

TALK AND Q&A: AN INTRO TO CAL-BRIDGE

For students and faculty in Math & Stats

▶▶▶ Learn about a **\$15,000 / yr** scholarship for sophomores (Class of 2026) interested in getting a PhD in Math / Stats

Oscar Vega is the CSU Co-Director of Cal-Bridge Math.

Cal-Bridge is a scholarship program that supports only CSU students interested in pursuing a PhD in Physics & Astronomy, Computers Science, or any of the Mathematical Sciences (pure, applied, statistics, math ed, etc).

In this talk, Oscar will introduce to students and faculty what Cal-Bridge does, how it does it, who should apply, and what kinds of support it offers (besides the scholarship money).

◀ Cal-Bridge requires a faculty member at the campus the scholar attends to serve as their mentor. Hence, faculty interest in being a Cal-Bridge mentor is crucial for an applicant to be eligible for funding.

Scholarships are for up to \$15,000 per year for up to two years.

◀ Rising Juniors of any major at a CSU, interested in getting a PhD in Physics and Astronomy, Computer Science, or any of the Mathematical Sciences, are encouraged to apply.

Curious about
research and grad
school in math?

Thursday 3/7 in LA5-259

10:30-11:30am

Welcome to come for 1st/2nd half
