology: BIOL 200; CHEM 111B, CE 205, 345, 346, 445, ME 373; GEOL 431, 450, 477, 496 (1 unit devoted to hand specimen petrology which MUST be taken the same semester as GEOL 428).
3. Exploration Geophysics: BIOL 200; MATH 247, 370A-B; PHYS 310, 340A, 402; GEOL 462, 496 (1 unit devoted to hand specimen petrology which MUST be taken the same semester as GEOL 428), and a minimum of 7 units selected in consultation with the undergraduate advisor.
4. Marine Geology/Oceanography: BIOL 200; CHEM 111B; GEOL 321, 341, 364, 364L, 429, 452, 461, 465, 466, and a minimum of 3 units selected in consultation with the undergraduate advisor.

### Master of Science Degree in Geology (code 6-7664)

The Department of Geological Sciences offers a comprehensive program of courses coupled with appropriate thesis projects leading to the Master of Science in Geology. Within geology, students specialize in any of a number of sub-disciplines including engineering geology, environmental geochemistry, geology, hydrogeology, marine geology, mineralogy and petrology, paleontology, petroleum geology, sedimentology, stratigraphy, structural and field geology, and volcanology. In addition, a formal emphasis in geophysics is available. Students may include in their studies courses offered by other departments at CSULB, or courses at California State University Northridge and California State University Los Angeles; CSULB participates with both universities in a joint Master's program.

The objectives of the Master of Science in Geology are (1) to train individuals with the competence required by the geological profession for employment in industry and government agencies, (2) to enable promising students to attain a level of knowledge and research ability required for admission to Ph.D. programs at other universities, and (3) to provide course work and research experience necessary for students planning to teach geology at the community college level.

#### Emphasis in Geophysics

The emphasis in geophysics is available for students wishing to specialize in the application of geophysical principles to the solution of problems in engineering geology, geohydrology, structural geology, tectonics, petroleum geology, and mineral exploration. Students following this Emphasis are expected to have completed the equivalent of course work required for the B.S. in Earth Science, Geophysics emphasis, and additionally to complete M.S. requirements with a program of geophysical course work approved in advance by both the graduate advisor and a geophysics advisor. Appropriate B.S. programs which provide training suitable for completion of the M.S. in Geology, Geophysics Emphasis, include Civil and Electrical Engineering, Physics, Mathematics, and Geology in addition to Geophysics, although some deficiencies will exist in these alternate programs. Students should confer with the graduate advisor about this program.

#### Departmental Resources

Resources available for thesis research include atomic absorption, spectrophotometer, flame photometer, UV/visible spectrometer, carbon-sulfur analyzer, HEPA-filtered clean laboratories for inorganic and organic geochemistry sample processing, scanning electron microscope, transmission electron microscope, EG & G ES-1225 seismic unit with falling weight energy source,

Wild theodolite and electronic distance measurement unit, La-Coste and Romberg gravity meters (D meter with electrostatic feedback device and G-level), surface resistivity/self potential apparatus, GSSI System 10 color-enhanced ground penetrating radar, total field proton magnetometer with gradiometer, cesium vapor magnetometer, X-ray diffraction and fluorescence units, hydrous pyrolysis pressure vessel, gas chromatographs, stable isotope vacuum lines, ICP-MS with laser ablation system, automated microwave digestion system, department computer network featuring PC's and Macintosh computers, a portable PC for interfacing with field geophysical instruments, a Hewlett-Packard Draft-Master plotter, several printers, a scanner, and access to the oceanographic research ship R/V Yellowfin with associated oceanographic equipment including a proton precession magnetometer and a high resolution seismic reflection and side-scan sonar mapping systems.

### Admission to the Program

The basic requirement for admission to the graduate program is possession of a bachelor's degree or equivalent in geology or earth sciences comparable to degrees offered at CSULB. The student normally will be expected to have completed as an undergraduate acceptable work in certain basic lower division and upper division subjects. Lower division subjects include calculus, calculus-based physics, chemistry, biology, computer programming and statistics. Upper division subjects depend on the degree emphasis and sub-discipline to be followed by the student, and generally include (but may not be limited to) courses required by the corresponding undergraduate emphases. Students who are missing some of this course work may be admitted to the program but will be expected to remove deficiencies or present acceptable alternatives.

In addition to the above course work requirements, students are required to take both the General (quantitative and verbal) and Geology subject tests of the Graduate Record Examination and to submit three letters of recommendation prior to entry.

Prospective graduate students in the geological sciences, including CSULB graduates, must formally apply for admission to CSULB as described previously in this *Catalog* and must also apply directly to the Department of Geological Sciences. All applicants must submit the following documents directly to the department no later than 15 April for the fall semester or 15 November for the spring semester to receive consideration for admission:

1. Department Application Form, available from the department office;
2. Official transcripts of all college level academic work including that done at CSULB, in addition to those transcripts required for general graduate admission to CSULB;
3. Three letters of recommendation from persons familiar with the applicant's academic performance and research potential;
4. Official reports of scores on both the General (quantitative and verbal) and Geology subject tests of the Graduate Record Examination.

A limited number of assistantships are available to fund graduate studies in the Department of Geological Sciences. Applicants wishing to be considered for assistantships must submit all application materials to the department office no later than 15 February for the Fall semester or 15 October for the Spring semester.

Students not meeting the Department's admissions standards or application requirements may be admitted on probationary status on a case-by-case basis. Those students will be expected to maintain the same high academic standards as fully admitted students. After two semesters, students admitted on probationary status will be re-evaluated for full admission to the department.

### Initiation of Graduate Study

Students are responsible for all University and Department regulations governing master's degrees as outlined in this *Catalog*. The regulations governing the degree are those in effect at the time of advancement to candidacy. Until that time, students are governed by the most current *Catalog*. The advising of incoming graduate students is carried out by the graduate advisor, who explains the requirements of the program and carries out initial academic advising. It is required that the student arrange for this initial advising before or during his/her first semester.

All entering students must take GEOL 500 (Introductory Graduate Seminar) during their first Fall semester. This course consists of faculty-given seminars that introduce new students to the department and to the faculty and their research. One purpose of this is to encourage the student to find a thesis topic and thesis advisor by the end of the second semester. This is done with the help of the graduate advisor once the student has chosen a sub-discipline or option in which to specialize.

Students are required to maintain a GPA of 3.0 or higher at all times. If at any time a student's GPA drops below 3.0, that student will immediately be placed on probation for a maximum of two semesters. If the student does not bring the GPA back up to 3.0 during the probationary period, he/she will not be allowed to continue as a graduate student in this department. In order for a student to regain status in the department after failing to maintain this academic standard, he/she must formally reapply for department admission.

### Advancement to Candidacy

A student must have been advanced to candidacy before initiating thesis research necessary to complete the M.S. degree. Students are expected to be advanced by the end of their fourth semester. Students may petition the department for an extension of the four semester time limit on a semester by semester basis. Students should be aware, however, that they are at risk of not receiving credit toward their graduate programs for research started or courses taken prior to advancement. Students must have completed the WPE and have advanced to candidacy before they apply for graduation. Requests to graduate must be received during the preceding May for Spring/Summer graduation or preceding December for Fall graduation. Filings after the deadlines are not accepted.

Before advancement can proceed, a thesis topic, committee, and graduate program consisting of at least 30 units (see below) must be established by the student and the prospective thesis committee chair. In addition the following requirements must be met:

1. Prior completion of all deficiencies or incompletes. This includes courses required in the undergraduate major for the emphasis in which the student is pursuing graduate research, as well as additional courses specified by the thesis advisor.

2. Completion of six units of graduate level courses with a 3.0 or higher grade point average and attainment of a 3.0 or higher grade point average in all upper division and graduate work attempted, as well as in courses to be listed in the student's graduate academic program (see below).
3. A passing grade in GEOL 500.
4. Completion of the Writing Proficiency Examination with a passing score.
5. Successful completion of an oral qualifying examination given by the student's thesis committee, and acceptance of a written proposal for the thesis research. The student's thesis topic will be the subject of the examination.

Once the above requirements are met, advancement to candidacy proceeds with approval of the committee, graduate advisor, department chair and Associate Dean for Graduate Accountability. After the student has been advanced, no course work in addition to that specified in the graduate program may be required of the student. In order for a student to change thesis director, topic, committee members, or courses in the graduate program, approval must be obtained. Under some circumstances this may mean that additional courses are required.

### Requirements of Graduate Academic Program

The graduate academic program consists of at least 30 units of courses and is finalized when the student advances to candidacy. Although courses that will eventually become part of the student's academic program may be taken before advancement, it is strongly recommended that students make up any undergraduate deficiencies first, and then advance as early as possible. The program proposed by the thesis committee chair and the student must be approved by the thesis committee, graduate advisor, department chair, Associate Dean for Graduate Accountability and Dean of Graduate Studies. Six units of GEOL 698 (Thesis) must be taken as part of the program. Directed Research, GEOL 697, may account for up to three units, but normally can not be taken before the student completes 12 units of the graduate program with a grade point average of 3.0 or higher.

A minimum of 18 units of 500 or 600 level courses, including Thesis, must be completed; the remaining units (12 or less) may be 300, 400, 500, or 600 level courses, although courses at 300 level in the department may not be used in the program. Units may be taken at other universities if suitable courses are not offered at CSULB. Appropriate courses from related areas in science, mathematics, or engineering may be substituted within limits with permission of the department.

### Thesis Defense

All M.S. students are required to submit a thesis that conforms to the University and Department guidelines. The thesis should document the systematic study of a significant geological problem; evidence originality and critical, independent thinking; and conform to appropriate and accepted organization, format, and writing style. Each student should discuss thesis format with his/her thesis committee chair.

All M.S. students are also required to present the results of their research orally. With prior approval, this presentation can take one of many possible formats, including a departmental seminar, a presentation at a regional or national meeting, or a formal thesis defense. The student must schedule his/her presentation at least two weeks in advance, and with the approval

of the thesis committee chair and thesis director. The date of the presentation must precede the filing deadline for the semester in which the student plans to graduate.

## Courses (GEOL)

### Lower Division

#### 102. General Geology (3)

Prerequisites: Completion of or concurrent enrollment in a course that fulfills the A.1 GE requirement and three years of high school mathematics including algebra, geometry, and intermediate algebra (or MATH 010) or the equivalent. Broad based introductory study of geology. Includes the structure, composition, distribution, and modification of earth materials and also the elementary geologic history of the Earth. Not open to students with credit in GEOL 103 or 107. Concurrent enrollment in GEOL 104 or 105 recommended. (Lecture, demonstration 3 hrs.) (GEOL 102+104, CAN GEOL 2)

#### 104. Geology Laboratory (1)

Prerequisites: Completion of or concurrent enrollment in a course that fulfills the A.1 GE requirement and three years of high school mathematics including algebra, geometry, and intermediate algebra (or MATH 010) or the equivalent, and concurrent or prior enrollment in GEOL 102. Laboratory study of earth materials. (Laboratory 3 hrs.) Course fee required. (GEOL 104+102, CAN GEOL 2)

#### 105. Geology Field Laboratory (1)

Prerequisites: Completion of or concurrent enrollment in a course that fulfills the A.1 GE requirement and three years of high school mathematics including algebra, geometry, and intermediate algebra (or MATH 010) or the equivalent, and concurrent or prior enrollment in GEOL 102. Field trips to areas of geologic significance and field study of earth materials. May be repeated for credit with consent of instructor to a maximum of three units. (Field trips, 6 days per unit.) Fee charged for bus trips.

#### 106. Earth Science for Teachers (4)

Prerequisites: Completion of or concurrent enrollment in a course that fulfills the A.1 GE requirement and three years of high school mathematics, including algebra, geometry, and intermediate algebra (or MATH 010) or the equivalent. Broad based introductory study of earth science, including geology, oceanography, meteorology, and solar system astronomy. Includes study of earth materials, elementary geologic history, ocean basins and coastlines, weather and climate, pollution and earth resources, geology of the planets, laboratory study of rocks and minerals maps, and simple scientific instruments. Discussion of the scientific method. Introduction to methods of teaching science to K-8 pupils. Traditional grading only. (Lecture, demonstration 3 hours., laboratory 3 hrs., field trips.)

#### 160. Introduction to Oceanography (3)

Prerequisites: Completion of or concurrent enrollment in a course that fulfills the A.1 GE requirement and three years of high school mathematics including algebra, geometry, and intermediate algebra (or MATH 010) or the equivalent. Origin and extent of the oceans; nature of the ocean floor, cause and effect of currents, tides and waves; and life in the sea. (Lecture, discussion 3 hrs.)

#### 160L. Introduction to Oceanography Laboratory (1)

Prerequisites: Completion of or concurrent enrollment in a course that fulfills the A.1 GE requirement and three years of high school mathematics including algebra, geometry, and intermediate algebra (or MATH 010) or the equivalent; and previous credit or concurrent registration in GEOL 160. Field and laboratory study of the marine environment. Sea trips for experience in the use of oceanographic instruments. Analysis and interpretation of results. (Laboratory-field 3 hrs.) Course fee required.

#### 163. Science of the Atmosphere and Weather (3)

Prerequisites: Completion or concurrent enrollment in a course that fulfills the A.1 GE requirement and three years of high school mathematics including algebra, geometry, and intermediate algebra (or MATH 010) or the equivalent. Introduction to physical and chemical processes of the atmosphere, science of weather and weather disturbances. Emphasis on understanding the atmospheric environment rather than technical calculations. (Lecture 3 hrs.) Traditional grading only.

### 190. Environmental Geology (3)

Prerequisites: Completion of or concurrent enrollment in a course that fulfills the A.1 GE requirement and three years of high school mathematics including algebra, geometry, and intermediate algebra (or MATH 010) or the equivalent. Interrelationships between humans and hazards: landslides, floods, erosion, subsidence, volcanism, earthquakes, and seismic sea waves. Origin of resources and impacts of resource development: water, soils, and energy. Waste and waste disposal. (Lecture 3 hrs.)

### 191. Air and Water Pollution (3)

Prerequisites: Completion of or concurrent enrollment in a course that fulfills the A.1 GE requirement and three years of high school mathematics including algebra, geometry, and intermediate algebra (or MATH 010) or the equivalent. Survey course dealing with the causes and nature of pollution of the air, groundwater, fresh water lakes and streams, and the ocean. Effects of air and water pollution on the environment. (Lecture 3 hrs.)

### 240. Historical Geology (4)

Prerequisites: GEOL 102 and 104. History of the earth and evolution of animals and plants. (Lecture 3 hrs., laboratory 3 hrs., field trips.) (CAN GEOL 4)

### 273. Computer and Statistical Methods in Geology (4)

Prerequisites: GEOL 240, PHYS 151, MATH 123. An elementary background in computers is recommended. Introduction to statistical theory, computer programming, and the use of computer-based statistical and graphical packages as applied to problem-solving in the geological sciences. Traditional grading only. (Lecture 2 hrs., laboratory 6 hrs., field trips.) Course fee required.

### 280. Groundwater and Society (3)

Prerequisites: GEOL 102, 104. A grade of "C" or better in MATH 117; or four years of high school mathematics. Hydrologic, geologic, and other factors controlling groundwater occurrence, movement, quality, and contamination. Environmental effects of groundwater contamination. (Lecture 3 hrs.)

## Upper Division

### 300I. Earth Systems and Global Change (3)

Prerequisites: Completion of the G.E. Foundation, upper division status, and CHEM 100 or CHEM 111A or GEOL 102 or GEOL 106 with a grade of "C" or better. Introduction to the interaction of the Earth's systems (biosphere, lithosphere, hydrosphere, cryosphere, and atmosphere). Exploration of the systematic links between life, oceans, climate, and the solid earth, and how these connections control climate change in the past, present, and future. The Earth Systems approach is used to understand important current issues confronting society regarding local and global climatic and environmental change. Traditional grading only. (Lecture 3 hrs.)

### 303I. Coastal Systems and Human Impacts (3)

Prerequisites: Completion of the G.E. Foundation, one or more Explorations courses, and upper-division standing; BIOL 200; GEOL 102 or 160. Defines and describes natural processes impacting human activities in the coastal zone and how human practices influence natural processes. Topics include global warming, sea level rise, El Niño, port development, ocean outfalls and water quality, fisheries, and coastal erosion. Same course as BIOL 303I. May not apply units towards elective requirements of Geology and Earth Science majors. Traditional grading only. (Lecture 3 hrs.)

### 321. Optical Mineralogy (3)

Prerequisites: GEOL 324, MATH 123, PHYS 151. Optical properties of crystals and minerals. Laboratory study of minerals in immersion liquids and thin sections with polarizing microscope. Traditional grading only. (Lecture 1 hr., laboratory 6 hrs.)

### 324. Mineralogy and Crystallography (4)

Prerequisites: GEOL 102 and 104, CHEM 111A. Corequisite or prerequisite: PHYS 151. Morphological and structural crystallography; crystal chemistry; crystal structure; chemistry, classification, origin, occurrence and association of minerals.

Megascopic, qualitative chemical, and instrumental analysis and identification of minerals in the laboratory. (Lecture 2 hrs., laboratory 6 hrs., field trips.) Course fee required.

### 339. Introduction to Geomorphology (3)

Prerequisites: GEOL 102 with 104 or 105; or GEOL 106; or GEOG 140 or 150. An introduction to the study of landforms and the processes that produce and modify them. Emphasis is placed on the mechanics of geomorphic processes and on the relationships between properties of earth materials and the forces applied to them by gravity, wind, ice, water, waves, and humans. Lectures address the conceptual basis of geomorphology; assignments are practical and empirical. Course is designed for majors in Geology, Geography, Biology, Environmental Sciences, Anthropology, and Civil Engineering. (Lecture 2 hrs., laboratory 3 hrs., field trips). Traditional grading only.

### 341. Paleontology and Biostratigraphy (4)

Prerequisites: GEOL 240 and BIOL 200. Morphologic, systematic, and ecologic aspects of invertebrate fossils; methods and techniques in the collection, preparation, illustration, and description of fossils; uses of fossils in stratigraphic work; principles of biostratigraphy. (Lecture 3 hrs., laboratory 3 hrs., field trips.)

### 343. Stratigraphy/Sedimentology (4)

Prerequisites: GEOL 240, 324, 428, and 429. Introduction to sedimentology and stratigraphy, flow mechanics and sedimentary structures, depositional systems, seismic stratigraphy and sea level changes, sedimentation and tectonics, methods of description and classification of sedimentary rocks, and preparation of sedimentologic field reports (Lecture 3 hrs., laboratory 3 hrs., field trips.)

### 364. Introduction to Geological Oceanography (2)

Prerequisites: GEOL 102 or 160; and CHEM 111A or Math 122, or consent of instructor. Topography and structure of the ocean floor. Waves, currents, and tides as agents of sedimentation. Effect of geological processes on the sea floor environment. Tectonic and sedimentary history of ocean basins and continental margins. Shipboard techniques in marine geology. (Lecture 2 hrs.; sea trips.)

### 364L. Laboratory in Geological Oceanography (1)

Prerequisite or corequisite: GEOL 364. Analytical and data collecting techniques in marine geology. Chart reading and navigation. Bottom and subbottom profiling. Sample collecting methods and their applicability. Laboratory analysis of bottom samples. Interpretation of data from geologically significant localities visited by research ship. Traditional grading only. (Laboratory 3 hrs.; sea trips.)

### 370. Engineering Geology (2)

Prerequisites: ME 172, CE 225. Earth processes and materials which influence the design, construction and operation of engineering works, construction materials. Not open for credit to geology majors. (Lecture 2 hrs., field trips.) Course fee required.

### \*420. Geowriting (3)

Prerequisites: Upper division or graduate standing in the College of Natural Sciences and Mathematics, ENGL 100 or equivalent, passing score on WPE and a course in geology, and consent of instructor. Covers major types of scientific writing aimed at a scientific audience with emphasis on writing scientific content at an advanced level. Journal articles and abstracts will be covered in detail. Topics include handling descriptive scientific data, the distinction between data and interpretation, logic and argument, clarity of style, and writing for specific audiences. Requires extensive independent writing. Enrollment limited. (Lecture 3 hrs.) Traditional grading only.

### \*424./524. Sedimentary Petrology (4)

Prerequisites: GEOL 321, 324, and 343. (Undergraduates register in GEOL 424; graduates register in GEOL 524.) Microscopic and macroscopic study of sedimentary rocks. Identification of grain types, textures, structures, and cements with emphasis on provenance, paleotectonics, paleoenvironmental reconstructions, and diagenesis. (Lecture 3 hrs., laboratory 3 hrs.)

**428. Igneous and Metamorphic Petrology and Petrogenesis (2)**

Prerequisites: GEOL 102, 104, and 324, CHEM 111A and 111B, PHYS 151 and 152, MATH 122 and 123. Corequisite: GEOL 429 (Geology majors) or 1 unit GEOL 496 (hand specimen petrography lab, Earth Science majors). Characteristics of magmatic and metamorphic rock bodies and systems, including mineralogical and chemical aspects. Origin of fabrics; evolution of igneous and metamorphic rocks based on petrologic, isotopic, and geochemical evidence; selected research topics in other aspects of petrology. Traditional grading only. (Lecture 2 hrs., field trips.) Course fee required.

**\*429. Igneous and Metamorphic Petrography Laboratory (2)**

Prerequisite: GEOL 273 and 321. Corequisite: GEOL 428. Microscopic and ancillary hand specimen analysis of igneous and metamorphic rocks, including fabric analysis and mineral identification and analysis. X-ray analysis of rocks, computer modelling of magma genesis. Topics will be closely tied to concurrent material in GEOL 428. Traditional grading only. (Laboratory 6 hrs.) Course fee required.

**430./530. Seminar in Structural Geology and Tectonics (3)**

Prerequisite: GEOL 433. (Undergraduates register in GEOL 430; graduates register in GEOL 530.) Critical review of selected topics concerning the analysis, interpretation and origin of geologic structures, the mechanics of rock deformation and of large scale crustal deformation. Traditional grading only for Majors/Minors. (Lecture 2 hrs., laboratory 3 hrs.; field trips.)

**431./531. Tectonic Geomorphology (4)**

Prerequisite: GEOL 433. (Undergraduates register in GEOL 431; graduate students register in GEOL 531.) Observation and analysis of Earth surface processes and the development of landforms and landscape. Study of the interaction between surficial processes and tectonic, biologic, hydrologic, climatic, and atmospheric processes. Emphasis on the study of tectonic generated landforms, evaluation of earthquake hazards, and geomorphic assessment. Methods and techniques to assess real problems in the study of landforms and applications to environmental hazards. (Lecture 2 hrs., laboratory 6 hrs., field trips). Traditional grading only.

**433. Structural Geology (4)**

Prerequisites: GEOL 240, 273, 324, PHYS 152. Introduction to structural geology, description of rock structures, graphical solutions to structural problems, computer manipulation of structural data, strain analysis, rock fabric analysis, field analysis of tectonic structures, analysis of structures from maps and cross sections, and structural geology and tectonics. (Lecture 3 hrs., laboratory 3 hrs., field trips.)

**450. Summer Field Geology (6)**

Prerequisites: GEOL 343, 428, 429 or 496 (1 unit devoted to hand specimen petrology which MUST be taken concurrently with 428) and 433. Six weeks of geological field mapping at a selected area. Preparation of geological reports of the field problems. (Lecture as needed, daily field work.)

**\*451. Senior Field Study (3)**

Prerequisites: GEOL 450. Advanced field studies in geology. Students pursue a field-oriented project of interest in a geographical area(s) and subject(s) agreed upon by instructor. Primary responsibility for design and implementation of project belongs to the student. Project will also involve laboratory work and writing of reports. Traditional grading only. (Lecture 1 hr., field trips.)

**452. Advanced Topics in Marine Geology (3)**

Prerequisites: GEOL 364 and 364L. Corequisite or prerequisite: GEOL 460. Advanced course stressing field collection of data and samples, analysis of data in laboratory, and completion of report. Individual topics will be selected. Lectures on advanced topics in marine geology: structure and composition of oceanic lithosphere, continental margin structure and evolution, seismic stratigraphy, paleoceanography, critical events in world ocean history, and advanced sampling and geophysical techniques. Traditional grading only. (Lecture 1 hr., laboratory 3 hrs., 5 days of sea trips.)

**\*460. Introduction to Geophysics (4)**

Prerequisites: PHYS 152, MATH 123, and GEOL 273. Introduction to geophysics; principles and processes; methods of investigation. (Lecture 2 or 3 hrs., laboratory 3 or 6 hrs., field trips.) Course fee required.

**\*461. Introduction to Geochemistry (4)**

Prerequisites: CHEM 111B, MATH 123. Abundance and migration of elements in the earth; chemical processes in the evolution of the earth and its crust including geochemistry of organic compounds. (Lecture 3 hrs., laboratory 3 hrs.) Course fee required.

**\*462. Physics and Chemistry of the Earth's Interior (3)**

Prerequisites: GEOL 240, 428; PHYS 152. Structure and composition of the Earth's interior. Origin and evolution of the Earth. Review of geophysical data, petrologic analyses, and other types of evidence for Earth structure and compositional models. Traditional grading only for Majors/Minors. (Lecture 3 hrs.)

**465./565. Physical and Chemical Oceanography (3)**

Prerequisites: CHEM 111B, PHYS 100B, and upper division standing in the College of Natural Sciences and Mathematics or Engineering. (Undergraduates register in GEOL 465; graduates register in GEOL 565.) Physical and chemical oceanography; the carbonate cycle; minor elements and micronutrient elements in sea water; water masses of the oceans; the physical concepts and interpretative theories related to ocean circulation. (Lecture 3 hrs.)

**\*466. Oceanography Laboratory and Ocean Studies (1)**

Prerequisite: Concurrent or prior enrollment in GEOL 465. Instruments and techniques in physical and chemical oceanography; sea trips to areas of oceanographic significance, water quality analysis and interpretation of oceanographic data. Not open to students with credit in GEOL 462. (Laboratory 3 hrs., sea trips.)

**\*471. Petroleum Geology and Well Log Analysis (4)**

Prerequisites: GEOL 240, 343, and 433. Application of geology to the exploration and production of petroleum, including the uses of both surface and subsurface techniques. Basic well logging techniques as employed in the petroleum (and other) industries, including data collection, reduction, interpretation, and integration among various logging methods as well as with surface geology and geophysical data. (Lecture 2 hrs., laboratory 6 hrs., field trips.)

**477./577. Hydrogeology (3)**

Prerequisites: GEOL 102, 104; CHEM 111B; PHYS 152; MATH 123. (Undergraduates register in GEOL 477; graduates register in GEOL 577.) Hydrologic, geologic, and other factors controlling groundwater flow, occurrence, development, chemistry, and contamination. Elementary groundwater flow theory. Well hydraulics. (Lecture 2 hrs., laboratory 3 hrs.) Traditional grading only.

**486./586. Engineering Geophysics (3)**

Prerequisite: GEOL 460 (may be taken concurrently). (Undergraduates register in GEOL 486; graduates register in GEOL 586.) Applications of geophysical techniques to the solution of engineering geology and hydrogeology problems. Review of basic geophysical techniques, and identification and utilization of specialized techniques suitable for the solution of specific problems. Applications and case histories in hazardous waste site evaluations, actively subsiding areas, mapping of basement topography, sea water intrusion problems, mapping of the water table, groundwater contamination, and detection of subsurface cavities. Reading and discussion of research articles; preparation of geophysical feasibility studies in selected engineering environments. Traditional grading only for Majors. (Lecture 2 hrs., laboratory 3 hrs.; field trips.) Course fee required.

**\*489. Current Topics in Geological Sciences (3)**

Prerequisite: Consent of instructor. Topics of current interest in the geological sciences selected for intensive development. Topics to be selected from such areas as (a) Volcanology, (b) Urban geology. May be repeated for a maximum of 6 units. Field trips may be required. (Lecture 2 hrs., laboratory 3 hrs.)

**\*490. Current Topics in Geological Sciences (1-3)**

Prerequisite: Consent of instructor. Topics of current interest in the geological sciences selected for intensive development. Topics to be selected from such areas as (K) Economic Mineral Deposits. May be repeated for a maximum of 6 units. Field trips may be required.

**496. Investigations in Geology and Other Earth Sciences (1-4)**  
Prerequisites: Senior standing in geology, earth science or related fields, completion of an upper division course in geology or earth science in the area of the topics chosen and approval of the topic chosen by the Geological Sciences faculty. Supervised research in geology or the other earth sciences. Field trips may be required.

## Graduate Division

### **500. Introductory Graduate Seminar (1)**

Prerequisite: Graduate standing. An introduction to graduate policies and faculty research in Geological Sciences. Abstracts on faculty presentations will be required of all students. Course cannot be counted for program requirements for the M.S. degree in Geology. Credit/No Credit grading only. Course may be repeated for a maximum of 3 units. (Seminar 1 hr.)

### **524./424. Sedimentary Petrology (4)**

Prerequisites: GEOL 321, 324, and 343. (Undergraduates register in GEOL 424; graduates register in GEOL 524.) Microscopic and macroscopic study of sedimentary rocks. Identification of grain types, textures, structures, and cements with emphasis on provenance, paleotectonics, paleo-environmental reconstructions, and diagenesis. Traditional grading only. (Lecture 3 hrs., laboratory 3 hrs.)

### **530./430. Seminar in Structural Geology and Tectonics (3)**

Prerequisite: GEOL 433. (Undergraduates register in GEOL 430; graduates register in GEOL 530.) Critical review of selected topics concerning the analysis, interpretation and origin of geologic structures, the mechanics of rock deformation and of large scale crustal deformation. Traditional grading only for majors. (Lecture 2 hrs., laboratory 3 hrs.; field trips.)

### **531./431. Tectonic Geomorphology (4)**

Prerequisite: GEOL 433. (Undergraduates register in GEOL 431; graduate students register in GEOL 531.) Observation and analysis of Earth surface processes and the development of landforms and landscape. Study of the interaction between surficial processes and tectonic, biologic, hydrologic, climatic, and atmospheric processes. Emphasis on the study of tectonic generated landforms, evaluation of earthquake hazards, and geomorphic assessment. Methods and techniques to assess real problems in the study of landforms and applications to environmental hazards. (Lecture 2 hrs., laboratory 6 hrs., field trips). Traditional grading only.

### **537. California Geology (3)**

Prerequisites: GEOL 433, GEOL 450. Examination of recent theories concerning the evolution of California's geological provinces; geological, geochemical, and geophysical evidence for these theories. Traditional grading only. (Lecture 3 hrs., field trips.)

### **554. Environmental Geochemistry (3)**

Prerequisites: Graduate standing in geology, a course in instrumental analytical methods, and consent of instructor. Geochemical cycles. Human interference with cycles. Trace elements, health and agriculture. Clay mineral reactions. Groundwater chemistry. Reading and discussion of research articles; projects in environmental geochemistry. Traditional grading only for Majors. (Lecture 3 hrs., field trips.)

### **556. Organic Geochemistry (3)**

Prerequisites: CHEM 111B, GEOL 240. Exchange of organic matter among sediments, hydrosphere, and biosphere. Diagenesis and catagenesis and their effects on different types of organic matter. Origin of coal and crude oil. Thermal maturity of sedimentary rocks. Traditional grading only. (Lecture 3 hrs.)

### **565./465. Physical and Chemical Oceanography (3)**

Prerequisites: CHEM 111B, PHYS 152 or 100B, and upper division standing in the College of Natural Sciences and Mathematics or Engineering. (Undergraduates register in GEOL 465; graduates register in GEOL 565.) Physical and chemical oceanography; the carbonate cycle; minor elements and micronutrient elements in sea water; water masses of the oceans; the physical concepts and interpretative theories related to ocean circulation. Traditional grading only. (Lecture 3 hrs.)

### **570. Special Topics in Geology (1-3)**

Prerequisite: Consent of instructor. Investigation of selected topics in geology. May be repeated for credit, with different topics, for a maximum of six units toward any single degree. Seminars with laboratories as appropriate. Traditional grading only.

### **575. Advanced Topics in Sedimentology (1-4)**

Prerequisites: Consent of instructor. Investigation of selected topics in sedimentology such as depositional facies analysis, basin evolution, coastal processes, fluvial processes, advanced stratigraphic analysis, and tectonics and sedimentation. Course content varies from year to year. May be repeated for credit, with different topics, for a maximum of four units toward any single degree. Seminars with labs and/or field work as appropriate. Traditional grading only.

### **576. Practicum in Geohydrology (3)**

Prerequisite: Consent of the instructor; the student should have a fundamental understanding of aquifer mechanics, organic chemistry, stratigraphy, and geohydrology. Solution of actual problems in the areas of water supply and resource contamination. A combination of field techniques, problem approaches, and quantitative analysis will be used to solve comprehensive problems in a fixed period of time to simulate industry conditions. Traditional grading only. (Seminar and field trips, 3 hrs.)

### **577./477. Hydrogeology (3)**

Prerequisites: GEOL 102, 104; CHEM 111B; PHYS 152; MATH 123. (Undergraduates register in GEOL 477; graduates register in GEOL 577.) Hydrologic, geologic, and other factors controlling groundwater flow, occurrence, development, chemistry, and contamination. Elementary groundwater flow theory. Well hydraulics. Traditional grading only. (Lecture 2 hrs., laboratory 3 hrs.)

### **578. Groundwater Hydraulics (3)**

Prerequisites: GEOL 477/577, MATH 364A. Advanced treatment of groundwater flow through granular porous and fractured media; analytical solutions to groundwater flow problems; hydraulics of wells and aquifer parameter estimation. (Lecture 3 hrs.)

### **580. Special Topics in Geophysics (1-6)**

Prerequisite: Consent of instructor. Investigation of selected topics in geophysics such as Numerical Methods in Geophysics, Seismology, Seismic Migration, Physics of the Earth, Electrical Methods, and Geophysical Field Methods. May be repeated for credit, with different topics, for a maximum of six units toward any single degree. Seminars with laboratories and/or field work as appropriate. Traditional grading only.

### **585. Advanced Gravity and Magnetics (3)**

Prerequisites: MATH 224, PHYS 152, GEOL 460. Advanced topics in the gravity and magnetic methods of geophysical prospecting. Traditional grading only for Majors. (Lecture 2 hrs., laboratory 3 hrs., field trips.)

### **586./486. Engineering Geophysics (3)**

Prerequisite: GEOL 460 (may be taken concurrently). (Undergraduates enroll in GEOL 486; graduates enroll in GEOL 586.) Applications of geophysical techniques to the solution of engineering geology and hydrogeology problems. Review of basic geophysical techniques, and identification and utilization of specialized techniques suitable for the solution of specific problems. Applications and case histories in hazardous waste site evaluations, actively subsiding areas, mapping of basement topography, sea water intrusion problems, mapping of the water table, groundwater contamination, and detection of subsurface cavities. Reading and discussion of research articles; preparation of geophysical feasibility studies in selected engineering environments. Traditional grading only for Majors. (Lecture 2 hrs., laboratory 3 hrs.; field trips.) Course fee required.

### **697. Directed Research (1-3)**

Prerequisite: Consent of instructor. Research on a specific subject in geology. Topic for study to be approved and directed by a faculty member in geological sciences. Traditional grading only.

### **698. Thesis (1-6)**

Prerequisite: Consent of Graduate Committee and graduate advisor. Either laboratory or field investigations, or both, for a total of six semester units to culminate in an approved thesis.

Gerontology is the scientific study of the processes and phenomena of aging, including biological, psychological and sociological dimensions. CSULB's Gerontology Program seeks to prepare people of all ages for personal and family aging and for work with older persons and with those individuals, agencies, organizations, and businesses that work with middle aged and older persons. The Gerontology Program's objectives are:

- To provide a flexible interdisciplinary curriculum that provides new and seasoned professionals with the competencies necessary for success in the field of aging.
- To provide experiential as well as didactic graduate education and professional training in gerontology for individuals planning to become professionals in public and private agencies.
- To provide professional field experiences in gerontology in order to enhance understanding of concepts, themes, and skills related to aging at various life stages, within different gender and racial/ethnic groups and among people with various abilities.
- To provide knowledge and skills necessary to plan, develop, and implement innovative programs to meet the needs of the State's vast and growing aging population.
- To explore aging-related professional values and ethics.

The Gerontology Faculty Interest Group is comprised of about 60 CSULB faculty members representing more than 20 disciplines. Members teach courses essential to the Gerontology Program, conduct gerontological research, and provide training and service. Lecturers and emeritus faculty members also are active in the Gerontology Program. Full time Interest Group members are listed.

CSULB is one of only a few California campuses to offer graduate programs to meet the State's need for educated, experienced and diverse professional gerontologists. To accomplish this goal, two programs of study are offered: A Master of Science in Gerontology and a Gerontology Certificate.

## Master of Science in Gerontology (code 6-1040)

*Interested students should contact Dr. Barbara White at 562-985-1582 or [bwhite@csulb.edu](mailto:bwhite@csulb.edu)*

The Master of Science Degree in Gerontology is designed to prepare students with a thorough background in existing theory and research in gerontology, advanced principles of program management, and an enhancement to their baccalaureate preparation for their professional discipline. Students who complete the M.S. in Gerontology will accomplish the following objectives:

1. Acquire advanced education and professional training in gerontology in order to become administrators of state and federal programs, services such as senior centers and retirement homes, businesses, and intergenerational programs.
2. Enhance cultural competence regarding age, gender, race and ethnicity, and/or diverse abilities.

3. Acquire expertise in planning, developing, implementing, and evaluating innovative programs to meet the needs of older persons.
4. Demonstrate the ability to conduct appropriate research.
5. Exercise sound professional judgment based on high ethical standards and expectations.

### Admission

To obtain admission to the Master of Science degree in Gerontology the student must:

1. Complete the application form to be admitted to the university with graduate standing;
2. Send the following materials to the Gerontology Program, in addition to those sent to the Office of Enrollment Services:
  - a. Transcripts of all undergraduate and graduate work,
  - b. Three letters of recommendation reflecting academic potential, personal qualifications, sensitivity, motivation, and evidence of ability and motivation to work with older adults and professionals in the field of aging, and
  - c. A current resume,
  - d. A personal statement of interest in aging and career goals in the field.

Admission to the program is contingent on approval by the Gerontology Program Director.

### Prerequisites

1. A bachelor's degree from an accredited institution.
2. Evidence of a 3.0 or better grade point average in all undergraduate work. Students with less than a 3.0 grade point average in the last 60 undergraduate semester or 90 quarter units attempted but with evidence of professional promise and experiential background may be admitted conditionally by action of the Program Director.
3. Successful completion of the following courses or their approved substitutes:
  - a. GERN 400I;
  - b. BIOL 401;
  - c. PSY 365 OR HDEV 357I;
  - d. ANTH 454;
  - e. An approved upper division statistics course.

### Retention

1. Maintain a 3.0 or better grade point average in all graduate work completed at CSULB and all graduate work transferred to meet graduate requirements.
2. Continued satisfactory progress toward the degree objective.

### Advancement to Candidacy

1. Satisfy the general University requirements for advancement to candidacy.
2. Pass the Writing Proficiency Examination (to be taken during the first term).
3. Complete a minimum of six units of graduate coursework.
4. Enroll during the semester or summer session in which advancement to candidacy takes place.
5. Obtain approval for ones individual program plan from the Gerontology Program Director and then from the Associate Dean of the College of Health and Human Services.

### Requirements

*Thesis Option:* Completion of a minimum of 37 units, with at least 28 units of 500 and/or 600 series courses in Gerontology, including GERN 563, 592, 600, 610, 696, 697 and 698. A maximum of six units may be taken outside the major.

*Comprehensive Examination Option:* Completion of a minimum of 37 units with at least 24 units of 500 and/or 600 series courses in Gerontology, including GERN 563, 592, 600, 610, 696, 697, and a written comprehensive examination. A maximum of 10 units may be taken outside the major.

### Certificate Program in Gerontology (code 1-1080)

*Interested students should contact Dr. Barbara White at 562-985-1582 or bwhite@csulb.edu*

The Certificate program is designed to train individuals as gerontology specialists within a major area of study. Alumni work in community programs, health services organizations, government agencies, and the private sector.

The Certificate in Gerontology may be earned in conjunction with a baccalaureate degree or awarded subsequent to earning a bachelor's degree. Up to six units of courses taken in the student's major department may be approved to satisfy credential requirements as may general education and elective courses also used to complete the bachelor's degree.

### Requirements

1. A bachelor's degree (may be taken concurrently).
2. 24 units distributed as follows:  
GERN 400I, ANTH 454, BIOL 401, PSY 365 or HDEV 357I.
3. A minimum of six units chosen in consultation with the Gerontology Program Director from a list of supporting courses.
4. Three units of independent study (GERN 497) on a topic related to gerontology.
5. Three units of approved field experience (GERN 492) in a gerontology setting.
6. Early consultation with, and approval by the Gerontology Director for, the individual program of study.
7. Apply for issuance of the earned Certificate at Enrollment Services the term before completion of the baccalaureate and/or Certificate.

Successful completion of the program will result in the Program Director's recommendation for issuance of the Certificate in Gerontology.

### Courses (GERN)

#### 400I. Perspectives on Gerontology (3)

Prerequisites: Completion of the G.E. Foundation, one or more Explorations courses, and upper-division standing. Multidisciplinary approach to the study of middle age and aging including biophysiological, psychological, and sociological aspects. Exploration of the effects of culture and of environment on the aging of individuals and groups. Exemplary topics include history; demographics; normal and disease-based sensory, cognitive and health changes; housing and long-term care issues; work, retirement and income; frauds and scams targeting older adults; and public policy issues. (Lecture-discussion, 3 hours.)

### 420./520. Personal Finance for the Aging (3)

Prerequisites: 400-level course in Consumer Affairs or consent of instructor. Provides an understanding of operations of personal finance as applied to the aging population. Topics include public and private sources of income, living expenses, public and private sources of assistance, personal budget systems, financial planning, legal rights of the aged affecting their personal finances, and financial counseling for the aging. Same course as FCS 420./520. (Lecture-discussion 3 hrs)

### \*424. Independent Living for Disabled and Elderly Persons (3)

Prerequisite: FCS 321 or 322 or GERN 4001 or consent of instructor. Independent living concepts related to physically and/or functionally disabled adults. Personal, environmental and programmatic responses to disability and aging. Activities include individual and group projects and site visits to such locations as an adapted private home, an Independent Living Center, a "special clothing" manufacturer, and a multipurpose rehabilitation center. Same course as FCS \*424. (Lecture/Activity, 3 hours.)

### \*439. Nutrition and Aging (3)

Prerequisites: FCS 232 or BIOL 207 or consent of instructor. Nutritional needs as related to physiological changes that occur during aging. Factors that influence food intake and nutritional status of the elderly. Diet adaptation for chronic diseases commonly found in older people. Same course as FCS \*439. (Lecture-discussion, 3 hours.)

### 469./569. Disability, Culture and Society: Issues and Social Intervention (3)

Prerequisites: Senior or graduate status. This is a course using interdisciplinary work about disability as a social construct. Utilizing an oppressed group model, the course will examine society's policies and practices to understand the experience of disability. Includes historical and contemporary perspectives as well as future issues. Social and clinical intervention methods, and program and information resources are covered. Same course as REC 469/569 and S W 469/569. Traditional grading only.

### \*474. Aging and Diversity in California (3)

Prerequisites: GERN 4001, or consent of instructor. This is an experiential course in which students undertake projects that are meaningful to diverse California elders, that build long-term skills, and that are timely. Professionals in the field of aging discuss their career paths, their local aging networks, and how the diverse physical, social, economic, cultural and political climates of the State and region shape current aging-related events, trends, issues and programs. At least two off-campus field trips are required. (Lecture-activity 3 units.)

### \*482. Health Assessment of the Aging Client (3)

Prerequisites: GERN 4001 or equivalent and upper division standing or consent of instructor. Assessment of the physical, psychological and social status of the aging client as these factors affect health and well being. Course is designed to assist those working with the aging client in a variety of setting to identify actual or potential health related problems using a variety of tools and techniques. Same course as NRS\*482. (Lecture-discussion, 3 hours.)

### \*485. Mental Health and Aging (3)

Prerequisites: GERN 4001, HDEV 3571 or PSY 365, ANTH 454, and BIOL 401, or consent of instructor. Variations in the mental health status of older adults over time and within subgroups. Discussion of changing societal responses (e.g., how and why diagnoses and assessments of competence shift over time). Exploration of the most frequent mental health issues of older adults. Comparison of medical and non-medical therapeutic approaches to older adults' mental health issues. Two off-campus site visits required. (Seminar 3 hours.)

### 492G. Internship in Gerontology (3)

Prerequisites: Student must be a Gerontology Certificate candidate; have senior standing; have a 2.5 overall GPA or a 3.0 major GPA; approval of the Gerontology program director; and GERN 4001, ANTH 454, PSY 365 or HDEV 3571. Each prerequisite

course must be completed with a grade of "C" or better. A course in which a grade lower than "C" is received must be retaken and successfully completed prior to enrolling in any course for which it is a prerequisite. A student receiving a grade lower than a "C" may proceed with other courses with approval of the Area Coordinator. Field experience of 120 hours in which the student assumes a pre-professional role in an agency, business or other community setting. Internship supervisors monitor and evaluate student work based on preestablished criteria stated in the internship contract. The preestablished criteria in the contract consist of objectives developed by the student in consultation with the supervisor. The objectives and the placement site must be approved by the student's faculty advisor and the internship coordinator. Students evaluate the internship at the end of the experience. The course may be repeated for a maximum of six units. Same as FCS 492G. (Seminar 3 hours.)

### 497. Directed Studies (1-3)

Prerequisites: GERN 4001, ANTH 454, PSY 365, or HDEV 3571, upper-division standing and consent of program director. Independent study under the supervision of a faculty member. Exploration and experience supplementing and/or complementing regular courses. May be repeated for a maximum of six units.

### \*499. Special Studies (1-3)

Group investigation of topics of current interest in gerontology. Topics to be announced in the *Schedule of Classes*. May be repeated for a max. of six units of credit with change of topic.

## Graduate Level

### 520./420. Personal Finance for the Aging (3)

Prerequisites: 400-level course in Consumer Affairs or consent of instructor. Provides an understanding of the operations of personal finance as applied to the aging population. Topics include public and private sources of income, living expenses, public and private sources of assistance, personal budget systems, financial planning, legal rights of the aged affecting their personal finances, and financial counseling for the aging. Same course as FCS 520./420. (Lecture-discussion 3 hours.)

### 550. Social Policy and Aging (3)

Prerequisite: GERN 4001, HDEV 3571 or PSY 365, and ANTH 454 or consent of instructor. Major legislation and policies affecting older Americans. Analyses of policy information and change, kinds of data, and social forces that affect development and implementation of aging-related policies and legislation.

### 563. Evaluation in Gerontology (3)

Prerequisites: GERN 696, upper division statistics course. Principles, design, and methods of evaluation for use by professional gerontologists. Selection and development of instrumentation for data collection and interpretation, methods of reporting for purposes of accountability. (Seminar 3 hours.) Traditional grading only. Same course as FCS 563.

### 569./469. Disability, Culture and Society: Issues and Social Intervention (3)

Prerequisites: Senior or graduate status. This is a course using interdisciplinary work about disability as a social construct. Utilizing an oppressed group model, the course will examine society's policies and practices to understand the experience of disability. Includes historical and contemporary perspectives as well as future issues. Social and clinical intervention methods, and program and information resources are covered. Same course as REC 569/469 and S W 569/469. Traditional grading only.

### 592. Internship in Family and Consumer Sciences/ Gerontology (3)

Prerequisite: Graduate standing and consent of instructor. Field experience in which student assumes a self directed responsible role in an agency, business or other community setting. May be repeated to a maximum of six units. Same course as FCS 592. (Seminar 3 hours)

**600. Seminar in Administration of Family and Consumer Sciences/Gerontology Programs (3)**

Prerequisite: FCS 696 or GERN 696 or consent of instructor. Application of administration, management and leadership theories to family and consumer sciences/gerontology programs. Concepts include structure of organizations, leadership styles, management techniques, methods of analyzing and evaluating business systems, management philosophies and performance evaluation procedures. Activities and assignments focus on organization theory, planning, decision making and control techniques, in relation to leadership and management skills needed for success as a family and consumer sciences/gerontology administrator. Same course as FCS 605. (Seminar 3 hours.)

**610. Seminar in Current Issues, Trends & Research in Gerontology (3)**

Prerequisite: Completion of all core courses except GERN 696, 697 or 698 any of which may be taken concurrently. Students will undertake literature reviews and/or research to explore emerging issues, trends and research in the field of aging studies and/or update their information on the most current gerontological topics. (Seminar 3 hours.)

**696. Research Methods (3)**

Prerequisite: Upper division statistics (may be taken concurrently). Methodological approaches to contemporary problems in gerontology; biographical techniques and research; critical evaluation of research (Seminar 3 hours.) Traditional grading only.

**697. Directed Research (1-3)**

Prerequisite: Advancement to candidacy, GERN 500 level courses in area of study, and GERN 696. Independent investigation of research problems under the direction of a faculty member. Traditional grading only.

**698. Thesis (1-4)**

Prerequisite: GERN 697, advancement to candidacy. Planning, preparation and completion of a thesis under supervision of a faculty member. Approval of thesis committee. Traditional grading only.

# GRADUATE DEGREES AND OTHER POST BACCALAUREATE STUDIES

Associate Vice President, Academic Affairs  
Instructional Programs  
Keith Ian Polakoff

Associate Vice President, Academic Affairs  
Graduate Studies and Research  
Ron Vogel

Associate Deans for Graduate Studies  
Lee Vail (Arts)  
Kathleen Cohn (Education)

William A. Sinclair (Health and Human Services)  
Frank Fata (Liberal Arts)  
Elizabeth Ambos (Natural Sciences and Mathematics)  
Director of MBA Program  
Newton Margulies

## Graduate Studies

Graduate study is primarily designed to inspire independence of mind and originality in the quest for knowledge, truth, and useful application. Candidates for a master's degree are required to demonstrate mastery in their chosen field of study either through independent research culminating in an acceptable thesis and/or through successfully passing a final comprehensive examination.

Graduate curricula are designed to provide each student with advanced study in a discipline. All courses listed in a master's degree program, including those outside the major field, must be graduate or upper-division courses approved by the student's graduate committee and department graduate advisor.

Proficiency of a student in any and all parts of a curriculum is ascertained by the faculty of the University. A favorable vote of the faculty is required for a student to receive a master's degree.

A student who plans to become a candidate for a master's degree must hold a bachelor's degree from an accredited institution or have completed equivalent academic preparation at a foreign university as determined by the appropriate campus authority. The student must have completed undergraduate course work substantially equivalent to that required at California State University, Long Beach in the discipline of intended graduate study, or must be prepared to undertake additional work to make up any deficiency. Most graduate degree programs are based upon preparation in the discipline at the undergraduate level. Undergraduate preparation is considered adequate if a candidate has met the upper-division requirements of this University for a bachelor's degree in the subject matter area of the master's degree program. Refer to specific departments for detailed requirements of each degree program.

The following graduate degrees are offered:

Civil Engineer Degree

Master of Arts Degree in:

Anthropology  
Art  
Asian Studies  
Communicative Disorders  
Dance  
Economics  
Education  
English  
Family and Consumer Sciences  
French  
Geography  
German  
History  
Interdisciplinary Studies  
Kinesiology  
Linguistics  
Music  
Occupational Studies  
Philosophy  
Political Science  
Psychology  
Religious Studies  
Spanish  
Speech Communication  
Theatre Arts

Master of Business Administration

Master of Fine Arts Degree in:

Art  
Creative Writing  
Dance  
Theatre Arts

Master of Music

Master of Physical Therapy

Master of Public Administration

Master of Public Health

Master of Social Work

Master of Science in Nursing/Master of Public Health

## Master of Science Degree in:

Aerospace Engineering  
Biochemistry  
Biology  
Chemistry  
Civil Engineering  
Computer Science  
Counseling  
Criminal Justice  
Electrical Engineering  
Engineering  
Geology  
Gerontology  
Health Science  
Health Care Administration  
Interdisciplinary Studies  
Kinesiology  
Mathematics  
Mechanical Engineering  
Microbiology  
Nursing  
Nursing/Health Care Administration  
Nutritional Science  
Physics  
Psychology  
Recreation Administration  
Special Education

Ph.D. in Engineering and Industrial Applied Mathematics  
(awarded jointly with Claremont Graduate School)

## Certificate Programs and Graduate Study

Students, whether graduates of CSULB or of another accredited institution, may complete the requirements for and be awarded certificates while in graduate standing. Admission requires a bachelor's degree from an accredited institution, at least a 2.5 grade-point average in the most recently completed 60 units of course work, and a passing score on the University's Writing Proficiency Examination. Certificate programs are of two types: baccalaureate certificates which may be taken concurrently with or following the award of the baccalaureate degree, and graduate certificates which require postbaccalaureate standing. The baccalaureate certificates are listed in the "Undergraduate Programs" section of this catalog. The graduate certificates are listed below, with the department responsible for each certificate indicated in parentheses.

Graduate certificate programs require at least 18 units of course work, of which at least 12 units must be at the 500 or 600 level. Courses taken to fulfill the requirements for the master's degree may also be applied to certificate requirements, if the certificate program permits, but such overlap may not exceed 15 units. Courses in directed research, directed reading, internship, and independent study may comprise no more than 3 units of a graduate certificate program. Thesis and student teaching may not be used on the program. Extension and/or transfer credit may comprise no

more than one-sixth of the course work used to meet graduate certificate requirements. A grade-point average of at least 3.0 must be maintained in the graduate certificate program's course work. All courses used to complete the requirements of a graduate certificate must be completed within a five-year period from the date of the initial course work.

If you wish to pursue a graduate certificate program, you should review the course requirements given in the department course listings of this catalog. You should notify the relevant department of your intention to pursue a certificate program as early as possible so as to receive early advisement on the program.

## Certificates

Career Guidance Specialist (Educational Psychology, Administration, and Counseling)  
Community College (Educational Psychology, Administration, and Counseling)  
Health Care Administration (Health Care Administration)  
Industrial Plastics Processing and Design (Mechanical Engineering)  
Leisure Counseling (Recreation and Leisure Studies)  
Museum Studies (Art)  
Public Management Analyst (Public Policy and Administration)  
Public Sector Employer-Employee Relations and Personnel Management (Public Policy and Administration)  
Public Sector Financial Management (Public Policy and Administration)  
Systems Engineering (College of Engineering)  
Teaching English as a Second Language (Linguistics)  
Reading (Teacher Education)  
Russian and East European Studies (Russian Program)  
Transportation Policy and Planning (Public Policy and Administration)  
Urban Executive Management (Public Policy and Administration)

## Post-Baccalaureate Studies

Students with a baccalaureate degree who wish to continue their education for personal enrichment or to meet professional needs may do so at CSULB either as a post-baccalaureate student or as a graduate student. A post-baccalaureate student is one who has not declared a master's degree or a credential as an objective but who is nevertheless attending class and participating in academic work at the University beyond the baccalaureate degree. Post-baccalaureate students may only enroll through University College and Extension Services. A graduate student is one who has requested and received formal admission to a specific field of study that will lead to a graduate degree in one of the many disciplines available at CSULB.

Candidates for public school service credentials at the University are advised to familiarize themselves with the requirements for these programs. Descriptions of credential programs appear in the Credential Programs section of this *Catalog* and in the separate departmental sections of this catalog.

## Graduate and Post-Baccalaureate Admission Requirements

Graduate and credential applicants may apply with the objective of completing a degree, a credential, or a certificate program. Depending on the stated objective, CSULB will consider an application for admission in one of the three categories:

### Graduate Standing — Conditionally Classified

To qualify for admission in conditionally classified graduate standing, a student must:

1. Hold an acceptable baccalaureate degree from an institution accredited by a regional accrediting association or have completed equivalent academic preparation in a foreign university as determined by an appropriate campus authority;
2. Have attained a grade-point average of at least 2.5 (A = 4.0) in the last 60 semester (90 quarter) units attempted;
3. Have been in good standing at the last college attended; and
4. Be accepted into a graduate degree curriculum on a conditional basis, subject to the requirement that any deficiencies must be remedied by additional preparation.

### Graduate Standing — Classified

A student who meets the minimum requirements for admission as a graduate student, as specified in the preceding paragraph, may be admitted as a fully classified graduate student pursuing an authorized degree curriculum if the appropriate program authorities determine that he or she satisfactorily meets the professional, personal, scholastic, or other standards for admission to the graduate degree curriculum, including qualifying examinations that the appropriate program authorities may prescribe. Only those applicants who show promise of success and fitness will be admitted to graduate degree curricula, and only those who continue to demonstrate a satisfactory level of scholastic competence and fitness shall be eligible to proceed in such curricula.

### Post-Baccalaureate Standing — Classified

In this status a student is eligible to enroll in a credential or certificate program, provided that such additional professional, personal, scholastic, and other standards, including qualifying examinations, as may be prescribed for the particular credential or certificate program by the appropriate campus authority, are satisfied.

### Admission to the University

In order to be admitted to CSULB as either a post-baccalaureate classified student or as a graduate student, the applicant must meet the following requirements:

1. Have earned a baccalaureate degree from an accredited university or college;
2. Have been in good standing at the last institution attended;
3. Have at least a 2.5 grade-point average in the last 60 semester (or 90 quarter) units attempted, independent of when the baccalaureate was granted. The entire term in which the 60 semester (or 90 quarter) units began will be used in this calculation. Lower-division courses or courses taken in extension (except in adjunct enrollment at CSULB in the upper-division level), after obtaining the bachelor's degree, will be excluded from the calculation.

Students wishing to enroll in the University must follow the instructions supplied by the Office of Enrollment Services in the Admissions section of this *Catalog*.

NOTE: Graduating undergraduate CSULB students do not automatically continue as graduate students. They must apply under the same conditions as non-CSULB students. Once applications are received, they will be evaluated at appropriate offices. To be admitted to the University, a student must also be admitted to a specific program. The University does not admit post-baccalaureate students who do not have a degree, certificate, or credential objective. Provisional admission is granted to applicants anticipating their baccalaureate degree prior to registration but subsequent to filing the application. Proof of the baccalaureate is mandatory (final transcript must be on file) prior to the student's second semester of attendance. If it is not, provisionally admitted students will be prohibited from future enrollment until such proof is on file.

The student must request all institutions of higher learning attended (including CSULB) to send an official copy of transcripts directly to the Office of Enrollment Services and to the department advisor of graduate studies. Transcripts presented to the Office of Enrollment Services by the student are not acceptable. Graduates of California State University, Long Beach must follow these same procedures when making application to a graduate degree program.

All graduate and postbaccalaureate applicants, regardless of citizenship, whose preparatory education was principally in a language other than English must demonstrate competence in English. Those who possess a bachelor's degree from a postsecondary institution where English is not the principal language of instruction must receive a minimum score of 550 on the Test of English as a Foreign Language (TOEFL). Some programs may require a higher score.

### Admission to a Department as a Graduate Student

In order to pursue a credential or master's degree, students must be accepted by the department or college offering the degree program. In some instances (see specific department listing) this process may require making a separate application to the department or college. Following review the department or college will determine whether or not a student meets its requirements for admission to its degree program. Departments or colleges that receive more applications from qualified students than the number of graduate spaces they have available will admit students in priority order based on the strength of candidates' qualifications.

On the other hand, if space is available, a student who is admissible to the University but who does not meet program requirements for admission may nevertheless be accepted as a conditionally classified graduate student by the department or college offering the program, subject to the proviso that all remaining admission requirements of the program must then be fulfilled after enrollment. Only the Dean of Graduate Studies is authorized to grant conditional admission to a student who does not meet University requirements, and such action will be taken only in rare and compelling circumstances.

## Special Action

In rare and compelling circumstances, an applicant who doesn't qualify for admission under the previous provisions may be admitted by special action if on recommendation of the appropriate faculty of the department/college concerned and in the judgment of the Dean of Graduate Studies there exists acceptable evidence that the applicant possesses sufficient academic, professional, and other potential pertinent to her/his educational objectives to merit such action, as shown through aptitude scores, recent academic performance, and experiential background.

## Requirement in Writing Proficiency

All students must demonstrate competency in writing skills. This is done by passing the Writing Proficiency Examination (WPE) or approved alternative examination. Information on this requirement may be obtained from Testing and Evaluation Services.

Demonstration of Writing Skills Competency as a Requirement for Advancement to Candidacy for a Master's or Doctoral Degree:

1. To qualify for advancement to candidacy for a master's or doctorate, each student must be certified proficient in written composition in English. Proficiency must be demonstrated by passing the University's Writing Proficiency Examination, or the approved equivalent as determined by the College. The responsibility for developing the skills necessary to pass the examination is the student's.
  - a) Students who are certified as having met this requirement previously in their baccalaureate program are exempt. There is no expiration for the prior certification.
  - b) The writing proficiency test, or the approved equivalent, shall be used for candidates at the graduate level.
  - c) The required achievement level shall be at least the same for graduate students as it is for baccalaureate candidates.
  - d) Every master's or doctoral candidate must attempt the examination during the first semester in residence at CSULB, unless a graduate student has been previously certified as having satisfactorily met the writing proficiency requirement.
  - e) The examination may be attempted as many times as necessary, but no more than once a semester or three times a year (including the Summer Session).
2. The University Committee on Writing Proficiency has the responsibility of approving examinations to be used to demonstrate writing proficiency, of overseeing the administration and grading of the examinations, and of certifying to the Office of Enrollment services that a student has met this requirement for advancement to candidacy.
3. Use of the test must be consistent with the approved Policy Statement on "Writing Proficiency."

## Implementing Procedure

1. For the details of implementation of the general University Writing Proficiency Examination, see the approved Policy Statement on "Writing Proficiency."

2. The University's graduate programs suggest meeting with the WPE Advisor (contact the Learning Assistance Center) to plan appropriate strategies to develop the necessary writing skills. Such strategies may include:
  - a. enrolling in regular university courses in writing on a voluntary basis;
  - b. enrolling in courses in the discipline which develop writing skills;
  - c. enrolling in special courses offered through University College and Extension Services;
  - d. getting tutorial help from student organizations which provide assistance;
  - e. securing tutorial help from the Learning Assistance Center;
  - f. enrolling in writing courses in a community college.
3. Graduate students entering the University beginning in Spring 1995 will not be permitted to enroll in a second or subsequent semester unless they have previously satisfied the approved Writing Proficiency requirement or attempted the University Writing Proficiency Examination during their first semester of enrollment.

## Second Master's Degree

A graduate student who is currently enrolled in a master's program at CSULB must complete that master's program before enrolling in courses for another degree. A graduate student who already holds a master's degree from this or any other accredited institution but desires to become a candidate for a second master's degree in a different field is subject to the following regulations:

1. All admission requirements of the University and college or department must be met (all general regulations listed in the *Catalog* apply to the second master's degree);
2. Enrollment and approval of candidacy for the second degree will be granted only after the first degree has been completed and awarded;
3. All requirements for the new degree must be completed;
4. After awarding of the first master's degree, a minimum of 24 units of graduate residence credit must be earned at this University including the minimum of 500/600-series units mandated by the major department in which the student is earning the second master's degree;
5. No more than six units earned on the first degree may be applied to a second master's degree;
6. Prerequisites for an advanced course must be completed prior to enrollment in the advanced course. An instructor may disenroll a student who does not provide evidence of adequate preparation;
7. All prerequisites must be completed prior to application for candidacy;
8. Two master's degrees cannot be awarded concurrently;
9. The area or discipline in which the second degree is earned shall be designated on the transcript and a second diploma awarded.

## Graduate Study in the International Programs

Students planning to participate and receive unit credit toward a master's degree in an International Program should consult with the graduate advisor in the department of their

major and college dean or director of graduate studies before entering the degree program.

Graduate students who have not been admitted to candidacy for a master's degree and who participate in the International Programs may, upon their return to California State University, Long Beach, petition to have six units earned as resident credit in the International Programs included on their official student program for the master's degree. In no case may excess grade points earned in the International Programs be used to bring a grade-point deficiency at California State University, Long Beach to the required 3.0 (B) average.

Students admitted to candidacy for a master's degree who plan to participate in the International Program of Studies must obtain permission, prior to beginning their study abroad, to have units earned abroad applied toward satisfaction of their degree requirements. A candidate's petition to apply units earned abroad must be reviewed and recommended by the department offering the degree. The specific courses to be taken on the foreign campus, thesis research which is to be done abroad, or any other requirements such as examinations to be taken upon the student's return must be listed on the official student program. Usually no more than six units of credit may be transferred to apply toward the minimum 30 units for an advanced degree as a result of participation in the International Program of Studies, but a maximum of 12 units may be allowed by the Dean of Graduate Studies in consultation with the University Graduate Council in a special case.

A copy of the candidate's graduate student program must be forwarded to the Resident Director for the foreign area, who must certify that any credit earned abroad is appropriate to meet graduate degree requirements.

Pending the faculty's evaluation of the student's work, a Report Delayed (RD) grade will be assigned in all courses in which work was completed abroad and which are offered to satisfy requirements toward an advanced degree.

### Change of Objective

Evaluation of credits transferred to the University is based in part upon the objective indicated on the application for admission. Candidates desiring a change in graduate objective to a discipline different from that indicated on the original application must reapply to the University. Reapplication requires the submission to the Office of Enrollment Services of a newly completed Graduate and Postbaccalaureate Admission form and payment of the associated fee. The proposed new graduate department or program will review the application and notify Enrollment Services of its decision. Students who are admitted to a new discipline must then seek approval of their official student program and advancement to candidacy, using the procedures indicated below under "The Program" and "Advancement to Candidacy." Students who are not admitted to a new discipline have the option of continuing to pursue their original objective.

The only exception to the procedures described in the preceding paragraph is for students seeking to change from one degree program to another degree program within the same discipline (for purposes of this regulation, all options offered by the College of Education are considered to be part of a single discipline). In such cases candidates must obtain a Petition to Change Objective from the Office of En-

rollment Services, obtain the required department/program signatures, return the completed petition form to Enrollment Services, and then seek approval of their official student program and advancement to candidacy, using the procedures indicated below under "The Program" and "Advancement to Candidacy."

### Withdrawal from the Degree Program

Students who have been admitted to candidacy for an advanced degree and who complete no courses at this University within a calendar year without filing an approved request for educational leave will be withdrawn from the graduate degree program.

If a student wishes to resume graduate study after withdrawal, the student must reapply to the University and request that the department or college initiate a petition to the Dean of Graduate Studies to reinstate the student in his or her former graduate program. In the absence of an approved petition for reinstatement, the student must be readvanced to candidacy and the department or college may determine that the student's graduate program should be changed.

## University Regulations Governing the Master's Degree

### General

The following regulations apply to all graduate degree programs. Specific academic and curricular requirements of individual degree programs are given in the departmental listings of this catalog.

All regulations involving a calculation of grade-point average subsequent to admission to the University as a graduate student shall be based on the following common practices and standards.

"Overall Graduate Grade-Point Average" shall be calculated on all upper-division and graduate-level coursework attempted by a student at this University after completion of a baccalaureate degree.

Grade-point average standards calculated on the basis of a smaller range, grouping, or set of upper-division and graduate-level courses, for example, "courses in the major" or "courses taken since admission to the degree program," presuppose that the student has met the minimum standard for any larger range, group, or set, including the Overall Graduate Grade-Point Average.

1. A student pursuing the master's degree must maintain an Overall Graduate Grade-Point Average of 3.0 (B). Exceptions to the 3.0 (B) Overall Graduate Grade-Point Average may be made only on the recommendation of the departmental faculty offering the degree, the college dean or designee, and approval by the University Graduate Council.
2. At least a 3.0 (B) average must be maintained in the major.
3. No course with a grade lower than "C" may be applied toward the fulfillment of degree requirements.
4. The individual course of studies (student program) for the master's degree must contain a minimum of 30 units in upper-division and graduate courses.  
Some degree programs require additional units. Please consult individual degree program requirements.  
A minimum of sixty percent of the units required for the

degree shall be in the 500- and 600-level series and these shall be completed at this University, consistent with departmental requirements. Student teaching cannot be included in any master's degree program. All upper-division courses marked with an asterisk may be included in the master's degree programs of the department listing the course. With permission of the student's department graduate advisor, asterisk-marked courses may also be used on other graduate degree programs, when appropriate. Normally, other non-marked courses are not used.

5. A thesis and/or final comprehensive examination must be completed. A minimum of four and a maximum of six semester units shall be allowed for a thesis. Failure of the comprehensive examination or thesis requirement is failure of both options. Thus, a student failing the comprehensive examination may not proceed to the thesis option or vice versa. Once a student has completed a semester of enrollment towards fulfillment of either the comprehensive examination or thesis option, the student may not change from one option to the other without the approval of the faculty concerned, the department chair, and the appropriate dean or designee.
6. No fewer than 24 semester units shall be completed in residence at the University. The Dean of Graduate Studies may authorize department/college approved substitution of credit earned by alternate means for a part of the residence requirement. Units, including continuing education or extension units, accepted by transfer for application toward the minimum units required for a master's degree cannot be used to fulfill the minimum unit requirements in the 500/600 series. This 500/600 unit requirement must be completed in the major discipline and in residence at this University.
7. All requirements of the degree program must be completed within seven years of the date the student program was initiated, i.e., the date (semester) when the first course appearing on the student program was completed. An extension of time beyond the limit may be granted by the Dean of Graduate Studies if warranted by individual circumstances and if the outdated work is validated by comprehensive examination in the relevant course or subject field work, or such other demonstration of competence as may be prescribed by the department and/or college.
8. A graduate student who expects to receive a degree at the end of any semester or summer session must be enrolled during that semester or session and must complete the Request to Graduate Form well in advance. The appropriate request for Spring or Summer candidates must be filed by the preceding September 15; for Fall candidates, by the preceding February 1 at the Office of Enrollment Services. The names of candidates who file within these deadlines will appear in the Commencement Program published each Spring.

Note: Graduate Studies 700 may only be used to fulfill the enrollment requirement if the applicant has completed all degree program courses prior to the semester of graduation. An incomplete grade not otherwise resolved prior to graduation will automatically revert to the letter grade indicated on the "Requirements for Assigning an Incomplete

Grade" form. A course with an unresolved grade of SP (Satisfactory Progress) will remain on the transcript but will be removed from the student's program of study. Incomplete grades may not be resolved following graduation.

9. Proficiency of a student in all parts of a curriculum is determined by the faculty of the University. A favorable vote of the faculty is required for a student to receive the degree.

### The Program

A student must consult with the graduate advisor of the department or college to prepare a tentative degree program. After completing prerequisites and other requirements, the student must formulate an official student program and apply for advancement to candidacy.

The department will assign the student a faculty advisor who must be consulted about preparing a degree program. The advisor should have an official evaluation of the student's previous work from the Office of Enrollment Services, although transcripts provided by the student may be used to develop a tentative student program and discuss degree requirements. When the Office of Enrollment Services' evaluation and the results of tests are available, the faculty advisor can assist the student in drawing up a student program. This student program must be approved by the student's faculty advisor, the departmental graduate advisor, and college dean or director of graduate studies or, for Interdisciplinary Studies, the Dean of Graduate Studies. The student program must list the following:

1. Courses required for removal of undergraduate deficiencies;
2. All courses taken prior to advancement to candidacy which are to apply toward the 30-unit minimum;
3. Required courses;
4. Elective courses.

The official student program, when approved, serves as the basis for the Office of Enrollment Services' graduation check which is required before the degree can be granted. Students who have not been advanced to candidacy are subject to all changes as published in the *Catalog*, Policy Statements, and certifications.

Graduate student programs may be revised as the student advances toward the degree. Such revisions must be recommended by the faculty advisor and approved by the departmental graduate advisor and the college dean or director of graduate studies or, for Interdisciplinary Studies, the Dean of Graduate Studies.

### Advancement to Candidacy

Advancement to candidacy is the next step after achieving classified status and signifies approval of a plan of study by the student's major department and college or, for Interdisciplinary Studies, the Dean of Graduate Studies. The prerequisites to advancement to candidacy are:

1. Classified status;
2. Satisfactory completion of the CSULB Writing Proficiency Examination requirement. Information is available in Testing and Evaluation Services (Brotman Hall 216);
3. A minimum 3.0 overall grade-point average and a 3.0 grade-point average in all units undertaken for the student program (at least 6 units);
4. Completion of all qualifying examinations;

## 5. Enrollment in regular session.

Advancement to candidacy is to occur at least one semester or summer session prior to the semester (session) in which the student expects to graduate. It must occur prior to a student filing the Request to Graduate form with the Office of Enrollment Services. Filing deadlines are the same as for baccalaureate degree candidates.

An approved graduate student program remains in effect as long as a candidate is making satisfactory progress. To insure minimum satisfactory progress toward the degree objective, the student must enroll in at least one session during any 12-month period and complete all degree requirements within seven years after completion of the first course on the student program. See also information about Graduate Studies 700 later in this section. The student may not change the graduate major without filing a new application for admission. If admitted to the new discipline, the student must then follow the steps indicated above for obtaining approval of a new student program and advancement to candidacy.

A student entering military service after having been advanced to candidacy will not be considered as having withdrawn from candidacy, provided that the student is inducted, enlisted, or called to active duty during a semester in which enrolled or not more than one semester thereafter, and provided that the student enrolls for work toward a degree within one calendar year of the date of release from service.

Students who have been advanced to candidacy and absent themselves from the University on educational leave will be considered as not having withdrawn from candidacy for an advanced degree, provided the terms of the educational leave are fulfilled. Such students must reapply when returning to the university, but the application fee will be waived.

A department or college recommends a student for advancement to candidacy by forwarding a graduate student program for approval to the college dean or director of graduate studies or the Dean of Graduate Studies. After the student's program has been processed and approved, a copy of the completed student program and a letter advancing the student to candidacy will be mailed to the candidate, with copies filed with the department or college and the Office of Enrollment Services.

A student must be enrolled in the semester or summer session in which advancement to candidacy takes place, and this must occur no later than one semester or summer session prior to completion of course requirements. Normally, a student is eligible and should file for advancement to candidacy after completing six units of graduate coursework for the graduate degree program with a 3.0 grade-point average.

## Election of Regulations

Graduate students advanced to candidacy will be held responsible for the regulations governing master's degrees in effect at the time of advancement or at the time the last requirement for the degree is met, whichever is more conducive to the student's course of study. A change in master's degree objective or readmission to a graduate degree program following withdrawal requires that a new student program be filed under the current graduate policies as published in the latest edition of the *Catalog*.

## Educational Leave

Any registered student, undergraduate or graduate, in good academic standing may request an Educational Leave. Students requesting an Educational Leave shall complete an Educational Leave Form in the semester before the leave is effective, including an explanation of their reasons for seeking the leave and a statement of when they intend to resume academic work. The completed form is to be submitted for approval to the student's department chair (undergraduate) or graduate advisor.

The minimum initial leave will be one full semester; the maximum will be one calendar year. A student may request, in writing, in advance, an extension of the leave. Under no circumstances shall the total number of approved educational leaves exceed two, nor shall the duration of approved educational leaves extend beyond two calendar years.

Students returning from an approved educational leave are required to submit an application form but will not be required to pay another application fee. Students returning from an absence for which an educational leave was appropriate but not approved, in advance, must pay another fee.

Graduate students who plan to enroll for credit at another institution of higher education during the leave period must obtain prior approval from the department graduate advisor, department chair, and the college dean or designee for the transfer of course credit to the student's program.

The period of an educational leave is counted in the calculation of elapsed time under the regulations governing the maximum period for completion of degree requirements (seven years for graduate students).

For the period of an educational leave the student's rights under the Election of Regulations rule are preserved, maintaining the right of students to elect regulations as if they had maintained continuous attendance.

Students who fail to enroll in two or more consecutive semesters place themselves in jeopardy under the continuous enrollment provisions of the election of regulations rules. This includes the automatic loss of "advanced to candidacy (candidate)" status. Moreover, students who break residency and lose candidate status do not have a presumptive right to reinstatement of their candidacy. These students will be required to go through the process of readvancement.

An educational leave presupposes no expenditure of University resources or faculty and staff time in behalf of the student during the period of the leave. In addition, no computer facilities, no library privileges, and no student services are available to a student on educational leave.

## Comprehensive Examination

Each department or college requiring a final comprehensive examination determines the content of the examination. Such examinations may be written or oral or both. A faculty committee shall represent the department in preparing questions, administering, and reading the examination. Through the comprehensive examination, the faculty provides an opportunity for the master's degree candidate to demonstrate analytic ability and knowledge of the discipline. Working with the department chair or dean of the college and the appropriate committee, the departmental graduate advisor usually assumes responsibility for scheduling the examinations and for selecting the other faculty members to participate.

Students may not enroll for courses in preparation for the comprehensive examination or take the comprehensive examination unless they have been advanced to candidacy for the master's degree or unless advancement to candidacy will occur in the semester in which the enrollment takes place.

During the first semester of residence, the graduate student should ascertain from the faculty advisor what preparation will be expected. Early in the final semester of study for the degree, the candidate should contact the departmental graduate advisor to make arrangements for taking the examination. The department or college will notify the Office of Enrollment Services whether the student has passed or failed the final comprehensive examination. A candidate who has failed will usually be allowed to take the final comprehensive examination a second time, and the departmental graduate advisor should be contacted for specific procedures for the second attempt. To award a candidate the master's degree for a particular semester, the results of the comprehensive examination must be reported to the Office of Enrollment Services prior to the end of the semester.

### Theses and Projects

A student may enroll for Thesis (course 698 or 699) only when that student has been advanced to candidacy for the degree or when advancement to candidacy will occur in the semester of initial enrollment in Thesis.

Theses and projects submitted in partial fulfillment of the requirements for a graduate degree at this University shall meet the following definitions established by the Trustees of the CSU.

A thesis is a written product of the systematic study of a significant problem. It clearly identifies the problem, states the major assumptions, explains the significance of the undertaking, sets forth the sources for and methods of gathering information, analyzes the data, and offers a conclusion or recommendation. The finished product evidences originality, critical and independent thinking, appropriate organization and format, and thorough documentation. Normally, an oral defense of the thesis will be required.

A project is a significant undertaking appropriate to the fine and applied arts or to professional fields. It evidences originality and independent thinking, appropriate form and organization, and a rationale. It is described and summarized in a written abstract that includes the project's significance, objectives, methodology, and a conclusion or recommendation. An oral defense of the project may be required.

Students are responsible for understanding the definition of a graduate thesis as outlined above and must follow the format guidelines prescribed by the University and department in which the thesis is completed.

### Thesis Committees

A student's thesis committee shall consist of at least three members qualified in the areas relating to the thesis. At least two shall be full-time faculty members at CSULB, one of whom must be tenured or tenure-track. The chair of the thesis committee, including the chair of a committee for an interdisciplinary studies degree, must be a tenured or tenure-track faculty member from a department authorized to offer a graduate degree. The thesis committee must be ap-

proved by the appropriate department graduate advisor and the college associate dean or director of graduate studies. Normally the chair of the committee also serves as thesis director, but this is not necessarily so. The thesis director must be a person qualified in the specific area of the thesis, but need not be a tenured or tenure-track faculty member. The committee shall be responsible for the guidance of the student throughout the thesis effort. Any change in the composition of the committee requires justification and must be approved by the appropriate department graduate advisor and college associate dean or director of graduate studies.

Before agreeing to serve on a thesis committee, the prospective members will review the thesis topic and determine that they possess the requisite expertise to serve on such a committee, and that sufficient resources and materials exist and are reasonably available to the student to support such a study.

Thesis committee members will review the research competence of the thesis student before approving a thesis proposal.

Thesis committee members will advise and direct students in their thesis work and ensure that the thesis meets the standards and definition of a thesis specified above.

Thesis committee members will determine the grade to be awarded for completion of the thesis; and by signing the thesis signature page, thesis committee members certify that they have determined that the thesis meets the required standards of scholarship, format, and style of the discipline.

When the thesis committee includes a thesis director who is not the chair of the committee, this person may be identified on the thesis approval page as "Thesis Director."

### Thesis Committee Chairs

Thesis committee chairs will determine that the student has the proper preparation in terms of course work and research skills to pursue the proposed thesis.

In departments where this function is not carried out by graduate advisors, thesis committee chairs will advise the student in the selection of other members for the thesis committee, ensuring that the other members are appropriate to the proposed thesis effort.

Thesis committee chairs will be the major contact point with the student and will oversee the other committee members' work with the student.

Thesis committee chairs will assure that the editorial and format standards appropriate to the mechanical preparation of a thesis are followed.

Thesis committee chairs will establish guidelines for the student and timetables to be followed to ensure completion of the thesis in a reasonable time.

Thesis committee chairs will arrange for the oral defense of the thesis when required.

The thesis committee chair is responsible for canvassing the committee and reporting the grade agreed upon by its members. After the completed thesis has been reviewed by the University Thesis Office for conformance with prescribed format criteria and the approval page has been signed by the committee and by the dean or department chair, as appropriate, the final grade will be submitted.

## Thesis Office

All theses must be acceptable for deposit in the University Library. The Thesis Office in the University Library will verify that each thesis meets the format criteria prescribed by the department or degree program and by the University and that it meets all University procedural requirements for theses. Students should consult the University Thesis Office for information, advice, and assistance on the mechanics of preparing a completed thesis and should purchase a copy of *Master's Theses and Projects: Guide to Style and Format* (copies of this guide can also be checked out from the reserve desk in the University Library). The Thesis Office also conducts periodic workshops on how to prepare a thesis at CSULB.

## Academic Probation and Disqualification

### Graduate Students

For purposes of determining eligibility to remain at the University, both quality of performance and progress toward the student's objective will be considered. Eligibility will be determined by use of grade points and grade-point average.

Students who are enrolled in a graduate degree program in conditionally classified or classified standing will be subject to academic probation if they fail to maintain an overall grade-point average of at least 3.0 (as defined earlier under General Regulations Governing the Master's Degree) in all units attempted subsequent to admission to the degree program.

Every graduate student who has been advanced to candidacy must maintain an overall grade-point average of 3.0 and a grade-point average of 3.0 in all courses applicable to the degree. Candidacy for an advanced degree may be revoked if a student's overall grade-point average falls below 3.0 at any time. Students who become subject to dismissal from an advanced degree program will be notified of the action taken by the college associate dean for graduate studies or the Dean of Graduate Studies.

Graduate and post-baccalaureate students are subject to disqualification if while on probation they fail to earn sufficient grade-points to be removed from probationary status. Disqualification will bar a graduate student from registering as a matriculated student at this campus. Furthermore, subsequent removal of GPA deficiencies by enrolling through UCES or at another university does not guarantee readmission to CSULB. A graduate student who has been disqualified must file a new application and be accepted by the department or college offering the desired degree program.

### Other Post-Baccalaureate Students

A post-baccalaureate classified student who fails to maintain a cumulative grade-point average of 2.5 on all units attempted at the University will be placed on probation.

A student on probation who, prior to the beginning of the next term, fails to attain a cumulative grade-point average of 2.5 on all units attempted at the University will be disqualified.

A student who is disqualified because of scholastic deficiency may petition the appropriate program authority for readmission only after an absence of two semesters or upon successful completion of summer session courses which remove the grade-point deficiency.

Petitions for readmission must indicate the reason for requesting readmission and must include a statement of any academic work successfully completed since disqualification or of any other activity which gives evidence in support of the petitioner's belief that readmittance is warranted. An application for admission and required transcripts, as well as the petition, must be submitted to the Office of Enrollment Services before the dates established by the University for filing applications.

## Grievance Procedures

### I. Statement of Governing Principles

A. A graduate student may only file a grievance based on an alleged violation of specific University regulations or policies or accepted principles of due process and only if another specified remedy (such as the University Grade Appeal Policy in the case of all course grades) does not exist.

B. A grievance may not be filed on the basis of a graduate student's judgment of an instructor's or administrator's competence; such judgments are solely the province of the academic department involved or of the administrator's supervisor.

C. A grievance must be initiated within one calendar year of the alleged violation.

D. Graduate programs should make every effort to obviate the possible causes of a grievance in advance by developing clearly written statements of procedures and standards governing decisions that affect graduate students, such as admission into a program, dismissal from a program, administration of comprehensive examinations, selection for field experience, et cetera. Graduate programs should also have in place a mechanism, such as an appeals committee, to provide due process review at the local level when a graduate student so requests. Due process review is an evaluation of the procedures and standards followed in arriving at a decision; it should be conducted by qualified members of the faculty who were not involved in making the original decision. The purpose is not to second-guess the original decision, but rather to make certain that the appropriate procedures and standards were applied in a manner free of arbitrary, prejudicial, or capricious behavior.

E. Final decisions affecting graduate students should be made only on substantive grounds by the personnel who are most qualified professionally, namely the faculty offering a particular graduate program. When subsequent review shows that appropriate procedures or standards have not been followed in arriving at a decision affecting a graduate student, the preferred remedy is to remand the case back to the faculty of the graduate program for their reconsideration. An error in procedure should not become grounds for reversing a substantive decision. In the event that the faculty of a graduate program persist in a failure to follow appropriate procedures or standards, the Graduate Council will consider that situation as an indication that the program should be reviewed for suspension or discontinuance.

### II. Informal Resolution

A formal grievance may be filed by a graduate student only after the student has first sought to resolve the grievance by informal means. The graduate student should begin by

contacting the chair or director of the program offering the degree, explaining the nature of the perceived problem, and requesting reconsideration of the decision. If the chair or director was directly involved in the original decision or denies the student an opportunity for due process review at the local level, then the student should seek informal resolution through the college's Associate Dean for Graduate Studies.

### III. Formal Resolution

A. If an attempt at informal resolution is unsuccessful, a graduate student may file a formal grievance with the Associate Vice President for Academic Affairs and Dean of Graduate Studies. The grievance must be filed in writing within 30 calendar days of the time when informal resolution was unsuccessful. The grievance must include a full statement of the graduate student's evidence that a University regulation or policy or an accepted principle of due process was violated, as well as an explanation of the efforts made to seek informal resolution. The Associate Vice President for Academic Affairs and Dean of Graduate Studies will verify that a good-faith effort at informal resolution was attempted by the graduate student and that no more than one year has elapsed since the alleged violation occurred.

B. If these conditions have been satisfied, the Associate Vice President for Academic Affairs and Dean of Graduate Studies will forward the grievance to the Steering Committee of the Graduate Council.

1. If a member of the Steering Committee is a faculty member of the graduate program involved in the grievance, that member of the Steering Committee shall be replaced by another member of the Graduate Council, elected for that purpose, whenever the committee considers any matter related to the grievance.
2. The Steering Committee will forward a copy of the grievance to the chair or director of the graduate program, requesting that a written response be submitted to the committee within 20 working days of receipt of the grievance.

C. When the Steering Committee receives the written response to the grievance, it will determine whether there is sufficient evidence to render a summary judgment or whether the grievance merits further review. The Steering Committee may decide:

1. That there is not sufficient evidence of a violation of a University regulation or policy or an accepted principle of due process and dismiss the grievance; such a decision shall be final, unless further review is granted by the President.
2. That there is sufficient evidence of a violation of a University regulation or policy or an accepted principle of due process to warrant immediate remanding of the grievance to the graduate program, with explicit instructions concerning the violation that must be corrected during the graduate program's reconsideration of the case.
3. That the evidence in the case is such that further review is required; in such an instance the Steering Committee shall notify both the grievant and the gradu-

ate program in writing of the additional evidence the committee wishes to see and whether that evidence should be provided in writing or in personal testimony before the committee.

D. If the Steering Committee seeks evidence by means of personal testimony, the meeting at which such testimony is presented shall be conducted in the manner of any other academic committee meeting and not as a formal hearing; both the grievant and the graduate program shall be given appropriate opportunities to present their views, but the meeting shall be conducted as an inquiry by the committee members, and not as an adversarial proceeding; there shall be no cross-examination.

E. All meetings at which the Steering Committee considers a grievance shall be closed to the public; the committee shall keep minutes of the meeting, but it need not tape-record its proceedings, nor shall a transcript be prepared.

F. When the Steering Committee is satisfied that it has obtained sufficient evidence to make a determination in the case, it shall make its decision in accordance with the provisions of Paragraph III.C.1 or III.C.2 above.

G. The Steering Committee shall report to the Graduate Council on the issues involved in the grievance and on its determination of the case, without identifying the graduate student who filed the grievance.

## Academic Credit

### Credit/No Credit Grading

A graduate student may take courses at the 100/200/300/400 levels under the Credit/No Credit grading policy; however, no course in which a grade of "CR" has been assigned may be used to fulfill the requirements for a master's degree, except that the grade of "CR" may be permitted for master's theses or projects to a maximum of six units when the individual department has specifically designated Credit/No Credit grading for the thesis/project course in the department and for field work, practicum, and/or internship courses.

For graduate students, courses at the 300/400/500/600/700 levels require "B" level proficiency to merit award of the "CR" grade; at the 100/200 levels "C" level proficiency or better is required for award of the "CR" grade.

The option of Credit/No Credit grading for graduate students on 100/200/300/400-level courses is subject to specific regulations of the individual departments regarding their graduate students and regarding the authorization for this option intrinsic to the approved course. Otherwise, no limitation exists as to the number of courses taken under this policy.

### Waiver of Course Requirement and Credit by Examination

No waiver of course requirements or credit by examination may be used to satisfy master's degree requirements. However, the following rules govern course waivers or credit by examination in satisfying prerequisites for admission to candidacy in any master's degree program.

Any candidate for a master's degree who believes that previous training has provided adequate preparation in a certain area may request a waiver from the department concerned.

A candidate may also apply for course credit by examination, but only for prerequisite courses and not to satisfy any of the requirements for the master's degree. Requests for such examinations must be made to the department concerned and approved by the department chair. Credit by examination is restricted to courses published in the current *CSULB Catalog*. Please see Credit by Examination in the General Regulations section of this *Catalog*.

All course credit by examination will be recorded as CR (Credit) and will not be included in calculation of grade-point averages; such credit may not be used to remove a grade of "D" or "F" in a course already attempted, nor may course credit by examination be granted for any course which is a prerequisite to one for which credit has already been received.

### Graduate Transfer Units by Extension

At the option of the college or department offering an advanced degree requiring a total of thirty units, up to six units of approved extension/continuing education or transfer credit is acceptable on graduate student programs. At the option of the college or department offering a graduate degree requiring a total of 30 units, this limit may be raised to 9 units of extension/continuing education credit if taken at CSULB. These limits may be increased further for graduate degrees requiring more than 30 units provided that (1) no graduate degree may be awarded by CSULB unless at least 24 units are taken in residence, and (2) no graduate student program may use either extension/continuing education or transfer credit to satisfy the requirement that at least 60 percent of the total units be taken at the 500 and 600 levels. Extension courses completed at campuses including California State University, Long Beach shall be acceptable within the six-unit transfer limit, provided the work can be properly evaluated and the course is acceptable as graduate work for an equivalent graduate degree on the campus where taught. Extension/continuing education and transfer course material shall be evaluated and approved by CSULB faculty teaching in the topic area in conjunction with the department graduate advisor and college associate dean or director of graduate studies. Final approval/disapproval shall be the responsibility of the Dean of Graduate Studies.

Extension/continuing education credit may not be used to reduce the minimum units required in a discipline for a master's degree, that is, extension credit may be used to complete coursework required outside the discipline. Excess grade points earned in extension classes may not be used to offset a grade-point deficiency in the total graduate record.

Grades earned at another institution may not be used to offset grade-point deficiencies in courses taken at this University. However, grades of "C" earned at another institution in courses transferred to satisfy subject matter requirements for an advanced degree at this institution must be balanced by grades of "A" at this University to meet the required 3.0 ("B") overall average.

Credit earned by correspondence or by examination cannot be used to satisfy master's degree requirements.

### Graduate Studies 700

Registration in Graduate Studies 700 (GS 700) is restricted to graduate students who have completed all other course work and who have been advanced to candidacy, have departmental and college approval, and require additional utilization of University facilities to complete their thesis or comprehensive examination. Although no unit credit is added to the student's program or transcript, the course is considered as one unit of concurrent enrollment credit for fee payment purposes. Students must be registered either in a course or in GS 700 for every semester in which they plan to use University facilities or consult members of the faculty. Registration is also required in winter or summer session if that is when a student plans to graduate. Application forms are available from and must be signed by department graduate advisors. Students must be familiar with the rules governing residency (see previous section on Advancement to Candidacy).

### Academic Load

Nine units per semester is a normal academic load for a full-time graduate student engaged in study toward a master's degree. If a candidate wishes to exceed this limit, it should be discussed with the departmental graduate advisor. The maximum load for graduate students working toward a master's degree is 16 units per semester. Students who are employed full-time should not exceed six units per semester.

Graduate students who wish to register for more than one unit of credit per week of attendance during the summer session must secure advance approval from the college associate dean or director of graduate studies. Petition forms and information may be obtained in the college offices.

### Honors

#### The Graduate Dean's List of University Scholars and Artists

The Graduate Dean's List provides for University recognition of its most outstanding graduate students. Candidates for this honor will normally have completed the coursework applicable to their graduate student programs at the University. The annual list is limited to one percent of the University's graduate enrollment. Those honored will be named in the Commencement Program and will receive a certificate from the Dean of Graduate Studies.

#### Departmental Graduate Student Honors

In recognition of outstanding graduate student achievements, departments may honor graduating master's degree candidates by special recognition in the annual commencement ceremonies. Departmental graduate student honors are reserved throughout the University to two students (or a maximum of ten percent) from a department. Departmental graduate student honors are usually restricted to students not otherwise recognized by University or college awards. These honors are normally conferred for excellence in and contributions to the discipline, including outstanding seminar papers, artistic exhibitions, special achievements in field work and in University committees and functions, as well as participation in scholarly and professional organizations resulting from student research.

The Health Care Administration program has four major objectives: (1) to provide course work and related experience in order to prepare administrators, skilled in the application of organizational and managerial techniques, for the health care system; (2) to provide continuing education for health administrators in practice as well as others in administrative and leadership positions in the management and the delivery of health services; (3) to consult and to participate in community service activities which complement the instructional and research functions of the faculty and provide appropriate learning experiences for students; and (4) to conduct studies in the administration and operation of the health care delivery system which will contribute to development of faculty teaching abilities and overall professional growth.

The program is designed for the professional administrator or those who wish to become administrators within organizations which deliver personal health care services. Three patterns of preparation are offered:

1. Master of Science in Health Care Administration;
2. Certificate in Health Care Administration.
3. Bachelor of Science in Health Care Administration

The schedule of graduate and undergraduate courses offerings is in the regular *Schedule of Classes*.

## Bachelor of Science in Health Care Administration (code 3-1205) (124 units)

### Requirements for Admission

#### Prerequisites

1. Undergraduate students are required to pass the Writing Proficiency Exam (WPE) prior to declaring Health Care Administration as their major.
2. All students must complete a minimum of 15 semester units or the equivalent in prerequisite preparatory courses for the major: ACCT 201, ECON 101 or 300, I S 240, I S 310 (or equivalent) and BIOL 200 (or equivalent). Computer proficiency in word processing, spreadsheet, database and presentation software is expected. Business calculus (MATH 115) is recommended.
3. An overall grade point average of 2.0 or higher is required for entrance into the program. A minimum grade of "C" is required for each prerequisite course.

#### Requirements

1. Complete the requirements for General Education;
2. Complete the prerequisite courses;
3. Complete the major core course requirements: HCA 341, 353, 402, 410, 416, 465, 480 and HSC 150.
4. Upper Division (required courses): A minimum of 15 additional units from the following: HCA 312, 320, 340, 422I, 450, \*451, 452, 470I.
5. Complete the electives as needed, to total 124 semester units, a minimum of 40 units in the upper division.

6. Successfully complete the University Writing Proficiency Examination;
7. Each major course must be completed with a grade of "C" or better. A course in which a grade lower than "C" is received must be retaken and successfully completed prior to enrolling in any course for which it is a prerequisite. A student receiving a grade lower than a "C" may proceed with other courses for which it is not a prerequisite with approval of the Undergraduate Advisor.

### Master of Science in Health Care Administration (code 6-1205)

The goal of the M.S. in Health Care Administration program is to prepare men and women to enter administrative positions in hospitals and ambulatory, managed care, long-term care, and mental health settings as well as in multi-institutional system central offices, governmental health agencies, and other health related organizations. Students completing the M.S. in Health Care Administration will achieve the following objectives: (1) Demonstrate knowledge of the U.S. health care system and fundamental issues affecting the administration of health care services, (2) Demonstrate organizational and managerial knowledge and skills essential to administrative positions in health care services, (3) Demonstrate specialized knowledge and skills in one of a variety of functional areas in health care administration, including financial management, marketing, job analysis, compensation management, or public policy analysis, (4) Use ethical principles within administrative positions of responsibility in health care services, and (5) Demonstrate the ability to conduct studies in the organization, financing, administration, and operation of health care delivery systems in operational settings. The program is designed for persons with a variety of undergraduate experiences who give evidence of interest and potential success in health care management or research.

#### Admission Requirements

Each applicant should request that a copy of all college course work and GMAT scores be sent to the graduate adviser, Health Care Administration Program, in addition to the copies required by the Office of Admissions and Records. In addition, a current resume should be sent to the Program along with three letters of recommendation.

#### Admission Criteria

1. Baccalaureate degree from an accredited institution;
2. Baccalaureate degree with a minimum of 18 units of course work to include: accounting, financial management, economics, information systems, statistics, and health care systems;
3. An applicant must have an overall undergraduate grade point average of 3.0 or better. Those applicants with less than 3.0, but with acceptable evidence of professional potential shown through recent academic performance and experiential background, may be admitted by special action of the Program Graduate Committee.
4. Interview with member of faculty or preceptor may be required.
5. A current and complete resume including references.
6. Submission of scores on recent Graduate Management Admission Test (GMAT).

#### Prerequisites

The following courses or their equivalent:

1. ACCT 201
2. ECON 101 or 300
3. Statistics
4. I/S 240

Students should contact the Program director for a determination of deficiencies and required remediation.

#### Requirements

1. Completion of graduate level course work in Health Care Administration. HCA 451, 502, 505, 506, 508, 510, 515, 524, 530, 535, 550, and 695.
2. Completion of any one of the courses in site specialization: 536, 537, 538, or 552.
3. Completion of an approved elective course.
4. Completion of an approved project and internship (HCA 685 and 698), for a minimum of 44 units.

#### Advancement to Candidacy

Students will be instructed to apply for advancement to candidacy after:

1. Completion of 6 units of course work that applies to the degree with an average grade of "B" or better,
2. Passing the Writing Proficiency Examination and submit evidence of same to Department Office, and
3. Approval of Program Director.

### Certificate in Health Care Administration (code 1-1205)

The Certificate Program in Health Care Administration is comparable to a minor of 18 semester units and, with prerequisite course work, may require up to 24 semester units for completion. Components of the program include the forms of organization and operation of health care systems, human resources management, leadership and development, financial management, and marketing. The Certificate may be combined with major programs from a variety of fields including, but not limited to, behavioral and natural sciences, humanities, health professions, business and public administration, and social work and is conferred as a post-baccalaureate certificate (or concurrently with the BS/BA). The courses included in the MS curriculum (with a grade of "B" or better) may apply toward the MS at the discretion of the Program Director.

Health care administrators are usually prepared at the masters' degree level for job entry into upper management. There is however, increased emphasis to prepare health care professionals to function as managers at other levels as well. Increasingly, physicians are also seeking preparation in the elements of management. These diverse groups use management skills in the health services and related fields. These include hospitals, nursing homes, health departments, health maintenance organizations, health planning and regulatory agencies, health management and review companies, group medical practices, health insurance firms, pharmacy and medical companies.

#### Requirements

1. A bachelor's (conferred or expected) or advanced degree;
2. Consultation with the Director of the program;

3. A minimum of eighteen units are required and may include: HCA 312, 341\*, 353+, 402, 410 or the equivalent graduate course if applicable (i.e., HCA 502, 505, 510, 515, 530).

\* Prerequisite: ACCT 201

+ Prerequisites: ECON 101

Course substitutions may be made with the consent of the Director.

## Master of Science in Nursing/Master of Science in Health Care Administration (code 6-1075)

The Department of Nursing and Health Care Administration Programs offer a concurrent Master of Science in Nursing and Master of Science in Health Care Administration dual degree available to qualified students who desire advanced preparation in the areas of nursing and health care administration with a practice focus as Advanced Practice Nurses in administration. The concurrent program leading to both degrees represents the core accreditation requirements of each degree. Coursework is integrated between the two degree programs each semester in order to provide an intense learning experience.

The philosophy of graduate nurse education is that the practice of nursing is constantly changing as health needs and health delivery systems are altered. Integral to nursing is an ability to work effectively and cooperatively with other disciplines. The joint Master of Science in Health Care Administration and the Master of Science in Nursing provides the opportunity for students to specialize as advanced practice nurses with emphasis in administration and increasing competence in designing, implementing, and evaluating programs in preparation for serving in various health agencies. An important career path for advanced practice nurses is as nurse executive in the variegated segments of the health care industry including entrepreneurial activities. Courses are interdependent and have been structured to provide clinical depth in the areas of nursing and administration.

Each applicant should request that a copy of official transcript of all college course work be sent to the Nursing Department Graduate Advisor and to the Office of Admissions and Records.

### Admission Requirements

1. Bachelors degree in nursing or currently enrolled in accelerated RN to Masters program. Those nurses with Baccalaureate degrees in health related fields may be conditionally admitted.
2. Current license to practice as a registered nurse in California.
3. Admission to graduate standing at the University
4. An upper division or graduate course in biostatistics (H/SC 403 or ED P 419).
5. Public Health Nurse Certificate, or eligibility for certificate in California.
6. An overall GPA of 3.0 or better; an upper division nursing GPA of 3.0 or better and a science GPA of 3.0 or better. Students who fall below these averages will be evaluated on an individual basis.

7. Submission of quantitative and verbal scores from the Graduate Record Examination (GRE) or the Graduate Management Admissions Test (GMAT).
8. Three letters of recommendation from persons with whom the applicant has worked and who has direct knowledge of the applicant's qualifications.
9. A separate personal statement of applicant's reasons for pursuing this field of study and comments about interests and experiences which are germane to career objectives.
10. Current professional resume describing the applicant's relevant experience.

### Advancement to Candidacy

A joint committee, consisting of Nursing and Health Care Administration faculty involved in the program, will review files and make a determination to advance the candidate to graduate status. Student criteria for advancement are as follows:

1. Satisfy the general University requirements for advancement to candidacy in Nursing and Health Care Administration
  - a. Pass the Writing Proficiency Examination
  - b. Have at least a 3.0 grade point average for all course work attempted as a graduate student
2. Joint approval by the Department of Nursing and Health Care Administration and the Associate Dean in the College of Health and Human Services.

### Requirements for Completion

1. A minimum of 57 units of approved Nursing and Health Care Administration upper division and graduate level courses including:  
The Program of Study: NRS 559, 560, 596, 680A, 680B, 680C, 680AL, 680BL, 680CL, 698, HCA 502, 505, 510, 515, 524, 530, 535, 550, 698
2. An overall GPA of 3.0 or better in all courses.
3. Directed project or a thesis.
4. \*Graduate degrees obtained previously may be accepted toward meeting a portion of the unit requirements of the concurrent MSN/MSHCA degree program.
5. If a student after entering the concurrent MSN/MSHCA program returns to a single degree program, all requirements for the single degree program must be met.

\* 60% of units must be earned in residence

## Courses (HCA)

### Lower Division

#### 202. Introduction to Health Care Organizations (3)

Prerequisites: Completion of the 13-unit General Education Foundation requirement (may be taken concurrently). This course examines the structure of the current health care system including the services, financing, political and social forces which influence its organization. Contemporary health issues such as cost, quality, and access are introduced and discussed within the context of current health care organizations. Medical terminology and basic human disease mechanisms are presented and used in the discussions about the health system. Access and diagnostic/treatment differences of ethnic minorities including African American and Native American groups, the disabled and gender disparities including sexual orientation will be presented. Traditional grading only. (Lecture/Discussion)

## Upper Division

### 312. Health Personnel Management (3) S

The management of human resources in health care settings. Content includes principles and methods of personnel work such as employee recruitment, selection, retention, training, evaluation, wage and salary administration, and labor-management relations. (Lecture)

### 320. Operations Management in Health Administration (3) S

Prerequisite: MATH 114. The application of the concepts and methods of operations management to the health care organizational setting. Emphasis on planning and control in the management process.

### 340. Legal Aspects of Health Administration (3) S

Focus on the nature, perspective and objects of the legal and legislative process. Provides skill in understanding legal terminology, legal reasoning and the tools of the law, with practical application of these principles and concepts to health care management and health policy decisions.

### 341. Financial Management of Health Care Institutions (3)

F,S,SS

Prerequisite: ACCT 201. Application of the concepts of financial management within health care organizations, to include financial planning principles, reimbursement procedures, governmental regulation, and legal restraints. (Lecture)

### 353. Marketing for Health Services Organizations (3) F,S

Prerequisite: ECON 101. Development of marketing strategies and analyses in a health care setting. Design of services to include pricing, communication, distribution channels, and client motivation and services.

### 402. The Health Care System (3) F,S,SS

The course focuses on the contemporary health care system to include its historical beginnings and the underlying social and biological forces which influence its organizational forms, financing and manpower requirements; issues and concerns molding its future such as the assurance of the quality of patient care and the regulation and control of the system. (Lecture)

### \*410. Health Management and Organization (3) F,S

Concepts of organizing activities to achieve the goals of health care institutions. Effects of environment, technology, and human behavior on organizational design. Managerial processes including planning, decision-making, influencing, and controlling required to operate and change health care organizations. (Lecture)

### 416. Management and Information Systems (3)F,S

Prerequisite: Demonstrated Computer Literacy. Evaluation of concepts, analysis and design of management information systems; management decision models, strategies for implementing system changes.

### 422I. Global Issues in Health Services Administration (3)

F,SS

Prerequisites: Completion of the G.E. Foundation, one or more Explorations courses, and upper-division standing. Contemporary problems in health services developed as an interrelated system. Rural health problems, issues of the elderly, rising costs and new technology presented with reference to industrialized and non-industrialized countries (e.g., Europe, Asia, North America, Africa, and Latin America). Geographic, political, economic, historical and anthropological aspects of health problems and issues will be analyzed. Traditional grading only. (Discussion, 3 hours)

### 450./550. Quality Assurance of Health Care (3) S,SS

Designed for the health care professional or administrator who is involved in or concerned about assurance of quality in health care. Course includes historical beginnings, state-of-the-art, voluntary and governmental effort and proposed means to quality assurance. Traditional grading only.

### \*451. Economics of Health (3) S

Prerequisites: ECON 101 or 300. Analysis of health as an economic good. Health services as scarce resources. Use of tools of economic theory in study of special problems of health resources, markets, manpower shortages, non-profit enterprises, insur-

ance programs and Medicare. Procedures stress individual studies and reports. Not open to students with credit in ECON 345 or ECON 445. Same course as ECON 445.

### 452./552. Medical Group Practice Management (3) F

Prerequisites: HCA 341 or 515, and 450 or 550 completed or concurrent enrollment. Course Description: Overview of medical group management incorporating the basic functions of health care administration and applying them to the medical group practice setting with an emphasis on managed care delivery systems. Fundamental operational responsibilities of medical group administration today. Traditional grading only for Majors/Minors.

### 465. Analysis and Evaluation of Health Care Services (3) F,S,SS

Prerequisite: Introductory course in statistics or demonstrated competency. Techniques of analysis and evaluation applied to health services with respect to organizing, staffing, financing and utilization. Emphasis on the analytic process, program evaluation, and report of findings.

### 470I. Latinas/Latinos: Health Status and Health Care Access (3) F

Prerequisites: Completion of the G.E. Foundation, one or more Explorations courses, and upper-division standing. This course is a critical interdisciplinary examination of the health status and health care access of Latinas/Latinos in the United States. The primary objective of the course is to provide an overview of the policies, epidemiologic, and cultural factors that influence the etiologies of diseases within Latina/Latinos subpopulations. This cross disciplinary approach will also be used to analyze the health care access problems faced by Latina/Latino subpopulations that constrain efficient management of services and equitable delivery of health care. Traditional grading only. Same course as CHLS 470I.

### 480. Internship in Health Care Administration (3) F,S,SS

Prerequisites: Health Care Administration majors are required to complete all HCA core courses prior to enrolling in HCA 480. These include HCA 341, 353, 402, 410, 416, 465 and HSC 150. Traditional Grading only.

### 490. Special Topics in Health Care Administration (1-3) F,S

Topics of special interest in health care administration selected for intensive study. Topics will be announced in the *Schedule of Classes*. May be repeated with different topics to a maximum of six units.

### 499. Directed Studies (1-3) F,S

Prerequisite: Consent of instructor. Independent study of special topics under supervision of a faculty member. May be repeated to a maximum of four units. In exceptional cases, may be repeated to a maximum of six units when approved by the Director of Health Care Administration Program.

## Graduate Division

### 502. The Health Care System (3) F,S,SS

The course focuses on the contemporary health care system to include its historical beginnings and the underlying social and biological forces which influence its organizational forms, financing and manpower requirements; issues and concerns molding its future such as the assurance of the quality of patient care and the regulation and control of the system. (Lecture)

### 505. Organization and Systems of Health Care (3) F

The analysis of operational activities and managerial functions essential to the health care delivery system will be examined and discussed. Special emphasis will be placed on the manager's role in developing and maintaining an effective system for providing health care services. The organizational aspects and managerial approaches of delivering health care services within various institutional arrangements will be discussed.

### 506. Epidemiology for Managers (1) W

Analysis of patterns of health and disease and how these impact on health delivery in the U.S. and abroad. Planning health services based on distribution of acute and chronic disease in populations. (Seminar) Traditional grading only for majors.

**508. Ethics in Health Care Delivery (1) W**

A review of ethical issues in business, medicine and health care delivery with emphasis on the role of the manager. Theoretical religio-philosophical underpinnings and practical applications will be discussed. (Seminar) Traditional grading only for majors.

**510. Human Resources Management in Health Care (3) S**

Management of human resources in the health care system including human resource planning and staffing, training and development, performance appraisal, job design and analysis, and compensation.

**515. Advanced Financial Management in Health Care (3) F**

Prerequisites: ACCT 201 or 500. Examination of the principles and practices of managing financial resources in health institutions. Evaluation of trends in the financing of health care and the influence of third-party payers on the financial decisions of health care administrators. Traditional grading only for Majors.

**524. Advanced Legal Aspects of Health Administration (3) F**

Examination of the federal and state regulations of health care facilities and their personnel, patients, and programs. Identification of the legal rights, privileges, and duties of the health care facility to its employees and the patients. There will be special emphasis on malpractice, government control, infection control, liability, contracts, informed consent, medical records, planning, reporting and the health practitioner as an expert witness. Current case laws are reviewed as appropriate.

**530. Strategic Planning and Marketing in Health Care (3) SSS**

Course activities lead to a basic understanding of strategic planning and marketing concepts and methods applicable to the organization and delivery of health care services. It is expected that students will gain an appreciation of the strategy-oriented management planning process, achieve knowledge of basic approaches and methodologies employed in strategic planning and health care marketing, and become sensitive to those economic and political forces which give form and shape to the health care marketplace.

**535. Quantitative Methods for Health Administration (3) F**

Prerequisites: Statistics. Identify and apply appropriate quantitative and operations research techniques to problems in health care settings. Students will receive intensive exposure to decision theory and control systems, and have practical experience solving problems in resource allocation, procedural decisions, scheduling, forecasting, measurement, and cybernetic control.

**536. Hospital Management (3) F**

Prerequisites: HCA 505. The goal of this course is to develop familiarity with the internal operations of acute care hospitals and skills in solutions of hospital operational problems. Hospitals will be analyzed by broad function and by specific departments. Cases, simulations and visits may be used. (Seminar 3 hours.) Traditional grading only for Majors.

**537. Alternative Health Delivery Systems Management (3) S**

Prerequisites: HCA 402 or 502. The purpose of this course is to prepare people to enter the managed care field and to orient managers to the organization and administration of Health Maintenance Organizations, Preferred Provider Organizations and related enterprises. Both relationships to the health care marketplace and operational aspects of managed health systems will be covered. Guest lecturers from managed care organizations will participate in the course and students will be expected to develop an operational plan based on a real world situation. (Seminar 3 hours.) Traditional grading only for Majors.

**538. Long Term Care Management (3) SS**

Prerequisites: HCA 402 or 502. Long term care facilities, offering services to the aged and disabled, pose unique problems for managers within this industry. With the "graying" of America, emergence of debilitating illnesses such as AIDS, and focus on cost containment as a major health policy issue, managers in this sector of health must assume leadership roles in planning and adapting to this dynamic and expanding environment. This survey course will analyze the forces influencing the development of long term care in the U.S. and address specific organizational aspects that affect outcomes of services provided in long term care settings.

**550./450. Quality Assurance of Health Care (3) S,SS**

Designed for the health care professional or administrator who is involved in or concerned about assurance of quality in health care. Course includes historical beginnings, state-of-the-art, voluntary and governmental effort and proposed means to quality assurance. Traditional grading only.

**552./452. Medical Group Practice Management (3) F**

Prerequisites: HCA 341 or 515, and 450 or 550 completed or concurrent enrollment. Course Description: Overview of medical group management incorporating the basic functions of health care administration and applying them to the medical group practice setting with an emphasis on managed care delivery systems. Fundamental operational responsibilities of medical group administration today. Traditional grading only for Majors/Minors.

**599. Special Topics by Directed Study (1-3) F,S**

Directed study of a special topic to be taken under supervised independent study. May be repeated for a maximum of 9 units, but the topic must not be repeated.

**685. Internship (3) F,S**

Prerequisites: All 500-level courses and consent of instructor. The purpose of the course is to provide candidates for the master's degree an opportunity to observe and participate in the operations of a health care institution. The student will also study in-depth the organizational structure, philosophy, problems, and personnel relationships of the institution, under the guidance of an approved on-site preceptor and a faculty advisor. Credit/No Credit grading only.

**695. Integrative Seminar: Critical Analysis of the Health Care System (3) S**

Prerequisites/Corequisites: HCA 685, 698. The health care system will be critically analyzed within its organizational, financial, and personnel components to include the socioeconomic and political forces which bind the system. A systematic, ecological approach will be employed with emphasis on an advanced and critical analysis of the U.S. system. Special consideration will be given to the public policy determinations which have influenced the development of the system and relevant problems and issues. Traditional grading only.

**698. Project (3) F,S**

Prerequisites: All 500-level courses, and consent of instructor. The student will investigate what is considered a major problem to the health care institution identified in the student's residency, research it in accordance with an accepted methodology, consider the characteristics of the organization, and recommend potential courses of action for the organization to take. Course may be repeated for a maximum of 6 units. Traditional grading only.

**T**he field of Human Development studies lifespan development within societal and cultural contexts. Accordingly, Human Development is interdisciplinary, examining development primarily from the perspectives of its component disciplines: Anthropology, Biology, Psychology and Sociology.

The Human Development Program offers a B.A. in Human Development and supervises the Human/Child Development concentrations in the Liberal Studies Program. The B.A. program is structured to provide students with: a broad knowledge of lifespan human development, specific expertise in processes and contexts that affect development, methods to evaluate research and theory within human development, and practice in the real-world application of knowledge gained in the program. Within these guidelines, the B.A. is flexible—students can choose courses that best fit their needs and goals.

Students choose from a wide variety of courses for their Foundation Area requirements. Foundation Area courses cover the components of Human Development—the biological, the psychological and the sociocultural. Students interested in gerontology, for example, may choose to take courses like the Biology of Aging, Introduction to Gerontology and Culture and Aging as their Foundation Area courses, while students interested in child development generally choose different courses for those requirements. Careful selection of Foundation and Specialization Area courses can allow students to complete certificate programs (for example, the Gerontology or Child Development Certificates), while completing their major.

In addition to their academic training, Human Development students are taught to apply their knowledge through a course in Interpersonal Skills and a semester Practicum. For the Practicum, students typically volunteer in settings pertaining to their career goals. Because the career goals of our students vary, individual students usually are in different practicum sites, including: elementary schools, human resource management offices, senior centers, physical therapy units and various social service agencies.

The faculty of Human Development are active researchers, who regularly include interested students in their research programs. Students who are considering graduate school are given the opportunity to work as research assistants on a variety of projects and are invited to help present the findings of those projects at professional conferences. Research experience of this type enhances the likelihood that students will be accepted into the graduate program of their choice.

Human Development graduates pursue a variety of careers. At the B.A. level, many take positions in the social services and business. A substantial number of students enroll in Teaching Credential Programs, while others have gone to graduate school in: Applied Anthropology, Counseling, Criminal Justice, Developmental Psychology, Gerontology, Occupational Therapy, Physical Therapy, School Psychology, Social Work and other fields.

Human Development has an active student club, the Human Development Student Association (HDSA). The HDSA is open to all students enrolled in Human Development courses and has regularly scheduled meetings. Activities sponsored by the HDSA are diverse and include community service projects, sponsoring speakers and films and hosting student-faculty parties. HDSA activities are posted outside the Program Office.

More information on the Human Development Program can be obtained at the Program Office (PSY 205) and the program web site. Students who wish to major in Human Development should seek early advising from the Undergraduate Advisor.

## Bachelor of Arts in Human Development (code 2-8014) (120 units)

### Requirements

Lower Division: ANTH 120, PSY 100, SOC 100.

Core Courses (27 units):

1. HDEV 250, 307I, 320, 357I, 360, 364, 402 or 403, 470;
2. Twelve units from the following list, including at least one course from each foundation area.

*Biological:* ANTH 318, 319, BIOL 309I, W/ST 440;

*Psychological:* C/D 361, ED P 302, 305, FCS 311, 314, 411, GERN 400I, HDEV 300I, PSY 331, 332, 333, 336, 341, 351, 356, 370;

*Sociocultural:* ANTH 454, ASAM 340, B/ST 410, CHLS 350, FCS 312I, 412, 413, GERN 400I, HDEV 300I, SOC 320, 345, 464.

Students must earn a grade of at least "C" in all upper division major courses.

### Courses (HDEV)

#### Lower Division

#### 250. Elementary Statistics in the Social and Behavioral Sciences (4)

Prerequisites: Knowledge of mathematical procedure usually covered in elementary high school algebra, eligibility for GE math. Not open to students with credit in ANTH 202, MATH 180, PSY 110, SOC 250 or C/LA 250. Introduction to descriptive and inferential statistics and their applications in social and behavioral science research; performance of statistical exercises by interactive computer. Emphasis upon knowledge of which statistical tests to use and how to interpret their results. (Lec 3 hrs, lab 2 hrs.) Same course as C/LA 250.

#### Upper Division

General Education Category A must be completed prior to taking any upper division course except upper division language courses where students meet formal prerequisites and/or competency equivalent for advanced study.

#### 300I. Death and Dying (3)

Prerequisites: Completion of the foundation, upper-division standing, ANTH 120 or PSY 100 or SOC 100. This course will explore the social, cultural and individual aspects of the death experience. Death will be examined from historical, biological, legal, religious and ethical perspectives. In addition, death work, aspects and meaning of the dying experience, survivorship, ritual and grief will be studied. All topics will be examined in light of life-span, cultural and gender diversity. Not open to students with credit in HDEV 400I.

#### 307I. Human Development: Childhood Through Adolescence (3)

Prerequisites: Completion of the foundation, upper-division standing, ANTH 120 or PSY 100 or SOC 100. Biological, psychological, and sociocultural aspects in the growth of the individual from conception through early adolescence will be considered. Relevant topics and theoretical issues will be treated in an interdisciplinary manner. Not open to students with credit in NRS 307.

#### 320. Research Methods in Human Development (4)

Prerequisites: ANTH 120, or PSY 100 or SOC 100, HDEV 250, completion of GE life science requirement. Research methods in human development. Includes methods and models from anthropology, biology, psychology and sociology as applied to research. (Lec 3 hrs, lab 2 hrs.) Traditional grading only for Majors/Minors.

#### 340. Families and Work: Life Course Processes (3)

Prerequisites: Upper division status, PSY 100 or ANTH 100 or SOC 100 and entire Foundation. This course provides a framework for

understanding families, work, and their changing relationship. It examines the historical transformations over time in Western societies, but especially in the U.S., in the nature of work and how these changes have helped to reshape family forms, relationships and processes.

#### 357I. Human Development: Adulthood Through Aging (3)

Prerequisites: Completion of the foundation, upper division standing, ANTH 120 OR PSY 100 or SOC 100. Biological, psychological and sociocultural aspects in the development of the individual from late adolescence or youth until death will be considered. Relevant topics and theoretical issues will be treated in an interdisciplinary manner. Not open to students with credit in NRS 357 and PSY 365.

#### 360. Cultural Influences on Human Development (3)

Prerequisites: HDEV 250, 307I, 357I. Prerequisite or Corequisite: HDEV 320. This course examines the human life cycle from a global and cross-cultural comparative perspective. The course materials, primarily ethnographic and anthropological in nature, are concerned with how the phases of human development (and the transitions between them) are conceptualized and dealt with in a variety of sociocultural settings worldwide. Primary goals are to develop skills in discerning and accounting for both the differences and the similarities in how the world's peoples experience and interpret the human life cycle, and to achieve an understanding of how culture shapes those experiences and interpretations at both individual and group levels. Not open to students with credit in HDEV 401.

#### 364. Interpersonal Skills in Human Development (3)

Prerequisites: HDEV 307I and 357I. Designed to develop interpersonal skills identified as necessary to have effective human relations. It includes a presentation of theory and research applicable to processes in interpersonal functioning and human relations. Didactic and experiential learning approaches. Not open to students with credit in HDEV 434B or ED P 434B.

#### 402. Development of Thought: Structure, Process and Cultural Influences Across the Life Span (3)

Prerequisites: HDEV 320 plus 360 as prerequisite or corequisite. Readings and discussion focus on the examination of theories and current research on the development of thought focusing on biological underpinnings, psychological process and sociocultural constraints. Specific topics include memory, intelligence, cognition, problem solving, language and thought, literacy and educational implications. All issues will be examined from an interdisciplinary perspective across the life span.

#### 403. The Acquisition of Culture: Socialization in Cross-cultural Perspective (3)

Prerequisites: HDEV 360, or an equivalent upper-level cultural anthropology course (e.g. ANTH 414, 415, 419, 420, 421) and permission of instructor. This course examines socialization as both a universal and culturally specific phenomenon. Topics explored include cross-cultural variations in ways of teaching and learning; socialization of children and of adult novices; socialization as a key aspect of social and cultural reproduction; and socialization as a source of innovation and change.

#### 470. Seminar/Practicum (4)

Prerequisites: HDEV 250, 307I, 320, 357I, 364; and permission of instructor. The course provides for a sequence of observations and supervised participation with individuals in a variety of community agencies and/or educational settings. Practicum is supplemented by topical seminar discussions for two hours each week. (Seminar 2 hrs, practicum 6 hrs.)

#### 490. Special Topics in Human Development (3)

Prerequisites: HDEV 307I, consent of instructor. Topics of current interest in human development selected for intensive study. May be repeated with different topics for a maximum of six units. Topics for a given semester will be announced in the *Schedule of Classes*.

#### 499. Independent Study (1-3)

Prerequisite: Consent of instructor and Program Director. Student will conduct independent laboratory, field, or library research and write a report of the research. May be repeated for a maximum of six units.

The College of Health and Human Services offers a wide range of programs at the undergraduate and graduate levels. Included within the College are eleven diverse departments, four programs, and eleven centers:

## *Departments*

Communicative Disorders  
Criminal Justice  
Family and Consumer Sciences  
Health Science  
Kinesiology and Physical Education  
Nursing  
Occupational Studies  
Physical Therapy  
Graduate Center for Public Policy and Administration  
Recreation and Leisure Studies  
Social Work

## *Programs*

Gerontology  
Health Care Administration  
Military Science (Army ROTC)  
Radiation Therapy

## *Centers*

Bureau of Governmental Research and Services  
Center for Career Studies  
Center for Criminal Justice Research and Training  
Center for Disability Studies Scholarship  
Center for Health Care Innovation  
Center for Successful Aging  
Child Welfare Training Center  
Institute for CSULB/VA Joint Studies  
Movement Science Laboratories  
Physical Therapy Assessment Center  
Senior University

## *Goals*

The College of Health and Human Services, as a professional College, is united by the following purposes:

The academic and professional preparation of students for careers in their chosen field of specialization;

The development and maintenance of high standards of academic achievement for students;

The encouragement of critical thinking through rigorous academic and professional preparation; and

The conduct of ongoing research, training, and community involvement by faculty and students.

To achieve these goals, the College seeks to create an environment at both the undergraduate and graduate levels that encourages student growth by providing:

A broad educational experience in the liberal arts;

Specialized instruction leading to professional development and competence; and

Integration of academic and professional course work to develop the whole person.

## *Degrees Offered*

### Bachelor of Arts:

- Communicative Disorders
- Family and Consumer Sciences
- Kinesiology
- Recreation
- Social Work

### Bachelor of Science:

- Audiology
- Criminal Justice
- Dietetics and Food Administration
- Health Care Administration
- Health Science
- Kinesiology
- Nursing
- Occupational Studies

### Master of Arts:

- Communicative Disorders
- Family and Consumer Sciences
- Kinesiology
- Occupational Studies

### Master of Science:

- Criminal Justice
- Gerontology
- Health Care Administration
- Health Science
- Kinesiology
- Nursing
- Nutritional Science
- Recreation Administration

### Master of Physical Therapy

### Master of Public Administration

### Master of Public Health: Community Health Education

### Master of Social Work

## *Certificates Offered*

- Administration of Outdoor Recreation Resources
- Administration of Travel and Tourism
- Administration of Volunteer Services
- Child Development
- Community Physical Fitness
- Corrective Therapy
- Food-Service Systems Administration
- Gerontology
- Health Care Administration
- Leisure Counseling (Graduate Certificate)
- Nurse Practitioner
- Pre-Athletic Training
- Public Management Analyst (Graduate Certificate)
- Public Sector Employer-Employee Relations and Personnel Management (Graduate Certificate)
- Public Sector Financial Management (Graduate Certificate)
- School Nursing Credential
- Therapeutic Recreation
- Transportation Policy and Planning (Graduate Certificate)
- Urban Executive Management (Graduate Certificate)
- Wilderness Studies

## *College Facilities*

The College of Health and Human Services is characterized by perhaps the greatest diversity of programs in the University. The eleven departments, four programs, and eleven research centers are housed within twelve buildings on campus. During the period 1992-94, the primary facilities received \$21,000,000 worth of renovation, including the addition of new equipment in laboratories. As a result, students now have access to state-of-the-art classrooms, laboratories, and clinics with equipment matching that of business/industry. As a student, for example, you could visit our Communicative Disorders Speech and Hearing Clinic, Nursing Simulation Lab, or Physical Therapy Labs and Clinic. You could participate in a discussion on the importance of recreation in your life and the lives of others in a Recreation and Leisure Studies course; or a discussion of diet and nutritional needs in Family and Consumer Sciences; or a seminar on AIDS awareness in the Health Science Department; or a seminar on improvement of the quality of life for all people in the Social Work Department. You may choose to swim in our Olympic size pool or be tested in the underwater weight tank, while enrolled in a Physical Education class. The Department of Criminal Justice may walk you through the forensic investigation of a crime. Public Policy and Administration courses will offer you the opportunity to apply new knowledge, skills, and leadership techniques to the solution of public problems; while Occupational Studies could provide you with the competencies requisite for successful employment in secondary schools, community colleges, and adult programs.

As the second largest of the University's seven colleges, Health and Human Services is comprised of over two-thirds laboratory facilities which accommodate its many lab-intensive programs. These programs combine theory with exciting practical application in the campus laboratories, as well as many off-campus facilities through field work and internships.

## *Professional Accreditation*

Programs in the College have been accredited by the following state and national accrediting agencies:

American Association of Colleges of Nursing, American Dietetic Association, American Public Works Association (APWA), American Speech Language and Hearing Association, Association of University Programs in Health Administration, Council on Education for Public Health, American Home Economics Association, American Physical Therapy Association, California State Board of Registered Nursing, National Association of Schools of Public Affairs and Administration (NASPAA), National League for Nursing, California Council on Parks and Recreation, National Recreation and Park Association Council on Accreditation, Western Institute of Nursing.

The College maintains an active involvement in the following organizations:

### Special Interest Clubs

Archers, Army ROTC Association, Army ROTC Rangers (AROTC), California Nursing Student Association, Child and Family Associated Students (CAFAS, Family & Consumer Sciences), Criminal Justice Student Association, Health Care Administration Forum, Health Science Graduate Student Association, Health Science Student Association, Kinesiology & Physical Education Majors Club, National Student Speech & Hearing Association (Communicative Disorders), Pershing

Rifles (AROTC), Peer Health Educators, Physical Therapy Student Association, Public Policy & Administration Student Association (PASA, Public Policy & Administration), Recreation and Leisure Studies Alumni Association (RALSAA), Recreation Society (Recreation & Leisure Studies), Social Dance Club, Sports Medicine Club (Kinesiology & Physical Education), Student Affiliates of the American Kinesiotherapy Association (Kinesiology & Physical Education), Student Association for Family & Consumer Sciences, Student Dietetic Association (Family & Consumer Sciences), Student Food Science Society (Family & Consumer Sciences), Students in Fashion (Family & Consumer Sciences).

#### Professional and Honorary Organizations

Alpha Phi Sigma (Criminal Justice), American College of Healthcare Executives, California Association for Health, Epsilon Pi Tau (Occupational Studies), Eta Sigma Gamma (Health Science), International Food Service Executives Association (Family & Consumer Sciences), Kappa Omicron Nu (Family & Consumer Sciences), National League for Nursing, Omicron Tau Theta (Occupational Studies), Pi Alpha Alpha (Public Administration), Phi Epsilon Kappa (Kinesiology & Physical Education), Recreation and Dance (CAHPERD), Sigma Theta Tau (Iota Eta Chapter), Nursing Honorary Society (Nursing), Society of Consumer Affairs Professionals (Family & Consumer Sciences), Student Chapter of the American Association of Textile Chemists and Colorists (Family & Consumer Sciences).

#### College and Departmental Organizations

Army ROTC Association, California Nursing Students' Association, Child and Family Associated Students (CAFAS, Family & Consumer Sciences), College of Health & Human Services Student Council, Criminal Justice Student Association, Food Science Society (Family & Consumer Sciences), Health Care Administration Forum, Health Science Student Association, Health Science Graduate Student Association, International Food Service Executives Association (Family & Consumer Sciences), Kappa Omicron Nu (Family & Consumer Sciences), Kinesiology & Physical Education Majors Club, National Student Speech & Hearing Association (Communicative Disorders), Physical Therapy Student Association, Public Administration Student Association (PASA, Public Policy & Administration), Recreation and Leisure Studies Alumni Association (RALSAA), Recreation Society (Recreation & Leisure Studies), Sports Medicine Club (Kinesiology & Physical Education), Student Association for Family & Consumer Sciences, Student Chapter of the American Association of Textile Chemists and Colorists (Family & Consumer Sciences), Student Dietetic Association (Family & Consumer Sciences), Students in Fashion (Family & Consumer Sciences).

## Courses (HHS)

### Lower Division

#### 100. Skills for Living (3)

This course is designed to provide students with the skills necessary to survive as new members of CSULB communities as well as enhancing quality of life. Specific topics include, but are not limited to, personal security, the criminal and civil justice systems, aging, consumer affairs, financial management, personal and family relations, nutrition, health maintenance and care, disease prevention, fitness, and the roles of work and leisure in one's life. (Lecture-discussion, 3 hours.) Team taught by College of Health and Human Services Faculty.

### Upper Division

#### 374. Psychosocial Aspects of Disability (3)

Prerequisites: PSY 100 and consent of instructor. Survey of the psychosocial, emotional, and cultural reactions to disease and disability. Traditional grading only. (Lecture/discussion 3 hours.)

#### 401. Applied Anatomy I (3)

Prerequisites: BIOL 208, or equivalent, and consent of instructor. Advanced study of the structure and function of the neuromusculoskeletal systems with emphasis on the surface contour, myology and joint structure, and neurovascular supply. Includes dissection laboratory and provided materials. Traditional grading only. (Lecture/discussion 2 hours, laboratory 3 hours.)

#### 402. Applied Anatomy II (3)

Prerequisites: BIOL 208, or equivalent, HHS 401, consent of instructor. A continuation of HHS 401, with an emphasis on the normal anatomy of the lower extremities, pelvis, and abdominal region. Traditional grading only. (Lecture/discussion 2 hour, laboratory 3 hours.)

#### 460. Neuroanatomy (4)

Prerequisites: HHS 401, BIOL 341, BIOL 441 (concurrent) and consent of instructor. Investigation of human neuroanatomy with emphasis on the structure and function of the central nervous system (CNS), cranial nerves, and their connecting neural pathways, relative human function and movement. Neuroanatomical and vascular lesions will be discussed and correlated to common clinical conditions. Laboratory experiences will integrate brain and spinal cord specimens and models, and imaging techniques to lecture material. Traditional grading only. (Lecture/discussion 3 hours, laboratory 3 hours.)

#### 471. Pathology (3)

Prerequisites: BIOL 208 and consent of instructor. Advanced study of abnormal function as a result of disease. Including general pathology and selected pathologies encompassing cardiovascular, pulmonary, musculoskeletal, peripheral and central nervous system, and integumentary. (Lecture/discussion 3 hours.)

#### 492. Field Studies and Career Exploration (1-3)

Prerequisites: Consent of the instructor and a minimum GPA of 2.0. This course provides students with career-related experience by allowing them to participate in fieldwork assignments relating to their majors and intended professions. Students who qualify will participate in volunteer or paid assignments in private industries, non-profit organizations, or public agencies. In addition to this practical experience, students will attend a series of seminars designed to complement their field assignments by focusing on issues common to the work setting.

#### 497. Independent Studies (1-3)

Prerequisites: Consent of instructor, and for human dissection, one general introductory anatomy course HHS 401, and HHS 402. Independent projects in any area of physical therapy. Human dissection is available as a special study. May be repeated to a maximum of six units. Traditional grading only.

Advising in the Department of History is available to all students interested in a major, minor, a teaching credential, or a special major combining History with another discipline. Students are strongly encouraged to see History Department advisors at an early stage in the development of their programs. Undergraduate majors should see the Department Secretary to fill out a work sheet before meeting with the Undergraduate Advisor. Students interested in the M.A. program should contact the Department Secretary for application information. Graduate students should see the Graduate Advisor (Nancy Quam-Wickham). Applicants for the Social Science Credential Single Subject Program must see Credential Advisors (Donald Schwartz or Arlene Lazarowitz). All advisors maintain extended hours during the semester and are available at other times by appointment. The Department of History also hosts open advising days in the week prior to each new semester; call the Department for information.

### *History*

History is a discipline at the core of the liberal arts tradition. It seeks to preserve, extend, and reevaluate our study of the past, and to connect it with the present. Students who specialize in History are typically those who plan to teach, practice law, or enter government service; but History students also go into business, librarianship, foundation work, management of local history projects, and fundraising. Some history alumni have become successful writers.

Students contemplating graduate work in History on this campus or elsewhere should get advice early in their undergraduate careers from faculty in their fields of interest, and should also give serious consideration to developing proficiency in a foreign language during their undergraduate tenure.

The History Department awards scholarships and prizes to outstanding undergraduate and graduate students, among which are:

- The Douglas McNeally Award
- The Stuart Bernath Award
- The Ebell-Heimberger Scholarship
- The Jack Chinski Award
- The Elizabeth Neilsen Award
- The Hardeman Graduate Student Award

For further information about these awards, given annually, students should inquire at the Department office no later than the beginning of the spring semester. Undergraduate and graduate students are eligible for the Department's facilitator program for which they may earn units in the major; see Department staff for applications. Graduate assistantships and readerships are also frequently available to qualified graduate and undergraduate students. The Department also recruits outstanding students for Phi Alpha Theta, the national honor society for History students.

The Department of History offers graduate study leading to the Master of Arts degree. The candidate is responsible for observation of the general requirements stated in this catalog as well as specific departmental requirements listed in the M.A. brochure, available on request from the Department office.

## ***General Education Requirement in United States History***

To fulfill State of California requirements, students must take three (3) units of U.S. history. This requirement can be met by HIST 162A and 162B, or 172 or 173. Students who have taken U.S. history at another institution should check with the History Department before enrolling.

## **Bachelor of Arts in History (code 2-8525) (120 units)**

### **Requirements**

Majors must take 48 units of history: 12 lower division and 36 upper division.

Lower division: 12 units. Note: History majors may not take classes which have overlapping content; that is, majors may not take both 162A and 172, or both 162B and 173.

Upper division: 36 units.

1. Core: 12 units. All majors must take HIST 301, 302, 499, and one history course that fulfills the gender, race, and ethnicity requirement (from a list of approved courses available from the Undergraduate Advisor). HIST 301 must be taken in the first semester of course work in the major.

2. Fields of emphasis: 18 units. All majors have the option of specializing in two or three fields. Option one: two fields of nine units each. Option two: three fields of six units each. The fields are:

- A. Africa and the Middle East
- B. Ancient and Medieval Europe
- C. Asia
- D. British
- E. Latin America
- F. Modern Europe
- G. United States

3. Breadth: 6 units. Majors must take six units in a field (or fields) of history outside of their fields of emphasis.

4. All majors must develop a portfolio (beginning with HIST 301) reflecting their work in the History major. The portfolio will be evaluated as one of the requirements in the senior seminar, HIST 499, prerequisites for HIST 499, completion of HIST 301 and 18 units of work in the major.

NOTE: History majors are strongly encouraged to include the study of foreign language and literature in their programs. Students working for a single-subject credential in secondary education must consult with the College's secondary education advisor as to the applicable credential major requirements.

## **Bachelor of Arts in History with Honors (code 1-0003)**

Students with a major in history may be admitted to the History Department honors program (option of the University Honor's Program) provided they have:

1. Completed at least 30 semester units of college- or university-level courses, including at least two history courses;
2. A minimum cumulative GPA of 3.3, and a 3.5 in history courses;

3. Submitted to the department honors committee chairperson two letters of recommendation from faculty members;
4. Received admission approval from the departmental honors committee.

Students who have the minimum GPA requirements established by the University Honors Program (3.0 overall and 3.3 in the major, but who do not meet History departmental GPA requirements above may petition the department honors committee for conditional admission to the Department Honors Program).

In order to graduate with Honors in history a student must:

1. Complete all regular requirements for the history major;
2. Complete 3 units in HIST 497H: Honors Colloquium, or HIST 501;
3. Complete 3 units in HIST 498H: Honors Research;
4. Complete 3 units of HIST 499H: Honors Thesis;
5. Complete 6 units of additional course work chosen in consultation with the Department Honors Advisor; such courses normally will require two analytical papers or a research paper on a honors level of performance;
6. Complete UHP 499 Synthesis, as partial fulfillment of the University's requirement of 6 upper-division units;
7. Have at the time of graduation a cumulative GPA of at least 3.3 and a GPA of at least 3.5 in history.

Students admitted to the program must maintain a file in the University Honors Program which will include copies of proposals for 498H and 499H.

## **Oral History Program**

This Program, housed in the Department of History, is designed to teach and train history students in the use of materials that focus on largely unwritten sources. History majors, and social science credential students with a history concentration, are urged to take the one-unit workshop. Students in these workshops learn how to design an oral history project, and to conduct interviews. Workshops are especially helpful for students interested in local history, the history of the family, and communities whose written records have not been included in traditional historical materials.

## **Minor in History (code 0-8525)**

A minimum of 21 units which must include:

Lower Division: A minimum of six units, which must include a six-unit sequence from the following: HIST 211 and 212, 131 and 132, 151 and 152.

Upper Division: A minimum of 12 units, which must include at least six units in each of two areas as defined for the major.

## **Minor in Jewish Studies (code 0-6809)**

The Minor in Jewish Studies consists of a minimum of 19 units. Jewish Studies encourages undergraduate students to acquire the academic breadth and depth to comprehend the major issues, themes, and concepts of a culture and heritage that has had a distinct impact on world civilization. The interdisciplinary minor consists of courses in a variety of disciplines, including literature, history, religion, geography, Hebrew language, and politics. Students will expand their understanding of the broader dynamics of the Jewish experience through different eras and geographic settings, both in Israel and the Diaspora.

## Requirements

1. Required core courses: HEBR 101A, HIST 369, R/ST 314;
2. Three units from the following elective courses: C/LT 342, HIST 431, R/ST 311;
3. Six units from the following elective courses: GEOG 309I; HIST 304, 432, 389; POSC 367; R/ST 315I

## Minor in Latin American Studies (code 0-8527)

The Minor offers students majoring in any subject an opportunity to supplement their education with a focus on the interdisciplinary study of Latin America. The minor's flexible program of study is ideal for students interested either in intellectual enrichment or professional development in their major. Courses used to meet this minor requirement may be counted also, where applicable, toward the General Education requirements, and the major or minor requirements of the cooperating departments.

## Requirements

1. The following are the requirements for the Latin American Studies minor:
  - A. The successful completion of two college intermediate level courses in Spanish, Portuguese or any other language appropriate to the student's area of concentration of the equivalent fluency as determined by the program advisor.
  - B. Consultation with the program advisor, including formal declaration of the minor, and application for graduation.
2. Completion of 21 units distributed as follows:
  - A. Core (Required of all students) 6 units. Choose from two disciplines: ANTH 323, 324; GEOG 320I; HIST 362, 364; POSC 358, 359; SPAN 445.
  - B. Electives: 15 additional units from the following disciplines. Students cannot duplicate courses taken in the Core: ANTH 323, 324, 345, 490\*, 495\*, CHLS 352, 380, 395, 400, 420, 490\*, 499\*; C/LT 440, 499\*, ECON 490\*, 499\*; FEA 392C; GEOG 320I; HIST 162A, 162B, 362, 364, 366, 461, 462, 463, 466A, 466B, 466C, 490\*, 495\*, 498\*; POSC 358, 359, 497\*, 499\*; SOC 341, 490\*, 499\*; SPAN 341, 441, 445, 490\* 492, 495\* 550

\* The Latin American Studies advisor must approve Special Topics and Directed Studies courses in the area of Latin American Studies.

## Minor in Medieval and Renaissance Studies (code 0-8528)

The Minor offers students majoring in any subject an opportunity to supplement their education with a focus on the interdisciplinary study of the Middle Ages and Renaissance. The minor's flexible program of study is ideal for students interested either in intellectual enrichment or professional development in their major. Interested students should contact the program's advisor prior to or during the first semester of taking classes towards the Minor.

The Minor consists of a minimum of 21 units selected in consultation with the program advisor in addition to demonstrating competence in a foreign language appropriate to the area of concentration. The 21 required units include 12 units of core classes in History, Literature and Art History, along with 9 electives chosen from the courses in these disciplines as well as from Music, Political Science, Religious Studies and Theatre.

## Requirements

### Core:

1. Six units of one of the following combinations: HIST 316 and 317; or HIST 317 and 332; or HIST 332 and 333.
2. Three units of an upper division course in Literature: C/LT 349, 414I, 422I, 430, 431, 432, 449; ENGL 363, 426, 431, 451, 452, 453, 461, 462, 463, 468A, 483, 498J; FREN 470, 471; GERM 315; GK 490, 499; LAT 490, 499; SPAN 330.
3. Three units of an upper-division course in Art History: AH 408, 409, 410, 423, 424, 425, or 497.

Nine additional units chosen from the courses listed above (without repeating the required core) and the following: MUS 360, 496; POSC 301; RGR 450; R/ST 314, 331I, 471I, 490, 495; THEA 490.

## Minor in Middle Eastern Studies (code 0-8529)

The Middle Eastern Studies minor encourages undergraduate students to acquire a broad and interconnected understanding of the dynamics of Middle Eastern societies, cultures, and histories by taking courses in a variety of disciplines including History, Arabic language, Political Science, Geography, Art History, International Business, and Religious Studies. Students will expand their understanding of the major issues, themes, and concepts associated with the complex and diverse region known as the Middle East.

## Requirements

A minimum of 18 units.

### Core

Minimum twelve (12) units: At least three (3) units must be in History and a least three (3) units of Arabic (when that language becomes available). HIST 431/531, HIST 432/532, R/ST 331I, and POSC 367.

### Elective Requirements

Students must take a minimum of six (6) additional units, selected with an advisor, from the following disciplines, without repeating courses from the core: AH 465/565, C/LT 235, FREN 490, GEOG 309I, HIST 394, HIST 431/531, HIST 432/532, HIST 490, POSC 367, and R/ST 331I.

Three (3) of these units may be taken from the following courses, which have a global and comparative perspective, without repeating courses from core: CBA 300, W/ST 401I, FCS 410, R/ST 102, and HIST 495.

## Master of Arts in History (code 5-8525)

### Prerequisites

1. A bachelor's degree with an overall 3.0 GPA in history, or with an overall 3.0 GPA, or
2. A bachelor's degree with 24 units of upper-division courses in history. These courses must be comparable to those required of a major in history at this University. Deficiencies will be determined by the graduate advisor after consultation with the student and after study of transcript records.

Advancement to Candidacy is a statement of how the student plans to complete all courses and requirements for the degree, including setting a date and a committee for the thesis or comprehensive examination. It is best done as early as possible and it must take place before the end of the semester preceding the examination. Students writing a thesis are advanced to candidacy at the time that they begin their thesis work.

## Requirements

1. A minimum of 30 units of upper division and graduate courses including at least 18 units from 500 and 600-level courses. Six units may come from other departments if they suit the student's program and are approved by the graduate advisor. All students must take HIST 501 and HIST 590. Twelve of the remaining units must come from among the following area offerings: 510A, 510B, 510C, 510D, 510E, 611, 631, 673, 682.
2. The student may select one or two fields of specialization distributed as follows:

Alternative I. Single-field option. Fifteen units, including at least one class in the 510 series, in one of the following fields: Africa and the Middle East, Ancient/Medieval Europe; Asia; Britain; Latin America; Modern Europe (including Russia); United States. Those who take the single-field option must also take at least one 500-level course in a second field.

Alternative II. Two-Field Option. A minimum of 9 units in each of two of the above geographical areas, including at least three units of 510 in each.

The courses for Directed Study (695), Directed Research (697), and Thesis (698) may be applied to the 18 unit total only with the permission of the graduate advisor. A student may propose a field other than those cited above with the consent of the Graduate advisor and her/his graduate committee.
3. A reading knowledge of German, French, or other foreign language may be required, depending upon the candidate's program of study as recommended by her/his graduate committee.
4. A comprehensive written examination on two periods or a thesis.

## Courses (HIST)

### Lower Division

#### 101. Facts, Evidence and Explanation (3)

Corequisite: ENGL 100. The course will address the following issues within historical or global contexts: distinguishing fact from judgement; understanding argument and inductive and deductive reasoning skills; investigating the relationship of language to logic and the problem of selecting evidence, including understanding points of view, bias and theoretical perspective; and differentiating belief from knowledge, by asking the question, "How do we know what we know?" We will investigate facts, evidence and explanation by analyzing the content, dissemination and absorption of information from a variety of printed and visual sources. (Not open to students with credit in HIST 201.)

#### 131. Early Western Civilization (3)

Corequisite: ENGL 100. The history of western civilization from its origins through the 16th century. Stresses society, culture and political institutions of ancient Near East, classical world, the medieval West and renaissance and reformation Europe. (CAN HIST 2)

#### 132. Modern Western Civilization (3)

Corequisite: ENGL 100. European society from the 16th century to the present. Stresses events and phenomena which reshaped the political, economic and social structures of the West and their impact throughout the world. Emphasis on the intellectual, social and psychological transformation of modern life. (CAN HIST 4)

#### 151. England: Earliest Times to 1688 (3)

Corequisite: ENGL 100. This course deals with the changing peoples, cultures, territories, economies, rulers, religions, and politics of the British Isles over more than two thousand years. In addition

to covering the narrative of British history from its beginnings to 1700, this class requires students to read original historical sources, evaluate historical evidence, and write short analytical reports.

#### 152. Britain in Modern Times (3)

Corequisite: ENGL 100. British history from the late seventeenth century to the present, including state formation, political development, industrial revolution, elite and popular culture, social and gender relations, imperial expansion, modern wars, and post-imperial adjustment. In addition to tracing the changing relationship of England, Ireland, Scotland and Wales, this class requires students to read original historical sources, evaluate historical evidence, and write short analytical reports.

#### 162A,B. Comparative History of the United States and Latin America (3,3)

The history of the Western hemisphere from European contact to the present, with emphasis on institutions and traditions. (These two courses together meet the State of California requirement in U.S. History.)

#### 172. Early United States History (3)

Survey of the political, social, economic and cultural development of the United States from discovery through reconstruction. Attention to the colonial era, establishment of the new nation, sectional problems, national growth, disunion and reconstruction. Material may be covered chronologically or topically. Fulfills the general education requirement for U.S. history. Not open to students with credit in HIST 162A. (CAN HIST 8)

#### 173. Recent United States History (3)

Survey of the political, social, economic, intellectual, and cultural development of the United States from Reconstruction to the present. Focuses on different social groups and examines the experiences of both the powerful and those who want power in American society. The course may be chronological or topical, and covers such themes as: immigration and movements of people; work and the economy; the emergence of women's and minority issues; politics, protest and war; and society and culture. (CAN HIST 10)

#### 211. World History: Origins to 1500 (3)

Prerequisite: Completion of GE Foundation requirements. A survey of the development of world civilization and major cultures from the Neolithic Revolution until the eve of the European conquest of the Americas. The civilizations of the Ancient, Classical and Postclassical periods will be studied, emphasizing interaction between civilizations and major cultures. Topics will include: the origins and role of universal religions; the examination of political, social and gender structures in relation to economic and demographic development; and the diffusion of culture and technology via migration, commerce and the expansion of empire. (Not open to students with credit in HIST 111.)

#### 212. World Since 1500 (3)

Prerequisite: Completion of GE Foundation requirements. A survey of the origin and development of the modern world, tracing both regional histories and global interactions. Major themes include: economic aspects of globalization; intellectual and cultural adjustments to modernity; modern imperialism, resistance to empire and the birth of nations; and the historical origins of the contemporary world. (Not open to students with credit in HIST 112.)

#### 250. The World: Origins to 1500 (4)

Prerequisites: Open only to Integrated Teacher Education Program (ITEP) students. This course uses the perspectives of history and geography to introduce students to the civilizations of Eurasia, Africa, and the Americas as they developed prior to European contact. To understand their origins and subsequent growth and development, special attention will be given to geographic and historical factors such as location and place, human/environment interactions, migrations, cultural and technological diffusion as well as the intensity of cross-cultural contact and exchange between cultures and civilizations over time. Same as GEOG 250.

#### 290. Special Topics in History (1-3)

Prerequisites: Completion of GE Foundation requirements. Topics of current interest in history. May be repeated with different topics to a maximum of six units. Applicability to major requirements will be specified in description of individual topics, as announced in the *Schedule of Classes*.

#### A. World War II

## Upper Division Areas

NOTE: General Education Category A must be completed prior to taking any upper division course except upper division language courses where students meet formal prerequisites and/or competency equivalent for advanced study.

Course titles listed with an asterisk (\*) are available for graduate as well as undergraduate credit.

---

### GENERAL

---

Course titles listed with an asterisk (\*) are available for graduate as well as undergraduate credit.

#### \*301. Methodology of History (3)

Prerequisites: Required of all History majors in their first semester of work in the major. Introduction to historiography and methodological issues; skills and competencies exercises; research methods; research presentations and peer review. Creation of student portfolio that will be used in remaining upper-division courses in the major, and will be assessed in HIST 499 (Senior Seminar). Traditional grading only. Course may be repeated to a maximum of 6 units.

#### \*302. Theory and History (3)

Examination of the ways in which theory shapes historical writing and research. Will focus upon case studies, significant historical works, major schools of historical interpretation and recent scholarly trends. Traditional grading only.

#### 309I. Men and Masculinity (3)

Prerequisites: Completion of GE Foundation requirements, one or more Explorations courses, and upper-division standing. Exploration of male roles from an interdisciplinary perspective focusing on men as workers, friends, lovers and fathers. Consideration of the choices available to men under the impact of tradition, feminism and a changing job market. Gender-oriented social and political movements. Traditional grading only.

#### 490. Special Topics in History (1-3)

Prerequisite: Consent of instructor. Topics of current interest in history selected for intensive development. May be repeated with different topics to a maximum of six units, but no more than three units may be used to satisfy the requirements for the major. Topics will be announced in the *Schedule of Classes*.

#### F. Women and War

Same topic as SPAN 493A and W/ST 490K.

#### \*494. Practicum in History (1-3)

Prerequisites: Consent of instructor and department chair. Field work in History, supplemented by reading and tutorials under the direction of a faculty member. Internships, small group discussion/teaching, and other assignments directed by a supervising faculty member. Course may be repeated for a maximum of 6 units. No more than three units may be applied to the major in History.

#### \*495. Colloquium (3)
